The President's budget message recommended spending cuts in fiscal year 1982 of just over $34 billion for the programs that are addressed in this reconciliation resolution. The Budget Committee was very conscientious in working on the President's program and went the President one further by cutting spending by an additional $2.3 billion. They have produced for us a budget resolution in near-record time and I commend them for it.

Since the Budget Committee wrapped up its budget deliberations, I have been carefully reviewing the budget that has been put forth. It is not identical to that submitted by President Reagan, although it tracks it substantially. The Budget Committee members set out their own priorities in this budget, some of which differ from the President's. In fact, it is the nature of the legislative process that spending allocations may be modified by Congress. One fact remains clear, however: Although we may differ on some specific budget allocations, I stand firmly with my Senate Republican colleagues in cutting overall Federal spending by the amount recommended by President Reagan. As I noted in my remarks on March 25 in this body, it is essential to our Nation's economic health that we pare back Federal spending by this amount.

My concern is that the spending cuts should fall fairly on all groups in the population and among all regions of the United States. My analysis indicates, however, that Illinois, the Midwest and Northeast regions of the country, may bear a disproportionate share of the budget reduction burden. The Chafee-Heinz-Percy amendment helps reduce the burden that will fall on Illinois, but it does not go beyond the context of the President's budget. In other words, even if the Chafee amendment is accepted by the Senate, our budget will have nearly $1.5 billion in additional savings, beyond what was recommended by President Reagan.

The Chafee-Heinz-Percy amendment will make, however, a change in budget priorities. It will reverse the unfairness that is implied in the budget proposals, as was so well expressed by the U.S. Conference of Mayors just a few weeks ago when the Conference noted:

> Federal grants to state and local governments would be cut significantly, from $54.9 billion in fiscal year 1981 to $47.2 billion in fiscal year 1982, a drop of over 14 percent in outlays and nearly 25 percent after accounting for inflation. This will result in a serious reduction in services to the poor and to the working people across the country.
>
> Although total state and local grants, according to the Office of Management and Budget (OMB), represent 14.2 percent of the Federal budget (including payments to individuals channeled through these governments), fully 66 percent of the total cuts in budget authority proposed by the Reagan Administration would fall on these programs. Thus, while the Administration asserts that this is a "growth" budget with a six percent rise in Federal outlays from fiscal year 1981, it is not a growth budget for the cities.

Mr. President, this amendment will bring the budget more into line with Illinois' priorities. This amendment does not contain all the funds that many people of Illinois would like to see restored. What we have here is a package on which we were able to reach consensus. Other programs could have certainly been added, but our general feeling was that addition of more funding restorations would undermine our ability to pass the Chafee-Percy package.

Let me describe for my colleagues the impact that the Chafee-Heinz-Percy amendment will have on my home State of Illinois, and our case will help similarly situated States.

Mr. President, I ask unanimous consent that a table showing the budget restorations in this amendment be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

CHAFEE PROPOSED BUDGET RESTORATIONS

[In millions of dollars, fiscal years]

	1981		1982		1983	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
Labor and Human Resources Committee:						
Low-income energy assistance			300	300	300	300
Health services			150	50	200	175
Elementary and secondary education	575	60	500	450	700	575
Labor and Human Resources subtotal	575	60	950	800	1,200	1,050
Banking Committee:						
Housing weatherization			50	50	50	50
Community development	300			98		128
Mass transit			200	25	300	300
Banking subtotal	300		350	173	250	478
Grand total	875	60	1,200	973	1,550	1,528

THE LOW-INCOME ENERGY ASSISTANCE PROGRAM

Mr. PERCY. Our amendment will restore $300 million for this program in fiscal year 1982. Illinois is the third largest LIEA recipient in the country, with $105 million allocated for this program in fiscal year 1981. The LIEA program, as its name implies, assists low-income households to meet the rising costs of home heating. With oil price decontrol, home fuel bills, as we all know, have continued rising this past winter. The poor have a particularly hard time with these payments and in some cases may be reduced to a choice between a decent meal and heat in the furnace. Particularly the elderly poor are adversely affected. The President has proposed a 25-percent cutback in LIEA, which could amount to as much as a $450-million reduction in the program next year. Our amendment restores a major part of this reduction.

COMMUNITY DEVELOPMENT

Our amendment will add $98 million for urban development action grants (UDAG) in fiscal year 1982. This has been one of the most successful urban development incentive programs ever devised by the Federal Government. It applies to big cities like Chicago, as well as smaller communities. Major projects have been started with the spark of a Federal grant. Over the 3-year life of the UDAG program, Illinois has received $120 million, the fifth largest recipient in the United States. Moreover, Chicago has been the second largest city recipient.

We have also put together excellent development programs for smaller cities in our State. Illinois has the two largest UDAG's for cities under 50,000 population. In Woodlawn we have a project that will spur investment, with a $6.5 million Federal grant. In Quincy, a $6.9 million Federal grant will provide the incentive for $125 million in private investment and several thousand new jobs.

All told, Illinois' 3-year experience with UDAG has been extremely productive, generating 17,000 new jobs.

This program is important to the State's well-being. Our amendment restores this program to the level recommended by President Reagan.

MASS TRANSIT

Our amendment calls for an increase of $25 million in spending for mass transit next year.

Illinois ranks third in the Nation in terms of Urban Mass Transit Administration (UMTA) operating assistance. Last year our State received a total of $86 million for mass transit programs, of which $80 million went to the city of Chicago. The Federal funds that were channeled to Chicago accounted for nearly 12 percent of the Regional Transit Authority (RTA) budget. The administration had proposed to phase out these operating subsidies in 1985.

Our amendment would keep a basic level of Federal assistance.

Without this amendment, the base fare on the Chicago RTA would climb from the present 80 cents to about $1.00, a 25-percent fare hike. It would be false economy to eliminate this assistance. In Chicago, more than 85 percent of those who commute to the Loop, the central business district, take mass transit. The RTA saves an estimated 11 million barrels of oil annually, displacing about 550,000 daily automobile trips.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point an excellent editorial that appeared in the Chicago Sun-Times earlier this year. It summarizes the need in older cities like Chicago for the maintenance of at least a basic level of operating subsidies.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Chicago Sun-Times, Jan. 10, 1981]

PUT TRANSIT POLICY IN BALANCE

When someone is "house-poor" it means he owns a nice big house but can't afford day-to-day living expenses.

Mass transit in Chicago and other older cities could end up in a similarly uncomfortable position if Drew Lewis, the transportation secretary-designate, has his way.

Lewis says the federal government should phase out operating subsidies to mass transit but continue making capital grants. That would mean more money to buy new buses and trains but less for salaries and fuel.

The feds already tilt toward capital. In the last fiscal year, they gave Chicago area mass transit $167 million for capital improvements but only $80 million for operations.

Yet it's the operating deficit that caused the recent fare hike. Ultimately, the Reagan policy could result in an RTA with lots of shiny new buses, trains and stations, but with fares so high that nobody uses them.

Politicians like capital grants because they're highly visible and can be handed out before crucial elections. And heavy capital assistance favors the politically powerful Sun Belt cities that are building new mass transit systems but have relatively small operating budgets.

The nation needs a balanced transportation program. It's fine for the federal government to invest in new transit projects to lure people away from cars. But if also should help keep fares low enough so that those who already are out of their cars don't return to them.

HOUSING WEATHERIZATION

Mr. PERCY. Mr. President, our amendment proposes to add $50 million to the program for fiscal year 1982. The President proposed termination, with some weatherization funds available under the community development block grant program.

Since the inception of the weatherization assistance program in 1975, over 700,000 homes have been weatherized. This translates into an energy savings of nearly 2 million barrels of oil each year in the homes that have been upgraded. Illinois has had the ninth largest weatherization program in the country. Together with the low-income energy assistance program mentioned earlier, these two programs help in our energy conservation effort. With the cold winters we experience in Illinois, they are too important to let them be completely disbanded.

ELEMENTARY AND SECONDARY EDUCATION

We propose to add $450 million for this function in fiscal year 1982. Last year, Illinois received over $260 million in education funds, including elementary and secondary education.

President Reagan has proposed reducing the ESEA program by $61 million or 23 percent of the total amount Illinois receives from the Federal Government. The major Illinois ESEA programs that would be affected by this amendment are these:

First. Title I ESEA for the disadvantaged. Now funded at $137 million in Illinois, the President's proposed budget would trim Illinois' share back to $111 million, a 19-percent cut.

Second. Education for the handicapped. Illinois now receives $49 million and the President's budget would cut this back by 20 percent, to $39 million.

Third. Vocational education basic grants. Illinois would suffer a 25-percent cut as funding would be reduced from $24 million to $18 million.

Under the Budget Committee's plan, Illinois would lose nearly 1,700 teachers and nearly 600 teachers' aides. With the Chafee-Percy amendment in place, however, the jobs of 500 teachers and 200 aides—otherwise eliminated—would be preserved.

I might add that Illinois contributes 100 percent of its State revenue sharing toward education. Last year that amounted to $110 million, but this source of funding has now been eliminated. The funds restored in this amendment today will go a small way toward cushioning these funding cutbacks.

HEALTH SERVICES

Our amendment would add $50 million in fiscal year 1982. The President has proposed consolidating about 20 programs into two new block grants: A preventive health services block grant and a community health services grant.

Under the present system, Illinois receives roughly $43 million for the health services programs that will be merged into the health service community block grants. The State's share in these programs is somewhat smaller than it should be if it were proportional to Illinois' population. Hence, cutbacks in this area—the administration proposed a 25-percent reduction—will have a significant impact. The same is true of the preventive health services block grant program. Illinois now receives about $14 million annually but would be reduced to $10 million under the President's proposal. These health programs provide important medical services with low administrative costs. The reductions in funding will then, by necessity, mean an actual cut in services.

Mr. President, I reiterate that the Chafee-Heinz-Percy amendment does not exceed the Reagan program in its overall scope. In 1975, five Great Lakes States—Illinois, Indiana, Wisconsin, Michigan, and Ohio—sent to Washington $18.6 billion more in tax dollars than they got back. It is unrealistic to advocate a dollar-for-dollar return on the funds we send to Washington, but since 1975, this trend has accelerated and it causes me concern. By 1979, these five States were sending $27.5 billion more to Washington than they were re-

ceiving. Our amendment today takes a very small step to prevent this continued erosion and maintains at least some of the basic services in Illinois.

The addition of these program amounts to the budget is made possible by a Budget Committee action concerning the strategic petroleum reserve. The Budget Committee assumed in its deliberations that a more cost-effective way could be found to fill the reserve, which would give us an important insurance policy against future oil disruptions.

I believe the committee action—by a vote of 13 to 4—is sensible and I agree with my colleague, the Senator from Kansas (Mrs. KASSEBAUM) that a more efficient way can be found. Her committee amendment cut $3 billion out of the budget, allowing nearly $1 billion to continue filling the reserve. It is from part of this savings that we have been able to fund the six programs in the Chafee-Heinz-Percy amendment.

I have opposed amendments this week to restore the funding for the reserve by cutting even deeper into programs that will affect Illinois. Although I believe a strategic reserve is a very high priority for this country, I am committed to my State's own interests and to making sure the budget reductions do not hit particularly disproportionately there.

Mr. CHAFEE. Mr. President, I reserve the remainder of my time.

Mr. ROBERT C. BYRD. Who yields time?

Mr. QUAYLE. Mr. President, I yield myself as much time as I may consume.

I think it is important to point out that this is not a regional issue. The speakers in the affirmative for this amendment so far have come from the State of Rhode Island, the State of Pennsylvania, the State of Maine, and the State of Massachusetts.

But it is not a regional issue. It has a broad, diversified support throughout the Nation because we are talking about education, we are talking about fuel assistance, and we are talking about UDAG.

Mr. President, I do not believe that anyone can argue with the merits of the programs that the proponents of the Chafee amendment are trying to put forward.

But what we can argue and what we will contend is that what we are trying to do is to go beyond what the Budget Committee recommended and go beyond what the chairmen of the two major committees that are recipients of those moneys; namely, the Labor and Human Resources Committee, and also the Banking Committee. We are not dealing with line items. We are dealing with functional categories, and the chairmen of those two committees have assured a number of us on the Budget Committee that they can live within the guidelines that the Budget Committee has come up with.

I might also point out that as far as the Committee on Labor and Human Resources is concerned, I and two other Republicans joined Senator HATCH, the distinguished Senator from Utah, in putting back about $1 billion for labor and human resources which is about $1 billion more than what the President recommended.

So, Mr. President, I hope that, when the final vote is taken, we will support the Budget Committee and its deliberation. I hope that we do not get into any regional fractionalization of this particular amendment and I hope that it is defeated, although I certainly understand the sensitivity and the sincerity of those Senators that are offering it. As I say, they are offering it for good programs but it has been deliberated and I certainly hope that it is defeated.

The PRESIDING OFFICER. Who yields time?

Mr. QUAYLE. I yield to the distinguished chairman of the committee.

The PRESIDING OFFICER. The Senator from New Mexico is recognized.

Mr. DOMENICI. Mr. President, I yield myself 10 minutes at this point.

The PRESIDING OFFICER. The Senator is recognized for 10 minutes.

Mr. DOMENICI. Mr. President, let me first say to my good friends who have offered this amendment it is with regret that I must oppose the amendment. I think the Senators involved know of the great respect that I have for all of them and in particular the prime sponsor of the amendment, Senator CHAFEE.

Let me say to the Senate we Senators can stand here and say that, with reference to the Labor and Human Resources Committee, they are returning money for elementary and secondary education, or they are returning money for low-income energy assistance. That just is not true.

What we are doing here is saying to a committee that has a broad spectrum of jurisdiction that we are going to add approximately $1 billion in outlays for their programs.

We can stand here and say that is not what we intend, but the truth of the matter is that it is what will happen.

They have everything from the National Science Foundation to the CETA program, with elementary-secondary education, some of the community health programs, and many other things in between.

The Senate should know what we did in committee, and we have said it a number of times, but it bears repeating. At the request of the chairman of the committee, Senator HATCH, roughly $1 billion was added back to this committee, so that it need not cut as much as the President asked. They already have been immunized from $1 billion worth of cuts that the President asked.

If we want to talk about what the distinguished chairman, Senator HATCH, did recommend in his assumptions, we have to start with the proposition that he put back $1 billion. He said it should go for the handicapped, it should go for vocational education, and that it should go for youth employment in CETA, roughly a third each. We already did that. Had we not done that, someone would have been down here saying we should put $1 billion back. I mean when do we get to the point where we have exercised some good judgment where we found some of the programs, some of the timing of the President's programs, lacking?

We thought $1 billion in this committee's instructions was a very good transition fund because many people are concerned that we might be moving away too fast from the 52 categorical grant programs in education, elementary and secondary, which GAO says 13 to 15 percent is consumed in administrative costs. We assumed that we should put in a few hundred million dollars because maybe we cannot get that whole package put together as quickly as we want, and we might need some extra money so that States do not suffer.

For those who want the entire billion dollars to go for education, they can go before that committee, the committee that the distinguished Presiding Officer sits on, and they can say that billion dollars should all go for education. One of the assumptions was that $4.7 billion for CETA, which the President recommended, is not enough. So one assumption was that about $400 million should go there.

Maybe the committee will not put it in CETA. They may put it in elementary and secondary education. That is their prerogative, not the prerogative of the Budget Committee.

I wish to tell Senators in the event that Senator CHAFEE prevailed and the committee indeed took all the money he wants to put in elementary and secondary education, I will make Senators this prediction: There will be no block grants for education.

I thought that is what we were kind of voting on, to try to change America's policy and try block grants.

Why will there not be block grants? Because, as a matter of fact, when you are finished adding back the money the Senator asks for in 1981 you will be minus 1 percent. People are running around saying "Programs are getting chopped." That simply is not true. You will be minus only 1 percent in 1981. You will be minus 6 percent in 1982 and, believe it or not, in 1983 you will add more than the current level of funding for education. You will have 3 percent higher under the Chafee amendment.

Now, I ask you, what will make both Houses of Congress go to a block grant? The only thing that will make them experiment with block grants and save that huge administrative funding that is in there, and get rid of some of the strings that are causing its effectiveness to be minimized, is if they have significantly less money so that they can deliver the right amount of money without the strings.

I ask you if minus 1 percent in 1981, minus 6 percent in 1982, and plus 3 percent in 1983 will force a policy change? That is what bothers me. The Senator argues this is going to elementary and secondary education. I am assuming that in this argument, although the truth of the matter is it need not because your committee, Mr. Presiding Officer, will make that decision. But if it did, there will be no change in American policy on education. It will be, to borrow one of these phrases that has been much used, "business as usual" just as sure as we are here. There may be 4 grants con-

solidated, and we will invent 14 more, and we will cut them all 1 or 2 percent, and we will be right back where we started from.

So the truth of the matter is this committee has received $1 billion in additional money, and that is before the Senate. If we vote this amendment in, it will be $2 billion additional. Obviously, there will be others who would say, "That still is not enough." But I thought this was an exercise in trying to change the policy of this country, trying to take programs that were not working and see if we could do them differently with less money.

As far as fuel assistance, I am sympathetic, but I am here to tell you that according to two major GAO studies, one 3 years ago and one 1 year ago, that program does not work, and there is no question about it. Congress has even acknowledged that, but we do not know how to make it work. We have changed that substantive law, I say to my good friend from Massachusetts, each year for 3 consecutive years, because we found out we were not getting the money to the poor people under fuel assistance. Something was happening in the middle. In fact, one time we sent checks to everyone who was on social security and SSI regardless of need, many of whom were not even paying their bills because their landlords were. We did not even know how to run that program that well. We did that for 1 full year.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. DOMENICI. I am going to finish in 30 seconds and I will find some time for the Senator.

I urge that those who really want to see this concurrent resolution work by forcing our committees to sit down and do more with less money, to try their ingenuity so that they can get the job done better with less money, that we ought to stick with the Budget Committee.

In the outyears obviously, 1983 and 1984, we will just have to see what happens. But for now the significant and important years are 1981 and 1982. We are not going to force significant change if we add a full $1 billion back to this committee.

The PRESIDING OFFICER. Who yields time?

Mr. KENNEDY. I yield 3 minutes for our side under the resolution. I would just like to ask a question.

The PRESIDING OFFICER (Mr. STAFFORD). The Senator is recognized for 4 minutes.

Mr. KENNEDY. As I understand it, the CBO has estimated that it would take $52 billion in 1982 to provide sufficient funds to maintain programs in the Labor and Human Resources Committee at current services; is that the Senator's understanding?

Mr. DOMENICI. Yes; $51.5 billion to $52 billion.

Mr. KENNEDY. All right. The Human Resources Committee made a $41 billion recommendation to the Budget Committee. The President had actually requested $39 billion. CBO says $52 billion is necessary for current services. The Budget Committee has gone from $39 billion up to $40 billion, which is still $12 billion less than CBO estimates for current services, and $1 billion below the level recommended by the Human Resources Committee.

As I understand the Chafee amendment, it would take the $40 billion and add somewhat less than $1 billion. This is below the Human Resources Committee and $11 billion below what is necessary to maintain current services.

I think it is important when we are talking about adding things back, that we also understand at least the point of departure.

Am I basically correct in the understanding of the figures as far as the chairman of the Budget Committee is concerned?

Mr. DOMENICI. Senator, I will say you are basically correct. I have to start——

Mr. KENNEDY. They have to be rounded off.

Mr. DOMENICI. I start with a little different baseline, and I will answer you in a moment. I do not want to use the Senator's time. But the Senator basically is correct.

What he is saying is there is a significant cut, and all that we did was to add $1 billion back to that significant cut, and Chafee would add $1 billion back. I will give the Senator the committee numbers in a moment.

Mr. KENNEDY. Fine.

The only point I make is even with the Chafee amendment the Senate will have gone about 95 percent of the amount of budget cuts the President actually requested, and there will be about an $11 billion difference between what was actually approved by the Senate and the current services level. The Chafee amendment still represents about a 20-percent reduction in the programs under the Human Resources Committee.

Mr. DOMENICI. I yield myself 2 minutes, and then I understand the Senator from Alaska wanted 5 minutes; Senator HATCH wants about 5 minutes; and Senator GRASSLEY wants about 5. I think that is the extent of time needed on our side.

Mr. CHAFEE. Yes; we have some who wish to speak on this side.

Mr. DOMENICI. Let me take a couple of minutes and make this point. So that the Senate wil have the numbers in terms of the baseline that the Budget Committee uses, the President asked that this committee cut $11 billion in budget authority for 1982 and $8.5 billion in outlays of its authorizing jurisdiction.

The committee itself felt they could not quite do that, and they said they could achieve a reduction of $10 billion in budget authority and $7.9 billion in outlays.

The distinguished chairman of the committee prevailed, and they are now ordered to do precisely what they said they could do. They met; they said, "We cannot do everything the President asked." They voted. The vote might have been slim, I do not know the numbers, Senator KENNEDY. You are on the committee. It might have been 9 to 9 or 10 to 8, but they voted.

What we have before the Senate is precisely what a majority of that committee said they could do. They could not do as much as the President wanted them to do. Therefore, the Budget Committee voted with the chairman of the committee being instructed, and put back $1 billion, which brings them to the exact point that they said they could do by a majority vote.

In addition, I would remind the Senators that under certain assumptions that have been made——

The PRESIDING OFFICER. The Senator has used his 2 minutes. He is recognized for an additional 2 minutes.

Mr. DOMENICI. Certain programs within their jurisdiction will be increased. The handicapped will be increased, not decreased. There are others that will be.

I do not say that to deceive anyone because that is up to the committee, but the assumptions made in the Budget Committee with the add-ons yield some plus-side figures for the handicapped program, and the like, and I repeat, we are merely asking them to do precisely what they told us they could do.

Now, does the Senator from Iowa wish to speak?

The PRESIDING OFFICER. The Senator is recognized for 5 minutes.

Mr. DOMENICI. I yield 5 minutes to the Senator.

Mr. GRASSLEY. I thank the Senator from New Mexico for yielding.

The amendment of the Senator from Rhode Island is one he says does not have a geographical direction to it, and I will accept his statement on that.

I want to say to the Senator from Rhode Island that my point of view is somewhat parochial; not parochial from a geographic standpoint, but parochial in terms of unwaivering Republican support for the President's economic recovery.

We have been very successful in our efforts to achieve fiscal discipline, because we Republicans on the Senate Budget Committee have had the support and leadership of our chairman, the distinguished Senator from New Mexico. Even though I have consistently voted against every amendment offered that would have increased spending, I found many that I would have liked to have supported. In my many years in the House, I did support many of these spending programs, but this is not a business-as-usual situation. Our current economic situation in this country is so bad, that we have got to change our voting habits. We must rethink our positions of support for these many programs that we have traditionally supported.

We have to only look at the fairness of the total situation. Are each of the regions of this country bearing a fair share? Are the interest groups in this country bearing a fair share of the burden against inflation? Is each one of the programs which have been established by previous Congresses bearing its fair share?

The Budget Committee has tried to do this. We have tried to indicate this as we have said, "No," to the popular programs we previously had supported. It has not been easy. We will have failed

if this amendment is approved after so many amendments have been voted down.

The assumption behind this amendment is that a package of programs is more likely to get enough votes to be adopted. I look at that as being too much business as usual. That is too much logrolling. That is not what the people expect of us as a result of the November 4 mandate.

I think the greatest weakness in the Senator's amendment, however, is that it assumes that we can spend the $3 billion savings achieved through denying SPRO increases.

Let me suggest to the Senator that an oil reserve is not a typical Government expenditure. It is, in essence, storage of some of the Federal Treasury's resources. It is like putting money in the bank. But the Senator proposes to take that money out of that bank, and to spend it on recurring programs. The Senator might just as well take gold out of Fort Knox, if there is any there, and spend it on these same programs.

What we are looking at here, in terms of changing the direction of public policy, is overall reduction of program that have recurring expenditures. The Senator suggests increasing expenditures for those programs that are recurring expenditures, and suggests payment, if I understand the logic and the approach of the amendment, with money that has been saved by not filling the oil reserve in future years.

I do not think that is a wise tradeoff I think that it is only jacking up the recurring programs to too great an extent. Not only will it discourage block grants, but most importantly, it will encourage other spending amendments coming down the road.

From my parochial standpoint as a member of the Budget Committee, I think that we have been successful in saying "no" to the business-as-usual people in the Congress who want to spend more.

The PRESIDING OFFICER (Mr. GORTON). The time of the Senator has expired.

Mr. DOMENICI. I yield 1 additional minute.

Mr. GRASSLEY. If the Senator from Rhode Island could be on the Budget Committee, if he could see the Republican side of rollcall votes go down, and he could see Mr. ANDREW, Mr. SYMMS, Mr. GRASSLEY, Mr. QUAYLE, Mr. GORTON, and Mr. KASTEN cast their votes, he would see that most often there was a block of "no" votes against increased expenditures. The Senator would know that approach came as a direct message from the voters in the last election, and that this is a form of policymaking that is different than usual.

I would suggest to the Senator from Rhode Island that his amendment is not something different. Rather, it is too much the business-as-usual approach that we do not need. It is time to say "no" to that, and that is why I am saying "No" to this amendment. I yield back the remainder of my time.

Mr. DOMENICI. Mr. President, I yield 5 minutes to the distinguished majority whip.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I am saddened that I have to oppose the amendment of the distinguished Senator from Rhode Island. I do so knowing that the items that are in his amendment and which he seeks to restore are for programs that I have supported now for 13 years.

As I told him earlier today, I do so because of the conclusion I came to last year, that our basic problem involves the interest on the national debt.

We are in the position now where the interest on the national debt is $95 billion. As a matter of fact, the increase in the interest on the national debt between fiscal 1981 and fiscal 1982 will be $10.8 billion even if we follow every recommendation of the President and even if the interest rates are averaging 10 percent for that period of time on the outstanding long-term debt of the United States. The last assumption does not appear to be a valid one at this time.

That $10.8 billion increase is more money than we now have available for the Department of the Interior, the Department of Commerce, and the Department of Justice, the three Departments that have a great deal to do with my State and, I think, the whole Nation.

We find program after program that has either been reduced or eliminated. It has been done primarily because of the necessity to stop the Federal Government from going into the money markets and borrowing money for deficit spending which drives the interest rates up. The interest rates must come down or we will not be able to right this economic ship of ours.

It is with great reluctance that I oppose Senator CHAFEE's amendment.

In other days, and I do hope there will be other days in the future, when we can restore funding to some of these programs, he will be a great leader in establishing priorities for those programs. But right now there just is not money for these programs if we are to maintain the discipline we need to correct the problems related to inflation, the high unemployment, and high interest rates occurring simultaneously. If you put those together with low productivity, I think the situation today is worse, really, in my opinion, than it was in 1929.

Mr. President, we are approaching $1 trillion in debt. In 1929 we had $19 billion in debt. I cannot see any way for us to treat a severe recession-depression in future years as past Congresses were able to treat the period from 1930 on. I think we have to have the discipline that is required to be able to say "no." Many of us are saying "no," not only to programs we have supported in the past, but some of us to programs we initiated in the past.

I would urge my friend to keep that in mind as we do oppose this amendment. I urge the Senate to defeat this amendment.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BRADLEY. Will the Senator yield 30 seconds?

Mr. DOMENICI. I yield 30 seconds.

Mr. BRADLEY. Mr. President, I wish to support the amendment offered by the Senator from Rhode Island. Part of this package is an increase in funding for low-income energy assistance by $300 million in fiscal year 1982 and fiscal year 1983, and an increase in funding for mass transit.

In 1979 Congress enacted this program to provide funds to help low-income households meet rising home heating or cooling costs. For fiscal year 1982, 95 percent of the $1.8 billion is distributed by formula to the States as a block grant. The remaining 5 percent is allocated to the crisis assistance program of the Community Services Administration.

The Reagan administration has proposed to consolidate the low-income energy assistance program with other emergency assistance programs and to reduce funding by 25 percent, or $450 million from the energy assistance funds.

This program is intended to offset the effects of escalating oil prices on low-income people. World prices continue upward. The new administration's immediate decontrol of domestic oil has also hit every American household with stiff price increases. This seems hardly the time to reduce funding for those Americans least able to absorb these price shocks.

Even if oil prices had not increased as dramatically as they have in the past, it is not obvious that a 25-percent reduction in this program is consistent with the explanation behind it. Programs proposed for block grants, it is said, can be reduced by 25 or 30 percent because overlapping layers of administration and bureaucratic controls will be eliminated through consolidation. Under current practice 95 percent of the low-income energy assistance funds go to the States as block grants. The remaining 5 percent goes to the CSA for a separate program. It is difficult to identify the overlapping administration here.

Mr. President, the decontrol decision was a most difficult and agonizing one for me. I have supported decontrol because it is the right energy policy and the right economic policy. However, rising prices are a terrible tax on low-income people in New Jersey and every other State. The windfall profits tax that I helped pass 2 years ago captures a large portion of the higher oil prices for the Government. In fact, one of my amendments will tax away 70 cents of each dollar increase in oil in production before 1978. The Congress agreed that a portion of these funds would go to low-income people to cushion the effect of higher prices. To go back on that promise is wrong. It is also wrong from a humanitarian point of view.

If these points do not move my colleagues, let me point out that over the next several years good energy policy and good economic policy will call for moving away from Government allocation

and control and that might have the unavoidable effect of raising energy and other prices. If we now go back on the promise we made to cushion the effect on low-income people, we may be unable to generate support for the tough energy and economic decisions still to come.

I urge my colleagues to support the amendment.

Next, Mr. President, I urge the Senate to adopt the amendment of the Senator from Rhode Island because it restores $25 million in outlays for 1982 and $300 million in outlays for 1983 for mass transit.

There are four reasons why the Senate should adopt this proposal.

First, economic development. The administration maintains that the cuts in spending are necessary for economic development, but they fail to recognize the enormous short-term economic problems which will result when transportation lines are forced to cut back on services, and, they fail to recognize the enormous long-term economic gains which could be realized if we rebuild our industrial base in an energy efficient manner through the use of mass transportation. If we are to redevelop our older industries and strengthen our industrial base in general, we must have efficient transportation. To develop these efficiencies we must abandon the economic assumptions of past decades which emphasized the use of the private automobile. Instead, we must respond to the economic realities of today by supporting and maintaining mass transportation.

A second reason to support this amendment concerns our national energy needs in particular. The administration seems to have a Dr. Jekyll-Mr. Hyde attitude toward using the price mechanism to solve our energy problems. The administration is willing to let producers face higher energy prices to encourage production, they are willing to let consumers face higher energy costs so there will be efficient allocation of energy resources, and they are willing to let the State and local governments bear the burden for energy costs. But, when it is up to the Federal Government to respond to the higher energy prices by investing more in mass transportation systems which will efficiently allocate our energy resources, then the administration loses faith in the price mechanism's ability to force prudent responses to energy realities. Just as consumers are expected to respond to the higher prices by paying for home insulation and by investing in fuel-efficient automobiles, so, too, the Federal Government should respond to the price mechanism by investing more in mass transportation.

The administration seeks to reduce Federal support for mass transportation because they do not believe that those who use mass transportation are doing enough to support mass transit. This assumption is simply not true. In my State of New Jersey the bus fares pay for 70 percent of the costs of the bus service, and, these fares are scheduled to increase by over 50 percent in the next few months. Rail fares will face a similar increase this year and another major increase in the beginning of next year which will double rail fares over current levels. These fare increases are necessary not because of the withdrawal of Federal support, but simply because the New Jersey Transit System is facing enormous increases in energy costs and enormous operating deficits will result unless the State officials act responsibly by raising fares. So, a third reason why the Congress should restore funds for mass transit is because passengers and local governments throughout the Nation are already doing their share to support mass transit; the Federal contribution to mass transportation systems is in conformity with the Federal interest in maintaining those systems.

The final reason why I believe the Senate should restore these funds for the 1983 fiscal year is to keep the truly needy from suffering. The administration claims that operating subsidies are not targeted toward the needy because both the rich and poor can take advantage of mass transit. However, if our national commitment to mass transit is reduced, it is the working poor who will suffer because for the working poor mass transportation is not a convenience, it is a necessity of life. We have a national interest in providing inexpensive mass transportation for these people and our Federal policy in the past has been to encourage the States to maintain transportation fares at rates which are as low as possible so that these working people can succeed. Now is not the time to change our Federal policies by abandoning our commitment to mass transportation.

Mr. DANFORTH addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. DANFORTH. Mr. President, I yield myself 10 minutes on the bill.

The PRESIDING OFFICER. The Senator from Missouri is recognized.

Mr. DANFORTH. Mr. President, I rise today to offer my support for Senator CHAFEE's proposal.

His proposal, and indeed the entire budget debate over the last few days, addresses the classic dilemma of the day—how much can we afford to do?

Every program under discussion was born of the best motives—the desire to respond to genuine human needs. Americans are a compassionate people—we always have been and we always will be. But what happens when we go too far in trying to solve human problems through direct Government intervention?

We create a monster—a bureaucracy with ever-expanding, overlapping agencies—that intrudes increasingly in our lives. The Federal Government has, unfortunately, reached a point where it does more to the American people than it does for them.

In our compassionate desire to provide food for the hungry, economic aid for the poor, and hope for those in despair, we have lost sight of the horrible side effects of over promising. The side effects are readily evident in today's economy.

There is nothing compassionate about 20-percent inflation rates, double-digit inflation, and 7½-percent unemployment. Yet, this is the economic cost borne largely of excessive Government.

The public has come to recognize these costs too. In November, the people of this country overwhelmingly indicated at the polls their desire for change. They recognize that we cannot sustain the rapid growth in social programs on a deteriorating economic base. Over time, a deteriorating economy leads to still fewer opportunities for our people.

We are now trying to reverse this downward tide. The Congress is following the President's lead in limiting Federal spending. It is clear that this process will, at least in the short run, hurt those least able to help themselves. Because we cannot cut back on the cost of servicing the national debt, and because there is strong bipartisan support for reversing the decline in our national defense capabilities, spending cuts will affect programs which transfer resources to the more vulnerable segments of society.

Does this mean that our national commitment has declined? Emphatically not. It reflects instead a change in strategy. The justification for budget restraint is economic growth. Such growth should be the real hope for those who have not yet shared in the abundance of America's wealth.

It is this change in economic strategy that we in Washington are trying to effect. How do we do it? Where do we reduce spending and by how much?

These questions have no consensus answers. They never do. What Senator CHAFEE, and I, and others believe is that in some areas we risk going too far, in cutting back too much. The less than $1 billion proposed to be added back in 1982 spending is a very modest restoration. Others would restore much more, and some will insist on holding the line where we are.

I believe that Senator CHAFEE's proposal is a modest one when compared to the more than $40 billion we are trying to cut. With regard to the programs affected, there will still be significant reductions imposed—reductions which will create hardship enough as they are absorbed.

I would urge my colleagues to support the proposal of my colleague from Rhode Island.

Mr. President, what we are engaged in is an act of economic necessity for this country. That is an effort to try to get get some control on Federal spending, to try to reduce the Federal deficit and, hopefully, over a period of time, to erase that deficit altogether and create a balanced budget.

This is not an effort, Mr. President, in pure philosophy. It is an effort, instead, to try to improve the economic health of this country for the benefit of all its citizens.

Most of us who seek political life as a career do so because we have a degree of compassion and concern for our fellow man which we want to serve. In that process over a period of decades, we in politics, and particularly at the Federal level, have undertaken a host of programs which we felt, at the time they

were created, were designed to serve those who were in need.

However, we now find that we have overextended ourselves. The Federal debt is now pushing $1 trillion. We have gotten ourselves in the situation where each year the Federal deficit runs about $50 billion or so. Interest rates hover around 20 percent and inflation rates are in the double digits.

There is nothing compassionate, Mr. President, about that kind of circumstance. There is nothing compassionate about high interest rates, high inflation rates, and the human misery that they create.

Now we have embarked on an undertaking to try to reduce that deficit and to try to restore the kind of soundness to our economy which offers hope for the American people.

In doing so, we are called upon in this budget resolution to make cuts in various programs of the Federal Government. Because of the fact that we are locked into servicing the national debt, we cannot reduce the amount that is required to service the debt.

Because of the fact that there is a very strong consensus in the Senate, as I personally think there should be, for having a solid and improved national defense, we are not going to see cuts in the national defense budget. Instead, we are increasing national defense.

Therefore, those budget cuts, lamentably, we have to make, but we do have to make them because we have to be responsible for our country. Those budget cuts, Mr. President, tend inevitably to focus on parts of the country that can afford them the least. That is to say, we reduce the amount of money otherwise available for transfer payments, which, by their design, are aimed at improving the economic condition of the most needy people in our society.

Similarly, and there has been much comment on this in the press, it is clear that when we go about the process of balancing the budget or reducing the budget deficit, it has a geographical impact. Clearly, that is the case.

It has been pointed out by the Senator from Rhode Island and others that these particular changes in the budget that are encompassed in this amendment are not regional. They are not. They touch everybody.

However, Mr. President, it is clearly true that when we restrain the budget, when we cut the budget, that very exercise has a greater impact on those cities which are bankrupt than those cities which are well off.

It has a more adverse effect on those States which are declining economically and have seen jobs move elsewhere than it has on those communities which have seen their State and local tax revenues constantly increase over the last few years, the so-called Sun Belt.

So, there is no doubt, Mr. President, that while we undertake the necessary job of reducing the weight of the Federal Government and the burden of the Federal deficit, the very process of doing so, while necessary, does have a disproportionately adverse effect on the poor, on those who are in need, on those who have become dependent on the Federal Government, and on those regions of the country that are in economic decline.

What we are involved in here, in the Senate, right now, is a balancing act. We are attempting to bring into some kind of balance on one hand the desire to reduce Federal spending, or, at least, to control the growth of Federal spending, and, on the other hand, the need to mitigate the damage, the harm, that is caused in the budget-cutting process among those people and those regions that are most in need. That is precisely what the amendment of the Senator from Rhode Island is intended to do and, in my opinion, does.

The areas of restoration in the Senator's amendment focus primarily on people who are most in need—low-income energy assistance, community services, elementary and secondary education, most especially title I, aid for school districts which primarily serve low-income people; housing weatherization, community development, mass transit—programs which affect most notably people who are most in need.

Mr. President, several weeks ago, a meeting was held in the Capitol Building between Senators and Members of the House representing the Northeast and the Midwest with OMB Director Stockman and others. At that time, the question was put to Director Stockman: "Is there flexibility in the budget? Is there room to maneuver? Is there enough flexibility on the part of the administration so that we are not locked into the precise details of the administration's program?"

The Director of OMB said at that time:

> Of course, there is flexibility. What we are interested in is the end result, but, of course, the job of Congress is to use its judgment on precisely what is cut and what is not cut.

What concerns me about the statements on the other side of this amendment is the degree of inflexibility on the part of the Committee on the Budget. Suddenly, it is the position of the Budget Committee that we are, in fact, locked in, that we are committed to the details of the Budget Committee's work. That is contrary to the position of Director Stockman with respect to the administration's program.

In point of fact, Mr. President, without this amendment, we are now some $2.3 billion below the President's program. Even with the Chafee amendment, we would be approximately $1.4 billion below the President's program. We have met the target and then some. The issue before us now is whether we can at least do something to mitigate the harm that is caused to those individuals and those regions of the country that are least able to overcome them.

Mr. SPECTER addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE. Mr. President, I yield time to the Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I ask unanimous consent for leave to speak 10 minutes and I shall probably do it in less.

Mr. DOMENICI. Mr. President, the Senator does not need unanimous consent. We shall give him 10 minutes on the bill.

Mr. SPECTER. I thank the Senator from New Mexico.

Mr. President, I support the amendment now pending on the floor, both because of the important programs which it involves and, more fundamentally, because I believe it is a signal that there is due consideration by the United States on very severe changes in budgeting which are being affected by the resolution which is now before this body.

I think that the Budget Committee has done a remarkable job in fashioning the resolution which is before us today. I believe that, beyond the work of that committee, it is very important that consideration be given in greater detail by the Senate as a whole and the amendment which has been proposed has been fashioned after very substantial deliberation and consideration. In my judgment, it is a very modest reinstatement of funding on a very few lines and ought to be adopted.

Mr. President, I have grave concern about the timetable that the Senate has followed in coming to the judgment which it has and which it will doubtless conclude within the course of the next day or two. It was only on February 18, when President Reagan delivered his state of the Union speech, that we had the outline of his proposal. Then, until March 10, we had some further specification of facts.

It is my view that the people in this country have very little understanding of the scope of what is going to happen as a result of the resolution of reconciliation process which, I think, will soon be passed by the Senate and doubtless will be agreed to in some substantial form by the House and will become law.

I have spent a day in Pittsburgh and a day in Harrisburg and a day in Philadelphia, talking to people in various groups—from the business community, from the labor community, blacks, farmers, mayors, elected county commissioners.

I found there is, at the moment, relatively little understanding of the scope of changes which are going to be occasioned by what will result from this matter which we are now considering.

I believe that when the full effect of this resolution is felt, there is going to be a sharp amount of dismay around the country. Nevertheless, I think that it is important that the President's figures be adhered to, because of the very desperate economic status which confronts the Nation. I think those who have spoken—and eloquently, indeed, they have spoken—about the necessity for budget cuts so that we can move against inflation and move against the interest rate and move against unemployment, are exactly right.

But in this complicated admixture, I do believe that it is important that this body give consideration, in some greater detail than has been considered up to the moment, to the impact of these cuts on the people who have received these services and have come to rely upon them for a great many years and, it may well be, have come to rely upon them in a way

which is totally adverse to the national welfare.

I do think that the amendment which is now pending before the Senate is a modest reinstatement of some items in categories which are very, very important, in categories which have a broad national effect so that they are not regional in import. I believe it will serve as a signal to those who will be significantly affected by the budget cuts that there has been careful consideration and there has been an effort to do what is possible and what is practical by the Senate within the constraints of the President's program, which, I think there is virtual unanimity, should be adopted, with some regard for those who are going to be affected.

For those reasons, Mr. President, I support this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE. Mr. President, I ask unanimous consent that Messrs. BRADLEY, METZENBAUM, BURDICK, HART, EAGLETON, MOYNIHAN, and SARBANES be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, how much time does Senator SARBANES want?

Mr. SARBANES. Two minutes.

Mr. CHAFEE. I yield him 2 minutes on the bill.

Mr. SARBANES. I thank the Senator for yielding.

Mr. President, I rise in strong support of this amendment.

Mr. HOLLINGS. Mr. President, I yield such time as is necessary to the Senator from Maryland.

Mr. SARBANES. Mr. President, I thank the Senator.

I want to underscore two parts of this amendment, Mr. President:

First, that part which restores funds for the urban development action grant program. This program has been a tremendous stimulant to economic development and to jobs creation, the very objectives which everyone is asserting we wish to accomplish in the Nation. It is a program which has been particularly successful in obtaining private investment for projects in areas of economic difficulty and has led to permanent employment for many of our Nation's citizens.

The UDAG program is a program that has worked extremely well in my State. It has met its objectives, and it should be continued. In the short time the program has been in operation, almost half a million jobs have been created nationwide, of which just under 300,000 are permanent.

The UDAG has been most successful in leveraging private investment. For every dollar of Federal money, more than $6 in private funds have been invested, totaling roughly $12 billion nationally in private investments. It has helped to strengthen the economic base of countless numbers of cities across the country.

Maryland participation in this program has been enormously successful. We have the highest investment ratio in the Nation. For every Federal dollar that the projects have received in Maryland from the urban development action grant program, private industry has provided just under $9. We have almost a 9-to-1 leverage ratio with respect to the urban development action grant program. It is a program which has worked well to bring forth private investment, jobs, and a strengthened economic base.

I urge the Senate to approve this amendment and to carry forward this very important program.

Mr. President, I ask unanimous consent to have printed in the RECORD an article published in the National Journal of March 21, discussing economic development aid and particularly the urban development action grant program.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ECONOMIC DEVELOPMENT AID—SHELL GAME OR THE KEY TO URBAN REJUVENATION?

(By Rochelle L. Stanfield)

BALTIMORE.—The signs are everywhere: the shoppers and lunchtime crowd strolling through the new waterfront shopping mall called Harborplace; the construction crews completing work on a hotel and city aquarium; sweet, rich odors issuing from a spice factory. This city, 10 years ago a crumbling symbol of urban distress, is rejuvenating itself.

The reason is what city planners call economic development: public investment to stimulate private business as a means of reversing decline.

For Baltimore, a significant portion of the public investment came from Washington. Democratic Presidents and Congresses have pushed federal economic development programs for 20 years, and President Carter made them central to his urban policy.

But now the President is a Republican who believes in turning such responsibilities back to the cities. After all, he might point out, when the construction of the Baltimore & Ohio Railroad in 1828 helped this city's harbor recoup some of the business that the Erie Canal had siphoned off to New York, the public money that supported the project was local, not federal.

In the view of Dave Stockman, director of the Office of Management and Budget (OMB), that's the way economic development should always work. Even when federal economic development assistance succeeds, he argues, it does so only at the expense of over-all national economic growth. "We have a great shell game going on here," he told the House Public Works and Transportation Subcommittee on Economic Development on March 11, "but I'm not sure who is helped."

Local officials here believe they are helped—and that they need the special attention that Stockman opposes. "There is a naive assumption that general economic growth will improve the economic condition of everybody, including cities," said Bernard L. Berkowitz, president of the Baltimore Economic Development Corp., who, when he was the city's physical development coordinator, guided Baltimore's economic development strategy. "Our experience over the last 20 to 30 years contradicts that."

Berkowitz may have not real allies in the Reagan Administration, but some are more sympathetic than Stockman. Housing and Urban Development (HUD) Secretary Samuel R. Pierce Jr., for example, feels that while the cities should bear the major responsibility for economic development, a federal role remains.

For the moment, Pierce seems to have made some impact on White House policy. In the budget that he submitted to Congress on March 10, President Reagan proposed eliminating the Commerce Department's Economic Development Administration (EDA), whose 1981 budget is $668 million. But he modified an earlier proposal to submerge HUD's urban development action grant (UDAG) program by combining it with other grants, deciding instead to keep it going at least through 1982. At the same time, however, he cut the UDAG budget from $675 million to $500 million and trimmed or eliminated many of the 65 other federal aid programs that support economic development activities.

The decision to save urban development action grants followed a fierce response to Reagan's earlier proposal. No similar support has developed for EDA—but it may.

"The country is in the mood to cut, but no one has lost their job yet," said Baltimore Mayor William Donald Schaefer. "Come April 1, when we have to lay off 300 to 500 employees because of these cuts, you'll begin to hear a loud cry."

FEDERAL INTERVENTION

When economic development programs work as intended, they help provide the elements necessary for private investment—competitively priced land, public facilities such as sewers and roads, an attractive local tax structure and a skilled labor force. Reagan's proposed cutbacks in economic development assistance surprised many urban advocates who believed he would appreciate programs designed to stimulate private enterprise.

"People prematurely thought this Administration would like economic development programs, but economic development is government intervention, and they like no intervention at all," said William B. Stafford, intergovernmental assistant to the mayor of Seattle, Wash.

Reagan outlined his approach to economic development in his Feb. 18 message on the economy: "We believe we can do better just by the expansion of the economy and the job creation which will come from our economic program."

A corollary holds that economic development programs don't really stimulate employment. "EDA doesn't create jobs," Stockman told the Economic Development Subcommittee. "It reallocates them."

OMB's "black book" of proposed budget cuts, which circulated in Congress in February, argued that this reallocation is downright harmful. If an urban development action grant influenced an employer to locate in a city, it said, "it would impose an economic cost on the over-all economic efficiency of private-sector investments. In theory, the UDAG program compensates the private sector for shifting investments to high-cost or less economically efficient areas. This reduces the net economic (although not necessarily the social) gains from any given amount of investment."

Urban advocates have no use for this line of reasoning. The federal government couldn't withdraw from local economic development even if it wanted to, they argue. For every conscious federal effort to promote economic development in particular cities or regions, there is a "neutral" federal program with important effects on local economies, such as highway aid.

"Market forces don't account for all the difference between growing and declining areas," said Robert C. Embry, assistant HUD secretary for community planning and development during the Carter Administration and now a partner in a Baltimore energy conservation firm. "Federal money has been very important. Where would San Diego be if not for all the federal spending on military bases there? And Houston, if not for the oil depletion allowance?"

"The federal government has created some of the imbalance," added M. Walter D'Alessio, executive vice president of the Philadelphia

Industrial Development Corp. "Government has some responsibility to resolve the problems."

William W. Blunt, Jr., a Washington consultant who headed EDA during the Nixon years, wonders about the logic of aiding individuals, as Reagan proposes, by retaining "safety net" programs such as social security and medicare, but not supporting the economic bases of the cities in which they live.

"Wouldn't it be more consistent to figure out a way to help the marketplace, through marginal incentives, to provide people with jobs?" he asked. "That's what the Economic Development Administration programs do."

Even if Reagan is able to pump up the economy, some local officials doubt that the benefits would be distributed in the best possible way. "Say the tax cuts and deregulation give confidence to the investors and a lot of economic development happens in the cities," said Seattle Mayor Charles Royer. "I frankly would rather have UDAG so we could give that development some direction, have something to say about who benefits."

ACTION GRANTS

So would a lot of other city officials. In fact, action grants, which were authorized only in 1977, have quickly become the most popular form of economic development assistance.

Only about half the nation's localities are sufficiently "distressed" to apply for action grants, and HUD by no means accepts all applications. HUD officials say they insist that local governments obtain promises of at least $2.50 in private investment for every federal dollars; in practice, they say, private industry invests $6 for each action grant dollar. Through the first three months of fiscal 1981, HUD approved 963 action grants for about $1.8 billion.

Here in Baltimore, Equitable Trust Co. planned an office complex and convention center in the inner harbor development area but would not go ahead unless another company built a hotel. Hyatt International Corp. had considered building a hotel but feared it would lose money. So an action grant provided a second trust to assure a profit even if the hotel's occupancy rate was only 65 per cent, and on the strength of that, the Rouse Co. built the shopping mall called Harborplace.

"Not many people realize that no federal money went into Harborplace," said Embry. "And all the money that went into the hotel is being paid back."

Because of success stories such as Baltimore's, action grants have attracted the support of city and state officials, neighborhood groups, civil rights organizations, bankers and developers. "If that many constituencies are for a program, it must be doing something right," said Sandra B. Solomon, government affairs director of the National Urban Coalition.

Supporters were taken by surprise when Stockman recommended the program's termination. "I didn't realize it was so controversial," said Embry. "It had fairly universal praise, and Congress increased its budget [from $400 million to $675 million in 1980] at a time of fiscal austerity."

But the program is not without its detractors. "UDAG reinstates all the ugly aspects of grantsmanship: long lines, expensive consultants, furtive efforts to know the decision maker . . . and no certainty that the communities in need will succeed," Carla A. Hills, HUD Secretary in the Ford Administration, wrote in a letter to The Washington Post on Feb. 21.

After its enactment in 1977, neighborhood groups were skeptical of a program they believed to be developed solely to benefit downtown development, the recipient of much of the early money. Neighborhood advocates complained that a disproportionate amount of the funds helped build hotels, and some called it federal aid for Hyatt. But Embry said that of the nearly 1,000 action grants made during the Carter Administration, only 90 assisted hotel construction and only five of these were for Hyatts.

In 1978, Congress disarmed the neighborhood organizations by setting aside a separate pool of action grant money for neighborhood projects. Although some of its members remain wary, the neighborhood movement is part of the constituency clamoring for the continuation of the program.

Nonetheless, Stockman picked up on this problem in his black book, arguing that "this categorical program exposes the federal government and the Administration to local criticism and objections to particular development projects. There has been adverse publicity in the past over excess emphasis on some types of projects (e.g., luxury hotels)."

Neighborhood groups have also complained that action grants create mostly dead-end jobs, such as those required to operate a hotel. But Embry believes that's the price for making work for the unskilled. "The more upward mobility you build into the jobs," he said, "the fewer poor people will be hired for them."

Others deny that most of the jobs are dead end. Royer points to a $250,000 action grant that enabled Fluorocarbon Inc. to finance a $900,000 expansion and remain in a low-income section of Seattle.

"Fluorocarbon employs 325 people, two-thirds of whom walk to work," said Royer. "The action grant saved those jobs, skilled and unskilled, and will create 70 new jobs as the company expands. Otherwise, the company would have moved out of the city."

Another criticism of the action grant program, leveled by the General Accounting Office (GAO) in early 1979, is that the development supported by the grants would often have occurred without them. Stockman made a similar charge in his black book.

Program advocates are quick to respond, however, that the grants are critical to their economic development packages. "The hotel was essential to our inner harbor development," said Schaefer. "And the developer would not put up the hotel without that UDAG."

Although HUD requires cities to certify that potential development projects would not go ahead without action grants, the proof is difficult to supply. And even if a city can show that an investment would not be made in a specific location in the absence of federal funds, it is nearly impossible to show that the investment would not have been made somewhere else.

The congressional sponsors of the action grants "did not intend for these subsidies to attract funds from the suburbs into a central city," Dennis J. Dugan, associate director of the GAO's program analysis division, told a Princeton University conference late in 1979. "So the question is whether this is new investment that will actually be created or whether it would be created elsewhere in the economy."

D'Alessio says the competition for investment is not necessarily with the suburbs but sometimes with foreign countries. He points to a $1.5 million action grant with which Philadelphia enticed the Budd Co., a maker of rail cars, to remain in Philadelphia and retool. The alternative was for Budd to give up the rail car business and let its business go to Kawasaki of Japan, according to D'Alessio. "So Budd invested $20 million and UDAG put in $1.5 million and now it's able to supply rail cars to Korea," he said.

For city officials, Stockman's toughest criticism is that action grants for the most part duplicate what the cities can do with their community development block grants.

The Reagan Administration prefers the block grant approach. "The UDAG program, with its emphasis on intensive, direct federal intervention in local investment decisions, is inconsistent with the basic block grant philosophy of delegating decision making," Stockman's black book asserted.

In general, the mayors agree. But in this case, they appreciate the fact that because not every city receives action grant money, those that do get more than their proportional share.

"UDAG says to private industry, 'If you put in $100 million, we'll put up $10 million,'" Schaefer said. "But if all you get [from the federal government] is $1.95, that doesn't help very much."

Embry argues that a heavy federal hand is what makes UDAG projects successful. "The applications that come in and the projects that are finally agreed to are like night and day," he said.

After the cities protested Reagan's announcement on Feb. 18 that he favored folding action grants into the community development block grant program, the Administration backed off. For 1982, Reagan's revised budget sets aside $500 million for action grants as a discrete piece of the $4.17 billion block grant program.

But the action grants' future beyond 1982 remains in doubt. Pierce told reporters he was thinking about folding them into the "urban enterprise zone" proposal that the Reagan Administration is preparing as a means of using tax and regulatory breaks to attract business to distressed areas.

"Although UDAG may have been successful," he said, "in combination with enterprise zones it may be even more successful."

EDA PROGRAMS

If many local officials howled over the prospect of losing action grants, few of them so much as whimpered at the proposed termination of the Commerce Department's Economic Development Administration. That may have been out of recognition that only one of the two programs could be saved and that EDA grants are spread much thinner than the action grants.

Whatever the reason, the silence may have prompted Reagan to single out EDA in his televised speech on the economy on Feb. 18.

"By terminating the Economic Development Administration, we can save hundreds of millions of dollars in 1982 and billions over the next few years," he said. While no "consistent evidence" shows EDA's success in creating jobs, he added, it has been "effective in creating an array of planners, grantsmen and professional middlemen."

While EDA's budget is about the same size as that of the action grants program, its scope is much broader because of its technical assistance program, which helps localities develop the capacity to package economic development deals and to make the city inviting to private business.

"EDA is the only agency of the federal government that can provide that kind of assistance," said James T. Peterson, a former EDA official and now the executive director of the Council on Urban Economic Development, which lobbies on behalf of local development officials and consultants. "UDAG is a deal. It's important, but it doesn't add to the environment conducive to investment."

Cities use EDA grants primarily to build public facilities—access roads, sewer connections, parking garages—that industry needs to operate. Baltimore is getting about $10 million over three years to assist in the development of half a dozen industrial parks.

Without federal aid, Berkowitz said, these developments would have been impossible. "No private developer would undertake our Fort Holabird or Raleigh industrial parks without the EDA funds that paid for the infrastructure. It's highly unlikely that the city would have had the funds available to carry those projects out."

The Reagan Administration complains that so many areas of the country are eligible for EDA assistance—currently about 80

percent—that the money cannot be concentrated where it is most needed. But it is precisely this feature that has made EDA popular in Congress, whose Members relish the opportunity to cut the ribbons on all the facilities built by EDA funds.

In fact, the House 11 years ago inserted a provision into EDA's authorization that forbids the removal of any locality once it has been declared eligible for EDA support. Only about 60 percent of communities are now statistically eligible for EDA grants, but another 20 percent continue to receive funds because they were once eligible.

"We've always been plagued by the ambivalence of wanting to concentrate resources on truly needy areas and the need to build political support," said Harold Williams, the acting assistant Commerce secretary who runs the agency.

The Senate tried in 1979 to limit eligibility, but the House wouldn't go along. That was one of several issues that scuttled legislation to reauthorize EDA and forced Congress to enact stopgap authority that expires on Sept. 30.

That will simplify the Administration's effort to kill the agency. Already, OMB has frozen EDA spending in advance of a request to Congress to cut off its spending authority for the rest of this fiscal year.

But others aren't ready to write off EDA yet. A small bipartisan phalanx of supporters in the House lectured Stockman on its virtues at the March 11 hearing of the Economic Development Subcommittee. In the Senate, former Environment and Public Works Committee chairman Jennings Randolph, D-W. Va., and former Regional and Community Development Subcommittee chairman Quentin N. Burdick, D-N.D., are mounting a campaign to save EDA. But their view is not expected to prevail.

ENTERPRISE ZONES

Despite the Administration's opposition to action grants and EDA, its officials maintain that they favor federal support of economic development activities and are preparing an American version of the British program of "urban enterprise zones."

Reps. Jack F. Kemp, R-N.Y., and Robert Garcia, D-N.Y., introduced enterprise zone legislation last year that would have reduced taxes and regulatory burdens of businesses located in distressed areas. At a recent National League of Cities meeting, Kemp said he did not want an enterprise zone program to replace other programs or to be set up as a short-term experiment.

Economic development advocates complain that enterprise zones would do nothing to assist in the acquisition of land or public facilities or to train skilled workers. In a paper prepared last year for HUD, George Sternlieb, director of Rutgers University's Center for Urban Policy Research, wondered whether the program might create tax havens for industry without spurring job opportunities.

At the League of Cities meeting, Kemp conceded that he would be "hard pressed to give a date certain when so many jobs would be created. This is a general philosophical statement."

But as an approach to government, it seems to be the direction that the Administration wants to take.

Mr. SARBANES. Mr. President, I also wish to underscore the portion of the amendment to restore funds to the low-income energy assistance program and the weatherization program.

I support the restoration of funds to the low-income energy assistance program and the weatherization program. The administration has recommended that both programs be put into block grant programs and suffer a large cut in funding. These cuts, approximately $450 million in low-income energy assistance and $440 million in weatherization assistance, come at a time when the Labor Department recently announced that the Consumer Price Index increased by a full percentage point last month due to the rising prices for oil and gas that resulted from the President decontrolling domestic crude oil on January 28.

The dimensions of the problem are staggering. The upward spiral in the prices of petroleum products that began 3 years ago has led to increases in home heating oil from 48.5 cents in January 1978 to $1.26 last month, an increase of 260 percent. The average price for a gallon of heating oil increased 11 cents in just the month of February with the Washington area experiencing the highest heating oil price averages in the Nation at $1.30 a gallon.

Congress authorized the low-income energy assistance program and the weatherization program at a time of unprecedented energy costs in order to help America's citizens maintain a minimal level of heat in their homes for their health and safety. The impact of the heating increases has not been gradual. It struck with full force when the first heating bills of the 1979–80 season came due and will strike with an even greater force when the next heating season starts. The times have not changed to warrant a reduction in this assistance.

With these increases, many families face the distressing dilemma each month of whether to pay for food, health care, or heat. Rising energy costs are taking a bigger share of every family's budget. All Americans are adversely affected by the higher costs of heating oil; but an acute impact is felt by lower income citizens, elderly persons living on fixed incomes, the handicapped, as well as millions of working Americans.

The rising energy costs are further compounded by certain factors which bear disproportionately on lower income households. Credit and deferred payment plans are less likely to be available, and lower income homeowners are less likely to have the resources or to be able to obtain the loans necessary to undertake energy-saving home improvements. Housing stock is likely to be older and less well-built, therefore less energy-efficient and more in need of energy conservation measures.

Studies have shown that conservation does save energy. A Princeton University study in July 1979 states that a successful conservation effort could—

By the mid to late 1980's save half the energy now consumed for space heating, equivalent to two and one-half million barrels of oil per day or two-thirds of our present dependence on Arab and Iranian oil.

At this time of increased energy prices and dwindling energy resources, we should continue to pursue methods of preventing the unnecessary usage of energy through conservation and weatherization programs. Adequate assistance should also be available to those who are unable to provide the necessary level of heat that insures their health and safety.

Mr. President, I thank the distinguished Senator from Rhode Island for sponsoring this amendment. I urge the Senate to approve it.

Mr. WEICKER. Mr. President, I yield myself 10 minutes on the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. I yield 10 minutes to the Senator.

Mr. WEICKER. Mr. President, I am a cosponsor of the Chafee amendment to Senate Concurrent Resolution 9, the reconciliation resolution. I believe it represents a balanced and cost effective package of restorations which vastly improves this legislation. It is the business of Government to make those critical investments in the Nation's strength that otherwise would not be made. This amendment addresses six programs which make a valuable contribution to the well-being of our citizens and the long-term strength of our economy.

First, Mr. President, the amendment would make a restoration of $300 million in budget authority and outlays for both fiscal year 1982 and fiscal year 1983 for low-income energy assistance and $50 million in budget authority and outlays in fiscal year 1982 and fiscal year 1983 in low-income home weatherization.

These programs were created to help offset the harsh impact of rising energy costs on the poor, the elderly, and the handicapped. My colleagues may recall that initially it was the intent of the House-Senate conference that 25 percent of the windfall profit tax-revenue be dedicated to low-income fuel assistance alone. To that end, we authorized more than $3 billion for fuel assistance in fiscal year 1981. Yet, barely half that amount was appropriated and now even that small effort is being attacked as too lavish. For the family at, or barely above the poverty level, the family spending 25 percent to 35 percent of its income on energy, this program holds out the hope of survival until we finally develop a sound energy policy and restore a vital economy.

One essential part of a sound energy program must be an expanded and effective weatherization program. Such an effort has and must continue to provide the opportunity for the longer term beneficial effects available through conservation. We have recognized this opportunity for the middle and wealthier classes by providing numerous tax incentives for weatherization and other forms of residential retrofit, the low-income weatherization program has simply extended this concept—on a very modest basis—to the poor, the elderly, and the handicapped. Clearly, as weatherization takes effect the demand for fuel assistance will moderate and energy demand can be reduced.

Together, these programs—modest though they be—hold out the hope that the poor, the elderly, and the handicapped will not freeze in Hartford or fry in Houston while the Government gropes about for an energy policy.

Second, the Chafee amendment would add the following amounts for elementary and secondary education: $575 million in budget authority and $60 million in outlays in fiscal year 1981; $500 mil-

lion in budget authority and $450 million in outlays for fiscal year 1982; and $700 million in budget authority and $575 million in outlays for fiscal year 1983. These additional funds will allow for the maintenance of the Federal Government's commitment to insure a free and appropriate education for handicapped youngsters. This commitment, only recently made, and even more recently honored, says to school age boys and girls who happen to be handicapped, that their special needs will be met and the special help that will allow them to realize their full potential will be available.

Third, the amendment proposes restoration of $150 million in budget authority and $50 million in outlays for fiscal year 1982 and $200 million in budget authority and $175 million in outlays for fiscal year 1983 for preventive and community health block grants. These funds would add to the amounts proposed by the Reagan plan for such services as home health, community health centers, mental health services, and a number of preventive health programs, and make an important contribution to meeting the health care needs of the American people.

Fourth, the amendment would restore $200 million in budget authority and $25 million in outlays in fiscal year 1982 and $300 million in budget authority and outlays for fiscal year 1983 for urban mass transit capital grants and operating assistance.

Through the passage of the Urban Mass Transit Act, Congress has committed itself to encouraging the development of State mass transit programs. Under the administration's proposed reductions for transportation, operating subsidies are to be reduced by 30 percent a year starting in 1983 and capital assistance is to be limited to existing rail modernization programs and purchasing buses. Such drastic reductions in operating subsidies will be borne by the taxpayer through fare box increases and higher State and local costs. In order to maintain vital mass transit services, the States need time to redirect their resources and services. Thus, a more gradual reduction in funding, through passage of the Chafee amendment, would ease the transition period for States.

Finally, Mr. President, the pending amendment provides for an increase for UDAG/CDBG housing grants of $300 million in budget authority in fiscal year 1981, $98 million in outlays in fiscal year 1982, and $128 million in outlays in fiscal year 1983. This amendment seeks to provide the most successful urban development program enacted by Congress with the funds necessary to continue program activity.

Since its activation in 1977, this program has generated $172 million in private investments in the most distressed areas of Connecticut alone. The key to this success has been this program's ability to bring together both public and private interests in a cooperative effort to revitalize urban areas. This program has created thousands of new permanent jobs, rehabilitated deteriorated housing as well as stimulated new housing construction, expanded tax bases for municipal governments, and regenerated a spirit of urban vitality in cities such as Hartford, Boston, Baltimore, and Chicago.

Mr. President, these programs which the Senator from Rhode Island has identified in his amendment are, without exception, sound and effective instruments through which the Federal Government provides for those in special need and reinforces the economic fabric of the country. They represent investments which pay back concrete dividends in the equity and efficiency of our economic system. It would be shortsighted indeed, Mr. President, for us to bankrupt such programs in the name of economy. I urge adoption of the amendment.

Mr. President, the Budget Committee has many functions but substance or looking into substance is not one of them. The Budget Committee deals with the bottom line dollar figure, and I might add that that is the same exercise engaged in by the Office of Management and Budget.

It is very clear to those of us on the authorizing and the appropriations committees that the Office of Management and Budget did not look into the substance of programs to achieve the administration's figures. I have no quarrel with that, so long as somewhere along the line in this procedure someone does look at substance.

The next thing we have are the figures going to the Senate Budget Committee, again with no interest in substance. I have no quarrel with that, so long as somewhere along the line inquiries are made as to the substance. That time was when various presentations were made both before the authorizing and the appropriations committees.

When inquiry after inquiry was made of those representing the administration as to why a particular program is being cut, no answer was forthcoming, except that they were given a dollar figure, and that is not a reason. That might be part of the reason in an overall economic game plan, but it is not the reason for either excluding or increasing money for a particular program, a particular agency, a particular project.

Quality should have a bearing on whether those moneys are retained or eliminated, whether or not a particular mission is achieved. Quality is a reason for eliminating or increasing moneys appropriated. But substance has been totally lacking from this argument on economics and on the budget, on the economic condition of the Nation.

There is a great deal of difference between investments that the Federal Government makes and giveaways, money that is conceived as going down a rathole. Investments that bring a far greater return in terms of productivity, in terms of the gross national product, in terms of the enhancement of the human condition have been totally lost in this argument.

Now we have before us the amendment of the distinguished Senator from Rhode Island. After much thought and after much precision of inquiry as to substance, he comes forth with this amendment, and we are asked to defeat it in the name of some figure that started off on this chain from the Office of Management and Budget to the Budget Committee of the Senate—a simple bottom-l ne dollar figure.

That is no reason to oppose this. Why is it that the opponents of this amendment cannot get up here and say how UDAG has not worked? They cannot, because it has. Or why the investment in elementary and secondary education has not worked. It has. No argument can be made against it.

So on down the list—in the name of "because the administration sends it to us, because the Budget Committee set a dollar figure." I have yet to see any rational arguments presented against this amendment—certainly no arguments of substance.

Earlier in the day, somebody made the comment that this amendment of the distinguished Senator from Rhode Island was business as usual. I will tell you what was business as usual in this whole budget exercise—the fact that the Defense Department gets its way with nary a question. If you want to talk about business as usual, that is the biggest part of the budget, and that was business as usual.

There is not one of us here who feels that if you look into the various aspects of fraud and abuse in the agencies of Government, you cannot apply a percentage to each agency. The difference is that if you talk bottom line figures and apply that percentage to the budget of the Defense Department, you get the biggest dollar figure at the bottom line.

If you are going to scrutinize a budget, if you are going to examine it by a set of criteria that relies on what is achieved, then that scrutiny must be applied right across the board.

Let me give an example of the contradictions between what the administration is saying in terms of its general policies and what it is doing in terms of economics.

The administration says that national security in the defense of this Nation is of the highest priority, while this administration cuts the budget for education and for science.

We are never going to outman the Russians. That is a biological impossibility. You are never going to put your hardware hub to hub to the extent they do.

The great offensive weapon of this Nation, the great advantage we have enjoyed always, sits up here in the minds of Americans, which give us technological superiority, which make up for what we do not have in terms of manpower or in terms of inanimate weapons of conflict.

So, while at the same time you are saying that national security and defense are of the utmost priority, you cut back on those budgets that in effect have established the greatest advantage in terms of security and in terms of defense, in terms of our preeminent position in the world. What kind of sense does that make?

Where will the technological superiority of this Nation go when you cut back on education, when you narrow the

scope of what it is our young people can learn?

I recall that at the time of the decontrol argument, in the midst of the energy crisis—which I believe we are still in, and which probably has more to do with our economic instability than whatever it is the Government is or is not doing—I recall during that debate a person saying that we have to up the supply side of energy, and I agreed with that. We have to put the capital into the hands of private enterprise to bring more of the product on stream. I agreed with that.

But I said in addition to producing more we have to use less, and there is only one way we are going to do that and that is to conserve. Everyone said that decontrol, which I voted for, will raise the price and make people conserve.

That is fine, except for those who cannot afford the price of this basic necessity of life. So it was agreed at that time that whereas we take care of the supply side we would also take very special care of those who would be hurt by that decision. That was the genesis, if you will, of low-income energy assistance. It was not a giveaway program. It was meant to compensate for another policy that was agreed upon by this body. They are saying that now that we have decontrol and the capital is in the hands of private enterprise, now let us forget about that whole disadvantaged segment of our society.

This is the substance that has not been debated on this floor. This is the substance that was never a matter of consideration of the administration as they went through their budget. But this is what needs to be talked about.

This proposal of my distinguished colleague from Rhode Island is modest indeed. It recognizes the economic difficulties that the Nation is in and which were also pointed out by our distinguished colleague from Massachusetts.

The PRESIDING OFFICER. The 10 minutes have expired.

Mr. WEICKER. I request 3 additional minutes.

The PRESIDING OFFICER. Who yields 3 additional minutes to the Senator from Connecticut?

Mr. DOMENICI. I yield 3 additional minutes.

Mr. WEICKER. I thank my distinguished colleague from New Mexico.

As was pointed, about 94 percent of the President's request has been granted. Is everyone afraid to move as far as the remaining 6 percent is concerned? Everyone talks about a mandate. I know about the mandate of the election of 1980. I will tell you what the mandate was. It was very simple and narrow. It was a rejection of an incumbent President who was perceived as being incompetent. That is No. 1. And, No. 2, the blue collar workers in this country, most of whom are Democrats, either were out of work and wanted to get back into the work force or wanted to have their paycheck mean something, so it was narrow in an economic sense. We did not go ahead, the Nation did not go ahead and vote against education. We did not vote against the cities. We did not vote against the poor, and we did not vote against those that are ill.

There was no rejection of the social conscience that is this country, and my friends on this side of the aisle make a big mistake if they misinterpret those election results because, believe me, we will be a majority for a very few days indeed.

I hope that everyone is through clicking their heels and obeying orders from on high, that we all start to function as U.S. Senators and understand what it is that our constituencies look for.

Understand, for example, that if an economics argument is made on this floor on the basis of inflation and the economy, we will stand up and say, all right, defense spending is the most inflationary of all.

No one is seeking to cut back on defense. What we are saying is apply the same criteria to defense as we have in every other program of Government which has gone under the microscope.

Do not just take your cues from someone's campaign or philosophical slogans.

Indeed what is at fate here is not a political party but human lives. If we can cut back in some of these areas, and education stands out in my mind, decisions made for 1 year or 2 will have their impact 10 years, 12 years, and 15 years from now. Then we will not be able to catch up.

So I hope that we join on both sides of the aisle in passing this amendment and restoring the Senate as an equal partner in the decisionmaking process rather than continuing to go by the Teutonic philosophy that orders are orders. The mind is what is important, not the ability to raise one's hand in agreement.

The PRESIDING OFFICER. The time of the Senator from Connecticut has expired.

The Senator from New Mexico.

Mr. RIEGLE. Mr. President, will the Senator from South Carolina yield?

Mr. HOLLINGS. I yield sufficient time on the resolution to the Senator from Michigan.

Mr. RIEGLE. I thank the Senator for yielding.

Mr. President, I have great regard for my colleague from Connecticut, but I was wondering why he was looking at this side of the aisle when he was talking about the short-sighted reduction. Many of us on this side have tried in the Budget Committee to do something about the problems that he spoke about. Many of us share his sentiments and his concern. I know there may be some things about this side of the aisle that do not look completely attractive, but I will help the Senator move his desk over here because we would like to have him on this side. He is sitting right on the aisle there. He is not that far away. It will not be a long move.

He has raised some important points.

Mr. President, I rise as a cosponsor of the amendment, although I feel the amendment does not go far enough to correct or correct the severe regional inequities that are imbedded in the budget resolution before us. I am sure that some of my colleagues on that side of the aisle know that the amendment does not go far enough. The Senator from Rhode Island (Mr. CHAFEE) and the Senator from Pennsylvania (Mr. SPECTER) and others have just spoken with feeling and perceptiveness about the defects of the budget document as it is presently before us. It would do damage to some areas of the country and to some groups of people, while other areas and other groups would not be asked to bear their share of sacrifice. Senator CHAFEE's amendment will help correct some of those defects. It certainly by no means solves all those problems.

I do not know why the Budget Committee on the basis of very little discussion or analysis recommended cuts that went even below those recommended by the President.

This amendment would still leave the Senate's budget resolution harsher than the administration's recommendations.

Mr. President, I support reductions in Government spending at about the level recommended by the President. I have serious objection, however, when I consider the details of how the administration recommends that we make these cuts. It is clear that many of these recommendations are based on very sketchy and glib analysis.

Mr. RIEGLE. Mr. President, I know that my colleague from Rhode Island (Mr. CHAFEE) and my colleague from Pennsylvania (Mr. SPECTER) have both played important roles in the Northeast-Midwest coalition. I am privileged to serve with the Senator from Rhode Island as a cochairman of the Northeast-Midwest coalition.

They will both understand the devastating significance of the fact that the administration's package of budget cuts was put together without any analysis whatsoever of its probable impact on different regions of the country.

The Budget Director, Mr. Stockman, was asked for his analysis of how different regions would be affected by what he is proposing. He was frank to say that no regional consideration or plan went into this document. He admitted that OMB and the White House made all of these sweeping recommendations without ever considering how they would hit different regions of the country, different States with different problems.

In the Budget Committee we asked Mr. Stockman if OMB would do a careful regional analysis after the fact. He promised that he would or that Senators could take those issues into consideration when the Senate developed its budget. We are still waiting for that analysis. We have not gotten it yet.

I would not be surprised if we never get a solid analysis from OMB on this issue. The reason why that is unlikely is that OMB's priorities in this budget, as it now stands, do great damage to the Northeast and the Midwest.

These are areas of the country that historically have been massive net losers in the Federal flow of funds. Year after year, Federal taxes have drawn more funds from Northeastern States and Midwestern States than Federal spend-

ing programs have returned. Other regions have been net winners for decades. For instance, from 1975 through 1979, the Northeast and Midwest lost $165 billion through Federal budget policies. The South and West gained $112 billion during that same period. My own State of Michigan has been losing over $7 billion each year.

Some States in our region get back only 66 cents for every dollar that they contribute to Washington, there are other States around the country that get back $1.45.

Our area of the country has been financing its own underdevelopment through this very negative flow of funds. This budget makes that imbalance even worse because the proposed budget cuts will fall heaviest on those programs that are important in the Northeastern and the Midwestern part of the United States.

This amendment before us makes a modest step in the direction of trying to restore some regional equity in this budget.

If we look at the tax side of the administration's proposals, which are not included in the resolution here today, we will find even more imbalance. The administration's ideas about stimulating investment do not address the problems of the Nation's industrial base. The administration's package does not include refundability of the investment to a credit or an extension in the period for a tax-loss carryback. Many of the industries that are concentrated in the Northeast and the Midwest are badly hit by the need to make enormous investments to maintain America's comprehensiveness in the world. Under the administration's tax proposals, these industries will not be able to take full advantage of the tax incentives. Many of our basic industries and companies are presently in a loss position.

We cannot resolve that problem here today, but it needs to be noted because it exacerbates the damage of the uneven set of cuts that is proposed in this budget.

So I support these modest restorations for the low-income energy assistance, for health services, for elementary and secondary education. All of these are vitally needed.

I also support funding for weatherization and mass transit operational subsidies. All of these are important priorities within the budget. I hope we can have a successful vote from both sides of the aisle.

The UDAG program has demonstrated solid results all across the United States in over 1,000 different projects. It has stimulated over $6 of private investment for every single Federal dollar invested, or a total of $12 billion in private investment. It has created and retained 470,000 permanent jobs at a one-time cost of $6,600 per job. That is a very cost-effective record. It has created those jobs in the most needy places in the United States. This program alone has produced over $320 million in annual local tax revenues, or 17 cents of local tax revenue for each UDAG dollar that has been spent.

Mr. President, the administration wants to launch a new policy of turning responsibility back to local governments. It makes no sense to suddenly throw the plans of those governments into turmoil.

Many communities in my own State are stretched financially to the breaking point. They desperately need their community development grant share to meet basic community services. Most will be hard pressed to make a gradual adjustment to lower funding levels. But it is certain that many communities would suffer a severe fiscal blow from a sudden reduction this late in the year.

Under the administration's proposed CD block grant funds would be diverted to carry out activities that are now financed by the weatherization self-help program, the 701 planning grant program, and the section 312 rehabilitation loan program. CD block grants would have to be stretched to cover cuts in those programs of $160 million in fiscal 1981 and $380 million in fiscal 1982.

Therefore, rescinding the CD block grant amounts at this stage of the year simply is not practical, it is not responsible.

That means that the cuts would fall squarely on the UDAG program. Today, the unobligated balances for UDAG stand at $318 million. But rescinding fiscal 1981 funds for UDAG would seriously damage local efforts to create new jobs in economically distressed areas across this country.

Over 450 UDAG applications involving about a billion dollars in requested funding is now pending. Private firms, private lenders, and local communities have invested time and money in bringing these projects to an advanced stage of development. They have in good faith relied on the availability of funds that have already been appropriated. Announcements for the next round of grants, involving about $100 million in projects for large cities is scheduled for tomorrow, April 1—that is only hours from now. The April round of awards for small cities, will be announced only a few weeks from now.

The Budget Committee's proposal would kill a large number of development projects that are ready to go and would produce private sector jobs in distressed areas.

UDAG has demonstrated solid results in over 1,000 projects. It has stimulated over $6 of private investment for every Federal dollar or a total of $12 billion of private investment in recent years. It has created or retained 470,000 permanent jobs at a one-time cost of $6,660 per job. It has produced over $320 million in annual local tax revenues or 17 cents in local tax revenue for each UDAG dollar.

UDAG helps locate new industry in areas where there is much poverty, high unemployment, and weak financial conditions. It creates jobs that reduces unemployment and welfare costs. It makes fuller use of existing roads, water and sewer systems, and other underused infrastructure.

The UDAG program has proven that the Federal Government can act in a timely and sensitive way to reinforce private sector initiatives that strengthen local economies. UDAG gives communities and private firms great leeway in initiating projects that make sense at the local level. A small, highly professional staff helps refine ideas and acts promptly to facilitate private development.

UDAG has received widespread praise from informed analysts.

The House Appropriations investigations staff said UDAG is successful.

A special advisory panel of the Urban Land Institute, comprised of noted private businessmen concluded that UDAG creates new private investment, jobs, and taxes, the private investment would not occur without public aid, and

UDAG is working well.

Dr. James Howell—senior vice president of the first National Bank of Boston, a respected economist and a Republican—testified before the Senate Budget Committee that:

> Over the years, I have come to realize how vitally important grant programs can be to the stimulation of private sector capital formation in cities where the cost of doing business is out of line with other areas and where there is widespread social hardship and poverty.

The Council for Northeast Economic Action studied 11 old New England cities and found that government funds were needed to leverage private investment in 53 percent of all private sector deals—and only three Federal programs accounted for 90 percent of those cases. Those three programs are: industrial revenue bonds; SBA loans; and UDAG.

Local officials and private businessmen who have been involved with UDAG clearly judge it to be a valuable program.

I ask unanimous consent to have letters regarding UDAG printed at this point in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

CITY OF DETROIT EXECUTIVE OFFICE,
February 17, 1981.

To: Don Campbell.
From: Dorothy Brodie.
Senator DONALD W. RIEGLE, Jr.,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR RIEGLE: I would like to share with you my concern over the current discussions concerning cutting the federal budget through the elimination of the Urban Development Action Grant (UDAG) program and the elimination of or substantial underfunding of programs of the Economic Development Administration. The availability of these programs has been critical in our efforts to revitalize our City and in fact, were it not for these programs, many projects now underway throughout Detroit could not have been successfully undertaken.

The UDAG program, as you know, leverages and stimulates needed private development in distressed urban areas. In cities like Detroit, it has served as a means of reducing the cost penalty that exists to businesses that choose to develop in built-up cities vs. cleared suburban land. Costs such as those associated with the demolition of existing structures, the rehabilitation of buildings, or the relocation of utility lines are but a few examples.

Detroit has most recently used the UDAG program to fund the Central Industrial Park project. This project, better known as the

General Motors Plant Project, is the most important undertaking within the City in recent history. The plant, to be completed before the 1984 model run, will directly employ over 6,000 workers and result in an additional 25,000 workers being employed in related industries thus relieving the human suffering caused by our 16+ percent unemployment rate.

The plant will also serve as the nucleus of a revitalized industrial area both in the cities of Detroit and Hamtramck. The new private investment represented by this project will provide a significant increase in tax base to the City from property, income and business taxes.

The public costs associated with this effort are approximately $180 million. This will provide 465 acres of cleared land to GM within the cities of Detroit and Hamtramck at private costs comparable to those encountered in a "greenfield" suburban site. Without the $30 million of UDAG funds, the public work would have been jeopardized, more likely causing GM to relocate its current Detroit assembly out of our City.

The second project important to the City that would not have been undertaken but for the UDAG funds, is the Washington Boulevard "Trolley Plaza". This residential project is the first effort by the City and the private sector to provide market-rate housing directly in the Central Business District. The 350-unit apartment, now under construction, is serving as the focus for the general revitalization and redevelopment of Washington Boulevard as a major residential and retail area. Shortly after the UDAG funding was provided for the project, an additional 600 residential units were committed to the area and the feasibility of converting the abandoned Heritage Hotel to residential use generated proposals from interested developers. In addition to serving as a catalyst for downtown housing, the project is important for providing the market to the proposed Cadillac Center Shopping Mall.

Finally, the UDAG program has enabled the City to revitalize the Oakman Mall, one of the City's oldest neighborhood shopping centers. Oakman Mall, serving a stable residential area, has been subject to the same market and demographic trends that have resulted in the abandonment by businesses of many commercial areas within the City. Oakman Mall suffered particularly when Sears Roebuck closed their store a number of years ago. The Mall is now being redeveloped with Sears and other tenants occupying renovated retail space. The neighborhood is now looking forward to being served by a fully redeveloped shopping area.

In the three projects where UDAG funds have been critical to funding and particularly to leveraging private funds, EDA funds have also, no less importantly, been involved. EDA's programs are expected to fund much of the demolition and site improvement work necessary to the construction of the Central Industrial Park project. The City has made a pre-application to fund those work items. In addition, the Washington Boulevard Plaza where the Trolley Plaza is being constructed, was constructed as an attractive public activity space providing a residential atmosphere with EDA funds. Finally, Oakman Mall public right-of-way improvements including new lighting and pedestrian ways were again funded by EDA. There are many other examples in the City where EDA funds and UDAG funds have been jointly used to fund public and private portions of projects.

In addition, the City of Detroit, like many other cities across the country, has benefitted from the variety of EDA programs such as direct loans, loan guarantees, public works grants and technical assistance. Without this federal agency's assistance, many economic development activities critical to the business vitality of Detroit would not have occurred.

Critical to Detroit is the recent Auto Community Adjustment Program which the Economic Development Administration has initiated. The current planning phase is to be followed by the award of implementation grants to assist us in the revitalization of our auto-dependent economy.

My support for the continuation of these programs is without reservation. The programs have become a vital part of this and other cities' revitalization efforts. Both UDAG and EDA's staffs understand the challenges and problems which confront urban areas today. I hope that their experience and fine programs continue to be available to assist cities like Detroit in building their futures as economically and socially vital centers to live and work.

Sincerely,

COLEMAN A. YOUNG,
Mayor.

CITY OF HAMTRAMCK, MICH.,
February 13, 1981.

Hon. DONALD W. RIEGLE, Jr.,
U.S. Senator, Dirksen Office Building, Washington, D.C.

DEAR SENATOR RIEGLE: The government of the City of Hamtramck and its citizens are thankful and appreciative as the recipient of a 30 million dollar Urban Development Action Grant from President Ronald Reagan's administration. We are hopeful that the additional grant of 5 million dollars will receive approval of the present administration.

This grant will aid our distressed city and alleviate the stress and depression of our citizens caused by the closing of the Dodge Main Plant of the Chrysler Corporation. It will culminate in the building of the new 500 million dollar facility by General Motors Corporation that will result in the preservation of at least 7,000 direct jobs and make their automobiles competitive with foreign imports. If our additional grant is approved, I can assure you of at least 25 million dollars of private investment and an additional 1,000 new jobs in our economy.

In my opinion this is the best federal program to assist industry as the recipient communities must prove and provide a 5 to 1 benefit ratio. If the program cannot be preserved in its present manner, some type of joint funding by local government and federal government should be adopted.

I am confident you will urge your colleagues to preserve this program, which provides a measure of encouragement to our young generation who are seeking employment in the private sector.

Respectfully yours,

ROBERT KOZAREN, *Mayor.*

CITY OF SAGINAW, MICH.
February 16, 1981.

Hon. DONALD W. RIEGLE, Jr.,
U.S. Senator, Dirksen Office Building, Washington, D.C.

DEAR SENATOR RIEGLE: The current debate concerning proposed domestic spending cuts, particularly at such cuts might affect the Urban Development Action Grant (UDAG) program, is of supreme concern to the City of Saginaw.

The City of Saginaw, hardhit by the continuing downspiral in the automobile industry with its resultant negative effects upon the local, state and regional economy, stands as a viable example of the positive aspects of the UDAG program, both in what the program has allowed us to accomplish in the past and the potential it holds for our future.

A UDAG loan in the amount of $1.5 million was awarded the City of Saginaw in 1978, that being the amount needed to bridge the financial gap between an economically doable project and one that had remained, with all attendant frustrations, in the planning stage for some eleven years.

Most importantly, HUD's approval of the loan said that the federal government was satisfied that the total $5 million project was sound and manageable and would, indeed, generate additional private investment in the central city, in the instance of the City of Saginaw, a total of approximately $41 million.

I am most pleased to point out that the long-awaited reality of the hotel further resulted in an infusion of positive thinking in regard to our central city which has today transferred into an investment and development climate responsible for a projected total of $130 million worth of new construction and redevelopment.

Additionally, the reality of the hotel was the primary ingredient in the forging of an effective, working relationship, partnership if you will, between the private and public sectors in the City of Saginaw.

That partnership is credited as an influencing factor in our city being able to secure the interest of a Toronto, Canada, based development firm, Aslea, Inc., which today has plans for construction of a major mixed-use project within our central city consisting of new retail, office towers, and public space and with an estimated cost of $61 million.

It is interesting to note that the development, which will have significant and positive economic and social impact upon not only the City of Saginaw but the entire Tri-City area (Saginaw, Midland and Bay City, Michigan), includes plans for a 200-unit hotel as a part of Phase Two activity.

The project, called Saginaw Center and Creations, as perceived will result in some 1,600 new and permanent jobs within our community, as well as create approximately 600 construction related jobs over a ten-year time period.

The earlier hotel project resulted in the creation of 200 new permanent positions and another 100 positions during the construction phase.

It is crucial that I point out that the financial packaging of the project to date centers on the availability of an Urban Development Action Grant in the amount of approximately $5 million, to be leveraged against a projected private investment of some $41 million, for Phase One construction.

The availability of such federal assistance has been a major factor in the City of Saginaw being able to secure the interest and initial planning investment (in the area of some $70,000 for market feasibility studies and architectural concepts) of a firm as strongly qualified as Aslea, Inc., which ranks as one of North America's largest and most successful development firms.

Aside from the potential positive impacts upon the community in the way of more jobs, economic diversification and increased tax base, the hotel project and now Saginaw Center and Commons has been a great boost for all downtown businesses and has created a renewed interest in city investment and development generally.

Put another way, the progress we have made to date could not have been possible without the UDAG program, or the use of public funds to stimulate private investment.

The private-public partnership we have forged to unite the community with a single purpose of economic growth and stability would not have evolved to the point it is today.

To quote from a recent editorial in the Saginaw News:

"Cities such as Saginaw, hoping to energize urban redevelopment, cannot do it by wishing it. The job requires imagination, innovative ideas, energy, support from those with ability to invest, and a lot of cooperation between government and the private sector.

"We've finally seen these elements come together for a new downtown hotel after years of disappointment. It's more than just

a new building. It's a tangible sign of better things to come."

Sincerely,

——— ———, *Mayor.*

CITY OF LANSING, MICH.,
February 9, 1981.

To: Don Campbell.
From: Lansing.
Hon. DONALD W. RIEGLE, Jr.,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR RIEGLE: Over the years, there have been some strange programs concocted in Washington, D.C. However, there have been some excellent ones, and these have far surpassed the oddities.

One of the excellent ones is the economic assistance provided by the Economic Development Administration of the U.S. Department of Commerce. Actual positions of employment can be created, or retained, not "make believe" jobs. Not only has the Economic Development Administration assisted us in retaining 1,600 real jobs in one industrial project alone, but the assistance is leading to one of the largest expansions by private industry in the history of the City of Lansing. Officially, the expansion will be announced within two weeks. Imagine, if you will, the tremendous and positive effect such will have on the lives of people, and on the economy of this Capitol City of Michigan!!

Another excellent program is the Urban Development Action Grant Program, first researched by the Ford Administration and implemented by the Carter Administration. U.D.A.G. provides a highly meaningful tool for cities to improve and to create real jobs, through the formula of merging private dollars with public funds.

The City of Lansing has received approval of two U.D.A.G.'s, one for the Number One Block of the Central Business District, which is generating $50 million in new investment, the second for a badly needed, and major housing project just south of the State Capitol Complex.

As a result, the City will greatly benefit in a number of ways:

A new tax base is being created;

Approximately 1,300 real jobs will result from the development of the Number One Block, providing self-sufficiency and dignity for a lot of people;

A whole new interest is developing in our Central Business District and private development is already underway.

Sir, if cities are to survive, the aforementioned are outstanding routes—I commend them to you.

Respectfully,

GERALD W. GRAVES,
Mayor.

DETROIT, INC.,
Detroit, Mich., February 18, 1981.

DEAR SENATOR RIEGLE: We want to strongly endorse the continuation of the UDAG funds in the federal budget. The monies have been essential to the revitalization of Detroit and have been a cornerstone for economic redevelopment, neighborhood stabilization and retaining jobs in our city. Among those projects have been the retention and reconstruction of neighborhood shopping malls and industrial centers. The UDAG program has been among the most effective of all federal programs which have been designed to stimulate a partnership between the private and public sectors in rejuvenating our older cities. $75 million in UDAG grants have generated nearly $300 million in economic activity in our city, and is responsible for the creation and retention of thousands of jobs here in Detroit.

We commend your efforts to retain these vital funds and strongly urge your colleagues and the Senate Budget Committee to support this program.

Sincerely,

WALTER E. DOUGLASS,
Chairman.
JOHN J. RICCARDO,
President.
LINDA KATO.

KEMP, KLEIN, ENDELMAN & BEER,
February 18, 1981.

Hon. DONALD W. RIEGLE, Jr.,
U.S. Senate, Dirksen Senate Office Building,
Washington, D.C.
Attention: Don Campbell.

DEAR SENATOR RIEGLE: I am writing you in reference to the Reagan Administration proposal to substantially diminish or abolish the Urban Development Action Grant Program. This program is a categorical grant approach to the serious problems which confront cities today regarding the revitalization of deteriorating downtown central business districts. It is our firm belief that a return to the old "Block Grant" formula as was implemented by previous Administrations would seriously impair the efforts of cities in attempting to arrest this deterioration.

Essentially, the good things that can be said about UDAG far outweight its faults. First of all, the UDAG concept has resulted in a minimum of red tape and a maximum "turnaround time" between the point at which initial discussions with the applicant take place and the point at which the monies are disbursed. Another asset of this program is the fact that a specific amount of that money has been targeted for distressed cities, unlike the effect of the Block Grant Programs of the mid-70's which was to provide significant assistance to wealthier communities and areas which were not distressed. Another benefit which has arisen under the UDAG program is the availability of consulting services for local governments in determining how best to apply the UDAG money in planning and implementing downtown revitalization projects. Finally, the UDAG concept has been highly successful in leveraging the private commitment of investment capital in our most distressed urban areas. This is evidenced by our ongoing "Pontiac Plan".

The most important accomplishment of the UDAG Program from our perspective has been its effect in insulating Mayors from pressure exerted by local community groups. Under the old Block Grant formula, monies disbursed to a locality, became the target of scores of local community groups which insisted upon directing the funds to "pet" activities, such as housing, weatherization, and others. Under the UDAG formula, the monies are earmarked for specific projects. The success of this kind of approach is, again, dramatically demonstrated in the "Pontiac Plan" which is now being constructed in downtown Pontiac with UDAG participation, and which has leveraged private development and created new entry-level jobs.

At this point, I wish to return to a discussion of the adverse effects of the previous Block Grant approach utilized by prior administrations. First of all, monies which were disbursed to localities were not distributed according to a specific pre-selected formula. As discussed above, this fact caused considerable turmoil at the local level as various special interest and community groups vied for control of the funds. Consequently, during the mid-70's Block Grant funding came to be recognized by community groups in Pontiac as a source of housing assistance. This greatly diminished the percentage of the Block Grant funding which could have been devoted to economic redevelopment. In addition, much of the Block Grant assistance was distributed to non-distressed localities—such as Orlando, Florida; Phoenix, Arizona; and Houston, Texas. The UDAG legislation alleviated this problem by earmarking a certain percentage of UDAG funds for distressed cities.

Another drawback of the old Block Grant formula was the fact that it denied funding for several developments in the City of Pontiac which are now eligible for funding under UDAG. Specifically, these projects which were not allowed funding under Block Grant formulas included auditoriums, convention centers, museums, and concert halls. As you may know, an important element in the success of the Pontiac Plan includes the eventual construction of a museum, auditorium, and a hotel-convention center on that site. Consequently, any return to the Block Grant approach to urban assistance would have to take into consideration this additional drawback of the old policy.

In the event that Mr. Reagan's Block Grant formula is accepted by the United States Congress, significant changes would have to take place in order to make it more successful than the program which was implemented in the mid-70's. One recommendation which we would make in this regard is to earmark a stated percentage of Block Grant money (for example, twenty-five percent) for distribution to the State—which could then turn around and distribute that money to localities according to UDAG-type formulas. Another recommendation would be to establish more specific formulas which Washington would apply in providing the funds directly to localities. In other words, a formula for Pontiac would emphasize the channeling of Block Grant money to downtown redevelopment based upon a study of the city's needs made in consultation with City leaders. This would, hopefully, reduce the amount of confusion at the local level which in the past has been brought on by special interests vying for Block Grant funding on behalf of favored projects.

Obviously, my position is clearly in favor of retaining the UDAG method of urban assistance. It employs concrete formulas which can be utilized to direct funding to specific and needed urban redevelopment projects. It provides an insulating layer of federal decision making which serves to reduce the amount of local level struggle between special interest groups for funding which may not directly or effectively address the more immediate problems of a community. In addition, UDAG has been extremely successful in reducing the delays and confusion in decision making both in Washington and at the regional level regarding the eligibility of applicants for UDAG assistance and the provision of that assistance.

In conclusion, as Mayor for the City of Pontiac—and as an individual who has had extensive experience in the implementation of federal urban assistance policies during the past decade—it is my strong recommendation that every effort be made at the national level to preserve the UDAG program. This program has proved to be effective, efficient, and totally relevant to attempts which have been made in the past twenty years to restore our deteriorating urban centers. The Block Grant approach as it was conceived and implemented had several drawbacks—all of which served to weaken the effectiveness and efficiency of such progress as they were applied to distressed urban centers. In the final analysis, it has been established to my complete satisfaction that the categorical approach—with strict formulas—is the most effective way to target federal assistance for the redevelopment of distressed cities without causing unnecessary and inefficient delay. The Block Grant program proved to be a cruel hoax in meeting the problems and satisfying the needs of disadvantaged and low income

Americans. The UDAG approach, on the other hand, has resulted in drastic progress toward putting people back to work, diversifying the industrial base of distressed localities, and, perhaps more importantly, giving people hope. We feel that the strongest endorsement of this program is now being constructed in downtown Pontiac: The number one distressed City in the nation.

Sincerely yours,

On behalf of the Pontiac City Commission and Citizens of Pontiac.

WALLACE E. HOLLAND,
Mayor.

PEOPLES NATIONAL BANK & TRUST CO.,
Bay City, Mich., February 16, 1981.

U.S. Senator DONALD RIEGLE, Jr.,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR RIEGLE: I am writing to express support for the continuation of the Urban Development Action Grant program in Bay City, Michigan.

Our involvement with U.D.A.G. supported activity is the Wenonah Park Plaza project here in Bay City.

This project is crucial to the revitalization of downtown Bay City. Without the parking provided by the Action Grant, this project's feasibility would be in grave doubt. With the grant, Bay City's downtown is looking forward to a tremendous boost.

Peoples Nation Bank is one of several local businesses which are limited partners in the Bay City Development Partnership, lead development entity for Wenonah Park Plaza. We have also committed to act as lead bank in $4.5 million of construction financing for the residential condominium component of the project.

Total private investment in Wenonah Park Plaza will be $40 million. The Action Grant is $8.2 million. Bay City voters have authorized up to $10 million in general obligation tax increment bonds to support the project and other downtown improvements.

This is an excellent example of the positive results that can be produced by a timely injection of federal funds in an economically distressed community. Millions of dollars of private capital are being sought for our downtown area. Public and private sectors are cooperating for the maximum mutual benefit.

I believe that this is an endeavor worthy of continuing.

Thank you for your efforts in this regard.

Very truly yours

CLIFFORD C. VAN DYKE,
Chairman and President.

FLINT AREA CONFERENCE, INC.,
February 17, 1981.

Sen. DONALD W. RIEGLE,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR: As you may know I serve on the Board of Directors of the International Downtown Executives Association, an organization which represents more than 300 downtown organizations whose boards are comprised of the leading industrial, business and financial interests in their respective cities. On January 29 and 30 that Board met in Washington to discuss urban policy issues and the Reagan administration. An immediate consensus formed: The fundamental issue was continuance of an Urban Development Action Grant program. Whether Dallas, Philadelphia, Manhattan, Detroit, Syracuse, Atlanta, Denver or Springfield, Illinois, the number one issue was maintenance of a categorical program providing an opportunity for private sector participation in the revitalization of our cities. By any name, a program such as the Urban Development Action Grant is necessary to protect existing investment and promote reinvestment by the private sector in our central cities. That message was delivered in a luncheon meeting with Craig Fuller, Secretary to the Cabinet.

The Urban Development Action Grant program has acted as a catalyst for reinvestment in Flint creating jobs and diversification for a very distressed local economy. While news media from across the country concentrated on the plight of our city—the highest unemployment in our nation—we were about rebuilding. That would not have happened without the stimulation of a UDAG-type program. Two major grants totaling $15 million have leveraged over $80 million in new private investment in Flint. It is a simple truth that without his program, neither project would be underway.

The Urban Development Action Grant program in Flint has been efficient, effective and productive.

There is little argument with a desire to cut the federal budget across the board. It is reasonable to expect that federal aid to cities must be reduced as well as federal aid to agriculture; but eliminating or emasculating the most effective and efficient program of a department seems neither wise nor fulfilling of purpose.

You may expect our fullest support for any efforts you may initiate which are directed toward retention of the essence of an Urban Development Action Grant program.

Sincerely,

JAMES S. SHEAFFER,
President.

CITY OF FLINT, MICH.,
February 19, 1981.

Senator DONALD W. RIEGLE, Jr.,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR RIEGLE: The purpose of this communication is to request your support of the Urban Development Action Grant Program which, as you know, is currently under the threat of elimination as part of the Federal budget cuts being proposed by the Reagan Administration.

The Urban Development Action Grant Program has had a tremendous impact on the City of Flint. The $16 million the City of Flint has received in Action Grant funds has generated six private dollars for every Action Grant dollar received. The four projects currently being funded by the Action Grant program will generate over 1,400 new jobs. The annual increase in the City's tax base is approximately $2 million a year.

The spin-off benefits to neighborhoods as a result of the Action Grant program are substantial. Approximately $1.5 million annually will be available through the recapture of Action Grant funds for neighborhood revitalization.

Without the Action Grant program, $142 million (total cost of all four Action Grant projects) would not have been committed for investment within the City of Flint. The Action Grant program has provided the necessary impetus to move critically-needed projects from the planning stage into successful implementation.

The Action Grant program has lived up to its promise. The program has provided the incentive necessary to attract private investment to distressed cities such as Flint. The program is restoring the vitality of the City of Flint by creating jobs, by increasing the tax base, and by making this City more livable and economically viable. However, there is still much more work to be done. As a part of Flint's overall economic development strategy, a number of exciting, dynamic projects are planned. These projects need the investment incentives provided by the Action Grant program if they are to be realized.

I know you will join me in support of the Action Grant program by strongly voicing your support, on behalf of Flint and other Michigan cities in the U.S. Senate. Thank you.

Sincerely,

JAMES W. RUTHERFORD,
Mayor.

THE FRIENDLY CITY,
Hazel Park, Mich., February 17, 1981.

Senator DONALD W. RIEGLE,
Dirksen Office Building,
Washington, D.C.

DEAR SENATOR RIEGLE: As you may know, the City of Hazel Park received approval for a UDAG project in December, 1978. During this period the cost of borrowing began to skyrocket which created a situation whereby our project became economically infeasible. As a result, we were notified by HUD in September, 1980 that our project was being terminated. The termination letter provided that we could reapply at a later date. Since that time, we have been in touch with the proposed developer of the project who is most anxious to proceed as soon as the cost of borrowing declines.

This project based on our projections would have a significant impact on the City of Hazel Park. We are a City of some 20,000 people within an area of 2.8 sq. miles. The City is nearly 95% built up with no potential of expansion. The homeowners of the City carry 70% of the tax burden. This project is anticipated to increase our industrial tax base by some $7,500,000 resulting in approximately $525,000 in additional taxes, equally important 105 new jobs would be created. As you can see this project will have a significant impact on our City.

I trust this information is of some benefit to you in your effort to assure that this worthwhile program is continued.

Sincerely,

STEPHEN ZERVAS,
Mayor of City of Hazel Park.

I think it is essential that we address the national priorities on a bipartisan basis. We must cooperate to correct some of the proposed inequities. I congratulate the sponsors on the other side.

The bipartisan cosponsorship of this amendment is important. Limited though the amendment is, it moves in the right direction.

Mr. CHAFEE. Mr. President, I ask for 1 minute on the bill. I have 2 minutes, is that correct. 2 minutes left?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOMENICI. The Senator has been given all this time and he still has some of it left?

Mr. CHAFEE. I had to conserve it carefully. I have to use it now. Make it 2 minutes on the bill and 2 I have left.

Mr. President, it seems to me the essential question is this: Are the President's individual budget assumptions sacred? Can we not budge from them at all, or is that it? It comes down from on high?

Well, the Budget Committee did not think so. The Budget Committee took the President's proposal, and what did it do with it? It added $1 billion for the Human Resources Committee. That did not bother the Budget Committee. They went above the President.

Then they cut $3 billion from the strategic petroleum reserve. They thought that was all right to make a $3 billion cut to vary from the President's proposal.

Then they cut $300 million from UDAG. That is all right, go against the President. Then they added $300 million to the Export-Import Bank. That is all right, too.

So it seems to me we start with the fact that it is all right to vary from the President's budget. Who said that? The primary architect of that budget himself, Mr. Stockman. Mr. Stockman wants to

come in equal or below the President's figures. We are equal or below the President's figures if this amendment is approved. We will be $1.4 billion below the President's figures if this amendment is approved now.

What about the Budget Committee? Are they sacred? Can no changes be made? Well, we had an amendment offered here to add $1.5 billion by the assistant majority leader. That did not happen to pass, but there were no problems in offering it.

The Budget Committee itself, we had a vote, cut $300 million from foreign aid, added $300 million to the school lunch, and that went flying through, no difficulties.

So I think we have to agree there is nothing sacred about what the Budget Committee has done. We can make variations here.

This proposal, Mr. President, is no wild-eyed scheme. These are very modest proposals. These do something for areas that have been hard hit, and we come out below the President. We come out with reductions from the plan.

For instance, it has been mentioned about elementary and secondary education, that there will not be any incentive to go to block grants.

Well, let us look at the figures. After this amendment is approved, if indeed it is approved, we come out 11.4 percent below the program. Not exactly where the President was. He was at 19.5, but we are 11.5, that amount of cut. That is not too bad. That goes up to a 19.5-percent cut in 1983.

So these are very, very substantial reductions, Mr. President.

In UDAG we just do what the President asked. What could be better than that?

Look at the other proposals. On housing weatherization, a very modest add-on, and we had eloquent testimony, a speech here from the senior Senator from Connecticut, that when we went to decontrol we took into account the fact that some changes had to be made to take care of those who were hit by decontrol. So we have added in low-income energy assistance as well. That seems to me to be a very wise move. We do not come to what would have been in the normal plan, but we come up some.

So it is with health services.

Mass transit is a modest increase, $25 million for 1982, with a little more in 1983.

So, Mr. President, I hope the Senate will approve this amendment and that it will go through with support from both sides. Let me once again remind my colleagues that it brings us below the President's budget, and that is the goal we are trying to achieve on the floor today.

I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. I yield time to the Senator from Utah.

Mr. HATCH. Mr. President, I do not want to take more than 30 seconds. I would just remind the Senate that we fought this battle in committee, especially on elementary and secondary education programs, on help for the handicapped, and on youth employment and training and it was a very hotly contested matter in the committee. As I recall, much to the chagrin of the administration, we added $998 million. We felt the add-backs in these three programs were essential.

We fought that hotly contested battle and there was a 10-to-12 vote. Essentially what we are talking about here today is whether we can get through this process and support in essence the President's program. I suggest that the Budget Committee and the Labor Committee have worked hard to do as much as they can do on this matter.

● Mr. LEVIN. Mr. President, I support the amendment offered by the Senator from Rhode Island. It is a modest amendment that restores some equity to the instructions recommended by the Senate Budget Committee.

One small but extremely important program necessary for the survival and, potentially, revitalization of our metropolitan areas, is urban development action grants (UDAG). The program is vital not just to my home State of Michigan but to virtually every State in our Nation. The program has been in existence for just 3 years. The program has provided funds for 1,008 projects from Andalusia, Ala., to Whitehall, Wis.

If the Senate proceeds with budget reductions exactly as proposed by the Budget Committee, the net effect will be a proposal to rescind $300 million from the urban development action grant program. The $300 million approximates the total remaining balance of funding for fiscal year 1981; hence, no additional funding could be provided for economic development projects in distressed cities and urban counties during this fiscal year, including the awards to metropolitan cities scheduled for early April announcement.

Unlike other Federal grant programs, action grants are designed to stimulate private businesses to invest in distressed cities and pockets of poverty—cities and areas most in need of assistance and least likely to be able to benefit from economic recovery without this added incentive. No proposal is approved unless there is firm evidence that private investments will result, and an average of $6 of private money has been leveraged for each $1 of UDAG funding provided.

If $300 million is rescinded, the following will be the impact on distressed cities:

One hundred and fifty-eight economic development projects will not be able to be funded during 1981.

A loss of $1.8 billion of private investment in these cities.

A total of 45,500 new permanent jobs will not be created in these cities. UDAG creates new jobs at a cost of $6,600 per job.

The cities will forego $5.1 million of increased annual local taxes. UDAG creates 17 cents of annual tax revenue for each dollar provided.

The above numbers do not consider the so-called spinoff investment, jobs, and taxes normally associated with UDAG projects; nor the construction jobs provided or jobs retained in the cities.

Such a rescission would not reduce Federal outlays during fiscal year 1981, and there would be a minimal saving during fiscal year 1982. This is because action grant projects are structured with the maximum protection for Federal dollars—UDAG funds go into an economic development project only after private funds are spent, or only on a ratio with private expenditures.

You may have seen an editorial that appeared in the Wall Street Journal on Wednesday, March 25, 1981. The editorial entitled "Throw Away the Crutch" conveniently ignored the contractual benefits to be gained by our urban communities. The article also states the use of the UDAG program as one to "carry political favor." The cited example was an announcement in Detroit "just prior to the November elections."

It has long been a practice for the Secretary of HUD to release preliminary approval announcements within 2 weeks after every quarterly review. Such has been the case in Detroit. A review of the record is clear:

In 1978, the first year of UDAG, the September round was announced on October 5, 1978.

In 1979 the September round was announced on October 19, 1979.

In 1980 the September round was announced on October 9, 1980.

As you can see a grave error has been made by inferring that these announcements were "to curry political favor."

What is being proposed for the essential UDAG program and our Nation's urban areas is not throwing away a crutch—but rather amputating both legs.

When Congress first approved UDAG in 1977, it declared the program's mandate to be "the revitalization and conservation" of America's older cities. Whether through restoration in historic districts in such cities as New London, Savannah, Chicago, Wilmington, Pittsburgh, and Seattle, through adaptive use of old buildings in Evansville, Concord, Akron, Dayton, and Winooski, through renovation of an old office structure in Birmingham or an historic hotel in Richmond, or through new construction which fosters economic growth and revitalization in Lowell, Troy, San Antonio, and Grand Rapids, action grants have spurred revitalization while at the same time making a difference for the cause of urban conservation.

The Chafee amendment also restores funds for education programs. While the primary role for education remains with local and State government, the Federal Government has assumed a special function in helping to provide funds for those groups of students who are disadvantaged, who participate in vocational education programs, who are handicapped and who have other needs that have not or cannot be met by local or State school programs.

It is important that the Federal Government continue in this role—it has helped many of our young people to be trained in meaningful careers, to have an opportunity in life that they might

otherwise not have and to have a chance at an education that in times past, because of a disability, they might never receive.

We have a chance to allow more children in this country to reach his or her full potential, regardless of their background. It is a goal which Congress has endorsed on numerous occasions in the past and one which we ought not abandon.

Mr. President, the Chafee amendment also restores vital funds for preventive health care services. The administration has proposed, and the Budget Committee has accepted, a 25-percent cut in the fiscal year 1981 funding level for categorical preventive health care programs. When inflation is taken into account, this 25-percent reduction in funding will translate into significant reductions in the level of services provided to Americans for immunizations, protection against lead-based paint poisoning, and other important health programs. These services are designed to avoid the serious consequences of illnesses which can result in a much greater strain upon the taxpayer. Children who are affected by lead-based paint poisoning, for example, can cost the taxpayer thousands of dollars due to the long-term medical care consequences of mental retardation.

The administration has maintained that no reduction in services will result from the 25-percent cut in funding because consolidation of preventive health programs will reduce administrative costs. I am dubious about unproven allegations of percentage savings to result from decreased administrative and regulatory costs and I am concerned that the administration's block grant proposals may simply be a facade for making substantial cuts in important health programs.

The Chafee amendment also provides funds for the low-income energy assistance program.

If the budget is to protect the truly needy, no amendment is more likely to test that resolve than this one. Home heat is no frill, no benefit generously bestowed, but rather a necessity of life. If our citizens cannot pay their inflationary fuel bills, should they be evicted into the streets? Should utility companies cut off their heat and hope that no one freezes on cold nights? The only alternative we have is to fund low-income energy assistance.

Decontrol of oil prices has helped cause fuel prices to increase. To cut low-income energy assistance when the need for it has increased would be cruel indeed. Low-income assistance is needed more than ever before to help our poorer citizens survive.

Whatever one might think of the energy program of the administration, I hope that we can agree to protect those who are on the cutting edge on fuel cost increases.

Finally, Mr. President, the Reagan administration has proposed that mass transit operating assistance be phased out by fiscal year 1985. The amendment offered by Senator CHAFEE today will provide for a $50 million increase over the amount recommended by the Budget Committee in fiscal year 1982 and a $105 million increase over the amount recommended in fiscal year 1983 for operating assistance.

I support the Chafee amendment because I believe we need to provide greater funding during the transition period before withdrawing all Federal support for operating assistance. Whether or not Congress ultimately decides to remove the Federal Government from the partnership established with the States and localities in operating mass transit systems, we should continue adequate funding while State and local governments build new revenues to replace current Federal funds.●

LOW-INCOME ENERGY ASSISTANCE FUNDS SHOULD BE RESTORED

● Mr. BIDEN. Mr. President, I support the Chafee amendment to restore $400 million for low-income energy assistance.

Mr. President, the low-income energy assistance program was created to help senior citizens and other persons on fixed incomes pay their fuel bills which had increased rapidly as a result of oil decontrol and OPEC price increases. Many senior citizens were faced with fuel oil prices which had almost doubled from the previous winter.

Although we have had emergency assistance available for a number of years, the dramatic increases in home heating fuel costs have made a broad program of fuel assistance necessary to keep families from freezing to death. During the winter of 1979–80, $1.6 billion was made available for that purpose. This winter $1.85 billion has been available to help senior citizens and poor persons heat their homes.

I am deeply concerned about the impact of President Reagan's budget cuts on low-income households next winter. Not only has he cut funding for this program by 25 percent but he has accelerated the decontrol of domestic energy prices which will only drive up home heating fuel prices further.

The recent economic reports indicate that escalating fuel prices were a major cause of February's inflation increase. This trend will only continue as decontrol proceeds. The reduction of fuel aid combined with decontrol will hit this Nation's elderly with a double impact.

I would like to share with my colleagues some statistics indicating the characteristics of fuel aid recipients in Delaware. These statistics were collected by the State Office of Economic Opportunity as of February 27, 1981:

A total of 27,530 persons in 9,731 households have been served.

3,525 elderly households were served.

829 handicapped households were served.

5,300 households or over 50% had incomes below $6,000 a year.

7,400 households or approximately 75% were poor enough to be receiving some other form of public assistance such as SSI, Food Stamps, AFDC or General Assistance.

I think it is clear from these statistics that the majority of persons served under this program are truly needy. A significant reduction in the funding of this program means that many persons would not get served next winter. The consequences of such cuts will have severe effects on the health and well-being of our senior citizens. That is why I am cosponsoring this amendment and why I hope my colleagues will support restoring money to this program.

URBAN DEVELOPMENT ACTION GRANTS MUST BE SAVED

Mr. President, also I am pleased to see that Senator CHAFEE has sought to restore $300 million to the urban development action grant program.

In my opinion, the urban development action grant program is one of the most effective programs ever created by the Federal Government. Since its inception UDAG has funded over 1,000 public/private development projects with $1.9 billion. UDAG has generated an additional $12 billion in investment from the private sector. Much of this investment has come in distressed urban areas or declining neighborhoods.

Over 470,000 jobs are being created or retained by the projects funded. Of that total, 291,767 will be new permanent jobs. Approximately 27,000 new housing units will be constructed and over 29,000 units will be rehabilitated. UDAG projects have generated $324 million in additional local property tax revenues.

The UDAG program has been extremely successful in my home State of Delaware. A $2 million UDAG grant to the city of Wilmington resulted in the construction of the second major hotel in the city. The grant was used as a second mortgage for the hotel and generated an additional $7.3 million in private investment. This project created 586 jobs including 252 minority jobs.

A second UDAG grant was crucial in keeping the headquarters of a major chemical company from moving out of Wilmington to the suburbs. Approximately 1,350 jobs were retained in the city which would have been moved outside of the city. The project generated $74 million in additional private investment and serves as an anchor to one end of the Market Street Mall in the city.

Wilmington has also received two other UDAG grants. As a result of these UDAG grants there has been a renaissance in new construction downtown.

The benefits of the UDAG program are immense. This program has been extremely successful. With cuts in other economic development assistance programs in the Small Business Administration, the Department of Commerce and the Farmers Home Administration, I believe it is essential that we maintain funding for a separate action grant program.

I support this amendment and I urge my colleagues to join me in supporting this amendment.●

Mr. LEAHY. Mr. President, I am pleased to cosponsor this amendment to restore funding to a number of essential programs. These programs for preventive health care, weatherization and fuel assistance, elementary and secondary education, mass transit, and community development address a range of issues which I consider to be important national priorities. I strongly support this amendment, even though in many cases the funding levels for these programs will still be less than current levels.

Preventive health programs provide essential health services to low-income Americans residing in both rural and urban medically underserved areas of the Nation. The community health centers, black lung clinics, and migrant health centers programs together provide health care to 6 million Americans, the vast majority of whom live below the level of poverty and have little or no health insurance. If funding is not maintained, more than 2 million Americans no longer will have access to basic health care.

This amendment will lessen the reduction proposed for fuel assistance and weatherization, but these programs will still be far below what is actually needed to enable low-income and elderly Americans to keep pace with their energy costs. In Vermont, these people simply cannot conserve any more, and I do not think I need to convince anyone here today that when it is 25° below zero, you simply have no choice but to heat your home. The weatherization and fuel assistance programs have alleviated suffering and hardship for thousands of poor and elderly Vermonters, and in many cases have meant the difference between life and death.

While the President's reduction in mass transit funds will place a heavy strain on urban transit systems, it will force the closing of all rural bus lines in Vermont. This would literally doom the rural people of this Nation to further isolation and limited economic opportunities. It is unfair for the working and low-income people of rural America, and it ignores the real and continuing need to conserve energy resources.

I am particularly pleased that this amendment includes funds for elementary and secondary education programs. This will more adequately insure that programs for handicapped and disabled children will not bear the greatest burden of our efforts to cut Federal spending. It is important that these children have an equal opportunity to learn and participate in our public school system.

Finally, the funds that will be restored for urban development action grants are important to renovate and maintain the vitality of our Nation's cities and towns. This program serves the important national goals of stimulating private investment, creating jobs, encouraging local initiatives, and in many cases, retaining our architectural heritage.

Mr. President, adoption of this amendment will make a significant difference in the lives of millions of Americans in all regions of our country, rural and urban alike. I strongly urge my colleagues to join me in supporting this amendment.

Mr. GLENN. Mr. President, the Senate Budget Committee has proposed to cut the urban development action grant (UDAG) program. I oppose this cut. Moreover, I fully support the amendment to the budget resolution now before the Senate which would restore $300 million for the urban deveolpment block grant program. Without it, no additional funding could be provided for economic development in our distressed cities and urban counties during the remainder of this fiscal year. This includes grant awards which are scheduled to be announced in early April. Applications are presently pending totaling approximately $1.2 billion. In Ohio, there are 21 pending UDAG projects totaling $56.2 million.

There are several reasons to support the restoration of this modest amount to the UDAG program.

First of all, it is consistent with the administration's revised budget request. The administration proposed to continue funding at the present authorized levels. It also has proposed to continue the program at a funding level of $500 million during fiscal year 1982.

Second, the restoration is an inexpensive way to revitalize our distressed cities and urban counties. It would stimulate private sector investment by leveraging private dollars at a ratio of 6 to 1. Moreover, it would generate new permanent jobs and local tax revenues.

Third, the loss in funding would have an adverse impact on distressed cities. It is penny wise and pound foolish. These cities would lose $1.8 billion of private investment and 45,400 new permanent jobs. The cities would also lose $5.1 million of increased annual local taxes since UDAG creates $.17 of annual tax revenue for each dollar provided. In addition, cities would lose the "spin-off" investment, jobs and taxes normally associated with UDAG projects.

Since the first grants were awarded in 1978, 1,042 projects have received preliminary approval of action grants totaling nearly $2 billion. These projects have leveraged over $12 billion in private investments for each UDAG dollar. The projects are creating or retaining over 470,000 jobs, over half of which are permanent. They also will generate over $324 million of new local tax revenues for distressed cities and urban counties. Since 1978, 51 Ohio UDAG projects have been approved totaling $105 million. This amount has leveraged $593 million in private investment —nearly a 6-to-1 ratio of private to public dollars—and has created or retained over 15,000 jobs.

Finally, the loss of UDAG dollars leaves distressed cities and urban counties without an alternative to spur economic development during the remainder of fiscal year 1981.

Without UDAG, there is a "gap" which operates as a disincentive to economic development through private investment in our distressed cities. This gap results from the higher costs faced in built-up areas and the high cost and lesser availability of private loan funds because of the higher risk factor perceived by lenders in distressed areas.

Moreover, the community development block grant (CDBG) program lacks the flexibility to fill the gap which would be left by the loss of UDAG funding. CDBG, which is primarily designed for neighborhood revitalization rather than economic development, is not responsive to the timing requirements of business. Cities must specify how their CDBG funds will be used three years in advance. Once earmarked, CDBG funds can not be moved from one activity to another without a formal amendment and HUD approval. As a result of these political and other considerations, larger cities have used less than 3 percent of their CDBG funding for economic development in the past, while smaller cities have been virtually unable to undertake any economic development with CDBG funds.

Mr. President, I hope that my colleagues will join me and the other cosponsors of this amendment to restore $300 million to the UDAG program.

Mr. DOMENICI. Mr. President, I yield myself 30 seconds.

Mr. President, I want to thank Senator CHAFEE and those who are sponsoring his amendment, who have for all these days been supportive of the Budget Committee. I want to thank you and those cosponsors of your amendment who have been supportive. But, obviously, I cannot support your amendment, and I hope it does not prevail.

I repeat we are not a line-item committee. If we start talking about programs, we are accused of being that. When we do not talk about it, we are accused of not talking about substance.

The truth of the matter is that the principal committee that received new funding from the Chafee amendment, that is Labor and Human Resources, received the biggest add-on in the Budget Committee of any committee in the Senate, $1 billion. That is already there for them to spend. This merely adds another $600 million or $700 million to that committee, and it really is not necessary at this point to carry out the program.

Last, UDAG. I repeat, you do not have to add anything to UDAG. UDAG can be funded at any level you want. All you have to do is to get the Banking Committee to agree, because in that particular instruction we put money into the Export-Import Bank by a vote. There is no assurance that the committee is going to do that. They might very well take that out and put it into UDAG.

So I think most of the arguments have been answered, and I hope we will vote and dispose of this.

I do not think the Senator has asked for the yeas and nays.

Mr. CHAFEE. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. CHAFEE. Let me just say to the distinguished chairman of the committee——

The PRESIDING OFFICER. All time has expired.

Mr. CHAFEE. I am reminded of what our very distinguished chairman of our Finance Committee said. As I look at this wonderful Senator from New Mexico he reminds me of that old song "Your lips say no, no, no but your eyes say yes, yes, yes."

[Laughter.]

Mr. DOMENICI. I did not even know I was looking at you, Senator. I do not know how you can have seen my eyes.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Rhode Island, unprinted amendment No. 34. The yeas

and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. RANDOLPH. Mr. President, may we have order in the Senate?

The VICE PRESIDENT. The Senate will be in order. Will Senators please clear the well?

Mr. RANDOLPH. Mr. President, the Chair instructed the well to be cleared. It has not been cleared.

The VICE PRESIDENT. The Senate will be in order and the well will be cleared.

The clerk may proceed.

The legislative clerk resumed and concluded the call of the roll.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. WILLIAMS) is necessarily absent.

The result was announced—yeas 40, nays 59, as follows:

[Rollcall Vote No. 56 Leg.]

YEAS—40

Andrews	Eagleton	Metzenbaum
Biden	Ford	Mitchell
Bradley	Glenn	Moynihan
Bumpers	Hart	Pell
Burdick	Heinz	Percy
Byrd, Robert C.	Huddleston	Randolph
Cannon	Inouye	Riegle
Chafee	Jackson	Sarbanes
Cohen	Kennedy	Specter
Cranston	Leahy	Stafford
Danforth	Levin	Tsongas
Dixon	Mathias	Weicker
Dodd	Matsunaga	
Durenberger	Melcher	

NAYS—59

Abdnor	Gorton	Nickles
Armstrong	Grassley	Nunn
Baker	Hatch	Packwood
Baucus	Hatfield	Pressler
Bentsen	Hawkins	Proxmire
Boren	Hayakawa	Pryor
Boschwitz	Heflin	Quayle
Byrd, Harry F., Jr.	Helms	Roth
	Hollings	Rudman
Chiles	Humphrey	Sasser
Cochran	Jepsen	Schmitt
D'Amato	Johnston	Simpson
DeConcini	Kassebaum	Stennis
Denton	Kasten	Stevens
Dole	Laxalt	Symms
Domenici	Long	Thurmond
East	Lugar	Tower
Exon	Mattingly	Wallop
Garn	McClure	Warner
Goldwater	Murkowski	Zorinsky

NOT VOTING—1

Williams

So Mr. CHAFEE's amendment (UP No. 34) was rejected.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOMENICI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, could we have order in the Senate?

The PRESIDING OFFICER (Mr. QUAYLE). Senators wishing to have conversations will please retire from the Chamber.

The majority leader is recognized.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, it would be my hope we could take up and dispose of one more amendment tonight and then perhaps lay down another amendment to be the pending business when we return in the morning. I would hope that we can do that by 6 or 6:30. It is my intention later to ask unanimous consent for the Senate to recess over after that until 9:30 in the morning.

There are a variety of reasons why we should not stay late tonight. First is the premiere reason that I think we are making good progress.

The distinguished minority leader inquired whether that was a Republican ceremony. I assured him it was a bipartisan ceremony.

In any event, Mr. President, I do not intend to ask the Senate to remain late tonight. I do expect one more rollcall vote this evening. Following that, and the laying down of another amendment, which I anticipate may be the amendment of the distinguished Senator from Connecticut (Mr. WEICKER), we will go over until tomorrow.

Mr. PELL. Will the Senator yield?

Mr. BAKER. I yield.

Mr. PELL. Will the votes be bunched up tomorrow so that the first vote will not occur before 1 o'clock or 2 o'clock tomorrow afternoon?

The PRESIDING OFFICER. Will the Senator suspend?

Will Senators please retire to the cloakrooms to conduct conversations?

The Senate will please come to order so that we can hear the majority leader and the Senator from Rhode Island.

The majority leader.

Mr. BAKER. I thank the Chair.

Mr. President, as much as it grieves me to say so, I must tell my friend from Rhode Island that, while we stacked votes today and yesterday and we did on Thursday and Friday, I believe, if my memory serves, I really do not believe we can tomorrow. I appreciate his inquiry, but votes will occur throughout the day. I know some Members are committed to the most solemn sort of obligations tomorrow, but it is with great regret that I say I do not believe granting of such a request will be possible.

Mr. PELL. I thank the majority leader.

Mr. METZENBAUM. Mr. President, will the majority leader yield to me?

Mr. BAKER. Yes.

Mr. METZENBAUM. Could the majority leader give us some idea of how late he intends to work tomorrow?

Mr. BAKER. It is my hope that with the schedule I have just announced—that is, one more vote tonight, one more amendment scheduled today and one more pending for tomorrow, with the session starting at shortly after 9:30, we might finish this resolution sometime in the afternoon tomorrow. If we do not, it is my firm intention to ask the Senate to remain in session tomorrow night to try to finish.

Mr. METZENBAUM. I thank the majority leader.

Mr. BAKER. I thank the Senator.

Mr. President, under the arrangements we have followed, more or less, so far, I believe it is the opportunity on the minority side to offer an amendment at this time.

The PRESIDING OFFICER. The Senator from Maine is recognized.

UP AMENDMENT NO. 35

(Purpose: To restore funds for the Economic Development Administration)

Mr. MITCHELL. Mr. President, I request immediate consideration of my amendment which is at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Maine (Mr. MITCHELL), for himself, Mr. RANDOLPH, Mr. ROBERT C. BYRD, Mr. COHEN, Mr. LEVIN, Mr. BURDICK, Mr. BAUCUS, Mr. MOYNIHAN, Mr. WEICKER, Mr. RIEGLE, and Mr. KENNEDY, proposes an unprinted amendment numbered 35.

Mr. MITCHELL. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with "$14,667,000,000" in line 14, strike out through "$47,694,000,000" in line 20 and insert in lieu thereof the following, "$14,496,000,000, and outlays by $2,885,000,000, in fiscal year 1981; to reduce budget authority by $52,801,000,000, and outlays by $36,895,000,000, in fiscal year 1982; and to reduce budget authority by $58,973,000,000, and outlays by $47,594,000,000".

On page 2, beginning with "$13,300,000,000" in line 24 strike out through "$1,800,000,000" on page 3 in line 1 and insert in lieu thereof "$13,129,000,000 in budget authority and $1,500,000,000 in outlays for fiscal year 1981, by $3,150,000,000 in outlays for fiscal year 1982, and $1,743,000,000 in outlays for fiscal year 1983".

On page 7, beginning with "$2,350,000,000" in line 3, strike out through "$1,872,000,000" in line 7 and insert in lieu thereof the following, "$2,179,000,000, in budget authority and $68,000,000, in outlays for fiscal year 1981; $4,711,000,000 in budget authority and $743,000,000 in outlays for fiscal year 1982; and $2,780,000,000 in budget authority and $1,772,000,000".

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senator from Ohio (Mr. METZENBAUM) be added as a cosponsor to my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I should like to be a cosponsor, also.

Mr. MITCHELL. I believe the Senator already is, Mr. President.

Mr. ROBERT C. BYRD. I thank the distinguished Senator.

(Mr. RUDMAN assumed the chair.)

ECONOMIC DEVELOPMENT ADMINISTRATION

Mr. MITCHELL. Mr. President, this amendment instructs the Committee on Environment and Public Works to rescind $171 million, rather than $342 million, in budget authority for fiscal 1981 for the Economic Development Administration, and to add $224 million for 1982, and $255 million in 1983.

This is not a full restoration of funding for the Economic Development Administration. Full funding, based on the Carter budget assumptions, would require budget authority of $664 million in 1981 and $720 million in 1982.

I am proposing to retain a much-reduced program. My amendment represents a cut in operations of 25 percent for the remainder of this fiscal year and a cut of about 50 percent for the next 2 years.

Mr. President, our economic problems demand that we restrain Federal spending and make serious cuts in programs. This amendment does just that. It makes a substantial reduction in the Economic Development Administration but it does not eliminate the program.

I am committed to reducing spending.

It is an important signal the Federal Government can and must send about its intention to combat inflation. No individual program or project is by itself important enough to jeopardize that effort.

I shall support reductions in spending even greater than those proposed by the President. He has asked for spending cuts of $42.9 billion in fiscal 1982. I shall vote for cuts of about $45 billion.

I cosponsored and supported an amendment to reduce all Federal procurement spending by 2 percent across the board—a modest percentage reduction in a huge Federal expense—which, if adopted, would yield an additional saving of $2 billion. I have no doubt that every Government department which engages in procurement can reach that goal and surpass it, if the will to do so is there.

When the first concurrent budget resolution reaches the floor I shall propose further cuts; $1.3 billion can be saved by eliminating the so-called commodity straddle—an unproductive tax-avoidance scheme that benefits a few wealthy persons, creates no jobs, provides no money for investment, modernizes no industrial plant and serves no useful purpose.

I shall propose further cuts, consistent with my conviction that we must eliminate unnecessary spending, marginally useful spending, spending the private sector should make, and spending that is less than a priority.

The President has said that because of the magnitude of the program cuts he is requesting, they must be equitable and rational to merit public support. He has said they must not take from those who cannot afford it; they must be borne equally by all sectors of society; and they must be fair to every region of the country.

I agree with those criteria. They are realistic standards by which to choose among the many demands on Federal funds. I have used those standards to judge the program cuts. It is in that spirit that I have reviewed the proposal to terminate the Economic Development Administration.

Mr. President, the EDA was created to promote the long-range economic development of areas with severe and persistent unemployment and with low per capita income. EDA aids in the development of public facilities and private enterprise to create new, permanent jobs and to preserve existing jobs which might otherwise be lost by the shutdown of an industry in such an area.

The act is grounded in the reality that, no matter how successful national economic policies may be in stimulating overall economic growth and reducing inflation and unemployment, important structural problems will remain. Many of our Nation's urban and rural communities and multi-State regions will still be experiencing unemployment, lagging economic growth, industrial decline and underutilized production facilities and resources.

Beneath the national statistics there are always economic disparities. National economic growth and health is never distributed evenly across the regions, communities, people, and businesses of the country.

In 1980, when the national unemployment rate was 7.2 percent, State unemployment rates ranged from a low of 3.9 percent to a high of 12.6 percent.

Unemployment among black youths in cities hovers around 37 percent.

From 1960 to 1978, employment growth rates in the South and West were two to three times those of the older industrial regions of the country.

Rural poverty and underdevelopment are problems throughout the country.

Mr. President, EDA represents an effort to correct those disparities. It has created some 1.4 million jobs in its lifetime: Jobs that would not have been created if there had been no incentive for industries to relocate, and no money to save businesses that need time to regain their competitive ability. And it has done so at a modest cost.

The Government Accounting Office found that EDA loan value per job created is only $6,700—without taking into account loan repayments, which run at 90 percent for EDA programs. The net cost of EDA jobs is actually therefore about $1,000—the most recent study claims a per-job cost of $662. And the per-job cost offsets the unemployment insurance, welfare benefits, food stamp costs and all the other income-support costs that Government incurs when people are unemployed. The cost of that income support is substantially higher than $1,000 per year.

EDA creates permanent jobs. State and local governments today receive some $6.4 billion in additional tax revenues each year as a result of the continuing economic revitalization caused by EDA projects.

The proposal to terminate EDA is unfortunate in two respects: On the merits and in the abrupt manner suggested. The fact is that we cannot suddenly end a program like EDA without having some unintended and unfortunate effects.

The revenues cities and States have already received from EDA-caused economic revitalization may be safe for the future. But there are many communities around the country which have begun projects, which have committed their own funds, and which have raised public and private funds for projects, all of which will now, at best, be thrust into limbo, at worst, terminated.

If we abruptly kill EDA, we may be forcing localities to waste money they have raised for a specific purpose.

Maine is embarking on a major program of constructing fish piers to help develop one of our oldest and most important industries. The city of Portland, Maine, has raised some $6.5 million for a major improvement in the commercial fishing pier system in our State. It has already received the first $2 million installment of funds from EDA. But under the OMB criteria, Portland will receive no further money or loan assistance on what is a $15 million investment. Portland may be able to proceed without EDA funds, although that is far from certain. But several other Maine communities, like Kennebunk, Stonington, and Searsport, will almost certainly not be able to.

Forty other projects around the country face the same kind of quandary: Lexington Market in Baltimore, Md., stands to lose $1.2 million; South Charleston in South Carolina stands to lose $1.5 million for its relocation of an auto building plant; the Southwest Farmers Co-op in Alabama will not receive the $700,000 it was counting on for a methanol plant, the town of Tarboro in North Carolina will not be able to construct a needed sewer.

My amendment would permit ongoing projects, those already approved by EDA, to be funded, so that the communities relying on these programs would not find their own investments wasted and their time gone for nothing.

Mr. President, my amendment will also permit completion of the 11 projects in which Urban Development Action grants are contingent on EDA financing of the public portion of the project.

These projects—ranging from a rail relocation in Columbia, S.C., to a General Motors facility site in Detroit—depend on the continuation of the EDA.

These are all projects that have been approved; for which private money has been committed, and for which localities have raised their own contributions.

The business development loan guarantees that EDA has authorized for the current fiscal year would let businesses create almost 16,000 new jobs this year. The direct loans would create almost 4,000 more.

These would be private sector jobs, not short-lived public works construction jobs. They would save and improve businesses that can survive if they get the help they need. And they would save and improve the cities and towns where they are located, reducing dependence on Federal welfare funds.

Mr. President, EDA is directly responsible for creating and saving thousands of jobs in Maine. In a State with chronic unemployment problems and an economy aggravated by high energy costs, this is a substantial contribution. Many Maine communities do not have the indigenous resources to attract substantial private investment. EDA has provided that seed money.

Maine's fishing industry must have modern facilities to take full advantage of the 200-mile fishing zone. That is why the State is embarking on the pier construction project. Maine fishermen are small and independent operators. The costs of financing modern fish piers without Government aid are beyond their economic ability—so Government help is needed to construct piers, to speed the transport of a perishable product and to increase the proportion of the catch that can be profitably marketed—to raise the productivity of this industry.

In northern Maine, in the Saint John Valley, the potato farming industry has undergone a 20-year economic decline. Maine was once the Nation's principal potato producer; it is now fourth in the Nation. Maine once supported 4,000 farmers; today 900 remain. The recent development of a new kind of potato that can be grown in the State and is suitable for modern processing methods has given this depressed region a chance to rebuild its economic base. To take advantage of that chance, improved grad-

ing, packing, and marketing are essential. What is needed is a modest Government investment—$600,000—for a central packing plant. The township of Fort Kent and the local farmers will raise the rest of the money. Without that help, the region will be unable to climb back to economic health. That does not strengthen the national economy.

Economic expansion and job creation in distressed areas will undoubtedly be somewhat stimulated by a general economic upturn. But the 20-year decline of the Maine potato industry was not arrested, even though our national economy has not been in a continuous decline since 1961.

Mr. President, Government itself causes serious problems for businesses in poorer regions. A potato processing plant in Caribou, Maine, was under court orders to close because of pollution violations. Only EDA assistance permitted installation of the pollution-control investments needed to stay in business. That plant employs neary 100 people in a remote corner of the State. There is absolutely no doubt that its closure would have increased the unemployment and income-support costs of the Federal Government. The administration is committed to regulatory reform, a goal I also support. But regulatory reforms would not have removed the court order which almost forced the Colby Starch plant to go under.

The 15 percent unemployment rate in Waldo County, Maine—once one of the Nation's largest poultry producers—has not eased, even when the national economy has taken a turn for the better. The factors that have eroded its economy will continue to impose a harsh cost on the area. Waldo County is a victim of the massive energy price inflation of recent years, and there is no sign that this inflation is easing.

Regional and local economic dislocations and hardships do not vanish in a national economic upturn.

The fact is that our national economy contains regions where incomes remain low, where unemployment remains stubbornly high, and where energy price inflation is felt more harshly than elsewhere—and where help is needed to stimulate local economic growth.

Mr. President, the contention that cuts must come from all parts of the budget and go to all regions of the country is a fair one—but just as we cannot reduce needy individuals to destitution, we ought not aggravate the problems of economically distressed areas.

I asked the administration how it plans to deal with economic development in areas of chronically high unemployment and low per capita income. The written response I received said: "The administration intends to deal with economic development at the subnational level by improving the national economy."

So the administration's plans rest on the hope that by improving the Nation's economic performance, every region of the country will share in that improvement.

That assumption has no historic basis in fact. It has not been true for Maine over the last 20 years. And, for over a century, it has not been our national economic policy.

In 1850, when it became apparent that the success of the Eastern States in building their rail networks promised an increase in wealth for the entire eastern seaboard, Congress enacted the Railroad Land Grant Act—truly landmark legislation—to encourage, by Federal subsidy, the expansion of the rail network in the South and West. And for 21 years thereafter, long after the transcontinental line met at Ogden in 1864, Congress continued to grant rail land rights. 131 million acres of land were granted for that purpose—a Federal subsidy for Western and Southern economic development whose worth cannot be calculated at today's prices.

Beginning in the 1880's, hydroelectric power was aggressively developed with Federal aid. The first major alternating power project was constructed on the Willamette River, in the State of Washington. The first three-phase project was constructed at Mill Creek, in California. Ironically, the justification for concentrating development in that part of the Nation was a familiar one: The high cost of energy. In those days, it was the cost of transporting coal, but the problem of energy costs and their effects on economic growth was recognized then, and the Federal Government acted to offset it, to the immense benefit of the West.

By 1902, 30 years of homesteading acts had not been enough to encourage the settlement of the arid parts of the West, so Congress enacted the Reclamation Lands Act of 1902, a regional economic program which has changed the face of the country. Under the Reclamation Act, water projects were built in 17 Western States to irrigate arid land. Some of our great cities—Phoenix, Denver, Los Angeles—could not exist without that water. The Imperial Valley in California, the most productive farmland in the Nation, could not produce without it. Thousands of acres throughout the West today would be barren and arid without the life-giving aid of the water brought to them by Federal financing. And, as one result, Western lands with less than 9 inches of rainfall each year now produce an agricultural product worth $4.4 billion.

In the 1930's, when the great depression was at its worst, Federal funds were poured into regional efforts to help provide employment and economic growth in the West and South. The massive Bonneville hydro project on the Columbia River was built to provide employment in the Pacific Northwest. Today, a potato processing plant in Washington State pays one-fifth the rate of electricity that a similar plant pays in Maine, because of Bonneville power and the other Federal hydro projects in Washington.

The greatest of the regional development programs, the Tennessee Valley Authority, is still benefiting its seven-State area. Its series of dams, reforestation projects, power plants and fertilizer plants have lifted a region which was in the depths of poverty in 1933—its people then earned 45 percent of the national average income—to a thriving and economically productive region today. In 5 years, from 1933 to 1938, the Federal Government spent $190 million on the TVA—a sum whose present-day counterpart would run into many billions. And as a result of that Federal financing, the people of Tennessee today pay for their electricity half what the people of Maine pay for theirs. The TVA project permanently increased the level of employment in the region. It created the economic base that has enabled the entire Tennessee Valley area to grow and prosper.

Mr. President, this massive Federal assistance to the South and the West over the past century has given those areas a basis from which today's rapid rate of economic development flows. It was grounded in the recognition that not all regions of the country have identical needs, that they do not move forward in lockstep, and that help is needed at different times by different parts of the country.

Today, as we observe the prosperity of the Sunbelt, we should recall that the present economic boom owes its existence to many decades of generous Federal aid.

That Federal aid was paid for by the tax dollars of the people in the East and North. It was not paid grudgingly. It was paid in recognition of the reality that we are one nation and what helps one region helps all Americans.

Today, we have a modest program which extends assistance to areas of chronic unemployment and low per capital income: The Economic Development Administration. And because of the forces of history and the actions of the Federal Government, the region that needs help now is the East and the North. Today, this is the region of high unemployment and low per capita income.

EDA is a small effort to redress the balance, to recognize that our Nation's older regions incur higher costs to maintain the investment in cities and industries that were built in earlier decades.

I can think of no action more destructive and less in keeping with the President's own standards of fairness than its termination.

It effectively says that those who have already benefited from Federal programs, those who have reaped the benefit of Federal assistance on a massive scale, those whose economies are advancing, are to be the final beneficiaries of Federal concern. The proposal to terminate EDA simply says to the regions whose tax dollars built that prosperity, "We've gotten ours. Now you fend for yourselves."

Mr. President, that is a narrow, shortsighted attitude, contrary to our national experience and, in the long run, counterproductive. It will be a tragic error to end one of the very few programs that is designed to and does, in fact, redress the balance that exists in economic growth rates.

The States of the East and North today receive 84 cents back for every Federal tax dollar they contribute. The States in the West and South receive $1.09 for each of their tax dollars, so the imbalance in Federal aid is continuing to grow notwithstanding the different levels of economic growth.

The State of Maine has a per capital income that is 20 percent lower than the national average. When the cost of energy is included, Maine ranks 50th in per capita income. Manufacturing jobs in the State have grown by 3.6 percent in the last decade, compared with an average growth rate of 26 percent in the West and 18 percent in the South.

New England has lost 35 percent of its defense jobs in the past decade. The older regions of the Nation receive just 38 percent of Federal procurement dollars, compared with 62 percent for the South and the West.

In our national economy, such regional differences abound. Areas of economic blight remain and communities experience decline, even when the national economy is healthy.

The Economic Development Administration has been a successful program. The only valid criticism of it is that it has not been targeted narrowly enough. It has been criticized because past Congresses made it so diffuse that it theoretically covers 80 percent of the country. That is a valid criticism. I think the program should be better targeted; it should be limited to areas that are truly suffering chronic high unemployment and low per capita income.

The amendment I am offering will help achieve that result.

Mr. President, although EDA is theoretically entitled to fund projects in almost every part of the country, the agency has been responsible and restrained: More than 2,400 counties are eligible for EDA funds. In the last year, EDA funded programs in 800 of them. At the minimum, 75 percent of its funding goes to economically distressed areas as measured by a substantial employment loss, a population loss, a per capita income that is 75 percent under the national average, or long-term unemployment, as measured by 16 or more quarters of unemployment above the national average.

A 1970 amendment forbids the agency to remove the eligibility designation of any county once it is declared eligible for aid. That congressional decision was made 10 years ago. I believe it ought to be reversed this year.

But it would be wrong to discard the best of a program because it contains some shortcomings. That makes neither fiscal sense nor long-term economic sense. It is not fiscally responsible to terminate a program that creates jobs, saves welfare costs, generates State and local tax returns, and raises the level of national economic output.

We should not destroy a useful program, one which has shown an ability to reach and really help many depressed communities at minimal cost, simply because it needs improvement. Let us, rather, make the improvement; narrow the focus; halve the overall spending, and let it continue to perform its purpose: To create needed jobs for working people.

That would be the effect of my amendment. I believe it deserves the support of the most fiscally conservative among us. This is not a program whose costs are a drain on the economy. It is not a program that simply transfers income from one sector of the population to another, with no gain. It is a program that raises the level of economic activity and spurs private economic growth.

We all agree that the national economy will not grow and prosper without an infusion of funds for investment. How then can we believe that chronically depressed areas can prosper without assistance?

If the booming economies of the South and West need the stimulation of additional tax breaks and investment dollars, then surely the economically depressed regions need help, too.

Mr. President, the changes in our Nation's economic structure reflect the passage of decades. They are not all due to the National Government. But just as the National Government has historically recognized and responded to its responsibility to aid the South and the West, so, today, we should recognize our responsibility to the distressed regions in the older parts of the country. That, too, is a legitimate responsibility of a national government. If we fail to recognize that responsibility, if we fail to respond, we will surely become again a nation divided.

And, Mr. President, it is as true today as it was in 1860, that a nation divided against itself cannot stand.

Mr. President, I request the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. MITCHELL. Thank you, Mr. President.

I yield to Senator COHEN.

The PRESIDING OFFICER. The senior Senator from Maine is recognized.

Mr. COHEN. I thank the Chair.

Mr. President, I am pleased to join with Senator MITCHELL in offering this amendment which will keep the Economic Development Administration in operation, albeit at a substantially reduced level of funding.

I should point out that I would take one issue of exception to what my junior colleague has said.

As was pointed out to me by the junior Senator from the State of Washington, the Willamette River does not run through Washington but rather through Oregon. Perhaps if we make that correction for the record, the junior Senator from Washington will lend his considerable support for this particular amendment.

But in view of what has happened in the recent vote on the last amendment offered by my colleague from Rhode Island, I am afraid that the handwriting is on the wall and it does not appear to be forgery. It appears that this Chamber is going to turn a deaf ear and a blind eye to the inequities that are going to be inflicted upon the areas of the country that are economically malnourished.

I still wish to take only a moment, nonetheless, to at least make the case for the record if for nothing else.

Over the years, EDA has been a genuinely positive force in promoting economic development in the State of Maine.

I think, as Senator MITCHELL has correctly pointed out, this program was never designed to apply to regions across the board. It was to be targeted to those areas which were most in need of economic assistance.

We only have to take a look at the fact that in New England we pay among the highest fuel costs in the country, we have the highest unemployment, we have one of the coldest and longest winters, and we have a large number of families on food stamps and in need of fuel assistance.

I saw an item in today's newspaper that 15,000 more families are now going to apply for fuel assistance in the State of Maine.

We have an older industry that is now on the verge of collapse, the poultry industry in Maine, principally because of the high cost of energy, the high freight rates that have to be paid, the feed costs that must be paid, and the attractions to the Sunbelt now are so overwhelming that this industry threatens to go under, thereby laying off thousands of more workers in my own State.

Often, the agency's willingness to assist a troubled industry or business in Maine has spelled the difference between productive employment for Maine workers and the economic disruption which results when a marginal enterprise fails, or when a good business opportunity is missed for lack of financial or technical assistance.

Since 1966, under the direction of a fine State and regional staff, EDA has provided economic assistance to 429 projects in Maine. Through the cooperative efforts of EDA, State, and local government, and the private sector, thousands of good jobs have been created throughout Maine that might not otherwise exist today. I will cite a few examples of where a helping hand from EDA has truly made a difference in Maine. That is why EDA is so important to the State of Maine, and let me just recite a couple of examples of success:

The city of Biddeford, a traditional Maine mill town with distressed industries, was assisted by EDA in the 1960's and 1970's in developing an industrial park to rebuild its industrial base. With less than $2 million in Federal investment, seven industries have located on the park with over 1,200 jobs created or saved.

The city of Presque Isle was faced with a military base closure in an area with a one-crop agriculture economy. With EDA assistance, the city purchased the property and developed industrial land. Today, over 20 businesses and industries are located on the park with over 1,500 jobs.

A bankrupt potato processing facility at Easton was purchased by a private firm with EDA assistance. Today, the

plant has been expanded, nearly 700 workers are employed, and farmers have been provided a market for their crops.

At present, in the EDA pipeline are projects that can assist basic Maine industries in redevelopment efforts. I list the Portland Fish Pier Complex and the Fort Kent potato packing facility as examples. In both cases, local communities, along with private investors, have made commitments and will suffer from the rescission and the ultimate phasedown of the agency.

I am, of course, aware of the criticisms that this administration and others have leveled against EDA. I do not think that any of us who take the floor today in support of this amendment will argue that EDA is not without its problems. But in many instances, the problems which plague EDA today are not of the agency's making. It is Congress, in my view, which bears the greatest responsibility for the present state of affairs at EDA.

Too often, EDA officials have disapproved an application for financial or technical assistance, only to be overridden by a powerful Member of Congress or a well-placed official at the White House. Too often, the Congress has assigned new responsibilities to EDA without providing the time and resources necessary to respond to the congressional mandate. The $6 billion local public works program is perhaps the best example of this phenomenon. And too often, Congress has broadened the constituency of EDA, leading to the ludicrous situation where 85 percent of the United States is now classified as "economically depressed" for purposes of qualifying for EDA assistance.

Mr. President, EDA does not pass the laws of this Nation. It does not define its own mandate. It has not set out to create the vast constituency that now competes for the limited technical and financial assistance provided by the Agency. If we support the elimination of EDA as proposed by the administration, we are not striking back at an insensitive and wasteful Federal agency. Rather, we will eliminate a needed and fully justifiable Federal agency which has become overburdened and misdirected by forces beyond its control. We will be reacting to the symptoms of the problem, and turning our back on the root causes which, in my view, can be readily corrected.

Mr. President, one of the principal objectives of President Reagan's program for economic recovery is to significantly reduce the credit activities of the Federal Government. In part, this policy shift reflects the administration's view that the private sector should assume more of the risk associated with new investment. I support this view. The Federal Government should be the lender of last resort, not the Nation's principal banker.

But this view does not deny that there are instances when a Federal agency such as EDA can and should play an active role in promoting economic development or readjustment. Many of Maine's traditional industries—fishing, shoes, potatoes, and poultry—have been severely injured by high interest rates, soaring energy costs, and Federal transportation and trade policies. Does not the Federal Government have an obligation to play at least a limited role in assisting these industries in their efforts to adjust to Federal policies? How is the Nation, and my State, better served by turning a deaf ear to those industries which deserve assistance and will almost certainly continue to decline without it?

Mr. President, the pending amendment does not argue for the status quo at EDA. It clearly acknowledges that the agency has problems and that a restructuring of EDA's mandate is necessary.

I urge my colleagues to support this partial restoration of funds for EDA. The case for abruptly terminating the agency is just simply not there. Let us keep EDA in operation until we can work together to adopt the needed reforms that will permit it to once again serve those purposes for which it was originally created.

Mr. President, I shall try at least to summarize the major point made by my colleague from Maine.

There is something that is fundamental to our system in this country, and that is that if we take persons who are similarly situated and we treat them differently, that is a denial of equal protection of the law.

It is also true in our system if we take people who are not similarly situated and we treat them equally, that is also a fundamental denial of equal protection under our system.

What we are doing in this particular budget approach is that we are taking regions that are not similarly situated and under the guise of treating everyone equally we are then inflicting an unequal treatment upon them since we have different needs, different economic conditions, and different climate conditions. We cannot simply say that everyone is going to be treated equally when in fact they do not need to pay high energy bills in the West, they do not need to pay high fuel bills in southern California, by way of example, or even pay for air-conditioning in the summertime because it is not necessary. But people have to have oil to heat their homes in the State of Maine and because of the high cost of energy, industries are reluctant to locate there, which in turn produces a lower incentive, or a disincentive, to create jobs in our State.

We need an agency, such as EDA, with the modifications that have been suggested and recommended, to correct the fundamental inequities that now are suffered by our region.

Mr. President, I urge the support of the amendment offered by my colleague from Maine and hope that we can reverse the precedent set by the last vote.

The PRESIDING OFFICER (Mr. WARNER). Who yields time?

The Chair recognizes the Senator from West Virginia and inquires who is yielding time to the distinguished Senator from West Virginia.

Mr. MITCHELL. Mr. President, how much time is remaining of the proponents?

The PRESIDING OFFICER. The proponents of the amendment have 3 minutes remaining.

Mr. MITCHELL. Mr. President, I ask unanimous consent that that time be yielded and additional time on the resolution itself.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from West Virginia is recognized.

Mr. RANDOLPH. Mr. President, the principal sponsor of the pending amendment is the able Senator from Maine, Mr. MITCHELL, and he is joined by his able colleague, Mr. COHEN, also of the same State. I wish very frankly that every Member of this body could be sponsoring this legislation. This is the type of legislation that the Reagan administration really believes in.

If we will dissect it from the beginning to the end, it is absolutely a proposal that could well come from our national leader and those of his party.

This legislation has lived and developed, progressed and given substance to the very best that is in the strengthening of the American economy through Republican as well as Democratic administrations with Republicans in the White House as well as Democrats who have had those positions.

The legislation originally was enacted in 1965. It came from what was then the Public Works Committee and is now the Environment and Public Works Committee. It was a part of a two-pronged program, joined with the Appalachian Regional Commission, where we were to leave Washington, D.C., and to go out, I say to the knowledgeable Senator from Louisiana, Mr. LONG, who is in the Chamber just now, to leave Washington, D.C., and let these projects and programs come into being from the communities and the States of this Republic.

That is exactly what we did in 1965—not a program that was spawned here in Washington, D.C., but a program that had those projects where we had what would be used as the catalyst. It is the core, by which private support—banks included—workers would raise money throughout this Nation, and we would strengthen the economy of literally hundreds and hundreds of communities in every State of the Union.

So we attempt to continue funding for fiscal year 1982 for these programs that have been authorized by the Public Works and Economic Development Act.

The amendment will restore $224.5 million in budget authority for that fiscal year of 1982. This level of funding will provide for a minimum program for the agency to continue the mandate given by Congress to support economic development in areas of this country where the economy for one reason or another was distressed, and where there were high levels of unemployment. This is the backdrop from which we began the programs in 1965.

I have serious concerns, very serious concerns, that the elimination of EDA will have an adverse effect on economic growth and development in this country, particularly, I say, in the rural sections of America.

This program was developed, I reemphasize, to assist communities which

could not sustain the economic growth on their own. No matter how successful our national economic policy might be in stimulating overall economic growth and reducing inflation, important structural problems are with us now just as they were 15 years ago.

Many of the communities of this country and multistate regions are experiencing those structural unemployment, lagging business growth, industrial decline and related business sector distress.

Beneath our national economic statistics there are always the peaks and the valleys in our economy. National economic growth is never distributed evenly. We have today, in 1980—let us look back just a few months—national unemployment at 7.1 percent, but the individual State unemployment figures range from 3.9 percent to 12.6 percent.

During the last two decades growth rates in the so-called Sunbelt have been 2 to 3 times that of the older industrial northern regions. The Senator has spoken of Maine, and his colleague of that State has spoken also. They know this situation.

Now, these are only just an indication of the problems that exist. This country cannot sustain, as I understand it, economic activity and attract new business to smaller communities without the ability to fund public works, which provide the infrastructure on which a sound economy can be based.

There is a general belief, Mr. President, that the Government should exercise fiscal restraint during a period of economic adjustment. I share that belief and will consider reasonable reductions in spending levels, and I have done so. This was done in the committee on which I sat, where we reduced last year our proposals, even going below the Budget Committee as we came to the Senate.

I do not believe these reductions should be arbitrary nor should they be so extensive as to impair the orderly operation of the Federal programs, such as EDA and ARC, and others which were developed by Congress to meet specific public community and regional needs.

Most Government programs will absorb spending reductions in varying degrees. There are a few instances, however, in which agencies are being asked to assume more than their fair share of the budget cutback. They are targeted for total extinction.

Within this latter category is the program that we consider this evening, EDA, which has made valuable contributions in its 15 years of existence to the economic revitalization of America.

I strongly disagree, I earnestly disagree, I loudly disagree, with the proposal of the Budget Committee to provide virtually no funds for EDA in fiscal year 1982.

EDA's primary focus is on helping distressed local economies to deal with their problems. EDA helps the localities learn to work out their own development strategies and to carry out locally—locally now—developed projects through effective targeting toward the most needy areas of the country, unemployed resources, labor, plant and equipment, existing infrastructures, which are put to work and still more unemployment is prevented from occurring.

I am going to give some examples of what this program has done, before I am through. Since 1965 slightly less than $5 billion has been expended by EDA for projects to assist communities and business providing jobs and a stable economy.

EDA programs have assisted small firms by the score, and needy local programs to strengthen the viability of the economy of communities all over this country. States and communities have become increasingly active in addressing their own economic problems to encouraging business investment and establish cooperative efforts with the private sector. Economic development, as distinct from social welfare assistance, has become an important component of State and local business and industry policy.

EDA has taken the lead in providing planning, technical assistance to build the capacity of State and local governments and regional organizations to plan and to implement economic development programs and coordinate the investment of Federal, State, local, and private capital in distressed areas.

EDA's programs can address and have addressed a variety of types of regional and local distress, including rural underdevelopment, outmigration, economic decline, sudden economic crises caused by major plant or military base closures and adjustment problems faced by regions and communities confronted with major structural changes brought about by the national economic growth and international trade policy.

Mr. President, every State has benefited by not just one project but scores of projects through EDA funds. States have received both development grants and guaranteed business loans. One of the most effective programs has been that direct loan and the loan guarantee of EDA.

The Small Business Administration defines small business as a firm with 500 or less workers. During the period 1976–80, the overwhelming majority of the EDA loans and guarantees went to these small firms throughout our country Ninety percent of the direct loans and 84 percent of the guarantees were made to small businesses, as the former majority leader who is in the Chamber at this time, Senator BYRD of West Virginia, knows well. These programs have helped small business. It is generally accepted that the best and most effective way to create new jobs is to assist the small firm. I believe in that. Statistics indicate that over 75 percent of the new jobs that are created each year come in the sector of our economy which is under the umbrella designated as small business.

Mr. President, in West Virginia, EDA loans have saved—I used the word "saved"—not helped to save, but have been instrumental in saving businesses, and, of course, jobs were created and created and created.

In the northern part of West Virginia, EDA has assisted two firms which would have otherwise closed. Someone might say, "Let them close." I do not believe in that.

The Fourco Glass Co., between Parkersburg and Grafton, received an EDA loan which allowed it to modernize its facilities and to remain as a viable producer of glass products.

EDA has assisted in providing financing for a new purchaser for the Sterling Faucet Co. in Morgantown, W. Va.

I go back to Fourco for a moment and remind you that 800 people or more are at work today and they would be out of these jobs had EDA not been the catalyst with which the program has come together.

Now to come again to Sterling Faucet, the assistance from EDA allowed this plant to continue to provide jobs in an economy where they could not otherwise have been replaced; some 700 or 800 persons working in that plant at the present time.

I could go on and on and on and talk about the plants in West Virginia and the aid given by EDA in West Virginia.

Senator MITCHELL has presented a good case for the continuation of EDA. It was one that did not have to be manufactured. The prima facie evidence is there.

I fully concur with the assessments that others have made for continuing this program. It is so practical and suited to meet, frankly, as I said at the very beginning, the objectives of this new administration. That is exactly what is contained in EDA.

There are estimates that current EDA investments will create—and I believe this is correct—or preserve more than 217,000 jobs in this country and approximately $2.5 billion in private investment.

This is the capability which we should retain during a time of emphasis of the new administration, and properly so, on the creation of employment opportunities, particularly by small- and medium-sized businesses, such as have received most of the attention of the EDA.

And so it is unwarranted—I say this rather sadly—that there should be a proposal to mark this program for extinction. It has been an unwise decision.

I think the proposal was made—I say to the able Presiding Officer, who examines matters very carefully—without the examination which this program should have had. The President speaks quickly. Congress comes in and acts quickly. In a program of this type, I do not believe it was carefully assessed, its achievements, its purposes.

I remember when the Secretary of Commerce, Malcolm Baldrige came one evening and talked to me about this program. He admitted—and it is not wrong for me to say, Mr. President and those Members in the Senate—he did not know about this program. He did not know what the program had been doing. He did not know what the program had been accomplishing. I voted for his confirmation as Secretary of Commerce, because I want him to succeed in that position as I want all the members of the

President's Cabinet and their departments to succeed.

But what I am bearing down on there is that he did not know. And, frankly, he cannot know as of the minute I speak. He has not had the opportunity to know of the program and its effectiveness throughout the United States.

So I trust that even though amendments to the budget are being turned back, I want the record to show there might be a miracle that could take place this evening. I cannot see it coming, because I cannot see the Members on the floor who perhaps have heard the strong arguments which are built upon credibility, because the valuable and vital programs of EDA have provided a stable economic climate in hundreds and hundreds of the communities of this country.

So I urge my colleagues to give attention to this matter because it is a Federal program—I want the record to always show these words—that could be lost and will perhaps be lost—I am not negative—with no viable alternative to replace it.

Mr. KENNEDY addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. ROBERT C. BYRD. Mr. President, I yield to the Senator from Massachusetts from the time on the resolution.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. KENNEDY. Mr. President, I ask unanimous consent to be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I will not delay the Senate long, but I do want to indicate my support for the Mitchell amendment. EDA provides the grants and loans to leverage the community investments and create new permanent employment in the economically distressed areas of our country.

EDA's fiscal 1980 investments will generate or preserve more than 216,000 jobs and leverage approximately $2.5 billion in private investment.

The administration says that EDA programs have not been cost effective or well targeted and that most business development loans and loan guarantees are granted to large established firms which already have access to private financing.

That does not happen to be the case in my own State of Massachusetts, where in countless cases this program has made a big difference because new business opportunities have been created in communities which had experienced the loss of major industries over the period of the last 10 or 15 years.

And studies during the past 3 years show that EDA funding has been increasingly focused on small and medium-sized businesses.

Moreover, EDA represents one of the Federal Government's most important strategies to reverse economic decline in the Northeast and Midwest.

EDA's investment of $340 million in the Northeast and Midwest regions has guaranteed or preserved more than 92,500 jobs and leveraged approximately $874 million in private investment.

And the $20 million provided for Massachusetts generated $38 million in private investment and created or preserved over 6,000 jobs.

So, Mr. President, I think this program has proved itself over the years and is worthy of our continued support.

I urge the adoption of the proposed amendment.

Mr. GRASSLEY. Mr. President, I yield myself such time as I may consume.

Mr. President and Members of the Senate, I rise in opposition to this amendment, and also to explain what the Budget Committee assumed in this resolution with respect to EDA funding.

First of all, the committee assumed the administration's proposal to terminate all EDA activities except for the trade adjustment assistance program and legally required activities under the loan guarantee program.

The budget levels assumed by the Budget Committee in this reconciliation resolution for EDA are identical to those recommended by the Senate Environment and Public Works Committee in its March 16 letter to the Budget Committee.

I will quote from that letter:

The committee—

Meaning the Environment and Public Works Committee—

recommend revised budget authority for fiscal year 1981 identical to the request of the Reagan administration, which rescinds $342 million in appropriations for the Economic Development Administration—For fiscal year 1982, the committee agreed to recommend $50 million in budget authority to administer the phase-out of the EDA.

Legitimately the question can be asked and the proposition put, why eliminate this program?

Well, the answer is that rather than direct Federal assistance programs, the determination has been made by the administration, and endorsed by the Environment and Public Works Committee, and by the Budget Committee in its assumptions that we should rely upon general tax, fiscal, and regulatory measures to stimulate economic expansion and job creation.

General economic incentives given to the private sector will allow the marketplace to retain more of its earnings, to build investment, and expand capital, creating permanent jobs.

Jobs that are created in the private sector, having permanency, are jobs that have long-term benefit to the economy.

I think we also ought to respond to the challenge that Senator RANDOLPH put to us suggesting that because this program does leverage private capital and because it is more oriented toward the private sector than are a lot of programs from the Federal level, this is a program that Republicans for that reason should support.

I think I can say that there has been the assumption that there should be the Federal Government involvement in the economy, and Federal promotion of programs to eliminate unemployment. We have assumed that the Federal Government can leverage some private capital that would not otherwise be leveraged.

Let me suggest that we have tried this approach for a long period of time and it does not seem to have produced what it should have produced. Now we are looking to a new approach, an approach that will get inflation under control by reducing Federal expenditures, a program that is going to encourage savings and investments, with the resultant increase in productivity through tax policies encouraging job creation in the private sector.

We feel that this policy of the Reagan administration, which relies totally upon the private sector, is better than the hybrid program that we have been operating under through recent years. Hence, I accept Senator RANDOLPH's challenge, but I must reject it.

Mr. ROBERT C. BYRD addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I yield to the distinguished majority leader.

Mr. BAKER. Mr. President, I thank the distinguished Senator.

Mr. President, while there is the opportunity, let me say that we have to vote on this amendment rather promptly because a number of Senators have commitments that must be attended to before long.

ORDER FOR RECESS UNTIL 9:30 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business tonight, it stand in recess until the hour of 9:30 a.m. tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTION

The Senate continued with the consideration of the concurrent resolution.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, it would be my expectation that, shortly after we reconvene and after the recognition of the two leaders under the standing order, we will proceed immediately to resume consideration of this matter, Senate Concurrent Resolution 9. I expect the Weicker amendment will be laid down this evening and that we can turn to it shortly after we return to this resolution tomorrow.

I am told that there may be 12 or 13 amendments that may be offered tomorrow. It would appear that tomorrow will be a very busy and a very long day. I would hope to finish this bill tomorrow. I think it is essential that we try to have final passage of the resolution before we recess or adjourn on tomorrow. Members should be on notice that there is a real possibility, almost a certainty, that we will be in session tomorrow until we finish this resolution, even if that is late in the evening. However, we will not continue beyond this next vote tonight, if indeed we can reach this vote shortly. It will be the last rollcall vote we will have this evening.

Mr. ROBERT C. BYRD. Mr. President, Senator MITCHELL has offered an amend-

ment, which I am happy to cosponsor, and I congratulate him on his authorship. It would restore money for EDA in fiscal years 1981 and 1982.

The Economic Development Administration administers the Nation's most basic economic stimulus programs. The key focus of the agency is private sector development. EDA promotes economic development through three fundamental tools: Technical planning assistance, basic infrastructure support, and developmental finance for private job creation.

An effective local response to serious economic problems demands more than ad hoc development projects. It requires sound, long-term economic planning based upon trained understanding of the problems and opportunities for development. This is where EDA can fill the gap.

Some areas with high unemployment lack the basic financial resources to meet the cost of public services necessary to maintain economic well being. EDA provides grants for fiscally troubled communities to build or maintain basic infrastructure support. Typical public facility projects include water and sewage systems, access roads, industrial parks, and harbor and airport facilities.

Businesses in underdeveloped rural areas may have difficulty acquiring adequate capital because banks tend to lack liquidity where there is no solid base of past economic development to protect the investments of lenders and companies. Businesses in economically declining urban areas may have problems finding reasonably priced credit because of their location. It is in this context that EDA provides direct loans or loan guarantees.

Despite the broad eligibility criteria in current law, EDA has exercised considerable discretion in granting assistance to communities—and a major portion has gone to those most financially troubled. The agency has developed a number of standards to determine the merits of assistance. More weight is given to projects that are part of a practical development strategy, will draw additional non-Federal public and private investment, and have a substantial impact in relieving unemployment.

Mr. President, if we do not know it when we get here, most Members of Congress eventually learn Mencken's law: "For every human problem, there is a solution that is simple, neat and wrong." To eliminate this Nation's economic revitalization programs, without the benefit of committee hearings or review, would undoubtedly subscribe to the tenets of Mencken's law.

There are many lessons to be learned from last November's election, and we are still learning them. However, I do not believe that the voters told us simply to eliminate all Federal assistance for economically distressed areas. I do not believe that Federal economic revitalization programs have been a mistake.

I believe that the majority of American voters think the Federal Government has a role to play in revitalizing America's economy. The people want to see the unemployed auto worker in Detroit, they want to see the unemployed factory worker in Ohio and the unemployed miner in West Virginia at work again. The people want to see America productively working again.

The EDA has been helpful in providing jobs for American workers.

Mr. President, I hope the Senate will adopt the amendment offered by Mr. MITCHELL.

Mr. GRASSLEY. Mr. President, have the yeas and nays been ordered?

The PRESIDING OFFICER. The yeas and nays have been ordered.

Mr. GRASSLEY. Mr. President, we yield back the remainder of our time on this side.

Mr. MITCHELL. Mr. President, may I ask for just 1 minute to respond to the statement made by the Senator from Iowa in opposition to the amendment? I shall ask for 2 minutes against the resolution itself.

Mr. ROBERT C. BYRD. Mr. President, I yield 2 minutes.

Mr. MITCHELL. Mr. President, the argument against this amendment made by the Senator from Iowa is that any policies involving the Federal Government in economic development have been failures and that we ought to abandon that approach. I should like to ask the Senate, was the Tennessee Valley Authority a failure? Did that not result in assistance to millions and millions of Americans in a seven-State region?

The Reclamation Lands Act, which enabled all of the Western States to bloom now, to have the most productive farmlands in the world, areas that were once arid and barren—was that a failure?

The hydroelectric policies which have enabled the cost of electricity in the Western States to be a fraction of that in the Eastern States, which have enabled that area to prosper and develop economically—was that a failure?

The fact of the matter is that the major policies involving the Federal Government in the development of the West and the South have been spectacular successes. That is the reason why the West and the South are now in an economically advantageous position. They have been the opposite of failures. It is precisely that situation and it is for precisely that reason that this program should be continued. By historic turn of events, due in large part of Federal development policies, it is now the East and the North that are the origins of high unemployment and low per capita income. Where once the energies and the efforts of the Federal Government were turned to helping the West and the South develop, and succeeded spectacularly in that effort, now it is this modest effort that is necessary to aid the areas of the East and the North, which suffer from high unemployment and low per capita income.

I do not think this policy of the past century has been a failure. I think it has been a great success. There is nothing more symbolic of that success than the Tennessee Valley Authority, the Reclamation Lands Act, the hydro development programs, and all of the other programs by which the West and the southern parts of this country have reached the economic peak that they now enjoy. So, Mr. President, the arguments offered against this amendment are, in fact, arguments for the amendment because the policies of the past century have succeeded and should be continued.

The PRESIDING OFFICER. All time having expired——

Mr. GRASSLEY. Mr. President, I yield the Senator from Alaska 3 minutes from the resolution.

Mr. MURKOWSKI. Mr. President, I thank the Senator from Iowa for yielding. I think the EDA program, as originally proposed and the EDA program that we have proposed before us in the U.S. Senate are two entirely different programs. The original purpose of the EDA program was to provide financial assistance to those few economically distressed areas in the country which were bypassed by the general economic prosperity. These original areas amounted to some 10 to 12 percent of the country, but now the program has evolved to the point where 85 percent of the country has been identified as economically distressed. As a result, EDA funds have been spread so thin that there is no way to expect EDA to solve the problems of today's economy.

Mr. President, as we reflect on the message from the administration and we reflect further on the response from the citizens of this country, they are committed to a sacrifice. That sacrifice means, Mr. President, less programs. The response is due to the increasing inflation in this country and the fiscal irresponsibility of our Federal Government. Why should the Federal Government demand that its citizens maintain fiscal responsibility when the Government itself expends, year after year, many billions of dollars more than it takes in? Yet it dictates to you and me, Mr. President, that we must balance our checkbook or pay our credit card bills or we shall lose these conventional privileges associated with fiscal responsibility.

I say to the Chair that the citizens of this country, and certainly, the constituents in my State, recognize the concepts and the worthwhile efforts of the EDA program as conceived. But it has broadened to the point where it is a matter of priorities in determining what programs we can afford and what we cannot.

It is my opinion, Mr. President, that the EDA program has grown so tremendously over the years that it has gotten beyond its original structure. As a consequence, its priority merits are being debated here today.

The question is, Mr. President, who will pick up this void? I suggest, for the Senate's consideration that the tax package as proposed by the Reagan administration can go a long way in replacing some of the programs that we have seen picked up by EDA. I refer specifically to the suggestion of a new tax package that recognizes a change in the depreciation schedule, which will allow American plants to enjoy the same set of circumstances that foreign plants now enjoy with regard to a depreciation schedule.

American plants are under depreciation schedules of up to 30 years. It is no wonder that we are no longer competitive in the world marketplace, when we are competing against Japanese and

German plants that enjoy a 7½- to 10-year depreciation schedule.

Mr. President, I remind my opponents with regard to this amendment that the Federal Government has not lost its responsibility to the State governments. What we are looking today is to make a determination whether this is truly a priority item within the budget. It is my opinion that the private sector, particularly through change in the depreciation schedules, can go a long way to assist the basic premise of the economic development program, which is to stimulate employment throughout our country.

I say, Mr. President, that the program deserves a chance. I think that this is a reasonable approach. I certainly recognize that it is a departure from the program that we have seen in this country for many, many years, but the time, Mr. President, for sacrifice is here. It is evident in the constituency of the American people, who are responding by saying, "We are willing to give up these programs in favor of a balanced budget."

Mr. President, I thank the Senator from Iowa. I yield back my time.

Mr. WEICKER. Mr. President, I rise as a cosponsor of the amendment of the Senator from Maine (Mr. MITCHELL). The resolution before the Senate would effectively deny the Economic Development Administration funding for the last two quarters of fiscal year 1981 by eliminating $342 million, and allow for no more than $50 million in fiscal year 1982, in order to eliminate EDA as soon as possible.

This amendment would decrease the reconciliation instruction to require the rescission of $171 million less than recommended by the Budget Committee, and would restore budget authority of $224 million in fiscal year 1982 and $255 million in fiscal year 1983. This amendment runs counter to the administration's proposed elimination of EDA but I firmly believe that the administration's position is dead wrong on this issue.

The central thesis underlying the administration's attitude toward the Economic Development Administration can be found on pages 4 through 10 of the February 18 document entitled "Program for Economic Recovery." I quote a sample paragraph:

> Economic expansion and job creation in distressed areas will be stimulated through general tax, fiscal, and regulatory measures and more flexible community development support assistance.

This is, of course, the classic "rising tide lifts all boats" argument.

Economists can debate forever the macro effects of this supply-side policy—whether inflation will come down and capital investment go up. I do not wish to get into that today.

I do question the micro effects. If you eliminate EDA, UDAG, CDBG, et cetera—the so-called targeted economic development assistance programs—what will the economically distressed areas of our country do? They will be thrown into an enormous vacuum, at least until the rising tide lifts the remaining boats.

President Kennedy favored across-the-board supply-side tax cuts. But he also favored the Area Redevelopment Administration—EDA's forerunner—because he knew macropolicy was not enough.

This administration would pull the plug completely on one of the best of the targeted programs and leave many regions of the United States waiting for the macro effects to trickle down. This is wrong headed.

Let us take a look at the arguments put forth by the administration supporting the elimination of EDA.

First, EDA does not create many new jobs; but transfers jobs from other sectors of the economy;

Second, EDA support is a substitution for private investment;

Third, the cost per job saved or created is between $50,000 to $60,000; and

Fourth, since over 80 percent of the Nation's population lives in "distressed" areas eligible for EDA assistance, the assistance is spread too thin to be effective.

A recent CBO analysis conducted for the Appropriations Subcommittee on State, Justice, and Commerce, of which I am chairman, provides some interesting facts with regard to some of the criticisms raised. This appraisal looked at periods of assistance provided by EDA from 1976 to 1979 and found:

First. The private sector would not have provided the same level of investment which we leveraged with EDA. According to CBO; 8 percent of EDA's loan guarantee projects would have gone unfunded; 84 percent of the business development loan programs would not have been created; and 55 percent of the public works projects would not have been undertaken by the private sector alone.

Second. With regard to costs per job created, CBO tells us that a more accurate measure is: $3,600 to $7,000 per job for the business loan development program; and $10,000 to $12,000 per job for the public works program.

Third. Finally, CBO says that although the areas represented by 78 percent of the Nation's population qualify for EDA assistance, only 25 percent of the counties eligible were actually served and that firms receiving loan guarantee assistance represented only 1.7 percent of all qualifying areas.

The results of this analysis are significant because they discredit the broad criticisms leveled against EDA by administration officials over the past few weeks. EDA is certainly not without fault. I for one have been the strongest critic of the steel loan program, a program which has produced such stellar performances as the $60 million loan default by Wisconsin Steel. Yet, here we have a financial delivery system which has worked pretty well.

EDA claims that in fiscal year 1980, an investment of $507 million by EDA will have saved or created 75,000 to 90,000 jobs and leveraged an additional $2.5 billion in private investment—a 500-percent return, if you will.

This is a program which works and is working, hand in glove with the private sector.

I urge my colleagues to support the Mitchell amendment.

Mr. SARBANES. Mr. President, I commend the Senator from Maine for offering this amendment and for his very effective presentation on its behalf. The Economic Development Administration has been a tremendous stimulant to the economic development of both the urban and rural areas of Maryland, particularly those that have experienced difficulties in terms of businesses leaving the area or where incentives for commercial and economic development were lacking. Many of the urban and rural communities which have benefited from EDA programs have not been able to overcome economic distress even in times of general national prosperity and an expanding economy.

In Maryland there are several areas which clearly demonstrate this unfortunate phenomena and which have benefited from EDA programs. Baltimore City is one clear example of an older American city which has seen decreasing economic opportunities as business and industry have left, with resulting rising unemployment and concentration of large numbers of low-income citizens. These conditions came into being over a fairly long period of time and, in part, because of Federal policies which favored new business development outside of cities through tax benefits, housing industry benefits, and the interstate highway system.

Despite the long period of decline, Baltimore has, in recent years, made substantial efforts to halt and reverse that trend. Its industrial infrastructure has been improved through $11 million in EDA funds to improve streets, sewers, and other infrastructure. These funds were matched by $8 million in local funds—a substantial and important local contribution—for use in areas containing nearly 30,000 jobs. These areas have been stabilized and jobs retained thus stimulating $600 million in private industrial investment.

In the development of new industrial parks, Baltimore projects that are completed or underway are producing or saving 10,000 permanent jobs, generating $140 million in private investment and over $4 million in annual property taxes.

One example of the tremendous importance of EDA programs is the Fort Holabird Industrial Park in Baltimore. A one-time Army base, this tract of land was acquired by the city after a long process and, with the use of EDA funds, turned into an industrial park. The availability of the industrial park with its improved utilities served as a critically important incentive for the General Motors Corp. to stay in Baltimore City and to expand and modernize its assembly plant, thus preserving 4,000 jobs. The EDA funds, coupled with an urban development action grant, enabled GM to agree to purchase 26 acres of the Fort Holabird property with an option to buy 24 more and to upgrade and expand their present plant at a cost of up to $500 million with 1,000 additional jobs to be created in an area of high unemployment.

Mr. President, it is clear that the EDA program has helped Baltimore to deal with its severe economic problems and to

embark on a revitalization of its economy.

Mr. President, the rural areas of Maryland, too, have benefited from the Economic Development Administration. Changes in the nature of the agriculture and seafood industries and lack of large commercial or industrial enterprises have limited job opportunities and economic growth, particularly on the Eastern Shore.

However, several communities have endeavored to establish small industrial parks and to seek energetically firms to utilize them. EDA funds in Pocomoke City in Worcester County were recently awarded for use in installation of sewer lines and construction of streets to carry out a project consistent with the long-range planning program of the Delmarva Economic Development District, a multi-county organization working to create jobs through the use of local resources. It is projected that 245 jobs will be generated through this activity.

In Cambridge, Md. in Dorchester County, the recent closing of a large fish packing plant caused a major increase in unemployment. Dorchester County responded by utilizing over $800,000 in EDA funds to construct an access road, a rail spur and water and sewer facilities for the Woods Road Industrial Park. The project will also serve Airpax, an electronics firm planning to expand and create an additional 300 jobs. This project is also consistent with the program developed by the Delmarva Economic Development District.

In western Maryland, the Mexico Farms Industrial Park near Cumberland will be served by a rail spur made possible by EDA funding. The spur will be an inducement for industry to locate in an area which has been affected by high chronic unemployment. The industrial park is on its way to being the most important part of an overall economic development plan prepared by Allegany County.

Mr. SASSER. Mr. President, I rise to support the amendment of the Senator from Maine (Mr. MITCHELL) that would add a modest amount of funding for the programs of job development which have affected every part of this country.

Mr. President, the Reagan administration has proposed virtual termination of the Economic Development Administration in 1981. And while I have supported, in many cases, the Reagan administration recommendations for cutting the budget, I think that this is one program reduction that is ill-advised.

My State has come to depend on the many projects funded by the Economic Development Administration so that they can move forward with well-planned efforts to spread economic development throughout the State, especially in our smaller and less developed rural communities.

Mr. President, it is not uncommon for the economic payoff of the EDA projects in my State to be on the order of 7 to 1—$7 of private investment for every dollar of funding from the Economic Development Administration. And I have been beseeched by county and development district officials not to cut off funds for projects that are now awaiting 1981 funding for completion.

Why in the Upper Cumberland Development District, we have eight projects on the board that are awaiting EDA funding for multi-purpose industrial parks. Here, Mr. President, I shall ask unanimous consent that the list of these projects appear at the end of my prepared statement. These projects would help provide jobs for 3,120 individuals and without EDA funding, I doubt that these jobs may remain located in Tennessee. And I am vitally concerned over this fact since our State lost more than 50,000 jobs last year and urgently needs the well-focused development programs of the Economic Development Administration.

In the final analysis, EDA job development programs are ones that will help sustain and expand employment in many of the areas of my State that are struggling to expand their tax base and thereby provide gainful employment for their residents.

EDA has been a positive force in creating jobs throughout the country. The local officials administering EDA programs are willing to see cuts made in their programs, but they object to the termination of all programs in 1981 and 1982. So let us be fair, let us make sensible funding reductions in the program, but let us not turn our backs on projects that are almost completed in 1981. Rather, let us adopt this amendment which provides for an orderly and phased reduction in the funding of EDA programs.

The material follows:

UPPER CUMBERLAND DEVELOPMENT DISTRICT
CURRENT EMPLOYMENT IN ARC/EDA ASSISTED INDUSTRIAL PARKS

February 26, 1981

County/city, EDA/ARC funding, industries, and number employees:

Clay/Hermitage Springs, ARC–125,000, Oshkosh B'Gosh Tennessee Mills, 140.

Cumberland/Crossville, EDA–786,000, ARC–75,000, Elixir, Mountain Comfort, B&L Laboratories, Heritage Door and Trim, Energy Dynamics, 140.

DeKalb/Smithville, EDA–571,000, ARC–450,000, Nuturn, Regal Craft Kitchens, Denny Lamp Company, 240.

Jackson/Gainesboro, EDA–300,000, ARC–46,000, 40,000, Georgia Boot Company, Gainesboro Industries, Twin Rivers Furniture, Aeroquip, 510.

Macon/Lafayette, EDA–542,000, Carter Automotive, Arden Industries, 270.

Overton/Livingston, EDA–145,000, Berkline, Overton Apparel, Stylecraft, Livingston Manufacturing, Livingston Paper Board, Averitt Express, Loftis Tool & Die, L&S Tool & Die, Design Intent, Overton Co. Highway Dept., 920.

Putnam/Cookeville, EDA–1,074,000, Tutco, Porelon, Upper Cumberland Dev. Dist., National Guard Armory, 340.

White/Sparta,* EDA–1,500,000, ARC–420,000, 560.

Total funding, 6,074,000.

Total employees, 3,120.

*The City of Sparta was designated as an areawide industrial park by EDA in 1976 and received ARC and EDA grant monies to expand water and sewer services throughout the City to serve four potential industrial sites. The total annual average manufacturing employment for FY 80 in Sparta/White County was 3,590 as compared with an annual average in 1976 of 3,030.

The 1980 annual payroll for the above listed industries totaled $24,000,000.

The PRESIDING OFFICER. All time having expired, the question is on agreeing to the amendment by the Senator from Maine. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. DECONCINI (after having voted in the negative). On this vote I have a pair with the distinguished Senator from New York (Mr. MOYNIHAN). If he were present and voting, he would vote "yea." If I were permitted to vote, I would vote "nay." I therefore withdraw my vote.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. METZENBAUM), the Senator from New York (Mr. MOYNIHAN), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

The PRESIDING OFFICER (Mr. ABDNOR). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 37, nays 59, as follows:

[Rollcall Vote No. 57 Leg.]

YEAS—37

Baucus	Glenn	Mitchell
Biden	Hart	Pell
Bradley	Heinz	Pryor
Bumpers	Hollings	Randolph
Burdick	Huddleston	Riegle
Byrd, Robert C.	Inouye	Sarbanes
Cannon	Jackson	Sasser
Cohen	Kennedy	Specter
Cranston	Leahy	Stennis
Dixon	Levin	Tsongas
Dodd	Long	Weicker
Eagleton	Mathias	
Ford	Matsunaga	

NAYS—59

Abdnor	Garn	Murkowski
Andrews	Goldwater	Nickles
Armstrong	Gorton	Nunn
Baker	Grassley	Packwood
Bentsen	Hatch	Percy
Boren	Hatfield	Pressler
Boschwitz	Hawkins	Proxmire
Byrd, Harry F., Jr.	Hayakawa	Quayle
	Heflin	Roth
Chafee	Helms	Rudman
Chiles	Humphrey	Schmitt
Cochran	Jepsen	Simpson
D'Amato	Johnston	Stafford
Danforth	Kassebaum	Stevens
Denton	Kasten	Symms
Dole	Laxalt	Thurmond
Domenici	Lugar	Tower
Durenberger	Mattingly	Wallop
East	McClure	Warner
Exon	Melcher	Zorinsky

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

DeConcini, against.

NOT VOTING—3

Metzenbaum	Moynihan	Williams

So Mr. MITCHELL'S amendment (UP No. 35) was rejected.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. HOLLINGS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 20

(Purpose: To restore funds for programs under the jurisdiction of the Senate Committee on Small Business)

Mr. WEICKER. Mr. President, I call up my amendment No. 20 and ask that it be read.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Connecticut (Mr. WEICKER) proposes an amendment numbered 20.

Mr. WEICKER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 10, beginning with "$97,000,000" in line 17, strike out through "$541,000,000" in line 21 and insert "$2,000,000 in budget authority and $28,000,000 in outlays for fiscal year 1981; $371,000,000 in budget authority and $247,000,000 in outlays for fiscal year 1982; and $487,000,000 in budget authority and $459,00,000".

Mr. WEICKER. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WEICKER. Mr. President, this amendment would bring the overall reductions in the Small Business Administration's programs back in line with those proposed by the President. It would restore funding for programs under the jurisdiction of the Senate Committee on Small Business. In fiscal year 1982 this amendment would reduce savings in budget authority by $155 million below those endorsed by the Budget Committee.

It is important to note that the President's proposal, which I am offering, reflects a one-third reduction in SBA programs from current policy. Thus, with the adoption of this amendment, SBA will still be taking more than its fair share of the overall budget cuts.

However, the Budget Committee instruction would force the Small Business Committee to slash the agency's programs by 45 percent from current policy. I am concerned about the impact that such sweeping reductions would have on the most endangered of the small business community in our country.

I want to stress that this instruction assumes the elimination of the direct lending programs which have been the major function of the SBA.

And, Mr. President, what would be the effect of such a wholesale reduction? If approved it would basically and fundamentally alter the structure and mission of the Small Business Administration without the benefit of thorough review and thoughtful judgments concerning the merits and worthiness of the programs which would be eliminated.

If the Budget Committee instruction prevails in its current form, the Small Business Committee will have no choice as to where it must cut. For it is only through the elimination of direct loans that savings of the magnitude endorsed by the Budget Committee can be achieved. In essence, Budget Committee assumptions would be binding on our committee and on SBA.

As chairman of the Committee on Small Business, I have pledged publicly to pursue vigorous oversight of the SBA during this session of Congress. I welcome this opportunity which is the duty and responsibility of the Committee on Small Business to perform.

However, if the instruction as contained in this resolution is agreed to, the oversight process, the considered judgments necessary to improve the programs and performance of the SBA, will be vitiated. Decisions which should be reached over a period of time will be made without evaluating their impact.

Mr. President, let me point out some of the effects of the Budget Committee's action in adopting this instruction and some of the questions this action raises.

First, the recommendation eliminates all direct lending programs of the agency.

Did the Budget Committee consider the impact of this elimination of the program's constituency? As a lender of last resort, SBA lends to the least credit worthy borrowers. These borrowers are not able to receive a bank loan even with a Government guarantee.

Therefore, the Budget Committee has made the determination that SBA will no longer serve as a lender of last resort for the small business community. And, at the worst possible time for small business, we will impose the "jungle psychology" of "survival of the fittest" from thousands of small businesses.

There are various loan programs designed to serve specific constituencies within the overall direct lending program of SBA.

The handicapped assistance loan program which provides funding for handicapped individuals who own or desire to own their own business would be eliminated.

The energy loan program which provides much needed capital, otherwise unavailable, to small firms which are developing new energy technologies would be eliminated.

The Minority Enterprise Small Business Investment Co. (MESBIC) program would be eliminated.

MESBIC's are venture capital firms which provide both debt and equity funding to small firms operated by socially and economically disadvantaged persons.

Capital commitments from the private sector to MESBIC's total over $100 million with this amount being leveraged through SBA purchase of preferred stock. The 129 MESBIC's currently in existence would lose their source of Government funding under the Budget Committee's recommendation and may as a result lose the ability to attract private investments. Many MESBIC's would have to cease operating if the direct lending programs of SBA are abolished.

The direct funds for the development company loan program which provides funding for the revitalization of small businesses, especially in urban areas would be eliminated.

These programs all serve legitimate purposes, and I reiterate, Mr. President, that if the instruction as reported by the Committee on the Budget stands, the Committee on Small Business will have no choice but to eliminate them.

In addition to the Budget Committee's elimination of direct lending programs, other SBA programs have been subjected to reductions.

The Budget Committee proposes elimination of the nonphysical disaster lending program and increases in the interest rates on disaster loans.

I am sure the distinguished chairman and ranking member of the Budget Committee recall past debate in this Chamber on numerous occasions concerning interest rates on disaster loans. This very issue held up passage of an authorization bill for the SBA for a year and a half. Finally, in July 1980, agreement on the rates and terms for disaster loans was reached in Public Law 96-302.

While I have supported the position taken by the Budget Committee on this issue in the past, as both of the floor managers of this bill will recall, I was also bound to support the position of the Senate in conference and this position is reflected in the rates included in Public Law 96-302.

This is an issue which deserves the attention of the Authorization Committee. If my amendment is agreed to, there will be sufficient latitude within the total reductions to address ths difficult issue. If the instruction as now included in the resolution is adopted, the Small Business Committee will have little choice, but to endorse the Budget Committee's disaster interest rate assumptions.

The Budget Committee recomemndation also assumes a $41 million reduction in salaries and expenses. This assumption includes elimination of the small business development center program which has proven to be a viable medium for the delivery of management assistance for small business.

In addition, the Budget Committee would cut salaries and expenses by an additional 10 percent to reflect lower administrative costs associated with the elimination of direct loans.

Close to 60 percent of salaries and expenses asssociated with SBA's lending programs are to manage the Agency's current portfolio of loans. A 10-percent reduction in total agency salaries and expenses would cut significantly into SBA's ability to manage the current portfolio.

Both the Carter and Reagan administrations in their budget submissions have recognized the need to increase resources available to manage the loan portfolio. Such a deep reduction, as proposed by the Budget Committee, would only exacerbate an already bad situation. Without adequate tracking of the current portfolio, losses to the Government through defaults would increase considerably.

I assure my colleagues that nowhere near 10 percent of the agency's salaries and expenses can be associated with direct lending. Yet, this is the reduction proposed by the Budget Committee in its instruction. Again, I must say that because of the vast amount of cuts proposed in totality by the Budget Committee for SBA, the Committee on Small Business will have no choice but to comply with the assumptions used to build the reduction amounts included in this resolution.

Under my amendment which reflects reductions proposed by the President, there would still be a significant cut in direct lending. However, the Committee on Small Business will be able to recommend those areas where continued funding is necessary. The restoration of funds will insure that SBA can still act as a lender of last resort in aiding those businesses which are unable to obtain credit from other sources.

At a time when both the availability and the cost of credit is the primary concern of small businesses it seems counterproductive to eliminate entirely the one Government program which is designed to ease that problem.

Therefore, I propose this amendment to preserve the ability of the Committee on Small Business to determine the future course of programs under its jurisdiction. Let me add that I am sympathetic with the need to reduce spending and believe that the Small Business Administration must take its share of cuts. Therefore, my amendment would reflect budget savings as proposed by the President.

When the Budget Committee considered this instruction to the Committee on Small Business, a proposal to endorse the President's reduction lost by only one vote. Therefore, I believe that the amendment which I am currently offering is in line with the thinking of many members of that committee, and in line with the desire of many Members on my side of the aisle to see the President's package remain intact.

Mr. President, I do not believe that the Budget Committee ever intended to tie the hands of the Small Business Committee in approving its reduction level. In fact, the Budget Committee report accompanying Senate Concurrent Resolution 9 states:

> Under the Budget Act, each committee that receives a reconciliation instruction is free to make its required savings in any manner it sees fit.

This point was reiterated by the distinguished chairman of the Budget Committee in his statement as the Senate began consideration on this resolution on Thursday. The facts show that in the case of the Committee on Small Business we are not free to choose the manner in which the required savings will be achieved. I hope that the managers now are cognizant of this fact which I am sure was an unintended result of their action in the Budget Committee. I believe the amendment I am offering corrects this unintended result while still requiring a significant reduction in SBA programs. Mr. President, I urge my colleagues to accept this amendment.

I reserve the remainder of my time.

Mr. KENNEDY. Mr. President, I rise in support of Senator WEICKER'S amendment to fund small business programs at the level proposed by President Reagan.

First I would like to say a brief word about the distinguished Senator from Connecticut.

As the new chairman of the Senate Small Business Committee, my colleague from New England has already established himself as a strong voice in the U.S. Senate on behalf of small business concerns.

In the area of tax incentives for small business, as well as many others, he is working to insure that the small business sector of our economy is given the proper opportunity to contribute to our economic recovery.

My colleague's amendment restores cuts in vital SBA programs proposed by the Budget Committee.

In the reconciliation resolution, all direct lending programs for small businesses are completely eliminated. These cuts include loans to local development companies, loans to the handicapped, and financial assistance to minority enterprise small business investment companies.

These are important programs. They assist thousands of small businesses in this country by providing access to capital that otherwise would be unavailable. In so doing, they assist in the creation of thousands of new jobs and result in added revenue for the Government.

These are not experimental programs; they are programs with proven results. In Boston for instance, the Boston local development corporation has created nearly $4 million in new investment. For Boston, this has meant 309 new jobs and the retention of 428 others.

This is just one example of the contributions small business programs make to our economy. They create jobs, they enhance competition, and they assist in improving local economic conditions.

In light of these results, it is absolutely clear that now is the worst possible time to reduce SBA lending programs.

I may disagree with my colleagues on some things. But there is one issue on which there is complete agreement in this body. We must work to bring inflation, unemployment and high interest rates down, and we must encourage investment and productivity by the business sector.

In this effort we must secure the full participation of the small businesses of this Nation. Their past record in promoting innovation, providing employment, and enhancing competition demonstrates the important contribution these firms can make in restoring our economic prosperity. It is our obligation in the Senate, to make sure that these firms participate fully in our economic recovery effort.

Surely this cannot be accomplished by eliminating vital small business lending programs. Instead we must be sure to provide the resources necessary to insure small business a proper role in our efforts to restore prosperity to the economy.

I believe the Weicker amendment will assure this role, and I urge my colleagues to support it.

Mrs. KASSEBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mrs. KASSEBAUM. Mr. President, I say to the Senator from Connecticut that I believe there has been an agreement that his amendment will be the first order of business on tomorrow.

Mr. WEICKER. I thank the distinguished lovely Senator from Kansas.

Mrs. KASSEBAUM. When the Chamber will be filled and we can far better engage in debate.

Mr. WEICKER. I am not so sure that if the Chamber is filled that that necessarily guarantees the quality of debate.

Mr. FORD. It enhances it some.

ROUTINE MORNING BUSINESS

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to exceed 30 minutes and that Senators may be permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRESIDENTIAL ASSASSINATION ATTEMPT IS A NATIONAL TRAGEDY

Mr. SASSER. Mr. President, the news from George Washington University Hospital today is indeed gratifying. President Reagan continues to do well, and we all wish him a speedy recovery. Our prayers have been with him and his family constantly during this tragic time.

The President's behavior during this time has been remarkable. His strength, stamina, and good humor have won the admiration of people across the Nation and throughout the world. He demonstrated amazing calm under the most trying circumstances.

President Reagan is in excellent physical condition, and I expect him to bounce back very quickly. I see no reason why he should not resume his full duties in very short order. In the interim, it is reassuring that Vice President BUSH, Secretary of State Haig, and others have stepped in to insure the orderly administration of the executive branch of Government.

While President Reagan no longer appears to be in any danger, I am saddened that his press secretary, Mr. James Brady, still remains in critical condition. We should also take a moment to think of Secret Service Agent Timothy McCarthy and District of Columbia Police Officer Thomas Delahanty, who were also wounded in the senseless and vicious shooting.

The shooting yesterday afternoon was a grim reminder of the violence which permeates so much of society. It was only the latest in a series of violent attacks on our elected leaders in the last two decades. The assassinations of John Kennedy and Robert Kennedy, the two attacks on President Ford, are vivid and lasting memories.

These random acts of violence have no explanation or rationality. They appear to have been the work of deranged and unbalanced individuals.

Now, as we reflect on the events of the last 24 hours, we must make a commitment to double our efforts to seek to rid society of violence and the causes of violence. We must make sure that we are doing everything necessary to protect our elected leaders.

I was deeply saddened by the events of yesterday afternoon, but I am heartened by the courage and tenacity of President Reagan. I am sure all of my colleagues join me in wishing well and paying him the greatest respect.

ATTEMPTED ASSASSINATION OF PRESIDENT RONALD REAGAN

Mr. MATHIAS. Mr. President, violence has again stalked a President of the United States. I am appalled by the attempted assassination of President Reagan. Mrs. Mathias' prayers and mine, like

those of all Americans, are with the President and with the other victims of this irrational attack—James Brady, the President's associate; Tim McCarthy, of the Secret Service, and especially with Thomas Delahanty, a Metropolitan Policeman and a fellow Marylander.

One President killed would be too many, but the number of American Presidents killed or threatened by armed gunmen is a national tragedy and a national disgrace.

As the Nation keeps its painful vigil, let us resolve to act together to reduce the level of violence in our society. We may never be able to control irrational elements in society or to anticipate the acts of a madman, but we can control the use of weapons which gives ultimate expression to madness. We can and we must.

SENATOR SASSER ACCEPTS INTERGOVERNMENTAL ADVISORY COMMISSION APPOINTMENT

● Mr. SASSER. Mr. President, recently, I accepted the appointment, made by Vice President GEORGE BUSH, to my second 2-year term as a member of the Advisory Commission on Intergovernmental Relations (ACIR).

For mayors and Governors and legislators and council members throughout the country, the work of this Advisory Commission seems very important, indeed. Stated simply, the Commission considers issues of "'Federalism," or how power and resources are divided up among the levels of government.

One of their recommendations, made several years ago, was that the system of Federal grants needed streamlining. The Commission suggested that there is a great need to reduce the paperwork and overhead costs imposed on State and local governments by the grant system.

In my view, the work of the Commission in "sorting out" the complex intergovernmental grant system has great merit. That is why I am the sponsor of several pieces of legislation based on Commission recommendations.

During the last Congress, I was pleased when my bill to extend the Joint Funding Simplification Act, which allows the "packaging" of grant programs, was passed and signed into law.

This year, I have introduced the Federal Assistance Reform Act (S. 45), to improve the overall management of the Federal grant system, and the State and Local Fiscal Note Act (S. 43), to reduce the instances of unanticipated cost burdens imposed on State and local governments by Federal programs. I am hopeful of early passage of both pieces of legislation.

I am proud that several prominent Tennesseans have, at various times, been members of the ACIR. Both Vanderbilt Chancellor Alexander Heard and Montgomery County Judge William O. Beach have served on the Commission. So did the late Nashville Mayor Beverly Briley and the late Gov. Buford Ellington.

I believe that the extensive research done by the Advisory Commission on Intergovernmental Relations leads the way toward gains in instituting reforms in the Federal system. That is why I am pleased with my reappointment to the Commission. I look forward to continuing to work with ACIR, both as a member of the Commission and as a Member of Congress, in the effort to improve intergovernmental relations.●

THE DEATH OF RETIRED NAVY ADMIRAL JOHN S. McCAIN, JR.

Mr. THURMOND. Mr. President, I was deeply saddened to learn of the death of retired Navy Admiral John S. McCain, Jr., on March 22. He was a fine, patriotic, public-spirited military officer who made outstanding contributions toward implementing U.S. defense policies in the Vietnam and Pacific Ocean area during the late 1960's and early 1970's. His knowledge of the aggressive nature of communism was extensive, and he was a strong advocate of an upgraded Navy to counter the mounting naval power of the Soviet Union.

A recent article by staff writer Martin Weil in the March 24, 1981, Washington Post provides some excellent background on John McCain and his career.

Mr. President, in order to share excerpts of this article with my colleagues, I ask unanimous consent that this article be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ADM. JOHN S. MCCAIN, JR., DIES; LEADER IN VIETNAM WAR

(By Martin Weil)

Retired Navy Admiral John S. McCain Jr., 70, a bluntly outspoken foe of communist aggression who served as commander-in-chief of U.S. forces in the Pacific at the peak of the Vietnam war, died Sunday of a heart attack he suffered while returning from a vacation trip in Europe.

Admiral McCain, retired since 1972, was the Navy's first full admiral who was the son of another full admiral. His father commanded a carrier task force in the Pacific during World War II. One of Admiral McCain's own sons, Capt. John S. McCain III, was a prisoner of war in Indochina for five years after being shot down while a Navy pilot.

A dedicated apostle of the importance of seapower to the national interest, Admiral McCain was a decorated World War II submarine commander. He headed U.S. forces in the Dominican Republic during the 1965 crisis there. From 1968 to 1972, he held the Pacific post, which included Vietnam.

"The communists have chosen to make Vietnam the testing ground for their so-called wars of national liberation," he once said. "If they can make this kind of aggression work there, we can expect to be faced with more such wars elsewhere. We are there to prove to them that it won't work."

Admiral McCain was born in Council Bluffs, Iowa, and grew up at various naval stations where his father was posted. He was in Washington during his high school years and graduated from the old Central High School before entering the U.S. Naval Academy at Annapolis in the class of 1931. His reported rebelliousness as a midshipman was said to have earned him huge doses of punitive extra duty.

Of his later return to the Naval Academy to teach electrical engineering, he said, "The lads learned soon enough never to try to hoodwink an old hoodwinker."

In a 1970 speech he told the academy's graduating class not to worry about those urging "make love, not war." The graduates, he said, belonged to a fraternity "whose members are men enough to do both."

As commander of three different submarines during World War II, he sank 20,000 tons of Japanese shipping and once spent 72 hours on the ocean bottom, riding out a depth charge attack. "It gives you a new outlook on life," he said of the experience. His military decorations from that period included the Silver Star and Bronze Star medals.

After the war, the lithe, slightly built admiral, who jumped rope 200 times a day to help keep fit, held a variety of posts, including second in command of the heavy cruiser *St. Paul* during the Korean conflict, chief of Navy congressional liaison, chief of information for the Navy, commander of the Atlantic amphibious training command, commander of Atlantic amphibious forces, and before going to the Pacific, Naval commander in Europe.

In addition to the Silver and Bronze Stars, Admiral McCain's decorations included two Distinguished Service Medals and three Legion of Merit medals.

He was a 33rd degree Mason and a member of the Cosmos, Army & Navy and Chevy Chase country clubs.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–822. A communication from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Consolidated Farm and Rural Development Act and the Small Business Act; by unanimous consent, referred jointly to the Committee on Agriculture, Nutrition, and Forestry, and the Committee on Small Business.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MATHIAS, from the Committee on Rules and Administration:

Special report entitled "Legislative Review During the 96th Congress by the Senate Committee on Rules and Administration" (Rept. No. 97–30).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

Special report entitled "Report on the Activities of the Committee on Commrce, Science, and Transportation" (Rept. No. 97–31).

Mr. PACKWOOD. Mr. President, paragraph 8(b) of Senate rule XXVI requires each standing committee of the Senate to submit not later than March 31 of each odd-numbered year a report to the Senate on the activities of that committee during the previous Congress.

The report I am herewith submitting presents a summary of the activities of the Senate Committee on Commerce, Science, and Transportation during the 96th Congress and fulfills the reporting requirement of Senate rule XXVI referenced above.

By Mr. HATCH, from the Committee on Labor and Human Resources:

Special report entitled "Legislative Review Activity," Committee on Labor and Human Resources (Rept. No. 97–32).

By Mr. SIMPSON, from the Committee on Veterans' Affairs:

Special report entitled "Legislative and Oversight Activities During the 96th Congress by the Senate Committee on Veterans' Affairs" (Rept. No. 97-33).

By Mr. TOWER, from the Committee on Armed Services:

Special report entitled "Report on the Activities of the Committee on Armed Services, United States Senate, 96th Congress, First and Second Sessions" (Rept. No. 97-34).

Mr. TOWER. Mr. President, in accordance with the requirements of section 136(b) of the Legislative Reorganization Act of 1946, as amended, submitted herewith is the report of the activities of the Committee on Armed Services during the 96th Congress.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

Emanuel S. Savas, of New Jersey, to be an Assistant Secretary of Housing and Urban Development;

Philip D. Winn, of Colorado, to be an Assistant Secretary of Housing and Urban Development; and

Arthur E. Teele, Jr., of Florida, to be Urban Mass Transportation Administrator.

By Mr. THURMOND, from the Committee on the Judiciary:

Carol E. Dinkins, of Texas, to be an Assistant Attorney General;

D. Lowell Jensen, of California, to be an Assistant Attorney General; and

Theodore B. Olsen, of California, to be an Assistant Attorney General.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. GRASSLEY:

S. 830. A bill to amend part A of title IV of the Social Security Act to make it clear that any State may impose work requirements as a condition of eligibility for aid to families with dependent children; to the Committee on Finance.

By Mr. PACKWOOD (by request):

S. 831. A bill to authorize the appropriations for the Coast Guard for fiscal year 1982, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. CRANSTON (for himself, Mr. MATSUNAGA, and Mr. DECONCINI):

S. 832. A bill to amend section 51(d) of the Internal Revenue Act of 1954 to make technical modifications in the definition of an economically disadvantaged Vietnam-era veteran and to remove the age criterion applicable to such definition; to the Committee on Finance.

By Mr. FORD:

S. 833. A bill to amend the Consumer Product Safety Act to authorize appropriations for fiscal year 1981, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. THURMOND (for himself and Mr. HART) (by request):

S. 834. A bill to authorize certain construction at military installations for fiscal year 1982, and for other purposes; to the Committee on Armed Services.

By Mr. STEVENS:

S. 835. A bill for the relief of Jerry L. Crow; to the Committee on Energy and Natural Resources.

By Mr. RIEGLE:

S. 836. A bill for the relief of Staff Sergeant Anne M. Fisher; to the Committee on the Judiciary.

S. 837. A bill for the relief of Antonio Lacson Devera; to the Committee on the Judiciary.

By Mr. ROTH (by request):

S. 838. A bill to amend title 5, United States Code, to strengthen the principle of comparability as the basis for setting Federal pay and benefits, and for other purposes; to the Committee on Governmental Affairs.

By Mr. DOLE (for himself and Mr. DANFORTH):

S. 839. A bill to amend the Bankruptcy Act regarding farm produce storage facilities, and for other purposes; to the Committee on the Judiciary.

By Mrs. KASSEBAUM (for Mr. THURMOND):

S. 840. A bill to continue in effect any authority provided under the Department of Justice Appropriation Authorization Act, fiscal year 1980, for a certain period. Considered and passed.

By Mr. STAFFORD (for himself, Mr. SYMMS, Mr. PACKWOOD, and Mr. DOLE) (by request):

S. 841. A bill to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, to amend the Highway Safety Act of 1966 to authorize appropriations, and for other purposes; to the Committee on Commerce, Science, and Transportation, the Committee on Environment and Public Works and the Committee on Finance, by unanimous consent referred to the Committee on Environment and Public Works for consideration of title I; to the Committee on Commerce, Science and Transportation for consideration of title II; and to the Committee on Finance for consideration of title III.

By Mr. HAYAKAWA (for himself, Mr. MCCLURE, Mr. HELMS, Mr. HEFLIN, and Mr. SYMMS):

S. 842. A bill to provide for stability and certainty in planning and management of certain National Forest Lands; to the Committee on Agriculture, Nutrition, and Forestry and the Committee on Energy and Natural Resources, jointly, by unanimous consent.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr GRASSLEY:

S. 830. A bill to amend part A of title IV of the Social Security Act to make it clear that any State may impose work requirements as a condition of eligibility for aid to families with dependent children; to the Committee Finance.

STATE IMPOSITION OF WORK REQUIREMENTS AS A CONDITION FOR AID TO FAMILIES WITH DEPENDENT CHILDREN

Mr. GRASSLEY. Mr. President and Members of the Senate, today I am introducing legislation to give States the option of requiring recipients of aid to families with dependent children to perform work in return for their benefits. The only restrictions my bill would place upon the States are: A child under the age of 16 or in school may not be required to perform work; a person who is ill, incapacitated, or of advanced age may not be required to perform work; a person who must remain at home in order to care for an ill or incapacitated member of the household may not be required to perform work; a mother or other relative of a child under the age of 6 who is caring for the child may not be required to perform work unless appropriate day care is provided while the mother or other relative is working.

The principle behind this bill is simple and eminently fair; that is, every able-bodied member of society should be expected to contribute constructively to society in return for his—or her—support at a time of need. This bill is necessary because current law, as interpreted by the Department of Health and Human Services, actually prohibits States from requiring recipients to perform work in return for their benefits. Not only is this law in direct opposition to one of the very basic principles of our society, it also cruelly robs recipients of Federal aid of the opportunity—and it is an opportunity I think the majority of them would like to have—of making a useful contribution to society in return for the helping hand that has been extended to them.

I have made the imposition of a work requirement optional to the States because I believe that, while the Federal Government should certainly not stand in their way, the States should be permitted to make the actual decisions as to whether or not to impose work requirements based upon their best assessments of conditions within their own States. For example, in States with small AFDC caseloads spread out over large geographic areas, it might not be practical, or feasible, to require recipients to perform work.

My bill leaves the States with almost total freedom to devise their own work-fare programs. Of course, there are certain minimal guidelines that they must follow, as I have outlined above. To my colleagues who might have other concerns, I would only point out that nothing in my bill would prevent the States from placing further restrictions upon their work-fare programs, if they so desire or if conditions warrant further restrictions.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 830

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 402 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(f) Nothing in this part or part C, or in any State plan approved under this section, or in any regulation prescribed to implement this part or part C or any such State plan, shall be construed to prevent a State from imposing (on such terms and conditions and in such cases as the State may find to be necessary or appropriate, whether or not such terms, conditions, and cases are consistent with subsection (a)(19) or part C) a requirement that an individual or relative, or any other person (living in the same home) whose needs are taken into account in making the determination under subsec-

tion (a)(7), perform employment as a condition of eligibility for aid to families with dependent children; except that such a condition of eligibility may not be imposed on—

"(1) a child who is under age 16 or attending school full time;

"(2) a person who is ill, incapacitated, or of advanced age;

"(3) a person whose presence in the home is required because of illness or incapacity of another member of the household; or

"(4) a mother or other relative of a child under the age of six who is caring for such child (but this paragraph shall not apply if appropriate day care is provided for such child while the mother or other relative is performing employment).".

Sec. 2. The amendment made by the first section of this Act shall apply with respect to months after the month in which this Act is enacted.

By Mr. PACKWOOD (by request):

S. 831. A bill to authorize the appropriations for the Coast Guard for fiscal year 1982, and for other purposes; to the Committee on Commerce, Science, and Transportation.

COAST GUARD AUTHORIZATION ACT OF 1981

● Mr. PACKWOOD. Mr. President, today I am introducing, by request, the Coast Guard authorization bill for fiscal year 1982. The recommendations for Coast Guard funding contained in this bill will be the subject of comprehensive hearings by the Commerce Committee next week. At that time I intend to examine very closely the administration's funding and program recommendations. My initial reaction to the level of funding recommended is that it is inadequate to enable the Coast Guard to adequately perform the varied and important tasks that they have been assigned. We frequently seem to forget, in addition to its many and expanding maritime regulatory and peacetime lifesaving responsibilities, that the Coast Guard is a branch of the Armed Forces and is a component of the Navy during wartime.

At a time when the United States has recommitted itself to assuring that we have an adequate national defense capability, it makes no sense whatsoever to overlook an important element of that defense establishment. While I agree that we have to tighten our belts in order to achieve a balanced budget, reductions must be examined closely to determine the impacts on specific programs such as search and rescue, fisheries law enforcement, and marine environmental protection.

I am also concerned about the condition and age of many of the Coast Guard vessels being unable or unsafe to operate are becoming more prevalent. We, the Congress, have called upon the Coast Guard over the years to do more and more with less and less. That trend cannot continue.

I trust that with the administration's support we can enhance the ability of the Coast Guard to fulfill its demanding missions rather than preside over its continued deterioration.

Mr. President, I ask unanimous consent that the text of S. 831 and a section-by-section analysis of the bill be inserted at this point in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 831

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Coast Guard Authorization Act of 1982".

TITLE I—AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1982

SEC. 101. Funds are hereby authorized to be appropriated for necessary expenses of the Coast Guard for the fiscal year 1982, as follows:

(1) for the operation and maintenance of the Coast Guard including expenses related to the Capehart housing debt reduction: $1,402,898,000, and such additional sums as may be necessary to meet unforeseen circumstances;

(2) for the acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto: $375,000,000, to remain available until expended;

(3) for the alteration or removal of bridges over navigable waters of the United States, constituting obstructions to navigation: $17,500,000, to remain available until expended; and

(4) for research, development, testing, and evaluation: $29,730,000, to remain available until expended.

SEC. 102. For fiscal year 1982, the Coast Guard is authorized an end-of-year strength for active duty personnel of 39,904: Provided, That the ceiling shall not include members of the Ready Reserve called to active duty under the authority of section 712 of title 14, United States Code.

SEC. 103. For fiscal year 1982, average military training student loads for the Coast Guard are authorized as follows:

(1) Recruit and special training: 3,660 student-years;

(2) Flight training: 118 student-years;

(3) Professional training in military and civilian institutions: 655 student-years; and

(4) Officer acquisition: 1,038 student-years.

TITLE II—COAST GUARD MANAGEMENT

SEC. 201. Subsection (a) of section 1 of the Act of March 4, 1915, c. 143, 38 Stat. 1084, as amended, (31 U.S.C. 686(a)) is amended by inserting "the United States Coast Guard," in the first proviso immediately after "Federal Aviation Agency,".

SEC. 202. (a) Subsection (a) of section 41a of title 14, United States Code, is amended to read as follows:

"(a) The Secretary shall maintain a single active duty promotion list of officers of the Coast Guard on active duty in the grades of ensign and above. Reserve officers on active duty other than pursuant to an active duty agreement executed under 679 of title 10, United States Code, retired officers, and officers of the permanent commissioned teaching staff of the Coast Guard Academy shall not be included on the active duty promotion list.".

(b) Subsection (d) of section 41a of title 14, United States Code, is amended by striking "extended".

SEC. 203. Title 14, United States Code, is amended as follows:

(1) By amending subsection 41a(b) by inserting the following immediately before the period at the end of the second sentence: ", except that the rear admiral designated by the Commandant to the position of Chief of Staff shall be the senior rear admiral for all purposes other than pay".

(2) By amending subsection 290(a) by inserting the following in the second sentence immediately after the words "vice admiral": "or in the position of Chief of Staff".

SEC. 204. Title 14, United States Code, is amended as follows:

(1) By striking the first sentence of section 711.

(2) By amending the table of sections at the beginning of chapter 21 of such title to read as follows:

"711. Exclusiveness of service.".

SEC. 205. Public Law 96-376 (4 Stat. 1509) is amended as follows:

(1) By amending paragraph (1) of the first section by striking "$1,248,367,000;" and substituting "$1,337,207,000;".

(2) By amending section 2 by striking "39,600:" and substituting "39,819:".

SEC. 206. Subsection 93(p) of title 14, United States Code, is amended by inserting the following immediately after "of such lines and cables,": "including the installation and use of telephone in residences leased or owned by the Government of the United States when appropriate to assure efficient response to extraordinary operational contingencies of a limited duration,".

TITLE III—AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1983

SEC. 301. Such funds as may be necessary are hereby authorized to be appropriated for necessary expenses of the Coast Guard for fiscal year 1983, as follows:

(1) for the operation and maintenance of the Coast Guard, including expenses related to the Capehart housing debt reduction;

(2) for the acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto;

(3) for the alteration or removal of bridges over navigable waters of the United States, constituting obstructions to navigation; and

(4) for research, development, testing, and evaluation.

SECTION-BY-SECTION ANALYSIS OF S. 831

TITLE I

Section 1 authorizes $1,402,898,000 for FY–1982 Coast Guard operating expenses, an increase of $65,691,000 over the amount already appropriated by Congress and supplemental appropriations requested for FY–1981. An authorization for additional money to meet unforeseen circumstances is included in order to preclude the need for a supplemental authorization bill. The section also includes a $375,000,000 authorization for acquisition, construction, and rebuilding of aircraft, vessels, shore facilities, and aids to navigation in FY–1982, an increase of $39,015,000 over the amount already appropriated by Congress and supplemental appropriations requested for FY–1981; $17,500,000 for removal or alteration of bridges, a $1,650,000 increase over the amount appropriated by Congress for FY–1981; and $29,730,000 for research and development, a $4,730,000 increase over the amount appropriated by Congress for FY–1981.

Section 2 authorizes an active duty personnel level of 39,904 for FY–1982. This is an increase of 85 persons over the level requested to be authorized in section 205 of this Act.

Section 3 of the proposed bill authorizes the student-year levels for recruit and special training (FY–1982–3,660), a decrease of 525 from FY–1981; flight training (FY–1982–118), an increase of 1 from FY–1981; professional training (FY–1982–655), an increase of 60 from FY–1981; and officer acquisition (FY–1982–1,038), an increase of 113 from FY–1981. In all categories, student-years are used as the unit of measure. A student-year is defined as the product of the number of students scheduled to attend each course in the category multiplied by the course length expressed in a fraction of a year (e.g., course

length in weeks divided by 52 weeks per year).

TITLE II

Section 201.

Section 686 of title 31, United States Code, (The Act of March 4, 1915, c. 143, § 1, 38 Stat. 1084, as amended) permits Federal agencies to place orders with other agencies for materials, supplies, equipment, or work or services which those agencies may be able to supply.

Prior to its transfer to the Department of Transportation in 1967, the Coast Guard, as an agency within the Department of Treasury, was included within the first proviso of section 686. In the transfer the proviso's applicability was inadvertently overlooked. As a result, the Coast Guard no longer has the benefit of being able to place orders, "for materials, supplies, equipment, work, or services, of any kind that any requisitioned Federal Agency may be in a position to supply, or to render or to obtain by contract".

The Coast Guard, therefore, cannot place an order under section 686 if the providing agency will fill the order by contracting outside the Government, either in whole or in part.

As a result of this exclusion, the Coast Guard has experienced problems—and expects to continue encountering difficulties—in a number of important projects. Most significantly the Service is presently precluded from placing orders with the Department of Defense military departments for services, such as statistical research projects, equipment, or materials resulting from DOD research and development efforts and for other highly technical procurements, if the requisitioned agency has contracted outside of the Government for any part of the project. Paradoxically, the Department of the Army and the Navy Department, which are specifically named in the proviso, can place such orders with the Coast Guard.

COST AND BUDGET DATA

The amendment to this section will result in improved procurement efficiency and economy, thereby better enabling the Coast Guard to accomplish its multiple missions in an effective manner. Inasmuch as no additional personnel will be required for implementation and administration, there will be no new costs to decrease the potential savings which the Coast Guard may realize as a result of this restored authority.

Section 202.

Section 41a of title 14, United States Code, requires that Reserve officers "on extended active duty" be included on the active duty promotion list (ADPL) and, consequently, considered for promotion under chapter 11 of title 14 along with regular Coast Guard officers. Only those Reserve officers on active duty who are "serving in connection with organizing, administering, recruiting, instructing, or training the Reserve components [i.e., Reserve Program Administrators] or assigned to the Selective Service System" are excluded from the ADPL. Newly enacted section 728 of chapter 21, title 14, United States Code (P.L. 96-322 August 4, 1980), states that Reserve officers who are on active duty "for training, duty on a board, or duty of a limited or temporary nature if assigned to active duty from an inactive status" shall be considered eligible for promotion under the authority of chapter 21, "COAST GUARD RESERVE", rather than chapter 11 even though the present language of section 41a contains no authority for their exclusion from the ADPL.

A result of this situation is that Coast Guard Reserve officers called to active duty to perform specific missions for the Coast Guard may refuse activation if during the duration of their active duty they happen to fall within a promotion zone on the ADPL. In the past Reserve officers, who would have been promoted if measured against their peers by a Reserve promotion board, have fared poorly when placed on the ADPL and considered for promotion on a "best qualified" basis with active duty officers under chapter 11.

The amendment to section 41a will rectify this problem by expressly specifying who is to be included on the ADPL. In addition to "officers of the Coast Guard on active duty in the grades of ensign and above," only Reserve officers serving on active duty under the authority of section 679 of title 10, United States Code, will be included on the ADPL. Section 679 is concerned with active duty agreements between the uniformed services and Reserve officers and requires, in subsection (a), a "standard written agreement" for the subsection (b) "specified period of duty of at least 12 months". The present language of section 41a, i.e., "extended active duty", was intended to cover the Reserve officer who enters such an agreement with the Coast Guard for an extended period of active duty rather than the Reserve officer who is called to active duty for a shorter period of time to perform a specific function, i.e., training, duty on a board, or other duty of a limited or temporary nature. While clarifying which classes of Coast Guard officers shall be included in the ADPL and thereby enhancing the Coast Guard's ability to activate Reserve officers as necessary, the amendment to section 41a does not affect the status of those other classes of officers currently expressly excluded from the ADPL.

In order to comport with the intent of the amendment to subsection (a), the word "extended" has been deleted from subsection (d) of section 41a inasmuch as its continued retention would be unnecessary and create confusion.

COST ESTIMATE

This proposal will result in no increase in cost of the Federal government and no additional civilian or military personnel will be needed as a result of its enactment.

Section 203.

Section 203(a) of the proposed bill amends section 41a of title 14, United States Code, by providing that the rear admiral serving in the position of Chief of Staff shall be considered the senior rear admiral of the Coast Guard, for purposes other than pay, regardless of date of rank.

Organizationally, at Coast Guard Headquarters, the Chief of Staff ranks after the Commandant and Vice Commandant. This amendment would accord the Chief of Staff the same prominence in terms of military protocol as the position merits within this hierarchy.

Section 203(b) of the proposed bill would exempt the rear admiral who is serving or has served as Chief of Staff from being subject to consideration for continuation under section 290 of title 14, United States Code. Under that section each rear admiral between the fourth and fifth years in grade is subject to a board determination of whether or not he may continue to serve until his normal date of retirement.

The Chief of Staff must make sensitive management and budgetary decisions affecting programs throughout the Coast Guard. This amendment would enable the Commandant to select a junior rear admiral who could make these decisions with the degree of autonomy necessary for this position. The only potential drawback to this proposal is that a junior rear admiral Chief of Staff would never be subject to the scrutiny of a continuation board. However, since there are so many capable rear admirals eligible for Chief of Staff, it is unlikely that the Commandant would select a Chief of Staff who, after serving in that position, would not continue to ably and industriously perform his duties for the duration of his Coast Guard career.

COST ESTIMATE

This proposal has no budgetary impact.

Section 204.

Section 711 of title 14 United States Code is amended by deleting the first sentence to remove the Selective Service registration exemption for Coast Guard inactive duty Reservists so that this section conforms to the Selective Service laws. Section 453 of title 50 Appendix provides that "[e]xcept as otherwise provided in this title . . . it shall be the duty of every male citizen . . . to present himself . . . to registration . . .". Section 456 of title 50 Appendix exempts from registration only members of the reserve components "while on active duty." However, the recently enacted section 711 of title 14 inadvertently reenacted the blanket exemption from registration, previously found in section 757 of title 14 for members of the Coast Guard Reserve without regard to whether they are on active duty. Prior to its reenactment, section 757 had been implicitly repealed by the enactment of the title 50 Appendix provision. Since these statutes are in conflict, it is necessary to amend section 711 to preserve the apparent intent of Congress, as expressed in section 453 of title 50 Appendix.

Section 205.

The FY-1981 Coast Guard authorization of appropriations bill is amended by increasing the authorization for operating expenses by $88,840,000 and the personnel ceiling by 219. These increases are necessary because supplemental appropriations requested for FY-1981 primarily for the Cuban sea patrol and for increased expenses as a result of the Nunn-Warner military personnel act would make the appropriation figures exceed the amounts already authorized to be appropriated for FY-1981.

Section 206.

Subsection 93(p) of title 14, United States Code, is amended by inserting a clause to grant the Coast Guard authority to provide leased telephone services to residences leased or owned by the Government during extraordinary operational contingencies of limited duration. The recent Cuban Refugee Freedom Flotilla operation was an example of such a contingency. It necessitated that the Commander, Seventh Coast Guard District be available at all times, 24 hours a day, for daily contact with numerous local, State, and Federal agencies. Since it was impracticable for the District Commander to remain at his office at all times, it was necessary to install a separate telephone in his private living quarters so that he could direct the operation of the Freedom Flotilla outside of normal working hours. As soon as the Freedom Flotilla operations ceased, the telephone was removed from the District Commander's residence. The installation, use, and removal of the telephone were accomplished at the District Commander's own expense. This change to subsection (p) will ensure that, in the future, similar contingency needs may be met with appropriated funds.●

By Mr. CRANSTON (for himself, Mr. MATSUNAGA, and Mr. DECONCINI):

S. 832. A bill to amend section 51(d) of the Internal Revenue Act of 1954 to make technical modifications in the definition of an economically disadvantaged Vietnam-era veteran and to remove the age criterion applicable to such definition; to the Committee on Finance.

MODIFICATION TO DEFINITION OF ECONOMICALLY DISADVANTAGED VIETNAM-ERA VETERAN

● Mr. CRANSTON. Mr. President, I am introducing today, joined by my distinguished colleague from Hawaii and fellow member of the Veterans' Affairs

Committee (Mr. MATSUNAGA), who also serves on the Finance Committee, and my distinguished colleague from Arizona (Mr. DECONCINI), S. 832, a bill which would make both technical and substantive modifications in the definition of an economically disadvantaged Vietnam-era veteran for the purposes of the targeted jobs tax credit—TJTC—authorized by section 51 of the Internal Revenue Code as amended by section 321 of the Revenue Act of 1978, Public Law 95-600. This measure is identical to S. 2838 which Senator MATSUNAGA and I introduced in the 96th Congress but on which no action was taken.

The substantive effect of this amendment would be to remove from current law the requirement that in order to be considered an economically disadvantaged Vietnam-era veteran, an otherwise eligible individual must be under 35 years of age. In lieu of this requirement, the proposed bill would require that the individual not have retired from the Armed Forces at the rank of major or above, or its equivalent. This criterion is designed to make the credit available for jobs provided to all eligible Vietnam-era veterans regardless of age except retired career field-officer grade military personnel who served during the Vietnam era.

The age criterion in existing law was designed initially as part of the 1977 amendments to the Comprehensive Employment and Training Act—section 305 of the Youth Employment and Demonstration Projects Act of 1977, Public Law 95-22—in part, to rule out career military personnel who served during the Vietnam era. A more finely tuned approach to this problem—on which this proposed amendment is based—was used in the Civil Service Reform Act of 1978, Public Law 96-454, which in section 307 (a) used the retirement-related criterion to amend the title 5 civil service law for the purposes of limiting five-point veterans preference status.

The purpose of this proposed TJTC modification is to permit the participation in the TJTC program of many Vietnam-era veterans who are rapidly approaching or have already passed the age of 35. Many of these Vietnam-era veterans actually served in Indochina and saw combat, and although these veterans are not experiencing the severe rates of unemployment experienced by younger veterans—in February, the rate of unemployment for Vietnam-era veterans ages 35 to 39 was 4.6 percent—there are still many whose employment-related needs would be served by eligibility for TJTC. As of September 1980, almost 3.3 million of the more than 9 million individuals who served during the Vietnam era were 35 years of age or older. The average age of Vietnam-era veterans was 33.6 years at the end of fiscal year 1980.

Mr. President, I believe it is important to note the conclusion in the recent in-depth report, entitled "Legacies of Vietnam: Comparative Adjustment of Veterans and Their Peers," submitted to the Veterans' Administration by the Center for Policy Research that "military duty in Vietnam had a negative effect upon post-military achievement." This negative effect is evidenced by the sustained, high rates of unemployment among minority group Vietnam-era veterans, poor success in competition for high-level jobs, and erratic patterns of changes in occupational levels. Our national obligation and national responsibility to assist those veterans of our Nation's longest war who are still experiencing difficulties in returning to civilian life should, therefore, not terminate when they turn 35 years of age.

Since the inception of the TJTC program, under which employers may receive a tax credit of up to $3,000 for hiring a member of an eligible target group, more than 10,500 Vietnam-era veterans have found employment through this program. I believe the prospects for employment in the private sector of older, noncareer military Vietnam-era veterans, especially those with families and those who are experiencing severe problems in obtaining employment, would be enhanced by the enactment of this proposal. Further, in light of the Reagan administration's proposal to phase out completely the jobs and opportunities for employment now offered through the public service employment program conducted under the Comprehensive Employment and Training Act, it is appropriate that in efforts to encourage reliance on jobs in the private sector, these very deserving veterans be a top priority and receive the full measure of assistance that can be made available.

Mr. President, at this time, no cost estimate of this proposal has been developed. However, last year in connection with S. 2838, the cost of enactment was estimated to not be significant.

I ask unanimous consent, Mr. President, that there be printed in the RECORD at this point a copy of the bill we are introducing and a document showing the changes that would be made in current law by its enactment.

There being no objection, the bill and changes to existing law were ordered to be printed in the RECORD, as follows:

S. 832

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That paragraph (4) of section 51(d) of the Internal Revenue Act of 1954 is amended by—

(1) striking out "Vietnam veteran who is a member of an economically disadvantaged family" and inserting in lieu thereof "economically disadvantaged Vietnam-era veteran";

(2) striking out "Vietnam veteran who is a member of an economically disadvantaged family" and inserting in lieu thereof "economically disadvantaged Vietnam-era veteran";

(3) inserting after "1975," in subclause (I) of clause (A) "and not having retired from the Armed Forces at the rank of major or above, or its equivalent,";

(4) inserting "and" at the end of clause (B);

(5) striking out in clause (C) the comma and "and" and inserting in lieu thereof a period; and

(6) striking out clause (D) in its entirety.

CHANGES IN EXISTING LAW PROPOSED TO BE MADE BY S. 832

Changes in existing law proposed by the bill are shown as follows (existing law proposed to be omitted is enclosed in brackets, new matter is printed in italic, existing law in which no change is proposed is shown in roman):

TITLE 26—INTERNAL REVENUE CODE

* * * * *

PART IV—CREDITS AGAINST TAX

* * * * *

Subpart D—Rules for Computing Credit for Employment of Certain New Employees

§ 51. Amount of credit

* * * * *

(d) Members of targeted groups

For purposes of this subpart—

* * * * *

(4) Vietnam veteran who is a member of an economically disadvantaged family *economically disadvantaged Vietnam-era veteran.*—The term "Vietnam veteran who is a member of an economically disadvantaged family) *economically disadvantaged Vietnam-era veteran"* means any individual who is certified by the designated local agency as—

(A) (i) having served on active duty (other than active duty for training) in the Armed Forces of the United States for a period of more than 180 days, any part of which occurred after August 4, 1964, and before May 8, 1975, *and not having retired from the Armed Forces at the rank of major or above, or its equivalent, or*

(ii) having been discharged or, released from active duty in the Armed Forces of the United States for a service-connected disability if any part of such active duty was performed after August 4, 1964, and before May 8, 1975.

(B) was not having any day during the preemployment period which was a day of extended active duty in the Armed Forces of the United States, *and*

(C) being a member of an economically disdavantaged family (determined under paragraph (9)) [, and],

[(D) not having attained the age of 35 on the hiring date.]

For purposes of subparagraph (B), the term "extended active duty" means a period of more than 90 days during which the individual was on active duty (other than active duty for training).●

By Mr. FORD:

S. 833. A bill to amend the Consumer Product Safety Act to authorize appropriations for fiscal year 1981, and for other purposes; to the Committee on Commerce, Science, and Transportation.

CONSUMER PRODUCT SAFETY ACT AMENDMENTS OF 1981

Mr. FORD. Mr. President, the Consumer Product Safety Commission (CPSC) is a small agency that has been the focal point of much debate since its creation in 1972. Three years ago, the Consumer Subcommittee of the Senate Committee on Commerce, Science, and Transportation held 3 days of oversight hearings to decide whether the agency should continue to be funded. The agency was funded for 3 more years and was given congressional direction through statutory changes in the Commission's authority. At that time it was understood that the CPSC would again be evaluated in 3 years to see if the agency's performance had improved and if the agency was indeed fulfilling its mission of reducing product related deaths and injuries.

Today, I am introducing legislation to authorize appropriations for the agency and to make legislative changes. Congressman BROYHILL recently expressed

concern about the agency's budget when introducing similar legislation in the House of Representatives. He was concerned that if we approve the administration's recommended 30-percent budget cut, we will be wasting the $33 million authorized rather than saving $11 million since the agency may not be able to fulfill its statutory responsibilities. In fact, the CPSC has already taken a 30-percent funding cut over the last 3 years factoring in the effect of inflation. Therefore this legislation authorizes appropriations of $39 million for fiscal year 1982, a 12.5-percent reduction. Detailed investigation through the scheduled oversight hearings may well support continued reductions in authorization levels for fiscal years 1983 and 1984.

The bill makes changes in the agency's statutory authority which will create budget savings. It reduces the CPSC area offices from 13 to a ceiling of 5 at a cost savings of $4.75 million and eliminates all advisory councils at a savings of over $200,000. The bill further places a ceiling on the amount of money the Commission may grant to an outside party who is developing a consumer product safety standard.

The bill makes other recommendations for statutory changes. It encourages the agency to rely on effective industry voluntary standards by prohibiting the agency from imposing a mandatory standard unless the Commission determines that the voluntary standard is not technically adequate or that there is insufficient compliance within the industry. The bill encourages industry reporting of product defects to the Commission by noting that technical violations of section 15 of the Consumer Product Safety Act should not be penalized nor should inconsequential product hazards be reported.

The bill calls for a representative panel to study the effectiveness of the cellulose insulation standard. Within 6 months, the panel will submit this study along with legislative or other recommendations to the Commission. The bill eliminates the prohibition against the use of sampling plans in consumer product safety standards and requires notification to the Commerce Committee of contracts exceeding $50,000 for purposes of more effective oversight. The bill also eliminates the authority of the CPSC to require notice by industry and submission of any test data describing any new consumer product.

The bill stresses regulatory reform by requiring the Commission to prepare a regulatory analysis outlining the costs and benefits as well as alternatives to proposed regulatory action. To continue the Commission's rule review started by the 1978 act amendments, the bill requires the CPSC to study each of its rules 5 years after promulgation.

Hearings on the CPSC reauthorization are scheduled for April 1, 2, 3, and 7, 1981. Detailed investigation of the CPSC's operations over the last 3 years in these hearings may well support other legislative changes.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 833

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Consumer Product Safety Act Amendments of 1981".

OFFICES

SEC. 2. Section 4(e) of the Consumer Product Safety Act (hereinafter referred to as "the Act") (15 U.S.C. 2053(e)) is amended by inserting immediately after "offices" the following: ", not to exceed five in number,".

REPORT TO CONGRESS

SEC. 3. Section 5(c) of the Act (15 U.S.C. 2054(c)) is amended by adding at the end of the following: "The Commission shall notify the Committee on Commerce, Science, and Transportation of the United States Senate and the Committee on Energy and Commerce of the House of Representatives of each contract under this subsection in an amount greater than $50,000.".

INDUSTRY VOLUNTARY STANDARDS

SEC. 4. (a) Section 9(c)(2) of the Act (15 U.S.C. 2058(c)(2)) is amended—

(1) by striking "and" at the end of subparagraph (B);

(2) by striking the period at the end of subparagraph (C) and inserting in lieu thereof ", and"; and

(3) by adding at the end thereof the following new subparagraph:

"(D) in the case of a rule which relates to a risk of injury with respect to which persons manufacturing a substantial number of products that would be subject to such rule have adopted and implemented a voluntary consumer product safety standard, that—

"(i) compliance with such voluntary consumer product safety standard is not likely to result in the elimination or reduction of such risk of injury; or reduction of such risk of injury; or

"(ii) it is unlikely that there will be substantial compliance with such voluntary consumer product safety standard."

(b) Section 9(c) of the Act (15 U.S.C. 2058(c)) is amended by adding at the end thereof the following:

"(3) The Commission shall, in carrying out the Federal Hazardous Substances Act (15 U.S.C. 1261 et seq.) and the Flammable Fabrics Act (15 U.S.C. 1191 et seq.), apply the provisions of paragraph (2)(D) of this subsection.".

(c) Section 5(b) of the Act (15 U.S.C. 2054(b)) is amended by striking paragraph (3) and inserting in lieu thereof the following:

"(3) offer training in product safety investigation and test methods.

The Commission shall assist public and private organizations, administratively and technically, in the development of safety standards and test methods.".

(d) Section 27(j) of the Act (15 U.S.C. 2076(j)) is amended—

(1) by striking "and" at the end of paragraph (9);

(2) by redesignating paragraph (10) as paragraph (11); and

(3) by inserting immediately after paragraph (9) the following:

"(10) a consideration of—

"(A) the number of such standards;

"(B) the nature and number of the products which are the subject of such standards;

"(C) the effectiveness of such standards in reducing potential harm from consumer products;

"(D) the degree to which staff members of the Commission participate in the development of such standards;

"(E) the amount of resources of the Commission which is devoted to activities related to such standards; and

"(F) such other information as the Commission determines appropriate or necessary to inform the Congress on the current status of the voluntary consumer product safety standard program; and".

SAMPLING PLANS

SEC. 5. Section 7(a) of the Act (15 U.S.C. 2056(a)) is amended—

(1) by striking paragraph (2);

(2) by striking "(1)"; and

(3) by redesignating subparagraphs (A) and (B) as paragraph (1) and (2), respectively.

CONTRIBUTION

SEC. 6. Section 7(d)(2) of the Act (15 U.S.C. 2056(d)(2)) is amended by striking the last sentence and inserting in lieu thereof the following: "No contribution may be made to the cost of developing a proposed consumer product safety standard or participating with the Commission in the development of a standard unless the contribution is made under an agreement entered into under this paragraph. Payments under such agreements may be made without regard to section 3648 of the Revised Statutes of the United States (31 U.S.C. 529) and may not exceed in the aggregate $25,000 in any fiscal year.".

REGULATORY IMPACT ANALYSIS

SEC. 7. (a) Section 9(c) of the Act (15 U.S.C. 2058(c)) is amended by redesignating paragraphs (2) and (3) (as added by section 4 of this Act) as paragraphs (3) and (4), respectively, and by inserting after paragraph (1) the following:

"(2) The Commission may not promulgate a consumer product safety rule unless it has prepared, on the basis of the findings of the Commission under paragraphs (1) and (4) and on other information before the Commission, a regulatory impact analysis of the rule containing the following information:

"(A) a description of the potential benefits of the rule, and an identification of those likely to receive the benefits;

"(B) a description of the potential costs of the rule, and an identification of those likely to bear the costs; and

"(C) a description of any reasonable alternative approaches (including voluntary industry consumer product safety standards) that may achieve the stated objective of the rule, together with an analysis of the potential benefits and costs of any reasonable alternative approaches and a brief explanation of the reasons why such alternatives, if proposed, were not adopted.".

(b) Section 9(a)(1)(A) of the Act (15 U.S.C. 2058(a)(1)(A)) is amended by inserting before the comma the following: "and prepares the regulatory impact analysis required by such subsection".

(c) Section 9(c) of the Act (15 U.S.C. 2058(c)) is amended by adding at the end thereof the following:

"(5)(A) The contents and adequacy of any regulatory analysis prepared or issued by the Commission under this section, including the adequacy of any procedure involved in such preparation or issuance, shall not be subject to any judicial review in any court, except that a court, upon review of a rule pursuant to section 11, may set aside such rule if the Commission has failed entirely to prepare a regulatory analysis.

"(B) Except as specified in subparagraph (A), no Commission action may be invalidated, remanded, or otherwise affected by any court on account of any failure to comply with the requirements of this section.

"(C) The provisions of this paragraph do not alter the substantive or procedural standards otherwise applicable to judicial review of any action by the Commission.".

NEW CONSUMER PRODUCT

SEC. 8. Section 13 of the Act (15 U.S.C. 2062) is repealed.

NOTIFICATION REQUIREMENT

SEC. 9. (a) Section 15(b) of the Act (15 U.S.C. 2064(b)) is amended by adding at the end thereof the following: "Nothing in this subsection shall be construed to require the reporting of an inconsequential failure to comply with a consumer product safety rule or of a defect which could create only an inconsequential product hazard.".

(b) The second sentence of section 20(b) (of the Act (15 U.S.C. 2069(b) is amended by inserting immediately before the period at the end thereof the following: ", including, in the case of information to be reported under section 15(b), whether such information involved a serious risk of injury and whether the failure to report was not reasonably untimely".

STUDY OF RULES PROMULGATED BY COMMISSION

SEC. 10. Section 27(m) of the Act (15 U.S.C. 2076(m)) is amended to read as follows:

"(m)(1) For purposes of this subsection, the term 'rule' means—

"(A) any rule prescribed by the Commission pursuant to section 9;

"(B) any rule prescribed by the Commission pursuant to section 2(q)(1)(B) of the Federal Hazardous Substances Act (15 U.S.C. 1261(q)(1)(B));

"(C) any rule prescribed by the Commission under section 3 of the Poison Prevention Packaging Act (15 U.S.C. 1472); and

"(D) any rule prescribed by the Commission under section 4 of the Flammable Fabrics Act (15 U.S.C. 1193)".

"(2)(A) The Commission shall, within 12 months after the date of enactment of this section, study all rules which the Commission has issued on or after November 10, 1978 and which are in effect on the date of enactment of this subsection.

"(B) The Commission shall study each rule promulgated after the date of enactment of this subsection within 5 years after the date of promulgation of any such rule.

"(C) Any study conducted pursuant to this paragraph shall be completed as expeditiously as possible. The Commission shall submit a report on the result of such study to the Congress which shall, to the extent practicable and appropriate (taking into account the resources and priorities of the Commission)—

"(i) recommend the deletion of particular rules and portions of rules, including reasons for such recommendations; and

"(ii) recommend the initiation of appropriate rulemaking proceedings under this Act to make changes or modifications in particular rules or portions of rules.

"(3)(A) To the extent practicable and appropriate (taking into account the resources and priorities of the Commission), the Chairman of the Commission shall include in the report submitted to the Congress under this subsection, for each such rule—

"(i) an economic impact analysis which takes into account, for such rule, the cost impact on and benefits to consumers and affected businesses (with particular attention to small businesses);

"(ii) a paperwork impact analysis containing—

"(I) an estimate of the numbers of, and a description of the classes of, persons who are required to file reports, maintain records, and fulfill any of the information-gathering requirements under such rule;

"(II) an estimate of the nature and amount of the information required to be filed in such reports, the frequency of such reports, the nature and number of records required to be kept by such persons, and the amount of time such persons who require, and the costs which would be incurred, to keep such records and make such reports, and

"(III) a description of steps being taken by the Commission to ensure that there is no unnecessary duplication in recordkeeping and report filing resulting from such rule;

"(iii) a judicial impact analysis showing the effect of such rule on the workload of the Federal courts; and

"(iv) such other explanatory and supporting statements and materials as the Commission determines necessary and appropriate for congressional consideration of such report.

"(B)(i) Except as provided in clause (ii), no material submitted to the Congress by the Chairman of the Commission under this paragraph shall be subject to any judicial review, including any judicial review to determine whether such material is sufficient to comply with the requirements of this paragraph. In the event the Chairman of the Commission finds that it is impractical or inappropriate to submit the information required under clauses (i) through (iii) of subparagraph (A), the Chairman of the Commission shall submit a statement as to why he cannot so comply.

"(ii) If any material submitted to the Congress by the Chairman of the Commission under this paragraph also is included in any rulemaking record of the Commission, any determination regarding whether such material is subject to judicial review in connection with any review of such rulemaking record shall not be affected by the submission of such material to the Congress under this paragraph.".

REPEAL OF ADVISORY COUNCIL

SEC. 11. (a) Section 28 of the Act (15 U.S.C. 2077) is repealed.

(b) Subsection (d) of section 12 of the Act (15 U.S.C. 2061(d)) (as amended by section 6 of this Act) is repealed, and subsections (e) and (f) of such section are designated as subsection (c) and (d), respectively.

(c) Section 17 of the Flammable Fabrics Act (15 U.S.C. 1204) is repealed.

(d) Section 6 of the Poison Prevention Packaging Act of 1970 (15 U.S.C. 1475) is repealed.

(e) Section 20 of the Federal Hazardous Substances Act (15 U.S.C. 1275) is repealed.

AUTHORIZATION OF APPROPRIATIONS

SEC. 12. Section 32(a) of the Act (15 U.S.C. 2081(a)) is amended—

(1) by striking "and" at the end of paragraphs (4) and (6);

(2) by striking the period at the end of paragraph (7) and inserting in lieu thereof "; and"; and

(3) by adding at the end the following:

"(8) $39,000,000 for the fiscal year ending September 30, 1982.".

STUDY ON CELLULOSE INSULATION SAFETY STANDARD

SEC. 13. The Commission shall establish a panel to study the interim cellulose insulation safety standard specified in section 35 of the Act (15 U.S.C. 2082). Such Panel shall be composed of—

(1) two representatives from industries directly related to the subject matter of such standard.

(2) two representatives of consumers and consumer interests; and

(3) two members of the staff of the Commission.

(b) The members of such Panel shall be appointed by Chairman of the Commission, who shall designate one of such members as Chairman of the Panel.

(c) Members of the Panel who are not employees of the Federal Government shall not receive any compensation, but shall be entitled to be reimbursed for travel and transportation expenses incurred as a result of the performance of his duties pursuant to this section, in accordance with section 5703 of title 5, United States Code.

(d) The Panel shall conduct a study of the effectiveness of such standard in order to determine—

(1) the extent to which such standard has been effective;

(2) the necessity for continuation of such standard;

(3) the desirability of amendments to or repeal of such standard.

(e) The Panel shall submit the results of its study to the Commission, which shall submit such results without change to the Congress within six months after the date of enactment of this Act.

TECHNICAL AMENDMENTS

SEC. 14. (A) The table of Contents of the Act is amended by striking the items relating to sections 13 and 28.

(b) Section 15(g)(1) of the Act (15 U.S.C. 2064(g)(1)) is amended by striking "(12)(e)(1)" and inserting in lieu thereof "(12)(c)(1)".

(c) Section 27(1)(1)(A) of the Act (15 United States Code 2076(1)(1)(A)) is amended by striking "Committee on Interstate and Foreign Commerce" and inserting in lieu thereof "Committee on Energy and Commerce".

By Mr. THURMOND (for himself and Mr. HART) (by request):

S. 834. A bill to authorize certain construction at military installations for fiscal year 1982, and for other purposes; to the Committee on Armed Services.

MILITARY CONSTRUCTION AUTHORIZATION ACT, 1982

Mr. THURMOND. Mr. President, by request, for myself and the senior Senator from Colorado (Mr. HART), I introduce for appropriate reference a bill to authorize certain construction at military installations for fiscal year 1982, and for other purposes.

I ask unanimous consent that the text of the bill and a letter of transmittal requesting consideration of the legislation and explaining its purpose be printed in the RECORD.

There being no objection, the bill and the letter were ordered to be printed in the RECORD, as follows:

S. 834

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Military Construction Authorization Act, 1982".

TITLE I—ARMY

AUTHORIZED ARMY CONSTRUCTION PROJECTS

SEC. 101. The Secretary of the Army may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acquisition and construction:

INSIDE THE UNITED STATES

United States Army Forces Command

Fort Bragg, North Carolina, $1,600,000.
Fort Campbell, Kentucky, $1,500,000.
Fort Carson, Colorado, $29,690,000.
Fort Douglas, Utah, $3,550,000.
Fort Drum, New York, $14,480,000.
Fort Greely, Alaska, $1,150,000.
Fort Hood, Texas, $15,530,000.
Fort Irwin, California, $43,350,000.
Fort Lewis, Washington, $6,700,000.
Fort George C. Meade, Maryland, $3,350,000.
Fort Polk, Louisiana, $630,000.

Fort Riley, Kansas, $4,640,000.
Fort Stewart/Hunter Army Air Field, Georgia, $28,500,000.
Fort J. M. Wainwright, Alaska, $1,200,000.
Presidio of San Francisco, California, $520,000.

United States Army Training and Doctrine Command

Carlisle Barracks, Pennsylvania, $620,000.
Fort Belvoir, Virginia, $3,600,000.
Fort Benjamin Harrison, Indiana, $5,120,000.
Fort Benning, Georgia, $1,960,000.
Fort Bliss, Texas, $4,700,000.
Fort Dix, New Jersey, $9,440,000.
Fort Eustis, Virginia, $8,280,000.
Fort Gordon, Georgia, $620,000.
Fort Knox, Kentucky, $620,000.
Fort Leavenworth, Kansas, $7,370,000.
Fort Lee, Virginia, $9,870,000.
Fort McClellan, Alabama, $930,000.
Fort Pickett, Virginia, $640,000.
Fort Rucker, Alabama, $5,210,000.
Fort Sill, Oklahoma, $4,650,000.
Fort Story, Virginia, $1,050,000.

United States Army Materiel Development and Readiness Command

Aberdeen Proving Ground, Maryland, $4,200,000.
Army Materials and Mechanics Research Center, Massachusetts, $1,200,000.
Corpus Christi Army Depot, Texas, $840,000.
Crane Army Ammunition Plant Activity, Indiana, $540,000.
Fort Monmouth, New Jersey, $26,000,000.
Lexington-Blue Grass Army Depot, Kentucky, $1,450,000.
Red River Army Depot, Texas, $2,720,000.
Redstone Arsenal, Alabama, $4,750,000.
Rock Island Arsenal, Illinois, $4,000,000.
Savanna Army Ammunition Depot, Illinois, $3,600,000.
Tobyhanna Army Depot, Pennsylvania, $1,800,000.
Tooele Army Depot, Utah, $1,500,000.

Ammunition Facilities

Holston Army Ammunition Plant, Tennessee, $2,627,000.
Indiana Army Ammunition Plant, Indiana, $2,453,000.
Iowa Army Ammunition Plant, Iowa, $18,599,000.
Kansas Army Ammunition Plant, Kansas, $4,344,000.
Lake City Army Ammunition Plant, Missouri, $604,000.
Longhorn Army Ammunition Plant, Texas, $257,000.
Milan Army Ammunition Plant, Tennessee, $1,984,000.
Newport Army Ammunition Plant, Indiana, $728,000.
Radford Army Ammunition Plant, Virginia, $17,390,000.

Military District of Washington

Cameron Station, Virginia, $640,000.
Fort Myer, Virginia, $2,570,000.

United States Army Communications Command

Fort Ritchie, Maryland, $920,000.

United States Military Academy

United States Military Academy, West Point, New York, $7,700,000.

United States Army Health Services Command

Fort Detrick, Maryland, $1,450,000.
Walter Reed Army Medical Center, District of Columbia, $6,250,000.

Military Traffic Management Command

Bayonne Terminal, New Jersey, $2,800,000.
Sunny Point Army Terminal, North Carolina, $880,000.

CONUS Various

Various Locations, $1,950,000.

OUTSIDE THE UNITED STATES

Eighth United States Army, Korea

Various Locations, $62,320,000.

United States Army Forces Command, Overseas

Egypt, $36,000,000.

Kwajalein Missile Range

National Missile Range, $3,240,000.

United States Army, Japan

Kawakami, Japan, $1,950,000.

United States Army, Europe

Germany, $339,190,000.
Turkey, $20,800,000.

United States Army Intelligence and Security Command

Korea, $1,550,000.
Turkey, $2,550,000.

EMERGENCY CONSTRUCTION

SEC. 102. The Secretary of the Army may establish or develop installations and facilities by proceeding with construction made necessary by changes in missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, (4) improved production schedules, or (5) revisions in the tasks or functions assigned to a military installation or facility or for environmental considerations, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of $20,000,000. The Secretary of the Army, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization shall expire on October 1, 1982, or on the date of the enactment of the Military Construction Authorization Act for fiscal year 1983, whichever is later, except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section prior to such date.

MINOR CONSTRUCTION

SEC. 103. The Secretary of the Army is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of $34,150,000.

DEFICIENCY AUTHORIZATION FOR FISCAL YEAR 1980 PROJECTS

SEC. 104. Section 602(1) of the Military Construction Authorization Act, 1980 (Public Law 96–125; 93 Stat. 941), is amended to read as follows:

"(1) for title I: inside the United States $591,785,000; outside the United States $162,950,000; minor construction $52,270,000; for a total of $807,005,000.".

DEFICIENCY AUTHORIZATION FOR FISCAL YEAR 1981 PROJECTS

SEC. 105. Section 602(1) of the Military Construction Authorization Act, 1981 (Public Law 96–418; 94 Stat. 1768), is amended to read as follows:

"(1) for title I: inside the United States $590,440,000; outside the United States $248,140,000; minor construction $44,560,000; for a total of $883,140,000.".

TITLE II—NAVY

AUTHORIZED NAVY CONSTRUCTION PROJECTS

SEC. 201. The Secretary of the Navy may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment for the following acquisition and construction:

INSIDE THE UNITED STATES

United States Marine Corps

Marine Corps Logistics Base, Barstow, California, $4,700,000.
Marine Corps Base, Camp Lejeune, North Carolina, $22,150,000.
Marine Corps Base, Camp Pendleton, California, $18,550,000.
Marine Corps Air Station, Cherry Point, North Carolina, $3,700,000.
Marine Corps Air Station, El Toro, California, $12,400,000.
Marine Corps Air Station, Kaneohe Bay, Hawaii, $2,650,000.
Marine Corps Air Station, New River, North Carolina, $5,060,000.
Marine Corps Bases Pacific, Camp H. M. Smith, Oahu, Hawaii, $2,900,000.
Marine Corps Recruit Depot, Parris Island, South Carolina, $4,100,000.
Marine Corps Development and Education Command, Quantico, Virgina, $13,560,000.
Marine Corps Recruit Depot, San Diego, California, $1,300,000.
Marine Corps Air Station (Helicopter), Tustin, California, $7,600,000.
Marine Corps Air-Ground Combat Center, Twentynine Palms, California, $5,450,000.
Marine Corps Air Station, Yuma, Arizona, $3,450,000.

Office of Naval Research

Naval Ocean Research and Development Activity, Bay St. Louis, Mississippi, $5,900,000.
Naval Research Laboratory, Washington, District of Columbia, $6,800,000.

Chief of Naval Operations

Naval Submarine Base, Bangor, Bremerton, Washington, $23,100,000.
Naval Submarine Support Base, Kings Bay, Kingsland, Georgia, $65,060,000.

Commander in Chief, United States Atlantic Fleet

Naval Air Station, Brunswick, Maine, $15,700,000.
Naval Air Station, Cecil Field, Florida, $21,700,000.
Naval Station, Charleston, South Carolina, $5,660,000.
Naval Submarine Base, New London, Groton, Connecticut, $15,650,000.
Naval Submarine Support Facility, New London, Groton, Connecticut, $3,300,000.
Naval Air Station, Jacksonville, Florida, $6,380,000.
Naval Amphibious Base, Little Creek, Virginia, $27,950,000.
Naval Station, Mayport, Florida, $2,000,000.
Naval Station, Norfolk, Virginia, $46,100,000.
Naval Air Station, Oceana, Virginia, $8,600,000.

Commander in Chief, United States Pacific Fleet

Naval Station, Adak, Alaska, $1,550,000.
Naval Air Station, Alameda, California, $7,500,000.
Naval Air Station, Barbers Point, Hawaii, $9,650,000.
Naval Air Station, Fallon, Nevada, $8,300,000.
Naval Air Station, Lemoore, California, $2,200,000.
Naval Station, Long Beach, California, $22,000,000.
Naval Air Station, Moffett Field, California, $2,000,000.

Naval Air Station, North Island, California, $13,240,000.
Naval Station, Pearl Harbor, Hawaii, $9,920,000.
Naval Submarine Base, Pearl Harbor, Hawaii, $13,350,000.

Naval Education and Training Command

Naval Air Station, Chase Field, Texas, $2,800,000.
Fleet Combat Training Center, Atlantic, Dam Neck, Virginia, $4,600,000.
Naval Training Center, Great Lakes, Illinois, $11,800,000.
Naval Explosive Ordnance Disposal School, Indian Head, Maryland, $3,300,000.
Naval Air Station, Memphis, Millington, Tennessee, $11,000,000.
Naval Education and Training Center, Newport, Rhode Island, $1,900,000.
Naval Justice School, Newport, Rhode Island, $1,500,000.
Naval Training Center, Orlando, Florida, $9,330,000.
Naval Air Station, Pensacola, Florida, $5,100,000.
Fleet Combat Training Center, Pacific, San Diego, California, $6,800,000.
Naval Training Center, San Diego, California, $1,150,000.

Bureau of Medicine and Surgery

Naval Regional Medical Clinic, Annapolis, Maryland, $3,560,000.
National Naval Medical Center, Bethesda, Maryland, $1,100,000.

Naval Material Command

Pacific Missile Range Facility, Barking Sands, Hawaii, $8,100,000.
David W. Taylor Naval Ship Research and Development Center, Bethesda, Maryland, $5,050,000.
Puget Sound Naval Shipyard, Bremerton, Washington, $157,300,000.
Charleston Naval Shipyard, Charleston, South Carolina, $7,050,000.
Naval Supply Center, Charleston, South Carolina, $4,200,000.
Naval Weapons Station, Charleston, South Carolina, $1,390,000.
Naval Air Rework Facility, Cherry Point, North Carolina, $2,800,000.
Naval Weapons Center, China Lake, California, $4,400,000.
Naval Weapons Station, Concord, California, $1,280,000.
Naval Weapons Support Center, Crane, Indiana, $3,500,000.
Naval Surface Weapons Center, Dahlgren, Virginia, $4,900,000.
Naval Construction Battalion Center, Gulfport, Mississippi, $680,000.
Naval Ordnance Station, Indian Head, Maryland, $26,100,000.
Naval Air Rework Facility, Jacksonville, Florida, $25,620,000.
Naval Undersea Warfare Engineering Station, Keyport, Washington, $8,300,000.
Portsmouth Naval Shipyard, Kittery, Maine, $2,900,000.
Naval Air Engineering Center, Lakehurst, New Jersey, $3,178,000.
Naval Underwater Systems Center Detachment, New London, Connecticut, $3,100,000.
Naval Air Rework Facility, Norfolk, Virginia, $18,650,000.
Naval Supply Center, Norfolk, Virginia, $6,200,000.
Naval Supply Center, Oakland, California, $2,420,000.
Naval Air Test Center, Patuxent River, Maryland, $3,600,000.
Naval Supply Center, Pearl Harbor, Hawaii, $520,000.
Navy Public Works Center, Pearl Harbor, Hawaii, $13,700,000.
Pearl Harbor Naval Shipyard, Pearl Harbor, Hawaii, $14,100,000.
Navy Public Works Center, Pensacola, Florida, $2,800,000.
Philadelphia Naval Shipyard, Philadelphia, Pennsylvania, $3,030,000.
Norfolk Naval Shipyard, Portsmouth, Virginia, $6,050,000.
Naval Air Rework Facility, North Island, San Diego, California, $1,150,000.
Naval Supply Center, San Diego, California, $2,350,000.
Navy Public Works Center, San Francisco, California, $2,100,000.
Naval Weapons Station, Seal Beach, California, $520,000.
Naval Air Propulsion Center, Trenton, New Jersey, $720,000.
Mare Island Naval Shipyard, Vallejo, California, $2,600,000.
Naval Surface Weapons Center Detachment, White Oak, Maryland, $4,450,000.

Naval Telecommunications Command

Naval Communications Station, Stockton, California, $830,000.
Naval Communication Area Master Station Eastern Pacific, Honolulu, Hawaii, $2,300,000.

Naval Security Group Command

Naval Security Group Activity, Adak, Alaska, $5,510,000.

OUTSIDE THE UNITED STATES

Chief of Naval Operations

Defense Installations, Mariana Islands, $32,000,000.
Circle Transit Station, Blenheim, New Zealand, $1,250,000.

Commander in Chief, United States Atlantic Fleet

Naval Facility, Brawdy, Wales, United Kingdom, $2,800,000.
Naval Station, Keflavik, Iceland, $2,350,000.

Commander in Chief, United States Pacific Fleet

Naval Air Station, Cubi Point, Republic of the Philippines, $12,150,000.
Navy Support Facility, Diego Garcia, Indian Ocean, $122,750,000.
Naval Activities, Kenya, $26,000,000.
Naval Activities, Somalia, $24,000,000.
Naval Ship Repair Facility, Subic Bay, Republic of the Philippines, $580,000.
Naval Station, Subic Bay, Republic of the Philippines, $6,800,000.
Fleet Activities, Yokosuka, Japan, $1,250,000.

United States Naval Forces Europe

Naval Station, Rota, Spain, $4,300,000.
Naval Air Facility, Sigonella, Italy, $17,100,000.

Naval Telecommunications Command

Naval Communications Station, Keflavik, Iceland, $4,000,000.
Naval Communications Stations, Ponce, Puerto Rico, $1,600,000.

Naval Security Group Command

Naval Security Group Activity, Edzell, Scotland, United Kingdom, $3,515,000.

EMERGENCY CONSTRUCTION

SEC. 202. The Secretary of the Navy may establish or develop installations and facilities by proceeding with construction made necessary by changes in missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, (4) improved production schedules, or (5) revisions in the tasks or functions assigned to a military installation or facility or for environmental considerations, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of $20,000,000. The Secretary of the Navy, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization shall expire on October 1, 1982 or on the date of the enactment of the Military Construction Authorization Act for fiscal year 1983, whichever is later, except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section prior to such date.

MINOR CONSTRUCTION

SEC. 203. The Secretary of the Navy is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of $34,270,000.

NAVAL AIR STATION, KEY WEST, FLORIDA

SEC. 204. The Secretary of the Navy is authorized to acquire lands or interests in lands to ensure unhampered air operations at the Naval Air Station, Key West, Florida, by exchange of Government-owned lands of equal value.

TITLE III—AIR FORCE

AUTHORIZED AIR FORCE CONSTRUCTION PROJECTS

SEC. 301. The Secretary of the Air Force may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acquisition and construction:

INSIDE THE UNITED STATES

Air Force Logistics Command

Kelly Air Force Base, Texas, $3,550,000.
McClellan Air Force Base, California, $10,930,000.
Robins Air Force Base, Georgia, $6,890,000.
Tinker Air Force Base, Oklahoma, $31,520,000.
Wright-Patterson Air Force Base, Ohio, $120,150,000.

Air Force Systems Command

Arnold Engineering Development Center, Tennessee, $1,690,000.
Brooks Air Force Base, Texas, $3,110,000.
Buckley Air National Guard Base, Colorado, $14,000,000.
Cape Canaveral Air Force Station, Florida, $1,810,000.
Eglin Air Force Base, Florida, $4,100,000.
Los Angeles Air Force Station, California, $2,370,000.
Patrick Air Force Base, Florida, $2,950,000.
Sunnyvale Air Force Station, California, $7,250,000.

Air Training Command

Chanute Air Force Base, Illinois, $4,120,000.
Columbus Air Force Base, Mississippi, $510,000.
Keesler Air Force Base, Mississippi, $2,280,000.
Laughlin Air Force Base, Texas, $1,090,000.
Lowry Air Force Base, Colorado, $2,840,000.
Mather Air Force Base, California, $1,520,000.
Randolph Air Force Base, Texas, $3,360,000.
Reese Air Force Base, Texas, $1,140,000.
Sheppard Air Force Base, Texas, $10,745,000.
Vance Air Force Base, Oklahoma, $2,840,000.
Williams Air Force Base, Arizona, $2,600,000.

Alaskan Air Command

Eielson Air Force Base, Alaska, $1,700,000.
Elmendorf Air Force Base, Alaska, $7,240,000.
King Salmon Airport, Alaska, $8,050,000.
Various Locations, Alaska, $42,750,000.

Military Airlift Command

Andrews Air Force Base, Maryland, $4,940,000.
Bolling Air Force Base, District of Columbia, $1,280,000.
Charleston Air Force Base, South Carolina, $630,000.
Dover Air Force Base, Delaware, $1,180,000.
Kirtland Air Force Base, New Mexico, $7,510,000.
Little Rock Air Force Base, Arkansas, $790,000.
McChord Air Force Base, Washington, $1,180,000.
McGuire Air Force Base, New Jersey, $2,680,000.
Norton Air Force Base, California, $9,567,000.
Pope Air Force Base, North Carolina, $5.510,000.
Scott Air Force Base, Illinois, $5,450,000.
Travis Air Force Base, California, $3,790,000.

National Military Command Center

Pentagon Building, Virginia, $3,000,000.

North American Air Defense Command

NORAD, Cheyenne Mountain Complex, Colorado, $11,000,000.

Pacific Air Forces

Hickam Air Force Base, Hawaii, $1,090,000.

Turkey, Various Locations, $4,000,000.
United Kingdom, Various Locations, $26,190,000.
Various Locations, $145,424,000.

EMERGENCY CONSTRUCTION

SEC. 302. The Secretary of the Air Force may establish or develop installations and facilities by proceeding with construction made necessary by changes in missions and responsibilities which have been occasioned by (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, (4) improved production schedules, or (5) revisions in the tasks or functions assigned to a military installation or facility or for environmental considerations, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security and, in connection therewith, may acquire, construct, convert, rehabilitate or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of $20,000,000. The Secretary of the Air Force, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization shall expire on October 1, 1982, or on the date of the enactment of the Military Construction Authorization Act for fiscal year 1983, whichever is later, except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section prior to such date.

MINOR CONSTRUCTION

SEC. 303. The Secretary of the Air Force is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of $28,680,000.

DEFICIENCY AUTHORIZATION FOR FISCAL YEAR 1977 PROJECTS

SEC. 304. Section 602(3) of the Military Construction Authorization Act, 1977 (Public Law 94–431; 90 Stat. 1361) is amended to read as follows:

"(3) for title III: inside the United States $744,759,000; outside the United States $56,650,000; for a total of $801,409,000."

DEFICIENCY AUTHORIZATION FOR FISCAL YEAR 1979 PROJECTS

SEC. 305. Section 602(3) of the Military Construction Authorization Act, 1979 (Public Law 95–356; 92 Stat. 580), as amended, is amended to read as follows:

"(3) for title III: inside the United States $505,786,000; outside the United States $68,963,000; minor construction $30,721,000; for a total $605,470,000."

DEFICIENCY AUTHORIZATION FOR FISCAL YEAR 1980 PROJECTS

SEC. 306. Section 602(3) of the Military Construction Authorization Act, 1980 (Public Law 96–125; 93 Stat. 942), is amended to read as follows:

"(3) for title III: inside the United States $448,380,000; outside the United States $87,620,000; minor construction $29,310,000; for a total of $605,470,000."

DEFICIENCY AUTHORIZATION FOR FISCAL YEAR 1981 PROJECTS

SEC. 307. Section 602(3) of the Military Construction Authorization Act, 1981 (Public Law 96–418; 94 Stat. 1768), is amended to read as follows:

"(3) for title III: inside the United States $567,327,000; outside the United States $146,537,000; minor construction $25,420,000; for a total of $739,284,000."

TITLE IV—DEFENSE AGENCIES

AUTHORIZED CONSTRUCTION PROJECTS FOR THE DEFENSE AGENCIES

SEC. 401. The Secretary of Defense may establish or develop military installations and facilities by acquiring constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for defense agencies for the following acquisition and construction.

INSIDE THE UNITED STATES

Defense Intelligence Agency

Bolling Air Force Base, District of Columbia, $72,500,000.

Defense Logistics Agency

Defense Construction Supply Center, Columbus, Ohio, $680,000.
Defense Depot, Tracy, California, $554,000.
Defense Depot, Mechanicsburg, Pennsylvania, $2,050,000.
Defense Depot, Memphis, Tennessee, $5,220,000.
Defense Depot, Ogden, Utah, $2,670,000.
Defense Fuel Support Point, Grand Forks, North Dakota, $1,690,000.
Defense Fuel Support, Pearl City, Hawaii, $3,600,000.

Defense General Supply Center, Richmond, Virginia, $5,600,000.

Defense Property Disposal Office, Fort Bragg, North Carolina, $2,800,000.

Defense Mapping Agency

Aerospace Center, St. Louis, Missouri, $10,750,000.

National Security Agency

Fort George G. Meade, Maryland, $57,596,000.

Office of the Secretary of Defense

Classified Activity, Classified Location, $10,000,000.

Classified Activity, Fort Belvoir, Virginia, $2,100,000.

OUTSIDE THE UNITED STATES

Defense Communications Agency

Pâtch Barracks, Vaihingen, Germany, $900,000.

Defense Logistics Agency

Defense Fuel Support Point, Wake Island, $14,500,000.

Defense Property Disposal Office, Kaiserslautern, Germany, $1,480,000.

Various Locations, Korea, $29,000,000.

Office of the Secretary of Defense

Classified Activity, Classified Location, $2,000,000.

Department of Defense Dependents School

Croughton Royal Air Force Station, United Kingdom, $13,700,000.

Dexheim, Germany, $980,000.

Fulda, Germany, $10,500,000.

Landstuhl Air Base, Germany, $6,140,000.

Misawa Air Base, Japan, $6,180,000.

Naval Station, Guantanamo Bay, Cuba, $5,900,000.

Pusan, Korea, $2,460,000.

Schwaebisch Hall, Germany, $780,000.

Seoul, Korea, $4,350,000.

Vilseck, Germany, $9,920,000.

Yokota Air Base, Japan, $3,290,000.

EMERGENCY CONSTRUCTION

SEC. 402. The Secretary of Defense may establish or develop installations and facilities which he determines to be vital to the security of the United States and, in connection therewith, may acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of $30,000,000. The Secretary of Defense, or the Secretary's designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including real estate actions pertaining thereto.

MINOR CONSTRUCTION

SEC. 403. The Secretary of Defense is authorized to accomplish minor construction projects under section 2674 of title 10, United States Code, in the amount of $6,210,000.

TITLE V—NORTH ATLANTIC TREATY ORGANIZATION INFRASTRUCTURE

SEC. 501. The Secretary of Defense is authorized to incur obligations in amounts not to exceed $425,000,000 for the United States share of the cost of multilateral programs for the acquisition or construction of military facilities and installations (including international military headquarters) for the collective defense of the North Atlantic Treaty Area. Within thirty days after the end of each calendar-year quarter, the Secretary of Defense shall furnish to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives a description of obligations incurred by the United States for the United States share of the cost of such multilateral programs.

TITLE VI—MILITARY FAMILY HOUSING AND HOMEOWNERS ASSISTANCE PROGRAM

AUTHORIZATION TO CONSTRUCT OR ACQUIRE HOUSING

SEC. 601. (a) The Secretary of Defense, or the Secretary's designee, is authorized to construct or acquire sole interest in existing family housing units in the numbers and at the locations hereinafter named, but no family housing construction shall be commenced at any such location in the United States until the Secretary shall have consulted with the Secretary of Housing and Urban Development as to the availability of suitable private housing at such location. If agreement cannot be reached with respect to the availability of suitable private housing at any location, the Secretary of Defense shall notify the Committees on Armed Services of the Senate and House of Representatives, in writing, of such difference of opinion, and no contract for construction at such location shall be entered into a period of thirty days after such notification has been given. This authority shall include the authority to acquire land, and interests in land, by gift, purchase, exchange of Government-owned land, or otherwise. The Secretary of Defense is authorized to acquire less than sole interest in existing family housing units in foreign countries when determined to be in the best interests of the Government.

(b) With respect to the family housing units authorized to be constructed by this section, the Secretary of Defense is authorized to acquire sole interest in privately owned or Department of Housing and Urban Development-held family housing units in lieu of constructing all or a portion of the family housing authorized by this section, if the Secretary, or the Secretary's designee, determines such action to be in the best interests of the United States, but any family housing units acquired under authority of this subsection shall not exceed the cost limitations specified in this section for the project nor the limitations on size specified in section 2684 of title 10, United States Code. In no case may family housing units be acquired under this subsection through the exercise of eminent domain authority, and in no case may family housing units other than those authorized by this section be acquired in lieu of construction unless the acquisition of such units is hereafter specifically authorized by law.

(c) Family housing units:

Marine Corps Air Station, El Toro, California, two hundred twelve units, $15,540,000.

Fort Irwin, California, two hundred fifty-four units, $21,055,000.

Naval Complex, San Diego, California, two hundred ninety units, $25,350,000.

Naval Submarine Support Base, Kings Bay, Georgia, one hundred sixty-five units, $12,740,000.

Fort Drum, New York, two hundred thirty-two units, $15,865,000.

Naval Complex Warminster/Willow Grove, Pennsylvania, two hundred units, $14,910,000.

Naval Air Station, Chase Field, Texas, eighty-eight units, $6,360,000.

Incirlik Air Base, Turkey, four hundred units, $29,000,000.

Greenham-Common, United Kingdom, two hundred seventy units, $27,200,000.

Classified Location Overseas, six units, $765,000.

(d) The amounts specified in this section may, at the discretion of the Secretary of Defense, or the Secretary's designee, be increased by 10 per centum, if he determines that such increases (1) is required for the sole purpose of meeting unusual variations in cost, and (2) could not have been reasonably anticipated at the time such estimate was submitted to the Congress. The amounts authorized include the costs of shades, screens, ranges, refrigerators, and all other installed equipment and fixtures, the cost of the family housing unit, supervision, inspection, overhead, land acquisition, site preparation, installation of utilities, and solar energy systems.

IMPROVEMENT OF EXISTING QUARTERS

SEC. 602. (a) The Secretary of Defense, or the Secretary's designee, is authorized to accomplish alterations, additions, expansions, or extensions, not otherwise authorized by law, to existing public quarters at a cost not to exceed $109,819,000 of which $44,878,000 shall be available only for energy conservation projects.

(b) The Secretary of Defense, or the Secretary's designee, within the amount specified in subsection (a), is authorized to accomplish repairs and improvements to existing family housing in amounts in excess of the dollar limitation prescribed in Section 610(a) of the Military Construction Authorization Act, 1968, Public Law 90–110, title VI, section 610(a), 81 Stat. 305 (42 U.S.C. section 1594h–2), as follows:

Marine Corps Air Ground Combat Center, Twentynine Palms, California, one hundred thirty-five units, $2,897,300.

Navy Public Works Center, Honolulu, Hawaii, one hundred units, $3,190,000.

Chanute Air Force Base, Illinois, two hundred twenty-two units, $4,662,000.

Fort Knox, Kentucky, one hundred units, $2,851,000.

Nellis Air Force Base, Nevada, two hundred thirty-six units, $4,956,000.

Kirtland Air Force Base, New Mexico, one hundred fifty-five units, $3,875,000.

Offutt Air Force Base, Texas, eighty units, $1,599,000.

Randolph Air Force Base, Texas, one hundred sixty-seven units, $3,839,000.

Fort Lewis, Washington, fifty-eight units, $1,378,000.

Mildenhall, United Kingdom, thirty units, $1,511,600.

Upper Heyford, United Kingdom, twelve units, $648,400.

ADVANCE PLANNING AND DESIGN

SEC. 603. The Secretary of Defense, or the Secretary's designee, may carry out advance planning and construction design and may obtain architectural and engineering services in connection with any family housing construction, including improvements, authorized or not otherwise authorized by law at a total cost of not to exceed $9,100,000.

LEASING OF FAMILY HOUSING

SEC. 604. Section 2675(d) of title 10, United States Code, is amended—

(1) by striking out "150" in subsection (1) and inserting in lieu thereof "200"; and,

(2) by striking out "17,000" in subsection (2) and inserting in lieu thereof "22,000".

AUTHORIZATION OF APPROPRIATIONS

SEC. 605. (a) There is authorized to be appropriated for fiscal year 1982 for use by the Secretary of Defense, or the Secretary's designee, for military family housing as authorized by law for the following purposes:

(1) For construction or acquisition of family housing, including minor construction, improvements to public quarters, relocation of family housing, and planning, an amount not to exceed $287,704,000.

(2) For support of military family housing, including operating expenses, leasing, maintenance of real property, payments of principal and interest on mortgage debts incurred, payment to the Commodity Credit Corporation, and mortgage insurance premiums authorized under section 222 of the National Housing Act, Act of June 27, 1934, c. 847, title II, section 222, as amended (12 U.S.C. 1715m), an amount not to exceed $2,079,-

184,000, of which not more than $8,600,000 may be obligated or expended for the leasing of military family housing in the United States, the Commonwealth of Puerto Rico, and Guam, and of which not more than $113,717,000 may be obligated or expended for the leasing of military family housing in foreign countries.

(3) For homeowners assistance under section 1013 of the Demonstration Cities and Metropolitan Development Act of 1966, Public Law 89–754, title X, sections 1013(a)(g), (1) 80 Stat. 1290–1292, as amended (42 U.S.C. 3374), including acquisition of properties, an amount not to exceed $2,000,000.

(b) The amounts authorized to be appropriated in subsection (a)(2) may be increased to the extent additional funds are necessary for increased pay costs associated with actions taken pursuant to law.

TITLE VII—AUTHORIZATION OF APPROPRIATIONS AND ADMINISTRATIVE PROVISIONS

WAIVER OF RESTRICTIONS

SEC. 701. The Secretary of each military department may proceed to establish or develop installations and facilities under this Act without regard to section 3648 of the Revised Statute, as amended (31 U.S.C. 529), and section 4774 and 9774 of title 10, United States Code. The authority to place permanent or temporary improvements on land includes authority for surveys, administration, overhead, planning, and supervision incident to construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes, as amended (40 U.S.C. 255), and even though the land is held temporarily. The authority to acquire real estate or lands includes authority to make surveys and to acquire land and interests in land (including temporary use), by gift, purchase, exchange of Government-owned land, or otherwise.

AUTHORIZATION OF APPROPRIATIONS

SEC. 702. There are authorized to be appropriated for fiscal years beginning after September 30, 1981, such sums as may be necessary for the purposes of this Act, but appropriations for public works projects authorized by titles I, II, III, IV, and V, shall not exceed—

(1) for title I: inside the United States $347,866,000; outside the United States $467,600,000; minor construction $34,150,000 for a total of $849,616,000.

(2) for title II: inside the United States $878,568,000 outside the United States $262,445,000; minor construction $34,270,000; for a total of $1,175,283,000.

(3) for title III: inside the United States $1,052,731,000; outside the United States. $599,544,000; minor construction $28,680,000; for a total of $1,680,955,000.

(4) for title IV: a total of $326,100,000, including $6,210,000 for minor construction.

(5) for title V: a total of $425,000,000.

COST VARIATIONS

SEC. 703. (a) OVERALL TITLE TOTAL LIMITATION.—Notwithstanding the provisions of subsections (b), (c), (e), and (h), the total cost of all construction and acquisition in each of titles I, II, III, IV, and V, except as provided in paragraph (d) below, may not exceed the total amount authorized to be appropriated in that title.

(b) VARIATIONS IN INSTALLATION TOTALS.—UNUSUAL VARIATIONS IN COST.—Except as provided in subsections (c) and (e) any of the amounts specified in titles I, II, III, and IV of this Act (other than in sections 103, 203, 303, and 403) may, at the discretion of the Secretary of the military department or Director of the defense agency concerned, be increased by 5 per centum when inside the United States (other than Alaska or Hawaii), and by 10 per centum when outside the United States or in Alaska or Hawaii, if the Secretary of the military department or Director of the defense agency concerned determines that such increase (1) is required for the sole purpose of meeting unusual variations in cost, and (2) could not have been reasonably anticipated at the time such estimate was submitted to the Congress.

(c) VARIATIONS IN INSTALLATION TOTALS—ONLY ONE PROJECT AT AN INSTALLATION.—When the amount named for any construction or acquisition in title I, II, III, or IV of the Act involves only one project at any military installation and the Secretary of the military department or Director of the defense agency concerned determines that the amount authorized must be increased by more than the applicable percentage prescribed in subsection (b), the Secretary of the military department or Director of the defense agency concerned may proceed with such construction or acquisition if the amount of the increase does not exceed by more than 25 per centum the amount named for such project by the Congress.

(d) VARIATIONS IN NORTH ATLANTIC TREATY ORGANIZATION TOTALS—When the Secretary of Defense determines that the amount set forth in title V for the United States share of the cost of the North Atlantic Treaty Organization Program must be increased, the Secretary may incur obligations in excess of such amount if the amount of the increase does not exceed by more than 25 per centum the amount set forth in title V.

(e) VARIATIONS IN INSTALLATION TOTALS—REPORTS BY THE SECRETARY OF DEFENSE.—When the Secretary of Defense determines that any amount named in title I, II, III, IV, or V of this Act must be exceeded by more than the percentages permitted in subsections (b), (c) and (d) to accomplish authorized construction, acquisition, or for the United States' share of the cost of the North Atlantic Treaty Organization Infrastructure Program, the Secretary of Defense, Secretary of the military department, or Director of the defense agency concerned may proceed with such construction or acquisition after a written report of the facts relating to the increase of such amount, including a statement of the reasons for such increase, has been submitted to the Committees on Armed Services of the Senate and House of Representatives, and either (1) thirty days have elapsed from the date of submission of such report, or (2) both Committees have indicated approval of such construction or acquisition. Notwithstanding the provisions in prior Military Construction Authorization Act, the provisions of this subsection shall apply to such prior Acts.

(f) COST AND SCOPE VARIATIONS OF INDIVIDUAL PROJECTS: REPORTS TO CONGRESS.—No individual project authorized under title I, II, III, or IV of this Act for any specifically listed military installations for which the current working estimate is greater than the statutory upper limit for minor construction projects, may be placed under contract if—

(1) the approved scope of the project is reduced in excess of 25 per centum; or

(2) the current working estimate, based upon bids received, for the construction of such project exceeds by more than 25 per centum the amount authorized for such project by the Congress;

until a written report of the facts relating to the reduced scope or increased cost of such project, including a statement of the reasons for reduction in scope or increase in cost, has been submitted to the Committees on Armed Services of the Senate and House of Representatives, and either thirty days have elapsed from the date of submission of such report, or both Committees have indicated approval of such reduction in scope or increase in cost, as the case may be.

(g) ANNUAL REPORTS TO CONGRESS.—The Secretary of Defense, or the Secretary's designee, shall submit an annual report to the Congress identifying each individual project (other than a project authorized under section 103, 203, 303, or 403) which has been placed under contract in the preceding twelve-month period and with respect to which the then current working estimate of the Department of Defense, based upon bids received, for such project exceeded the amount authorized by the Congress for that project by more than 25 per centum. The Secretary shall also include in such report each individual project with respect to which the scope was reduced by more than 25 per centum in order to permit contract award within the available authorization for such project. Such report shall include all pertinent cost information for each individual project, including the amount in dollars and percentage by which the current working estimate based on the contract price for the project exceeded the amount authorized for such project by the Congress.

(h) COST AND FLOOR AREA VARIATIONS—SOLAR ENERGY.—The Secretary of Defense shall encourage the utilization of solar energy as a source of energy for projects authorized by this Act where utilization of solar energy would be practical and economically feasible. In order to equip any project authorized by this Act with solar heating equipment, solar cooling equipment, or both solar heating and solar cooling equipment, the Secretary of Defense may authorize increases in the cost limitations or floor area limitations for such project by such amounts as may be necessary for such purpose. Any increase under this section in the cost or floor area of a project authorized by this Act shall be in addition to any other increase in such cost or variation in floor area limitation authorized by this or any other Act.

CONSTRUCTION SUPERVISION

SEC. 704. Contracts for construction made by the United States for performance within the United States and its possessions under this Act shall be executed under the jurisdiction and supervision of the Corps of Engineers, Department of the Army; the Naval Facilities Engineering Command, Department of the Navy; or such other department or Government agency as the Secretaries of the military departments recommend and the Secretary of Defense approves to assure the most efficient, expeditious, and cost-effective accomplishment of the construction herein authorized. The Secretaries of the military departments shall report annually to the President of the Senate and Speaker of the House of Representatives a breakdown of the dollar value of construction contracts completed by each of the several construction agencies selected together with the design, construction supervision, and overhead fees charged by each of the several agents in the execution of the assigned construction. Further, such contracts (except architect and engineering contracts which, unless specifically authorized by the Congress shall continue to be awarded in accordance with presently established procedures, customs, and practice) shall be awarded, insofar as practicable, on a competitive basis to the lowest responsible bidder, if the national security will not be impaired and the award is consistent with chapter 137 of title 10, United States Code. The Secretaries of the military departments shall report annually to the President of the Senate and Speaker of the House of Representatives with respect to all contracts awarded on other than a competitive basis to the lowest responsible bidder. Such reports shall also show, in the case of the ten architect-engineering firms which, in terms of total dollars, were awarded the most business; the names of such firms; the total number of separate contracts awarded each firm; and the total amount paid or to be paid in the case of each such action under all such contracts awarded such firm.

REPEAL OF PRIOR YEAR AUTHORIZATIONS: EXCEPTIONS

SEC. 705. (a) As of October 1, 1982, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1983, whichever is later, all authorizations for military public works, including family housing, to be accomplished by the Secretary of a military department in connection with the establishment or development of installations and facilities, and all authorizations for appropriations therefor, that are contained in titles I, II, III, IV, and V, of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1749), and all such authorizations contained in Acts approved before October 10, 1980, and not superseded or otherwise modified by a later authorization are repealed except—

(1) authorizations for public works and for appropriations therefor that are set forth in those Acts in the titles that contain the general provisions; and

(2) authorizations for public works projects as to which appropriated funds have been obligated for construction contracts, land acquisition, or payments to the North Atlantic Treaty Organization, in whole or in part, before October 1, 1982, or the date of the enactment of the Military Construction Authorization Act for fiscal year 1983, whichever is later, and authorizations for appropriations therefor.

(b) Notwithstanding the repeal provisions of subsection (a) of this section and section 605 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1770), authorizations for the following items authorized in section 101 of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 928) shall remain in effect until October 1, 1983, or the date of enactment of the Military Construction Authorization Act for the fiscal year 1984, whichever is later:

(1) Boiler Plant Emission Control System construction in the amount of $1,900,000 at Anniston Army Depot, Alabama.

(2) Boiler Plant Emission Control System construction in the amount of $3,000,000 at Tobyhanna Army Depot, Pennsylvania.

(3) Boiler Plant Emission Control System construction in the amount of $2,800,000 at Fort Benjamin Harrison, Indiana.

(4) Industrial Waste Treatment Plant construction in the amount of $1,100,000 at Riverbank Army Ammunition Plant, California.

(5) Advanced Power Train Test Facility construction in the amount of $1,560,000 at Corpus Christi Army Depot, Texas.

(6) Ammunition Inspection and Test Facility construction in the amount of $1,200,000 at Letterkenny Army Depot, Pennsylvania.

(7) Replace Boilers construction in the amount of $8,600,000 at Red River Army Depot, Texas.

(8) Dental Clinic construction in the amount of $2,750,000 at Schofield Barracks, Hawaii.

(9) Centralized Container Ammunition Facility construction in the amount of $920,000 at Lone Star Army Ammunition Plant, Texas.

(10) Indoor Athletic Facilities construction in the amount of $12,200,000 at the United States Military Academy, West Point, New York.

(11) Temperature—Altitude Test Facility construction in the amount of $2,000,000 at the White Sands Missile Range, New Mexico.

(12) Water Monitor Station construction in the amount of $220,000 at Riverbank Army Ammunition Plant, California.

(c) Notwithstanding the repeal provisions of subsection (a) of this section and section 605 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1770), authorization for the construction of the Reception Station of Fort Benning, Georgia, in the amount of $5,886,000 authorized in section 101 of the Military Construction Authorization Act, 1978 (Public Law 95-82; 91 Stat. 358), as such authorization was extended in section 605 of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 945), shall remain in effect until October 1, 1983 or the date of enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later.

(d) Notwithstanding the provisions of subsection (a) of this section and of section 605 of the Military Construction Authorization Act, 1981 (Public Law 96-418; 94 Stat. 1770) authorizations for the following items authorized in section 201 or such authorizations as were extended in section 605 of the Military Construction Authorization Act, 1980 (Public Law 96-125) shall remain in effect until October 1, 1983, or the date of enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later:

(1) Municipal Sewer Connection construction in the amount of $2,200,000 at the Naval Submarine Base, New London, Connecticut.

(2) Insulation and Storm Windows construction in the amount of $2,350,000 at the Naval Weapons Station, Charleston, South Carolina.

(3) Applied Instruction (Morse Training) Building construction in the amount of $2,400,000 at the Naval Technical Training Center, Pensacola, Florida.

(4) Municipal Sewer Connection construction in the amount of $2,100,000 at the Naval Shipyard, Long Beach, California.

(5) Industrial Waste Collection and Treatment construction in the amount of $6,500,000 at the Naval Shipyard, Long Beach, California.

(e) Notwithstanding the repeal provisions of subsection (a) of this section and section 605 of the Military Construction Authorization Act, 1981 (Public Law 96-418, 94 Stat. 1770), authorizations for the following items authorized in section 301 of the Military Construction Authorization Act, 1980 (Public Law 96-125; 93 Stat. 934) shall remain in effect until October 1, 1983 or the date of the enactment of the Military Construction Authorization Act for fiscal year 1984, whichever is later:

(1) Connect to Regional Sewage System in the amount of $1,100,000 at Richards-Gebaur Air Force Base, Missouri.

(2) Pave roads in the amount of $690,000 at Davis-Monthan Air Force Base, Arizona.

(3) Aircraft Maintenance Control Facility in the amount of $850,000 at England Air Force Base, Louisiana.

(4) Composite Medical Facility in the amount of $16,500,000 at George Air Force Base, California.

(5) Air Installation Compatible Use Zone in the amount of $1,950,000 at Buckley Air National Guard Base, Colorado.

(6) Various Operational Facilities in the amount of $4,950,000 at Roberts International Airport, Liberia.

(7) Unaccompanied Officer Personnel Housing in the amount of $510,000 at Taegu Air Base, Korea.

(8) Security Facilities in the amount of $3,485,000 at Howard Air Base, Canal Zone.

(9) Special Operations Facilities in the amount of $2,800,000 at Various Locations Overseas.

UNIT COST LIMITATIONS

SEC. 706. None of the authority contained in titles I, II, III, and IV of this Act shall be deemed to authorize any building construction projects inside the United States in excess of a unit cost to be determined in proportion to the appropriate area construction cost index, based on the following unit cost limitations where the area construction index is 1.0:

(1) $53 per square foot for permanent barracks; or

(2) $57 per square foot for unaccompanied officer quarters;

unless the Secretary of Defense, or the Secretary's designee, determines that, because of special circumstances, application to such project of the limitation on unit cost contained in this section is impracticable. Notwithstanding the limitations contained in prior Military Construction Authorization Acts on unit costs, the limitations on such costs contained in this section shall apply to all prior authorizations for such construction not heretofore repealed and for which construction contracts have not been awarded by the date of enactment of this Act.

EFFECTIVE DATE FOR PROJECT AUTHORIZATIONS

SEC. 707. Titles I, II, III, IV, V, and VI shall take effect on October 1, 1981.

TITLE VIII

GUARD AND RESERVE FORCES FACILITIES

Authorization for facilities

SEC. 801. Subject to chapter 133 of title 10, United States Code, the Secretary of Defense may establish or develop additional facilities for the Guard and Reserve Forces, including the acquisition of land therefor, but the cost of such facilities shall not exceed the following amounts:

(1) For the Department of the Army—

(a) for the Army National Guard of the United States, $41,500,000; and

(b) for the Army Reserve, $30,400,000.

(2) For the Department of the Navy: for the Naval and Marine Corps Reserves, $23,900,000.

(3) For the Department of the Air Force—

(a) for the Air National Guard of the United States, $78,700,000; and

(b) for the Air Force Reserve, $28,500,000.

WAIVER OF CERTAIN RESTRICTIONS

SEC. 802. The Secretary of Defense may establish or develop installations and facilities under this title without regard to section 3648 of the Revised Statutes, as amended (31 U.S.C. 529) and sections 4774 and 9774 of title 10, United States Code. The authority to place permanent or temporary improvements on lands include authority for surveys, administration, overhead, planning, and supervision incident to construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes, as amended (40 U.S.C. 255) and even though the land is held temporarily. The authority to acquire real estate or land includes authority to make surveys and to acquire land and interests in land (including temporary use), by gift, purchase, exchange of Government-owned land, or otherwise.

EXPANSION OF FEDERAL FACILITIES BY THE NATIONAL GUARD

SEC. 803. Section 2233 of title 10, United States Code, is amended:

(1) by inserting "or those owned by the Federal Government" after the words "or convert facilities owned by it" in clause (2) of subsection (a); and

(2) by striking of the period at the end of subsection (b) and inserting in lieu thereof: ", and such property may be transferred to any State or Territory, Puerto Rico, or the District of Columbia incident to the expansion, rehabilitation or conversion of such property under subsection (a)(2), so long as the transfer of such property does not result in the creation of a State or Territory, Pureto Rico, or the District of Columbia-owned enclave within a larger Federal installation."

FEDERAL FUNDING OF DIRECTED PROGRAMS

SEC.. 804. Section 2233(a) of chapter 133, title 10, United States Code is amended:

(1) by striking out "and" after clause (4);

(2) by striking out the period at the end

of clause (5) and inserting in lieu thereof; "and"; and

(3) by adding at the end thereof the following new clause:

"(6) contribute to any State or Territory, Puerto Rico, or the District of Columbia such amounts as may be necessary for the alteration, rehabilitation, or construction of arms storage rooms, which alteration, rehabilitation or construction is required to meet a change in Department of Defense standards related to the safekeeping of arms."

TITLE IX—GENERAL PROVISIONS

USE OF SOLAR ENERGY SYSTEMS IN NEW CONSTRUCTION

SEC. 901. Section 2688(b) of title 10, United States Code, is amended to read as follows:

(b) For the purposes of this section, a solar energy system shall be considered to be cost effective if the original investment cost differential can be recovered over the expected life of the facility using accepted life cycle costing procedures. Such accepted life cycle costing procedures shall include the use of the sum of all capital, operating, and maintenance expenses associated with the energy system of the building involved over the expected life of such system or during a period of twenty-five years, whichever is shorter, and using marginal fuel cost as determined by the Secretary of Defense and at a discount rate of 7 per centum per year.

FOREIGN GOVERNMENT FUNDED CONSTRUCTION

SEC. 902. (a) The Act of September 28, 1951, c. 434, title V, § 504, 65 Stat. 364, as amended, (31 U.S.C. § 723) is amended to read as follows:

"There are authorized to be appropriated without fiscal year limitation, funds for advance planning, construction design, and architectural services in connection with (1) public works projects which are not otherwise authorized by law, and (2) construction management of those projects funded by foreign governments directly or through international organizations for which U.S. forces are the sole or primary user.

CONSTRUCTION AUTHORITY UNDER A DECLARATION OF WAR OR NATIONAL EMERGENCY

SEC. 903. Chapter 159 of title 10, United States Code is amended:

(1) by adding at the end thereof the following new section:

"2689. Construction Authority in the event of a declaration of war or national emergency.

a. In the event of a declaration of war by the Congress or the declaration by the President of a national emergency in accordance with the National Emergencies Act (Public Law 94-412; 90 Stat. 1255) requiring employment of the armed forces, the Secretary of Defense is authorized, without regard to any other provisions of law, to undertake military construction necessary to support such employment within the total amount of funds that have been appropriated for military construction, including funds appropriated for family housing, that have not been obligated.

b. This authority includes: (1) acquisition of real estate and interests in land (including temporary interests) by lease, purchase, gift, exchange of government-owned land, or otherwise; (2) surveys and site preparation; (3) acquisition, lease conversion, rehabilitation of permanent or temporary facilities; (4) appurtenances, supporting facilities, and utilities incident to such construction; (5) acquisition of and installation of equipment integral to the construction; and (6) planning, supervision, administration, and overhead incident to such construction.

c. This authority shall remain available for the duration of the declaration of war or national emergency.

d. Whenever a decision to undertake military construction authorized under this section is made, the Secretary of Defense shall notify the Committees on Armed Services and Appropriations of the Senate and the House of Representatives of the decision and the estimated cost of such construction including real estate actions pertaining thereto.

TITLE X

SEC. 1001. There are authorized to be appropriated for fiscal year 1983 such sums as may be necessary for the Secretary of Defense and the Secretaries of the Army, Navy and Air Force to establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities and equipment.

GENERAL COUNSEL OF THE DEPARTMENT OF DEFENSE,
Washington, D.C., March 18, 1981.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: There is transmitted herewith a draft of legislation entitled the "Military Construction Authorization Act, 1982". This proposal replaces the proposal previously transmitted to the Congress on January 23, 1981.

The changes to the Department of Defense military construction program for fiscal year 1982 incorporated into the attached legislation are required to increase readiness, improve the quality-of-life of our military personnel, and to modernize military facilities. The Office of Management and Budget has advised that its enactment would be in accord with the program of the President. Appropriations in support of this legislation are discussed in the Amended Budget of the United States Government for fiscal year 1982.

Titles I, II, III, IV, and V of the attached proposal would authorize $4,456,954,000 in new construction for requirements of the Active Forces, of which $849,616,000 are for the Department of the Army; $1,175,283,000 for the Department of the Navy; $1,680,955,000 for the Department of the Air Force; $326,100,000 for the Defense Agencies; and $425,000,000 for the United States' share of the NATO Infrastructure Program.

Title VI contains legislative recommendations considered necessary to implement the Department of Defense Family Housing and Homeowners Assistance Programs and authorizes $2,368,888,000 for the cost of this program for fiscal year 1982.

Title VII contains Authorizations of Appropriations and Administrative Provisions generally applicable to the Military Construction Program. Title IX contains non-recurring general provisions applicable to the Military Construction Program.

Title VIII totaling $203,000,000 would authorize construction for the Guard and Reserve Forces, including $41,500,000 for the Army National Guard; $30,400,000 for the Army Reserve; $23,900,000 for the Naval and Marine Corps Reserve; $78,700,000 for the Air National Guard; and $28,500,000 for the Air Force Reserve. These authorizations are in lump sum amounts and will be utilized in accordance with the requirements of chapter 133, title 10, United States Code.

Title X provides authorization as may be necessary for FY 1983 and meets the basic requirements of the Congressional Budget and Impoundment Control Act of 1974 (Public Law 93-344).

Additionally, included in Title I, pursuant to section 138 of title 10, United States Code, as amended, is authorization for construction of production base support at Army Ammunition Facilities, for which appropriations are being requested.

The projects that would be authorized by this proposal have been reviewed to determine if environmental impact statements are required in accordance with Public Law 91-190. Required environmental statements will be submitted to the Congress by the Military Departments.

Your support of the amended military construction authorization program for FY 1982 is requested.

Sincerely,

L. NIEDERLEHNER,
Acting General Counsel.

By Mr. STEVENS:

S. 835. A bill for the relief of Jerry L. Crow; to the Committee on Energy and Natural Resources.

RELIEF OF JERRY L. CROW

Mr. STEVENS. Mr. President, I am today introducing legislation to provide for the relief of Jerry L. Crow. This bill is intended to allow Mr. Crow to purchase up to 10 acres of public land in Alaska and to lease up to an additional 70 acres of surrounding land. The lands which would be conveyed and leased to Mr. Crow were originally described in the application to be filed for a trade and manufacturing (T. & M.) site in 1967, pursuant to that law. This bill was passed unanimously in the Senate last session, although it was never considered by the House due to the lateness of the session.

The need for this bill is as clear now as it was last session. Mr. Crow's application was denied by the Bureau of Land Management (BLM), the Interior Board of Land Appeals, and the U.S. district court because it did not meet the unreasonable standards set by BLM regulations. The grounds for this rejection were based upon Mr. Crow's failure to prove that the campground he had constructed on the site could qualify as a "productive industry."

Mr. Crow has worked industriously to develop his campground. He has improved the site and operated the facility in a productive manner. Jerry Crow has made a good-faith effort to move his applications forward. Unfortunately, the period between the filing of his application, the field examination, and the final decision by BLM has been so lengthy and uncertain as to the requirements for approval, that his application met with failure.

The equities of this situation are such that Mr. Crow is entitled to purchase up to 10 acres of land from the Federal Government at the fair market value in 1967 which is the date of his application for the T. & M. site. Additionally, a long-term lease of up to 70 acres of remaining land covered by the T. & M. site should be permitted.

Mr. President, enactment of this bill would cost the Federal Government nothing. It would not affect future decisions under the act of May 14, 1896, in any manner. However, it would rectify an inequity and right the wrong of not allowing Mr. Crow an opportunity to operate his campground, on which he has worked so long and hard.

By Mr. ROTH (by request):

S. 838. A bill to amend title 5, United States Code, to strengthen the principle of comparability as the basis for setting Federal pay and benefits, and for other purposes; to the Committee on Governmental Affairs.

FEDERAL PAY COMPARABILITY REFORM ACT OF 1981

● Mr. ROTH. Mr. President, I am introducing today, by request, the "Federal Pay Comparability Reform Act of 1981."

This legislation forms a part of the President's economic package. It is a revised version of the pay reform bill originally submitted by former President Carter on January 16 and is designed to rectify a number of longstanding flaws in the system by which compensation is determined for Federal employees. I am introducing the proposal so that there may be a specific bill to which interested Senators and the public may direct comments.

Mr. President, the General Accounting Office has reviewed Federal pay systems extensively over the years. One of their first and most important observations has been that the Government's compensation policies, structures, and practices require continual evaluation and research to keep up with the constantly changing nature of the labor markets as well as Government's needs. The GAO has concluded that improvements are needed to achieve more reasonable comparability with the non-Federal sector in line with the basic purposes of the comparability concept.

A carefully designed Federal pay reform bill could help reduce unnecessary Federal spending a great deal. However, the complexities of this issue make it imperative that our committee thoroughly review the bill before recommending it to the full Senate.

I ask unanimous consent that the bill be printed in the RECORD at this point, together with a section-by-section analysis and the letter from the Director of the Office of Personnel Management to the President of the Senate dated March 24, 1981.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 838

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Pay Comparability Reform Act of 1981".

STATUTORY PAY SYSTEMS

SEC. 2. (a) Subchapter I of chapter 53 of title 5, United States Code, is amended—

(1) by amending section 5301 to read as follows:

"§ 5301. Policy

"(a) It is the policy of Congress that Federal pay fixing for employees under the General Schedule be based on the principles that—

"(1) there be equal pay for substantially equal work within each General Schedule pay area;

"(2) pay distinctions within each General Schedule pay area be maintained in keeping with work and performance distinctions;

"(3) General Schedule pay rates, when considered together with Federal employee benefits, be comparable with 94 percent of non-Federal pay rates, when considered together with non-Federal employee benefits, for the same levels of work; and

"(4) differences in General Schedule pay rates between different pay areas be in keeping with difference in non-Federal pay rates between those areas.

"(b) It is the policy of Congress that Federal pay rates for employees under the statutory pay systems other than the General Schedule be comparable with the rates fixed under section 5302 of this title for the General Schedule.

"(c) In order to fulfill the principles in subsections (a) and (b) of this section, pay for employees under the statutory pay systems shall be fixed and adjusted in accordance with those principles and the applicable provisions of sections 5302, 5303, 5306, and 5308 of this title.

"(d)(1) For the purpose of this subchapter, 'statutory pay system' means—

"(A) the General Schedule, as provided in section 5332 of this title;

"(B) the pay schedule for the Foreign Service of the United States, as provided in section 3963 of title 22; or

"(C) the pay schedules for certain employees in the Department of Medicine and Surgery of the Veterans' Administration, as provided in section 4107 of title 38.

"(2) For the purpose of making comparisons between Federal and non-Federal pay and employee benefits as required by this subchapter, employees under the merit pay system under chapter 54 of this title shall be included in such comparisons as if they were under the General Schedule.";

(2) by redesignating section 5305 as section 5302, inserting that section as redesignated after section 5301, and amending that section as redesignated—

(A) by amending subsection (a)(1)(A) to read as follows:

"(A) compares General Schedule rates of pay and Federal employee benefits with rates of pay and employee benefits for the same levels of work outside the Federal Government, as determined on the basis of appropriate annual pay surveys and appropriate surveys of employee benefits that shall be conducted by the Bureau of Labor Statistics and on the basis of other appropriate sources of information on employee benefits;";

(B) in subsection (a)(1)(B) by inserting after "pay" the following:
"of the General Schedule and the other statutory pay systems";

(C) in subsection (a)(2) by striking out "5301(a)" and inserting in lieu thereof "5301(a)(1)–(3) and (b)";

(D) in subsection (b)(1)—

(i) by inserting after "represent" the following:
"or include in their membership"; and

(ii) by inserting after "represented by" the following:
"or included in the membership of"; and

(E) by amending subsection (b)(2)(A)–(C) to read as follows:

"(A) the survey conducted by the Bureau of Labor Statistics and any other sources of information used for the comparison of General Schedule and non-Federal rates of pay, and employee benefits (including, but not limited to, the occupations, establishment sizes, industries, geographical areas, and types of employee benefits to be used in the comparison);

"(B) the process of comparing General Schedule rates of pay and Federal employee benefits with non-Federal rates of pay and employee benefits; and

"(C) the adjustments in the rates of pay of the General Schedule and the other statutory pay systems that should be made to achieve the policy established in section 5301(a)(1)–(3) and (b) of this title;";

(3) by amending section 5303 to read as follows:

"§ 5303. General Schedule Locality Rates of Pay

"(a) In order to fulfill the policy established by section 5301(a)(4) of this title, the President shall designate appropriate pay areas and, upon making a pay adjustment under section 5302 of this title, shall establish locality rates of pay for the General Schedule for each pay area in accordance with the provisions of this section. If the President determines that it is inappropriate to establish locality rates of pay for the General Schedule for any area, he may determine that the General Schedule rates of pay established under section 5302 of this title shall be deemed the locality rates of pay for that area.

"(b) In order to determine the locality rates of pay in each pay area, the President shall adjust the General Schedule rates of pay established under section 5302 of this title upward or downward in keeping with the relationship non-Federal rates of pay in the pay area bear to average non-Federal rates of pay in the United States, as determined by surveys by the Bureau of Labor Statistics. Such upward or downward adjustment may vary by level of work within a pay area.

"(c) In fulfilling his responsibility under this section, the President shall be assisted by the agent designated by him under section 5302(a)(1) of this title, and shall consider the recommendations of the Advisory Committee on Federal Pay established under section 5306 of this title. The agent shall—

"(1) advise the President as to the number and boundaries of appropriate pay areas and the upward or downward adjustment in General Schedule rates of pay appropriate for each pay area;

"(2) provide for meetings with and give thorough consideration to the views and recommendations of the Federal Employees Pay Council established under section 5302(b)(1) of this title on matters relating to the agent's advice to the President under this section; and

"(3) give thorough consideration to the views and recommendations of employee organizations not represented on the Federal Employees Pay Council on such matters.

"(d) Locality rates of pay established under this section shall apply (except as provided in section 5363 of this title) to each General Schedule employee whose permanent duty station is within the boundaries of the applicable pay area, and the appropriate minimum and maximum locality rates of pay shall be the applicable minimum and maximum rates of pay under section 5402(a) of this title for merit pay system employees whose permanent duty station is within the boundaries of the applicable pay area.

"(e) Locality rates of pay established under this section shall be effective on the same day a pay adjustment under section 5302 of this title is effective, shall be printed in the Federal Register, and shall have the force and effect of law.

"(f) An increase in locality rates of pay that takes effect under this section is not an equivalent increase in pay within the meaning of section 5335 of this title.

"(g) Any locality rate of pay under this section shall be initially adjusted, effective on the effective date of the locality rate of pay, under conversion rules prescribed by the President or by such agency as the President may designate.";

(4) by amending section 5304 to read as follows:

"§ 5304. General Schedule Special Rates of Pay

"(a) Notwithstanding the provisions of sections 5301, 5302, and 5303 of this title, upon finding that the Government is experiencing significant difficulty in recruiting

or retaining well-qualified individuals for positions under the General Schedule in one or more occupations in one or more areas, the President may establish special rates of pay for the areas for one or more grades, occupations, or subdivisions thereof, which shall be the rates of pay for employees in the positions involved.

"(b) Special rates of pay established under this section may not exceed the maximum applicable locality rate of pay for the General Schedule grade, as established under section 5303 of this title, by more than twice the amount by which that maximum locality rate of pay exceeds the minimum locality rate of pay for that grade.

"(c) Upon establishing special rates of pay under this section, the President shall establish rules for the application of the special rates to affected employees. To the extent considered possible by the President, these rules shall be consistent with the provisions of subchapter III of this chapter and, in the case of employees who are subject to the merit pay system, consistent with chapter 54 of this title.

"(d) The President shall review special rates of pay established under this section annually to see if those special rates of pay are still warranted, and shall revise or abolish any special rates of pay upon determining such action is appropriate.

"(e) The special rates of pay that take effect under this section shall be printed in the Federal Register, and shall have the force and effect of law.

"(f) The President may delegate the authority granted to him by this section to the Director of the Office of Personnel Management, subject to any restrictions the President may impose."; and

(5) by amending section 5306—

(A) in subsection (b) by striking out "the policy under section 5301" and inserting in lieu thereof "his responsibilities under section 5302";

(B) by redesignating subsections (c) through (h) as subsections (d) through (i), respectively; and

(C) by inserting after subsection (b) the following new subsection:

"(c) The Committee shall conduct such reviews and provide advice to the President on such matters as the President may request in carrying out his responsibilities under section 5303 of this title or on other matters relating to the setting of pay for Federal employees.".

(b) The analysis for subchapter I of chapter 53 of title 5, United States Code, is amended—

(1) by inserting after the item relating to section 5301 the following new item:

"5302. Annual pay reports and adjustments."; and

(2) by striking out the items relating to sections 5303, 5304, and 5305 and inserting in lieu thereof:

"5303. General Schedule locality rates of pay.

"5304. General Schedule special rates of pay.".

SEC. 3. Section 2301(b)(3) of title 5, United States Code, is amended by striking out "employers in the private sector" and inserting in lieu thereof "non-Federal employers".

SEC. 4. Section 5332(a) of title 5, United States Code, is amended to read as follows:

"(a) The General Schedule is a schedule of 18 grades, designated GS–1 to GS–18 in ascending order, with ten rates of basic pay for grades GS–1 through GS–15, nine rates of basic pay for grade GS–16, five rates of basic pay for grade GS–17, and one rate of basic pay for grade GS–18. The rates of basic pay of the General Schedule in each pay area shall be fixed and adjusted under section 5303 of this title, and the rates so fixed and adjusted shall apply to each employee with a permanent duty station in the pay area to whom this subchapter applies, except an employee under the merit pay system under chapter 54 of this title.".

SEC. 5. (a) Section 5941 of title 5, United States Code, is repealed.

(b) The analysis for chapter 59 of title 5, United States Code, is amended by striking out the item relating to section 5941.

SEC. 6. Section 104 of title 3, United States Code, section 5318 of title 5, United States Code, section 461(a) of title 28, United States Code, and section 601(a)(2) of the Legislative Reorganization Act of 1946 (2 U.S.C. 31), as amended, are amended by striking out "section 5305" and inserting in lieu thereof "section 5302".

FEDERAL WAGE SYSTEM

SEC. 7. (a) Subchapter IV of chapter 53 of title 5, United States Code, is amended—

(1) by striking out "PREVAILING RATE" in the subchapter heading and inserting in lieu thereof "FEDERAL WAGE";

(2) by amending section 5341 to read as follows:

"§ 5341. Policy.

"It is the policy of Congress that rates of pay of Federal wage employees be fixed and adjusted from time to time in accordance with the public interest and on the basis of the principles that—

"(1) there be equal pay for substantially equal work for all Federal wage employees who are working under similar conditions of employment in all agencies within the same local wage area;

"(2) there be relative differences in pay within each local wage area in keeping with substantial or recognizable differences in the level of duties, responsibilities, and qualification requirements among positions;

"(3)(A) the rates of pay for Federal wage employees described in paragraph (A) of section 5342(a)(2) of this title, when considered together with Federal employee benefits, be comparable with 94 percent of non-Federal prevailing wages in the local wage area, when considered together with non-Federal employee benefits; and

"(B) the rates of pay for Federal wage employees described in paragraphs (B) and (C) of section 5342(a)(2) of this title be maintained in line with prevailing rates for comparable work in non-Federal retail, wholesale, service, and recreational establishments within the local wage area; and

"(4) the level of rates of pay be maintained so as to attract and retain qualified Federal wage employees.";

(3) by amending section 5342(a)(2)–(3), (b)(1), and (c) by striking out "prevailing rate" each time it appears and inserting in lieu thereof "Federal wage";

(4) in section 5343—

(A) in the catchline by striking out "Prevailing rate" and inserting in lieu thereof "Federal wage";

(B) in subsection (a)—

(i) by striking out the first sentence and inserting in lieu thereof "The pay of Federal wage employees shall be fixed and adjusted from time to time as nearly as is consistent with the public interest in accordance with the policy in section 5341 of this title."; and

(ii) by striking out "prevailing rate" each time it appears and inserting in lieu thereof "Federal wage";

(C) in subsection (a)(3)—

(i) by striking out "(c)(1)–(3)" and inserting in lieu thereof "(c)(1)–(4)"; and

(ii) by inserting after "rates" the following: "in accordance with the policy in section 5341 of this title";

(D) in subsection (b)—

(i) by striking out "2 years" and inserting in lieu thereof "3 years";

(ii) by inserting after "conducted" the following: "at least annually"; and

(iii) by striking out "each 2 consecutive";

(E) in subsection (c)—

(i) by inserting after "rates" the first time it appears the following: ", in accordance with the policy in section 5341 of this title";

(ii) by striking out "prevailing rate" each time it appears and inserting in lieu thereof "Federal wage";

(iii) in paragraph (1) by striking out "private" both places it appears and inserting in lieu thereof "non-Federal";

(iv) by redesignating paragraphs (3) through (6) as paragraphs (4) through (7), respectively;

(v) by inserting after paragraph (2) the following new paragraph:

"(3) for appropriate consideration of Federal and non-Federal employee benefits, as determined on the basis of employee benefits surveys and sources of employee benefits information described in section 5302(a)(1)(A) of this title, in the establishment of wage schedules and rates for Federal wage employees described in paragraph (A) of section 5342(a)(2) of this title in accordance with the policy in section 5341(3)(A) of this title;"; and

(vi) in paragraph (5) as redesignated by inserting after "involving" the following: "shift work or";

(F) by amending subsection (d) to read as follows:

"(d) Notwithstanding the provisions of sections 5341 and 5348 of this title and subsections (a), (b), and (c)(1)–(4) of this section, in any year when an alternative plan goes into effect under section 5302(c) of this title for employees under the General Schedule and the other statutory pay systems, the Office of Personnel Management shall develop and place into effect a plan for increases in wage schedules and rates that will provide treatment for Federal wage employees, including officers and members of crews of vessels, that is comparable with the treatment provided employees under the General Schedule and the other statutory pay systems."; and

(G) by repealing subsections (e) and (f);

(5) in sections 5344(a) and 5346(c) by striking out "prevailing rate" and inserting in lieu thereof "Federal wage";

(6) in section 5347—

(A) in the catchline by striking out "Prevailing Rate" and inserting in lieu thereof "Wage";

(B) by striking out "Prevailing Rate" and inserting in lieu thereof "Wage";

(C) by striking out "prevailing rate" each time it appears and inserting in lieu thereof "Federal wage"; and

(D) in subsection (e) by striking out "prevailing rates" and inserting in lieu thereof "rates of pay";

(7) in section 5348 by inserting after "provided by" the following: "section 5343(d) of this title and"; and

(8) in section 5349—

(A) in the catchline by striking out "Prevailing rate" and inserting in lieu thereof "Federal wage"; and

(B) in subsection (a) by striking out "prevailing rates and in accordance with such" and inserting in lieu thereof "the".

(b) The analysis for subchapter IV of chapter 53 of title 5, United States Code, is amended—

(1) in the subchapter heading by striking out "PREVAILING RATE" and inserting in lieu thereof "FEDERAL WAGE";

(2) in the item relating to section 5343 by striking out "Prevailing rate" and inserting in lieu thereof "Federal wage";

(3) in the item relating to section 5347 by striking out "Prevailing Rate" and inserting in lieu thereof "Wage"; and

(4) in the item relating to section 5349 by striking out "Prevailing rate" and inserting in lieu thereof "Federal wage".

SEC. 8. Notwithstanding section 704(b) of Public Law 95-454 (92 Stat. 1111, 1218), employees to whom section 9(b) of Public Law 92-392 (86 Stat. 564, 574) applies shall be subject to any plan developed and placed into effect by the Office of Personnel Management under section 5343(d) of title 5, United States Code, as amended by this Act.

PRESIDENTIAL BENEFITS AUTHORITIES

SEC. 9. (a) Chapter 63 of title 5, United States Code, is amended by adding at the end thereof the following new subchapter:

"Subchapter III—Presidential authority

"§ 6331. Authority of the President

"(a) Notwithstanding any provision of this chapter, the President may modify any provision of this chapter in accordance with the provisions of this section, in order to—

"(1) make the provisions of this chapter more comparable with leave programs and practices provided by employers other than the Federal Government;

"(2) provide greater flexibility and freedom of choice to employees; or

"(3) improve the administration of any provision of this chapter.

"(b) The President shall transmit to Congress a report describing any modification he has made in the provisions of this chapter, and shall cause such modification to be printed in the Federal Register and the Code of Federal Regulations.

"(c) Modifications in the provisions of this chapter that take effect under this section shall modify, supersede, or render inapplicable, as the case may be, to the extent inconsistent therewith—

"(1) all provisions of law enacted prior to the effective date or dates of all or part (as the case may be) of the modifications; and

"(2) any prior modifications which took effect under this section or prior provisions of law.

"(d) Any modification under this section shall be implemented in accordance with rules prescribed by the President or by such agencies as the President may designate.

"(e) This section does not impair any administrative authority granted under this chapter.".

(b) The analysis of chapter 63 of title 5, United States Code, is amended by adding at the end thereof the following:

"Subchapter III—Presidential Authority

"§ 6331. Authority of the President.".

SEC. 10. (a) Section 8707 of title 5, United States Code, is amended—

(1) in the catchline, by striking out "Employee deductions; withholding" and inserting in lieu thereof "Contributions, deductions, and withholding";

(2) by amending subsections (a), (b), and (c) to read as follows:

"(a) The President shall determine, by July 1 of each year, the Government contributions that will be made during the next calendar year for insurance under this chapter. The Government contribution rate for basic insurance may not be less than one-third of the level cost as determined by the Office of Personnel Management for each $1,000 of the employee's basic insurance amount.

"(b) For each period in which an employee or family member is insured under this chapter, the applicable Government contribution determined by the President under subsection (a) of this section shall be contributed from the appropriation or fund which is used to pay the employee. In the case of an employee paid by the Clerk of the House of Representatives, the Clerk may contribute the sum required from the contingent fund of the House. In the case of an employee who is an elected official, the sum required is contributed from an appropriation or fund available for payment of other salaries of the same office or establishment.

"(c) For each period in which an employee or family member is insured under this chapter, there shall be withheld from the employee's pay the balance of the cost of the insurance under this chapter for the employee or family member, after the Government contribution is made under subsection (b) of this section.";

(3) by redesignating subsection (d) as subsection (e);

(4) by inserting after subsection (c) the following new subsection:

"(d)(1) Whenever insurance under this chapter continues after an employee retires on an immediate annuity or while the employee is receiving compensation under subchapter I of chapter 81 of this title, as provided in section 8706(b) of this title, as provided in section 8706(b) of this title, the Government contributions required by subsection (b) of this section shall be made from an appropriation for this purpose to the Office of Personnel Management, and the balance of the cost of the insurance shall be withheld from the employee's annuity or compensation, except that, in any case in which the insurance is continued as provided in section 8706(b) (3)(A), 8714a(c)(2), 8714b(c)(2), or 8714c(c)(2) of this title, no deduction shall be withheld for regular insurance for months after the calendar month in which the employee becomes 65 years of age.

"(2) Notwithstanding paragraph (1) of this subsection, insurance shall be continued under section 8706(b) of this title without cost (other than as provided under paragraph (3)(B) of section 8706(b)) to each employee who retires, or for whom compensation commences, on or before December 31, 1989."; and

(5) in subsection (e), as redesignated, by striking out "agency contributions required under section 8708 of this title" and inserting in lieu thereof "Government contributions".

(b) Section 8708 of title 5, United States Code, is repealed.

(c) Sections 8714a, 8714b, and 8714c of title 5, United States Code, are each amended by striking out subsection (d).

(d) The analysis for chapter 87 of title 5, United States Code, is amended by striking out the items relating to sections 8707 and 8708 and inserting in lieu thereof:

"8707. Contributions, deductions, and withholding.".

SEC. 11. Section 8906 of title 5, United States Code, is amended—

(1) by amending subsection (b)(1)-(2) to read as follows:

"(b)(1) Except as provided by paragraphs (2) and (3) of this subsection, the President shall determine, at least 180 days prior to the beginning of each contract year—

"(A) the percentage of the average subscription charge, as determined under subsection (a) of this section, which the Government shall contribute during the upcoming contract year for health benefits for an employee or annuitant enrolled in a health benefits plan under this chapter; and

"(B) the percentage of the subscription charge that will be the maximum Government contribution for health benefits under any health benefits plan under this chapter.

"(2) Except as provided in paragraph (3) of this subsection, the Government contribution for health benefits for any health benefits plan under this chapter may not be less than the lesser of—

"(A) 60 percent of the average subscription charge, as determined under subsection (a) of this section, or

"(B) 75 percent of the subscription charge for the health benefits plan."; and

(2) in the first sentence of subsection (d)—

(A) by inserting after "employee" the following:

", beginning on the first day of the first applicable pay period beginning on or after the first day of each contract year,"; and

(B) by striking out the period at the end thereof and inserting in lieu thereof ", beginning on the first day of each contract year.".

SAVINGS PROVISIONS

SEC. 12. Notwithstanding the provisions of sections 2 and 7 of this Act, the pay rates of the General Schedule, the General Schedule locality pay rates in each pay area, the pay rates of the other statutory pay systems, and the wage schedules and rates of the Federal Wage System shall be increased each year for the first 5 years following the date of enactment of this Act, at the same time each such schedule or rate would normally be increased, by the greater of—

(1) the amount of increase provided under the applicable provisions of subchapter I or IV of chapter 53 of title 5, United States Code, as amended by this Act, or

(2) 2 percent.

SEC. 13. Notwithstanding the repeal of section 5941 of title 5, United States Code, by section 5 of this Act, each employee who is receiving an allowance under section 5941 on the day before the effective date of this Act shall continue to receive the amount of allowance he is receiving on such day as long as he remains in the area for which the allowance was authorized, but the amount of the allowance shall be reduced by one-half the amount of any increase in rate of basic pay the employee receives by reason of any provision of law, until the entire amount of the allowance is eliminated.

SEC. 14. Notwithstanding the provisions of section 9 of this Act, no provision of any employee benefit program may be reduced or made less generous for five years after the date of enactment of this Act.

UNIFORMED SERVICES PAY AMENDMENTS

SEC. 15. Section 1009 of title 37, United States Code, is amended—

(1) in subsection (a) by striking out "Whenever the General Schedule of compensation for Federal classified employees as contained in section 5332 of title 5, United States Code, is adjusted upward, the President shall immediately" and inserting in lieu thereof "Effective October 1 of each year, the President shall";

(2) in subsection (b)—

(A) by repealing paragraph (1);

(B) by redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively; and

(C) by amending paragraph (2) (as redesignated by this section) to read as follows:

"(2) subject to subsection (c) of this section, provide all eligible members with an increase in each element of compensation set forth in subsection (a) of this section, that is of the same percentage as the average percentage increase in non-Federal pay during the 12-month period preceding the most recent national survey of non-Federal pay described in section 5302(a)(1)(A) of title 5, United States Code."; and

(3) by adding at the end thereof the following new subsections—

"(g)(1) If, because of national security considerations, national emergency, or economic conditions affecting the general welfare, the President should, in any year, consider it inappropriate to make the compensation adjustments required by subsection (a) of this section, he shall prepare and transmit to Congress before September 1 of that year such alternative plan with respect to a compensation adjustment as he considers appropriate, together with the reasons therefor, in lieu of the compensation adjustment required by subsection (a) of this section.

"(2) An alternative plan transmitted by the President under paragraph (1) of this subsection becomes effective on October 1 of the applicable year and continues in effect unless, before the end of the first period of 30 calendar days of continuous session of Congress after the date on which the alternative plan is transmitted, Congress adopts and the President approves a joint resolution disapproving the alternative plan or, in the event the President returns the joint resolution to Congress with his objections, two-thirds of each House of Congress agree to pass and approve the joint resolution. Upon such a joint resolution becoming law, the compensation adjustment required by subsection (a) of this section shall be made in accordance with subsection (i) of this section. The continuity of a session is broken only by an adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the 30-day period.

"(h) The compensation adjustments which become effective under this section are applicable to each member of the uniformed services.

"(i) If a joint resolution disapproving an alternative plan becomes law as provided in subsection (g)(2) of this section, the President shall make the adjustments required by subsection (a) of this section, effective October 1 of that year.

"(j) The adjustment that takes effect under this section shall modify, supersede, or render inapplicable, as the case may be, to the extent inconsistent therewith—

"(1) all provisions of law enacted prior to the effective date or dates of all or part (as the case may be) of the adjustments; and

"(2) any prior recommendations or adjustments which took effect under this section or prior provisions of law.

"(k) The rates of pay that take effect under this section shall be printed in the Federal Register and the Code of Federal Regulations.".

EFFECTIVE DATES

SEC. 16. The amendments made by this Act shall be implemented at such times and in such phases as the President may determine, but shall be fully effective not later than 3 years after the date of enactment of this Act.

SECTION-BY-SECTION ANALYSIS

"To amend title 5, United States Code, to strengthen the principle of comparability as the basis for setting Federal pay and benefits, and for other purposes."

The first section titles the bill as the "Federal Pay Comparability Reform Act of 1981."

STATUTORY PAY SYSTEMS

Section 2 contains various amendments to subchapter I of chapter 53 of title 5, United States Code, designed to improve the method of fixing and adjusting rates of pay for employees covered by the General Schedule and the other statutory pay systems.

Paragraph (1) of section 2(a) amends section 5301 of title 5 to revise and restate the policy objectives under which pay will be fixed for the General Schedule and the other statutory pay systems.

Under subsection (a) of the amended section 5301, pay for General Schedule employees will be fixed in accordance with four principles:

The first principle continues the principle in current law that there be equal pay for substantially equal work, but modifies this principle to make clear that it will apply only within each local pay area, as pay will vary from area to area under the bill.

The second principle continues the principle in present law that pay distinctions be maintained in keeping with work and performance distinctions.

The third principle establishes the new comparability standard for pay fixing. General Schedule pay, when considered together with Federal employee benefits, will be fixed at a level of 94 percent of what non-Federal employers provide in pay and benefits for the same levels of work. This will replace the present provision of law under which the comparison is made on the basis of pay only, rather than pay and benefits together, and the comparison is made with private enterprise alone, rather than with the entire non-Federal sector, including State and local government.

The fourth principle is entirely new, and provides that General Schedule pay rates in the various pay areas will vary in proportion to the differences in non-Federal pay between those areas.

Under subsection (b) of the amended section 5301, pay rates for the other statutory pay systems—the Foreign Service pay system and the pay system for certain employees in the Department of Medicine and Surgery of the Veterans' Administration—will be fixed at a level comparable with national average General Schedule pay. There will not be any locality variations for these two pay systems.

Subsection (c) of the amended section 5301 provides that pay shall be fixed in accordance with the principles established in subsections (a) and (b) and the applicable provisions of the rest of the subchapters.

Subsection (d) restates the present definition of statutory pay systems as being the General Schedule, the Foreign Service pay schedule, and the pay schedules for certain employees in the Department of Medicine and Surgery of the Veterans' Administration. Subsection (d) also makes clear that Merit Pay System employees shall be included with General Schedule employees in the pay and benefits analysis and comparison, since their pay is tied to General Schedule pay by law.

Paragraph (2) of section 2(a) redesignates section 5305 as section 5302, and inserts the redesignated section after section 5301. The redesignated section is amended to require the pay agent's report to the President to compare General Schedule pay and benefits, rather than pay alone, with pay and benefits outside the Federal Government for the same levels of work. The comparison will be based on appropriate annual pay surveys and appropriate benefits surveys conducted by the Bureau of Labor Statistics, and on other sources of benefits information. Adjustments in pay rates for the statutory pay systems are to be based on the principles in section 5301(a)(1)–(3) and (b). (The locality pay principle in section 5301(a)(4) will not enter into this part of the pay fixing process.)

The membership of the Federal Employee Pay Council will be broadened to include such organizations as professional associations, as well as labor unions. The Pay Council will deal with the new issues presented by the inclusion of benefits in the comparison process, along with all the other issues the Council has dealt with in the past.

Paragraph (3) of section 2(a) replaces the present section 5303 with an entirely new section establishing locality pay rates for the General Schedule. The President will designate General Schedule pay areas and establish locality rates of pay for those areas. If he determines it is inappropriate to establish locality rates for a particular area (such as foreign countries) he can deem the national General Schedule rates established under section 5302 to be the locality rates for that area. The locality rates in each area will be determined by adjusting the national General Schedule rates established under section 5302 upward or downward to reflect the relationship between non-Federal rates of pay in the area and national non-Federal rates. The adjustment could be different for different grade levels. The pay agent, the Advisory Committee on Federal Pay and the Federal Employees Pay Council will all play a role in the process paralleling their roles in establishing the national General Schedule rates. Locality rates will apply to each General Schedule employee whose permanent duty station is in a pay area. The appropriate minimum and maximum locality rates will also be used as minimum and maximum rates for Merit Pay System employees whose permanent duty station is within the pay area. Locality rates will be effective on the same day as a pay adjustment under section 5302. The locality rates will be printed in the Federal Register, and will have the force and effect of law. An increase in locality pay will not be an equivalent increase for the purpose of determining within-grade increase eligibility later. The President or an agency designated by the President will prescribe conversion rules under which newly locality pay rates will be applied.

Paragraph (4) of section 2(a) replaces the present section 5304 with a new section similar to the present section 5303. It authorizes the establishment by the President of special rates of pay for the various General Schedule pay areas for one or more areas, grades, occupations, or subdivisions thereof, upon a finding by the President that the Government is experiencing significant difficulty in recruiting or retaining well-qualified individuals. Special rates will be able to exceed the maximum locality rate for a grade by no more than twice the amount by which the maximum exceeds the minimum locality rate for that grade. The President will establish rules for applying special rates to affected employees consistent insofar as possible with the normal pay administration rules for General Schedule and Merit Pay System employees. The President will review special rates annually and revise or abolish them if appropriate. Special rates will be printed in the Federal Register and have the force and effect of law. The President will be able to delegate authority granted by this section to the Director of the Office of Personnel Management.

Paragraph (5) of section 2(a) amends section 5306 to expand the role of the Advisory Committee on Federal Pay to include assisting the President in carrying out his responsibilities under the locality pay section, and in such other matters as he may request.

Section 3 of the bill amends the merit system principle in section 2301(b)(3) to replace "employers in the private sector" with "non-Federal employers," thereby conforming to earlier changes in the bill which broaden the comparison base.

Section 4 amends section 5332(a) to eliminate the obsolete table of pay rates and to describe the General Schedule by prescribing the number of grades and the number of rates of basic pay in each grade; to specify that the locality rates fixed under the amended section 5303 will be the General Schedule rates in each pay area; and to require the application of those rates to each employee with a permanent duty station in the pay area, except a merit pay employee.

Section 5 repeals section 5941 relating to allowances based on living costs and conditions of environment for employees stationed in Alaska, Hawaii, Puerto Rico, and U.S. territories and possessions.

Section 6 makes a conforming change to section 104 of title 3, section 5318 of title 5, section 461(a) of title 28, and section 601(a)(2) of the Legislative Reorganization Act of 1946 (2 U.S.C. 31), as amended, by striking out "section 5305" and inserting in lieu thereof "section 5302."

FEDERAL WAGE SYSTEM

Section 7(a) retitles subchapter IV of chapter 53 by striking out "PREVAILING

RATE" and inserting in lieu thereof "FEDERAL WAGE." This terminology change is made throughout subchapter IV by section 7 of the bill.

Section 7(a) also amends section 5341 to broaden the comparison base used in pay fixing to include all non-Federal employers and to alter the comparison standard used for appropriated fund Federal wage employees so that their pay will be comparable with 94 percent of non-Federal pay in the local wage area, when benefits for both groups are taken into account in the comparison.

The "Monroney Amendment" in section 5343(d) is eliminated by the bill, as are the current provisions of section 5343(e) on step rates, and the provisions of section 5343(f) establishing shift differentials and making night shift differential part of basic pay. The Office of Personnel Management will establish a step-rate structure and appropriate shift differentials.

A new section 5343(d) requires that, in any year in which an alternative plan goes into effect for employees under the statutory pay system, the Office of Personnel Management will develop and implement a plan to provide comparable treatment for Federal wage employees. Under section 8 of the bill this comparable treatment will also apply to certain Federal wage employees who are excluded from the regular Federal Wage System because they traditionally negotiate pay.

PRESIDENTIAL BENEFITS AUTHORITIES

Section 9 of the bill adds a new subchapter III to chapter 63 of title 5. This new subchapter authorizes the President to modify any provision of chapter 63 (which includes the provisions of law governing annual and sick leave and certain other kinds of leave) in order to make the Government's leave system more comparable with non-Federal leave programs and practices; to provide greater flexibility and freedom of choice to employees; or to improve the administration of the leave program. The President will be required to report to Congress on any changes he makes in the leave program under this new authority, and to publish notices in the Federal Register and the Code of Federal Regulations.

Section 10 of the bill amends chapter 87 of title 5 to authorize the President to change the contribution the Government makes to the cost of coverage under Federal Employees Group Life Insurance. At present, the Government contributes one-third of the cost of basic insurance, while the employee pays the remainder of the cost of basic insurance and the full cost of the various optional insurance coverages. This present Government contribution is preserved as a minimum, but the President will be able to modify the Government's contribution above this amount. Various technical and administrative provisions relating to this new Presidential authority are included in the bill.

Section 11 of the bill amends chapter 89 of title 5 to authorize the President to modify each year the Government's contribution to health benefits premiums for Federal employees, though here again the present contribution rate of 60 percent of the average premium, and not to exceed 75 percent of the premium for any plan, continues as a minimum below which the contribution cannot be reduced. Various technical and administrative provisions relating to this new authority are included.

SAVINGS PROVISIONS

Section 12 of the bill guarantees pay increases of at least two percent a year for the first five years after enactment for employees who might otherwise get less because of the implementation of the new comparability standard, locality pay for the General Schedule, and the changes in the Federal Wage System. Of course, whenever the implementation of the new provisions results in increases higher than two percent a year, those higher increases will be paid.

Section 13 protects persons now receiving cost-of-living allowances under section 5941 of title 5 (which is repealed by section 5 of the bill), by freezing the present dollar amount of allowance they are receiving and reducing it in the future only by one-half of any pay increases these individuals receive.

Section 14 of the bill prohibits the President from reducing or making less generous any provision of the Government's leave program for five years after the date of enactment of the bill.

UNIFORMED SERVICES PAY AMENDMENTS

Section 15 of the bill amends section 1009 of title 37, which currently provides for increasing military pay by the same percentage amount General Schedule pay is increased each year. As amended by the bill, section 1009 will instead link military pay increases only to the year-to-year change in non-Federal pay shown by the Bureau of Labor Statistics survey.

Section 15 also authorizes the President to propose an alternative adjustment for the military if he decides it would be appropriate because of national security considerations, national emergency, or economic conditions affecting the general welfare. The alternative plan for the military will become effective unless both Houses of Congress disapprove. If the President vetoes their disapproval, the alternative plan will become effective unless the President's veto is overruled by a two-thirds vote of both Houses.

EFFECTIVE DATES

Section 16 of the bill provides that the bill will be implemented at such times and in such phases as the President decides. All of the provisions will have to be fully implemented no later than three years after enactment.

U.S. OFFICE OF PERSONNEL MANAGEMENT.
Washington, D.C., March 24, 1981.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: The Office of Personnel Management submits herewith the enclosed legislative proposal, "To amend title 5, United States Code, to strengthen the principle of comparability as the basis for setting Federal pay and benefits, and for other purposes." We respectfully request that this proposal be referred to the appropriate committee for early consideration.

This proposal is submitted as a part of the President's program to eliminate unnecessary expenditures from the Federal budget. The proposal would rectify a number of long-standing flaws in the system by which compensation is determined for Federal employees, in order to ensure that Federal employment will be truly comparable with employment outside the Government. The provisions of the proposal are as follows:

PAY COMPARABILITY REVISIONS

The first part of the legislative proposal deals with the pay fixing process for the General Schedule and the other statutory pay systems. There would be three major changes in this process:

(1) the pay comparability standard would be revised to require the inclusion of employee benefits in the comparison process, and, in view of the differences between the Federal Government and non-Federal employers with regard to relevant conditions of employment (including such factors as job security, promotion potential, portability of benefits, etc.), to require Federal pay and benefits to be comparable with 94 percent of non-Federal pay and benefits;

(2) the comparison base would be broadened to include State and local government as well as the private sector; and

(3) General Schedule pay (but not the pay for the other statutory pay systems) would vary by locality, in keeping with the relationship between non-Federal pay in each locality and national average non-Federal pay.

The process would continue to involve the President, the Pay Agent, the Federal Employees Pay Council, and the Advisory Committee on Federal Pay, playing the same roles they now play, but with their scope expanded to deal with the new issues of locality pay and the inclusion of employee benefits in the comparison. The Pay Council would have its membership broadened to include employee organizations such as professional organizations, as well as unions. General Schedule employees would be paid locality rates unless they are in a location where the President decides to apply the national average General Schedule instead. (This might be done for employees assigned to foreign areas, for example.)

The existing special rate authority for the General Schedule would be broadened and made more flexible. Special rates could be established whenever necessary to recruit or retain well-qualified employees in an area, an occupation, or any subdivision thereof. A special rate could not exceed the maximum rate of the regular rate range by more than twice the amount of the regular rate range.

With the new flexibilities provided by locality pay and the broader special rate authority, the authority for cost-of-living allowances in Alaska, Hawaii, Puerto Rico, and U.S. territories and possessions will no longer be necessary and would be repealed.

FEDERAL WAGE SYSTEM REVISIONS

The second portion of the legislative proposal deals with the Federal Wage System.

First, the pay fixing process for Federal wage employees would be revised to parallel the changes made by the first part of the proposal for General Schedule employees. The comparison standard would be broadened to include employee benefits, and to require Federal pay and benefits to be comparable to 94 percent of non-Federal pay and benefits, and the comparison base would be broadened to include State and local government. (The change in the comparison standard would not apply to nonappropriated fund employees.) Further, whenever the President decides that national emergency or economic conditions affecting the general welfare make it necessary to invoke an alternative plan for General Schedule employees, the Office of Personnel Management would be required to impose a comparable limitation on Federal Wage System employees. Such a limitation would apply to appropriated fund and nonappropriated fund employees, to crews of vessels, and to certain groups of Federal wage employees who have traditionally negotiated their wage schedules.

Second, the legislative proposal would repeal certain existing provisions of law which now require that Federal wage employees be paid more than their counterparts outside the Federal Government. These aberrant provisions of current law are a provision requiring the use of out-of-area wage rates in certain situations (the "Monroney Amendment"); provisions establishing rate ranges and fixing the relationship between those rate ranges and the prevailing wage; and provisions fixing in law shift differentials and making those differentials part of basic pay. Under the proposal, rate ranges and shift differentials would be fixed in accordance with prevailing non-Federal practices.

RESIDENTIAL BENEFITS AUTHORITIES

The third part of the legislative proposal would give the President a new authority to adjust certain Federal employee benefit pro-

grams. These adjustments would be made in concert with the process by which employee benefits are taken into consideration in the setting of Federal pay.

First, the President would be authorized to modify the leave program for Federal employees, including sick and annual leave and certain other forms of leave. He could exercise this authority in order to make the Federal leave program more consistent with non-Federal leave programs, to broaden flexibility and employee freedom of choice in the program, or to improve the administration of the program.

Second, the President would be authorized to modify the Government contributions to the cost of Federal Employees Group Life Insurance, although the present Government contribution of one-third of the cost of basic insurance would be fixed as the minimum possible Government contribution.

Third, the President would be authorized to change the Government contributions to premiums under the Federal Employees Health Benefits program. Here again, the present Government contribution would be fixed as the minimum possible.

SAVINGS PROVISIONS

The proposal includes savings provisions for employees who might otherwise be adversely affected.

First, employees would be guaranteed that pay schedules would go up at least two percent a year for the first five years, despite the changes in the comparison standard and the comparison base, the repeal of the Monroney Amendment, etc. Of course, it is expected that most employees would get considerably more than this minimum.

Second, employees now receiving cost-of-living allowances in Alaska, Hawaii, etc., would not suffer any cut in the amount of allowance they are now receiving, but the allowances would be reduced in the future by one-half of any other pay increases the employees receive.

UNIFORMED SERVICES PAY AMENDMENTS

Because it is not the intention of the legislative proposal to apply the change in the comparability standard to the uniformed services, the legislative proposal would amend the provision of law now linking military pay adjustments to the General Schedule to instead provide that military pay would be increased each October by the amount of the increase in non-Federal pay. In addition, the President would be authorized to provide an alternative adjustment, subject to Congressional review, if he decided that national security conditions, national emergency, or economic conditions affecting the general welfare made such an alternative appropriate.

EFFECTIVE DATE

Finally, the legislative proposal would authorize the President to phase the provisions of the bill into effect over the three years following enactment.

It is estimated that the enactment of this proposal would reduce payroll costs in fiscal year 1982 about $3.7 billion below the costs that would be incurred under operation of present law. Savings in future years would be even greater.

The Office of Management and Budget advises that enactment of this proposal would be in accord with the program of the President.

A similar letter is being sent to the President of the Senate.

Sincerely yours,

DONALD J. DEVINE,
Director.●

By Mr. DOLE (for himself and Mr. DANFORTH):

S. 839. A bill to amend the Bankruptcy Act regarding farm produce storage facilities, and for other purposes; to the Committee on the Judiciary.

GRAIN ELEVATOR BANKRUPTCY LEGISLATION

● Mr. DOLE. Mr. President, today I am pleased to introduce, on behalf of myself and Senator DANFORTH, a bill which provides for certain amendments to the Bankruptcy Reform Act of 1978, as well as amendments to title VII, chapter 10 of the United States Code, which deals with agricultural warehouse licensing and operations.

The amendments set forth in this bill are designed to alleviate the hardships created for farm producers when a commodity warehouse in which their crops are stored file: a petition in bankruptcy.

Over the past few years, in several States and with increasing frequency, Midwestern farmers have suffered from the unexpected insolvency of grain elevators holding vast quantities of crops belonging to those farm producers. Farmers in Missouri, Kansas, Indiana, Iowa, Nebraska, Illinois, and Arkansas have seen thousands of bushels of grain, soybeans, and other cash crops tied up in grain elevator bankruptcy proceedings under circumstances making it difficult, if not impossible, for those farmers to recover their crops, owned by them, which had been deposited with those elevators on storage contracts under which the producers retained title to the crop.

Now, the reasons why farmers have had trouble obtaining possession of their crops from the bankruptcy courts are numerous and complex. There are difficulties in establishing ownership interests in the crops, as between "storage contract" crops owned by the farmers and "sales contract" crops owned by the elevators. The advent of delayed pricing agreements have complicated the relationship between the farmer and the warehouseman. In addition, there are problems of distribution, as between farmers who own grain and creditors who have taken a secured interest in grain owned by the elevator. The distribution problems are made worse when, as is frequently the case, there is a shortage of crops on hand. Usually, where there is a shortage the farmer who has sold grain to a bankrupt warehouse, but who has not received payment for his crop becomes simply an unsecured creditor in the bankruptcy proceedings.

Faced with these conflicting pressures, bankruptcy courts are frequently slow to respond to the need of farmers for quick resolution of legitimate conflicts surrounding ownership of grain assets, and rapid distribution of those grain assets to those farm producers who have retained ownership. As well, the secured creditor suffers from possible deterioration in the value of its collateral. These problems have most recently been demonstrated in the failure of several grain elevators in Missouri and Arkansas which failures have adversely affected farmers in Kansas as well.

In consideration of these problems, this bill provides for one uniform, expedited procedure for abandonment of grain assets in a proceeding filed by an insolvent commodity warehouse; the granting of a statutory lien to farm producers on crops delivered to a warehouse upon a sales contract for which the producer has not been paid; and the granting of a priority position to farm producers in any distribution of assets to unsecured creditors.

This bill establishes strict timetables within which the bankruptcy court will be required to take systematic steps to accomplish the following: First, to identify those farm producers who have crops in storage with a commodity warehouse in bankruptcy, as well as those parties which have secured interests in crops on hand in such warehouses; second, to audit the assets of the elevator to determine the extent of crops available for distribution to those producers and secured creditors to release to them crops which are not part of the bankruptcy estate, as well as those crops in which the estate has no equity interest; and third, to distribute those crops or the proceeds thereof to those parties.

This bill would require the trustee to commence distribution of crop assets ordered abandoned by the court within 80 days of the filing of the petition in bankruptcy, unless the court granted additional time upon a proper showing of need. The objective is to discourage delays in effecting distribution of grain assets. This objective is also served by provisions included in the bill imposing certain burdens upon any party requesting a stay of the abandonment orders.

The method of distribution employed is two-tiered. First, there is a pro rata distribution of grain or proceeds of grain to producers who have stored crops with the warehouseman without transfer of title. Since these crops would not be part of the bankruptcy estate, these "bailment" producers should not suffer any diminution in their share of the crop assets at the hands of secured creditors. After this first distribution—which may be in specie or in kind, as the court may direct—the trustee is required to liquidate any remaining crop assets and divide the proceeds, pro rata, among the secured creditors. By amendment to title 7 creating a statutory lien in favor of "sale contract" farmers who have not been paid, these producers would be included in this group.

Finally, those farm producers who still have an unsatisfied claim against the debtor warehouseman after the distribution of crop assets required by this bill would receive a priority position in any distribution of remaining assets to unsecured creditors. Thus, if a shortage of grain leaves both storage contract producers and sale contract producers with a loss, they may yet recover the deficiency in the distribution of proceeds of any remaining assets by the trustee, by simply filing a claim for the loss.

The provisions of the bill we are introducing, insofar as they might conflict with other provisions of the Code, will take precedence. However, we feel that the bill is conceptually and organizationally consistent with other provisions of the Code.

The bill will not prevent farmers from suffering losses, on occasion, as a result of mismanagement or fraud on the part of the warehouseman, but we do believe that it will help prevent any such losses from being compounded by inaction in the bankruptcy court.

Mr. President, as chairman of the Judiciary Committee's Subcommittee on Courts, I have scheduled hearings to convene on Friday, April 3, and again on Monday, April 6, to hear testimony concerning problems besetting creditors under the Bankruptcy Reform Act of 1978. In addition, the subcommittee has set aside the morning and early afternoon of the 6th to hear testimony from Senators, Congressmen, administration officials, State agricultural experts, and farm groups upon the problems created for farmers and farm programs by elevator insolvencies. Our witnesses have been requested to direct attention to the provisions of this bill and offer any suggestions they may have to improve our legislative effort in this area. I believe these hearings will be valuable and instructive on the problems farmers face in these situations.

The Department of Agriculture estimates there are approximately 10,000 commodity warehouses in the United States. Out of that group, only slightly more than 1 percent have had financial problems. Thus, the vast majority of elevator operators in this country are persons of integrity who adhere to sound business practice. Almost all maintain a close working relationship with the farmers in their communities, and their services are a vitally important part of the success story of American agriculture. This bill is intended to deal with the hardships created for the farmer by that 1 percent that experience financial difficulty, and minimize the disruption of producer and market operations that inevitably occurs when a local elevator fails.●

By Mr. STAFFORD (for himself, Mr. SYMMS, Mr. PACKWOOD, and Mr. DOLE) (by request):

S. 841. A bill to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, to amend the Highway Safety Act of 1966 to authorize appropriations, and for other purposes; to the Committee on Commerce, Science, and Transportation, the Committee on Environment and Public Works and the Committee on Finance, by unanimous consent referred to the Committee on Environment and Public Works for consideration of title I; to the Committee on Commerce, Science, and Transportation for consideration of title II; and to the Committee on Finance for consideration of title III.

FEDERAL AID HIGHWAY ACT OF 1981

Mr. STAFFORD. Mr. President, the administration has submitted proposed legislation to authorize appropriations for the construction of highways in accordance with title 23 of the United States Code, to amend the Highway Safety Act of 1966, and to extend the Highway Trust Fund, established by the Highway Revenue Act of 1956.

I am pleased to introduce this legislation today by request and ask unanimous consent that it be held at the desk until close of business today for the purpose of the leaderships clearing its joint referral.

Mr. President, the Committee on Environment and Public Works, on which I serve as chairman, will undertake an extensive review of the highway program this year. This legislation proposed by the administration will provide the basis for beginning this important discussion.

Mr. President, I ask unanimous consent that a letter signed by myself and Senator RANDOLPH for the Committee on Environment and Public Works, by Senators PACKWOOD and CANNON of the Committee on Commerce, Science and Transportation; and Senators DOLE and LONG of the Committee on Finance be made a part of the RECORD; that the bill be printed at this point, and that a summary of the legislation and a section-by-section analysis done by the Department of Transportation be printed in the RECORD with the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 841

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I

SHORT TITLE

SEC. 101. This title may be cited as the "Federal-Aid Highway Act of 1981".

REVISION OF AUTHORIZATION FOR APPROPRIATIONS FOR THE INTERSTATE SYSTEM

SEC. 102. (a) Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of $3,200,000,000 for the fiscal year ending September 30, 1983," and all that follows through the period at the end of the sentence and by inserting in lieu thereof the following: "the additional sum of $3,300,000,000 for the fiscal year ending September 30, 1983, the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1984, the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1985, the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1986, the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1987, the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1988, the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1989, and the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1990."

(b) Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is further amended by adding at the end thereof the following:

"Effective October 1, 1981, the obligation of funds authorized by this subsection, except for Advance Construction Interstate projects approved before October 1, 1981, shall be limited to the construction necessary to provide a minimum level of acceptable service on the Interstate which shall consist of (1) full access control; (2) a payment design to accommodate the types of volumes of traffic anticipated for the 20-year period from date of authorization of the initial basic construction contract; and (3) a design of not less than nor more than four lanes in rural areas and all urban and urbanized areas under 400,000 population, and up to six lanes in urbanized areas over 400,000 population as shown in the 1980 Federal census. The obligation of funds authorized by this subsection shall be further limited to the actual costs of only those design concepts, locations, geometrics, and other construction features included in the 1981 Interstate Cost Estimate.".

(c) Section 104(b)(5)(A) of title 23, United States Code, is amended by adding at the end thereof the following new sentence: "Notwithstanding any other provisions of this subparagraph, the Secretary in making the revised estimate of the cost of completing the then designated Interstate System for the purpose of transmitting it to the Senate and House of Representatives within 10 days subsequent to January 2, 1983, or thereafter, shall include only those costs eligible for funds authorized by subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, and as further amended by section 102(b) of the Federal-Aid Highway Act of 1981.".

(d) The Secretary of Transportation is authorized to examine all segments of the Interstate System which have not progressed to the physical construction phase of project development to identify those routes which (1) are not essential to the completion of a unified and connected Interstate System, (2) are not considered cost effective from a transportation standpoint, or (3) have the potential for extensive environmental disruption. The Secretary may withdraw his approval of any routes thus identified under the provisions of 23 U.S.C. 103(e)(4) or 103(f), as appropriate, A route withdrawn under this subsection on or before September 30, 1983 and otherwise eligible for withdrawal under 23 U.S.C. 103(e)(4) shall be eligible for the same benefits as a route withdrawn under 23 U.S.C. 103(e)(4).

AUTHORIZATION OF USE OF COST ESTIMATES FOR APPORTIONMENT OF INTERSTATE FUNDS

SEC. 103. The Secretary of Transportation shall apportion for the fiscal years ending September 30, 1983, and September 30, 1984, the sums authorized to be appropriated for such periods by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, for expenditures on the National System of Interstate and Defense Highways, using the apportionment factors contained in table ——— of Committee Print ——— of the Committee on Public Works and Transportation of the House of Representatives.

HIGHWAY AND SAFETY AUTHORIZATIONS

SEC. 104. (a) For the purpose of carrying out the following provisions of title 23, United States Code, the following sums are authorized to be appropriated out of the Highway Trust Fund:

(1) For the Federal-aid primary system in rural areas including the extensions of the Federal-aid primary system in urban areas, $1,500,000,000 for the fiscal year ending September 30, 1982, $1,700,000,000 for the fiscal year ending September 30, 1983, $1,800,000,000 for the fiscal year ending September 30, 1984, $1,800,000,000 for the fiscal year ending September 30, 1985, and $1,800,000,000 for the fiscal year ending September 30, 1986: *Provided*, That for each of the fiscal years 1982, 1983, 1984, 1985, and 1986, the States of Alaska and Puerto Rico shall each receive $10,000,000 from the primary system authorizations after the other deductions required by title 23, United States Code, and before the apportionment of the remainder of said authorizations under section 104(b)(1) of title 23, United States Code. Such amounts shall be used by such States to maintain their respective major arterials at a higher level of service and shall be subject to the provisions of chapter I of title 23, United States Code, as if they were apportioned primary funds. For the Federal-aid secondary system in rural areas, $700,000,000 for the fiscal year ending September 30, 1982, and $300,000,000 for the fiscal year ending September 30, 1983

(2) For the Federal-aid urban system, $900,000,000 for the fiscal year ending September 30, 1982, and $500,000,000 for the fiscal year ending September 30, 1983.

(3) For forest highways, $34,000,000 per fiscal year for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986.

(4) For public lands highways, $16,000,000 per fiscal year for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986.

(5) For bridge replacement and rehabilitation under section 144 of title 23, United States Code, $900,000,000 for the fiscal year ending September 30, 1982, $1,200,000,000 for the fiscal year ending September 30, 1983, $1,400,000,000 for the fiscal year ending September 30, 1984, $1,400,000,000 for the fiscal year ending September 30, 1985, and $1,400,000,000 for the fiscal year ending September 30, 1986.

(b)(1) The first sentence of subsection (a)(1) of section 104 of the Federal-Aid Highway Act of 1978 is amended by striking out "$1,800,000,000 for the fiscal year ending September 30, 1981, and $1,500,000,000 for the fiscal year ending September 30, 1982." and inserting in lieu thereof "and $1,800,000,000 for the fiscal year ending September 30, 1981."

(2) The last sentence of subsection (a)(1) of such section 104 is amended by striking out "$600,000,000 for the fiscal year ending September 30, 1981, and $400,000,000 for the fiscal year ending September 30, 1982." and inserting in lieu thereof "and $600,000,000 for the fiscal year ending September 30, 1981."

(3) Paragraphs (2), (3), (4), (5), (6), (7), (8), (9), (10), (17), and (18) of such section 104(a) are amended by striking out "September 30, 1981, and September 30, 1982." where it appears in each paragraph and inserting in lieu thereof "and September 30, 1981.".

(4)(A) Paragraph (15) of such section 104(a) is amended by striking out "September 30, 1981, and September 30, 1982," and inserting in lieu thereof "and September 30, 1981,".

(B) The unobligated balance of contract authority established in paragraph (15) of such section 104(a) shall lapse September 30, 1981.

(c) Section 104(b)(1) of the Federal-Aid Highway Act of 1978 is amended by striking out "1982, and 1983," in the first sentence and inserting in lieu thereof "and 1982," and by striking out "September 30, 1982, and September 30, 1983." in the last sentence and inserting in lieu thereof "and September 30, 1982."

(d)(1) Paragraph (3) of section 202 of the Highway Safety Act of 1978 is amended by striking out "September 30, 1981, and September 30, 1982." and inserting in lieu thereof "and September 30, 1981.".

(2) The unobligated balance of contract authority established in paragraph (3) of such section 202 shall lapse September 30, 1981.

(3) Paragraph (6) of such section 202 is amended by striking out "$1,300,000,000 for the fiscal year ending September 30, 1981, and $900,000,000 for the fiscal year ending September 30, 1982." and inserting in lieu thereof "and $1,300,000,000 for the fiscal year ending September 30, 1981."

(4) Paragraph (8) of such section 202 is amended by striking out "$150,000,000 for the fiscal year ending September 30, 1981, and $200,000,000 for the fiscal year ending September 30, 1982." and inserting in lieu thereof "and $150,000,000 for the fiscal year ending September 30, 1981.".

(e) Section 203(b) of the Highway Safety Act of 1973, as amended by section 203(a) of the Highway Safety Act of 1978, is amended by striking out "September 30, 1981, and September 30, 1982." and inserting in lieu thereof "and September 30, 1981.".

(f) Section 163 of the Federal-Aid Highway Act of 1973, as amended by section 134(c) of the Federal-Aid Highway Act of 1978, is further amended by striking out "$100,000,000 for the fiscal year ending September 30, 1981, and $100,000,000 for the fiscal year ending September 30, 1982, except that" and inserting in lieu thereof "and $100,000,000 for the fiscal year ending September 30, 1981, except that".

(g) Section 141(i) of the Federal-Aid Highway Act of 1978 is amended by striking out "September 30, 1981, and September 30, 1982," and inserting in lieu thereof "and September 30, 1981,".

(h) Subsection (g) of section 144 of title 23, United States Code, is amended by striking the first, second, third and fourth sentences and inserting in lieu thereof the following:

"Of the amount authorized per fiscal year, for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986, all but $200,000,000 for fiscal year 1982, and $300,000,000 for fiscal years 1983, 1984, 1985, and 1986, shall be apportioned as provided in subsection (e) of this section. $200,000,000 for fiscal year 1982, and $300,000,000 per fiscal year for fiscal years 1983, 1984, 1985, and 1986, of the amount authorized shall be available for obligation on the date of each such apportionment in the same manner and to the same extent as the sums apportioned on such date except that the obligation of such sums shall be at the discretion of the Secretary and shall be only for projects for those highway bridges the replacement and rehabilitation cost of each of which is more than $10,000,000 and for any project for a highway bridge replacement or rehabilitation cost of which is less than $10,000,000 if such cost is at least twice the amount apportioned to the State in which such bridge is located under subsection (e) of this section for the fiscal year in which application is made for a grant for such bridge. Funds authorized to carry out this section and allocated by the Secretary shall be available for expenditure for one year plus the year of allocation. Any funds not obligated at the end of such period shall revert back to the Secretary for allocation at his discretion to the other States in accordance with this subsection. Not less than 15 per centum nor more than 35 per centum of the amount apportioned to each State in a fiscal year shall be expended for projects to replace or rehabilitate highway bridges located on public roads, other than those on a Federal-aid system."

INTERSTATE SYSTEM RESURFACING APPORTIONMENT

SEC. 105. (a) Section 104(b)(5)(B) of title 23, United States Code, is amended to read as follows:

"(B) For resurfacing, restoring, rehabilitating, and reconstructing the Interstate System:

Fifty per centum in the ratio that lane miles on the Interstate routes designated under section 103 of this title (other than those on toll roads) in each State bears to the total of all such lane miles in all States; and fifty per centum in the ratio that vehicle miles traveled on lanes on the Interstate routes designated under section 103 of this title (other than those on toll roads) in each State bears to the total of all such vehicle miles in all States. Notwithstanding the preceding sentence, no State excluding any State that has no Interstate lane miles shall receive less than ½ of 1 per centum of the total apportionment made by this subparagraph for any fiscal year.".

(b) The amendments made by this section are effective October 1, 1981.

INTERSTATE SYSTEM RESURFACING AUTHORIZATION

SEC. 106. (a) Section 105 of the Federal-Aid Highway Act of 1978 is amended to read as follows:

"In addition to any other funds authorized to be appropriated, there is authorized to be appropriated out of the Highway Trust Fund, not to exceed $175,000,000 per fiscal year for each of the fiscal years ending September 30, 1980 and September 30, 1981, not to exceed $275,000,000 for the fiscal year ending September 30, 1982, not to exceed $800,000,000 for the fiscal year ending September 30, 1983, not to exceed $1,300,000,000 for the fiscal year ending September 30, 1984, not to exceed $2,000,000,000 for the fiscal year ending September 30, 1985, not to exceed $2,100,000,000 for the fiscal year ending September 30, 1986, and not to exceed $2,700,000,000 for the fiscal year ending September 30, 1987. Such sums shall be obligated for projects for resurfacing, restoring, rehabilitating, and reconstructing those portions of the Interstate System designated under section 103 of title 23, United States Code, which are not on toll roads."

(b) The amendments made by subsection (a) of this section are effective October 1, 1981.

INTERSTATE SYSTEM RESURFACING

SEC. 107. (a) Section 119(a) of title 23, United States Code, is amended by striking out the words "and rehabilitating" and by inserting in lieu thereof the words "rehabilitating, and recontructing" and by striking out the words "those lanes in use for more than five years on the Interstate System (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978)." and inserting in lieu thereof the words "routes of the Interstate System designated under section 103 of title 23, United States Code, which are not toll roads.".

(b) The amendments made by subsection (a) of this section are effective October 1, 1981.

INTERSTATE SYSTEM RESURFACING—FEDERAL SHARE

SEC. 108. Subsection (a) of section 119 of title 23, United States Code, is amended by adding at the end thereof the following: "Effective October 1, 1981, the Federal share for projects financed by funds apportioned under 23 U.S.C. 104(b)(5)(B) for resurfacing, restoring, rehabilitating and reconstructing routes of the Interstate System designated under section 103 of this title and which are not toll roads shall be that set forth in section 120(c) of this title.".

INTERSTATE SUBSTITUTION

SEC. 109. Section 103(e)(4) of title 23, United States Code, is amended by:

(a) striking the fourth sentence and inserting in lieu thereof the following: "Sums authorized for substitute projects shall be available for obligation when appropriated.";

(b) striking the eighth sentence and inserting in lieu thereof the following: "Notwithstanding any other provision of law, for highway projects aproved on or after the date of enactment of the Federal-Aid Highway Act of 1981, there are authorized to be appropriated out of the Highway Trust Fund for liquidation of the obligations incurred under this paragraph such sums as may be necessary. Appropriations for public mass transit projects substituted pursuant to this paragraph are authorized under section 4(g) of the Urban Mass Transportation Act of 1964, as amended.";

(c) inserting after the present ninth sentence the following:

"An amount equal to such reduction shall remain available to the Secretary for reallocation to any other State in accordance with the provisions of the third sentence of section 118(b) of this title.";

(d) adding at the end of such subsection the following:

"Any route or segment thereof added to the Interstate System after March 7, 1978, pursuant to specific legislation will not be

eligible for withdrawal and substitution under this subsection.".

HOLD HARMLESS—INTERSTATE RESURFACING

SEC. 110. The amount a State, excluding any State that has no Interstate mileage, receives by apportionment on October 1, 1981, under 23 U.S.C. 104(b)(5)(B) shall be sufficient to assure that its total apportionments under 23 U.S.C. 104(b)(5) are not less than the apportionments which would have been made on October 1, 1981, to such State under 23 U.S.C. 104(b)(5) under the law as it is before the enactment of this Act.

INTERSTATE DISCRETIONARY FUND

SEC. 111. (a) Subsection (b) of section 118 of title 23, United States Code, is amended by striking the word "must" in the third sentence and inserting in lieu thereof the word "may" and by adding a new sentence immediately after the third sentence as follows: "In allocating funds under this paragraph the Secretary will give high priority to Interstate projects of unusually high cost in relation to a State's apportionment, to projects which directly contribute to the completion of an Interstate segment which is not open to traffic and to projects in States whose apportionment is less than ½ percent of the total apportionment for the Interstate System under section 104(b)(5)(A) of this title at the time of application for these funds by the State.".

(b) For each of the fiscal years 1983, 1984, 1985, 1986, and 1987, $125,000,000 shall be set aside from the Interstate System Authorizations provided by subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, before such authorizations are apportioned pursuant to 23 U.S.C. 104(b)(5)(A). Such $125,000,000 shall be available to the Secretary for allocation to any State in accordance with the Interstate Discretionary Fund provisions of 23 U.S.C. 118(b).

PRIMARY PROGRAM

SEC. 112(a). The first sentence of subsection (b)(1) of section 104 of title 23, United States Code, is amended by striking out "and priority primary routes".

(b) The first sentence of subsection (c) of section 104 of the Federal-Aid Highway Act of 1978 is amended by striking out "September 30, 1981, and September 30, 1982," and inserting in lieu thereof the following: "and September 30, 1981,".

(c) Section 147 of title 23, United States Code, is repealed.

(d) The analysis of chapter 1 of title 23 is amended by deleting

"147. Priority Primary Routes.",

and inserting in lieu thereof

"147. Repealed.".

HIGHWAY BRIDGE REPLACEMENT AND REHABILITATION PROGRAM APPORTIONED FUNDS

SEC. 113(a). Subsection (e) of section 144 of title 23, United States Code, is amended to read as follows:

"(e) Funds authorized to carry out this section shall be apportioned among the several States on October 1 of the fiscal year for which authorized according to the following formula:

"All deficient bridges will be divided into four categories: (1) Federal-aid system bridges eligible for replacement, (2) Federal-aid system bridges eligible for rehabilitation, (3) Off-system bridges eligible for replacement, and (4) Off-system bridges eligible for rehabilitation. The square footage of deficient bridges in each category shall be multiplied by its respective unit price on a State-by-State basis; and the total cost in each State divided by the total cost of the nation's deficient bridges shall yield the apportionment factors. No State shall receive more than 8 percent or less than 0.25 percent of the total apportionment for any one fiscal year. The Secretary shall make these determinations based upon the latest available data, which shall be updated annually. Funds authorized to carry out this section which are apportioned under this section shall be available for expenditure for one year after the close of the fiscal year for which they are authorized. Any funds not obligated at the expiration of such period shall be reapportioned by the Secretary to the other States in accordance with the latest apportionment factors developed under this section.".

EMERGENCY RELIEF

SEC. 114. (a) Subsection (a) of section 125 of title 23, United States Code, is amended by inserting in the second sentence after the word "appropriated" the words "from the Highway Trust Fund"; by striking the colon in the second sentence and inserting in lieu thereof a period; by deleting "(1)" after the colon in the second sentence; by striking the comma after the words "in such years", inserting in lieu thereof a period, and striking the remainder of the sentence.

(b) Notwithstanding any other provision of law, all expenditures made under 23 U.S.C. 125 prior to the fiscal year ending September 30, 1978, are authorized to be appropriated from the Highway Trust Fund.

(c) Subsection (a) of section 125 of title 23, United States Code, is amended by inserting in the second sentence after the words "after September 30, 1976," the words "and not more than $150,000,000 is authorized to be expended in any one fiscal year commencing after September 30, 1980,".

(d) Subsection (b) of section 125 of title 23, United States Code, is amended by striking the period at the end of the first sentence, inserting a colon in lieu thereof, and by adding the following:

"*Provided*, That obligations for projects under this section, including those on highways, roads, and trails mentioned in subsection (d) of this section, resulting from a single natural disaster or a single catastrophic failure shall not exceed $30,000,000 in any State.".

(e) The amendments made by subsection (d) of this section shall apply to natural disasters or catastrophic failures which the Secretary finds eligible for emergency relief subsequent to the date of enactment of this section.

(f) Subsection (f) of section 120 of title 23, United States Code, is amended to read as follows:

"(f) The Federal share payable on account of any repair or reconstruction provided for by funds made available under section 125 of this title shall not exceed 75 per centum of the cost thereof: *Provided*, That the Federal share payable on account of any repair or reconstruction of forest highways, forest development roads and trails, park roads and trails, parkways, public lands highways, public lands development roads and trails, and Indian reservation roads may amount to 100 per centum of the cost thereof. The Federal share payable shall be based on the cost of repair of a comparable facility. As used in this section with respect to bridges and in section 144 of this title, "a comparable facility" shall mean a facility which meets the current geomethics and construction standards required for the types and volume of traffic which such facility will carry over its design life."

(g) All obligations for projects resulting from a natural disaster or catastrophic failure which the Secretary finds to be eligible for emergency relief subsequent to the date of enactment of this subsection shall provide for the Federal share required by subsection (f) of section 120 of title 23, United States Code, as amended by this section.

NONDISCRIMINATION

SEC. 115. (a) The first and third sentences of subsection (a) of section 140 of title 23, United States Code, are amended by striking the words "or national origin" and inserting in lieu thereof the words "national origin or sex".

(b) Section 140 of title 23, United States Code, is amended by adding new subsection (c) as follows:

"(c) The Secretary, in cooperation with any other department or agency of the Government, State agency, authority, association, institution, corporation (profit or nonprofit), or any other organization or person, is authorized to develop, conduct, and administer training programs and assistance programs in connection with any program under this title in order that minority businesses may achieve proficiency to compete, on an equal basis, for contracts and subcontracts. Whenever apportionments are made under subsection 104(b) of this title, the Secretary shall deduct such sums as he may deem necessary, not to exceed $10,000,000 per fiscal year, for the administration of this subsection. The provisions of section 3709 of the Revised Statute, as amended (41 U.S.C. 5), shall not be applicable to contracts and agreements made under the authority herein granted to the Secretary notwithstanding the provisions of 41 U.S.C. 252(e).".

(c) The title of section 140 of title 23, United States Code, is amended to read:

"SEC. 140. Nondiscrimination."

and the analysis of chapter 1 of title 23, United States Code, is amended by striking out

"SEC. 140. Equal employment opportunity."

and inserting in lieu thereof

"SEC. 140. Nondiscrimination."

ALLOCATION OF URBAN FUNDS

SEC. 116. Section 150 of title 23, United States Code, is amended by adding the following sentence at the end thereof: "Funds allocated to an urbanized area under the provisions of this section may, at the request of the Governor and upon approval of the local officials of the area and the Secretary, be transferred to the allocation of another such area in the State or to the State for use in any urban area.".

DEFENSE ACCESS ROAD

SEC. 117. Section 210(c) of title 23, United States Code, is amended by striking "Not exceeding $5,000,000 of any funds appropriated under the Act approved October 16, 1951 (65 Stat. 422)," and inserting in lieu thereof "Funds appropriated for defense maneuvers and exercises".

MAINTENANCE

SEC. 118. (a) The second sentence of subsection (c) of section 116 of title 23, United States Code, is amended to read as follows: "If, within ninety days after receipt of such notice, such project has not been put in proper condition of maintenance, the Secretary shall withhold approval of further projects of all types in the State highway district, municipality, county, other political or administrative subdivision of the State, or the entire State, in which such project shall be located, as he deems most appropriate until such project shall have been put in proper condition of maintenance.".

(b) Section 109 of title 23, United States Code, is amended by striking subsection (m) and by relettering subsection (n) as subsection (m).

(c) Section 116 of title 23, United States Code, is amended by adding subsection (f) as follows:

"(f) The Secretary shall issue guidelines describing the criteria applicable to the Interstate System in order to insure that the condition of these routes is maintained at the

level required by the purposes for which they were designed.".

(d) Section 119 of title 23, United States Code, is amended by striking subsection (b) and by striking "(a)" immediately following "Section 119".

(e) Section 116 of title 23, United States Code, is amended by adding subsection (g) as follows:

"(g) Not later than one year after the date of issuance of initial guidelines under subsection (f) of this section each State shall have a program for the Interstate System in accordance with such guidelines. Each State shall certify on January 1 of each year that it has such a program and the Interstate System is maintained in accordance with the program. If a State fails to certify as required or if the Secretary determines a State is not adequately maintaining the Interstate System in accordance with such program, the next apportionment of funds to such State for the Interstate System shall be reduced by amounts equal to 10 per centum of the amount which would otherwise be apportioned to such State under section 104 of this title. If, within one year from the date the apportionment for a State is reduced under this subsection, the Secretary determines that such State is maintaining the Interstate System in accordance with the guidelines the apportionment of such State shall be increased by an amount equal to the reduction. If the Secretary does not make such a determination within such one year period, the amount withheld shall be reapportioned to all other eligible States.".

CERTIFICATION ACCEPTANCE

SEC. 119(a) Subsection 117(a) of title 23, United States Code, is amended by striking out "projects on Federal-aid systems, except the Interstate System," and inserting in lieu thereof "Federal-aid projects on systems other than the Interstate System" and by adding at the end thereof the following new sentence: "Notwithstanding the above, the Secretary may discharge any of his responsibilities under this title relative to the physical construction phase of Interstate resurfacing, restoration, rehabilitation, and reconstruction projects using the procedures of this section.".

(b) Subsection 117(b) is amended by striking out "make a final inspection of each such project upon its" and inserting in lieu thereof "establish procedures for the inspection of such projects upon".

(c) Subsection 117(f)(1) is amended by striking out the words "the Federal-aid secondary system," when they first appear and inserting in lieu thereof "projects, as defined by the Secretary and which are not on the Interstate System," and by striking out "all projects on the Federal-aid secondary system" and inserting in lieu thereof "such projects".

(d) Subsection 117(f)(3) is revised to read as follows:

"Paragraphs (1) and (2) of this subsection shall not be construed to relieve the Secretary of his obligation to establish procedures for the inspection of such projects upon completion and to require an adequate report of the estimated and actual cost of construction as well as other information as he determines necessary.".

(e) Subsection 105(b) of title 23, United States Code, is amended by striking out "projects on the Federal-aid secondary system" and inserting in lieu thereof "projects, as defined by the Secretary and which are not on the Interstate System except for the construction phase of Interstate resurfacing, restoration, rehabilitation, and reconstruction projects".

(f) Subsection 106(b) of title 23, United States Code, is amended to read as follows:

"In addition to the approval required under subsection (a) of this section, proposed specifications for projects for construction, as defined by the Secretary and which are not on the Interstate System except for the construction phase of Interstate resurfacing, restoration, rehabilitation and reconstruction projects, except in States where all public roads and highways are under the control and supervision of the State highway department, shall be determined by the State highway department and the appropriate local road officials in cooperation with each other.".

(g) Subsection 112(e) of title 23, United States Code, is amended by striking out "projects on the Federal-aid secondary system" and inserting in lieu thereof "projects, as defined by the Secretary and which are not on the Interstate System except for the construction phase of interstate resurfacing, restoration, rehabilitation and reconstruction projects,".

HISTORIC SITES

SEC. 120. (a) The third sentence of section 138 of title 23, United States Code, is hereby amended by striking ", or any land from an historic site of national, State, or local significance as so determined by such officials" and deleting subsequently in the section the phrase "or historic site,".

(b) The third sentence of section 4(f) of the Department of Transportation Act of 1966, P.L. 89-670, is hereby amended by striking ", or any land from an historic site of national, State, or local significance as so determined by such officials" and striking subsequently in that sentence the phrase "or historic site".

WOODROW WILSON MEMORIAL BRIDGE

SEC. 121. (a) The Secretary of Transportation is authorized upon application of the States of Maryland and Virginia and of the District of Columbia to approve reconstruction and rehabilitation of the Woodrow Wilson Memorial Bridge to geometric and structural standards as approved by the Secretary. Such reconstruction may include widening of the bridge.

(b) Funds to carry out the project authorized by this section shall come equally from funds apportioned to the States of Maryland and Virginia and to the District of Columbia for the Interstate System under section 104(b)(5)(A) of title 23, United States Code; *provided* that, funds apportioned under section 104(b)(5)(A) of title 23, United States Code, may not be obligated for widening of the bridge. The Federal share of the project cost shall be 75 per centum. Notwithstanding any other provision of law, funds to carry out this project shall not be subject to any obligation limitations.

(c) The Federal share payable for preliminary engineering on this project performed prior to the date of enactment of this Act shall be 75 per centum as provided in subsection (b).

(d) No funds shall be obligated for the purposes of this section until the States of Maryland and Virginia and the District of Columbia enter into an agreement with the Secretary which shall provide that upon commencement of actual reconstruction and rehabilitation the Secretary will convey to the States of Maryland and Virginia and the District of Columbia the respective portions of the Woodrow Wilson Bridge within their jurisdictions and that such States and the District of Columbia will accept the conveyance without monetary consideration.

COOPERATION WITH FEDERAL AND STATE AGENCIES AND FOREIGN COUNTRIES

SEC. 122. Section 308 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) The Secretary is authorized to carry out the provisions of this title in cooperation with State highway and transportation departments and with organizations which are principally composed of duly elected and appointed State and local highway and transportation officials without regard to the provisions of the Federal Advisory Committee Act.".

TERRITORIAL HIGHWAY PROGRAM

SEC. 123 (a). Section 215 of title 23, United States Code, is hereby repealed.

(b) Paragraphs (12) and (13) of section 104(a) of the Federal-Aid Highway Act of 1978 are amended by deleting "September 30, 1981, and September 30, 1982." each place it appears and inserting in lieu thereof "and September 30, 1981.".

(c)(1) The unexpended or unobligated balance of sums appropriated prior to enactment of subsection (a) of this section for carrying out section 215 of title 23, United States Code shall remain available for expenditure under the conditions applicable prior to such enactment.

(2) The unappropriated balance of sums authorized prior to enactment of subsection (a) of this section for carrying out section 215 of title 23, United States Code, is rescinded.

(d) Section 120(1) of title 23, United States Code, is repealed.

(e) Section 152(h) of title 23, United States Code, is repealed.

(f) Section 152(c) of title 23, United States Code, is amended by placing a period after the parentheses and deleting the remainder of the sentence.

(g) Section 401 of title 23, United States Code, is amended by deleting the second sentence thereof.

(h) The sixth sentence of section 402(c) of title 23, United States Code, is amended to read as follows: "The annual apportionment to each State shall not be less than one-half of 1 per centum of the total apportionment.".

(i) The analysis of chapter 2 of title 23, United States Code, is amended by deleting:

"215. Territories highway development program."

and inserting in lieu thereof:

"215. Repealed.".

ACCELERATION OF BRIDGE PROJECTS

SEC. 124. Section 147 of the Surface Transportation Assistance Act of 1978, as amended by section 15 of Public Law 96-106, 93 Stat. 798, is repealed. Funds previously set aside in accordance with section 147 and not obligated by the date of enactment of this Act, shall be permanently withdrawn. The withdrawn funds shall be apportioned among the several States in accordance with subsection (e) of section 144 of title 23, United States Code.

CARPOOL AND VANPOOL PROJECTS

SEC. 125. Section 146 of title 23, United States Code, is amended by redesignating existing subsection (b) as subsection (c) and by inserting the following new subsection (b):

"(b)(1) The Secretary may approve for Federal financial assistance from funds apportioned under section 104(b)(5)(B) of this title, projects for designating existing facilities, or acquisition of rights of way or construction of new facilities, for use as preferential parking for carpools, provided that such facilities (1) are located outside of a central business district and within an Interstate highway corridor, and (2) have as their primary purpose the reduction of vehicular traffic on the Interstate highway.

"(2) Nothing in this subsection, or in any rule or regulation issued under this subsection, or in any agreement required by this subsection, shall prohibit (1) any State, political subdivision, or agency or instrumentality thereof, from contracting with any person to operate any parking facility designated or constructed under this subsection, or (2) any such person from so operating such facility. Any fees charged for the use of any such facility in connection with the

purpose of this subsection shall not be in excess of the amount required for operation and maintenance, including compensation to any person for operating the facility.

"(3) For the purposes of this subsection, the terms "facilities" and "parking facilities" are synonymous and shall have the same meaning given "parking facilities" in section 137 of this title."

HIGHLAND SCENIC HIGHWAY

SEC. 126. Section 161(f) of the Federal-Aid Highway Act of 1973, as amended by section 21 of P.L. 96-106, is further amended to read as follows:

"161(f). The Highland Scenic Highway as authorized by subsection (a) of this section and all associated lands and rights-of-way shall be managed as part of the Monongahela National Forest for scenic and recreational purposes. Vehicle use shall be confined to passenger cars, recreational vehicles and limited truck traffic to the extent such use is compatible with the purpose for which the highway was constructed. Commercial use by trucks may be limited and controlled by permit.".

CONSTRUCTION

SEC. 127. (a) Subsection (a) of Section 114 of title 23, United States Code is amended to read as follows:

"(a) The construction of any highways or portions of highways located on a Federal-aid system shall be undertaken by the respective State highway departments or under their direct supervision. The construction work and labor in each State shall be in accordance with the laws of that State and applicable Federal laws. Except as provided in Section 117 of this title, the Secretary shall establish procedures for the inspection and approval of such construction. Construction may begin as soon as funds are available pursuant to Subsection (a) of Section 118 of this title. The State highway department shall not erect any informational signs other than official traffic control devices conforming with standards developed by the Secretary on any project where actual construction is in progress and visible to highway users.".

(b) Subsection (c) of Section 121 of title 23, United States Code, is amended by striking the words "following inspections".

RESEARCH AND PLANNING

SEC. 128. (a) Subsection (c) of Section 307, title 23, United States Code, is amended by adding paragraph (5) as follows:

"(5) The sums provided pursuant to paragraph (2) of this subsection shall be combined and administered by the Secretary as a single fund which shall be available for obligation for the same period as funds apportioned under Section 104(b)(1) of this Chapter."

(b) Section 120 of title 23, United States Code, is amended by adding a subsection (j) as follows:

"(j) The Federal share payable on account of any project financed under Section 307(c) of this title shall be 85 percent, except that in the case of any State containing nontaxable Indian lands, individual and tribal, and public domain lands (both reserved and unreserved) exclusive of national forests and national parks and monuments, exceeding 5 per centum of the total area of all lands therein, the Federal share shall be increased by a percentage of the remaining cost equal to the percentage that the area of all such lands in such State is of its total area, except that such Federal share payable on any project in any State shall not exceed 95 per centum of the total cost of any such project.".

APPALACHIAN DEVELOPMENT HIGHWAY SYSTEM

SEC. 129. (a) There are hereby transferred to and vested in the Secretary of Transportation all functions, powers, and duties of the Appalachian Regional Commission that relate to the Appalachian Development Highway System provided for in section 201 of the Appalachian Regional Development Act of 1965, as amended.

(b) So much of the personnel, assets, liabilities, contracts, properties, records, and unexpended balances of appropriations, authorizations, allocations, and other funds employed, held, used, arising from, available or to be made available in connection with the functions, powers, and duties transferred by subsection (a) of this section as the Director of the Office of Management and Budget shall determine shall be transferred to the Secretary of Transportation.

(c) All orders, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges which have been issued, made, granted, or allowed to become effective in the exercise of duties, powers, or functions which are transferred under this section which are in effect at the time this section takes effect, shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the Secretary of Transportation or by operation of law.

(d) The provisions of this section shall not affect any proceedings pending at the time this section takes effect before the Appalachian Regional Commission; but such proceedings, to the extent that they relate to functions so transferred, shall be continued before the Department of Transportation. Such proceedings, to the extent they do not relate to functions so transferred, shall be continued where they were pending at the time of such transfer. In either case, orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this section had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or repealed by the Secretary of Transportation, or by operation of law.

(e)(1) Except as provided in paragraph (2), the provisions of this section shall not affect suits commenced prior to the date this section takes effect, and in all such suits proceedings shall be had, appeals taken, and judgments rendered, in the same manner and effect as if this section had not been enacted.

(2) No suit, action, or other proceeding commenced by or against an officer of the Appalachian Regional Commission in that officer's official capacity shall abate by reason of the enactment of this section. No cause of action by or against any department or agency, functions of which are transferred by this section or by or against any officer thereof in his official capacity shall abate by reason of the enactment of this section. Causes of actions, suits, or other proceedings may be asserted by or against the United States or such official of the Department of Transportation as may be appropriate and, in any litigation pending when this section takes effect, the court may at any time, on its own motion or that of any party, enter an order which will give effect to the provisions of this subsection.

(3) If before the date on which this section takes effect, the Appalachian Regional Commission, or officer thereof in official capacity, is a party to a suit, then such suit shall be continued by the Secretary of Transportation (except in the case of a suit not involving functions transferred to the Secretary).

(f) With respect to any function, power, or duty transferred by this section and exercised after the effective date of this section, reference in any other Federal law to the Appalachian Regional Commission shall be deemed to mean the Secretary of Transportation.

(g) Subsection (g) of section 201 of the Appalachian Regional Development Act of 1965, as amended, is amended by striking out "and $215,000,000 for the fiscal year 1982." and by inserting in lieu thereof "and out of the Highway Trust Fund $215,000,000 for the fiscal year ending September 30, 1982, $234,000,000 for the fiscal year ending September 30, 1983, $250,000,000 for the fiscal year ending September 30, 1984, $270,000,000 for the fiscal year ending September 30, 1985, and $289,000,000 for the fiscal year ending September 30, 1986."

(h) Subsection (h) of section 201 of the Appalachian Regional Development Act of 1965 is amended by striking "70 per centum" and inserting in lieu thereof "80 per centum" and by adding at the end the following: "Projects approved after March 31, 1979, may be adjusted to receive a Federal share not greater than 80 per centum.".

(i) This section shall be effective on October 1, 1981.

TECHNICAL AMENDMENTS

SEC. 130(a). Section 104 of title 23, United States Code, is amended as follows:

(1) by deleting paragraph (4) of subsection (b);

(2) by redesignating paragraph "(5)" of subsection (b) as paragraph "(4)", and by deleting therein the first full sentence and the fifth sentence through the twenty-first sentence;

(3) by redesignating paragraph "(6)" of subsection (b) as paragraph "(5)"; and

(4) in subsection (c)(1), by deleting the phrase ", commencing with the apportionment of funds authorized to be appropriated under subsection (a) of section 102 of the Federal-Aid Highway Act of 1956 (70 Stat. 374).".

(b) The analysis of Chapter 1 of title 23, United States Code, is amended by deleting "146. Repealed." and inserting in lieu thereof "146. Carpool and vanpool projects.".

TITLE II—HIGHWAY SAFETY AMENDMENTS

SHORT TITLE

SEC. 201. This title may be cited as the "Highway Safety Act of 1981".

AUTHORIZATION FOR APPROPRIATIONS

SEC. 202. (a) The authorizations contained in paragraphs (1), (2), (4), (5), (9), and (10) of section 202 of the Highway Safety Act of 1978 for the fiscal year ending September 30, 1982, are hereby repealed. The following sums are hereby authorized to be appropriated:

(1) For carrying out section 402 of title 23, United States Code (relating to highway safety programs), by the National Highway Traffic Safety Administration, out of the Highway Trust Fund, $77,000,000 per fiscal year for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986.

(2) For carrying out section 403 of title 23, United States Code (relating to highway safety research and development), by the National Highway Traffic Safety Administration, out of the Highway Trust Fund, $31,000,000 for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986

(3) For carrying out sections 307(a) and 403 of title 23, United States Code (relating to highway safety research and development), by the Federal Highway Administration, out of the Highway Trust Fund, $10,000,000 for the fiscal year ending September 30, 1982, and $13,000,000 per fiscal year for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, and September 30, 1986.

(b) The unobligated balance of contract authority established in paragraphs (1) and (10) of section 202 of the Highway Safety Act of 1978 shall lapse September 30, 1981.

HIGHWAY SAFETY PROGRAMS

SEC. 203. (a) Subsection 402(a) of title 23, United States Code, is amended to read as follows:

"(a) Each State shall have a highway safety program designed to reduce traffic deaths and injuries by identifying its highway safety problems, by adopting measures to reduce its highway safety problems, and by evaluating the effectiveness of such measures. As part of its highway safety program, each State shall achieve uniformity in the collection of traffic accident and other data related to highway safety, and uniformity in laws and practices that affect interstate motorists. In its highway safety program, each State shall include programs which the Secretary determines to be effective in reducing deaths and injuries, such as alcohol safety, emergency medical services, police traffic services, and the collection of traffic accident data. Each State shall conduct its program in accordance with guidelines developed by the Secretary in cooperation with the States, their political subdivisions, appropriate Federal departments and agencies, and such other public and private organizations as the Secretary deems appropriate. The Secretary shall limit the use of sums authorized to be appropriated under this section to the purposes specified in this subsection."

HIGHWAY SAFETY PROGRAM REQUIREMENTS

SEC. 204. Subsections (b), (h), and (j) of section 402 of title 23, United States Code, are hereby repealed.

SCHOOL BUS DRIVER TRAINING

SEC. 205. (a) Section 406 of title 23, United States Code, is hereby repealed.

(b) The analysis of Chapter 4 of title 23, United States Code, is amended by deleting "406. School bus driver training." and inserting in lieu thereof "406. Repealed.".

INNOVATIVE PROJECT GRANTS

SEC. 206. (a) Section 407 of title 23, United States Code, is hereby repealed.

(b) The analysis of Chapter 4 of title 23, United States Code, is amended by deleting "Innovative project grants." and inserting in lieu thereof "407. Repealed.".

TITLE III—HIGHWAY REVENUE ACT OF 1981

SHORT TITLE

SEC. 301. This title may be cited as the "Highway Revenue Act of 1981".

EXTENSION OF THE TAXES WHICH ARE TRANSFERRED INTO THE HIGHWAY TRUST FUND

SEC. 302. (a) GENERAL RULE.—The following provisions of the Internal Revenue Code of 1954 are amended by striking out "1984" each place it appears and inserting in lieu thereof "1989":

(1) Section 4041(e) (relating to rate reduction).

(2) Section 4061(a)(1) (relating to imposition of tax on trucks, buses, etc.).

(3) Section 4061(b)(1) (relating to imposition of tax on parts and accessories).

(4) Section 4071(d) (relating to imposition of tax on tires, tubes, and tread rubber).

(5) Section 4081(b) (relating to imposition of tax on gasoline).

(6) Section 4481(a) (relating to imposition of tax on use of highway motor vehicles).

(7) Section 4481(e) (relating to period tax in effect).

(8) Section 4482(c)(4) (defining taxable period).

(9) Section 6156(e)(2) (relating to installment payments of tax on use of highway motor vehicles).

(10) Section 6421(h) (relating to tax on gasoline used for certain nonhighway purposes or by local transit systems).

(b) AMENDMENT OF SECTION 6412(a)(1).—Section 6412(a)(1) of such Code (relating to floor stocks refunds) is amended—

(1) by striking out "1984" each place it appears and inserting in lieu thereof "1989"; and

(2) by striking out "1985" each place it appears and inserting in lieu thereof "1990".

EXTENSION OF HIGHWAY TRUST FUND

SEC. 303. (a) HIGHWAY TRUST FUND—Subsections (c), (e)(1), and (f) of section 209 of the Highway Revenue Act of 1956 (relating to the Highway Trust Fund; 23 U.S.C. 120 note) are amended—

(1) by striking out "1984" each place it appears and inserting in lieu thereof "1990";

(2) by striking out "1985" each place it appears and inserting in lieu thereof "1991", and

(b) CONFORMING AMENDMENTS TO LAND AND WATER CONSERVATION FUND.—Subsection (b) of section 201 of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4061-11) is amended—

(1) by striking out "1984" and inserting in lieu thereof "1990"; and

(2) by striking out "1985" each place it appears and inserting in lieu thereof "1991".

SECTION-BY-SECTION ANALYSIS

TITLE I

SHORT TITLE

SEC. 101 provides that the title may be cited as the "Federal-Aid Highway Act of 1981".

REVISION OF AUTHORIZATION FOR APPROPRIATIONS FOR THE INTERSTATE SYSTEM

SEC. 102 authorizes $3.3 billion for fiscal year 1983, and $3.625 billion for each of the fiscal years 1984 through 1990 for the Interstate Highway System construction program. Effective October 1, 1981, obligation of the funds is limited except for Advance Construction Interstate projects approved before October 1, 1981, to the construction necessary to provide a minimum level of acceptable service on the Interstate system which shall consist of (1) full access control; (2) a pavement design to accommodate the types and volumes of traffic anticipated for a 20-year period from the date of authorization of initial basic construction; (3) a design of not less than nor more than 4 lanes in rural areas and all urban and urbanized areas under 400,000 population, and up to 6 lanes in urbanized areas over 400,000 population. Obligation of the funds is further limited to the actual costs of only those design concepts, locations, geometrics and other construction features included in the 1981 Interstate Cost Estimate. This section also provides that the Interstate Cost Estimate shall include only those costs eligible for Interstate construction funds.

Section 102(b) provides a new definition for Interstate "completion". In general, the definition will limit regular Interstate funding to the improvement of all Interstate segments to standards and a level of completion which will provide acceptable service for the Interstate traveler. The basic standards will include full access control for all sections.

On gap sections, "completion" would include, in addition to essential access control features, engineering, minimum right-of-way requirements, utility relocation, grading, erosion control, drainage, interchanges, structures, pavement, shoulders, signing, lighting, guardrail, and fencing. The number of lanes would be limited to six lanes in urbanized areas with a population over 400,000, and to four lanes in all other areas. Generally excluded from Interstate fund eligibility would be items such as weigh stations, landscaping, pedestrian and bikeway facilities, additional lanes over the maximum allowable and certain added construction costs for special features or treatments to accommodate social, economic, and environmental concerns.

On sections built without regular Interstate funds and incorporated into the Interstate System, "completion" will generally include features necessary to provide full access control and upgrading of sections previously identified as having major structural, geometric, and operational deficiencies. Improvements could include capacity expansion to the maximum number of lanes permitted for gap sections, but only where the section is a seriously inadequate link in the System and had been identified as such previously. Traffic control and roadside elements essential to the operation of the highway facility will be included; however, general safety corrective work will be permitted only as incidental to major, justified, and approved upgrading projects.

Sections constructed initially with regular Interstate funds may be improved only to the extent necessary to provide full access control and to complete the roadside and traffic control features essential to the operation of the highway facility. Completion of essential work may also include construction of additional lanes (up to the maximum number permitted for gap sections), added stages of pavement structure, interchanges, and grade separation structures all of which were identified as portions of the ultimate design and approved for future Interstate funding as stage construction at the time of initial construction project authorization. Generally excluded will be items such as new added lanes in excess of the maximum, new interchanges, new grade separations, safety improvements, noise abatement measures, rest areas, HOV lanes and related facilities, landscaping, etc.

Section 102(b) also limits the costs eligible for regular Interstate funds to those items, locations, design concepts, etc., as included in the 1981 Interstate Cost Estimate. This limitation constitutes an actual ceiling, exclusive of cost increases relating to price inflation, to preclude addition of new design elements or changes to more costly locations or design concepts. Design or location changes resulting in lower costs will, of course, be permitted.

Section 102(c) provides that future Interstate cost estimates will be prepared on the basis of the new "completion" definition and the general cost limitation of Section 102(b).

All items that become ineligible for Federal-aid Interstate funding as a result of the redefinition of Interstate "completion" will be eligible for resurfacing, restoring, rehabilitating, and reconstruction (4R) funding provided under Section 106 of this bill.

Subsection (d) of this section directs the Secretary to examine all segments of the Interstate System which have not progressed to the physical construction phase of project development to identify those routes which are not essential to the completion of the Interstate System, are not considered cost effective from a transportation standpoint, or have the potential for extensive environmental disruption. In the case of such routes, the Secretary is given the discretion to withdraw his approval of such under section 103(a)(4) or section 103(f) of title 23, as appropriate. If a route is withdrawn on or before September 30, 1983, and is otherwise eligible for withdrawal under the Interstate Substitution provision, 23 U.S.C. 103(e)(4), it shall be treated as if withdrawn under 23 U.S.C. 103(e)(4) and shall be eligible for the benefits provided by that provision.

AUTHORIZATION OF USE OF COST ESTIMATES FOR APPORTIONMENT OF INTERSTATE FUNDS

Sec. 103 approves the use of apportionment factors for fiscal years 1983 and 1984 Interstate fund apportionments. These factors will come from the 1981 Interstate Cost Estimate which reflects the new definition of Interstate "completion".

HIGHWAY AND SAFETY AUTHORIZATIONS

Sec. 104. This section authorizes the appropriation, out of the Highway Trust Fund, of the following sums for the fiscal years 1982, 1983, 1984, 1985, and 1986:

For the Federal-aid primary system in rural areas including the extension of the Federal-aid primary system in urban areas, $1.5 billion for fiscal year 1982, $1.7 billion for fiscal year 1983, $1.8 billion for fiscal year 1984, $1.8 billion for fiscal year 1985, and $1.8 billion for fiscal year 1986; for the Federal-aid secondary system in rural areas, $.7 billion for fiscal year 1982 and $.3 billion for fiscal year 1983; for the Federal-aid urban system, $.9 billion for fiscal year 1982 and $.5 billion for fiscal year 1983; for public lands highways, $16 million for each of the fiscal years 1982 through 1986; for the forest highways, $34 million for each of the fiscal years 1982 through 1986; and for bridge replacement and rehabilitation (23 U.S.C. 144), $.9 billion for fiscal year 1982, $1.2 billion for fiscal year 1983, and $1.4 billion for fiscal years 1984 through 1986.

This section provides that for each of the fiscal years 1982, 1983, 1984, 1985, and 1986, the States of Alaska and Puerto Rico shall each receive $10 million of the total apportionment for the primary system before such apportionment is made under section 104 (b)(1) of title 23, United States Code.

Subsection (c) of this section eliminates the minimum ½ of 1 percent of the total Interstate apportionment guaranteed for each State.

In the case of the primary, secondary and urban systems, public lands highways, forest highways, and the bridge replacement and rehabilitation program, the 1982 authorization levels established by this section replace existing 1982 authorization levels provided in the Surface Transportation Assistance Act of 1978 (STAA) and authorizations levels are provided for such programs, except secondary and urban, through fiscal year 1986. The secondary and urban programs are funded only through fiscal year 1983, at which time they will have to be assumed as State and local responsibilities. This section makes conforming amendments to pertinent sections of the STAA accordingly.

It eliminates existing 1982 authorization levels for several categorical highway programs: forest development roads and trails, public lands development roads and trails, park roads and trails, parkways, Indian reservation roads and bridges, economic growth center development highways, Great River Road, safer-off-system roads, access highways, section 402 FHWA highway safety programs, section 152 elimination of hazards program, rail-highway crossings, railroad-highway crossings demonstration program, and bicycle transportation and pedestrian walkways. In the case of the Great River Road and section 402 FHWA highway safety programs, the unobligated balance of contract authority established in the STAA for such activities shall lapse September 30, 1981. None of these programs will receive new separate funding levels. Most of these projects are eligible for funding under the primary, secondary and urban programs. For example, all safety activities provided for in title 23, United States Code, are eligible under the primary, secondary and urban programs and this provision will enhance the ability of States to address highway safety needs as an integral part of their regular highway construction programs.

Once all outstanding funds authorized specifically for these programs have been expended or obligated, title 23 will be amended to eliminate the sections establishing those programs.

Subsection (h) of this section provides a Discretionary Bridge Fund of $200,000,000 for fiscal year 1982 and $300,000,000 per fiscal year for each of the fiscal years 1983 through 1986. Discretionary Bridge Funds shall be available for obligation for a period of 2 years. Projects eligible for the funds are those costing more than $10 million or those costing at least twice a State's annual bridge fund apportionment. Discretionary bridge funds not obligated within the two year period shall be reallocated at the descretion of the Secretary of Transportation.

INTERSTATE SYSTEM RESURFACING APPORTIONMENT

Sec. 105 establishes a new Interstate 4R apportionment formula and provides a ½ of 1 percent guarantee of 4R Interstate apportionments for each State except for Alaska and the Commonwealth of Puerto Rico which have no Interstate mileage.

INTERSTATE SYSTEM RESURFACING AUTHORIZATION

Sec. 106 provides authorization for fiscal years 1983, 1984, 1985, 1986, and 1987 for Interstate 4R and authorizes October 1, 1981, as the effective date when the obligation of Interstate 4R funds for reconstruction can begin. Reconstruction includes all items previously eligible for Interstate construction funds. Interstate 4R funds cannot be used for the reconstruction of toll roads and cannot be used to resurface, restore, and rehabilitate toll roads. The requirement that Interstate 4R funds be used only on lanes in use for more than 5 years is discontinued.

INTERSTATE SYSTEM RESURFACING

Sec. 107 makes technical amendments to 23 U.S.C. 119 to conform with the changes made in sections 105 and 106 of the bill.

INTERSTATE SYSTEM RESURFACING—FEDERAL SHARE

Sec. 108 changes the Federal share for Interstate 4R projects from 75 percent to 90 percent effective October 1, 1981.

INTERSTATE SUBSTITUTION

Sec. 109. Subsection (a) makes it clear that Interstate Substitution Projects do not have contract authority and that sums must be appropriated before they are available for obligation. This has been the case since 1974.

Subsection (b) authorizes funds from the Highway Trust Fund for highway substitute projects. Funds for mass transit substitute projects will continue to come from the General Funds of the Treasury.

Subsection (c) provides that sums deducted from a State's Interstate unobligated apportionments when a substitution is made shall be available in the interstate Discretionary Fund for reallocation by the Secretary.

Subsection (d) prohibits withdrawal and substitution for routes or segments of routes added to the Interstate System by specific legislation after March 7, 1978.

HOLD HARMLESS—INTERSTATE RESURFACING

Sec. 110. This section provides a hold harmless feature so that for the first apportionment under the legislation for fiscal year 1983, no State, except Alaska, will receive a combined total of Interstate and 4R funds which is less than the combined Interstate and 3R apportionment would have been under existing law for fiscal year 1983.

INTERSTATE DISCRETIONARY FUND

Sec. 111. This section would amend 23 U.S.C. 118(b) by striking the word "must" and inserting the word "may". The effect of this amendment is to make the Interstate Discretionary Fund truly discretionary. Presently, Interstate Discretionary Funds are allocated to the States on a first come, first served basis with no discretion to the Secretary. This section would also require the Secretary to give high priority to Interstate projects of unusually high cost in relation to the State's apportionment, to projects which contribute to the completion of Interstate segments not open to traffic, and to projects in States receiving apportionments of less than one-half percent of the total national apportionment.

This section also provides that $125 million of the amount available for apportionment for the Interstate program will be set aside for the Interstate Discretionary Fund. This will ensure that funds will be available for particularly important projects which are eligible for these discretionary funds.

PRIMARY PROGRAM

Sec. 112. This section repeals the priority primary program, 23 U.S.C. 147. It amends section 104(b)(1) of title 23, to reflect the elimination of the priority primary program, and section 104(c) of the Federal-Aid Highway Act of 1978 to eliminate the 1982 authorization for the program.

HIGHWAY BRIDGE REPLACEMENT AND REHABILITATION PROGRAM APPORTIONED FUNDS

Sec. 113. This section provides for an annual apportionment in fiscal years 1982, 1983, 1984, 1985, and 1986, based upon a formula: All deficient bridges will be divided into four categories: (1) Federal-aid system bridges eligible for replacement, (2) Federal-aid bridges eligible for rehabilitation, (3) Off-system bridges eligible for replacement and (4) Off-system bridges eligible for rehabilitation. The square footage of deficient bridges in each category shall be multiplied by its respective unit price on a State-by-State basis and the total cost in each State divided by the total cost of the nation's deficient bridges to yield the apportionment factors, except that no State shall receive less than one quarter of one percent nor more than 8 percent of the annual apportionment.

These funds are available for two years and shall be reapportioned to other States if they are not obligated within the period of availability.

EMERGENCY RELIEF

Sec. 114. Subsections (a) and (b) of this section provide that all expenditures for emergency relief under 23 U.S.C. 125, whether past or future, shall come from the Highway Trust Fund and not from the General Fund of the Treasury. Section 125 of title 23, United States Code, now provides that 40 percent of emergency relief expenditures prior to the fiscal year ending September 30, 1978, are authorized from the General Fund of the Treasury.

Subsection (c) would amend 23 U.S.C. 125(a) to increase annual permissible expenditures from $100 million to $150 million commencing with fiscal year 1981.

Subsection (d) would amend 23 U.S.C. 125(b) to provide that expenditures for projects resulting from a single natural disaster or a single catastrophic failure shall not exceed $30 million in a State.

Subsection (e) would apply the amendment made by subsection (d) to natural disasters or catastrophic failures which the Secretary finds to be eligible for emergency relief subsequent to the enactment of this section.

Subsection (f) would amend 23 U.S.C. 120 (f), which pertains to the Federal share for highway emergency relief, to change the Federal share payable to 75 percent, except for forest highways, forest development roads and trails, park roads and trails, parkways, public lands highways, public lands development roads and trails, and Indian reservation roads, which would still receive 100 percent Federal funding. Under current law, the Secretary is authorized to increase the Federal share for emergency relief projects to 100 percent. The proposed change is in accord with Administration policy that the Federal share for disaster assistance should be 75 percent.

Subsection (g) would apply the Federal share provisions of 23 U.S.C. 120(f) as amended by this bill to all natural disasters or catastrophic failures which the Secretary

finds to be eligible for emergency relief subsequent to the enactment of the bill.

NONDISCRIMINATION

Sec. 115 amends section 140 of title 23, United States Code, to assure that equal employment opportunity must be provided without regard to sex; to authorize the Secretary of Transportation to conduct and finance minority business enterprise training programs and assistance programs; and to authorize the use of $10 million per fiscal year from the sum apportioned under 23 U.S.C. 104(b) to conduct and finance minority business enterprise training programs and assistance programs.

ALLOCATION OF URBAN FUND

Sec. 116. Existing law permits transferability between urban and primary system funds. However, it does not permit transfer of funds allocated out of urban system funds attributable to urbanized areas of 200,000 or more population from the allocation of one urbanized area to that of another urbanized area or to an urban area. This amendment to section 150 of title 23, United States Code, will permit the transfer of such attributable funds to the allocation of another urbanized area in the State or to any other urban area in the State. A transfer, requested by the State, would be subject to the approval of the Secretary and the local officials of the urbanized area from which the funds are to be transferred. The proposed transfer provision would enhance the capability of the States and local governments by giving them more flexibility in programming projects, setting priorities, and utilizing scarce financial resources.

DEFENSE ACCESS ROADS

SEC. 117. Section 210(c) of title 23, United States Code, provides for the use, up to $5,000,000, of any funds appropriated under the Act approved October 16, 1951 (65 Stat. 422) for highways in military training and maneuver areas. In 1958, Public Law 85–767 (72 Stat. 885), which revised and codified prior highway legislation as title 23, United States Code, repealed other Acts and portions of Acts. In addition, the second Supplemental Appropriations Act of 1957 (including the Bureau of Public Roads under the Department of Commerce) rescinded, effective June 20, 1957, all unexpended appropriations from prior laws. (Public Law 84–855). Thus, there are no current highway appropriations from which any part of $5,000,000 could be made available for the construction, maintenance, and repair of maneuver areas.

In 1955, the Office of Management and Budget directed the Department of Defense to budget for defense access roads. Since 1957, each military department has budgeted separately for defense access roads. By direction of the Assistant Secretary of Defense (Comptroller), maintenance and repair of public highways used for maneuvers will be accomplished from funds made available by the appropriate military department; but in order to insure prompt repairs, military regulations provide that the Commander, Military Traffic Management Command, may authorize the Federal Highway Administration to temporarily use available access road funds, pending payment by the military department concerned from its operation and maintenance funds. Since funds for the repair of maneuver road damage are not available from highway appropriations acts, but are available from defense appropriations acts, the opening clause is misleading and should be amended to reflect current law and practice.

This amendment to section 210(c) of title 23, United States Code, has been coordinated with the Military Traffic Management Command.

MAINTENANCE

SEC. 118. This section would amend subsection 116(c) of title 23, United States Code, to permit the Secretary to withhold project approval for projects in specific areas within a State, or for the entire State, where the Secretary finds that a project is not being properly maintained. Under present law, the Secretary must withhold project approval for the entire State for all projects when a single project is not being properly maintained. Present law does not represent a practical enforcement sanction. Stopping all project approvals in an entire State could involve massive disruption of planning and considerable economic waste. The amendment provides a practical enforcement sanction which should be an effective tool in enforcing maintenance.

Subsections (b), (c), (d) and (e) transfer maintenance provisions from 23 U.S.C. 109 and 119 to 23 U.S.C. 116.

CERTIFICATION ACCEPTANCE

Sec. 119 amends 23 U.S.C. 117 to provide for: (1) the application of certification acceptance to the physical construction phase of Interstate restoration projects; (2) the elimination of the requirement to make a final inspection on every project under both the certification acceptance and secondary road plan programs; and (3) the extension of coverage under the secondary road plan program to: "projects, as defined by the Secretary and which are not on the Interstate System." These changes in no way would relieve the State highway departments from the requirement of entering into formal project agreements with the Secretary pursuant to section 110 of title 23. Certification acceptance would be available to Interstate restoration projects once they reach the construction phase; thus it would apply only to those work areas such as time extensions, construction contract change orders, assessment of liquidated damage, etc., which take place subsequent to the actual construction project being authorized. The amendments would make both concepts more attractive to the States because of the expanded coverage and the reduction in Federal involvement and redtape.

HISTORIC SITES

Sec. 120. This section would eliminate identical language in Section 4(f) of the DOT Act and 23 U.S.C. 138 which overlap requirements under section 106 of the National Historic Preservation Act. Section 4(f) and section 106 are both applicable to historic and archeological resources which are on or eligible for the National Register of Historic Places. Section 4(f) is also applicable to historic sites which are not listed on or eligible for the National Register. The overlap has resulted in some project delays and duplication of efforts.

The proposal would eliminate the requirement of section 4(f) with respect to historic sites in all programs and projects of the Department of Transportation. The elimination of this delay and duplication of effort will take on increasing significance in the immediate future in the FHWA bridge program, by virtue of the increase in funds for that program provided in this bill. The bridge replacement program almost by definition involves concern with old, i.e. historic, structures.

Under this proposal, the extensive consultation and mitigation planning requirements afforded by section 106 and its implementing regulations will still apply to proposals for use of historic sites for transportation purposes. The section 4(f) requirement that the Secretary determine that there is "no feasible and prudent alternative to the use" (including constructive use) of protected land such as historic sites is virtually identical to the current requirement under Section 106 and its implementing regulations for an investigation to determine whether there is "a feasible and prudent alternative to avoid the adverse effect."

Similarly, the section 4(f) requirement to perform "all possible planning to minimize harm" is identical in practical effect to the section 106 regulatory requirement for consultation to determine if there is "a feasible and prudent alternative to satisfactorily mitigate the adverse effect of the undertaking."

WOODROW WILSON MEMORIAL BRIDGE

Sec. 121. This section authorizes the Secretary to approve a joint application by the States of Maryland and Virginia and the District of Columbia for the reconstruction and rehabilitation of the Woodrow Wilson Memorial Bridge, which may include widening and a bicycle path if necessary. Any project for widening the bridge would not be eligible for Interstate funds but could be financed with primary system funds. Pursuant to prior legislation, the bridge was constructed by the Bureau of Public Roads (now Federal Highway Administration) with the three jurisdictions being charged with its operation and maintenance. As a result, this bridge became Federal property. However, it is in excess to the needs of the Federal Government. This condition is corrected by providing in this section that the three jurisdictions enter into an agreement with the Secretary to accept a conveyance of their respective portions of the bridge prior to actual reconstruction work on the project. Funds for this project shall come equally from the Interstate apportionments for the three jurisdictions in the normal contract authority manner without application of obligational limits, and the 1981 estimate shall be adjusted to reflect an equal share of the total estimated project cost in the States of Maryland and Virginia and the District of Columbia. The Federal share for preliminary engineering performed prior to enactment of this section and for carrying out this project shall be 75 percent.

COOPERATION WITH FEDERAL AND STATE AGENCIES AND FOREIGN COUNTRIES

Sec. 122. This proposal would amend section 308 of title 23, United States Code, by authorizing the Secretary to carry out the provisions of this title in cooperation with the State highway and transportation departments and with organizations which are principally composed of duly elected and appointed State and local highway and transportation officials without regard to the provisions of the Federal Advisory Committee Act, 5 U.S.C. Appendix I. Expansive judicial interpretations of the Federal Advisory Committee Act have unnecessarily stifled government-to-government communications generally and, in particular, with respect to those grant-in-aid programs such as the Federal-aid highway program which require close coordination between State and local government officials and Federal officials to ensure effective planning and implementation. This revision would authorize the Secretary to administer Federal highway programs in cooperation with State and local highway and transportation officials either individually or collectively without the procedural burdens of the Federal Advisory Committee Act. The procedural requirements and safeguards which apply to the rulemaking process under the Administrative Procedure Act would not be affected by this revision.

TERRITORIAL HIGHWAY PROGRAM

Sec. 123. Subsection (a) of this section repeals section 215 (Territorial Highway Program) of title 23, United States Code. This program will be eligible for funding by the Department of the Interior.

Subsection (b) of this section amends paragraphs (12) and (13) of section 104(a) of the Federal-Aid Highway Act of 1978 to

reflect elimination of the program by rescinding existing 1982 highway program authorizations for the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

Subsection (c)(1) of this section would facilitate an orderly transfer of the program to the Department of the Interior by expressly stating that outstanding funds appropriated for carrying out repealed section 215 shall remain available for expenditure under the conditions applicable prior to such repeal. Subsection (c)(2) rescinds the unappropriated balance of all sums authorized prior to the repeal of the program.

Subsections (e), (f), (g), and (h) eliminate the Federal Highway Administration's involvement in the highway-safety activities of the territories program by amending pertinent sections of title 23, United States Code.

ACCELERATION OF BRIDGE PROJECTS

Sec. 124. This section repeals the acceleration of bridge project program which provided special funding for the U.S. Grant Bridge in Kentucky and the East Huntington Bridge in West Virginia.

CARPOOL AND VANPOOL PROJECTS

Sec. 125. This section amends section 146 (carpool and vanpool projects) of title 23, United States Code. It would permit the use of sums apportioned for Interstate 4R to fund projects for designating existing facilities, or acquisition of rights of way, or construction of new facilities, for use as preferential parking for carpools. Any such facilities must be located outside of a central business district and within an Interstate highway corridor and primarily intended to reduce Interstate highway traffic. It would permit a State to contract with any person to operate any such parking facility, but any fees charged for use pursuant to the purpose of this provision shall not be in excess of the amount required to cover operating and maintenance costs. The term "parking facility" would include access roads, buildings, roads, structures, equipment, improvements, and interests in land.

HIGHLAND SCENIC HIGHWAY

Sec. 126. This section would amend section 161(f) of the Federal-Aid Highway Act of 1973, as amended by section 21 of P.L. 96–106 to remove a technical problem presently preventing the State of West Virginia from maintaining the Highland Scenic Highway, located partially within and adjacent to the Monongahela National Forest in the State. It would also allow local light truck traffic and limited commercial truck traffic on a permit basis only.

The Highland Scenic Highway was originally designed and constructed as a multipurpose State highway on the Federal-Aid Highway System. As such, it was maintained by the State until the passage of the Federal-Aid Highway Act of 1973 which designated it as a scenic highway with portions limited solely to scenic and recreational use and passenger car use. The scenic highway designation precludes community service vehicles such as bread trucks, service trucks and farm trucks from using the highway and use of the road for National Forest management activities requiring use of trucks. This designation thus made the highway a limited service highway which precludes continued maintenance by the State as State law prohibits the expenditure of maintenance funds on limited service highways.

This amendment would correct this anomaly by modifying the vehicle limitation so that the State could maintain the road and, at the same time, protect the important recreational and scenic values of the highway.

CONSTRUCTION

Sec. 127. Title 23, United States Code, now requires that the Secretary inspect each highway construction project. This amendment would remove that requirement. The Secretary would establish procedures for inspecting and approving construction but would not have to inspect each project. The amendment would thereby eliminate an unnecessary requirement.

RESEARCH AND PLANNING

Sec. 128. This section would amend 23 U.S.C. 307 to confirm the legal basis for pooling 1½ percent highway planning and research (HPR) funds into a single fund and to establish a uniform period of availability.

The 1½ percent HPR funds are currently pooled by administrative decision. Over the years the funds from which the HPR funds are derived have been legislatively assigned varying periods of availability.

The provision establishing a standard Federal share for HPR funds simplifies the program and eliminates paperwork.

APPALACHIAN DEVELOPMENT HIGHWAY SYSTEM

Sec. 129. Subsection (a) of this section would transfer the functions, powers, and duties of the Appalachian Regional Commission related to the Appalachian Development Highway System to the Secretary of Transportation. Subsections (b), (c), (d), (e), and (f) are technical transfer provisions and savings provisions.

Subsection (g) provides authorizations out of the Highway Trust Fund for the Appalachian Development Highway System of $215 million for FY 1982, $234 million for FY 1983, $250 million for FY 1984, $270 million for FY 1985, and $289 million for FY 1986.

Subsection (h) changes the Federal share for advance construction projects in the Appalachian Development Highway System from 70 percent to 80 percent. The Federal share for regular construction projects on said system was changed from 70 percent to 80 percent by section 138 of the Federal-Aid Highway Act of 1978. Advance construction projects were inadvertently overlooked at that time.

Subsection (i) provides an effective date of October 1, 1981.

TECHNICAL AMENDMENTS

Sec. 130. This section streamlines section 104 of title 23 by deleting language that no longer applies and makes a correction to the analysis of Chapter 1 of title 23.

TITLE II—HIGHWAY SAFETY AMENDMENTS

SHORT TITLE

Sec. 201 states that this title may be cited as the "Highway Safety Act of 1981".

AUTHORIZATION FOR APPROPRIATIONS

Sec. 202 would repeal the existing authorizations provided by section 202 of the Highway Safety Act of 1978 (P.L. 95–599), for the National Highway Traffic Safety Administration under sections 402, 403, 406, and 407 of title 23, United States Code, and for the 55 mile per hour speed limit under section 154.

Subsection 202(a)(1) would authorize $77,000,000, out of the Highway Trust Fund, for each of fiscal years 1982, 1983, 1984, 1985, and 1986, for carrying out the highway safety grant program under section 402 of title 23, United States Code, by the National Highway Traffic Safety Administration.

Subsection 202(a)(2) would authorize $31,000,000 for each of fiscal years 1982, 1983, 1984, 1985, and 1986, for carrying out the research and development programs under section 403 of title 23, United States Code, by the National Highway Traffic Safety Administration.

Subsection 202(a)(3) would authorize $10,000,000 for fiscal year 1982, and $13,000,000 for each of fiscal years 1983, 1984, 1985, and 1986, for carrying out the research and development programs under sections 307 (a) and 403 of title 23, United States Code, by the Federal Highway Administration.

Subsection 202(b) provides that the unobligated balance of contract authority for 23 U.S.C. 402 and 406 will lapse on September 30, 1981.

HIGHWAY SAFETY PROGRAMS

Sec. 203 would amend the existing list of highway safety programs required of the States by eliminating from eligibility those programs that have been less successful in promoting highway safety. The section would amend subsection 402(a) to place emphasis on problem identification, counter-measure development, and the evaluation of program effectiveness. The revised subsection would require the States to achieve uniformity in the collection of traffic accident and other highway safety data and in the adoption of laws and practices that affect interstate motorists. The States would also be required to address themselves to programs that the Secretary determines to be effective in reducing deaths and injuries, such as alcohol safety, emergency medical services, and police traffic services. Guidelines relating to these programs would be issued by the Secretary in cooperation with the States, their political subdivisions, appropriate Federal departments and agencies, and such other public and private organizations as the Secretary might deem appropriate. Funding under the program would be limited to the safety programs specified in the subsection.

HIGHWAY SAFETY PROGRAM REQUIREMENTS

Sec. 204 would repeal subsections (b), (h), and (j) of section 402. Subsection (b) presently places a number of restrictions on the States, by requiring them to operate the program through a specific State agency, by specifying a percentage of funds to be passed through to local political subdivisions, and by requiring comprehensive driver education programs. These restrictions do not seem appropriate in light of the need to make the most efficient use of limited funds, and would accordingly be repealed.

Subsection (h) restricts the Secretary from issuing or amending highway safety standards under the existing subsection 402(a). Under the revised 402(a), such a restriction would impede the development of the new program and should therefore be repealed. Subsection (j) relates to various incentive programs that have not been funded since fiscal year 1975, and should be deleted as obsolete.

SCHOOL BUS DRIVER TRAINING

Sec. 205 would repeal section 406 of title 23, relating to school bus driver training. Many States with long standing training programs have found the driver training funds under section 406 to be of little additional value. This section would return bus driver training to a State-funded status.

INNOVATIVE PROJECT GRANTS

Sec. 206 would repeal section 407 of title 23, relating to innovative project grants.

TITLE III

SHORT TITLE

Sec. 301 states that this title may be cited as the "Highway Revenue Act of 1981".

EXTENSION OF THE TAXES WHICH ARE TRANSFERRED INTO THE HIGHWAY TRUST FUND

Sec. 302 extends the highway excise taxes allocated to the Highway Trust Fund for five years; that is, the rate reductions or expirations of highway taxes now scheduled for October 1, 1984, are deferred until October 1, 1989.

EXTENSION OF HIGHWAY TRUST FUND

Sec. 303 extends the Highway Trust Fund for six years from September 30, 1984, through September 30, 1990.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS,
Washington, D.C., March 31, 1981.

Hon. HOWARD H. BAKER, Jr.,
Majority Leader,
U.S. Senate, Washington, D.C.

DEAR HOWARD: The Department of Transportation has submitted proposed legislation to authorize appropriations for the construction of highways in accordance with title 23 of the United States Code, to amend the Highway Safety Act of 1966, and to extend the Highway Trust Fund, established by the Highway Revenue Act of 1956. A copy of the proposed legislation is attached.

We respectfully request that by unanimous consent, Title I of this bill be referred to the Committee on Environment and Public Works, Title II be referred to the Committee on Commerce, Science and Transportation and that Title III be solely referred to the Committee on Finance.

Jennings Randolph, Ranking Member, Committee on Environment and Public Works; Howard W. Cannon, Ranking Member, Committee on Commerce, Science and Transportation; Russell B. Long, Ranking Member, Committee on Finance; Robert T. Stafford, Chairman, Committee on Environment and Public Works; Bob Packwood, Chairman, Commerce, Science and Transportation; Robert Dole, Chairman, Committee on Finance.

THE SECRETARY OF TRANSPORTATION,
Washington, D.C., March 17, 1981.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: The Department of Transportation is submitting for your consideration and appropriate reference a draft bill:

"To authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, to amend the Highway Safety Act of 1966 to authorize appropriations, and for other purposes."

It is essential that the Federal-aid highway program be structured in a way that it can be financed within acceptable budget levels and yet achieve national goals and other interests. The extent of Federal involvement in the program has been carefully analyzed in reaching the program decisions reflected in this legislation. Completion of the Interstate System and the preservation of this system is the highest Federal priority. The Primary system is also of national significance and will continue to receive high levels of Federal funding. State and local governments should have the principal responsibility for highway systems which are not of national importance. Therefore, this legislation eliminates or phases out a number of separate categorical programs, while increasing the flexibility with which States can use available Federal funding.

The changes proposed by this bill will produce budget savings of approximately $11.2 billion through 1986, compared to the previous Administration's bill.

TITLE I

Title I provides for 5-year highway authorizations, for 1982 through 1986, that would average $9.0 billion annually, including Interstate authorizations. The authorization levels are based on an assessment of changes in highway conditions and performance since 1970, and an analysis of investments needed to maintain acceptable levels of performance.

The bill amends the authorization for the Interstate System by increasing the amount authorized in existing law for FY 1983 from $3.2 billion to $3.3 billion and maintains the $3.625 billion authorized for fiscal years 1984 through 1990.

Interstate System

The 1981 Interstate Cost Estimate shows that despite $8 billion in investments and significant Interstate withdrawals over the past two years, the cost-to-complete has increased significantly. Clearly, Interstate completion, as currently defined, is not an achievable goal. This proposal, therefore, recommends a more reasonable approach by reducing the cost to complete to only those items required to provide a minimum level of acceptable service on a safely operating system. This change makes Interstate completion possible by 1990 and allows for greater emphasis to be placed on preserving 94 percent of Interstate mileage now open to traffic.

Beginning October 1, 1981, Interstate construction funds would be available only to construct Interstate segments to a minimum level of acceptable service consisting of (1) full-access control, (2) a pavement design to accommodate traffic anticipated for the next 20 years, and (3) a design of not less nor more than four lanes in rural areas and all urban areas and urbanized areas under 400,000 population, and up to six lanes in urbanized areas over 400,000 population. Future Interstate Cost Estimates would include only costs for the projects eligible under these criteria.

To ensure cost effective use of Interstate funds, the bill would require the Secretary of Transportation to examine all Interstate System segments on which physical construction has not started to identify possible segments which are not essential to the unified and connected Interstate System, are not cost effective or are environmentally disruptive. The Secretary would be authorized to remove undesirable, non-essential segments from the Interstate System. Current law authorizes State and local governments to withdraw non-essential Interstate segments in or serving urbanized areas until September 30, 1983. Local areas are then entitled to an equal amount of funds for substitute transit or highway projects. The proposed legislation provides the same benefits for otherwise eligible segments removed by the Secretary.

To further the objective of expeditious completion of the Interstate System, the proposed legislation revises the criteria for distribution of Interstate Discretionary funds. Rather than being allocated on a first come, first served basis as under present law, the funds will be allocated on a priority basis by the Secretary to Interstate projects which will help complete Interstate segments not open to traffic, to projects of unusually high cost relative to a State's apportionment and to projects in States which receive apportionments of less than ½ of one percent of the total National apportionment. The minimum ½ of one percent apportionment of Interstate construction funds to all States will be eliminated.

In addition to redefining Interstate completion, this bill would continue the transition to a post-Interstate construction program by expanding the current resurfacing, restoration and rehabilitation (3R) program to include reconstruction (4R). Those work items deleted from Interstate construction would be eligible under the expanded 4R program and funding for the program would increase substantially. Each State with Interstate routes would receive at least ½ of one percent of the overall 4R apportionment. To prevent any abrupt funding changes in Interstate programs in individual States, the bill provides a "hold harmless" feature so that the apportionment of Interstate and Interstate 4R funds that each State with Interstate routes receives on October 1, 1981 will not be less than the combined Interstate and 3R apportionment it would have received under existing legislation.

Effective October 1, 1981, the bill eliminates the eligibility of 4R work on toll roads and allows 4R work only on routes designated under 23 U.S.C. 103. The Federal share for 4R work would be changed from the existing 75 percent to 90 percent effective October 1, 1981.

PRIMARY PROGRAM

Second to the Interstate System the primary system is of greatest Federal interest. The primary system is the highest order State system and has received considerable State and Federal funding. As a consequence, the system has been built to high standards and is in good condition overall. The bill recognizes the Federal interest in the Federal-aid primary system by increasing program authorizations from the existing authorization of $1.5 billion for fiscal year 1982 to $1.8 billion by fiscal year 1986. The only program change we recommend is eliminating the priority primary program so that States can select these projects that reflect their own priorities.

Bridge program

There is a high national interest in reducing the safety problem presented by deficient and obsolete bridges. Therefore, the bridge program would remain as a separate program.

The bridge program authorizations are extended through fiscal year 1986 (rising from $900 million in fiscal year 1982 to $1.4 billion in fiscal year 1986) and a new bridge apportionment formula is established to provide more equitable distribution. Within these overall program levels the Discretionary Bridge Program is continued, with $200 million set aside in fiscal year 1982 and $300 million for each of the fiscal years 1983 through 1986. Projects eligible for these funds must cost more than $10 million, or at least twice a State's annual bridge fund apportionment.

Secondary and urban systems

State and local governments have a greater interest than the Federal government in highway systems below the Interstate and primary systems. To return responsibility for these highways to the appropriate level of government, the bill phases out Federal responsibility for, and involvement in, the secondary and urban system programs. To facilitate the transition, the bill provides authorizations for these programs for fiscal years 1982 and 1983. These transition authorizations should provide the States time to make budget adjustments to assume full funding responsibility for these programs.

Safety

Highway safety projects should be an integral part of all highway construction. To increase State and local flexibility in meeting highway safety needs, the bill eliminates separate safety categorical programs administered by the Federal Highway Administration, which in most cases are eligible for the primary, secondary and urban program funds. Funding which would otherwise be authorized for safety projects is incorporated into the larger categories.

Other

The bill eliminates a number of existing categorical highway programs and the existing separate 1982 funding authorizations as-

sociated with them. States will be able to make their own determinations as to the priority of these programs, most of which will be eligible for Federal funds under the regular primary, secondary, or urban programs. The bill also contains a number of amendments considered essential to better manage certain programs. Finally, the Appalachian Development Highway System program would be transferred from the Appalachian Regional Commission and would be financed from the Highway Trust Fund.

TITLE II

Title II provides authorizations for highway safety (sec. 402) grants administered by the National Highway Traffic Safety Administration at a level of $77 million for each of fiscal years 1982 through 1986. The highway safety program is restructured to focus on projects which are most closely related to the reduction of accidents, such as alcohol programs and police traffic services. Funds for safety research and development are also authorized. Separate funding for speed limit enforcement is eliminated.

TITLE III

Financing

Title III of this bill retains the Highway Trust Fund as the mechanism for Federal highway financing and extends it for six years to September 30, 1990. It also extends current highway excise taxes allocated to the Highway Trust Fund for five years.

Summary

The program restructuring and authorization levels proposed in this bill represent a strong Federal commitment to an effective Federal-aid highway program. The new Federal focus on the Interstate and primary systems, accompanied by providing greater responsibility to the States and allowing greater flexibility at the State level, will ensure fulfillment of the nation's highway transportation needs.

The Office of Management and Budget has advised that enactment of this legislation would be in accord with the President's program.

Sincerely,

DREW LEWIS.

● Mr. DOLE. Mr. President, I am today joining with my colleagues from the Committees on Environment and Public Works and Commerce to introduce the Federal-Aid Highway Act of 1981. This bill incorporates the President's proposals for restructuring the Federal highway program. The bill would eliminate a number of separate categorical programs and increase State program flexibility. It is noteworthy that this bill will produce $11.2 billion in budget savings when compared with the prior administration's highway bill.

Mr. President, the Senator from Kansas is particularly interested in title III of this legislation, which will be referred to the Committee on Finance. Title III, which is referred to as the Highway Revenue Act of 1981, would extend the existing highway excise taxes until October 1, 1989. Under current law, those taxes would expire or be automatically reduced in 1984. The bill also would extend the highway trust fund for 6 years, through September 30, 1990.

Mr. President, I welcome the administration's leadership in shaping future Federal highway policy. There has been a growing concern about long-term solvency of the highway trust fund. The most significant source of revenue to the highway trust fund has been the 4 cent per gallon excise tax on motor fuel. In recent years, gas tax revenue has declined as nationwide gasoline consumption has declined. Obviously, the need for an expansion of Federal trust fund revenue largely depends on the role that Federal Government chooses to play with respect to the Nation's highways.

I expect that the bill that we are introducing today will help shape and focus the debate on what that role should be. The Committee on Finance looks forward to playing a constructive role in that debate.●

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent that the bill introduced today by Senator STAFFORD to authorize appropriations for the construction of highways in accordance with title 23 of the United States Code to amend the Highway Safety Act of 1966, and to extend the highway trust fund, established by the Highway Revenue Act of 1956 be referred to the following committees in the specified manner:

Title I to be referred to the Committee on Environment and Public Works.

Title II to be referred to the Committee on Commerce, Science and Transportation, and

Title III to be referred to the Committee on Finance.

By Mr. HAYAKAWA (for himself, Mr. MCCLURE, Mr. HELMS, Mr. HEFLIN, and Mr. SYMMS):

S. 842. A bill to provide for stability and certainty in planning and management of certain National Forest lands; to the Committee on Agriculture, Nutrition, and Forestry and the Committee on Energy and Natural Resources, jointly, by unanimous consent.

RARE II REVIEW ACT OF 1981

Mr. HAYAKAWA. Mr. President, I am introducing today, with Senators HELMS of North Carolina and MCCLURE of Idaho, HEFLIN of Alabama and SYMMS of Idaho, legislation which will provide for an orderly completion of basic land use decisions in the roadless areas of our national forests.

For more than 10 years, some 62 million acres—one-third of our entire national forest system—have been in a planning limbo of studies, lawsuits and restudies.

As our national long-term demands increase for resources ranging from timber to minerals, from oil and gas to recreation sites, we no longer can afford the paralysis of planning inaction.

Resolution of these issues is particularly vital in my State of California, where a lawsuit has tied up vital forest lands even more than in most other States.

This legislation provides for final answers to the key question which was studied during 1977–79 by the Forest Service and Department of Agriculture in their Second Roadless Area Review and Evaluation—known as RARE II.

That question was: Which roadless areas of the national forests should be devoted exclusively to wilderness and which should be managed for a multiplicity of uses ranging from outdoor recreation to timber harvesting to minerals development to wildlife enhancement?

This bill does not of itself enact any new lands into wilderness. Neither does it tie the hands of any future Congress from enacting any wilderness legislation it may choose. But it does provide for an end to the frustrating cycles of delay and resultant de facto wilderness which have thrown our forest resource allocations far out of balance.

Congress took a significant step in this direction last fall when it wrote so-called release language into two wilderness bills concerning Colorado and New Mexico. The bill introduced today completes that process by applying release principles nationally, setting reasonable deadlines for congressional action on wilderness recommendation, and asserting congressional primacy in providing for any future wilderness studies.

For lands west of the 100th Meridian, our RARE II Review Act of 1981 includes these provisions:

Lands recommended for nonwilderness by the RARE II study would be immediately returned to management for nonwilderness, multiple-use purposes. Some 36 million acres are in this category.

Lands recommended by the RARE II study for wilderness designation by Congress would remain subject to those recommendations until January 1, 1985. Wilderness-recommended lands not enacted into wilderness status by that date would then revert to nonwilderness status. About 15 million acres were recommended for wilderness by RARE II.

Lands recommended for further planning by RARE II would be subject to a deadline of September 30, 1985, for completion of that further planning by the Forest Service. We have to set a deadline on this planning, because we have been planning forever. Lands recommended for nonwilderness as a result of that further planning would immediately revert to nonwilderness status. Lands recommended for wilderness as a result of that planning would continue to be so recommended until January 1, 1988, at which time they would revert to nonwilderness status if not already enacted into wilderness by Congress.

Understand, Mr. President, that this leaves great leeway to act in one direction or another regarding wilderness in future Congresses.

For lands east of the 100th meridian, our act includes these provisions:

Lands recommended for wilderness by RARE II shall become wilderness study areas as defined in the Eastern Wilderness Act until January 1, 1983, after which they will be managed for other than wilderness unless otherwise directed by Congress.

Lands reviewed in RARE II and not recommended for wilderness shall be managed for uses other than wilderness unless Congress otherwise directs.

Nationally Congress would reserve to itself the authority to provide for further study of the wilderness potential of these national forest lands. With such congressional direction, the wilderness alternative would not be further considered administratively during the periodic national forest planning cycles.

The RARE II final environmental impact statement would be insulated from

any judicial review or court rule on legal or factual sufficiency of the RARE II environmental impact statement.

The Wilderness Act of 1964 provided that only Congress could enact Federal lands into the national wilderness preservation system. The legislation reflects this congressional policy. It would bring an end to the present policy-frustrating situation in which vast acreage is kept in de facto wilderness through repeated studies, appeals, and litigation.

It would once again permit this Nation to make best, highest, and balanced use of all its national forest resources.

As chairman of the Senate Agriculture Subcommittee on Forestry, Water Resources, and Environment, I intend to schedule hearings and move to mark-up of this needed bill.

I look forward as well to working with the new Reagan administration on this legislation. It can contribute significantly to the President's goals of stemming inflation, aiding business recovery, promoting energy self-sufficiency and improving the homeowning prospects for millions of Americans during the 1980's.

I ask unanimous consent that this bill be held at the desk until close of business today for the purpose of the leadership to clear its approval.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent that the bill Senator HAYAKAWA introduced regarding the issue of releasing national forest system lands be jointly referred to the Committee on Agriculture, Nutrition, and Forestry and the Committee on Energy and Natural Resources.

ADDITIONAL COSPONSORS

S. 267

At the request of Mr. DECONCINI, the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of S. 267, a bill to amend title 28, United States Code, to provide that the Federal tort claims provisions of that title are the exclusive remedy in medical malpractice actions and proceedings resulting from federally authorized National Guard training activities, and for other purposes.

S. 398

At the request of Mr. ARMSTRONG, the Senator from Wyoming (Mr. WALLOP) was added as a cosponsor of S. 398, a bill to amend the Walsh-Healey Act and the Contract Work Hours Standards Act to permit certain employees to work a 10-hour day in the case of a 4-day workweek, and for other purposes.

S. 517

At the request of Mr. ROBERT C. BYRD, his name was added as a cosponsor of S. 517, a bill to amend the Clean Air Act to provide for further assessment of the validity of the theory concerning depletion of ozone in the stratosphere by halocarbon compounds before proceeding with any further regulation of such compounds, to provide for periodic review of the status of the theory of ozone depletion, and for other purposes.

S. 546

At the request of Mr. RANDOLPH, the Senator from Alabama (Mr. DENTON) was added as a cosponsor of S. 546, a bill entitled "The Fish Restoration Act of 1981."

S. 602

At the request of Mr. RIEGLE, the Senator from New Jersey (Mr. WILLIAMS) was added as a cosponsor of S. 602, a bill to amend the investment credit provisions of the Internal Revenue Code of 1954 to provide for refundability of currently earned investment credits after the close of the year in which earned and for refundability of any previously earned but unused investment credit after the close of the last year to which the unused credit may be carried.

S. 631

At the request of Mr. DECONCINI, the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 631, a bill to dismiss certain cases pending before the Education Appeal Board.

S. 725

At the request of Mr. WALLOP, the Senator from Colorado (Mr. ARMSTRONG) was added as a cosponsor of S. 725, a bill to amend the Internal Revenue Code of 1954 with respect to the treatment of certain shale property for the purposes of the energy investment credit.

SENATE JOINT RESOLUTION 40

At the request of Mr. RIEGLE, the Senator from Wyoming (Mr. WALLOP) was added as a cosponsor of Senate Joint Resolution 40, a joint resolution to designate April 26, 1981, as "National Recognition Day for Veterans of the Vietnam Era."

SENATE JOINT RESOLUTION 50

At the request of Mr. DECONCINI, the Senator from Arizona (Mr. GOLDWATER), the Senator from Hawaii (Mr. INOUYE), the Senator from Indiana (Mr. QUAYLE), the Senator from Kentucky (Mr. FORD), the Senator from Maryland (Mr. SARBANES), the Senator from Maine (Mr. MITCHELL), the Senator from Michigan (Mr. RIEGLE), the Senator from Montana (Mr. BAUCUS), the Senator from Oklahoma (Mr. NICKLES), the Senator from South Carolina (Mr. THURMOND), the Senator from South Carolina (Mr. HOLLINGS), and the Senator from Alabama (Mr. HEFLIN) were added as cosponsors of Senate Joint Resolution 50, a joint resolution designating July 17, 1981, as "National P.O.W.-M.I.A. Recognition Day."

SENATE RESOLUTION 20

At the request of Mr. BAKER, the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of Senate Resolution 20, a resolution providing for television and radio coverage of proceedings of the Senate.

SENATE RESOLUTION 104—RESOLUTION DISAPPROVING THE PROPOSED DEFERRAL OF CERTAIN BUDGET AUTHORITY

Mr. GLENN submitted the following resolution; which, pursuant to the order of January 30, 1975, was referred jointly to the Committee on Appropriations, the Committee on the Budget, the Committee on Finance, and the Committee on Labor and Human Resources:

S. RES. 104

Resolved, That the Senate disapproves the proposed deferral of budget authority for the Welfare Reform Demonstration Programs administered by the Employment and Training Administration of the Department of Labor as set forth in the special message transmitted by the President to the Congress on March 10, 1981, under section 1013 of the Impoundment Control Act of 1974 (Deferral No. D-81-36A).

AMENDMENTS SUBMITTED FOR PRINTING

EXPORT TRADING COMPANY ACT OF 1981

AMENDMENT NO. 25

(Ordered to be printed and to lie on the table.)

Mr. MATHIAS submitted an amendment intended to be proposed by him to the bill (S. 734) to encourage exports by facilitating the formation and operation of export trading companies, export trade associations, and the expansion of export trade services generally.

CONSUMER PRODUCT SAFETY ACT AMENDMENTS OF 1981

AMENDMENT NO. 26

(Ordered to be printed and referred to the Committee on Commerce, Science, and Transportation.)

Mr. CANNON submitted an amendment intended to be proposed by him to the bill (S. 833) to amend the Consumer Product Safety Act to authorize appropriations for fiscal year 1981, and for other purposes.

● Mr. CANNON. Mr. President, today I am introducing an amendment to section 6b of the Consumer Product Safety Act. I have been concerned about the release of information by the Commission which may result in adverse publicity to an industry before the Commission has had the opportunity to weigh all the evidence in a formal proceeding. At the same time, I realize that an important function of the Commission is to educate the public about potential product hazards. Therefore, the first part of this amendment would establish procedures to insure that when the Commission disseminates information about the safety of a product or a class of consumer products, that the information is accurate. This section will help to prevent the Commission from publishing inaccurate information thereby reducing injuries suffered by manufacturers who are adversely affected by inaccurate well-publicized CPSC information.

My second concern is that the publication of a formal action proposed by the Commission may result in decreased sales within an industry although later the Commission may reverse its position. The second part of my amendment would require the Commission to publicize the withdrawal of a regulatory proposal in the same degree as the original proposal. This would mean that finding that a standard or a ban is not necessary would receive as much publicity as when the ban or standard was originally proposed.

The Consumer Subcommittee of the Senate Committee on Commerce, Sci-

ence, and Transportation will hold oversight hearings on April 1, 2, 3, and 7, 1981. I submit this amendment today before these hearings, so that witnesses may have the opportunity to comment.

Mr. President, I ask unanimous consent that the amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT No. 26

After section 13 of the bill, insert the following new section, and redesignate section 14 of the bill as section 15:

"INFORMATION DISSEMINATION

"SEC. 14. Section 6(b)(1) of the Act (15 U.S.C. 2055(b)(1)) is amended by inserting immediately before the last sentence thereof the following: "The Commission shall establish procedures to reasonably ensure that information which it affirmatively disseminates reflecting on the safety of any consumer product or class of consumer products is accurate and not misleading. If, after proposing a formal action, the Commission decides to withdraw such proposal, the Commission shall, in a manner similar to that in which such proposal was publicized, make known the decision to withdraw.".●

BUDGET RECONCILIATION RESOLUTION

AMENDMENT NO. 27

(Ordered to be printed and to lie on the table.)

Mr. GLENN submitted an amendment intended to be proposed by him to the concurrent resolution (S. Con. Res. 9) revising the Congressional Budget for the U.S. Government for the fiscal years 1981, 1982, and 1983.

ADDITIONAL STATEMENTS

OUR URGENT NATIONAL SECURITY TASKS

● Mr. JACKSON. Mr. President, on March 28, I was honored to participate at Groton, Conn., in the commissioning ceremony of the nuclear powered attack submarine U.S.S. *Bremerton* (SSN-698) named for Bremerton, Wash., the home of Puget Sound Naval Shipyard.

I took the opportunity of my commissioning address to underscore certain urgent foreign policy and defense tasks facing this country.

I ask that the full text be printed in the RECORD.

The address follows:

REMARKS BY SENATOR HENRY M. JACKSON, MARCH 28, 1981

Four years and some ten months have gone by since the Jackson family joined in the keel-laying ceremonies for the U.S.S. *Bremerton;* two years and seven months have passed since we shared in the launching of this superb ship. During that time much has changed at home and abroad. But one thing remains the same. Hyman Rickover is still the pervading genius of our nuclear navy. Our thoughts turn with profound respect and affection to our long-time friend, Admiral Rickover, as we commission his latest contribution to the fleet.

As you know, the Jacksons have a special fondness for the *Bremerton.* She bears not only an honored Navy name, a great name from the State of Washington, but also, welded upon her keel, she carries the initials of my wife, Helen.

I am convinced that the American people are now ready and eager to restore United States strength and influence in the world. There is a new mood in the country. Americans are yearning to have this nation again strong and resolute, the trusted leader of the free nations, proud of its greatness. Moreover, there is a new understanding at the top of our government that we are in a continuing long-term military and political competition with the Soviets, and that we are not maintaining a competitive position.

What are the most urgent tasks? I want to underscore a few:

First: This country needs to restore its overall military strength. As I see it, a sturdy strategic equivalence with the Soviet Union is the indispensable foundation for an effective American foreign policy—one which meets our responsibilities and safeguards our interests around the world. But even if we succeed in maintaining strategic equality, areas like the Middle East and Southeast Asia will become more vulnerable to the growing Soviet capacity for regional intervention. Indeed, a substantial buildup in both our nuclear and conventional capabilities is absolutely vital.

At the same time, I welcome the Reagan Administration's emphasis on developing a more rational division of labor, under which our Atlantic allies and Japan will be asked to join us in providing more for the common defense. And I support the Administration's effort to reduce unnecessary costs in our defense programs—giving the American taxpayer the best return for the dollars spent.

Second: There is a special need to bolster deterrence and promote stability in Southwest Asia. Should Moscow establish a controlling presence in the Persian Gulf area, they would have a warm-water port, from which they would have access to the whole of the Indian Ocean and a broad highway to Third-World Nations. Hence, even if the area did not contain vast oil resources, it would be a great strategic prize for geopolitical reasons. But, of course, it does contain oil on which we and our allies depend.

The West has significant assets in the region. Israel, Egypt, and Turkey have substantial military capacity. Saudi Arabia and other Gulf states have a part to play. Taking advantage of what these countries can offer—in ways that are acceptable to them—is increasingly necessary.

And Secretary of Defense Weinberger is right that we cannot deter the Kremlin's efforts from seven thousand miles away. We require a credible American presence in the area with appropriate facilities—a clear signal to Moscow that our local military capabilities will make it too costly for them to consider exercising their military options.

What is lacking most of all is a well-considered, general strategy to deal with the range of threats confronting the region. The threats include not only direct Soviet military moves, but also indirect, more subtle forms of coercion, and internal insurgencies and military coups in critical states.

I urge President Reagan to give a very high priority to fashioning—with our key friends and allies—a coherent, overall strategy for the defense of Southwest Asia, before the time runs out.

Third: We must do our part to forge an enduring, constructive relationship with the People's Republic of China, and this we have only begun to do. As a starter, Americans need to accept the fact that China and the Soviet Union are fundamentally different countries, with different ambitions and different allies, and different intentions toward us. Our interests with respect to each of them differ, and the way we deal with them will be distinctive.

The key for us is China's strategic role in tying down on its northern border roughly 25 percent of the Soviet defense burden. For our part, if we keep America strong and resolute, we will be perceived by Chinese leaders as a credible counterweight to the Soviet Union—now China's main adversary. Also, we must vigorously abide by our normalization agreement with the People's Republic. If America violates that agreement, on such matters as how we deal with Taiwan, then Peking is free to depart from their part of the bargain. And basic to the deal is the understanding that Peking will be patient and peaceful in its attempt to woo Taiwan back to the mainland.

The Kremlin is now trying to rekindle the myths of detente, lull the world into complacency about Afghanistan, and pry apart West Europe, Japan, and America.

What fools Moscow has made of so many over the years. A classic case: taking us to the cleaners in the SALT II treaty, and then calling it equal, fair and verifiable. I am reminded of a comment made to me by China's Premier Zhou Enlai, "The leadership of Russia," he said, "will look you in the eye and lie to you."

As we get serious about our defenses, we need not abandon our longstanding goal of reaching truly equal, and truly verifiable accords with the Soviet Union to mutually reduce weapons of mass destruction. But we will never achieve this kind of stabilizing and durable agreement if we negotiate from a position of weakness and make gratuitous concessions. And the Soviets should understand that we are prepared to live in a world without arms limitation if they persist in their pattern of aggression and subversion, and continue to settle only for unequal, one-sided agreements.

My friends, this ship we commission today is an indispensable addition to American strength. The *Bremerton,* and her sister nuclear ships, will sail the seas as a reminder that the United States can stand up to the Soviet Union, help safeguard the interests of our friends and allies, and conduct wise and steady diplomacy.●

NOTICE OF DETERMINATIONS BY THE SELECT COMMITTEE ON ETHICS

● Mr. WALLOP. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD this notice of Senate employees who propose to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. D. Michael Harvey and Ms. Elizabeth A. Moler of the Committee on Energy and Natural Resources under the supervision of Senator JACKSON, to participate in a program in Ottawa on April 15 and 16, 1981, sponsored by a privately supported Canadian educational organization, the Centre for Legislative Exchange. The purpose of the program is to study Canada's recently announced national energy policy.

The committee has determined that participation by Mr. Harvey and Ms. Moler in the program in Ottawa, Canada, at the expense of the Centre, is in the interests of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. William E. Pursley of Senator MURKOWSKI's staff, to participate in a program in Ottawa on April 15 and 16, 1981, sponsored by a privately supported Canadian educational organization, the Centre for Legislative Exchange. The purpose of the program is to study Canada's recently announced national energy policy.

The committee has determined that participation by Mr. Pursley in the program in Ottawa, Canada, at the expense of the Centre, is in the interests of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. Mark Schneider of Senator STEVENS staff, to participate in a program in Ottawa on April 15 and 16, 1981, sponsored by a private supported Canadian educational organization, the Centre for Legislative Exchange. The purpose of the program is to study Canada's recently announced national energy policy.

The committee has determined that participation by Mr. Schneider in the program in Ottawa, Canada, at the expense of the Centre, is in the interests of the Senate and the United States.●

MR. REAGAN'S AND MR. HAIG'S REALISTIC VIEW OF MOSCOW'S WAYS

● Mr. GOLDWATER. Mr. President, an old friend of mine, Mr. Milorad M. Drachkovitch, who was the director of the Archives and senior fellow of the Hoover Institution, addressed a letter to the New York Times the other day which appeared in the February 21 issue. The letter is so much to the point, so direct, and explains in relatively few words exactly what the President and Alexander Haig have been trying to say and have said that I would like to make it available to my colleagues. I ask that it appear at this point in the RECORD.

The article follows:

[From the New York Times, Feb. 21, 1981]

MR. REAGAN'S AND MR. HAIG'S REALISTIC VIEW OF MOSCOW'S WAYS

To the Editor:

In his Feb. 3 Op-Ed article, Yuri Kornilov, political correspondent for the Soviet press agency Tass, expressed "concern and anxiety" about the emergent foreign policy of the Reagan Administration.

Mr. Kornilov accused the Administration of either deliberately misrepresenting the crux of the Soviet Union's foreign policy or analyzing it in a fundamentally erroneous way. He then explained the basic Soviet postulates as "peaceful and equitable cooperation with other nations . . . respecting the right of every people to be masters in their homes and resolving international disputes not by force of arms but peacefully, at the negotiation table."

As Mr. Kornilov wrote those words, the Soviet Union, which in the last several years has feverishly built a most impressive modern military machine, had at least 80,000 soldiers in Afghanistan and 26 divisions crouching at Poland's borders. It was continuing to send military aid to Vietnam, which not long ago utilized such aid to invade Cambodia. Its military advisers were supervising Cuban and East German military and police forces supporting governments in Angola, Mozambique, Ethiopia and South Yemen. Its military presence in Cuba was bolstering Fidel Castro's activities both in Africa and in the Caribbean.

How to reconcile the blatant discrepancy between the sweet and reasonable words of Mr. Kornilov and the stern realities of Soviet military and political expansion, direct or indirect, on four continents? Simple. They are a rather crude application of Lenin's neo-Machiavellian advice to his followers to speak in one way while pursuing completely opposite policies.

Mr. Kornilov must have studied Lenin's celebrated booklet "Left-Wing Communism, an Infantile Disorder," written in April, 1920, one of the greatest manuals on political warfare ever put together. The former President of the Communist International, Grigori Zinoviev, called this work "the gospel of the proletariat," adding that "for the tactics of Communist parties, this work is no less important than is Karl Marx's 'Kapital' for the theory of Marxism."

Among many of Lenin's precepts on how to wage a worldwide revolutionary struggle, is "resort to various stratagems, artifices, illegal methods, to evasions and subterfuges." The goal Lenin had in mind was penetration of the "reactionary" trade unions.

President Reagan might have employed undiplomatic language when he stated at his first news conference that "the only morality [the Soviet leaders] recognize is what will further their cause, meaning they reserve unto themselves the right to commit any crime, to lie, to cheat." Secretary of State Haig might have been indelicate when he charged the Soviet Union with "training, funding and equipping international terrorism." But both hit the nail on its Leninist head. And in his heart, Yuri Kornilov knows that they are right.●

THE WATER RESOURCES BUDGET

● Mr. ABDNOR. Mr. President, the Committee on Environment and Public Works recently studied with great care the various items within its responsibility that relate to the Federal Government's water resources budget.

By a vote of 11 to 1, the committee came to the conclusion that the Federal Government must not eliminate those programs within the Water Resources Council and the Office of Water Research and Technology that assist the States and regions in carrying out effective water development and research programs. If such an elimination occurs, it should take place with sufficient lead time to allow the States to make the transition without disruption.

While the dollar figures are rather modest ones, this is an important issue to national water development. Therefore, Mr. President, I ask that the appropriate portions of the committee's report to the Budget Committee be printed in the RECORD.

The material follows:

WATER RESOURCES

The committee voted to endorse the overall figures proposed by the Reagan administration for expenditures on water resources planning and development, with some minor transfers.

The committee recommends that $40 million be deleted from the fiscal year 1982 construction general account of the U.S. Army Corps of Engineers, with those funds to be transferred and divided between the Office of Water Research and Technology (OWRT) and the Water Resources Council (WRC), enabling those agencies to continue their important work. At $20 million apiece in fiscal year 1982, each agency would spend about one-third less than its fiscal year 1981 appropriations. Yet, these expenditures are necessary to assure continuation of the essential activities that Congress has conferred on these agencies.

WATER RESOURCES COUNCIL (WRC)

The committee urges that this program be continued, with current funding levels for its State program assistance grants ($10 million) and the various river basin commissions ($4 million), plus a reduced level of spending for administrative costs ($6 million). The Committee agrees with the Administration's decision to eliminate the WRC comprehensive national planning. The continuation of the matching State program assistance is particularly vital; without it many States would be compelled to cut back drastically on their water resources planning. If the Congress eventually transfers more responsibility to the States, they must have the capability to assume that responsibility.

OFFICE OF WATER RESEARCH AND TECHNOLOGY (OWRT)

The proposed fiscal year 1982 funding would continue, at current levels, the Federal support for the 54 State water research institutes located at land grant universities ($6,210,000). This seed money is more than matched by State and private funding and provides a valuable component of any national water resources effort. In addition, the Committee recommends reduced, but realistic, levels of funding for the matching research grants ($4,790,000), the saline research and demonstration program ($6 million), and overall program administration $3 million).

CORPS OF ENGINEERS

As stated previously, the Committee voted as offsetting $40 million reduction in the U.S. Army Corps of Engineers' construction budget for fiscal year 1982. While this change was made reluctantly, the Committee agreed that the merits of modest State assistance outweighs some of the lower priority construction work. . . .

The Committee also has recommended that the proposed fiscal year 1981 recissions in the WRC and the OWRT budgets not be approved. The funds for the proposed rescissions should be reallocated from the Construction General Account of the Corps of Engineers.●

BYELORUSSIAN INDEPENDENCE DAY

● Mr. DOLE. Mr. President, on March 29, the Byelorussian-American community in Brooklyn held a rally to commemorate the 63d anniversary of the proclamation of the Byelorussian Democratic Republic which took place in Minsk, the capital of Byelorussia. Byelorussian-Americans in my home State of Kansas and every other State of the Union joined in this celebration, if only in spirit.

Sixty-three years ago the citizens of Byelorussia savored the taste of freedom and independence following the fall of the Tsarist Russian empire. Almost immediately, the Government of the new independent Byelorussian Republic began to organize the national and local administration, the education system, the cultural activities, the restoration of the war-torn economy, and the formation of the national military forces. It

also began intensive diplomatic activities abroad.

This brief experiment with freedom ended on January 1, 1919, when the Soviet Union, during a period of Soviet expansionism, proclaimed its new colonial state, the Byelorussian Soviet Socialist Republic. Although the Byelorussian national armed forces staged a gallant struggle and made desperate but vain appeals for aid from abroad, they were soundly defeated.

Since that time, the Soviet Union, in violation of the Helsinki agreement, has continued to deprive the Byelorussian people of the human rights it pledged to observe under the Helsinki accord. Russification efforts have been aimed at stripping Byelorussia of its cultural and ethnic heritage. As is typical in Soviet-claimed territory, individuals continue to be imprisoned for speaking out on behalf of human rights. Nevertheless, the people of Byelorussia steadfastly continue to resist these Russification efforts, and to remind Moscow of its commitment to honor the Helsinki accord—even under threat of imprisonment and persecution.

SOVIET TROOPS IN BYELORUSSIA PREPARED TO INVADE POLAND

Byelorussia has been targeted as the westernmost site of Russian expansionism. As a result, Moscow has been conducting a fierce campaign of russification there aimed at the destruction of Byelorussian national identity. As Soviet troops stand poised to invade Poland, the geopolitical importance of Byelorussia becomes evident. There are currently Soviet troops stationed in the Byelorussian cities of Grodno and Brest who may be assigned to such an invasion.

VOICE OF AMERICA BROADCASTS

Needless to say, it is in the national security interests of the United States to prevent Soviet expansion. These interests are best served when the citizens of captive nations within the Soviet Union are informed of the nature of Soviet expansionism and the vitality of their respective cultural heritage in the United States. The Voice of America provides one means of communicating this information. Although the Voice of America does not currently broadcast to the Soviet Union in the Byelorussian language, the Byelorussian-American Association has asked me to lend my support to that goal.

Mr. President, I ask unanimous consent that a portion of a resolution adopted at the Byelorussian rally be printed at this point in the RECORD.

The Byelorussian language, the language of one of the largest nationalities in the USSR and one of the oldest ethnic groups in the United States, is being discriminated against by the Voice of America, which does not include the Byelorussian language in its programming. We, the participants of this rally, wish to once again express our long-standing frustration with this discrimination. We ask that the administration of the VOA and other concerned Government agencies recognize the inequity and unsoundness of VOA policy in this matter and move to include the Byelorussian language in VOA programming. Inclusion of the Byelorussian language in VOA broadcasts would foster closer relations with the Byelorussian people and the Byelorussian-American community.

Mr. President, this Senator thinks it would well serve our national security interests, especially during the present wave of Soviet expansionism, to investigate the inclusion of broadcasts in the Byelorussian language in future VOA programing.●

THE PROPOSED CONSOLIDATION OF FEDERAL ELEMENTARY AND SECONDARY EDUCATIONAL PROGRAMS INTO BLOCK GRANTS

● Mrs. KASSEBAUM. Mr. President, in our consideration of spending levels for education, training, and social services, we reviewed President Reagan's proposal to consolidate 45 separate Federal elementary and secondary educational programs into two block grants. These programs are aimed primarily at serving the special educational needs of economically disadvantaged and physically or mentally handicapped children and fall within the jurisdiction of the Committee on Labor and Human Resources.

We agreed that as in most other program areas there should be cuts there as well.

However, the majority of the committee believes that the spending cuts for these programs should be less than originally proposed by the administration. We did adopt, with my support, a spending level which is marginally higher than that proposed by the administration.

While our focus was on spending levels rather than on administrative procedures, there is considerable sentiment, as I read it, in favor of the block grant approach in this area. I am personally supportive of the grant block approach which gives greater power to State and local authorities to spend Federal assistance dollars in ways that fit their particular needs.

As we deal with handicapped programs, however, I want to study the administration's forthcoming block grant proposal carefully. Certain types of programs, particularly those of research and training, do not readily lend themselves to the block grant approach. Effective research and training can often be realized only at specialized institutions which have developed a great depth of expertise and breadth of experience.

The concentration of funds in those institutions with demonstrably successful programs would seem to be more cost-effective than thinly spreading funds in a per-capita block grant distribution. I think this is particularly true in regard to training and research programs and special education for the handicapped which in many respects is still in a new frontier.

We must be careful not to cripple those research and training institutions which in recent years have begun to produce results that are of enormous benefit to the entire handicapped community. It is quite likely that with the application of the block grant approach to the other operational handicapped program it will be all the more important to maintain the research and training programs on a discretionary, competitive basis.

Therefore, Mr. President, I do want to consult thoroughly with the members of the Labor and Human Resources Committee as they begin to consider proposed changes to the authorizing statutes.●

HANDGUNS

● Mr. PELL. Mr. President, the shameful, senseless attack on the President of the United States was shocking and horrifying to me, as it was to all Americans.

We are all relieved that the President has survived the assault and that the prognosis is for a complete and early recovery from his wound.

I earnestly hope that others wounded in the attack, James S. Brady, the President's press secretary; Secret Service Agent Timothy J. McCarthy; and Officer Thomas K. Delahanty of the District of Columbia Police Department, all will recover as much as possible from their wounds.

The shooting of President Reagan should serve as another reminder to us that we are tempting fate if we continue to permit boundless proliferation of firearms in our Nation.

The list of our national leaders who have been gunned down in the past 20 years is long and grievous, and it includes leaders in Government, in public affairs, in the arts and the sciences. But that list, grievous as it is, is only the beginning of the toll of tragedy. Added to it must be the hundreds and thousands of gun victims who were less prominent—not heads of State, but heads of families, fathers and husbands, wives and mothers, sons and daughters, whose lives have been snuffed out by pistols and firearms that can be obtained as easily as bubblegum.

I believe it is possible and indeed necessary to stem the flood of handguns that is engulfing our Nation. I see no reason why all handguns should not be registered and all owners of handguns licensed, just as we require that all automobiles be registered and all drivers be licensed.

Such a system would not infringe on legitimate ownership or use of firearms any more than our automobile laws infringe on legitimate uses of autos. Regulation and control of handguns would not eliminate violence in our society, but if regulations deterred one potential assassin and reduced the daily carnage of handgun violence, it would be worth doing and should be done.

Mr. President, an article in today's Washington Post traces the history of the handgun used in the shooting of President Reagan. As the story notes, it is but one of 15,000 to 20,000 cheap "Saturday Night Specials" assembled each month at just one handgun plant. I ask that the article from the Washington Post be printed in the RECORD at the conclusion of my remarks.

The article follows:

THE GUN: A SATURDAY NIGHT SPECIAL FROM MIAMI

(By Pete Earley)

The gun that shot Ronald Reagan yesterday was manufactured months ago, thou-

sands of miles away from the nation's capital in a small factory in Germany. The .22-caliber, blue steel revolver was then shipped in pieces to Miami, where it was assembled, thus skirting U.S. laws that make it illegal to import small, inexpensive foreign-made handguns.

The Roehm, model RG14 handgun is no stranger to American soil. The revolver is one of the best known handguns in this country, said gun experts and police.

It is best known as a Saturday Night Special—the type of handgun that Congress thought it was getting rid of when it passed the National Gun Control Act of 1968.

Foreign manufacturers quickly discovered a loophole in the tough gun act, officials said. The law said nothing about bringing gun parts into this country where they could be assembled. That is what the German-based Roehm company and dozens of other foreign weapon makers have been doing for more than a decade.

The gun that shot the 40th president was assembled at a Miami factory, one of 15,000 to 20,000 cheap revolvers that roll off its assembly line each month.

Despite the cost of overseas shipping, wages for assembly-line workers and extra costs of middlemen, when model RG14 finally reaches the public, its price tag is about $47.50—one of the cheapest pistols available.

Guns like the RG14 have made Florida the nation's top gun supply state for criminals, according to the Bureau of Alcohol, Tobacco and Firearms, which traces firearms used in crimes.

Identified by sources as the gun confiscated by the Secret Service after Reagan, press aide James Brady and two law officers were shot, the Roehm revolver is a six-shot, double-action, 15-ounce revolver that can fire any .22-caliber ammunition.

Its parts are shipped to RG Industries at 2485 Northwest 20th St., Miami, for assembly. William Kirk, a spokesman for RG Industries, refused to discuss the gun or his company. Employees and sources familiar with the company, however, said RG Industries was formed by the German-based Roehm family after the 1968 gun control act was passed.

The company's primary product is cheap handguns, and it employs up to 80 assembly-line workers. Last year, RG Industries sold an estimated $3.1 million worth of handguns, according to sources.

All of the weapons are shipped to wholesalers who distribute them to smaller gun dealers, hardware stores and pawnshops, the sources said.

The gun used to shoot Reagan was purchased Oct. 13, 1980, sources said, at Rocky's Pawn Shop in Dallas, Texas, like Florida, is considered by ATF as one of the five easiest states in the nation to buy handguns.

Federal agents seized the pawnshop's books within two hours after the shooting, officials said, but owner Isaac Goldstein told reporters that he remembers selling two model RG14s to a man who listed his name as John Hinkley—the name of the man accused of shooting Reagan.

"This gun is really a piece of trash," said one gun expert here when asked about the RG14. "It gives all guns a bad name. I've seen them when the bullets (in the cylinder) don't even match up to the barrel."●

AID TO EL SALVADOR

● Mr. PELL. Mr. President, the sentiments expressed in a thoughtful editorial on El Salvador, published in the Providence Journal on March 25, closely parallels the views that I have articulated since we as a nation have been struggling with that crucial issue. The point is made that El Salvador's most pressing need is economic assistance and that is the way we in the Congress can best help.

We should support the administration's economic assistance proposal so that the Salvadoran Government can continue its ambitious and vitally necessary land reform program, and its efforts to provide jobs in the industrial sector.

Furthermore, the funds would help El Salvador stay afloat economically, through the political turmoil which has seriously affected the economy. The economic assistance will help counter the appeal of the far left and the far right. It will serve to strengthen the moderates who valiantly work to restore peace and democratic government to that troubled land.

I continue to have problems with other aspects of the administration's policy in El Salvador. I am against a purely military solution to the situation because it is unlikely to succeed. A political solution arranged through the cooperation of the region's democratic nations should be supported by the United States. I also continue to have problems with certain aspects of the present Salvadoran Government, especially on the issue of the investigation of the murders of the four American churchwomen, about which I remain unsatisfied.

Yet, I believe that we have to support those inside El Salvador who seek moderation, and a better way of life for all sectors of the population through these troubled times. I ask that the full text of the Providence Journal editorial be printed at this point in the RECORD.

The editorial follows:

U.S. AID NEEDED IN SALVADOR MOSTLY ECONOMIC

Mounting protests against U.S. policy in El Salvador make it important for the American people to distinguish between beneficial and dangerous elements in the revolutionary struggle that envelops that country. From the not-very-well informed demonstrators who paraded in Providence last weekend to the leadership of five national Protestant denominations, the protests can be valuable only if they recognize the complexity of El Salvador's problems and the area where U.S. aid can be most helpful.

Years of dictatorship and repression by a small group of military officers and landholding families have created their own internal opposition. And measures that would clearly align the United States with this right-wing group can only alienate the mass of the people, which includes what is left of the middle class and a large segment of leftist but undoctrinaire moderates.

Clearly there is a hard-core Communist group that is not interested in compromise and that would prefer to see the current junta government fail in its goal of reform both economic and political. That group is small, estimated by U.S. government sources at only several hundred. Success for the junta and for U.S. policy lies in separating the moderate leftists from the Communists.

Fortunately, the guerrillas failed in their campaign of January to overthrow the junta and set up a more radical government. They failed because they attracted little support from the mass of the people or the Christian Democrats who have been backing the government. The Catholic clergy has been backing away from the guerrillas. Moreover, the Nicaraguan government seems to have had second thoughts about supplying arms to the guerrillas, in view of its need for economic aid from the United States.

Thus, the current situation calls for a minimum amount of military aid. The military threat from the guerrillas has receded. The number of U.S. military advisers is not likely to be increased for the obvious reason that they could spark a backlash among the people. El Salvador's most pressing need is for economic aid. That's why Congress was asked yesterday to double the aid appropriation to $128 million, to help the junta fend off bankruptcy, while it proceeds with the land redistribution program that is the proof of its sincerity to the landless peasants. The aid also is needed to create industrial jobs, since the country just doesn't have enough land to go around.

Meanwhile, the right-wing military in El Salvador, which has been responsible for thousands of murders or has at least condoned them, must be kept from extreme measures, such as a new attempt at a coup. Time is on the side of revolution in El Salvador—and probably other Central American countries, too. If the extreme right is permitted to renew its police-state methods, then what remains of the moderates, will be thrown permanently into the arms of the Communists and when the final overthrow of the increasingly isolated right does occur, there will be no room for moderates or for democratic government.

U.S. advocates of intervention in El Salvador can do no better than to recall the course that the Portuguese revolution took. The first government to succeed the dictatorship there was Communist-dominated. Yet aid supplied by Socialists and Christian Democrats in other West European countries enabled the moderate parties to come back and win an overwhelming victory over the Communists. Careful nurturing of democratic forces can still have the same result in Central America.●

THE APPALACHIAN REGIONAL COMMISSION AND ITS PRODUCTIVE PROGRAMS SHOULD BE CONTINUED

● Mr. RANDOLPH. Mr. President, there is no greater evidence that the President's spending reduction proposals were hastily developed without consideration of the consequences to the American people than in the totally unjustified decision to eliminate the Appalachian Regional Commission and all of its nonhighway activities. Even a cursory examination of the structure and operation of the Commission, of its achievements and potential, would have resulted in the opposite conclusion.

The Appalachian program was initiated in 1965 to address a particularly serious set of socio-economic concerns in a 13-State section of our country. This region traditionally lagged behind the rest of the country in virtually every measure of economic strength.

The Appalachian program instituted a unique approach to solving these problems. The program is founded on the concept of partnership in which the States and the Federal Government operated as equals. Programs and projects are initiated at the local and State levels: They are not imposed by the Federal Government from Washington.

Mr. President, I know of no more precise description of the concept of the Appalachian Regional Commission and its value in the years ahead than that enunciated by Donald W. Whitehead, Federal cochairman of the ARC for 6 years under Presidents Nixon and Ford. Mr.

Whitehead, who describes himself as a lifelong Republican and a political conservative, presented testimony to the House Subcommittee on Economic Development for a hearing conducted on March 13 of this year. I quote briefly from Mr. Whitehead's statement.

I fear that the Administration's proposals to date have overlooked the value of the ARC's shared power process not only as an effective mechanism for shifting power back to the states and local governments and making better public investments, but also as a way of winning gubernatorial acceptance of federal budget cuts.

Mr. Chairman, the ARC shared power process is a proven system for enabling Governors to allocate federal funds coming into their states, to participate in writing the guidelines defining the terms under which those funds will be spent, and to select the projects deemed most important for meeting the needs determined by the local and state governments—by those closest to the problems and those who, after all, bear the primary responsibility for solving them.

This ARC shared power process is a working demonstration of the principles President Reagan has enunciated for his domestic program. It can be cited as proof that these principles, if embodied appropriately in the right institutional framework, will produce more effective use of the tax dollar in whichever program area or areas, and at whatever level (greater or lesser). And if the process works in West Virginia and parts of Alabama, Georgia, Kentucky, Maryland, Mississippi, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee and Virginia, it ought to be replicable nationwide.

Since the Appalachian program was initiated there has been substantial progress in the region toward goals established in 1965. While the Appalachian Regional Commission cannot take sole and total credit for all of the improvements, the following have been achieved:

Per capita income in the region has risen from 78 to 86 percent of the national average.

The poverty level has declined from over 31 to 14 percent and is falling at a faster rate than that of the Nation.

More than 1.5 million new private sector jobs were created between 1965 and 1978.

The percentage of people getting a high school education is moving toward the national average; up from 33 to 53 percent compared to a national average of 64 percent.

The rate of infant deaths between 1960 and 1977 declined from 26.5 per 1,000 to 14.3 and now more nearly approximates the national rate.

The historical pattern of outmigration has been totally reversed. Between 1970 and 1980 the region has gained an average of 100,000 persons a year from inmigration and population growth rate is near the national average.

Through the locally initiated planning process a wide variety of activities has been undertaken with Appalachian Commission support. It is important to remember that the Appalachian program, like that of EDA, is to a considerable degree that of a catalyst. Many nonhighway projects are carried out with minimal participation of actual ARC funding. It is the availability of these funds, however, that often makes the difference in obtaining support from other Federal, State, and private sources. The process is intended to assure the best use of these scarce resources.

Mr. President, a Member of the House of Representatives, in recently criticizing the Appalachian program, observed that of $60 million worth of Appalachian projects in his district, only 7 percent of the money came from Commission funds. I submit that this individual completely missed the point and the philosophy behind the Appalachian program. As I have indicated, it is a major purpose of the Appalachian program to be a catalyst and to provide seed money to make projects possible. A $60 million return on a 7-percent investment by the ARC is indeed an admirable record, and it demonstrates the validity of this approach.

Since its inception the Federal Government has invested $4.3 billion through the Appalachian Regional Commission. Of this amount $2.6 billion were dedicated to work on the 3,025-mile development highway system which is intended to make the rugged terrain of our region more accessible and thereby more attractive to economic development. Another $1.7 billion was allocated to nonhighway activities covering a wide range of service and developmental projects. These funds have brought to Appalachian projects $1.7 billion in State funds, $1.8 billion from local governments, and $1.6 billion in other Federal funds.

A few of the varied types of ARC-sponsored activities are as follows:

Twenty different types of child development services that have reached 330 counties and served about 200,000 families.

Assistance to over 500 schools in providing job-related vocational and basic educational skills. More than half of Appalachian 11th and 12th graders are now getting technical and vocational job-related training.

Over 1,800 miles or approximately 60 percent of the development highways authorized for assistance are complete or under construction.

Assistance to projects which will provide over 21,000 units of critically needed housing in the region. Some 10,519 of these units have been completed; another 2,100 are under construction.

Over 1,472 community improvement projects such as water and sewer systems, community improvements and industrial parks.

Mr. President, I have received expressions of support for the Appalachian program from throughout the region. In many instances these are accompanied by examples of what the Appalachian program means to communities. I recently received a letter from Robert H. Musselwhite, county administrator of Upshur County, W. Va. He wrote as follows:

You are aware that West Virginia struggles as do other parts of the Appalachian mountain chain to provide basic services that many other areas of the country have long since established and would not consider disposing of. I am speaking of road systems, sewer systems, adequate water facilities, adequate health care; and I know that in some states recreation is considered to be an essential service. West Virginia's volatile economy has produced over the years a tendency toward an incapacity to produce a tax base that could help us to help ourselves. It is for this reason that the work of the Appalachian Regional Commission is especially important to us in helping us break the cycles created by an overdependence upon extractive types of industries.

Such projects funded by the Appalachian Regional Commission may be luxuries in other parts of the conutry but are basic necessities in my county.

While substantial progress has been made there is much to be done. There remains a high level of rural poverty in the region, at least one-third higher than the national average. The medium number of school years completed in Appalachia is a full year behind the national average, and more than half of the Appalachian counties has infant mortality rates above the national average. It is unrealistic to suppose that local and State governments can fill the gaps created by the abrupt ending of the Appalachian program.

The almost total rescission of Appalachian funds for fiscal 1981 would have an immediate and widespread effect in the region. It would eliminate 706 pending projects representing 2 to 3 years of work by local officials, organizations and citizens. These projects directly affect 4 million people.

Again, a variety of projects would be ended this year including 65 established child development projects and 16 proposed new projects. In addition, 155 health projects, 102 education projects, 14 State housing projects and 26 energy-related projects would be among those lost this year. The absence of funding in fiscal 1982 would have a comparably serious impact.

The operation of the Appalachian Regional Commission clearly is consistent with the stated objectives of the administration to make economic development an activity primarily concentrated at the local and State levels. This program, therefore, should be continued for two reasons.

First, to evaluate the ways which the Appalachian experience might be translated into a national effort; second, a continuation at least through fiscal 1982 would permit a transition to a revised program or even orderly termination of the existing effort without the shock effect that would be produced by the President's proposal.

Spokesmen for the administration have maintained that the impact of the ARC program in the region is "unidentifiable". That assertion is unfounded. While the program cannot and does not take credit for all of the regional progress in the past 15 years, there is ample evidence that it has helped to create a climate for a substantial amount of this achievement.

Mr. President, this issue was addressed eloquently and accurately by our colleague from Kentucky, Senator HUDDLESTON, in a letter of March 5, to President Reagan. I ask that Senator HUDDLESTON's letter be printed in the RECORD at the conclusion of my remarks.

Mr. President, from the beginning the Governors of the 13 Appalachian States have been intimately involved in the development and execution of Commission programs. Perhaps more than any other group, they know best the impact on their States of this unique partnership effort.

Almost immediately after the new administration made known its plans to terminate the Appalachian program there was a response from the Governors. On February 1, Gov. Lamar Alexander of Tennessee, assumed the office of State cochairman of the Appalachian Regional Commission for 1982. On February 13, he directed a letter to David Stockman, Director of the Office of Management and Budget, in response to the Presidential proposal to eliminate the Appalachian Regional Commission. His words are representative of the attitude of the Governors to this program, and I shall ask that Governor Alexander's letter be printed in the RECORD at the conclusion of my remarks.

On February 24, 1981, the Governors of the Appalachian States met in Washington and adopted a resolution strongly recommending such an approach. This bipartisan resolution, which was supported both by Democrats and Republicans, acknowledged the possibility of reduced funding levels during 1981 and 1982. It also called on President Reagan to appoint a representative to work with the Governors in planning for the future. This is an imminently sensible approach and one that should be followed. It will not work, however, unless the Congress provides an adequate level of funding for the ARC through fiscal 1982. I strongly support such continued funding.

Mr. President, I shall also ask that the resolution of the Appalachian Governors be included in the RECORD at the conclusion of my remarks.

Mr. President. I gave consideration to offering an amendment to Senate Concurrent Resolution 9 to provide continued funding for the Appalachian Regional Commission for fiscal 1981–82. In 2 days of caucus, Democratic Senators agreed to a limited number of amendments which would be proposed to this measure. These address issues with broad national impact, and it is appropriate that they receive our attention during the limited time available for debate on this bill. For that reason, I will not propose additional funds for the ARC at this time although I firmly believe that the Appalachian experience has implications far beyond the borders of our 13-State region.

I am pleased that the Committee on Public Works and Transportation of the House of Representatives has recommended to the Budget Committee in the other body a continuation of funding for the Appalachian Commission even though it is at a reduced level consistent with reductions imposed on other Government activities. I commend the Members of the House for their action and I urge Members of the Senate to endorse this action when a conference on Senate Concurrent Resolution 9 is held.

The letter and the resolution follow:

STATE OF TENNESSEE,
February 13, 1981.

Mr. DAVID STOCKMAN,
Director, Office of Management and Budget, Old Executive Office Building, Washington, D.C.

DEAR MR. STOCKMAN: This is in response to the President's plan to eliminate the Appalachian Regional Commission from the Federal budget in the next fiscal year and eliminate the non-highway funds in the current year. His letter says that responses are due within 48 hours.

The federal ARC Co-Chairman, Al Smith, is responding separately.

As states' co-chairman, I won't presume to speak within 48 hours for the governors of the 13 Appalachian states. On my own, I offer these thoughts:

(1) Tennessee spends and administers $1.3 billion in federal funds. The best spent—in terms of impact for the benefit of the most families—is our $11 million of ARC non-highway money. This is because local and state officials annually set priorities for the spending and parcel out the funds sparingly. There is virtually no overhead;

(2) You should not eliminate non-highway funds in the current year. Local governments have made obligations based on them;

(3) Rather than eliminate ARC, you may want to consider spending more of the remaining federal funds through such structures. It permits state and local planning with a federal veto, a lot better system than in *any* of the 500 plus categorical grants.

I want to support, as I believe most governors do, the President's effort to reduce federal spending. I am willing to accept Tennessee's fair share of reduction in federal spending to help in this effort It is impossible to tell what is a "fair share" of the load until I see an outline of the entire budget.

Therefore, I am suggesting by this letter to the other ARC governors that we listen to what the President has to say February 18, study his proposals, consult with our Congressmen and Senators and then respond promptly to his proposals.

The governors' response will come shortly after we meet in Washington at 1:00 p.m. on February 24.

Sincerely,

LAMAR ALEXANDER.

U.S. SENATE,
Washington, D.C., March 5, 1981.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: The Administration's approach to the Appalachian Regional Commission alarms me because it shows total unfamiliarity with the purpose of the program, the ARC's significant visible impact in the region and the public confidence and acceptance it enjoys. I offer the following illustration in response to the charge the ARC's impact in the region is "unidentifiable".

Item: In 1977, the American Enterprise Institute published its study of the ARC program and discovered, much to its surprise, that the ARC program ranked higher in terms of effectiveness and public confidence than any other federal program—including revenue sharing. A copy of that report titled Shared Power has been provided to OMB analysts and has been widely distributed.

Item: ARC early in its program developed a long-range plan to construct a system of highways which, with the national interstate highway system, would open up areas of the Appalachian region with a developmental potential. Today, this 3,025 mile Appalachian Development Highway System is almost 60 percent complete, with 1,806 miles open to traffic or under construction.

Item: At the beginning of the ARC program, the region's young people were leaving in droves to find work in the cities of Cincinnati, Cleveland, Chicago and Detroit. The Commission began to systematically build vocational schools until every county in the region had the facilities to provide vocational training. Today, industry is beginning to thrive and prosper in these areas where there is a skilled work force. The out-migration of the youth has been arrested and, in fact, has been reversed.

Item: Health facilities have been modernized and built where not previously in existence. Approximately 30 clinics are in operation and serving areas that have been without medical care. Health care for children and working mothers continues to be a pressing need in approximately 50 counties of the region. To meet this need, the ARC assisted in the establishment of three medical schools and the development of family practice residency programs in two others.

State and local governments have committed their resources to 20 new projects for FY 1981 that are designed to deal with the problem of infant mortality. Central Appalachia has the highest infant mortality rates of any area in the nation. Portions of Appalachia continue to be at the very bottom of the ladder and have the highest incidence of economic and social needs. A rescission of FY 1981 non-highway funds will cause severe hardship to the people of Appalachia if these projects, and others which are also important are not funded.

Item: 1978–79, the ARC provided the leadership to prevent the bankruptcy of dozens of hospitals and clinics that were threatened with collapse due to the combined effects of severe floods, and the decline in coal production that depleted the miners' welfare and retirement funds.

Item: The ARC fostered the establishment of multi-county planning and development districts. These districts provide technical assistance to local governments, promote industrial development, and encourage local governments to cooperate in providing improvements which could not be undertaken separately.

The ARC has not addressed some of the region's fundamental problems, but it is simply incorrect to say that the impact is unidentifiable. The Commission programs have succeeded in reversing decades of neglect. While significant progress has been made, there are still critical special needs which remain. The Appalachian Regional Development program is one of the least understood programs in the federal government because it is not solely a federal program.

The ARC is a federal-state partnership. The thirteen states are 50% of the program and contribute half of the funds to support the program's administration. The employees of the ARC are not federal employees and are expected to serve the needs of the federal and state sides of the program.

The Governors of the thirteen states together with a representative of the President make the policy and spending decisions for all projects funded by the ARC. It provides a forum where national priorities are refined to meet and also serve the critical needs of states and local communities. This is unlike any other federal program where the states have no inputs and must comply with myriad federal regulations.

It seems to me that if this Administration is serious in its declarations to delegate more responsibility and authority to the states that it should look at one of the most viable devices for achieving that goal.

Mr. President, the region called Appalachia needs the Appalachian Regional Commission. If this Nation is to succeed in achieving energy independence, it must successfully develop its own energy resources. Among these resources is coal. Any major expansion of coal production is going to overwhelm the ability of state and local governments to cope with the great range of problems that will accompany this development. In the East, it is the ARC that can best provide the policy and planning framework to pull together federal and state actions in this enterprise.

I share your concern about the size and cost of the federal government—it must be reduced. However, it would be penny wise

and pound foolish to attack a program that is one of the most cost-efficient and widely accepted public investment programs.

Recommendations:

In the area development program, the ARC should be directed to concentrate its efforts in two areas: 1) expanding the housing industry through the state housing authorities; and 2) to continue to address the serious problems of inadequate health care.

The Commission's FY 1981 area development funds should not be rescinded. For FY 1982, there should be continued funding for these Commission programs at a level reflecting a fair share of necessary budget cuts.

The Appalachian Development Highway System is the most important Commission program in fostering economic development in Appalachia. The transfer of this program to the Federal Highway Administration in FY 1981 would be a serious mistake. Legislation to provide future funding from the Highway Trust Fund may not be in place by the beginning of FY 1982. A number of issues must be resolved. For example:

Who will review and approve centerline locations?

What priority system will be followed?

Why do you expect Congress to permit funding of this program from Highway Trust Fund revenues without the additional revenue from the suggested 2 cents increase in the gas tax?

How will you allocate funds among the Appalachian states?

How many years of funding, and at what levels of authorizations, do you intend to propose and then support with appropriation requests?

What provision will you make for those states that have prefinanced projects on the Appalachian Development Highway System?

What will happen to the access road program? Will funding be provided to complete projects approved by the Commission? Will access road projects be approved after transfer of the highway program to FHWA? Who would do this if the Commission is still in existence?

I support the enclosed resolution passed by the Appalachian Governors on February 24 as it pertains to the Appalachian Highway program. I recommend that you work with the Governors in developing long-range solutions for the program.

The ARC has not addressed certain long-term regional issues. The Commission must develop a program of dealing with the long-term energy development issues confronting the eastern coal fields—mine safety, employment, transportation, housing, marketing, land reclamation and environmental protection. You have an opportunity to correct this with new direction.

I am very much afraid the Administration's announced intentions for the Appalachian Regional Commission will amount to an abandonment of a vital mission, sustained over four previous administrations, attacking the problems of Appalachia and its people. In your efforts to make even-handed reductions in programs of the federal government, I hope you will seriously consider the devastating impact such a policy direction as eliminating the ARC will inflict upon the existing critical needs of the people of Appalachia. The opportunity stands before you to make the determination as to just how the Commission process could be used to assist in carrying out your objectives nationally. I encourage you to neither be unmindful of the needs for the future, nor the very real progress of the past through the efforts of the Appalachian Regional Commission.

Sincerely,

WALTER D. HUDDLESTON.

APPALACHIAN REGIONAL COMMISSION

(Resolution Number 523S, February 24, 1981)

A Resolution of the Appalachian Governors Concerning the Appalachian Regional Commission

We support the President's determination to limit federal spending and agree that the Appalachian Regional Commission should take its fair share of the cuts. We are concerned because the Administration proposal terminates the Commission. We wish to call several matters to the attention of the President and the Congress:

ARC's effectiveness is based on a system of sharing power in the conduct of government business which is consistent with the President's determination to shift power from Washington to the states so that national priorities can be adapted to the real needs of states and local communities.

The Commission program is succeeding. Substantial and visible progress is being made in reversing decades of neglect. However, special needs remain.

More than 700 Appalachian communities will suffer unfairly if their projects to which we committed ourselves are denied funding by rescission of ARC FY 1981 funds.

Continuity of progress on the ARC highway system is essential. The President's proposal for future funding out of the Highway Trust Fund requires legislation which may not be in place by the beginning of FY 1982.

State capacities to assume responsibility for ARC nonhighway activities will be affected by passage and implementation of flexible block grant programs which may not be in place by the beginning of FY 1982.

Therefore:

We urge the President and the Congress not to rescind remaining ARC FY 1981 nonhighway funds.

We urge the President and the Congress to provide continued funding for ARC highway and nonhighway programs in FY 1982 at whatever levels reflect a fair share of federal budget cuts.

We urge the President to appoint a representative to work with us during the next 90 days to determine how our experience with the ARC process might be used to carry out the President's programs nationally. We commit ourselves to a cooperative, bipartisan effort. We will submit our recommendations promptly, along with various options, including a possible orderly phase-out of the Commission.●

PROPOSAL FOR A FAIR SHARE DISTRIBUTION OF FEDERAL FUNDS

● Mr. QUAYLE. Mr. President, as the Senate completes the initial phase of the reconciliation process I urge my colleagues to insure an equitable allocation of Federal funds. To accomplish this fair share distribution, I recommend that no State receive less than 90 percent of its per capita share of Federal funds approved for consolidated programs in the areas of health, education, and social services.

This fair share distribution of funds will not add one penny to total Federal spending.

Presently funds for programs that will be included in the several block grants are divided among the States using a myriad of rules and criteria. In some cases these rules are sensible for a specific program but irrelevant to a block grant. In other cases the allocation formulas seem to have favored those who were willing to spend the most time—and money—in unraveling bureaucratic redtape.

Now is the time to do away with complexity, and grantsmanship, in Federal programs for the needy. Now is the time to correct the imbalances that have arisen as the direct result of current allocation practices. The equity of Federal funds distribution will become crucial to a number of States when block grants are put in place if they are based upon current funding levels.

The wide variety of distribution formulas must be consolidated along with the programs. In some cases it may be necessary to define a relevant population subgroup for purposes of computing the per capita distribution—for example, school-age children for the education block grant. In addition, some States have older, more needy populations, or substantially more handicapped citizens. By setting the fair share standard at 90 percent of the per capita distribution, allowances can be made for unusual circumstances while retaining the principle of equitable allocation of Federal funds.

The President has recommended a 25-percent reduction in block grant programs. If these block grants are based on 1981 Federal fund receipts, then States like Indiana, North Dakota, Idaho, Michigan, Ohio, Louisiana, Utah, and others that are net losers would be locked in to receive 75 percent of this already less-than-fair share.

I believe that dividing the funds based on population is an equitable proposal. Furthermore, I acknowledge that sacrifices have been called for and will have to be made. What I am asking is that the consolidated block grants be distributed so no State receives less than 90 percent of the amount to which it would be entitled based upon population.

This is a fair distribution so that all share equitably in benefits and sacrifices.●

CONSERVATION AND LAND USE

● Mr. MATHIAS. Mr. President, we Americans are the only people on Earth who have managed to land their national bird on the endangered species list. We are also guilty of such thoughtless misuse of Earth's bounties that it is no wonder our planet has been called the lunatic of the solar system. Modern man, with Americans in the forefront, has almost—but not quite—fouled his own nest to the point where it is no longer fit for his habitation.

That is the bad news.

The good news is that in the past when Americans have been brought to the brink of ecological disaster and have peered over the brink into the abyss, they have been able to draw back in time. The result is that fish have returned to the Potomac River and the Cauhoga no longer catches fire by spontaneous combustion of the pollution on its surface. The Chesapeake Bay is on the mend and the American eagle soars again. Through

a series of near disasters Americans have learned to have a care for clean water and for clean air and we have made noticeable and heartening progress in these areas.

But the American consciousness still needs raising on the subject of conservation and land-use. I am confident, based on past experience, that once the educational job is attacked action will follow. For this reason, I would like to have printed in the RECORD at the conclusion of my remarks a very short editorial that appeared in the March 19, 1981, issue of Country Life, that quintessential journalistic expression of the English people's love of nature. The lead line of this editorial sounds the alert:

Should we destroy the present basis of life on Earth, not by nuclear war but, as seems more likely, by the slow degradation of our habitat, any intelligent humans who survive will know that the tragedy was the more poignant because, all over the world, informed men and women were aware of what was happening.

I think that poignant tragedy is avoidable. I firmly believe that informed men and women will act before it is too late. But, since this editorial suggests that the opposite may be the case, I ask that it be printed in the RECORD for the solemn warning it contains and because it suggests small ways, practical ways, to move back from the brink before it is too late.

The editorial follows:

CONSERVATION AND LAND-USE

Should we destroy the present basis of life on earth, not by nuclear war but, as seems more likely, by the slow degradation of our habitat, any intelligent humans who survive will know that the tragedy was the more poignant because, all over the world, informed men and women were aware of what was happening. In 1972, the UN Conference on the Human Environment first put the issue firmly on the platform of world politics. In 1980, the International Union for Conservation of Nature and Natural Resources published World Conservation Strategy (Country Life, March 13, 1980, page 740) to stress the need for urgent action by governments, industry and land managers to conserve living resources. The Strategy pointed to three main objectives: the maintenance of ecological processes and life-support systems; the preservation of genetic diversity; and the proper utilisation of species and ecosystems.

But what, in 1981, in this small country, can we do about it? There are two things that we have within our power: we can set our own house in order; and we can set an example. The Nature Conservancy Council, which is the statutory body responsible for nature conservation in Great Britain, in its annual report just published (HMSO, £4.90), points to ways in which both those national objectives—which have the advantage of being extra-political—can be achieved. "The problem of global resource depletion", says the Report, "might at first sight seem rather remote from our concerns in the United Kingdom. But the impact which this country has on wildlife and natural resources, both at home and abroad, is considerable. As one of the most densely populated countries in the world, with high levels of pollution and consumption . . . the United Kingdom probably does more than its fair share of resource depletion." The way ahead, the Report suggests, lies in more effective use of resources, which will in turn reduce pressure on the environment. There is, therefore, "a pressing need for an integrated policy of land-use". That need has already been proclaimed many times in Country Life. For the past 35 years each government department has used land as though its own problems were the only ones that mattered. For example, new towns and motorways have been built over first-class agricultural acres.

In the international sphere, suggests the Report, the UK, in co-operation with its EEC and Commonwealth partners, can take steps to regulate the activities of European-based companies in developing countries. "For instance, timber companies should be more selective in their felling programmes and should give more consideration to replanting with the species of tree exploited." The second of these two proposals may be harder to achieve. What happens in the rain forests of South America may be beyond our control. But at least we have no excuse for continuing to misuse our own land.●

THE CHINA FACTOR

● Mr. GLENN. Mr. President, on March 19, 1981, a group of persons from the Government, business, the professions, the academic community, foundations, and the communications media met at Arden House in Harriman, N.Y., for the 59th American Assembly on the China Factor. This assembly was cosponsored by the Council on Foreign Relations. For 3 days the participants discussed the impact of Sino-American normalization on the global scene, options available to the United States for further developing its bilateral relations with the People's Republic of China, and the consequences for U.S. national interests in other areas of the world which will result from those relations.

On March 22, following their discussions, the participants produced a report which contains both assessments and recommendations. I urge all my colleagues to read this report which I wish to have inserted in the RECORD.

Special praise is due William Sullivan, president of the American Assembly, Winston Lord, president of the Council on Foreign Relations, and Dr. Richard H. Solomon of the Rand Corp., who were responsible for this very successful conference.

The report follows:

THE CHINA FACTOR

FINAL REPORT OF THE FIFTY-NINTH AMERICAN ASSEMBLY

At the close of their discussions the participants in the Fifty-ninth American Assembly, on The China Factor, at Arden House, Harriman, New York, March 19–22, 1981, reviewed as a group the following statement. This statement represents general agreement; however, no one was asked to sign it. Furthermore, it should not be assumed that every participant subscribes to every recommendation.

INTRODUCTION

The normalization of United States relations with the People's Republic of China in the 1970s consituted a major and positive development in U.S. foreign policy. Normalization removed major burdens from our international relations and national security planning, enhanced United States strategic flexibility, imparted greater stability to the Asian region, and opened up prospects for bilateral cooperation on a range of economic and other issues.

Despite the remarkable progress of the past decade, there are uncertainties about the future of U.S.-PRC relations, especially in the area of security cooperation. There has been a significant reduction in U.S. expectations regarding its now-normal dealings with China. With the perspective of ten years of direct contacts, the PRC is now seen to be a regional rather than a global power, a developing country struggling with the problems of political instability and economic and social modernization.

This reduction in expectations, in contrast to the heady euphoria of some earlier years, now provides a healthy realism to the relationship. It also suggests that the early 1980s will be a period of consolidation of the rapid gains in U.S.-PRC relations of the 1970s rather than a time of dramatic new developments. Yet the constant, step-by-step, promotion of a positive U.S.-PRC relationship represents an investment by both nations in long-term strategic equilibrium and economic benefits. Conversely, a significant deterioration in Sino-American relations would seriously harm U.S. political, security, and economic interests.

Both sides are concerned about the stability of the relationship due to uncertainties about leadership and policy. Development of the relationship is constrained by differences in social and political values and institutions—in contrast, for example, to America's close relationship with Japan. There remains in the U.S. a concern for individual and political rights throughout the world. Yet the United States and China share important international security concerns; and it is in the U.S. interest to assist the economic and social development of China.

Meeting the Soviet challenge to American and Chinese security has been and is likely to remain a major stimulus to the evolution of U.S.-PRC relations. Nevertheless, the future of the relationship should not be based solely on the issue of resistance to Soviet expansionism. In any event it is important to broaden ties in ways that will contribute to regional stability and help stabilize the bilateral relationship through the expansion of mutually beneficial trade; cultural, professional, and other exchanges; and the training of new generations of talent in the sciences and engineering, arts, and social sciences.

It is in America's interest that China progress in its current development policies—which stress domestic modernization and open relations with the U.S., Japan, and Western Europe. The failure of these policies, or a loss of mutual confidence in the political and security aspects of the relationship, could lead to major changes in the PRC's political orientation which would confront the United States with much less favorable alignments and circumstances in Asia and the world than exist at present.

U.S.-PRC FOREIGN POLICY COOPERATION

American and Chinese policy interests and objectives intersect at specific points rather than running parallel across a broad spectrum of issues. On the key strategic question of restraining and resisting Soviet military and political pressures on the two countries and on third parties throughout the world, there is a sense of common objective even if not always of common means. This has produced major gains for the conduct of American foreign policy.

U.S. and Japanese security concerns have been fundamentally altered as a result of the improvement in China's relations with both countries. The PRC is no longer seen as a military threat. China policy is no longer a divisive issue in Japanese-American bilateral relations. Both the U.S. and Japan have been able to develop productive relations with the PRC while preserving their own close ties.

China's interest in avoiding a new conflict on the Korean Peninsula improves the prospect for stability in Northeast Asia. Encouraging the Chinese to sustain this interest should be a high priority American objective. Over time this could contribute to further easing of tensions between North and South Korea, even though at present U.S. and Chinese approaches to resolving the continuing differences between the two Korean states diverge sharply.

In Southeast Asia, China's interest in resisting Vietnam's control of Indochina and the consolidation of a Soviet foothold in the region is shared both by the U.S. and the states of ASEAN (the Association of Southeast Asian Nations). Nevertheless, Chinese policy approaches, tactics, and long-term objectives are not fully shared by the U.S. and the ASEAN countries. While consulting with China on common interests in this region, it is important for the U.S. to continue to distinguish between PRC objectives and those of the U.S. and its other friends.

China's concern for Pakistan's security in the face of Soviet aggression in Afghanistan, and over a possible further Soviet thrust toward the Persian Gulf and the Indian Ocean, represents both a strategic interest shared by the U.S. and an area for closer Sino-U.S. consultation.

In these and other areas around the periphery of the PRC where China's security interests and political reach are deeply engaged, it is important that the U.S. consult closely with Peking even though policies not be directly coordinated or worked out in a collaborative manner. At the same time, the U.S. must continue to work closely with its long-time friends and allies to ensure that their policies and our own are in harmony and that they are aware of U.S. consultation with the PRC.

Elsewhere in the world, China's political, economic, and strategic involvement and influence are much more limited. PRC interest in the strength and unity of NATO, and concern over developments in the Persian Gulf area, reflect its concerns that Soviet power be deterred at the western and southern boundaries of the Soviet Union. This reinforcing of broad American and allied security objectives is helpful to the West. At present, however, the Chinese can play only a limited direct role through diplomatic support and public encouragement.

China's interest in preserving relations with Third World countries frequently results in its taking positions which seem contrary to those of the U.S. While at times these are an irritant, they reflect the independent foreign policy posture of the PRC and, on balance, enable it to work effectively and in ways which parallel American interests in countering interventions by the Soviet Union and its proxies. In specific circumstances, there may be opportunities for U.S.-PRC consultations which would ensure that each country is fully aware of the interests and policies of the other.

Recent shifts in China's policy regarding relations with violent political movements may lead Peking to limit its involvement with insurgent and terrorist groups in Third World countries. Particularly in Southeast Asia, this has eased pressures on some countries of the area, although Peking has maintained its formal endorsement of Communist Parties in the region, and suspicions of China remain strong. Elsewhere, the PRC has preserved political contacts with revolutionary groups and, while not necessarily following the same course as that of the U.S., has helped to limit the influence of the Soviet Union or its proxies.

China has also gradually expanded its participation in a broad range of international political and economic organizations and activities in which U.S. policy interests are deeply engaged. China's influence within the international community is likely to be increasingly important—particularly with other developing states. Hence, it is important that the U.S. consult with China and encourage its support for positions and policies of concern to the U.S.

Therefore, we recommend that:

The U.S. maintain an active high-level dialogue with PRC leaders on Asian issues where American policy interests are most affected and where China may play a specially helpful—or damaging—role. At the same time, the U.S. should ensure that its own positions are closely coordinated with its long-time friends and allies, particularly Japan, the Republic of Korea, and the states of ASEAN and ANZUS, and that we consult closely with these countries on our discussions with the PRC.

The U.S. should, at frequent intervals, exchange views with the PRC on developments in other areas of the world and encourage similar consultation between our missions and those of the PRC abroad. These regular consultations should be reinforced by senior leadership exchanges on the global situation, particularly on broad strategic issues.

There will be specific situations in which close coordination between the U.S. and the PRC on foreign policies will be both appropriate and useful to both sides. The effort to attain such coordination should not be pursued by the U.S., however, to the extent of interfering with cooperation with our allies.

Since the Chinese are not reticent in criticizing American policies on specific issues where PRC interests and those of the U.S. diverge, the U.S. should not feel constrained in criticizing China's policies, when appropriate. It should convey our views strongly and firmly to PRC officials in private—or publicly when necessary—in circumstances where their policies seriously conflict with our own.

The U.S. should encourage the PRC to play an active and constructive role on other global issues of particular importance to both the U.S. and the PRC. These include energy exploration, population limitation, agricultural development, environmental issues, and scientific research.

SECURITY COOPERATION

The integrity of China is important for the maintenance of strategic balance. A weaker and more vulnerable China could invite external pressures which could force the PRC to accommodate to another power. A strong U.S.-PRC tie will help sustain the transformation in China's international alignment which has been so favorable to American security interests and strategic flexibility.

There have been important gains for American security as a result of U.S.-PRC normalization. Nevertheless, the China factor cannot be a substitute for strong American defenses. Moreover, a vulnerable and passive United States will not be an attractive partner for the PRC. A U.S. secure in its own defense preparations and active in maintaining a global balance will enable China to gain greater confidence from its current association with the United States.

Today, the U.S. and China have properly defined their relationship as a friendly one, but not as an alliance. Beyond this, there is not yet a clear agreement or firm policy guidelines for the development of U.S.-PRC cooperation in security affairs. It is clear, however, that the Soviet threat has been a major impetus to security cooperation and provides its political rationale. This lack of agreement was reflected in the discussions of the Assembly.

Public discussion of Sino-American security relations has tended to focus on the issue of weapons sales; yet such sales are less significant than political consultations, reinforcing efforts in support of mutual friends, or U.S. assistance to China's scientific and industrial modernization. These activities must be given appropriate emphasis in developing an effective policy for meeting the security concerns of the two countries.

Leadership discussions of shared Sino-American security concerns were central to the normalization process. After the Soviet Union's invasion of Afghanistan in 1979, however, American policy was modified to permit low levels of defense cooperation and sales of nonlethal military hardware. Washington and Peking now exchange high-level delegations of defense officials and share information.

The stated policy of the U.S. is to permit the sale of dual-use technology and military support equipment to the PRC, although to date few such sales have been licensed. A more active program of military cooperation with the PRC could involve military training or joint staff consultation and the removal of the current prohibition against the sale of lethal but defensive weaponry.

Security cooperation should be expanded to authorize the licensing of defense-related industrial production technology on a case-by-case basis. Beyond this, there was limited support among the participants for advancing the level of security cooperation at this time, but they recommended that this alternative be kept under continuing consideration. We must make clear to our adversaries that heightened threats to our common interests will evoke higher levels of Sino-American security cooperation. We strongly recommend that there be no reduction in present levels of activity as it would be likely to degrade the U.S.-PRC relationship.

China has a limited capacity to finance and absorb large quantities of high-technology weaponry purchased abroad. Defense cooperation, in any event, should not be developed at a rate and to a level that would be needlessly provocative to our adversaries or which would threaten the security of allies and friends.

THE BILATERAL RELATIONSHIP

The bilateral relationship between the United States and the People's Republic of China, although short on history, is long on accomplishments. It is characterized by high-level political consultations, a rapidly growing economic intercourse, and by active programs of cultural, educational, and scientific exchange. These developments serve the interests of both countries and should be systematically developed and expanded.

The United States can play an important role in training new generations of Chinese scientific, managerial, and other intellectual talent, and it should do so. These training programs should be balanced with those for other countries already involved in U.S. government-funded programs for educational purposes. The United States should not deprive China of opportunities available to other countries. The U.S. government should, therefore, remove those remaining legal barriers to Chinese participation in these programs, such as are contained in the provisions of the Foreign Assistance Act, and in other ways facilitate training programs for Chinese to the fullest extent possible.

It is also important in developing a positive U.S.-PRC relationship that American students and scholars have the fullest access possible to the PRC for study and research. Considerable progress has already been made. Differences in the two societies, in their respective levels of economic, scientific, and technological development, and in the needs they seek to satisfy through exchange programs, make unrealistic and undesirable any rigid formula for reciprocity although appropriate balance is a major ob-

jective. Nonetheless, a situation in which China has largely unrestricted opportunities for training and research in the United States while Americans have relatively limited opportunities to engage in comparable activities in China will become increasingly untenable. We recommend, therefore, that the PRC be encouraged to provide at an early date greater access for Americans interested in pursuing study and research in China.

The training of new generations of Americans with deep professional expertise about a country that for too long was viewed from a distoring distance is clearly in America's long-term national interest. It is also important therefore, to sustain, at an adequate level, training programs in Chinese language, history, culture, and politics, as well as related programs in Asian studies, at various American universities. Both government and private organizations should be strongly encouraged to provide sufficient funding to ensure the continued development of these vitally important training programs.

A key issue in U.S.-PRC bilateral relations is Taiwan. Over the past three decades. Taiwan has achieved remarkable economic growth and has enjoyed close and friendly relations with the United States. The Taiwan Relations Act of 1979 and the unofficial relations between the U.S. and Taiwan which were established with normalization provide the legal framework for sustaining friendly and mutually beneficial relations between the people of Taiwan and the U.S. These relations should be maintained. Expansion of this framework that would have adverse consequences for U.S. relations with the PRC should be avoided.

The United States should sustain support for the policy—as established by law in the Taiwan Relations Act—of providing Taiwan with carefully selected defensive weapons necessary to maintain sufficient self-defense capability. While decisions about any specific new weapons systems to be made available to Taiwan will be based on a variety of considerations, they should take particular account of actual defense needs.

The American policy of sales of defensive arms to Taiwan must be pursued within the context of the continuing U.S. interest in a peaceful settlement of the Taiwan question by the Chinese themselves. Neither a sharp reduction of weapons sales nor a significant upgrading of the types of arms sales permitted would contribute to this objective. The United States should welcome efforts by Taiwan and the PRC to resolve their differences peacefully, but it should not seek to involve itself in such efforts.

CHINA'S ECONOMIC DEVELOPMENT AND THE INTERNATIONAL ECONOMY

Critical as the U.S.-PRC security relationship may be, our economic relationship with China is the most important and effective means through which the U.S. can support and affirm our interest in the PRC's long-term stability.

Given the size of the Chinese economy, U.S. contributions to its development will be significant but still marginal. The continuing growth and orderly development of China's economy, in both domestic and international terms, is of substantial concern to the U.S. government, the American business community, and the international economic system. We should seek to bring about greater involvement by the PRC in the international trading and financial system in a manner that will promote mutually beneficial economic interdependence and a sense of shared interest in a stable and developing international economy.

In order to expand its international economic relations, PRC authorities have enacted in recent years new investment laws, tax laws, and other regulations. While these measures are not yet fully adequate, they provide a framework for U.S.-PRC trade relations. We encourage further initiatives in the area of business facilitation by both the U.S. and Chinese authorities.

The American business community initially responded with euphoria to the reopening of "the China trade." With the experience of a decade, however, a greater sense of realism has emerged. This new attitude, which is also evident in revised PRC economic plans and policies, provides a more manageable set of expectations for the evolution of U.S.-PRC economic relations.

In this context, the recent Chinese cutbacks in, or cancellations of, various economic programs, the emphasis on fiscal discipline, and the deferral of the utilization of large credit lines, should not be viewed with alarm. Rather we should recognize that the long-term potential for Sino-American trade remains, but it will develop on a more realistic basis.

The present and future performance of the energy and agricultural sectors are central to China's economic growth. The U.S. shares an interest in the development of the energy sector, such as oil, hydropower, and coal. U.S. technology is available and applicable, and its use by China should be encouraged. The agricultural sector is equally important in Sino-American economic relations. China will continue to be a major market for U.S. grain exports for some time. The major task for PRC authorities will be to ensure that domestic agricultural production keeps abreast of the basic consumption needs of a population expected to reach at least 1,200,000,000 by the end of the century.

The PRC's international trade will continue to grow. Developing new foreign markets will challenge China as it has other developing countries in the past decades. This expected increase in trade need not disrupt international economic patterns. It can be absorbed by the ever-increasing volume of world trade. Some dislocations will occur, however, and the U.S. should help to ensure that the resources of the international Financial Institutions are available to compensate for temporary imbalances. Fundamentally, however, market forces should be permitted to prevail in adjusting to China's growth as an exporter.

In this context, we recommend that the U.S. government:

Eliminate existing laws and regulations which unfairly discriminate against the PRC.

Amend those laws or regulations which inhibit the U.S. business community and financial intermediaries from participating in China's economic development, and which adversely affect the U.S. competitive position.

Promote our mutual interests by a broader utilization of existing programs, such as the Export-Import Bank and Generalized System of Preferences.

Actively promote the licensing of high technology, including "dual use" technologies, destined for China after careful review of their "end use."

Ensure that the financial resources of the International Monetary Fund and World Bank Group are adequate to meet the needs of developing countries, including China.

GOSPEL MUSIC MONTH

Mrs. KASSEBAUM. Mr. President, I call up Calendar Order No. 41, Senate Joint Resolution 20, and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the clerk will state the joint resolution by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 20), to designate the month of April 1981 as "Gospel Music Month."

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the resolution.

The resolution was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S.J. Res. 20

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That April 1981 is designated as "Gospel Music Month" and the President is requested to issue a proclamation calling upon the people of the United States to observe such month with appropriate ceremonies and activities.

Mrs. KASSEBAUM. Mr. President, I move to reconsider the vote by which the resolution was passed.

Mr. FORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

● Mr. SASSER. Mr. President, it is with great pride and appreciation that I note the Senate's approval of Senate Joint Resolution 20, my resolution to designate the month of April 1981 as Gospel Music Month.

The Senate's action today is confirmation of gospel music's broad appeal in our Nation. It is a musical force to be reckoned with; the good news reaches so many in its expression.

I would like to take this opportunity to thank my colleagues who cosponsored Senate Joint Resolution 20, particularly my friend Senator THURMOND, who was instrumental in having the legislation reported from the Judiciary Committee.

Gospel Music Month, Mr. President, is a fitting tribute to the musical interpretation of the Lord's Message. I call on those who have been touched by gospel music, and ask them to continue to sing their joyful songs of praise, bringing the glad tidings to so many worldwide.

Finally, Mr. President, I look to the other body to give its early approval to our resolution. Hopefully, April 1981 will be officially declared Gospel Music Month by President Reagan in a few short days.

I thank the Senate for its positive action on Senate Joint Resolution 20.●

NATIONAL RECOGNITION DAY FOR VETERANS OF THE VIETNAM ERA

Mrs. KASSEBAUM. Mr. President, I call up Calendar Order No. 43, House Joint Resolution 182, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the joint resolution.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 182) to designate April 26, 1981, as "National Recognition Day For Veterans Of The Vietnam Era."

Mr. FORD. Mr. President, there is no objection to this resolution.

Mr. President, I am proud to be a cosponsor of Senate Joint Resolution 40, which calls for a "National Recognition Day for Veterans of the Vietnam Era" on April 26, 1981, and commend my colleague Senator RIEGLE for its introduction.

This Nation's recognition of its Vietnam veterans is long overdue. It is time we publicly expressed our gratitude to the men and women who served their country in a war we never declared and to which we never made a total commitment. Adding sorrow to injury is the silent reception these veterans received when they returned home to America. Rather than being proud of their sacrifice, they found that few were willing to listen to their experiences and that it was actually better if they kept them to themselves.

In a column he writes for the Cincinnati Enquirer, Bob Brumfield recently described what I think we have denied our Vietnam veterans.

There was a brief, heady feeling of victory and relief after WWII. There was no such feeling after the Vietnam War, through no fault of the returning fighting men who, for the most part, fought bravely and with distinction against a tough, determined enemy. . . .

The important benefits (from serving in a war) are the personal ones a soldier gets from serving. These include membership in a very exclusive club: a club whose members don't have to apologize for a debt of honor left unpaid. Perhaps the most important benefit is the knowledge of self derived from hazardous duty and long periods of loneliness and deprivation. Then there is the sense of values that is honed to a fine edge by terror. And pride; always personal pride in a job well done, even if nobody else knows or cares.

No one can take these things from a combat veteran. They are his priceless treasures and they are the secret envy of every person who has not served. The more the sacrifice, the more the pride and satisfaction and personal feeling of worth.

Senate Joint Resolution 30 gives us the chance to let all the men and women who served in Vietnam know that this is theirs by right and is theirs to cherish. Up to now we have never told them so and I am thankful for the opportunity now.

● Mr. GORTON. I am pleased to support House Joint Resolution 182, to make April 26, 1981, a day of national recognition for the veterans of the Vietnam era.

This resolution is to honor those who, having fought in the jungles of Vietnam, returned to an America in turmoil. It was an America in transition, much unlike the country they had left.

I am certain that each soldier had, during his journey home, envisioned a welcome not unlike those accorded his father and grandfather. But those who returned home from the horror that was Vietnam returned to no celebrating welcome, few greetings, and—as America tried to cleanse itself of the war in Southeast Asia—almost immediate neglect.

Of these men—good Americans all—most recovered from the scars of battle. Many recovered from the culture shock and disdain that met them stateside. But some will bear physical injury forever, and many still carry mental scars unique to Vietnam.

I call on all Americans to heed this day of recognition so long overdue. On April 26, let us give these men their special welcome. In the true American spirit, let us welcome them home as we did our fathers and grandfathers.●

● Mr. NICKLES. Mr. President, it is with pride that I support this measure to honor the men and women who valiantly served this country through the Vietnam era.

Withdrawing our forces from Vietnam without victory caused the lack of proper recognition for these brave citizens who answered the call to duty.

It is time to give them the recognition that is not only deserved, but long overdue. There are 9 million Vietnam veterans in this country—129,000 in my State of Oklahoma, and there is no better time than now to honor their important contribution.

At the same time, I reaffirm my support of President Reagan and his plans to make America strong, militarily, once again.

We must also continue to support the basic needs of all combat veterans whose service to their country has made the United States the great and free nation it is today.

Mr. President, I join my colleagues in

supporting this joint resolution designating April 26 of this year as "National Recognition Day for Veterans of the Vietnam Era."●

● Mr. RIEGLE. Mr. President, 8 years have now passed since American troops have been stationed in Vietnam. This was the longest and most tragic war in American history. Fifty-five thousand American lives were lost, 150,000 men were permanently maimed, and over 300,000 soldiers were wounded. Regardless of one's opinion on the merits of the war itself, there is no doubt that the men who fought this war are men of great honor. They served their country diligently and heroically under difficult circumstances. There are many of us who look at the Vietnam conflict and feel that the 8 million men who served have never received appropriate recognition. We have not yet come forth as a nation and adequately thanked those Vietnam veterans for their sacrifices and service to our Nation.

Moreover, many severe problems faced by the returning veterans of the Vietnam conflict have never been fully dealt with. Over 480,000 are currently unemployed; and, due to the 10-year delimiting date provision of the GI bill, some 60 percent of Vietnam veterans are not eligible for educational benefits under the GI bill. I regard the present and past treatment of our Vietnam veterans as intolerable. It is my hope that the joint resolution which is considered today will spark a renewed interest in our Vietnam-era veterans and an outpouring of support and understanding.

All Americans should be proud of our Vietnam veterans—just as proud as we are of our veterans of World War I, World War II, and the Korean conflict. I urge my colleagues to support this proposal for the long overdue recognition of our Vietnam era veterans.

Mr. President, I am pleased that the Senate is acting on the measure. The response to the measure has been overwhelming, and I have been joined by more than 65 of my colleagues in support of the "National Day of Recognition."

We are acting today on House Joint Resolution 182, which is the companion measure introduced by my colleague Congressman ALBOSTA. The House approved the joint resolution 391–0, and I am confident that the Senate will give a similar sign of support for the veterans of this era.●

● Mr. SASSER. Mr. President, the Senate has passed a joint resolution, House Joint Resolution 182, designating April 26, 1981, as "National Recognition Day for Veterans of the Vietnam Era."

It is about time that we take a day to remember the 9 million men and women who served during the Vietnam era. It is about time that we recognize that of that 9 million, over 700,000 still need psychological readjustment assistance. It is about time that the Federal Government reaffirm its commitment to the veteran, particularly those from the Southeast Asian conflict. And it is about time we admit that we have a national obligation to the Vietnam veteran.

Now Mr. President, I have to admit I was surprised by the Senate's failure to restore $330 million to the Veterans' Administration health care programs during our consideration of the budget reconciliation measure. I was dismayed by the Senate's rejection of Senator CRANSTON's effort to restore $104 million in a subsequent amendment. This is no way to bolster the veteran's confidence in the Federal Government—the Senate's action in rejecting these amendments is merely confirmation that we have forgotten about the veteran.

During the 96th Congress, legislation was approved for a Vietnam veterans memorial in Constitution Gardens. We have now approved House Joint Resolution 182, establishing a "National Day of Recognition for Vietnam Vets." I supported both these efforts, Mr. President, and I commend the sponsors for their thoughtful efforts. Just the other day, we barely saved the Vietnam vets readjustment counseling program from elimination. But let us take a look at what still needs to be done for the Vietnam-era veteran.

There has been no real movement toward a solution of the agent orange problem, although I commend the VA for acting to obtain valid information about the defoliant and its health effects. The GI bill needs to be reworked, to permit more veterans to take advantage of educational opportunities. And 10 percent of the veterans who came home from Vietnam still do not have a full-time job.

The priorities are clear, Mr. President. But to me it is obvious that we must also act to correct the very real problems that plague the Vietnam-era veteran.

The time to recognize the Vietnam veteran is long overdue. Hopefully, we will be able to put together a similar bipartisan coalition in addressing the needs of America's veterans sometime in the near future.

I look forward to the "National Recognition of the Vietnam Veteran" this coming April 26.●

● Mr. BUMPERS. Mr. President, I am indeed proud to support House Joint Resolution 182, which will designate April 26, 1981 as a national day of recognition for veterans of the Vietnam era. If there is one group in our Nation that has yet to receive the respect and praise it so justly deserves, it is the brave men and women who answered the call to serve during that long and frustrating conflict in Southeast Asia. This day of recognition reflects a growing awareness on the part of the Nation that we owe a tremendous debt to all those who endured the hardships and made the sacrifices demanded of them during one of the most trying periods in our long history.●

The PRESIDING OFFICER. The joint resolution is before the Senate, and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the joint resolution.

The joint resolution (H.J. Res. 182) was ordered to a third reading, was read the third time, and passed.

The preamble was agreed to.

Mrs. KASSEBAUM. Mr. President, I move to reconsider the vote by which the joint resolution was agreed to.

Mr. FORD. I move to lay that motion on the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO INDEFINITELY POSTPONE SENATE JOINT RESOLUTION 40

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent that the Senate indefinitely postpone Calendar Order No. 42, Senate Joint Resolution 40.

Mr. FORD. Mr. President, there is no objection on our side to remove the Senate joint resolution from the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF TIME FOR FILING REPORT REGARDING SENATE RESOLUTION 109, 96TH CONGRESS

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent that the deadline established by Senate order regarding Senate Resolution 109 of the 96th Congress, a resolution to direct the Select Committee on Ethics to undertake a comprehensive review of the Senate Code of Official Conduct and provision for its enforcement and implementation, by which the Select Committee on Ethics is to report the results of its study of the Senate Code of Official Conduct and make recommendations for its revision, be extended from April 1, 1981, until May 15, 1981.

Mr. FORD. Mr. President, the minority has no objection to this extension.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. KASSEBAUM. I thank the Senator from Kentucky.

CONTINUING AUTHORITY PROVIDED UNDER THE DEPARTMENT OF JUSTICE APPROPRIATION AUTHORIZATION ACT, FISCAL YEAR 1980

Mrs. KASSEBAUM. Mr. President, I send a bill to the desk on behalf of Senator THURMOND and ask for its immediate consideration.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 840) to continue in effect any authority provided under the Department of Justice Appropriation Authorization Act, fiscal year 1980, for a certain period.

The PRESIDING OFFICER. Without objection, the bill will be considered to have been read twice, and the Senate will proceed to its consideration.

Mr. THURMOND. Mr. President, the Department of Justice is currently operating on a continuing resolution for its fiscal year 1981 authorization. Public Law 96–397 simply extended to April 5, 1981, the Department's 1980 authorization. This bill would extend those authorities to September 30, 1981.

Mr. President, although the Senate completed action on the Department's

1981 authorization in the last session of Congress, the House was unable to consider the Department of Justice's fiscal year 1981 authorization bill during the last session because of various scheduling problems. A continuing resolution was therefore enacted to permit the Department to carry on many of its vital activities. The resolution, however, lapses on April 5, 1981.

The Judiciary Committee already has received the Justice Department's new fiscal year 1982 authorization request. The request is very comprehensive and the committee is currently reviewing it. I do not believe that this body has sufficient time to reconsider a 1981 Justice authorization bill just prior to considering the 1982 authorization. Such deliberations would not be productive since the 1982 request addresses many of the same programs and initiatives previously recommended in the 1981 proposal.

The Department of Justice has assured us that it can continue to function effectively if the authorities contained in the fiscal year 1980 Authorization Act are continued to the end of this fiscal year. What we need today is this simple bill. Because the first continuing resolution expires on April 5, 1981, authority to conduct various vital Department activities would not exist after that date and, therefore, we need to extend this authority to September 30, 1981.

Unless this simple extension of the Department's authority to the end of this fiscal year is agreed to, the following problems are posed:

Authority for the FBI to conduct undercover operations in all areas of their investigative responsibilities would expire.

Authority to expend funds by the FBI to protect the President and the Attorney General would expire.

Authority to hire motor vehicles for the Drug Enforcement Administration (DEA) in its undercover operations would expire.

The Bureau of Prisons would lose its authority to expend funds for assisting State and local governments to improve their correctional systems.

The Attorney General's authority to expend funds for certain emergency situations would be curtailed.

The authority to pay rewards by the FBI, DEA, INS, and the Bureau of Prisons would expire.

The authority for the U.S. Marshals to expend funds to provide for the supervision of U.S. prisoners in non-Federal institutions would be curtailed.

The authority to permit the U.S. Marshals to bring to the United States from foreign countries persons charged with a crime would expire.

The specific authority to expend funds by the FBI to acquire, collect, and classify records and exchange them with authorized Federal, State, local, and other institutions would expire.

Authority for the Attorney General to expend funds regarding the conduct of certain investigations requested by the Department of State would be curtailed.

The reprograming restrictions this Congress placed on the movement of funds from one program to another to improve fiscal discipline within the Department would lapse.

The requirement that the Attorney General report to Congress any policy change in the enforcement of a law, which is the responsibility of the Department, would lapse.

INS would not have authority to pay interpreters and translators needed to classify documents.

Authority for DEA to employ aliens by contract abroad would not be available.

DEA's authority to conduct research related to enforcement and drug control would expire.

Mr. President, these are just a few of the critical authorities that could lapse if the House does not take action on this bill. I urge the immediate adoption of this bill.

Mr. BIDEN. Mr. President, I rise in support of the legislation offered by the distinguished chairman of the Judiciary Committee to extend the continuing resolution for the Department of Justice until September 30, 1981.

I must say I am a bit dismayed that we are faced here in the Senate with acting on this resolution which is to expire in less than a week and we have not even had a chance to review it in committee. However, I think that the chairman's insistence that this matter be handled expeditiously and without referral to committee is entirely appropriate under the circumstances. I suppose the reason for this extraordinary approach to continuing the Department's authority is that the Department is under new leadership and it took some time for fiscal and budget officials in the Department to get the appropriate authorities in the Department and the Senate to focus on this impending expiration of authority.

However, I feel it essential to point out that I hope this will not be a precedent for how we will deal with the Department's authorization in the future. Indeed, I feel that the committee should thoroughly examine the Department's budget in the context of the authorization bill. As I have already stated in the Budget Committee I have severe doubts about the large cuts being proposed in the Department's budget, especially in the drug enforcement area. I would like to congratulate the chairman for initiating in committee a thorough set of hearings on the Department's budget authorization and I view my acquiescence to immediate consideration of this bill as being without prejudice to continuation of that process.

In conclusion, I would like to underscore the urgency in moving to adopt this continuing resolution. The current statute authorizes a number of sensitive and important undercover operations by the FBI. In the organized crime area, for instance, the FBI has in the past created artificial organizations—fencing operations, loan sharking operations, et cetera—for the purpose of luring sophisticated and otherwise inclined criminals into engaging in criminal acts in the presence of FBI agents. If the authority to engage in that activity was even in question on April 5 it would not only jeopardize many of these sting operations but might jeopardize the lives and safety of the agents involved.

This is only one of the consequences of the failure to extend authority. The chairman lists a number of others in his statement. I hope the Senate will move promptly to adopt the extension.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 840

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the authority, and any limitation on authority, contained in the Department of Justice Appropriation Authorization Act, Fiscal Year 1980, shall continue in effect with respect to activities of the Department of Justice (including any bureau, office, board, division, commission, or subdivision thereof) until September 30, 1981.

Mrs. KASSEBAUM. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. FORD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RECESS UNTIL 9:30 A.M. TOMORROW

Mrs. KASSEBAUM. Mr. President, I move, in accordance with the order previously entered, that the Senate stand in recess until 9:30 a.m. tomorrow.

Thereupon, at 7:13 p.m., the Senate recessed until tomorrow, Wednesday, April 1, 1981, at 9:30 a.m.

EXTENSIONS OF REMARKS

ARAFAT EXPLAINS PLO POLICIES

HON. BENJAMIN S. ROSENTHAL
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. ROSENTHAL. Mr. Speaker, a clear sense of the motives and intentions of the parties to the Arab-Israeli conflict is essential to the formulation of a policy which serves the interests of the United States. The ambitions and goals of the PLO are often characterized as moderate, and reasonable, and some go as far as to say that PLO policy is compatible with the long-range interests of American policy.

Nothing could be further from the truth. One has only to examine the speeches of Chairman Arafat when he speaks in Arabic to an Arab audience, far away from the Western World's news media, to obtain a sense of what he values, and how he views the world and the role of the PLO in it.

Those who apologize for the PLO need to examine Arafat's speech of March 22 in South Yemen when he spoke about his hopes for a world organized according to Soviet and PLO policy.

To help inform all of us about the PLO I insert Arafat's speech in full as it was reported by the Foreign Broadcast Information Service on March 24, 1981.

We are confident of AAPSO's ability to shoulder the tasks facing it at this critical stage in the history of the world national liberation movement of the Asian and African peoples.

Finally, I wish the proceedings of your 13th general assembly every success in arriving at results capable of contributing toward the reinforcement of AAPSO's work in every field. Thank you.

YASIR 'ARAFAT SPEECH

["Text" of speech by Yasir 'Arafat, chairman of the PLO Executive Committee, on 22 March at 13th AAPSO session in the hall of the higher school for scientific socialism in Khormaksar—recorded]

[Excerpts] Brother Chairman 'Ali Nasir Muhammad, brother chairman of the conference, brothers, guests, members of this conference: Permit me to express on behalf of the Palestinian revolution and people and on your behalf our deep gratitude to brother Chairman 'Ali Nasir, the YSP and the fraternal people of Democratic Yemen for holding and hosting this international conference, which is being convened under very grave international conditions and in the face of challenges to our region and country and people—indeed to the entire world. [applause]

Today we face not only neo-Nazi racist Zionism, not only the agents of imperialism and colonialism in our country and region but we have been destined to confront imperialism led by the U.S. administration, which, for the first time since Vietnam, has made a decision, a most dangerous decision—dangerous not only for our region but also for the peace of the whole world. It is not merely by chance that there is asssembling in our region now a veritable blockade—now, as we talk, as we meet here in steadfast Aden, in revolutionary Aden, in the embrace of these militant, revolutionary, progressive, democratic and heroic people with their wise leadership—the leadership of Brother 'Ali Nasir. [applause] I say that this meeting is not taking place by mere chance, but you all know about the difficult circumstances faced by this organization of ours before this meeting.

Brothers, comrades: it is not merely by chance that our region is now being blockaded by three U.S. fleets, namely the 5th, 6th and 7th Fleets in the Indian Ocean, in the Gulf, in the Red Sea, in the Mediterranean Sea. And that is not all, for U.S. imperialism has also established bases in this region, regrettable in Egypt, in the western desert, in Sinai, in [name indistinct], in Ras Banat on the Red Sea and in Somalia's Berbera, in Mombasa, Kenya and in Oman's Masirah. And even that is not all: there is also an aggressive nuclear base belonging to the United States in Diego Garcia in the Indian Ocean. Thirty-six Indian Ocean littoral states are having their destinies threatened; their security threatened, and consequently the security of the world is being threatened by this nuclear threat of U.S. imperialism. [applause]

In view of the difficult conditions and dangerous confrontations and critical circumstances we are experiencing, it is no accident, brothers, that during a meeting with Israeli Foreign Minister Shamir when he recently visited the United States, Bush described the PLO as a terrorist organization involved with international terrorism along with the USSR and Cuba. I say to him: If involvement means helping liberation movements in the world, then we are—we are involved with the whole world. [applause] We are involved and we are happy and proud of it—proud that we are involved—not just involved, but in partnership with all the world's liberation movements against imperialism, against Zionism, against colonialism, against racial discrimination, against the neo-Nazism being given birth to by the United States in its bridgehead in our country, in our region, which is now called Israel.

What this means is that the United States, through Bush, is telling Shamir: Continue with your officially organized terrorist work against the PLO and against its allies in the Lebanese arena, namely the Lebanese nationalist movement with whom we share a trench against threats and dangers. Brothers: It is one of the ludicrous things of the age that Bush should say a thing to Shamir—Shamir who is wanted by Interpol, not because of any Arab complaint, or because of a complaint from progressives, or a complaint from the Democrats, but on the basis of evidence held by the British police, the allies of U.S. imperialism. On the basis of these documents, it was this fellow Shamir who killed Count Bernadotte and is wanted by Interpol as an international terrorist. Moreover, his boss, Begin, admits in his book, which he called "The Revolt," that it was by means of terrorism that he succeeded in establishing the State of Israel on the ruins of our homeland, Palestine, That is what he admits. Begin is also wanted by Interpol as a terrorist. I say it is one of the ludicrous things of the age that the United States should seek the help of international terrorists so that it can say: International terrorism is led by the USSR, the PLO and Cuba. Brothers, is this not shameful? Is it not a crime for Bush to say such a thing to Shamir?

What does this mean, brothers? He is telling them that there is an American green light to continue the aggression against the PLO. It is no coincidence that Eytan should say: Our war with the Palestinians will not end until one side founders. He then arrogantly added: We shall not founder—he means themselves.

And that is not all. Begin says: We shall face the PLO with the methods unknown to the devil himself. I want to say to him on behalf of the Palestinian revolution, on behalf of the Lebanese-Palestinian joint forces, that despite Israeli-U.S. international terrorism, which is officially organized, which uses the most modern U.S. weapons. [sentence as heard]

That is not all, brothers. Southern Lebanon is now a field for experiments against the Lebanese fighter and his Palestinian brother. It is a field for experiments against the Palestinian people and against the Lebanese people in southern Lebanon. And that is not all, my brothers. They are using the latest U.S. weapons there, including those which are internationally banned, such as cluster bombs, fragmentation shells, (jut-bombs), napalm and other weapons we have not yet identified.

I say this, brothers: As we stand in the forward trench in defense of the Palestinian revolution, I say what our brothers of the nationalist movement said: We shall die defending the Palestinian revolution. We shall fight so that the Palestinian revolution can live. I tell my brothers of the nationalist movement who are closely linked to us in the same trench. We shall not die. We shall triumph together with these comrades in this hall who support us. [applause]

Brothers: The U.S. President and the U.S. administration, after Vietnam, have issued orders for the Rapid Deployment Force to be sent to this region. Then, full of arrogance, he says: The auxiliary [radif] for the Rapid Deployment Force is the Israeli Army and the agents and stooges in this region—and there are many of them, but I do not want to name them [words indistinct].

I have facts for those who talk about international terrorism, for those who say that the USSR, the PLO and Cuba are leaders of international terrorism. I want to tell them: International terrorism is the use of the F-15 and F-16, the use of fleets, the 5th, the 6th and 7th Fleets, the use of the advanced watchdog, namely, the Israeli forces, against the Palestinian people, against the Lebanese people. This is organized international terrorism.

I say this knowing that Haig is about to visit the region to seek new bases and facili-

ties for U.S. fleets in the region. I say this knowing that Reagan said in his first interview after his election victory that the PLO is a terrorist organization. But I want to tell him that the PLO is (?above being) called terrorist. Once Comrade Mugabe was called a terrorist. Where is Comrade Mugabe today? He is the prime minister of Zimbabwe. Welcome to you, Comrade Mugabe. [applause]

Comrade Brezhnev stood up in the 26th CPSU Congress, and before that in New Delhi, to make proposals on solutions—practical solutions, principled solutions—and not just for the Middle East problem. But when he spoke about the Middle East, comrade and friend Brezhnev did not forget to mention the PLO specifically, and to say specifically that the least he would accept—that Comrade Brezhnev would accept—was an independent state for the Palestinian people. [applause] We say that he did not just speak about the Middle East but he spoke about the situation in the Indian Ocean. The situation in the Caribbean, the situation in Europe [words indistinct]—all the explosive situations. But he did not restrict himself. He opened the door wide to all sincere efforts, whether they are made in Europe or through the United Nations.

I want to say this because people are talking about a European initiative. They tell me: We have heard about a European initiative. I have heard something. When Thorn came to see me as chairman of the EEC ministerial council, I asked him: What is this European initiative? What European initiative? You were unable to uphold the Venice declaration. You were unable to uphold it for the 15 days between the meeting in Venice and the meeting in Ankara, where [name indistinct] stood up with all arrogance to say: We have refused [short break in transmission] the Ankara declaration to contain anything about the Middle East or the Palestinian people or the rights of the Palestinian people.

The most splendid thing about Comrade Brezhnev (?making) that move is that Comrade Brezhnev responded to the aspirations of our Arab nation. He did not concentrate on [UN Resolution] 242 because we of the Palestinian revolution say that 242 cannot constitute a basis for solving the Middle East problem because it regards our people as a handful of refugees. No. We are the existing fundamental reality in the Middle East equation. That is what Comrade Brezhnev concentrated on. He (?referred) to the PLO, an independent state for it. [applause]

In the United States they cannot ignore Comrade Brezhnev's proposals—the proposals he started in New Delhi and whose fundamental and broad outline he formulated at the 26th CPSU Congress. They can accuse the USSR, the PLO and Cuba of being thugs for as long as they like, but they cannot say that there are no positive and important elements in Comrade Brezhnev's proposals.

Here, on behalf of the Palestinian revolution, on behalf of the Palestinian revolutionaries and, if you will permit me, Brother Chairman 'Ali Nasir, to say on behalf of our Arab nation, on behalf of the free men of our Arab nation: I welcome these proposals considering them (?suitable) [applause] for solving the Middle East problem. [prolonged applause]

We of the Steadfastness and Confrontation Front, on the basis of Brother 'Ali Nasir's proposal to hold an urgent meeting of the states of the Steadfastness and Confrontation Front—the PLO declared that it welcomed the invitation and we made it a condition that the meeting be held here in Aden to confront the challenges in the region. [applause] [sentence as heard] I think at the beginning of the first week of next month there will be a meeting of the political committee of the foreign ministers of the states of the Steadfastness and Confrontation Front [words indistinct].

One day I met Comrade Brezhnev. I was talking with him and said: Comrade Brezhnev, we, the Palestinian people, who number 4 million, are suffering and there are imperialist powers [words indistinct] and I was talking like that to him and he said to me: Comrade 'Arafat, you are not 4 million. You are 264 million people. [applause] I said: You are quite right, we are 264 million. Now, standing before you, I feel (?we are) 264 million. I [word indistinct] all these progressive and democratic millions which you honorable and free comrades represent here in this hall.

Brothers: There is no doubt that in these difficult times—and when I say difficult, I mean it—what is happening in the Arab Gulf, very grave indeed. This Iraq-Iran war is a very serious matter, very serious indeed. We oppose this war. From the first moment we opposed it, because it is against the Iranian people and against the Iraqi people and against the peoples of the regions and against the Arab nation, and against the Palestinian revolution. From the first moment we in the PLO moved to stop this war. We are proud that we are still contributing, through the Islamic good offices committee and through the Nonaligned Movement's goodwill mission, toward stopping this war. It must be stopped.

From here I appeal to Brother Saddam and Imam Khomeyni. I appeal to them on behalf of the Palestinian revolution, on behalf of Palestine, on behalf of Jerusalem, on behalf of the honorable and free men of this world—I appeal to them to stop this war because the sole beneficiary of the war is America and world imperialism. [applause] Permit me to appeal to them on behalf of you here in this hall to stop the war and to stop it immediately, immediately, immediately. [applause]

I say these things and I want everybody to hear me. Let old Carter and new Reagan hear me. I must tell them there is no option except the Palestinian option. There will be no solution, there will be no stability, peace, [word indistinct] no security in this region by (?disregarding) the Palestinian people's inalienable national rights. These rights were sanctioned not only by [word indistinct] but also by Arab summits, Islamic summits, also sanctioned by nonaligned summits, sanctioned by OAU summits—they have been sanctioned by an international agreement at the United Nations which said that the Palestinians have inalienable rights, including their right to return, self-determination, and to establish their independent state on their Palestinian soil.

One day I am sure one of our Palestinian delegations now present here with us will address a request to you, which I am now making: I apply to the AAPSO secretariat for membership for these free revolutionaries from Latin America. [as heard]

I now extend an invitation to you to attend a forthcoming conference, which, God willing, will be held in Arab Jerusalem under the Palestinian flag. [applause]

'ARAFAT ENDS PDRY VISIT, MAKES DEPARTURE STATEMENT

ADEN, MARCH 23—Brother Yasir 'Arafat, chairman of the PLO Executive Committee, and his accompanying delegation left Aden yesterday evening. He was seen off at the airport by 'Ali Nasir Muhammad, general secretary of the YSP Central Committee, president of the Presidium of the Supreme People's Council and chairman of the Council of Ministers, and members of the Political Bureau and the Central Committee, ministers, and Palestinians residing in the PDRY.

Prior to his departure Brother Yasir 'Arafat gave a press statement in which he said: Without any doubt I consider this visit one of the most important I have carried out, especially in the present difficult circumstances through which our region—the Middle East and Arab regions—is going. Together with Brother 'Ali Nasir Muhammad, I had positive and important talks which covered all political, diplomatic, local, Arab and international spheres.●

NATIONAL TRANSPORTATION WEEK

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. YATRON. Mr. Speaker, the week of May 10 through May 16, 1981, has been designated as National Transportation Week.

Transportation is an important part of our lives. It enables us to receive the products of our industries and our farms. It allows us to travel, to work where we wish, to communicate with others throughout our Nation, to shop for needed goods, to receive medical assistance, and countless other activities that would not be possible without a sound transportation system. Indeed, without transportation our lives as we know them would be virtually impossible.

The purpose of observing National Transportation Week is to honor and acknowledge the outstanding achievements made by the commercial transportation industry to our Nation. In the Sixth Congressional District of Pennsylvania, the Reading Traffic Club has been making significant contributions to transportation in Berks County and Pennsylvania. The members of this fine organization are certainly to be commended for their outstanding efforts.

Mr. Speaker, I invite my colleagues to join me in wishing everyone connected with the transportation industry in the United States a very successful National Transportation Week.●

VISA WAIVER FOR NONIMMIGRANT TRAVELERS

HON. WILLIAM HILL BONER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. BONER of Tennessee. Mr. Speaker, recently Representative JIM SANTINI and I had the pleasure of giving testimony before Representative FASCELL'S Foreign Affairs Subcommittee on International Operations. The testimony, concerning visa waivers for nonimmigrant travelers, represents the policy position of the 265-member Travel and Tourism Caucus. The facilitation of international travelers to the United States is one of the top priorities for the caucus during this session of Congress. We support any reasonable effort which could be taken to increase the number of visitors to our country.

Mr. Speaker, I have enclosed my testimony given before the International Operations Subcommittee and hope that it will serve as a vehicle to stimulate and focus debate on this important matter.

The testimony follows:

TESTIMONY OF HON. WILLIAM HILL BONER

Mr. Chairman, I appreciate the opportunity of appearing before the Subcommittee and presenting the views of the Congressional Travel and Tourism Caucus. In offering this testimony, I shall speak for the Steering Committee of the largest Caucus in the House of Representatives, with a membership of 265 Congressmen and Congresswomen.

The Congressional Travel and Tourism Caucus would like to urge the membership of this Committee to support any reasonable action which could be taken to increase the number of visitors to our country. It is our belief that easing barriers in the travel marketplace will have a positive effect on the number of foreign visitors to the United States.

Specifically, I refer to the barrier of visa requirements. Non-immigrant visa waiver proposals have been debated in these halls for a number of years. During the last session of Congress, the House passed a modified visa waiver provision. The concept as detailed in state's fiscal year 1982-1983 authorization is in line with a proposal supported by the Caucus last year. We firmly believe that the time is right to move forward with this concept.

It should not be overlooked that last week the Select Commission on Immigration and Refugee Policy released its final report. It is not insignificant to note that it called for relaxation of the visa requirements.

The United States is the host to more than 22 million foreign travelers every year. Studies have shown that the average expenditure per visitor is in excess of $500. Thus, these foreign visitors contribute more than $12 billion to the positive side of our balance of payments ledger. A recent study conducted by the American Express Corporation projected an increase of more than seven percent in visitors from foreign countries if the N.I.V. provision were adopted. Let me translate that seven percent into more useful statistics. During 1978, more than 3.5 million visitors came to the United States from 17 foreign countries in which American Express conducted this survey. If visa waiver had been available for the following year, 1979, the seven percent increase would have been above and beyond the expected growth of about 20 percent. This would have resulted in an incremental gain of more than 300,000 visitors just from those 17 countries alone. In terms of economic impact, that would mean $130 million in additional spending and 4,500 new jobs. I want to emphasize that although this is only a mathematical projection, it is nevertheless a judgment made by seasoned travel experts who live and work in their respective markets.

I do not wish to mislead the Subcommittee—the travel account is still in a deficit situation. But, while other deficits grew, the travel deficit improved more than 30 percent in 1980. With a waiver on certain tourist visas, that account can be put in the black.

While the potential for increased visitors to the United States is a major reason for our support of this measure, we are convinced that there are other reasons also worthy of consideration. President Reagan's revised budget for the Department of State provides for a reduction in manpower for foreign consular officers. The realization of a visa waiver provision would allow for increased efficiency for our foreign-based diplomats by removing from their job descriptions the "glorified clerkship" which we now require of them in processing visa applications.

Overall, implementing this proposal could mean substantial personnel and financial savings both now and in the future. And once again the foreign spending in this country would contribute to alleviating our balance of payments deficit.

Many of the countries which would be included in the program presently extend this courtesy to U.S. citizens. It is certainly an irritant to them and somewhat of an embarrassment to us that they must make application prior to visiting the U.S. while they do not require us to do the same. There are other countries which provide a substantial amount of our tourist trade which presently do not provide a waiver of these requirements for U.S. citizens simply because we do not for their citizens. There are indications that all these restrictions could also be lifted. Japan is perhaps the most important country in this latter category.

Mr. Chairman, while we would not presume to suggest definite language for any such amendment to the Subcommittee, I would like to suggest some of the elements we believe should be contained in the legislation:

1. Foreign government eligibility requirements.—The provisions of any facilitation program should be extended not only to those countries which grant reciprocity to the United States, but it should be flexible enough to allow the Secretary of State to include any country which he believes to be in the financial best interest of the United States to be on the list. We would suggest that the Secretary be given some guidance by the Congress as to the acceptable visa refusal rate any country may have for initial inclusion on the list of countries.

2. Methods for revoking visa waiver approval.—Mr. Chairman, we believe that any program which might be adopted should be flexible enough so that the Secretary of State is required to annually certify the cooperation of the countries on the list eligible for facilitation and the continued very low rate of visa refusal. While we would be willing to allow the Secretary to promulgate the necessary standards and methods for revoking these privileges, we believe that a visa refusal rate in the neighborhood of two to two percent to two and a half percent is reasonable.

3. Maximum length of stay of foreign traveler.—In order to preclude foreign nationals from being the beneficiaries of this program, it is our belief that a maximum length of stay be incorporated into the eligibility requirements. A period of time of approximately 90 days would seem reasonable to us as being the upper limits of acceptability.

4. Reliability of a monitoring system to detect violators.—Mr. Chairman, it is my understanding that the Department of Transportation possesses both the ability and the willingness to develop the necessary computer capabilities to correlate time of exit from the United States. This would provide for expeditious identification of those who are in violation of any facilitation procedures. A sound recordkeeping and follow-up procedure is a must if we are to properly monitor and enforce any standards required to administer this program.

The procedures for implementing the proposal as outlined by the State Department certainly address "controlling" the entrance of ineligible aliens to my satisfaction. I want to emphasize that the Caucus has always felt strongly that it is essential to have strong controls. We refer not only to control forms but to strict monitoring whereby each country's statistics are reviewed on an ongoing basis. Just as we are pleased to extend the waiver of visas to certain countries, we must also be ready to take back that courtesy should it be misused.

The reciprocity, the 2 percent refusal rate, the agreements between the I.N.S. and the international carriers, and the control forms all appear to be reasonable procedure.

At a time when our country is seeking to turn its economy around, this simple nonimmigrant visa waiver provision could have a substantial positive impact. The proposal has the full support of the Congressional Travel and Tourism Caucus, which stands ready to assist this Subcommittee in their honest and diligent efforts to provide for the facilitation of foreign travel to the United States.

Mr. Chairman, once again, thank you and the Subcommittee members for affording me this opportunity to appear before you.●

NORTHFORK BLUE DEMONS

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. RAHALL. Mr. Speaker, this past weekend in Charleston, W. Va., a new record was set for consecutive State high school basketball championships nationwide. The Northfork High School "Blue Demons", in defeating Wheeling Central in the class AA final, won their eighth straight title.

Northfork's season record was 22 wins, 3 losses.

The game last Saturday was even more special for the team, because they wanted to win badly for their coach, Jennings Boyd, and assistant coach, Henry Winkfield.

Popular Coach Winkfield is recovering from a serious injury, and I am sure he was delighted when the Blue Demons went out to "win one for Wink."

Also, Saturday's game marked the end of a tremendous career for Head Coach Jennings Boyd, who announced earlier in the year that this would be his last season.

Jennings Boyd has been the head basketball coach at Northfork for 15 years. His record over that period is 306 wins, 62 losses. Such a record is accomplished only through dedication, discipline, and hard work. He does not subscribe to cursing or yelling as motivational tools. He is a man who demands respect and deserves it.

The Northfork Blue Demons are the pride of southern West Virginia basketball. They are a wonderful group of young men, who represent their community well.

I commend them and congratulate them on their record setting win, and am sure they will go out next year to make it nine in a row.●

PRESIDENT REAGAN'S STATEMENT ON CYPRUS

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. FINDLEY. Mr. Speaker, provisions of Public Law 95-384 require that the President submit to Congress every 60 days a report on the progress being made toward a negotiated settlement of the Cyprus problem.

President Reagan submitted, in accordance with this law, his first report on the Cyprus negotiations on March 20, 1981. This report is positive in two important respects: First, President Reagan unhesitatingly reaffirms the support of the United States for the efforts of the United Nations to seek a solution of the Cyprus problem and, second, the report notes that, unlike earlier attempts at U.N. mediation between the two parties on Cyprus, the current negotiations have continued for some time and the expectation exists that they will continue on a regular basis in the future.

It is critical that the intercommunal talks on Cyprus not break down, but that the two parties to the negotiations make a serious attempt to resolve the problems that plague that island. I salute the President for his words of support for the negotiations and for his statement that his administration is committed to assist in the U.N. endeavors to resolve the Cyprus issue.

The President's report follows:

THE WHITE HOUSE,

Washington, D.C., March 20, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: In accordance with the provisions of Public Law 95-384, I am submitting the following report on progress made during the past sixty days toward reaching a negotiated settlement of the Cyprus problem.

A just, fair and lasting resolution to the problems of Cyprus will remain a priority for my Administration.

The talks between representatives of the Greek Cypriot and Turkish Cypriot communities are continuing. Under the chairmanship of United Nations Secretary General's Special Representative on Cyprus, Ambassador Hugo Gobbi, the two sides are undertaking detailed analytic review of basic issues. The parties have been addressing the following topics in rotation on the basis of one topic each meeting:

(A) Reaching agreement on the resettlement of Varosha under United Nations auspices.

(B) Initial practical measures to promote good will.

(C) Constitutional aspects.

(D) Territorial aspects.

Meetings were held on January 16, 21, and 28 and February 4, 11, and 18. After a mutually agreed upon recess, the meetings resumed on March 11. We expect the negotiations to continue on a regular basis. Throughout this period both sides have engaged in serious discussion of the issues involved. Each side has advanced proposals and the negotiators have been seeking to identify areas of agreement and reduce differences. Throughout these discussions the parties have maintained a congenial negotiating atmosphere, seriously addressing points for negotiation.

I am convinced that through these negotiations a foundation for a stable, enduring settlement on Cyprus is being laid. Both sides are seriously discussing steps to mitigate longstanding conflicts and, as was anticipated, progress is slow. However, the opportunity for a just and lasting settlement will not remain indefinitely. Therefore, the need for patience and persistent negotiating must be complemented by innovative and flexible approaches to the outstanding problems. After six years of effort, it is time to see a fair settlement that will benefit and serve all of the Cypriot people.

In this, my first report to Congress on Cyprus, I unhesitantly reaffirm the support of the United States for the efforts of the Secretary General and his Special Representative on Cyprus. They have been vigorously and persistently seeking a just and lasting solution of the Cyprus problem. The Secretary General and other United Nations' officials have been creative in their proposals and unflagging in their patience from the inception of the negotiations. I commend their professional conduct and offer the commitment of my Administration to assist in their endeavors to resolve the Cyprus issue.

Sincerely,

RONALD REAGAN.●

THE PROMOTION OF FILBERTS

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. AuCOIN. Mr. Speaker, today, I am introducing legislation to aid the promotion of filberts. This bill is identical to H.R. 8158 which I introduced in the 96th Congress. I expect it will be included in the 1981 farm bill.

This bill amends the Agricultural Adjustment Act to authorize marketing research and promotion projects including paid advertising for filberts. It gives the Filbert Marketing Order Committee the authority it needs to amend the marketing order so it is then permitted to levy an assessment on handlers to generate funds for research, promotion, and advertising.

This legislation provides an excellent opportunity for the promotion of filberts as there is a need to strengthen our domestic markets for this commodity. U.S. filberts are produced on 25,000 acres in Oregon and Washington and only account for 55 percent of the filberts the United States consumes. By furthering the promotion of filberts, this bill would help increase domestic consumption.●

DECONTROL OF CRUDE OIL PRICES

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. OBERSTAR. Mr. Speaker, as our constituents continue to suffer the effect of decontrol of crude oil prices and as the administration considers proposals to add to the consumer burden through the deregulation of natural gas prices, it is important for Congress to review the consequences of decontrol.

Decontrol is inflationary. The Congress ought to have stopped it. It did not, and is unlikely to reverse decontrol at any time in the future. I hope Congress will show greater concern for the Nation in the consideration of deregulation of natural gas.

The op-ed page of the New York Times of March 19, 1981, included a concise discussion of the inflationary impact of decontrol. It also noted some of the mistaken estimates of the cost of decontrol made in the past.

I ask my colleagues to consider the analysis presented by David Greenberg and Ann Lower of the Consumer Federation of America.

CRUDE DECONTROL BY REAGAN

(By David I. Greenberg and Ann K. Lower)

WASHINGTON.—When President Reagan decontrolled crude oil, gasoline, and home-

heating oil, he did so without formal counsel from Congress and the public. His desire to act on his own came at the expense of public-hearing requirements set out in The Economic Stabilization Act of 1971, which Congress later incorporated into statutes governing oil-price controls.

The Administration's accelerated decontrol program also comes at great expense to consumers. It provides an immediate 1 percent increase in inflation, and by the end of fiscal 1981 it will have added $11.7 billion to the price of oil products.

If our experience with oil decontrol has taught us anything, it is the wisdom of public cross-examination of Presidential oil-pricing initiatives. In 1979, Secretary of Energy James R. Schlesinger estimated that decontrol would cost consumers $16 billion between June 1979 and September 1981. Later, Congressional hearings forced the Carter Administration to raise its estimate to $48.9 billion for that period.

Under scrutiny, Jimmy Carter's promise of only a three-tenths of 1 percent rise in the Consumer Price Index by September 1981 also proved fanciful. A House subcommittee demonstrated that the impact of energy-price increases added nearly 4 percent to inflation in 1979.

Mr. Reagan has offered the public a set of decontrol promises that also borders on the fanciful. These forecasts underscore Congress's wisdom in requiring public hearings "to the maximum extent possible."

When Mr. Reagan signed the executive order Jan. 28, his advisers projected retail price increases from "almost nothing" to three cents to five cents per gallon of gasoline. "That was ridiculous," said John Lichtblau, executive director of the Petroleum Industry Research Foundation. "They were wrong within a week." Actually, they were wrong within two days. On Jan. 30, Standard Oil of California increased wholesale gasoline prices by six cents and home-heating oil by five cents as a "direct result" of decontrol.

Within two weeks, gasoline prices rose an average of seven cents and the price of jet fuel had airline companies clamoring for fare increases. The Congressional Budget Office projected increases of nine cents a gallon of gasoline at the pump by the end of the first month. Today, consumers are paying an average of 10 cents a gallon more. At minimum, then, the impact of decontrol will be double the Reagan team's projections.

A similar fate appears to await Administration estimates of increased production, as well as Energy Secretary James B. Edwards's projected savings of 50,000 to 100,000 barrels of oil per day.

Even the industry greeted these promises with skepticism. A Gulf Oil executive put Mr. Reagan's "increased incentives" argument into perspective: "There aren't too many rigs unoccupied currently," said Charles Campbell, a senior vice president. And Mr. Lichtblau said that he anticipated only slight improvements in both production and conservation. These comments fit the reality of oil economics. While the price of crude oil has jumped 1600 percent in the last 10 years, the number of exploratory wells in the United States has risen only 10 percent.

Ultimately, the Administration's decision to forego hearings on decontrol makes political sense. No President wants to defend an inflationary energy program that produces neither exploration nor conservation.

What the President's program will produce is tax revenues in fiscal 1981 and 1982—a projected $7.9 billion in corporate income taxes and windfall profits that oil companies collect from consumers. But a President who cherishes his tax-cutting image is unlikely to seek public comment on a tax plan posing as energy policy.

In the end, President Reagan only hastened the challenge to decontrol. That challenge began a few weeks later. On Feb. 26, Federal District Judge Harold H. Greene heard arguments in a lawsuit, filed by Senator Howard M. Metzenbaum of Ohio, Representative Toby Moffett of Connecticut, New York State, the Consumer Federation of America, and others, that sought to overturn the decontrol order. On March 5, Judge Greene refused to reverse the President's action, ruling that the plaintiffs had failed to meet the heavy legal burden required to support an injunction. Still, the plaintiffs scored on two important points. First, Judge Greene affirmed that the President lacked unfettered discretion to order decontrol without hearings; second, he recognized that injury to consumers "clearly appears to exist."

That economic injury will form the basis of a broader challenge to accelerated decontrol. The challenge will come from consumers, as they feel the pinch of energy costs and energy-fueled inflation. At that point, Mr. Reagan may well wish he had stayed in closer step with the law.

[David I. Greenberg is a lobbyist for the Consumer Federation of America. Ann K. Lower is the Federation's information director.]●

CITYHOOD FOR YOTSUKAIDO

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. STARK. Mr. Speaker, on April 7, 1981, the town of Yotsukaido, Japan, will attain cityhood. Yotsukaido is the sister city of Livermore, Calif., part of the Ninth Congressional District. Yotsukaido was able to reach cityhood because its population recently crossed the threshold of 60,000. I would like to join the city of Livermore in congratulating Yotsukaido on its achievement.

This will certainly mean greater responsibility for the city as a whole, and its leaders specifically. Mr. Teiichi Saito is currently the mayor of Yotsukaido. I wish the city and the people of Yotsukaido health and happiness, and wish to express my sincerest congratulations on their cityhood.●

CONGRESSIONAL SALUTE TO THE 1981 RECIPIENTS OF THE UPS CIRCLE OF HONOR SAFE DRIVING AWARD

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. ROE. Mr. Speaker, on Wednesday, April 1, residents of the State of New Jersey will join with officers and members of the United Parcel Service (UPS) to commemorate and give testimony to the 1981 recipients of the UPS Circle of Honor Awards—14 distinguished citizens of our State whose standards of excellence and expertise while on the roads and highways in serving the delivery needs of our people span 343 years of safe driving. I know that you and our colleagues here in the Congress will want to join with me in extending our warmest greetings and felicitations to the following UPS honorees with deepest appreciation for their safe driving skills:

	Years of service
John Lavaggi	31
Paul Goward	31
John McAteer	30
Ed Cusack	27
Harry Westervelt	23
Frank Wehrle	22
Daniel Zungoli	22
James Schrade	20
Joseph Engleman	20
John Barry	20
James McNatt	20
Frank Scanlon	24
John Carlos	27
Gerald Dunne	26

Mr. Speaker, the "Circle of Honor" is a UPS policy described by UPS management, as follows:

We honor safe drivers. We give recognition to drivers and groups of drivers completing specified periods of safe driving.

We stress safety throughout our operations. Nothing is of greater concern to us than the safety of our people and of the general public.

We recognize the importance of the physical condition of our people and of applicants for employment. We do whatever we can, through our medical department and otherwise, to promote and contribute to the maintenance of good health of our people throughout their employment.

In the design, construction, and maintenance of our automotive and all other equipment and facilities, safety is a primary concern.

We train our people to operate motor vehicles, facilities, and other equipment with utmost consideration for the safety of themselves, the general public, and the equipment itself.

We encourage participation by all of our people in safety awareness activities. We are all committed to fostering the most effective safe practices in all our work. By meeting our own high safety standards, we will be contributing to the well being of our people, our company, and the communities we serve.

Mr. Speaker, to understand the depth and meaning of the "Circle of Honor," with your permission I would like to insert at this point in our historic Journal of Congress a brief history of UPS which was presented to me by their most esteemed representative in my congressional district, Jim Teague, as follows:

OUR DELIVERY SERVICE: STARTED IN SEATTLE

On a bronze plate imbedded in a sidewalk at Second Avenue and Main Street, in Seattle, Washington, are inscribed these words:

"Birthplace of United Parcel Service

"In August 1907, in a 6x17 foot office under the original sidewalk here, a few messenger boys began the business which their many thousand successors extended throughout the vast regions of our country covered by United Parcel Service today. Exemplifying the opportunities open to private citizens under the Constitution of the United States of America, this plaque was placed in January 1967, with the cooperation and appreciation of the Seattle Historical Society."

Our original name, American Messenger Company, was appropriate for the kind of business we began in 1907. In response to telephone calls received at their headquarters under the sidewalk, messengers ran errands, carried notes, hand baggage, trays of food from restaurants, and delivered packages. They used bicycles and streetcars for longer trips.

EARLY PROGRESS SLOW

Improvements in transportation and communication were causing a decline in the messenger business, and most of the competitors of American Messenger Company went out of business. Our own progress was slow during the first several years, but we made up for the loss of other kinds of business by specializing more and more in the delivery of packages for retail stores.

We moved from one location to another, each time improving what we had before, and began to use motorcycles for some of our deliveries. For about two years our largest customer was the United States Post Office, for which we delivered all special delivery mail coming into Seattle. Also, during this early period of development, we began to consolidate packages for delivery on regular schedules.

In 1913, we acquired our first delivery car, a Model T Ford, and on its sides was painted our new name, Merchants Parcel Delivery. Our business began to grow much faster, and we built a good reputation among the stores of the city through our strict adherence to high ideals of service and personalized attention to every package handled.

In 1918, three Seattle department stores disposed of their own delivery cars and turned all their packages over to us. We acted as their consolidated delivery department, and the distinctive characteristics of our business began to emerge.

MOVES TO OTHER CITIES

Our first expansion beyond Seattle was to Oakland, California in 1919. There we adopted our present name, United Parcel Service.

Los Angeles came next, in 1922, and was followed by San Francisco, San Diego, and Portland. With these additions, we were operating in all major cities of the Pacific Coast by 1927.

The big jump across the continent occurred in 1930, when we consolidated the deliveries of several large department stores in New York City and Newark, New Jersey.

In subsequent years, our retail store service was established in Cincinnati, Milwaukee, Philadelphia, Chicago, Detroit, Minneapolis-St. Paul, Pittsburgh, Cleveland, Miami, Denver, St. Louis, and other metropolitan areas.

COMMON CARRIER SERVICE ESTABLISHED

In 1922, in Southern California, we launched an experimental operation which, many years later, was to have a dramatic effect on the growth and development of our company. That operation was referred to then as our "wholesale service." It has now come to be known as our "common carrier service."

This new service was radically different from any being offered in that area, or anywhere else in the United States. It incorporated many of the features and operating principles of our retail store delivery service, such as uniformed drivers, attractively painted and well-maintained vehicles, emphasis on courtesy, and insistence on meeting commitments.

It included features not offered by any other private carrier, or even by government parcel post, such as the automatic daily pickup call, acceptance of checks made out to the shipper in payment of C.O.D.'s, extra delivery attempts, automatic return of undeliverables, and streamlined documentation with weekly billing. A key, essential feature was that the service was provided at a cost comparable to the cost of using parcel post.

At first, this common carrier service was confined to a small area around Los Angeles. By 1927, it had been expanded to include specified highways extending approximately 100 miles to the north of Los Angeles, 60 miles to the east, and 125 miles to the south.

EXTENSION OF AREA SERVED

No effort was made to extend the common carrier service beyond Southern California until 1952 . . . In 1952, we decided to seek an extension of our operating authority in California. Soon thereafter, we also decided to commence common carrier operations in other cities

COMBINED GROUND AND AIR SERVICE

For a number of years, we have also conducted a combined ground and air service. Under authority granted by the Civil Aeronautics Board, we use the services of commercial airlines to connect UPS operating areas. These deliveries to distant locations constitute an important part of the service we offer.

Mr. Speaker, I appreciate the opportunity to call your attention to the safe driving records of some of our distinguished citizens and seek this national recognition of their standards of excellence and outstanding service to our people. We do indeed salute the distinguished gentlemen of the UPS "Circle of Honor."●

VIETNAM VETERANS' COMMEMORATION DAY

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. DOWNEY. Mr. Speaker, it was with acute displeasure that I learned that House Joint Resolution 182, a proposal to commemorate April 26, 1981, as a national day of recognition for veterans of the Vietnam era, was scheduled for a vote on a day when I am committed to be on business elsewhere. Were I present I would certainly vote "yes."

I was an original cosponsor of this resolution and spent a considerable amount of time alerting my colleagues to the worthiness of setting aside a special day for these veterans. I know only too well what injustices have been suffered by Vietnam veterans. My district is heavily populated by men and women who have mental and physical scars from their service in that war torn nation. To say that their sacrifice was ignored would be understating their plight. Not only did we turn our backs on their accomplishments, but we also turned our backs on their legacy—drug addiction, mental illness, physical destruction, and what is probably the worst sin of all—we never even thanked them for fighting for us in what had to be a losing proposition.

Clearly we owe them this day and most assuredly, much, much more. But at least this is a beginning.●

CHANGES IN THE TRADE ADJUSTMENT PROGRAM

HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. CONABLE. Mr. Speaker, I am introducing today, along with my colleagues Mr. VANDER JAGT and Mr. FRENZEL, a bill incorporating the President's recommended changes to the trade adjustment assistance—TAA—program as it applies to workers. These changes are designed to refocus the program on its original purpose of assisting in the readjustment of workers experiencing trade related unemployment, to reduce the burgeoning cost of the program, and to provide greater equity among workers who are trade impacted and those workers unemployed by economic forces or policy decisions unrelated to trade.

The principal element of the bill is the integration of TAA with the unemployment insurance—(UI)—program. TAA payments would not be made until a worker had exhausted UI benefits, whether regular, additional, or extended and, once begun, the TAA payment would be limited to an amount equal to the weekly amount payable under UI. The number of weeks of TAA payments would be limited to 52, with an additional 26 weeks of benefits available to workers enrolled in approved training programs. Furthermore, workers receiving benefits would be required to accept suitable work if available as is the case now for UI recipients.

Another important change in the worker program which this bill proposes involves a change in the standard for determining the impact of imports on employment and production prior to the certification of workers. Under current law, imports must have contributed importantly to the decline in sales and production; that is, be a cause that is important but not neces-

sarily more important than any other cause. The bill provides a strengthened test which would require that imports be a substantial cause of the problem and a cause not less important than any other cause.

In addition, it must also be determined that reduced employment levels caused by imports at any firm or subdivision requesting certification have a substantial probability of being permanent. These two new tests of the cause and effect of import penetration on an industry will insure that benefits designed to foster adjustment by such firms, and workers in these firms, to import competition will indeed have a sound basis for triggering the additional assistance provided under the program. If imports are not the root cause of the problem, the goals of the TAA program cannot effectively be achieved.

Although the weekly benefit amount provided by TAA serves to cushion temporary trade-related unemployment, more important from the point of view of readjustment is the job search, relocation, and training aspects of the program. The bill provides for approximately a tenfold increase in the funding available to assist workers in finding new employment and, if necessary, improving their skills through training. In the more difficult situations, a worker will be able to find more assistance under the expanded program in seeking employment and perhaps relocating outside the immediate depressed area, including other States where job opportunities are significantly better.

For example, the bill would increase the maximum reimbursement for expenses related to job search from $500 to $600. Also, the TAA relocation allowance would be increased for 80 percent of related expenses plus a lumpsum payment of three times the worker's average weekly wage—up to a maximum of $500—to 90 percent of such expenses plus a maximum lumpsum payment of $600. Of course, the strongest commitment of the administration is in the area of training where funding will be increased from about $12 million in fiscal year 1980 and none in fiscal year 1981 to more than $100 million in fiscal year 1982.

The Trade Subcommittee of the Committee on Ways and Means plans to mark up this legislation on Wednesday, April 1. The bill provides a fairer balance in the treatment of workers while at the same time recognizing the need to offset in some degree the adverse effects of this Nation's free trade policy. Such a policy of open trade benefits the U.S. economy greatly and provides more overall employment than is lost in those industries which are more susceptible to increased import competition. The program envisioned by this bill can adequately and effectively adjust trade impacted workers to new employment opportunities. I hope it will be strongly supported by my colleagues.●

CHIEF FRED G. ZORB

HON. EUGENE V. ATKINSON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. ATKINSON. Mr. Speaker, this Friday I will have the honor to participate in a retirement dinner for someone who has over the years made a major contribution to preserving the lives and property of the residents of Butler, Pa., in my congressional district. I will be brief, but I am sure that my colleagues would be interested in taking a moment to consider the contributions of Mr. Fred G. Zorb, fire chief of Butler.

Chief Zorb has been a member of the Butler Fire Department for 35 years and chief of the department for the past 13 years. Mr. Speaker, it is impossible to imagine the countless number of hours that Mr. Zorb has dedicated himself to in the name of community fire protection. In addition, one can only speculate to the number of lives that Chief Zorb has been responsible from saving from life or injury over the years both as a fireman himself and as a leader and an example to other firemen.

We are all aware of the dedicated hours that our community firemen put into protecting life and property. Mr. Zorb has demonstrated how being a fireman requires constant sacrifice both on his part but also on the part of his family. As chief, Fred helped his men deal with the problems that such a job creates and to hold together a department that has served our community in an exemplary fashion.

On Friday, April 3, 1981, the residents of Butler will be honoring Chief Zorb, but they also will be honoring Fred Zorb, a citizen whose life can serve as an example to all of us in this Hall of Congress. Thank you.●

WILLIAM GREIDER ON THE REAGAN DEFENSE BUDGET

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. CONYERS. Mr. Speaker, the Reagan administration is proposing to increase the defense budget by $44 billion—in obligational authority—and by $26 billion—in outlays—from fiscal year 1981 to 1982. This represents a 24.8 percent 1-year increase in obligational authority. In the 6-year period ending in fiscal year 1986, the administration is proposing, at a minimum, an additional $1.5 trillion for defense over the Carter administration estimates.

A proposal of this magnitude warrants a close look. A number of questions immediately come to mind. Last year, the inflation rate in the defense sector reached 20 percent, or roughly double the rate in the economy overall. Defense-sector inflation results from a shortage of highly skilled technicians and engineers in defense industries, material and supply bottlenecks in most of the weapons programs, and the fact that while new defense spending raises aggregate income and demand, there is no additional production of consumer goods to meet such demand. Given defense-sector inflation, how does the administration propose to deal with these inflationary pressures and the Federal deficits likely to accrue?

The defense industry is highly concentrated in particular areas of the country, largely the Southeast and Far West, the very areas that are experiencing relatively good economic prospects. A defense increase of the magnitude proposed by the administration amounts to a public investment strategy targeted to those areas that least require Federal assistance and away from the areas that are in greatest need of revitalization.

Finally, the huge increase in defense funds are likely to siphon away considerable amounts of credit and capital from civilian economic sectors that require considerable new capital, such as transportation, energy, and housing.

In the light of these considerations, William Greider, the assistant managing editor at the Washington Post, has performed a singular service in his commentary of March 29, entitled, "The Maginot Curve: The Faster You Spend on Defense, the Behinder You Get." The analysis of the defense budget that he offers is one of the most thought provoking I have seen in recent weeks. I urge my colleagues to take a good look at the Greider article, that raises many basic questions about the administration's defense budget.

The article follows:

HOW MORE BUYS LESS—THE MAGINOT CURVE: THE FASTER YOU SPEND ON DEFENSE, THE BEHINDER YOU GET

(By William Greider)

If everyone now comfortably grasps "supply-side" economics and the logical beauty of the Laffer Curve, it will not confuse them further if I introduce them to the Maginot Curve. The Maginot Curve, which I have named in honor of those French generals who prepared so cleverly for World War II, applies the "supply-side" perspective to the "demand-side" of President Reagan's new budget—the trillion-dollar boom in defense spending.

The Laffer Curve, as everyone surely knows by now, holds that as the government raises its tax rates, it reaches a zero point where revenue actually begins to decline. The more you tax, the less you collect.

The Maginot Curve makes the same point about defense spending. The more you spend on rearming, the fewer weapons you get for your money. Those who are familiar with weapons procurement know that this is already happening. As the Reagan rearmament pours $1.5 trillion into the Pentagon over the next five years, the United States will approach the Maginot theoretical zero point, never before reached by civilized nations. We will spend much, much more on weapons and we will get back nearly zero in national security.

This is only a theory, of course. I do not expect the Reagan team to take it seriously, because it offends all of their cherished notions about what government is for.

Government is for buying tanks, ships, airplanes and making America strong. Who would believe that dumping a trillion dollars on the defense industry might actually make us weaker? The French generals built a big wall across eastern France to keep the Germans out and called it the Maginot Line. Trouble was, Hitler went around it.

A few years hence, after we have experienced the "supply-side" calamities of the Reagan defense budget, I predict people will be ready to examine the Maginot Curve as a serious idea. Point zero in defense procurement is not as distant as you might think.

Last fall, for instance, when the Pentagon was already flush with the Carter administration's budget increases, the negative effects of the Maginot Curve were already visible. In the final three months of 1980, the total purchase cost of 47 major weapons systems escalated by $47.6 billion. From September to December, due to engineering changes and foul-ups and inflation, the total price tag on these planes, tanks, ships, guns and fancy electronic gear rose from $262.6 billion to $310.2 billion, an inflation rate of nearly 20 percent.

That makes Medicaid sound like a real bargain. The $47.6 billion Pentagon overrun is, by the way, a wonderfully apt statistic for all those weep-easies around town who are moaning about the Reagan budget cuts for food stamps or Legal Services or other do-gooder programs. Think of it: The entire domestic budget cut which Ronald Reagan is proposing was swallowed up by one quarter's price escalation for Pentagon weapons. Does that register on anyone's yelp index?

But my fundamental point is this: Thanks to that price escalation, we must buy fewer weapons. The Air Force dropped seven F18 fighter jets from its 1981 buy. The Army reduced its order for XM1 tanks by 20 tanks and is negotiating to cut another 45. The Pentagon, like any average consumer, blames it on inflation and promises to be a more careful shopper in the future.

But the future will be worse for weapons inflation, not better, unless the Reagan managers have the political courage to confront the "supplyside" flaws in the defense industry. Otherwise, the rush of new dollars into defense orders will simply aggravate all of the fundamental problems which are producing this extraordinary waste.

To reform the structural flaws in the defense industry, however, the "supply siders" would have to abandon one of their most cherished theological principles, the idea that there is a "free market" which functions efficiently on its own, if only government will get out of the way. Whatever one may say about the rest of the economy, the "free market" is an elaborate pretense in the defense sector. Defense production is perhaps the most highly regulated of all industries, operating partly in government-owned factories and with government guarantees of sales and profits. On many items of hardware, the Pentagon is the only buyer. And on most military parts and systems, the Pentagon buys from a company which is the only seller.

All of this is concealed by an earnest mythology of "free market" competition, based on the simple virtues of public purchases through competitive bidding. The reality approaches monopoly. Only 8 percent of Defense's business is done by the formal system of advertised price competition. Most purchases are effectively "negotiated" between buyer (the government) and seller (defense contractor).

About 60 percent of Pentagon procurement is actually awarded on a noncompetitive, single-source basis in which the supplier names the price and delivery date. The larger the dollar value, the more likely it is that the contract will be noncompetitive.

These reality checkpoints are derived from the defense procurement studies done by a free-thinking economist named Jacques S. Gansler, who studied the structure of the defense industry as a deputy assistant secretary of defense in the Ford administration and who has spent the last five years trying to get generals, admirals, and civilian managers to listen to what he found. Today, for those who seriously want to understand the matter, Gansler's analysis is summarized in one dense and troubling volume, "The Defense Industry" (MIT Press, Cambridge, Mass., $19.95).

Gansler, I should add quickly, is no weepy dove or out-of-fashion lib-lab economist. He believes, with the Pentagon brass, that America was "unilaterally disarming" itself in the post-Vietnam defense budgets while the Soviet Union was preparing for war and that the trend must be reversed. But he also believes that simply throwing money at Boeing and General Dynamics and McDonnel-Douglas and the hundreds of other defense contractors will produce disastrous results. Indeed, it was Gansler who explained for me the broad outlines of supply-and-demand inflation which I dubbed the Maginot Curve.

What would happen, for instance, if there were a sharp increase in defense expenditures for aircraft, as Reagan now proposes? Gansler anticipated the question in his book:

"Although there were many badly underutilized plants and redundant employes, it was highly likely that greatly increased defense funds, spent on the present products with the present contractors, would not yield significantly more military equipment but would only raise the prices.

"The existing bottlenecks of labor, parts and production machinery would not be removed, and the few firms doing business on the increased demand would simply pay more for the scarce parts and labor and charge the government more for the equipment produced. The impact would be inflationary, with little benefit in terms of either employment or national security."

This is easier to understand with a humble example. According to studies by the House Armed Services Committee, there is now a wait of 120 weeks for delivery of aircraft landing gear, twice the delay which existed only a few years ago. In some cases, according to Gansler, forgings and other parts for landing gear can only be obtained from one contractor. When the Pentagon makes new orders, those must wait in line behind the old orders. The effect is upward pressure on price and longer delays.

If the supplier decides to expand production, build a new plant and hire more workers, it runs into the industry-wide inflation. There is already a shortage of machinists in America and no surplus of engineers. Firms are already bidding up salaries in furious competition for personnel.

In addition, shortages of key parts hold up production on major weapons systems because the network of small suppliers has atrophied in the last decade. While the Pentagon and Congress concentrated on keeping the prime contractors afloat with bailouts and life-saving orders for the big-ticket items, scores of smaller firms simply dropped out of the defense business. They couldn't stand the boom or bust uncertainties; they left behind a greater concentration of producers, which means, of course, even less competition on price.

So far, we have not even mentioned the reliability of these weapons. Americans have gotten so accustomed to reading that their billion-dollar weapons don't work right or their huge airplanes have serious flaws that they are no longer shocked. Gansler believes that the scandals of unreliable defense products also flow from the structure of industry, the absence of genuine competition.

An aircraft manufacturer is encouraged by the present system to "buy in" during the research and development phase of a weapons program—that's a business term for pricing the product too low at the start in order to win the sale. Then the contractor "gets well" later by gouging the customer when the aircraft is in full production and the buyer can't easily turn elsewhere.

In this case, of course, the customer is us. If the aircraft or its engine doesn't work right, so much the better. That means more engineering changes, an increased price tag and, under present procurement rules, greater profit.

The fundamental answer, of course, is more competition. Every true-blue conservative is for that. But the argument begins with this question: How do you create more competition in a highly regulated industrial sector where the government is the only customer and the marketplace is dominated by product monopolists? As I understand the "supply-side" approach, they might say something like this: Deregulate the businesses, get the government off their backs and then simply throw a lot of the money on the table and let the fittest get the mostest.

Gansler, alas, thinks the government cannot withdraw from managing the defense industry, even if it wants to. The only issue is whether the Pentagon will reform its procurement strategies to produce more competition and, thus, lower prices and more reliability. Or whether it will allow the present structure to continue to swallow up these new billions and frustrate further the anxieties over our national arsenal versus the Reds.

Among other things, Gansler would apply "indicative planning" to the defense sector. "Indicative planning" is a dirty socialist term borrowed from the mixed economies of Western Europe, so Gansler prefers an Americanized euphemism: "coordinated government policy." What it means, crudely stated, is that the Pentagon would force-feed competitive arrangements on the defense industry. The peculiar nature of this sector is that, unlike the "free market" theory, ineffective firms don't get eliminated from the marketplace and efficient new

competitors find it most difficult to gain entry.

For instance, in some cases, the Pentagon should set aside the meaningless facade of competitive bidding and use guarantees and subsidies to draw new firms into the field to compete on price and quality with the old monopolists. It should separate the R&D phase of weapons development from the production phase so that companies would have no incentive to "buy in" with dishonest estimates of costs. (Gansler notes, without irony, that this is what the Soviets do in their military-industrial complex, not to mention our European allies.) Military planners, if they really want to catch up with the Russians, should reverse the system's present incentives for raising costs and make the price tag a basic criterion in the design of new weapons.

And Gansler recommends this: Instead of perennially propping up losers, the government should allow some weak companies, including some of the major aircraft makers, to go under. Their plants are inefficient and represent a costly overcapacity which keeps valuable people and machines from converting to more useful enterprises.

As these remedies suggest, competition hurts. Will Defense Secretary Caspar Weinberger have the courage to confront the Pentagon pork barrel and apply his famous knife to its bloated contracts? Weinberger's initial moves to reform contracting have been encouraging, but he has not gotten to the hard parts.

Reagan's staunch supporters in the defense industry will yelp like wounded liberals if the SecDef tries to force a little honest competition upon them. If he doesn't try, we will watch the defense budget climb the Maginot Curve faster than you can cut the free lunch for poor people.●

CHAMPIONS OF VIETNAM VETS

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. CARMAN. Mr. Speaker, I note with great pleasure that the House recently approved legislation setting aside April 26 as a national day of recognition for Vietnam veterans. For far too long these brave soldiers have not gotten the credit they deserve. I am also glad to see that lawmakers at the State and local level are acting to honor those who served in Southeast Asia.

Among them is New Jersey State Senator Jim Wallwork, who introduced legislation in the State legislature which would give special honors to Vietnam vets on Memorial Day, May 25. Mr. Wallwork's proposal says May 25 should be a day not only to honor all veterans, but those who, refusing to run away, gallantly served in the Vietnam conflict, and especially for those who sacrificed their lives. As Jim recently told some reporters, "The time is now to put behind us the unfortunate feeling that we must ignore the Vietnam veteran."

On Long Island, we have another champion of the Vietnam vet. He is Suffolk County Legislator John J. O'Neil. John serves as the chairman of the Suffolk County veterans affairs committee and believes the Nation still owes a great debt of gratitude to those who served in Vietnam.

Mr. Speaker, with the help of men like Wallwork, O'Neil, and many others, we will see the day when the Vietnam vet feels his country really appreciates what he has done.●

HIGH-RISE FIRES—HOW SAFE ARE CHICAGO'S BUILDINGS?

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mrs. COLLINS of Illinois. Mr. Speaker, in recent months there have been a rash of fires in both commercial and residential buildings—well-publicized fires like the MGM Grand Hotel fire in Las Vegas and the smaller not-so-publicized fires which have taken place in your districts and mine. One point that has been driven home to me is the fact that in some localities not enough attention has or is being paid to either stengthening existing fire and building codes or enforcing to the letter, codes already on the books. Add to that the lack of adequate fire prevention devices either in homes or apartments, and you have life-threatening situations on your hands.

Congress, after hearing a report "America Burning," enacted the Fire Prevention and Control Act of 1974. This act established the U.S. Fire Administration (USFA), whose goal includes reducing the Nation's fire losses by 50 percent within a decade.

Officials from the USFA have informed me that Congress, by way of a show of support, should support the fire safety efforts of the USFA to reduce lives lost by fire and property damage.

On February 26, 1981, I introduced House Concurrent Resolution 81, a resolution expressing the sense of the Congress that State and local governments must continue to work with the USFA and combat fire losses. This concurrent resolution, if passed by both Houses, would demonstrate to officials on the local level that Congress is behind the USFA's efforts to fully investigate fires, enforce technical knowledge and expertise useful in upgrading existing codes, and encourage the private and commercial installation of modern fire prevention and safety devices; that is, smoke detectors and sprinkler systems.

I feel that we must acknowledge, support, and encourage the USFA on their continued efforts to educate the public and work with fire officials on the local level to see that code and building standards are properly enforced and reevaluated.

Along this line, I would like to share with my colleagues an article on "High-Rise Fires—How Safe Are Chicago's Buildings?" which appeared Monday, February 23, 1981, in the Chicago Tribune:

HIGH-RISE FIRES—HOW SAFE ARE CHICAGO'S BUILDINGS?

(By Jerry Crimmins)

"I never felt a drop from a sprinkler or heard an alarm," said a survivor of the recent blaze that swept through the Las Vegas Hilton, killing 8 and injuring 200.

The reason was that the wing that burned was not equipped with sprinklers and its ringing alarms did not work. If that fire had occurred in many downtown Chicago high-rises, the situation would have been the same.

Chicago's building code does not require sprinklers, alarms, or loudspeakers in high-rise hotels and office buildings built before 1975, and many buildings in downtown Chicago do not have them.

The Tribune picked a sample of downtown buildings to see which had modern fire safety features and which did not. The investigation was made with the cooperation of the Chicago Fire Department's Fire Prevention Bureau, led by Deputy Commissioner James Newbold.

The findings are based on observations by firefighters, conversations with building managers, and visual inspections. For each safety feature, the chart on this page shows whether it is required by the building code and whether it exists in each building. Many of the safety features required in buildings erected since 1975 are not required in those erected earlier.

The chart is not nearly a comprehensive list of desirable fire safety features for high-rises. It shows things easily understandable and verifiable. Tenants of buildings not listed here can use the information to check their buildings.

FIRE EXITS

"You'd be surprised at the number of people who want to go to places with outside fire escapes," Fire Lt. James DeFily, a hotel inspector, said recently. On the wall of Newbold's office is a picture of crowds descending outside fire escapes on the Midland Hotel, where 500 people fled during an extra-alarm fire in the basement in 1973. But outside fire escapes, such as those on Chicago's old hotels, are a thing of the past. Firemen like them; architects do not.

Chicago's fire codes, old and new, require only interior, fully enclosed stairwells with doors that automatically close. Generally, the stairwells exit in the interior of the ground floor, though some buildings, such as the Marriott Hotel on Michigan Avenue, have stairwells that exit on the street.

Two fires in Chicago high-rise office buildings, one on the ground floor and one in a lower level connected by an open escalator to the ground floor, have shown the serious weakness of stairwells that exit only to the interior. Fortunately, the fires occurred late at night, so there were no disasters.

The model fire code published by the National Fire Protection Association in 1976 says only half of those occupying a high-rise should be allowed to exit to the interior on the ground floor, and then only if the ground floor and open lower level have a sufficient sprinkler system.

SPRINKLERS

Firefighters prefer automatic sprinklers over just about any other fire safety mechanism. Sprinklers detect a fire. When heat reaches a certain point, they open up and often put out the fire. When the sprinklers start to flow in most buildings, they trigger a "water-flow alarm," which tells the building engineer where a fire has started.

In Chicago, buildings erected after 1975 must be either fully equipped with sprinklers or constructed according to a complicated "compartmentation" plan designed to isolate smoke and flames in a single compartment. (303 E. Wacker Dr. on the chart is a compartmentalized building.) Most new developers are choosing sprinklers here.

Sprinklers are not required here for high-rises built earlier than 1975. Some buildings have partial systems, especially in garages. One building built before 1975, Sears Tower, is fully equipped with sprinklers. Newbold said he would like to see a law requiring that all high-rises be fully equipped with sprinklers. An aide said the plan would meet with "a hellacious court fight." New York has such a law, but it is being challenged in court.

SMOKE DETECTORS

Fire Commissioner William Blair said recently that he would like to see smoke detectors required by law in single-family homes. He did not mention high-rise office buildings and hotels erected before 1975, which are not required to have them. Smoke detectors can be operated by battery individually or tied into an electrical automatic alarm system, which tells the building operator the location of the fire. High-rises built after 1975 must have centralized smoke detector systems if the "compartmentation" option has been chosen.

Under the 1975 Chicago code, a centralized smoke detector system does not set off an alarm throughout a floor or building. It goes off on the fire control panel, which usually is in the lobby. In New York, however, all high-rises must have installed this year centralized smoke detector systems, which set off alarms on two floors as well as signals on the fire control panels.

FIRE ALARM SYSTEMS

Chicagoans familiar with school fire drills may expect to hear that same ringing alarm when there is a fire in a downtown hotel or office high-rise. Except in rare instances, they will not hear it. They may hear nothing.

Ringing alarms in high-rise office buildings and hotels are not required under any Chicago code, apparently because it is felt that they might cause panic or cause people to rush from a safe area to a smoke-filled corridor. (The Michigan Avenue Marriott, Conrad Hilton, and Palmer House hotels are equipped with "general alarms," which may ring only on the orders of the fire department. These are not required, and the rest of the sample buildings do not have them. General alarms are not listed on the chart.)

The "fire alarm systems" mentioned on the chart make a signal only in certain offices to inform building operators, not tenants, that there is a fire. Such an alarm could be set off by a manual pull box, or it might be part of a centralized smoke-detector or sprinkler system.

In hotel and office high-rises built before 1975, no fire alarm system is required. High-rises built since 1975 must have an automatic system based on sprinklers or smoke or heat detectors. Even this system will not make a "general" noise.

In New York, all high-rises must have installed this year fire alarm systems that can be set off manually and automatically. The alarms ring on the fire floor and the floor above and on the control panel. Also, each floor must have a fire control warden who is a tenant volunteer. The wardens direct preliminary evacuation.

LOUDSPEAKERS

In the event of a fire in a Chicago office or hotel high-rise built after 1975, the occupants will hear the news on a loudspeaker system: "This is the fire department." (There has not been a fire in a new building here yet.) The one-way speakers are installed on every floor and controlled by the fire control panel in the lobby or near there. Only the responding fire chief is supposed to talk into the loudspeakers. The fire department does not want the building personnel using them "because we don't know what they'll say."

Through switches, the fire chief can communicate throughout the building at once or to separate floors. Newbold said the current theory on high-rise fires is to avoid mass evacuation in favor of selective evacuation. Generally, persons above a fire or on the same floor may be in danger, but persons below are not. Selective evacuation can be controlled by the loudspeaker system.

Hotel and office high-rises in Chicago erected before 1975 are not required to have loudspeakers. A few have them.

In New York, all high-rises must have loudspeaker systems installed this year. New York buildings also must have two-way phones on each floor for the use of the tenant fire wardens.

DOOR UNLOCKING

In some high-rises, one can get into a stairwell on any floor but out only on the bottom floor. The doors are locked on the inside for security. Office and hotel high-rises built here after 1975 that keep the stairwell doors locked must have a central device of unlocking these doors all at one time in case of fires. In New York, the requirement applies to all high-rises no matter when they were built. An option is to leave a door unlocked on every fourth floor.

TWO-WAY PHONES

Because of the danger of becoming trapped in a smoky stairwell, Chicago's 1975 high-rise code requires new buildings to have two-way phones on the stairs at every fifth floor. The phones connect to the fire control panel. Earlier buildings are not required to have them, and most do not. An exception is the 60-story First National Bank building. The stairwell doors are locked on the inside, and there are intercoms on the 39th and 25th floors only.

STANDPIPES

This is one of the key safety devices in the event of fire in all Chicago high-rises, old or new. All buildings 80 feet or more in height must have a standpipe water system running the full length of the building in a stairwell. One each floor, there must be hose connections for building hoses and a separate connection for fire department hoses. On the outside of the buildings, there must be places for the fire department to hook up extra hoses to the standpipe system to supply extra water if necessary.

ELEVATOR RECALL

High-rise offices and hotels built here after 1975 must have a box near the elevators for which the firemen have a key. The firemen can open the box and bring all the elevators to the ground floor, then operate them as they wish. If new elevators are installed in office or hotel high-rises built before 1975, they must be fitted with an elevator recall box.

SMOKE CONTROL

Chicago high-rise office buildings, not hotels, erected after 1975 must have ventilation systems capable of sensing smoke and switching to a fire mode automatically. The fire mode prevents the smoke from being passed throughout the building and sends it outdoors. This is not required in buildings erected before 1975.

SMOKE-PROOFING

High-rises that are more than 274 feet high, or 25 or 26 floors, must have one stairwell that is smoke-proof. This feature requires two connected towers running the length of the building. Entering the first one, the vestibule, a person will see vents that are supposed to carry the smoke upward and out. When a person continues through a door to the second tower, the stairwell should be smoke-free.

Only one smoke-proof tower is required because it is an expensive consumer of space. The assumption is that if you find yourself in a smokey stairwell, you can leave and go to the smoke-proof tower.

If you never heard of a smoke-proof tower, or do not know where it is, it will not be much help to you. But the firemen will use it.●

H.R. 2893, COAST GUARD AUXILIARIST BENEFITS

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. O'BRIEN. Mr. Speaker, a shocking disparity exists between the disability and death benefits accorded to Coast Guard auxiliarists, and those of regular Coast Guard employees. To correct this oversight I introduced H.R. 2893, the Coast Guard auxiliarist bill.

The current guidelines allow for the following: Assume there are two employees of the Coast Guard, Mr. Smith and Mr. Jones. They perform the same function as part of the same job in the same pay grade. Mr. Smith, however, is a regular Coast Guard employee, while Mr. Jones is an auxiliary employee. Assuming that while performing this function they both sustain a disabling injury—or, heaven forbid, a fatal injury—this disparity becomes evident. Mr. Smith—or his family—would receive a benefit comparable to his salary while Mr. Jones, because he is an auxiliary employee, would receive a benefit limited to a fixed base of $600 per month. I believe this is not just.

If enacted, my bill would substantially increase the base amount for figuring these benefits. This would be accomplished by replacing the fixed base of $600, presently found in the law, with a computation base equal to the

monthly pay of a civil employee of the Government, "grade GS-9, step 1." In addition to increasing benefits presently available, the proposed general schedule base will also provide an index mechanism to assure a continued realistic benefit base without requiring further amendment.

I have become aware of this issue through the tragic misfortune of two men, both of whom have been permanently disabled by injuries sustained in an accident which took place while they were fulfilling their obligation to the Coast Guard as auxiliarists. I have made the effect of this bill retroactive to benefit these men who are presently faced with an ignominious penury as well as emotional trauma. As far as I know, they are the only accident victims who would benefit from the retroactive aspect of this legislation.

The situation is serious and demands our attention. Auxiliarists make up approximately 81 percent of Coast Guard personnel. Many of them are questioning if their service is worth the risks of injury or death with low benefits. We must correct this problem. I urge my fellow Members to aid the swift passage of H.R. 2893, the Coast Guard auxiliarist bill.●

WORKFARE WORKS

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. FINDLEY. Mr. Speaker, workfare works and, with improved legislation, will work still better. That is the theme which emerges from the excellent testimony presented yesterday to the Domestic Marketing Subcommittee by experts from the General Accounting Office.

While the final report on the first year's experience in workfare under food stamps is not quite complete, the GAO nevertheless produced data and recommendations which show clearly how the program can become more cost-effective from the standpoint of both local and Federal Government.

As the author of the 1977 amendment which led to the workfare pilot projects, I am encouraged by all aspects of the report. It suggests that broadening the workfare concept nationally makes sense at this time, provided its provisions are improved by legislation.

Here is the report, as presented by Brian P. Crowley, associate director, senior level community and economic development division, General Accounting Office. He was accompanied by Stan Sargol, Mel Lynch and Dan McCafferty of the GAO.

FOOD STAMP WORKFARE

The Food Stamp Act of 1977 requires that the workfare concept, in which food stamp recipients will be required to work on public service jobs for the value of their food stamp benefits, be tested in 14 pilot projects—7 urban and 7 rural. But only 7 projects—6 rural and 1 urban—operated during the first year. We are currently completing our assessment of the first year's operation of the demonstration. Although the number of workfare demonstration sites and their rural/urban mix fell considerably short of legislative provisions and congressional expectations, the operation of the seven demonstration projects during the first year provided valuable insight into the problems and potential of the workfare concept.

We reviewed the operating results of the seven demonstration sites, problems in measuring workfare benefits and costs, and the need for legislative and administrative changes that will help provide a more effective and efficient workfare operation. We have in mind such changes as:

Eliminating some of the currently allowed exemptions,

Eliminating unnecessary waiting periods,

Strengthening program sanctions, and

Improving administration at the federal and local levels.

An extended phase of the workfare demonstration, involving 14 project sites, is now ongoing and is scheduled to end September 30, 1981.

HOW IT WORKS

Food stamp recipients subject to workfare are identified by the food stamp office and referred to a workfare component which schedules them for an interview after a 30-day job search period. At the interview, the individuals' skills, abilities, interests, and work experiences are assessed and they are scheduled for work in a public service capacity with either State and local governmental agencies or with private nonprofit organizations. Workfare participants work at the minimum wage rate ($3.35 per hour effective January 1, 1981) for enough hours each month to earn their household's food stamp benefits.

Referred individuals who fail to report for the interview or who fail to report for work are referred back to the food stamp office for a determination of cause and, where appropriate, imposition of sanction. If it is determined that good cause existed for the failure, such as lack of transportation, illness, household emergency, or conflict with employment, training, or job search, the individual is either exempt from workfare or rescheduled for interview or work.

EXEMPTIONS

Our work at the seven demonstration projects showed that out of a sample of about 1,900 food stamp household certifications in the project areas, 1,675 (88 percent) were exempt from workfare participation because household members fell into one of 10 categories of exemption specified by law. Many of the exempt participants were unable to work because of age, physical disabilities, or the need to care for persons unable to care for themselves, but about 25 percent were in four categories which we believe do not merit automatic exemption from the requirement to work for their food stamp benefits. These four categories are (1) AFDC-WIN registrants, (2) recipients of unemployment insurance benefits, (3) students, and (4) households whose earned income is low enough to qualify for food stamps but is greater than the household's monthly benefit. These four categories represented 470 of the 1,900 food stamp certifications we reviewed.

AFDC-WIN registrants are required to register for work training but are not always engaged in a full-time work training program. Unless they are so engaged, their automatic exemption seems inappropriate. (About 115 of our sample households were in this category.)

Recipients of unemployment insurance benefits are required to search for work but they should be able to do so and still participate in the food stamp workfare program which, in most cases, requires less than 5 days of work a month. (About 100 of our sample households were in this category.)

The 1980 food stamp amendments provide that students from other than low-income families will no longer be eligible for food stamp benefits and this will probably reduce the number of students in the program and thus the significance of this exemption. Nevertheless, some students will likely continue receiving food stamps. About 100 of our sample households were exempted because of student status. Working while going to college is not unusual and exemption from workfare seems inappropriate except in special circumstances where the student, in addition to attending classes, may be working or undergoing special training.

The fourth exemption category included 155 sample households whose earned income was greater than their food stamp benefits. Of the 155 exemptions, 85 appeared to represent full-time workers and 70 appeared to represent part-time workers. Full-time workers merit exemption because an inherent objective of the workfare program is to encourage individuals to find full-time employment. However, depending on their hours of work, part-time workers could have time available to participate in workfare.

Because most workfare obligations required less than 5 days of work a month, it seems unlikely that completing workfare obligations would create a real conflict with a participant's need to seek employment in the general work sector. If it did, the participant's workfare schedule could be adjusted to provide the specific time needed. If only three-fourths of the exemptions resulting from the four exemption categories had been made eligible for workfare instead of exempt, an additional 19 percent would have been added to the 12 percent of food stamp households referred to the workfare program during the first year of the demonstration.

We believe that automatic exemptions under the four categories discussed above should be eliminated.

30-DAY JOB SEARCH

The law gives new workfare referrals a 30-day job search period before they can be assigned to workfare jobs. As a result, new referrals automatically avoid workfare participation for at least 30 days. If they are certified for food stamp benefits for only 1 month, they will not be affected by workfare. Even under a 2-month certification, food stamp benefits for both months would probably have been received by some households before the workfare interview and assignment process would start and before failures to cooperate could be answered with cause and sanction determinations. Of a sample of 805 workfare referrals, 130 did not start a workfare job because their food stamp certification period ran out before they could be assigned.

Because participation in the food stamp workfare program is not a full-time activi-

ty—taking less than 5 days a month in most cases—such participation should allow adequate time for a participant to look for full-time employment without a 30-day job search period as is now provided. Should a conflict arise, the workfare project could adjust the participant's work schedule to provide the specific time needed.

Our inquiries at the two general assistance workfare projects disclosed that participants generally were expected to look for full-time employment on their own time. At one of these projects, workfare participants were not required to work more than 3 days in any 1 week—the remaining 2 days were made available for job search. At the other project all general assistance workfare participants had the same work obligation, regardless of the amount of assistance received each month. Each participant was required to work or train for 7 days a month and provide verification of 20 employment contacts before the end of the month. The employment contacts were to be made on the participant's own time.

We believe that the effectiveness of the food stamp workfare program could be improved significantly by requiring those eligible for workfare to report to the workfare office for interview and work assignment as an integral part of the certification process for food stamp benefits. Under these circumstances, any failure to cooperate in workfare would immediately terminate the benefit certification process.

SANCTIONS

The law requires that workfare referrals who refuse to (1) be interviewed, (2) be assigned to a workfare job, or (3) carry out their work obligations in a public service job be sanctioned by being denied food stamp program benefits for 1 month. Other members of the household would continue to receive benefits. The sanctioned individual would be automatically reinstated in the program the following month. If the individual continues to ignore the workfare obligation, the maximum sanction now possible would be exclusion of the individual from the calculation of the household's food stamp benefits every other month. This is assuming that the workfare project and the food stamp office operate at peak administrative effectiveness.

The dollar value of the denied food stamp benefit to the sanctioned individual for the 1-month sanction period would average $34. We question whether such a minimal sanction serves as an effective deterrent to disregarding workfare requirements. Most of the 58 sanctioned individuals included in one of our sample groups were back in the food stamp program the month after the sanction. The elimination and subsequent reinstatement of sanctioned individuals in the food stamp program creates administrative burdens for both the workfare office and the food stamp office in keeping up to date on the individual's workfare status, in making frequent recalculations of household benefits, and in keeping track of when the individual is again eligible for food stamp benefits.

We note that program sanctions are more severe for food stamp recipients who do not comply with the program's work registration requirements (as distinguished from the workfare requirements). The 1977 Act requires that, when sanctions are appropriate for work registration noncompliance, the entire household be denied food stamp benefits for 2 months. Also, in the two general assistance workfare programs we checked on, work noncompliance would result in the household losing program benefits for one person for at least 3 months. In cases of repeated noncompliance, the sanction period in one of the programs is extended to 6 months and in the other the entire household loses its benefits until such time as the work obligation is satisfied.

We believe that the food stamp workfare sanction is not an effective deterrent to workfare noncompliance and needs to be strengthened. Possible changes include denying food stamp benefits for the noncomplying individual for a specified number of months or until all past workfare obligations are satisfied, or going so far as to deny benefits to the entire household for similar periods of time.

AGRICULTURE'S ADMINISTRATION DID NOT PROMOTE MAXIMUM PROGRAM BENEFITS

Agriculture permitted project sites extensive latitude in designing and implementing the demonstration with the result that program benefits were not as great as they could have been.

(1) *Phase-in approach.*—Food stamp offices at three of the seven sites did not examine their existing food stamp rolls to identify and refer all eligible workfare participants as soon as the demonstration started. The other four sites referred all eligible participants the first month. Since Agriculture allowed the three sites to identify and refer food stamp recipients to workfare only as they either came into the program initially or applied for continuation of their benefits, otherwise eligible individuals avoided some of their work obligation at these locations.

(2) *Delays in work assignments.*—Agriculture instructed project sites to delay work assignments to the beginning of the following month if the 30-day job search period ended in the last half of a month. This policy caused delays in interviews and work assignments at two projects. Work benefits were lost because the affected participants could have completed some or all of their obligation in the previous month. Agriculture dropped this requirement after the first year's operation.

(3) *Work standards not established.*—Agriculture did not develop criteria for determining whether workfare participants performed satisfactorily on their assigned jobs. As a result, merely showing up at the job site constituted compliance. Agriculture officials advised project personnel that sanctions could not be imposed for refusal to work. Our review was not directed toward measuring the volume or quality of participant's work; however, job supervisors told us that several workfare participants did not perform satisfactorily. We believe that certain productivity levels are reasonable for any employer-employee relationship. Failure to establish standards and impose sanctions as appropriate could lead to situations where recalcitrant participants could significantly reduce potential work benefits and undermine morale of those who are willing to work for their benefits.

Agriculture needs to

(1) Include in any cost-benefit measurements it makes, the value of work lost because sites did not immediately identify and assign eligible able-bodied persons to work when the demonstration began,

(2) Establish work standards for workfare assignments and impose sanctions for clearly substandard performance, and

(3) Assure that project design does not restrict work benefits.

WEAKNESSES IN LOCAL ADMINISTRATION REDUCED PROJECT BENEFITS

Benefits have been lost to the workfare program because of local administrative and operating difficulties. Workfare offices did not notify referred participants to report for interviews or advise the food stamp offices of the need for sanction action on a timely basis. Local food stamp offices did not sanction or sanctioned improperly. In addition, two rural sites were unable to maintain continuity of operations due to illness of key staff.

(1) *Delays in interviewing participants.*—Workfare offices did not notify or schedule referred workfare participants for interviews on a timely basis. Consequently, 103 of the 805 participants in our statistical sample were interviewed some time after they should have been. We found delays at all projects. As a result, some participants avoided their work obligation.

(2) *Delays in notifying food stamp offices of needed sanctions.*—One location did not send recommendations for sanctions to the local food stamp office promptly. As a result, several participants who did not work could not be sanctioned because their eligibility period had already ended.

(3) *Improper sanctions.*—Two locations were handling sanctioning requirements incorrectly. One was eliminating benefits for the entire household rather than solely for the individual who did not work. At the other the substitute director of the workfare office was not aware that sanction recommendations were to be sent to the food stamp office. Therefore, no one was sanctioned.

(4) *Lack of continuity in workfare office.*—Workfare directors at two sites that were essentially one-person operations became ill during the demonstration. The result was that demonstration activities were severely hampered. Interviews, work assignments, and sanction recommendations were either suspended or curtailed.

(5) *Lack of full local support hindered achievement of demonstration objectives.*—Local support of the workfare demonstration at one location seemed lukewarm and the project operated only marginally as a workfare demonstration site. The local food stamp office identified potential workfare participants but did not calculate their work obligation or keep the workfare office informed of changes in participants' work obligations. The primary function of the office administering workfare was not workfare; it was processing nonworkfare referrals for placement in private industry. The first workfare job site was not developed until 2½ months after the demonstration began. Finally, only persons with work obligations exceeding 20 hours a month were referred for workfare. Of a statistically selected sample of 105 referrals at this location, only one participant had completed the work obligation the first month.

Agriculture needs to

Assure that eligible participants are interviewed and assigned to public service jobs as soon as possible,

Assure that participant not having a good reason for completing their workfare obligation are immediately sanctioned, and

Assure continuity of projects' operations.

INADEQUATE REPORTING TO THE CONGRESS

Agriculture and Labor did not include in their October 1980 interim report to the Congress available information showing that substantial improvements were needed both in workfare program design and ad-

ministrative procedures. The evaluation contractor and one of the project sites had identified in separate reports earlier in 1980 essentially the same problems I have discussed today in my testimony—legislative exemptions are excessive, sanctions are ineffective, and the 30-day job search is unnecessary.

Because the concept cannot be said to have been fairly tested until a sound program design is achieved and tested, delays in modifying obvious program defects should not be allowed to continue. Also the Secretaries of Agriculture and Labor should provide the Congress more informative reporting on the workfare demonstration projects. Future progress and final reports should fully explain both well-defined and potential problems with workfare program design.●

THE PAPERWORK REDUCTION ACT OF 1981

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. HAMILTON. Mr. Speaker, I am introducing legislation today to reduce the burden of paperwork imposed on employers by the Internal Revenue Service. It would cut employers' costs of compliance with Federal regulation by $300 million per year without altering the intent or impact of the regulations.

Let me explain:

Under the Internal Revenue Code, employers are required to issue a W-2 form to each employee who leaves his job during the year. In addition, of course, W-2 forms are issued to all other employees on the payroll at the end of the year. However, a survey made 2 years ago by the National Society of Public Accountants revealed that approximately 66 percent of the W-2 forms issued to departing employees were lost. The forms had to be reissued at the end of the year at an average cost of $12 per form.

In short, the bulk of these midyear W-2 forms have to be duplicated and sent out again. With 38 million of them being issued each year, about 25 million additional duplicates are being reissued at a cost to employers of $300 million. Most of that unnecessary regulatory cost is passed on to consumers as higher prices, making inflation worse.

I am not convinced that the benefits of mandatory issuance of midyear W-2 forms even approach $300 million per annum. For that reason, Mr. Speaker, I am proposing that firms be permitted to issue all their W-2 forms at once at the end of the year. Departing employees would simply leave a forwarding address—which most can and do leave in any case. Their W-2 forms would be mailed to them in January.

I do recognize the objective of the current provision: It guarantees that departing employees with special needs will receive their W-2 forms expeditiously rather than at the end of the year. Accordingly, my bill would require that firms provide a W-2 form to any employee requesting it within 30 days following termination of employment.

Let me make two further comments. First, my bill would not cost the Treasury anything. It would have no impact whatever on tax receipts, but it would slow inflation. Second, I urge my colleagues to join me in the search for other instances in which expensive or duplicative paperwork or regulations have been thrust on farmers, consumers, taxpayers, or businesses. I am persuaded that excessive Federal regulatory activity in the recent past has left us with numerous regulations that are well intentioned but cost ineffective. We should join with the new administration in identifying them and then moving quickly to retain the regulatory objective, if worth while, while eliminating or sharply reducing the regulatory cost.●

SCHLESINGER ON FOREIGN POLICY

HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. STUDDS. Mr. Speaker, Arthur Schlesinger, Jr., recently authored an article concerning the foreign policy of the Reagan administration which I believe should be of particular interest to my colleagues. The article appeared in the Wall Street Journal on February 23:

THE SOVIET CONSPIRACY AND WORLD UNREST

(By Arthur Schlesinger Jr.)

"Let us not delude ourselves," Mr. Reagan told The Wall Street Journal during the campaign. "The Soviet Union underlies all the unrest that is going on. If they weren't engaged in this game of dominoes, there wouldn't be any hot spots in the world."

One had hoped that this was campaign persiflage. For it expresses a hopelessly erroneous conception of the way history works. There was unrest in the world long before there was a Bolshevik Revolution; there will be unrest long after Brezhnev and his gang are forgotten. If the Soviet Union did not exist, Iraq and Iran would still be at war; Israelis and Palestinians would still be at each other's throats; there would still be no peace in Northern Ireland, Cambodia or South Africa—and there would still be civil war in El Salvador.

These "hot spots" are not imported by a diabolical Kremlin into otherwise placid and happy communities. The world is already overflowing with intense local antagonisms, deeply rooted in historic hatreds, religious tensions, class animosities, tribal feuds—and long predating the Cold War. Certainly the Soviet Union exploits such antagonisms when it can do so at low cost. But supposing that without the Kremlin there would be no hot spots gives the devil considerably more than his due.

Yet there are disquieting indications from Washington that Mr. Reagan's conspiracy theory of world unrest, far from being campaign persilage, may become the basis of foreign policy. Consider, for example, the curious episode of General Haig and the terrorist. In his initial press conference our new Secretary of State announced that the Soviet Union was the controlling force behind international terrorism. This revelation roused some skepticism since communists are often the targets of terrorist attack, as in Italy, and since the Red Brigades, the PLO, the IRA and other notable terrorist outfits hardly require Soviet encouragement.

WARS OF NATIONAL LIBERATION

The New York Times accordingly asked the State Department, the CIA and the Defense Intelligence Agency for the evidence. The several agencies said they were unable to document the Secretary's charge. The Times quoted one official: "There's just no real evidence for it." Abundant evidence exists that the Soviet Union trains people for "wars of national liberation"—i.e., insurrections and guerrilla wars—but that is not what the Secretary was talking about.

The conspiracy theory seems about to dictate a new course in Central America. The Reagan administration is reported to have decided that Moscow is responsible for the civil war in El Salvador. El Salvador is a country of less than 5 million people divided between a small and inordinately wealthy oligarchy and a desperately poor class of landless laborers. With "the most rigid class structure and worst income inequality in all Latin America," according to a recent article in Foreign Affairs, El Salvador has been in a state of intermittent revolution for at least half a century. In 1932 the army killed 30,000 peasants in putting down a rebellion against the oligarchy.

Trouble in El Salvador is manifestly not the creation of the Cubans or the Russians. It is only the latest installment in a recurrent revolt against bad conditions.

The insurgent front certainly includes extreme Marxist factions along with Social Democrats and dissident Christian Democrats. Even the moderates are doubtless ready to accept arms from Cuba, Ethiopia and Vietnam. This should not surprise nor unduly alarm us. Two centuries ago American revolutionaries accepted aid from France; this did not prove that they were disciplined agents of European monarchy, only that they were fighting for their lives. The State Department white paper demonstrates arms deliveries; it only asserts, but hardly demonstrates, political control.

This is the situation the Reagan administration now proposes as the test case to display its "resolve" to punish Soviet expansionism. El Salvador, it is said, will determine our future attitude toward the Soviet Union. It will also be our measure of the fidelity of our European allies. This is placing a lot of weight on a shaky case. The Soviet Union can no more control events in El Salvador than we can control events in Poland: Revolution has a life of its own. As for our European allies, they have responded coolly to the idea of El Salvador as the test case against Soviet expansionism. If we think we know more about El Salvador than our European allies on the ground that we are closer to the scene, we must not forget that Latin American countries still closer to the scene disagree with us.

One wonders whether the real problem in Washington today is not simply frustration.

We cannot do anything about real Soviet aggression in Poland or Afghanistan, so we must show how tough we are by cracking down on fancied Soviet aggression in El Salvador. The more venerable among us will recall the similar situation in the first months of the Eisenhower administration, when John Foster Dulles, unable to carry out in Eastern Europe his campaign pledge to "roll back" Soviet expansionism, decided to carry it out in Guatemala. With the CIA's help, Dulles portrayed a rather ineffectual democratic regime in Guatemala as the spearhead of Soviet aggression in the western hemisphere and in 1954 engineered an American coup.

The Eisenhower administration triumphantly got rid of the hapless Arbenz government. It did not get rid of the troubles of Guatemala.

The Reagan administration would be well advised to calculate most carefully the costs of U.S. commitment to a military solution in El Salvador. Washington's intervention on behalf of the Fourteen Families would convince those working for change throughout Latin America that the new American administration is irrevocably against them. It would alarm our European allies, who do not accept the conspiracy theory of global hot spots and figure that Salvadoran peasants might be in revolt simply because they find poverty and injustice unendurable. It would align the United States once again with right-wing repression, dissipate whatever remains of the influence we have won as a champion of human rights and hand a cheap propaganda opportunity to our adversaries.

Nor would it even assure military victory. As we escalate our support, the Cubans and others will find means to escalate theirs. There will be bitter fighting in the hills. Then what do we do if our client regime fails to end the insurgency? Put in a new regime, as the Russians did in Afghanistan? And, if that regime fails, send in troops, as the Russians did in Afghanistan? El Salvador might well become our own Afghanistan. And, if the right with our assistance finally succeeds in crushing the insurgency, the result would only be, as it was in Guatemala, to restore the old oligarchy to power—and to guarantee a new revolution in another decade.

Nor would success make the Russians change their ways, since they have long since assumed that the United States can lick El Salvador.

THE DANGER OF SUPPOSING

Instead of roaring off on its own, the Reagan administration would be better advised to begin by the closest consultation with friendly governments who have a better feel for the situation than we have: Mexico, Costa Rica and Venezuela. We ought long since to have learned the danger of supposing that we understand the interests of other countries better than they do.

No doubt Latin American counsel would be somewhat divided. The Christian Democratic government in Caracas, for example, has fraternal ties with the Christian Democratic president of the Salvadoran junta; the Accion Democratica opposition has a different slant. So do the Mexicans. They all agree, however, in rejecting a military solution. Let us at least listen to the countries most directly threatened before imposing our own pet theories on them. Does anyone really suppose that Mexico, Venezuela and Costa Rica are not as intelligently determined as we are to safeguard the hemisphere from the Soviet Union? Unilateral action is the road to disaster. Whatever we do in El Salvador, let us do it on a multilateral basis.

Despite our President's hot-spot theory, the Soviet Union is really not the cause of all the troubles on this tormented planet. Violence is endemic in the Third World, and we cannot regard each outbreak as a summons to the American fire brigade. Every revolution, every change in political and economic arrangements, every assertion of belligerent nationalism is not necessarily a mortal threat to the security of the United States. History has endowed our century with a host of distempers, most of which are beyond our power to prevent and our wisdom to cure.

I remember Lord Harlech, the British ambassador to Washington 20 years ago, wondering about the American passion in that period to rush into the midst of a civil war in the Congo. "It seems to me," Lord Harlech wisely said, "that every country has a right to its own Wars of the Roses."●

MRS. ZAIDA T. FERNANDEZ

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. MATSUI. Mr. Speaker, I rise today to commend the work of an outstanding woman, Mrs. Zaida T. Fernandez, founding director of La Familia Counseling Center of Sacramento, Calif., on the occasion of her retirement.

Mrs. Fernandez initiated the services of La Familia Counseling Center in October 1973 through a grant from the Office of Criminal Justice Planning and secured the center's planning and status as an independent nonprofit corporation in April 1975 to provide effective, community-based counseling services to juvenile delinquents and predelinquents and their families.

Beginning as the sole staff member, Mrs. Fernandez secured the funding for, assembled and trained a staff of 23 counselors and auxiliary personnel to meet the increasing demands for the outstanding counseling services of the center.

Bridging the gap between the theories of the classroom and the hard realities of life in the streets, Mrs. Fernandez developed the enchilada approach to reawakening therapy. It is known widely for its ability to awaken troubled youths to the challenge of personal integrity, competence, and responsibility and the hope of a better life through personal initiative, self-esteem, and honest interdependence.

Understanding that most youthful offenders could not be reached without dealing with the dynamics of the entire family, Mrs. Fernandez pioneered the use of family counseling to resolve problems causing delinquency in Sacramento County.

An authority in counseling multiple offenders and their families, she has advanced the art of delinquency prevention and rehabilitation through her publications and presentations to national audiences.

Under the dedicated direction of Mrs. Fernandez, La Familia Counseling Center has assumed a position of unqualified success and leadership in its field.

Notwithstanding Mrs. Fernandez' imminent retirement, for so long as La Familia Counseling Center continues in the direction she has established, the center will continue to provide delinquency counseling services unmatched for their compassion, competence, and success in helping young people become good citizens.

I am sure all Members of Congess will join me in expressing commendations to Mrs. Zaida T. Fernandez in recognition of her outstanding achievements in delinquency and family counseling and community-based organization administration. We extend our very best wishes for Mrs. Fernandez' retirement and for La Familia Counseling Center's continued success in the years to come.●

ANOTHER SACRED COW

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. LaFALCE. Mr. Speaker, the Congress has been told time and time again that the administration is really serious about imposing strict controls on Federal spending and about bringing the budget into balance. Ineffective, wasteful, and unnecessary spending programs are to be eliminated, and a firm handle is going to be placed on the budget.

However, yet another sacred cow has emerged; and it is an alarming one. Officially, they are known as tax expenditures; and there are $282 billion on the books. Popularly, they are known as loopholes and shelters, although many of them do meet valid and pressing social and economic needs. Others are obviously disreputable windfalls for special interest groups, such as $1.7 billion oil and natural gas depletion allowance.

With an administration so dedicated to budgetary austerity, one would have expected that this grab bag of tax subsidies would have been carefully scrutinized, in order to eliminate the more unjustifiable ones. With an administration dedicated to equitable treatment for the poor, one would have expected that those loopholes for millionaires would have been eliminated from the tax expenditure list. With an administration dedicated to ending welfare fraud, one would have expected that welfare for the rich would

have had an equal priority with welfare for the poor.

Unfortunately, all three expectations have not been met; and a splendid chance for a real new beginning has been abandoned. Many special interest groups can now relax, because Dave Stockman will not be allowed to wield his budget-cutting knife on their tax loopholes; and it is really a shame that this administration will not confront those special interest groups.

I hope that all of my colleagues will carefully consider the arguments expressed in an excellent article by Hobart Rowen in the March 19 edition of the Washington Post, entitled "Start With the Shelters." It seems that Congress will be forced to take the lead on this important budget issue.

The article follows:

START WITH THE SHELTERS

(By Hobart Rowen)

David Stockman, President Reagan's admirable budget-cutter, is normally the most persuasive member of the White House team. But the other day at breakfast with a group of reporters, Stockman was far from convincing when challenged on the Reagan administration's failure to deal with "tax expenditures" that swell the federal deficit.

"Tax expenditures are not subsidies [to the recipients] but accommodations to realities," Stockman said. That's a quibble, a distinction without a difference. Tax expenditures are subsidies, up and down the income scale. In fact, Stockman early on proposed some changes, and was shot down by President Reagan himself.

"Tax expenditures" used to be called "tax loopholes." Altogether, there is a total of $282 billion in various exemptions, exclusions or other special tax privileges in the fiscal 1982 budget. They benefit both corporations and individuals, and—as the last Carter budget document commentary observes—"have objectives similar to those funded through direct appropriations."

In form and effect, there is very little to distinguish a budget item on the expenditure side from something carried on the books as a "tax expenditure" that lowers the receipts side of the ledger. For example, as the explanatory narrative in Carter's last budget observes, a payment through the CETA program to an employer for the extra costs of on-the-job training shows up as an appropriation, hence a spending item in the budget. But a jobs tax credit is listed as a "tax expenditure," although both contribute to the federal deficit and both lower the employer's cost of hiring certain less-skilled workers.

Although he admits he will have to find $29 billion in additional budget reductions for fiscal 1983 and $44 billion in fiscal 1984 to achieve a theoretical balance in that year, Stockman isn't touching that $282 billion in tax expenditures—a veritable gold mine.

Why? "This administration was elected to cut taxes, not to raise them," he told this reporter. The administration's game plan is aimed primarily at easing the tax burden in the upper brackets. If, at the same time, tax expenditures are reduced, "then . . . you have done nothing," Stockman said. In other words—although the administration certainly won't put it this way—it wants not only to cut taxes in the upper brackets by reducing marginal rates but to make sure it is not diluting the benefits of those cuts by weakening any upper-bracket tax shelters.

Somehow, this doesn't match up well with one of the basic theoretical justifications of supply-side tax economics—that is, if the top 70 percent marginal rate on "unearned" income is brought down to no more than the top 50 percent rate on earned income, the incentive to seek tax shelters will dissipate.

The Carter administration had proposed some small changes in the current tax expenditures, adding some and abandoning a few others. Stockman should have been ordered to brush aside the timid Carter approach. He could be rubbing his hands gleefully, running through that $282 billion worth of tax expenditures on pages 226-236 of Special Analysis G.

True enough, there would be some "sacred cow" problems—homeowners' mortgage deductions ($35 billion), benfits for the elderly ($15.8 billion in exclusion of taxes on Social Security, the extra tax credit, etc.) and exclusion of employer contributions to medical benefits ($16.6 billion), among others.

Before the phone starts ringing off the hook, let me stress that I am not necessarily advocating doing away with mortgage interest deductions or taxing Social Security or other retirement benefits. (I would rather see the administration go after the automatic indexing formula.) But I do think that in that list of nearly $300 billion in tax concessions there must be some loopholes that could be plugged, enabling President Reagan to come close to balancing the budget without hitting so hard at those just marginally above the poverty line.

Instead of saving $1.6 billion in the food stamp program, for example, I would rather see Reagan take away the $1.7 billion in the tax expenditure budget for oil and gas depletion allowances. With prices deregulated, why does the oil-gas industry need depletion allowances too? (There's another $1 billion tax expenditure item for "expensing" oil and gas exploration and development costs.)

Or how about the $4.8 billion in the tax expenditure list representing exclusion of interest on life insurance savings from taxation? By abandoning that special privilege (not offset by special taxation of the insurance companies, as tax specialist Richard Goode has observed), the administration could restore its entire planned cut in the black lung trust fund and the cutbacks in Medicaid and child nutrition funds, maintain the present unemployment benefit structure—and have a few hundred million bucks left over.●

HELPING SOLVE JUVENILE DELINQUENCY PROBLEMS

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. WOLF. Mr. Speaker, in view of the fact that juvenile delinquency is an increasing problem across the Nation, I want my colleagues to be informed about an effort in the Commonwealth of Virginia to help solve the problem. A seminar on juvenile justice was held March 26-30, 1981, by the staff and students of the Northern Virginia Community College's Annandale campus in cooperation with the juvenile and domestic relations courts, correctional professionals, and citizens of northern Virginia and surrounding communities. The seminar focused on ways to prevent and control juvenile delinquency and related problems.

The project demonstrated how a college, local governments, and a community's citizens can work together to make a better society. Northern Virginia Community College is to be commended for its leadership role in addressing this issue of concern to the country. More information about the project can be obtained by contacting the program coordinator, Anthony J. Delpopolo, professor of administration of justice, Northern Virginia Community College, Annandale Campus, 8333 Little River Turnpike, Annandale, Va. 22003.●

RETAINING TWICE YEARLY COLA

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. STARK. Mr. Speaker, I would like to include here for printing an article I read recently in Retirement Life, the retirement magazine for Federal employees, concerning cost-of-living adjustments. I have always supported the twice-a-year COLA for Federal retirees, as do most of my colleagues, a fact which was evidenced by the vote last summer in this House of 309 to 72 to retain twice-a-year COLA for Federal retirees. I was much impressed, then, when President Reagan announced his support for the twice-a-year COLA during his campaign. I was equally surprised and distressed when he recently changed his mind. I think this is an area that we, as Members of Congress, must show our continued support. The Federal retirees are disillusioned with President Reagan's stand on COLA's. Let us show them they can depend on us to stand firm in our committment to twice-a-year COLA.

The article follows:

REAGAN BREAKS HIS PROMISE TO US; URGES COLA BE CUT TO ONE A YEAR

NAVE ASKS: HOW CAN WE EVER COUNT AGAIN ON U.S. PLEDGES?

President Reagan stunned Federal retirees last month by breaking his campaign promise to them and recommending that Congress reduce cost-of-living adjustments for Federal annuitants to one-a-year. The proposal was included in Reagan's 1982 budget message to Congress on February 18 which called for massive cuts in nearly every major Federal program.

NARFE President Michael Nave immediately issued a statement saying that he was "shocked and bitterly disappointed" in the new President's decision to go back on his word since so many retirees had trusted him

to make good on his campaign promise to NARFE members only last October.

"If Congress approves this, it will mean that no American can ever again count on the United States government to deliver on retirement benefits it has promised. We thought Mr. Reagan understood this," Nave said.

In his budget message Reagan sounded like anything but a friend of Federal retirees in labeling twice-a-year COLAs as "generous" and "clearly unfair." Reagan suggested that Federal retirees have been "well protected" against inflation and that the present semi-annual adjustment is "inequitable" to all other "recipients of assistance" from Federal programs indexed only once-a-year.

The Reagan proposal would apply to both military and civilian retirees.

WHAT HE PROMISED IN OCTOBER

In a statement issued by Reagan on October 3 of last year, the Republican Presidential nominee stated flatly, "The present civil service retirement law properly provides for a cost-of-living adjustment to protect retirees from the destruction of the value of their benefit payments. . . . I do not favor abandoning the present semi-annual indexing."

According to a membership survey conducted by NARFE, retirees supported Reagan by a four-to-one margin over former President Carter largely on the basis of that supposed promise.

In releasing his budget message last month, Reagan offered no apology or explanation of his change of heart on the COLA issue. The President's decision came as a shock to many of his fellow Republicans in Congress who had been assured by the White House that the President would not target the semi-annual COLA.

Nave said that NARFE members are not unsympathetic to the need for control of the Federal spending. However, he believes that if Congress does in fact eliminate the twice-a-year COLA, it would be establishing a dangerous precedent for all retirement programs administered by the Federal government. "Public confidence in both social security and Federal retirement rests entirely on the integrity of the Federal government in keeping its commitments," Nave said.

TWO COLA'S COMPLETELY JUSTIFIED

Nave said that retention of the semi-annual adjustment is "completely justified" since Federal retirement is the only indexed Federal program which is taxable. He pointed to recent reports by U.S. News & World Report and testimony by the General Accounting Office which support his contention that Federal retirees are not being overcompensated by the present semi-annual adjustment.

Nave also pointed out that less than six months ago, the House of Representatives by a margin of 309-72 rejected an identical Carter proposal to reduce the adjustment to an annual basis. "It is clear that the issue has been decided," he said.

Nave also rejected the idea that retirees are not "taking their fair share" of budget cuts, pointing out that recently enacted reforms in the initial calculation of annuities will result in billions in savings in future years.

Nave went on to urge NARFE members to immediately begin all-out efforts to convince members of Congress to oppose the Reagan proposal.

The Reagan proposal will have NO effect on the 4.4 percent COLA adjustment due retirees in their April checks.

The increase in income taxes paid by Federal annuitants has been greater than the increase in cost of living adjustments received.●

FIRST AMENDMENT RIGHTS ARE SUBVERTED BY THE LEGAL SERVICES CORPORATION'S SUBSIDIZED PROPAGATION OF IDEAS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. McDONALD. Mr. Speaker, among the oxen being gored in the current efforts to finally halt the red ink hemorrhage in Washington is the Legal Services Corporation. For years now, it has ridden high, wide, and handsome propagating its own ideas on how our society should be reshaped. The worst part of this is that it is done with your tax dollars whether you agree or not. However, now that budget cutting time has come to the people at Legal Services, they tell us they are only helping the poor. On March 24, 1981, Mr. Howard Phillips, national director of the Conservative Caucus, Inc., detailed why the activities of the Legal Services Corporation deprives Americans of the first amendment rights at their expense. His statement follows:

"* * * to compel a man to furnish contributions of money for the propagation of opinions which he disbelieves and abhors, is sinful and tyrannical."

Thus wrote Thomas Jefferson, author of our Declaration of Independence, in 1777. This fundamental Jeffersonian principle of civil liberty was adopted in 1786 by the General Assembly of Virginia, and was incorporated in the First Amendment to the Constitution of the United States on December 15, 1791.

Yet, since the mid-1960's, first through the Office of Legal Services at the U.S. Office of Economic Opportunity, and now, by means of the Legal Services Corporation, Congress has compelled me and millions of other Americans to furnish contibutions of money, through the Internal Revenue system, for the propagation of opinions which we disbelieve and abhor.

Through a nationwide network of private legal services organizations which are publicly subsidized, yet authorized, through lobbying, publication, litigation, as well as by the organization and representation of special interest advocacy groups, to propagate the ideas of the officers and employees of such subsidized organizations, the liberties of all Americans are abridged, the pluralism and independence of private institutions and relationships are encroached upon, and both the accountability and the significance of our electoral process are fundamentally undermined.

Each of the more than 320 private, Legal Services Corporation-funded staff attorney recipient groups is governed by a self-designated, self-perpetuating policy board. Some of these boards are constituted, at least in part, by the assignment of positions to representatives of various private groups which are heavily involved in the propagation of political ideas. In all cases, private citizens on these recipient group policy boards are given authority over significant amounts of funds, collected from the taxpaying citizenry.

Even excluding litigative activity, Legal Services Corporation-funded groups propagate opinions and policy objectives, through the personnel which they hire and the funds they expend, in a variety of ways, including organizational and representational assistance to private idea advocacy groups—not merely to individuals.

In the name of "community education", they proselytize, through various media, for social change.

Advocating "law reform", they promote, at public expense, their privately held notions of sound public, which they strive to enforce through direct and indirect lobbying, coalition formation, legislative and administrative rule drafting, test case litigation, and related activities.

Assistance to "direct action" offensives, which include picketing, demonstrating, withholding rent payments, as well as other forms of civic protest is another aspect of Legal Service Corporation dollars being used to propagate opinion.

Nor ought we to overlook the significant political impact which results from the indirect economic assistance furnished by LSC-recipient programs which aid private advocacy organizations in the pursuit of Federal grants and contracts.

And, of course, litigation is another basic policy advocacy technique available to legal services programs, their policy board members, attorneys, and support personnel.

The economic structure of a legal services delivery system based on the "staff attorney" concept particularly lends itself to the use of program dollars to further ideological objectives. The "staff attorney" structure is provider-oriented, not consumer-oriented. That is to say, it is the attorneys and program officials, rather than the clients, actual or potential, who are economically empowered to determine priorities for emphasis and for action.

"He who pays the piper calls the tune." If a service such as the provision of legal representation is "free", or carries no economic penalty, then the demand for that service is potentially without limit. The limits on provider activity which, in a free market, are imposed by potential service consumers establishing priorities on the disposition of their finite resources (which disposition may give a higher priority to food, clothing, shelter, or medical care) are, in a controlled market of service providers with incomes fixed and assured without reliance on such specific consumers, determined by the providers themselves, rather than by the potential clients.

The practical consequence of this economic reality is that legal services programs are economically at liberty to choose their causes, their clients, and their actual cases. Whether such choices are well made is a separate and significant consideration. That they are made is beyond dispute.

No system can operate without some form of constraint. Absent the checks and balances flowing from the free market principles which undergird the fee for service arrangements of the private bar, controls, either implied or expressed, either random or consistent, distant or proximate, are in-

evitably applied through some form of regulation.

But given the involvement of this program with the propagation of a policy ideology on the nature of and solutions to the problems of poverty, no such regulation can be applied in such a manner as to satisfy the competing claims of clients, attorneys, program grantees, members of Congress, taxpayers, and others who have some stake in any such activity which is governmentally sponsored.

Nor can such a structure lacking any inherent economic constraint accommodate the legitimate concerns of those citizens who (when sued by lawyers free of the mundane limits which cause private attorneys and those who pay them to think twice before suing, appealing, or otherwise committing resources to a cause concerning which the outcome is uncertain) must themselves seriously consider conceding their interest at law without a contest, simply to avoid economic ruin at the hands of adversaries whose resources have no economic boundaries.

Another structurally inherent "First Amendment" problem which arises from the present system of delivering legal services to the poor, is the facility with which ostensibly unrelated, but actualy interconnected grantees, policy boards, attorneys, and support personnel are able to coordinate their efforts throughout the United States, identifying favorable jurisdictions in which actions can be initiated and test cases pursued.

In 1980, a total of less than $100 million in subsidies was disbursed to the three principal candidates for President, our highest public office. Yet $300 million went to the groups which are privately involved in idea propagation under the rubric of the LSC.

Given the nature of the legal services program, and the fact that there will always be more causes and clients for a free service than there are hours in the day, it is hardly surprising that legal services spokesmen frequently conclude that the promotion of radical social, economic, and policy changes, affecting the poor as a class, is a far more efficient way to expend resources than by scattering them on uncoordinated individual causes which may not lend themselves to policy groundbreaking.

As stated by Steven Haberfeld, a planner for the National Economic Development and Law Center, a California-based Legal Services program which received $393,669 last year, "What is disheartening about the individual case work is that nothing really changes . . . Agencies may settle a case to avoid a costly battle, but the status quo is preserved. Meanwhile, the client is in no better position to fend for himself. If anything, he or she becomes increasingly dependent.

Haberfeld, writing in Clearinghouse Review, published in behalf of the Legal Services Corporation, continues: "We try other litigation strategies. We try law reform on behalf of a class of the afflicted. We hope to change the conditions of hundreds and thousands at the same time." But, Mr. Haberfeld gravely notes, "The vested interests which are firmly lodged in appropriate legislative and administrative circles ensure that conditions return to the status quo ante."

The answer to this frustrating inability to totally remake society so that it will conform to Mr. Haberfeld's notions of the public interest requires, in his words, that legal services programs "be aligned with the political and social interest groups that begin to develop and exercise political influence of their own?"

Haberfeld also encourages "strategies of community education advocacy, legislative initiative and coordinated litigation" to further his view of what is good for the poor as a class. "Forming statewide coalitions", he says, "must be part of this effort to create an effective social base . . . Statewide legal services programs often have highly developed, centralized research capabilities, litigation support units and established relationships with the news media and urban based, progressive, statewide organizations (e.g., labor, Council of Churches, League of Women Voters)."

And, to conclude my excerpts from Mr. Haberfeld, consider closely his observation that "Six tools are at the program's disposal: research and analysis, media coverage, community education, agency advocacy, litigation, and drafting and promoting legislative initiatives. Legal services programs", asserts Haberfeld, "have the staff, the organizational resources, the expertise and the mandate to make a concerted effort to use all of these measures."

Note his use of the word "mandate". But what of the mandate of the First Amendment, of our political process, and of our recent election? Shall all those be subordinated to the power we have vested in the Legal Services Corporation to remake society?

Legal services attorneys have views on virtually every subject. The National Veterans Law Center, another LSC-funded organization, is actively engaged in upgrading dishonorable discharges from the armed forces. "(A)s part of a settlement of a lawsuit brought by NVLC's outreach organization", the Department of Defense recently "agreed to spend hundreds of thousands of dollars to advertise on major radio stations in November 1980 and February 1981 the existence of a post office box from which veterans can obtain information about obtaining an upgrade in discharge", it is reported.

Furthermore, "(v)eterans who write to this contact point will receive applications forms (sic), instructions, and referrals to local LSC-funded offices and community based veterans organizations that can assist them in obtaining an upgrade."

On the subject of abortion, in which the Legal Services Corporation has been heavily involved, despite legislative attempts to restrict such activity, the National Center on Women and Family Law, a $167,500 Legal Services Corporation recipient organization, maintains that "(t)he most devastating legal development for women in 1980 was the Supreme Court's decision upholding a congressional prohibition against the use of federal funding for abortions."

It is the further contention of this supposedly poverty-oriented Legal Services Corporation support center that ERA ratification is a prerequisite to winning the War on Poverty. Indeed, this January those ladies, in a taxpayer financed publication, argued that "(t)he economic boycott against nonratifying states has been vindicated in the context of the ERA as a tool for women's advocates."

In the same publication, these "Women and Family Law" legal services activists warn against possible Congressional action on the Family Protection Act which, horror of horrors, would "encourage restoration of the family unit, parental authority and a climate of traditional morality."

Other legal services lawyers also have a view of "poverty law" which might be regarded as inappropriate by the working American taxpayer. For example, when so many Americans are having trouble making ends meet, why did the Idaho Legal Services program, which got $984,000 if Federal funds, concern itself with opposing deportation proceedings against a citizen of Iran in the United States?

Why was it a "poverty issue" for the $3.9 million Texas Rural Legal Aid program to involve itself during the 1980 election campaigns in a dispute over the apportionment of Texas legislative districts?

By the same token, ought convicted felons who are incarcerated be the subjects of extensive litigation by Federally funded poverty lawyers, at a time when law abiding taxpayers, of diverse economic circumstances, are deprived of many of the material luxuries which government subsidized jailhouse lawyers pursue in behalf of their criminal clients? Ask that of the $791,000 Legal Aid Society of Columbus, Ohio which was hard at work last year on such matters as "inmate idleness" and inadequate "recreational services".

Ellen Josephson, Director of the LSC-funded Access to Justice project of the National Legal Aid and Defender Association, says "effective representation of legal services clients on access issues must go beyond the judicial forum and recognize the key role of the United States Congress."

And, in her view, the scope of such representation must be far-reaching. "The most politically controversial access issue of the 96th Congress," Miss Josephson has asserted, "was the effort to remove by statute all federal court jurisdiction over school prayer issues. . . . If the forces seeking to eliminate school prayer jurisdiction succeed, they are likely to move on to other issues more directly affecting the poor, including abortion and school desegregation."

Whatever the issue, be it OSHA, busing, transexual benefit claims, quotas, election law, expunging arrest records, private schools, conscription, economic policy, and even national defense, the poverty lawyers are being subsidized at public expense to propagate their private views of what is good for the poor and what is good for the country.

That is just part of what they do on taxpayer time. It can also be argued that because of the Federal patronage without which legal services personnel would not be assigned to particular areas, many other kinds of questionable activity occur, sometimes with seeming encouragement from the leaders of the LSC.

Out of the entire nation why, for example, has the Legal Services Corporation named Salvadore Tio as its Regional Director for the New York and Puerto Rico region, despite Tio's July, 1979 conviction for criminal trespass on U.S. Navy property in Vieques, Puerto Rico, in connection with an organized protest against the American naval presence on that island?

The notion of poverty as a class problem variously manifested, rather than an individual or family condition, a badly flawed concept, is fundamental to the Legal Services program. Every local legal services recipient organization is structured to function as a so-called public interest law firm in which the supposed public interest, for the poor as a class, is equated with questionable political conclusions.

I and millions of other Americans question and abhor the idea that it is in the in-

terest of the poor that a policy of easy abortion be encouraged, that abortions be taxpayer financed, and that with respect to minor children, abortions be performed without either parental notice or consent. Yet this is the prevailing ideology of the Legal Services Corporation.

I question and abhor the idea that voluntary prayer be banned from the nation's public school classrooms, on the grounds that it is in the interest of the poor to retain such a ban, yet taxpayer subsidized legal services attorneys are lobbying against the removal of such restrictions on prayer.

I question and abhor the idea that wilful, premeditated murder of the innocent cannot be made subject to capital punishment, yet legal services personnel use taxpayer resources to limit the availability of capital punishment, on the grounds that such a policy militates particularly against the poor.

I abhor the idea that reductions in property and income taxes such as those proposed in California and Massachusetts for working Americans are being opposed at taxpayer expense by subsidized LSC recipient personnel, who regard such tax cuts as depriving the poor of access to resources to which in the opinion of such attorneys they are entitled as a matter of right.

I abhor the LSC-propagated notion that students have a property right in their diplomas and that competency testing violates the civil rights of students who are unable to meet academic standards.

I applaud President Reagan for his courageous decision to propose the abolition of this counterproductive program which has arrogated to itself the right to use public funds to propagate its secular faith in liberal nostrums of class conflict, sexual liberation, economic redistribution, and governmentally mandated equality of result.

The Corporation, by its very structure, is beyond reform. No regulation can remove the reality of its provider-based economics. No set of Presidential appointees, however conservative, can achieve necessary improvements in a program which, by law, gives present grant recipients a presumptive right to refunding, protected from discontinuation decisions based on reasons of policy.

The Legal Services Corporation is not a poor person's program, it is a lawyer's program. If the goal is merely to provide individual low income persons with legal representation, there is no need for this elaborate structure, which is so conducive to political mischief, and so violative of First Amendment rights.

If the American Bar Association, for all its whining, is unable to find from among its 275,000 members, the interest in aiding the poor which is now supposedly concentrated in 5,500 legal services lawyers, why should the legal profession's lack of social conscience be laid upon the backs of taxpayers who, themselves, lack the resources to sue or lobby at will?

The fact that states will be able to subsidize from block grants the continuation of legal services projects on which they place a high priority should reassure those who are genuinely fearful that significant needs will go unmet. The idea that the Federal government is somehow more enlightened and compassionate then those who live at the state and local level, far from this city, is an elitist concept which the voters thoroughly rejected last November.

But if that is not enough, and if all that is desired is access to an attorney, then why not consider the idea of itemized, charitable tax deductions for private attorneys who agree to represent eligible low income persons. The client would thus not be limited to representation by a segregated class of professional poverty lawyers, and the coordinated ideological ambulance chasing which has been all too characteristic of the present system would be brought to an end. America has no established church. Neither should we have an established political ideology which, immune from accountability to the public, has been unjustly propagated with hundreds of millions of taxpayer dollars.●

JIM BINGHAM

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. GEJDENSON. Mr. Speaker, I am pleased to take this opportunity to bring to the attention of my colleagues the accomplishments of Jim Bingham, a resident of the Second District who lives in Montville, Conn.

Jim, who is 13, received the Eagle Scout Award last Sunday, March 29, 1981, the highest honor available to a Boy Scout. Jim, in an example of the service to community that characterizes the Eagle Scouts, raised $200 to help the Montville senior citizens purchase an audiometer for their health center.

Jim began his scouting career as a member of Cub Scout Pack 21. While a Cub Scout, he earned the Arrow of Light Award and was one of the first Cub Scouts to earn the God and Country Award.

In May of 1978, Jim graduated from Cub Scouts to Boy Scout Troop 21. While a member of Troop 21, he has held several leadership positions. He has been troop librarian, assistant patrol leader, patrol leader, and now holds the position of assistant senior patrol leader. In addition to earning 22 merit badges, Jim has also earned the Year-round Camper Award and the 20-hour Conservation Award.

In addition to being an active Boy Scout, Jim has received year pins for Sunday school attendance at the Montville Center Congregation Church. He played little league baseball as a member of Peter X's major league team and during his last year of play was named to the all-star team.

As a student at Dr. Charles Murphy Junior High School, Jim has been a member of the 1979 cross country team, the 1980 track and field team, and the 1980 Ski Club. He is also a member of the Sno-Scramblers Snowmobile Club of Corinth, Vt.

I know you will all join with me in paying tribute to this fine student and his many accomplishments. It is rare to find a person who displays the combination of hard work, discipline, and devotion that Jim does, and although he is only 13, he has already set an example for us all.●

UNEMPLOYMENT AND WANT ADS

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. LaFALCE. Mr. Speaker, as we approach the serious and complex problem of unemployment in this country, we must fully understand both the many causes of unemployment and full ramifications of unemployment on inner-city minority youths and on families of unemployed workers.

However, President Reagan in a recent statement demonstrated somewhat less than a full understanding of this important problem. He suggested that unemployment was not really a national crisis, because Sunday newspapers contained many pages of employment opportunities in the want ads. I hope that the President was not serious when he made those remarks, because a casual perusal of the want ads indicates that most unemployed minority youths, construction workers, and autoworkers are not qualified for most advertised jobs or do not live in locales where those jobs are available.

In an editorial from the March 26 edition, the Niagara Gazette examined the fallacies in the President's remarks, and I hope that my colleagues will carefully consider this well-reasoned analysis. The editorial is entitled "Reagan: Read the Want Ads," and it explodes a number of misconceptions about unemployment.

The editorial follows:

REAGAN: READ THE WANT ADS

President Reagan is at it again. This time he's come up with a simple solution to the nation's unemployment problem: Read the want ads.

The president told a group of congressmen and congresswomen recently that he can't understand how people complain about being out of work considering the fact that his Sunday newspaper carries 30 or more pages of help-wanted ads.

We know the high unemployment rate here in Washington, we know in New York and their problems, and yet how do I explain that—or how do we explain that in the Sunday Times, New York Times, there were 45½ pages of help-wanted ads and in The Washington Post Sunday there were 33½ pages of help-wanted ads and these were jobs calling for people of every range that you could make.

How does a person in any one of those skills justify calling themselves unemployed when there's a fellow spending money and saying, "I've got a job. Come fill my job?"

The problem with the president's reasoning is that it contains two false assumptions: one, that help wanted ads are a true reflection of the job market, and two, that people are prepared to fill any job that's available.

An analysis of the Post's ads found that few of them were for people at the bottom of the employment ladder—those with no marketable skills and no experience. Two full pages advertised for computer specialists, a field that is wide open and growing and, unfortunately for the unemployed, very specialized. It is a field where demand far outstrips supply of qualified workers.

The Post's ads were also mainly directed at people already working. Some tried to lure draftsmen, engineers and nurses away from their jobs for better paying positions that offered better benefits. Again, such ads aren't aimed at those on the unemployment line.

People are not, as one labor economist noted, like "interchangeable parts—anybody can fill any job." If they were, Reagan would be right on target. Unfortunately, there aren't many unemployed assembly line workers who can walk into the computer world of silicon chips.●

THE SAVINGS AND THRIFT ACT OF 1981

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. DORGAN of North Dakota. Mr. Speaker, I am introducing legislation today that would give taxpayers an exemption for the interest payments they earn from saving deposits. This bill, the Savings and Thrift Act of 1981, would totally exempt from all Federal income taxes—the first $1,000 in interest, or $2,000 for joint returns—in the earnings gained from deposits in savings institutions and credit unions.

I have introduced this bill because I believe it is time to turn our Nation into a nation of savers once again.

This Nation grew strong through hard work and thrift, and that is the only way we can rebuild our economy. We have to get back to basics and give people a little more encouragement to save instead of spend, and that is what my bill is intended to do.

We cannot build for tomorrow if we are always paying for yesterday.

The rate of personal savings in the United States is lagging far behind that of other nations which are outpacing us economically. Americans are saving just under 5 percent of their disposable income, compared to 13.7 percent in West Germany and 19.1 percent in Japan. Furthermore, our savings rate is at its lowest point since 1948. This says a good deal about the roots of our economic problems.

The Federal Government itself is part of the problem. By letting interest rates and energy prices go through the roof, the Federal Government has tolerated a situation in which many families have very little left to save. At the same time, while we tax interest from savings accounts, the Government grants a complete deduction for the interest consumers pay on credit purchases. This is one reason that consumer credit purchases grew three times faster than savings depositis—including certificates of deposit—over the last decade.

We have an economy that rewards comsumption and penalizes savings.

Over $57 billion per year is spent on media advertising alone to induce people to spend more of their money. It seems reasonable to me that we should also provide some counterbalancing incentive to encourage people to save, and that is why I have introduced this legislation.

I also want to help the savings and loans and credit unions which are struggling because of lagging desposits, high interest rates, and unfair competition from the new money market funds. Savings and loan profits in my State, North Dakota, were down 88 percent as a percentage of assets last year, and over a quarter of our credit unions actually lost deposits. This bill should help our local savings institutions, while helping savers as well.●

CORRECTING THE BILINGUAL BALLOT AMENDMENTS TO THE VOTING RIGHTS ACT

HON. WILLIAM M. THOMAS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. THOMAS. Mr. Speaker, I am again introducing legislation to correct what most of us agree was a mistake made by Congress in 1975—the bilingual ballot amendments to the Voting Rights Act.

With my colleague, Congressman McCLOSKEY, and 19 other Congressmen, I am introducing a bill which would repeal bilingual ballot provisions which mandated that counties provide special election materials if 5 percent or more of the population was of a single language minority group and the group as a whole had an illiteracy rate higher than the national average.

Congress no doubt intended to increase voter participation among minorities, but this has not happened in the 27 States affected by the bilingual ballot provisions.

Instead, what has occurred is a huge increase in ballot costs to local government. Practical experience has shown the bilingual ballot to be an expensive and little-used item.

In my home, Kern County, Calif., the cost of complying with bilingual ballot provisions has been awesome. In the June 6, 1978 primary, for example, 67,430 Spanish language ballots were printed while only 174 were actually used. The average cost per Spanish ballot used was $167.67, compared with an average cost of $2.32 for each English ballot which was used.

In Redwood City, Calif., a recent municipal election required the printing of 25,498 ballots and accompanying materials. Only 69 voters requested Spanish language ballots, and only 15 of these persons actually voted. Of the $30,137 total cost for the election, $7,377 was directly caused by Federal bilingual ballot provisions.

In San Mateo County, Calif., only 2 percent of all eligible Spanish language voters voted in the last election—at a cost to the county of more than $17,000.

In Oregon, only 10 requests for bilingual ballot materials were received, yet it cost local governments $23,180 to provide all materials required by law.

In Grant County, Kans., the cost of compliance was $1,200 for five ballots actually requested. That is $240 per ballot.

The examples cited above show why my legislation in the 96th Congress to repeal the bilingual ballot provisions was supported by county clerks and secretaries of state across the Nation. Local governments are being burdened by a costly and needless mandate from the Federal Government, yet they are not getting any funds to implement this mandate.

The scant minority voter participation in the bilingual ballot program also shows once again that well-intended but misdirected edicts from Washington do not change human behavior. Many people in my district have told me they are insulted to be mailed a Spanish language ballot simply because they have a Spanish surname. They rightly consider themselves American citizens and they use the language of our country, English.

The naturalization test requires proficiency in English. Why then do we ask certain of our citizens to vote in their previous language? Congress has mandated a great deal of waste through the bilingual ballot program, funds that could be better spent in other ways to encourage minority and all citizens to vote.

The legislation which Mr. McCLOSKEY, myself, and our colleagues are introducing today would not remove the basic constitutional guarantees from the Voting Rights Act, but it would correct a grievous error. The bilingual ballot is costing far in excess of what it is accomplishing, and I hope Congress will recognize its mistake.

Those who have joined me as original cosponsors of this legislation are as follows: Mr. McCLOSKEY, Mr. BADHAM, Mr. BAFALIS, Mr. BURGENER, Mr. BUTLER, Mr. COLLINS of Texas, Mr. FRENZEL, Mr. GINGRICH, Mr. HILER, Mrs. HOLT, Mr. KINDNESS, Mr. LAGOMARSINO, Mr. LUNGREN, Mr. MONTGOMERY, Mr. MOORHEAD, Mr. PETRI, Mr. RUDD, Mr. SHELBY, Mr. SHUMWAY, and Mr. WHITEHURST.

A copy of the bill follows:

H.R. 2942

A bill to amend the Voting Rights Act of 1965 to limit certain aspects of its coverage for other than racial groups

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Voting Rights Act Repealer Amendments Act of 1979".

SEC. 2. Section 4(a) of the Voting Rights Act is amended—

(1) by striking out "the first two sentences of" where it appears immediately after "determinations have been made under";

(2) by striking out the final sentence of the first paragraph;

(3) by striking out "an action under the first sentence of this subsection" and inserting in the third paragraph thereof "the action"; and

(4) by striking out the fourth paragraph thereof.

SEC. 3. Section 4(b) of the Voting Rights Act of 1965 is amended by striking out the final sentence of the first paragraph thereof.

SEC. 4. Section 4 of the Voting Rights Act of 1965 is amended by striking out subsection (f).

SEC. 5. Section 5 of the Voting Rights Act of 1965 is amended by striking out "or whenever a State or political subdivision with respect to which the prohibitions set forth in section 4(a) based upon determinations made under the third sentence of section 4(b) are in effect shall enact or seek to administer any voting qualification or prerequisite to voting different from that in force or effect on November 1, 1972," where it appears after "November 1, 1968,".

SEC. 6. Sections 3 and 6 of the Voting Rights Act of 1965 are each amended by striking out "fourteenth or fifteenth amendment" each place it appears and inserting in lieu thereof the following: "fifteenth amendment".

SEC. 7. Sections 2, 3, the second paragraph of section 4(a), and sections 4(d), 5, 6, and 13 of the Voting Rights Act of 1965 are each amended by striking out ", or in contravention of the guarantees set forth in section 4(f)(2)" each place it appears immediately after "on account of race or color".

SEC. 8. Section 14(c) of the Voting Rights Act of 1965 is amended by striking out paragraph (3).

SEC. 9. (a) The Voting Rights Act of 1965 is further amended by striking out section 203.

(b) Sections 204, 205, and 206 of the Voting Rights Act of 1965 are redesignated as 203, 204, and 205, respectively.

(c) Section 204 of the Voting Rights Act of 1965, as redesignated section 203 by subsection (b) of this section, is amended by striking out "or 203,".

(d) Section 205 of the Voting Rights Act of 1965, as redesignated section 204 by subsection (b) of this section, is amended by striking out ", 202, or 203" and inserting in lieu thereof the following: "or 202":●

GREEN DEPLORES HANDGUN VIOLENCE

HON. S. WILLIAM GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. GREEN. Mr. Speaker, President Ronald Reagan, James Brady, Timothy McCarthy, Thomas Delahanty—these names represent the latest in a litany that contain the names of other Presidents, political figures, police officers, and civilians injured and killed by gunmen.

It is time we considered again how we should deal with people who use guns criminally and how to slow that litany of victims. It is not a time for the sophistic debate of whether "guns kill people" or "people kill people." The fact is that handguns make it relatively easy for people to kill.

We must affect the triad of man, means, and motive.

We must punish severely anyone who bears a firearm in the commission of a crime.

To restrict the ability to maim and kill, we must accept reasonable guidelines on the bearing of arms, specifically handguns. Relatively simple requirements, not much different than we place upon ownership and use of autos, would help protect Presidents and other citizens.

I realize President Reagan has been opposed to handgun controls and know that for some Americans a gun is a natural part of their lives if they live in sparsely populated areas or have been raised in families that hunt or belong to gun clubs.

But for too many people a gun is a devise for aggression; a weapon used to punish others for real or imagined slights or offenses. Indeed, the gun has become the final arbiter of political debate.

When President John Kennedy was killed, some accused Dallas of being a "city of hate." Unfortunately, we now have many such cities: Los Angeles, Memphis, Washington, New York, a small Maryland town. I do not subscribe to a theory that a locality alone can spur violence but it may be that as a nation we too easily, too often replace reason with emotion.

In recent years we have shown a tendency to engage in heated and hominem attacks upon those with whom we disagree. "I hate that ——" is a remark heard when discussing political differences. We confuse a rejection of a philosophy with a condemnation of the philosopher. At times we accept if not condone cursing, screaming, the threatening waving of fists as political actions.

Certainly, very few who permit themselves to succumb to political hatred and verbal threats would go to the extreme of physical violence. But I wonder if expressions of hatred do not encourage violence by extremists and the unbalanced.

I would like to see all of us calm our emotions when we disagree. I would like to see the "left" understand the public's need to feel secure from criminally angry individuals. I would like to see the "right" understand the public's need to remove from the criminals' hands the guns that fell so many innocents.

I think it is time to end debate and stop the sounds of gunfire. It is time to protect our Presidents and the people.

In this most difficult time, I join the prayers of thanks of all Americans that our President, his aide, and his guardians survived the attack, and I hope for the full and complete recovery of all wounds. Our hearts go out to the injured and their families.●

NO GOOD CAN COME OF SALE OF OFFENSIVE WEAPONS TO SAUDIS

HON. JIM MATTOX

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. MATTOX. Mr. Speaker, the prospect of handing over to the potentially unstable kingdom of Saudi Arabia, an avowedly intransigent enemy of Israel, sophisticated military equipment capable of long-range assault, is troubling indeed.

For the benefit of my colleagues, I recommend the following analysis of U.S. capitulation to the demands of the Saudis, an article by former Senate Foreign Relations Committee staffer Steve Emerson, in the March 21, 1981, New Republic.

[From the New Republic, March 21, 1981]

NEW SALAAMS TO THE SAUDIS

(By Steve Emerson)

Rumors of the death of the Carter administration have been greatly exaggerated. The Reagan decision to acquiesce to Saudi Arabia's demands for offensive F-15 hardware means that one of the Carter administration's most short-sighted policies remains alive and well. It is ironic that the new administration, which campaigned promising to reassert American toughness abroad and to promote the national interest unapologetically, has accepted the policies of its predecessor so uncritically.

Reagan policy-makers undoubtedly believe that they have resolved the F-15 dilemma by giving Israel military credits to partially compensate for its increased vulnerability. And they view the sale as part of a new strategic emphasis on containing Soviet expansion in the Middle East, not unlike former secretary of state John Foster Dulles's application of the Truman Doctrine, which produced the short-lived Baghdad Pact among Turkey, Pakistan, Iraq, and Iran in 1955.

It is unfortunate that the issue of an increased threat to Israeli security was the

only argument against the sale that the administration considered. There are many others, including the absence of a sound military rationale for the equipment, perpetuation of an unhealthy American-Saudi relationship, the possibility of Saudi mischief in the Persian Gulf, and potential destabilizing effects on Saudi Arabia itself.

Lest anyone forget, during the 1978 congressional debate over the initial sale of 60 F-15s to Saudi Arabia, Carter administration officials imposed explicit and public restrictions on the sale of "any system or armaments that could increase the range or enhance the ground-attack capability of the F-15." It was specifically stipulated to Congress that the Saudis would not receive auxiliary fuel tanks, multiple ejection (bomb) racks, air-refueling capabilities, early warning radar planes (AWACS), or "all-aspect" AIM 9L ("Sidewinder") air-to-air missiles. Last year the former president reaffirmed these restrictions in numerous press interviews and in discussions with elected officials.

Citing new security considerations and changing circumstances, the Reagan administration now has granted immediate approval to the sale of the extra fuel tanks and Sidewinder missiles, to be followed by future approval of the advanced radar planes, mid-flight refueling capability, and, possibly, bomb racks. This approval only further entraps the U.S. in a vicious cycle of escalating Mideast arms sales. And it perpetuates the pattern whereby the Saudis get what they want from the U.S. by representing every request as a "litmus test" of American-Saudi relations. Instead of initiating a "new beginning," the Reagan administration has signaled willingness to endure an obsequious and inherently counterproductive relationship. The United States would be well advised to heed the advice of Egyptian president Sadat, who repeatedly has urged U.S. officials to stop babying the Saudis and to demand that they respect our military and political interests.

Developing a healthy relationship with the Saudis depends on a clear-headed evaluation of what they do for us, and we for them. The Saudis supply 17 percent of the world's oil production, which is vital to the well-being of the Western economy. Saudi rulers pay a political price for keeping production up. Younger, more conservative princes (ironically, often Western-educated) charge that their elders are squandering the national patrimony. Also, by producing at rates commensurate with Western needs, the Saudis get accused by Islamic fundamentalists and Arab radicals of being allied with "infidels" and "imperialists."

But in setting their levels of oil production, the Saudis also are guided by self-interest. They need to prevent the collapse of the Western economy and devaluation of Saudi investments in the United States and the West. They don't want to induce the West to develop alternative energy supplies. They need money for their massive development and industrialization program, estimated to cost $270 billion over the next five years. And, in the end, they do not want to drive the West to military action to preserve its oil supply.

Saudi Arabia has reaped considerable rewards from its relationship with the United States. Since 1945 Washington has provided the House of Saud with a security umbrella against aggression from potential enemies—the Soviet Union, Yemen, Libya, Iraq, and Iran. Over the past six years, the U.S. has sold more military equipment to Saudi Arabia than to any other non-NATO country, totaling more than $22 billion. In 1980 alone, Saudi purchases of American military equipment and construction amounted to about five billion dollars.

Saudi Arabia also derives vast quantities of non-military goods and services from the U.S.—$23 billion worth between 1976 and 1980. American companies are heavily involved in building and running modern Saudi Arabia. Aramco alone employes over 10,000 American citizens to produce the kingdom's oil.

In short, each nation is compelled to depend upon the other. Given American superiority in military and technological fields, however, a strong case can be made that the Saudis are more dependent on us than we are on them. The United States imports 1.2 million barrels per day from Saudi Arabia. This is just one-sixth of all American oil imports and only six percent of America's total petroleum consumption of 16.7 mbd. The Saudis have an "oil weapon" all right, but its potency is more limited than Americans often realize.

For one thing, the Saudis do not have a limitless capacity to increase production to reward satisfactory behavior in the West. In April 1979 the Senate Foreign Relations Committee issued a detailed analysis of Saudi production and reserves based on subpoenaed documents from Exxon and Socal, two partners in Aramco. The report concluded that Saudi Arabian production is never likely to exceed 12 mbd, and that this level could be sustained only for 15 or 20 years before it started to decline. Because of reductions in projected recoverable reserves and rising costs of maintaining production, the report also indicated that Saudi Arabia might never raise its maximum sustainable capacity beyond the present 10 mbd. The fundamental conclusion of the Senate study was that Saudi Arabia produces its oil based on its own economic self-interest and on geological realities, and that "linkage" with the Arab-Israeli dispute never has been figured into production decisions. The New York Times twice reported that CIA analysts supported the report's findings.

There is evidence that even the October 1973 oil cutoff may have had geological and conservationist explanations. In any event, various oil experts maintain that actual production cutbacks were limited in duration and magnitude. U.S. gas lines made the embargo seem successful, but according to MIT economist M. A. Adelman they were the product of the "explosive combination of controlled prices and no rationing. . . ."

Finally, an increasing number of Middle East oil economists believe that Saudi Arabia actually will be forced into raising its oil production to finance balance of payments deficits. Eliyahu Kanovsky, a visiting professor of economics at Queens College, has examined the Saudi economy and found deficits in 1977, 1978, and 1979. In order to meet massive capital development projects, and increased international economic needs, the kingdom may require a minimum production level, perhaps 8.5 mbd. According to Business Week Saudi government sources confirmed this assessment and said that sharp budget cutbacks would provoke greater economic and social dislocations than the social pains of development.

In short, "responsible" Saudi production and price levels—represented in the U.S. as a political favor to the West—are actually the product of self-interest and will continue to hold unless there is a change of regime as in Iran. It can be argued that it is the U.S. that contorts itself, including its own laws, to please the Saudis. One example is Northrup's control of the multi-billion-dollar modernization program of the Saudi Air Force, awarded without competitive bidding at Ridyadh's request. Similarly Saudi Arabia receives selective treatment in the operation of foreign military trust funds. Unlike any other foreign purchaser, Saudi Arabia makes deposits for military purchases in an interest-bearing account under an arrangement whereby the U.S. would not be protected should Saudi Arabia decide to cancel its contracts, as Iran did.

Saudi Arabia also gets special treatment in State Department human rights reports, compiled annually for Congress. The 1981 report is so meticulously crafted that, even after citing stonings, beheadings, severances of the hand, a "heavy stress on obtaining confessions", and the lack of habeas corpus or the right to counsel, one still gets the impression that Saudi Arabia has not violated the standard of human rights that was judiciously applied elsewhere.

The Carter decision in 1978 not to fill the strategic petroleum reserve was an astonishing concession to the Saudis. Officially, Saudi Arabia professed a desire to prevent pressure for higher oil prices, but Americans close to the Saudis acknowledged that they also wanted to maintain U.S. dependence on their oil. Congress finally forced the administration to resume filling the reserve. That the Saudis have not objected demonstrates that Carter's concession was unnecessary.

The 1978 sale of 60 F-15s to the Saudis was a major demonstration of Saudi political influence. Many senators voting to approve the sale conceded openly that they were doing so because of U.S. dependence on Saudi oil and goodwill. The sale of 60 planes was approved despite a 1974 Pentagon recommendation and a 1978 Arms Control and Disarmament Agency report saying only 40 F-15s should be provided. A 1976 Defense Department reassessment advised the Saudis not to purchase F-15s at all, on the grounds that they could not assimilate them.

If the F-15 sale had resulted in Saudi support for American peace efforts in the Middle East—as promised by the Carter administration—then it might be argued that the United States had received a quid pro quo for the planes. But since Camp David, what has happened? At both Baghdad pan-Arab summits, the Saudis were instrumental in building a consensus for punishing President Sadat and for paying out billions to Jordan and Syria to stay out of the peace process. This year the Saudis led the Islamic nations in calling for a jihad against Israel.

Not only did the Saudis not deliver on their part of the quid pro quo, the Carter administration actually shifted its peace policy in Saudi Arabia's direction. How else can one explain Washington's attempts in 1979 to involve the PLO in peace negotiations? How else explain the effort to alter UN Resolution 242, when it had formed the cornerstone of the Camp David accords? And how else explain the counterproductive attempts to reach prematurely for a "comprehensive solution" at the expense of the Camp David accords and the repeated acquiescence to one-sided Security Council resolutions?

In spite of the record and its own public promises, it's likely that the Carter administration would have approved the new Saudi request for offensive ordnance. According to

the biweekly Middle East Policy Survey, Secretary of Defense Harold Brown gave his personal commitment to Saudi defense minister Sultan that the kingdom's request would be fulfilled.

The Reagan administration thus inherited a difficult situation, but not an impossible one. It could have invoked the 1978 executive commitments in refusing the sale. But in consultations with Congress during the past three weeks, Reagan administration officials have parroted the same vague and superficial justifications that previously had been cited by the Carter administration. "If we don't sell them this equipment, then they will buy it elsewhere," goes one verse. Another maintains that the Saudis are a "force for stability and moderation in the Middle East." (The corollary is that Saudi Arabia's moderation would disappear if they are not granted their requests.) Yet another cites the security threat to Saudi Arabia, especially to the Eastern oil-producing provinces, but doesn't quite explain how Saudi Arabia would defend itself against the blows of the Soviet Union, Iraq, Iran, or the People's Democratic Republic of Yemen. The final line assures all concerned that Saudi Arabia never would use its F-15s, or transfer them for use, in direct combat against Israel.

A preview of this administration's embrace of previous policies was provided last month in Defense Secretary Casper Weinberger's maiden news conference. He expressed the American desire to bolster Saudi Arabia's security by providing the offensive F-15 equipment they had requested. When asked about the American commitment to Israel, Weinberger responded sympathetically to Israel's needs, maybe a bit too sympathetically, in offering to station troops in Israel.

Actually, it is Saudi Arabia that needs American troops, not Israel. With vulnerable oil fields, limited military capability, vast territory to defend (over 4,400 miles of coastline), and surrounded by military superior adversaries, Saudi Arabia must depend upon the American security umbrella. The closer American forces are to Saudi Arabia, the more protection they can provide.

But, it's argued, the Saudis are unwilling to become overtly identified with the United States (or any foreign power) for fear of inciting domestic resentment. Therefore the U.S. has to sell the Saudis sophisticated weapons to use in protecting themselves. So goes the military justification for the F-15 sales. But key military questions have not been faced: from which potential adversary can Saudi Arabia realistically be expected to defend itself? What are the most likely situations in which the planes will be used? Can the Saudis absorb the weapons? What are the other potential effects generated by transforming the kingdom into a massive arms arsenal?

According to the 1980-81 annual report of the International Institute for Strategic Studies and other sources, the balance of forces between Saudi Arabia and every one of its potential adversaries is overwhelmingly weighted against Saudi Arabia. This imbalance is further accentuated by the vast territory Saudi Arabia has to protect. No matter how many F-15s Saudi Arabia possesses, the kingdom always will be incapable of defending itself. the Saudis and Americans are both well aware that should the kingdom be subjected to an external attack, the Saudis would have to rely on American military forces to protect their oil fields from destruction. The creation of the American Rapid Deployment Force attests to the acceptance of this contingency.

If the F-15s have no credible defensive role, why do the Saudis want them? One answer is prestige. Another is that they may hope to acquire an offensive option. The F-15 is the most sophisticated fighter plane in the world, capable of challenging any other aircraft. When equipped with extra fuel tanks, advanced radar, and AIM-9L air-to-air missiles, the F-15 is capable of inflicting lethal damage 1,000 miles away from its takeoff point. It could fly from Saudi Arabia to anyplace in the Middle East and return.

Having acquired 60 F-15s and offensive enhancement gear, the Saudis may be tempted to use them. How? One possibly is to settle old scores with weaker Persian Gulf rivals such as Oman. Religious and tribal animosities characterize the Saudi-Omani relationship and, on more than one occasion, the Saudis have tried to occupy Oman's Buraimi Oasis. The Omanis themselves probably will be granted additional weapons by the United States, too. The U.S. is in the process of creating a version of mutual assured destruction in the Persian Gulf, a kind of Mideast balance of terror.

What about the threat to Israel? Proponents of the sale discount the possibility of a direct Saudi attack because of the more destructive Israeli retaliatory capability. The logic of this thesis is sound, but logic does not always govern behavior in a region of the world where dying by the sword is preferred to political compromise. In the event of another Arab-Israeli war, it is naive to believe that Saudi Arabia could resist pressure to use its weapons against Israel, or to transfer its planes to some other Arab state. Saudi Arabia took part in three past Arab-Israeli wars, but its involvement was limited to support roles and joint maneuvers with Syria and Jordan. The important difference is that then the kingdom simply did not have the modern weaponry it now has at its disposal. The mere existence of the superior F-15s, hardly a secret, would generate overpowering demands upon the kingdom from both within and without for use in an actual jihad against Israel. In the past, the Israelis never have felt a military need to attack Saudi territory. But if they feared a new war with the Arabs was imminent, they would have a strong incentive to launch a preemptive strike to knock out the Saudi F-15 force.

In all fairness, responsibility for fueling the arms race in the Middle East must be spread among several Western countries and Russia. The Saudis apparently will get 300 West German Leopard tanks and 200 British Tornado jets. Reportedly they have made a secret $3.4-billion agreement with France to buy ships and helicopters, and are negotiating to finance production of Mirage 4000 jets. The lure of recycling oil debts, lowering unit costs of weapons, and engendering goodwill have proven irresistible to the Europeans.

The dangers of an arms race are somewhat mitigated by reported Saudi inability to absorb such vast quantities of sophisticated weapons. A similar problem arose in Iran, yet the surplus cash skimmed off the top of the defense contracts ensured that the contracts continued. Multinational corruption in Saudi Arabia probably has not risen to the levels reached in Iran, but the issue of Saudi absorptive capacity should be a fundamental consideration in determining the feasibility of appropriate military sales. Is the U.S. prepared to sanction the Saudis' use of Pakistani mercenaries to fight on their behalf?

Even more troubling are the negative domestic repercussions of the massive arms sales, an issue relating to the larger problem of internal Saudi instability. The strains caused by accelerated industrialization, accompanied by liberalization of the kingdom's social or political institutions, well may provoke a violent reaction against the regime. Add the factors of corruption, a large foreign presence, Islamic revivalism, class disparities, and Shia-Sunni and other intra-clan tensions (particularly in the oil regions), and the future looks even more ominous. On top of this, the impact of a massive arms infusion could prove disastrous. Many sectors of Saudi society, from religious ascetics to those with rising expectations about the benefits of oil wealth, may end up increasingly dissatisfied with an uneven development program that goes too far and simultaneously not far enough. A conspicuous arsenal of Western arms may create, as in Iran, an irritating reminder of the regime's wasting of precious, dwindling resources. No one can predict that massive internal insurrection will occur in Saudi Arabia, but it would be a tragic irony if sometime in the future American troops were forced to protect American interests from the ravages of American arms.●

QUANTIFYING BROADCASTERS' PUBLIC TRUST RESPONSIBILITY

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. SWIFT. Mr. Speaker, for some time I have been talking about a method of quantifying the broadcasters' public trust responsibility because I have felt that it would provide the framework for a thorough-going broadcast deregulation bill. I now have a draft of a bill that would do both and have shared it with many interested parties both within the broadcasting industry and among public interest groups. I have not yet introduced this as a bill because I am hoping that some of the comments I get from these groups will result in improvements before I introduce the bill sometime after the beginning of May. In the meantime, however, I wanted to take this opportunity to share the draft bill with my colleagues in the House.

H.R. —

A discussion draft of a bill to amend the Communications Act of 1934 to quantify public responsibility requirements for television and radio broadcasters, to deregulate certain aspects of television and radio broadcasting, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Broadcasting Public Responsibility and Deregulation Act of 1981".

PUBLIC RESPONSIBILITY REQUIREMENTS

SEC. 2. Part I of title III of the Communications Act of 1934 (47 U.S.C. 301 et seq.) is amended by adding at the end thereof the following new section:

"PUBLIC RESPONSIBILITY REQUIREMENTS

"SEC. 331. (a) For purposes of this section:

"(1) The term 'licensee' means any commercial television or radio broadcasting station licensee.

"(2) The term 'licensee evaluation system' means the licensee evaluation system established by the Commission in accordance with subsection (b).

"(3) The term 'licensee rating schedule' means the licensee rating schedule established by the Commission in accordance with subsection (c)(1).

"(4) The term 'program-related production cost' means any cost which is directly related to the production of a particular program. Such term does not include capital expenditures, salaries of regular employees, or general overhead expenditures which are incurred in the operation of the station of a licensee but which are not attributable to the production of any particular program.

"(5) The term 'public responsibility standard' means the public responsibility standard established by rule by the Commission in accordance with subsection (d).

"(6) The term 'qualifying programming' means—

"(A) public service programming;

"(B) programming which has a direct relevance to persons residing in the service area of a licensee, including broadcasts which (i) are transmitted at the same time as the events involved, or are produced and recorded at the same time as the events involved and are subsequently transmitted in substantially the same form as the original recorded form; and (ii) relate to news, sports, music, drama, religious programming, or public affairs programming; and

"(C) any other programming which the Commission determines by rule to be of special value to local audiences.

"(b)(1) The Commission, as soon as practicable after the effective date of this section but not later than 6 months after such effective date, shall establish a licensee evaluation system. The licensee evaluation system shall—

"(A) assign a point value to the broadcasting of any qualifying programming; and

"(B) award points to each licensee based upon each minute of qualifying programming which is broadcast by such licensee during each annual period of the license held by such licensee.

"(2) The point values included in the licensee evaluation system shall be weighted by the Commission so that additional points are awarded to each licensee based upon—

"(A) broadcasting of qualifying programming by such licensee during broadcasting periods which are assigned a preferred rating by the Commission under paragraph (3);

"(B) broadcasting of public service announcements regarding local issues, events, and activities;

"(C) broadcasting of the type of programming specified in subsection (a)(6)(B); and

"(D) the amount of program-related production costs incurred by such licensee.

"(3) For purposes of awarding additional points under paragraph (2)(A), the Commission shall divide the broadcasting day into designated broadcasting periods and assign a rating to each such period based upon the likely size of the audience for programming which is broadcast during each such period. The Commission shall assign preferred ratings to periods for which the likely audience size is substantially larger than the audience size for other periods.

"(4) The amount of additional points which licensees may be eligible to receive under subparagraphs (A), (B), (C), and (D) of paragraph (2) shall be established by the Commission by rule.

"(c)(1) The Commission, after completing the establishment of the licensee evaluation system in accordance with subsection (b), shall establish a licensee rating schedule. The Commission, for purposes of establishing the licensee rating schedule, shall—

"(A) review the most recent composite weekly programming logs filed with the Commission by licensees for periods preceding the date on which the licensee evaluation system takes effect; and

"(B) assign a rating to each licensee based upon the number of points which would have been awarded to such licensee under the licensee evaluation system if such system had been in effect during such periods.

The Commission, in reviewing composite weekly programming logs under subparagraph (A), shall designate the number of logs to be reviewed based upon the number necessary to ensure a valid statistical survey.

"(2) The Commission, after establishing the licensee rating schedule under paragraph (1), shall—

"(A) review the rating assigned to each category of licensees for purposes of determining minimum point levels in connection with the establishment of the public responsibility standard under subsection (d); and

"(B) determine, in accordance with paragraph (3), whether different minimum point levels should be established for different categories of licensees.

"(3) The Commission, in establishing the public responsibility standard under subsection (d), shall have authority to establish different minimum point levels for different categories of licensees if the Commission—

"(A) determines, based upon its review of the licensee rating schedule, that different programming practices and formats result in significant differences in the ratings assigned to different categories of licensees under the licensee rating schedule; and

"(B) makes a finding that the establishment of different minimum point levels for different categories of licensees (i) would not be contrary to the purposes of the public responsibility standard; and (ii) would not have an adverse effect upon the administration of such standard.

"(4) The Commission shall complete the actions required in this subsection as soon as practicable after the establishment of the licensee evaluation system, but not later than 18 months after the effective date of this section.

"(d)(1) The Commission shall prescribe a rule which establishes a public responsibility standard. Such rule shall take effect as soon as practicable after the Commission carries out the actions required in subsection (c), but not later than 30 months after the effective date of this section.

"(2) The public responsibility standard shall specify the minimum number of points which—

"(A) all licensees; or

"(B) different categories of licensees, if the Commission elects to establish such categories in accordance with subsection (c)(3); are required to accumulate under the licensee evaluation system during each annual license period in order to be in compliance with the public responsibility standard.

"(3) The Commission shall not have any authority under this Act to require any licensee to broadcast any particular type of programming or to establish any particular type of broadcasting format, except that only qualifying programming shall be eligible for the awarding of points to a licensee.

"(4) Any amendment by the Commission to the rule establishing the public responsibility standard may not take effect before the end of the 1-year period following the date of the adoption of such amendment.

"(e)(1) Each licensee shall maintain records which are sufficient to indicate the number of points accumulated by such licensee for purposes of complying with the public responsibility standard. Each licensee, as soon as practicable after the close of each annual period, shall certify to the Commission that the number of points accumulated by such licensee during such period is sufficient for compliance with the public responsiblity standard.

"(2) The Commission shall at all times have access to, and the right of inspection and examination of, the records which licensees are required to maintain in accordance with paragraph (1).

"(3) The Commission shall not have any authority to require any licensee to submit any annual report or other report relating to its programming policies and practices, other than the certification required in paragraph (1).

"(f)(1) the Commission, acting on its own motion, shall have authority to take such action as may be necessary for the purpose of determining whether any licensee is engaging or has engaged in any violation of the provisions of this section.

"(2) If any person filed a complaint with the Commission which alleges that any licensee is engaging or has engaged in any serious violation of the provisions of this section, then the Commission shall take such action as may be necessary for the purpose of determining whether any penalty should be imposed upon such licensee by the Commission under this Act.

"(g)(1)(A) Any licensee who engages in a pattern of failure to comply with the public responsibility standard shall be subject to a civil penalty imposed by the Commission in an amount equal to the product of the highest per minute advertising rate charged by such licensee multiplied by 1,000.

"(B) The amount of such civil penalty shall be assessed by the Commission by written notice. The Commission shall have the discretion to compromise, modify, or remit, with or without conditions, any civil penalty assessed under this paragraph against any licensee—

"(i) to the extent necessary to prevent the insolvency or bankruptcy of such licensee, if the Commission determines that such compromise, modification, or remittance serves the public interest; or

"(ii) if the failure to comply is technical in nature or constitutes a minor or insubstantial violation of the public responsibility standard.

"(C) For purposes of subparagraph (A), the highest per minute advertising rate charged by any licensee shall be determined by the Commission and shall—

"(i) be based upon rates charged by such licensee at the time of the imposition of the civil penalty involved; or

"(ii) if such licensee is not operating the broadcasting station involved at the time of the imposition of such civil penalty, be

based upon rates which were in effect on the date such licensee ceased to operate such station.

"(2) In any case in which a licensee who has been made subject to a civil penalty under paragraph (1) subsequently engages in a pattern of failure to comply with the public responsibility standard, the Commission shall revoke the license of such licensee. Such licensee shall not be eligible to submit any application in connection with any subsequent assignment of such license.

"(3) Any person who knowingly makes any false statement, representation, or certification in any record or other document required to be maintained in accordance with this section shall, upon conviction, be fined not more than $10,000, or imprisoned for not more than 6 years, or both.

"(h) The Commission, not later than 1 year after the effective date of this section, shall submit a report to each House of the Congress. Such report shall contain—

"(1) a detailed statement of actions taken by the Commission to carry out the requirements of this section;

"(2) an estimate of the date on which the public responsibility standard will take effect, together with an explanation of the basis for such estimate.".

BROADCASTING DEREGULATION RELATING TO ASCERTAINMENT AND PROGRAMING REQUIREMENTS

SEC. 3. (a) Section 307 of the Communications Act of 1934 (47 U.S.C. 307) is amended by adding at the end thereof the following new subsection:

"(f) The Commission, in its administration of this Act regarding applicants for commercial television or radio broadcasting station licensees and regarding commercial television or radio broadcasting station licensees, shall not have any authority to establish or enforce any rules, orders, guidelines, policies, or procedures which require such licensees—

"(1) to engage in any activity for the purpose of ascertaining the problems, needs, or interests of persons residing in the service areas of the stations involved;

"(2) to limit the number of commercial advertisements which may be broadcast, or to limit the length of any such commercial advertisements; or

"(3) to establish or maintain any programming logs or other related records."

(b) Section 303(j) of the Communications Act of 1934 (47 U.S.C. 303(j)) is amended by striking out "Have" and inserting in lieu thereof "Except as provided in section 307(f)(3), have."

(c) Any rules, orders, guidelines, policies, or procedures of the Federal Communications Commission which are not consistent with section 307(f) of the Communications Act of 1934, as added by subsection (a), shall cease to have any force or effect on the effective date specified in section 11(b)(1).

LICENSE TERMS

SEC. 4. (a) The first sentence of section 307(d) of the Communications Act of 1934 (47 U.S.C. 307(d)) is amended by striking out "shall be" the first place it appears therein and all that follows through "so granted" and inserting in lieu thereof "or".

(b) The second sentence of section 307(d) of the Communications Act of 1934 (47 U.S.C. 307(d)) is amended by striking out "three years" and all that follows through "not to exceed", and by striking out "in the case of other licenses".

(c) The amendments made in this section shall apply to broadcasting licenses, and broadcasting license renewals, granted by the Federal Communications Commission after the effective date specified in section 11(b)(1).

JOINT APPLICATIONS FOR CONSTRUCTION PERMITS AND LICENSES

SEC. 5. (a) Section 308(a) of the Communications Act of 1934 (47 U.S.C. 308(a)) is amended by adding at the end thereof the following new sentence: "Any person who seeks to obtain a construction permit and a station license from the Commission shall be permitted to submit a joint application for the issuance of such permit and license.".

(b) Section 319 of the Communications Act of 1934 (47 U.S.C. 319) is amended by striking out subsection (c), and by redesignating subsection (d) as subsection (c).

COMPARATIVE HEARINGS

SEC. 6. Section 309(a) of the Communications Act of 1934 (47 U.S.C. 309(a)) is amended by inserting "(1)" after the subsection designation, and by adding at the end thereof the following new paragraph:

"(2) The Commission, in acting upon any renewal application filed by a broadcasting station licensee under section 308, shall not have the authority to consider any competing application submitted by any other person for operation of the facilities for which such renewal is sought.".

COMMISSION ACTION UPON LICENSE APPLICATIONS

SEC. 7. Section 309(b) of the Communications Act of 1934 (47 U.S.C. 309(b)) is amended by striking out "of the acceptance for filing" and inserting in lieu thereof "with respect to the receipt".

PETITIONS TO DENY LICENSES

SEC. 8. Section 309 of the Communications Act of 1934 (47 U.S.C. 309) is amended by striking out subsection (d) and subsection (e), and by redesignating subsection (f) through subsection (h) as subsection (d) through subsection (f), respectively.

PROCEDURES FOR GRANTING INITIAL LICENSES

SEC. 9. Section 309 of the Communications Act of 1934, as amended in section 8, is further amended by adding at the end thereof the following new subsection:

"(g)(1) In any case in which there is more than one applicant for a television or radio broadcasting license, and each such applicant is qualified in accordance with section 308(b), the Commission shall grant the license involved through the use of a system of random selection established by the Commission under paragraph (2).

"(2) The Commission, not later than 180 days after the effective date of this paragraph, shall by rule establish a system of random selection for the granting or television and radio broadcasting licenses in accordance with paragraph (1).".

FACILITIES FOR CANDIDATES FOR PUBLIC OFFICE

SEC. 10. Section 315(a)(2) of the Communications Act of 1934 (47 U.S.C. 315(a)(2)) is amended by adding at the end thereof the following: "discussion, or debate, regardless of whether such interview, discussion, or debate is a regularly scheduled program,".

EFFECTIVE DATES

SEC. 11. (a) The provisions of this Act, other than the provisions specified in subsection (b)(1), shall take effect on the date of the enactment of this Act.

(b)(1) Except as provided in paragraph (2), the amendments made in section 3 through section 10 shall take effect beginning on the date the rule prescribed by the Federal Communications Commission in accordance with section 331(d)(1) of the Communications Act of 1934, as added in section 2, is no longer subject to any administrative or judicial review.

(2) Section 309(g)(2) of the Communications Act of 1934, as added in section 9, shall take effect on the date of the enactment of this Act.●

A TRIBUTE TO THE HONORABLE OLIN "TIGER" TEAGUE

HON. MIKE SYNAR

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 28, 1981

● Mr. SYNAR. Mr. Speaker, I did not have the opportunity and good fortune to know the Honorable Olin "Tiger" Teague. I wish I had. My colleagues have spoken of him with great emotion, and because of this, I feel as though Tiger was an old friend. On behalf of Oklahoma, the birthplace of Tiger Teague, I extend my deepest sympathy to his family and all those who knew him well.

I want to include among the many tributes already paid to Tiger, the following remarks of a close friend and Member of this body for over 20 years, Ed Edmondson. In a recent letter, Ed wrote:

I was saddened today to read in the CONGRESSIONAL RECORD for January 28 the tribute to a former colleague for whom I had the greatest admiration and respect, Olin Tiger Teague.

Although he became known as a Texas war hero during World War II, Tiger was in fact a native of Oklahoma, having been born at Woodward, Oklahoma on April 6, 1910.

When I came to Washington in 1953, I officed only a few doors away from Tiger, and he became a very close friend as well as a wise advisor. We had many friendly battles on the paddle-ball court where he was a fierce competitor and a great sportsman, and I also got to know his fine family and to admire them very much . . . He was a truly outstanding public servant, of unquestioned integrity and ability, who won and held the respect and confidence of his colleagues on both sides of the aisle. He was a credit to the district which repeatedly elected him, to the state in which he was born and to the state in which he served for so many years, and he was a credit to the nation.●

BLUEPRINT FOR A HOUSE THAT WORKS: PART V

HON. TRENT LOTT

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. LOTT. Mr. Speaker, last April 1, the House Select Committee on Committees closed its books by filing its final report. While the report did not receive any attention in the media, and was probably read by few Members, it nevertheless is an important

historical document on past and continuing efforts to improve this institution.

But I would especially call the attention of my colleagues to the minority views filed by Congressmen CLEVELAND, HORTON, FRENZEL, LEACH, and SOLOMON. This is the most concise statement in the report both of the select committee's findings and recommendations, and of the unfinished institutional reform agenda which the select committee did not consider.

I particularly call attention to this report because so many of the recommendations are similar to the proposed House Rules changes I have included in my own "Committee Improvement Amendments of 1981" (H. Res. 100). Like the select committee, I have concluded that our committee system is so overgrown and fragmented that our House is out of order. Like the select committee, I have proposed that there be no more than six subcommittees per committee, except appropriations, and that Members be limited to no more than four subcommittee assignments. And like the select committee, I have proposed that the multiple referral of bills to more than one committee be limited by designating one committee as a principal committee.

The unfinished agenda put forward in the minority views includes most of my other suggested Rules changes. First, the House should adopt an overall ceiling on committee staff. Second, proxy voting in committee should be abolished. Third, oversight should be strengthened by formalizing the process of establishing committee oversight agendas and making proper provision for their coordination through the Government Operations Committee. Fourth, House Rules should be amended to require that the committee party ratios reflect the overall party ratio in the House. The only other proposal contained in my Committee Improvement Amendments which has not been recommended either by the select committee or the minority views is a requirement that we restore majority quorums in committees for the transaction of any business.

Mr. Speaker, on April 15 I intend to reintroduce House Resolution 100, the Committee Improvement Amendments, with cosponsors, and I invite my colleagues to join in this blueprint for a House that works. For the text of my resolution and a more detailed explanation I refer my colleagues to my introductory remarks in the March 4 RECORD at page 3545.

At this point in the RECORD, Mr. Speaker, I include the excerpts from the minority views to the select committee report to which I have alluded. The views follow:

[From the final report of the Select Committee on Committees (H. Rept. 96-866), Apr. 1, 1980]

MINORITY VIEWS OF HON. JAMES C. CLEVELAND, HON. FRANK HORTON, HON. BILL FRENZEL, HON. JIM LEACH AND HON. GERALD B. H. SOLOMON

INTRODUCTION

Early last Fall, the Select Committee on Committees mailed the first of two questionnaires in which we solicited our colleagues' views on general and particular aspects of the House committee system. About 200 Members responded.

The first part of the questionnaire consisted of a series of statements reflecting a range of attitudes toward committee reform. The responses we received seem now—as we near the end of our work—to have been especially significant.

77 percent of Members responding agreed that "The House committee system is in disarray and comprehensive revision of the system should be given high priority."

However, 86 percent of respondents felt that "Most Members would be more likely to accept a relatively few modest changes, rather than a comprehensive revision."

Nevertheless, 80 percent of respondents took the position that "Committee system revision is so necessary that it should be pursued even if Members see themselves adversely affected by specific jurisdictional or other changes."

And Members reaffirmed this conviction by disagreeing—14 percent to 86 percent—with the proposition that "Committee system revision should be limited to changes which do affect Members' positions or jurisdictions."

In light of what has happened since, how should one describe these judgments—prophetic, realistic, or cynical, or all three? In October, 1979, Members seemed to be telling us that committee system change was so necessary that the Select Committee should not be inhibited by the possibility that Members might reject more than modest changes. By April, 1980, as the committee passed its reporting deadline, not a single recommendation had been approved by the House, despite the fact those recommendations were hardly radical.

We must leave the final answer to the question to our colleagues.

In any event, the minority members of the Select Committee on Committees believes there may be considerable value in reflecting on the committee's experience over the past 11 months, drawing certain conclusions from that experience, and submitting some specific recommendations.

SELECT COMMITTEE PROPOSALS

Following is a brief summary of each of the Select Committee's five major recommendations, all of which were reported in accordance with the provisions of H. Res. 118 and were accompanied by written reports which have since been printed:

Reduction of Committee Scheduling Conflicts

The Select Committee recommended unanimously the adoption of a committee and subcommittee scheduling formula which would eliminate approximately 75% of the conflicts experienced by Members scheduled to attend meetings held at the same time. Such conflicts have made it increasingly difficult for committees and subcommittees to obtain and to hold the quorums necessary for the transaction of business.

The Select Committee's proposed formula, the product of intensive analysis of all committee and subcommittee meeting held in the 95th Congress, assigned to each of two groups of committees specific days on which they could meet for the purposes of marking up and reporting legislation and for transacting business. No restrictions were placed on committee hearings, and exclusive committees were not affected.

Following the unanimous approval of the Select Committee, the reported resolution (H. Res. 404) was granted a rule by the Rules Committee. To date, it has not been scheduled for consideration by the House, presumably because of opposition expressed by some committee chairmen.

We continue to believe that H. Res. 404 would achieve substantial benefits at a modest cost in inconvenience—a cost which would be further reduced, when necessary, by resort to a procedure for holding emergency meetings. Nevertheless, reduction of scheduling conflicts is so important that we believe consideration should be given by the Rules Committee to an adjustment in the proposed formula reducing the number of days on which committees are prohibited from meeting. A moderate adjustment, although it would reduce the impact of the committee's formula, would also preserve the principle of the recommendation and retain a substantial proportion of its benefit.

Limits on the Number of Subcommittees

The Select Committee recommended unanimously that all standing committees, except the Appropriations Committee, be limited to no more than six subcommittees. Over the next three Congresses, this recommendation would lead to the elimination of 28 of the present 155 subcommittees and similar sub-units.

Although the net effect would be modest, this recommendation would immediately arrest the continuing proliferation of House subcommittees, a trend which has fragmented the legislative and oversight processes and weakened the House committee system.

Limits on Members' Subcommittee Assignments

The Select Committee recommended that individual Members be limited to no more than five subcommittee assignments. For purposes of the limitation, subcommittees included all subunits of committees which are created for more than six months and counted assignments to select, joint, and ad hoc committees as one subcommittee assignment. The recommendation, over the next two Congresses, requires 91 incumbent Members to give up one or more subcommittee assignments.

Like its companion recommendation limiting the number of subcommittees, this recommendation would reverse a debilitating trend in the House by virtue of which many Members are stretched so thinly as to be unable to devote adequate attention to their committee responsibilities, and—conversely—many committees and subcommittees are forced to rely for active participation on a relatively few Members.

Under H. Res. 118, both recommendations were reported to the Democratic Caucus and the Republican Conference. Whereas the Republican Conference (and its Policy Committee) endorsed both recommendations shortly after they were reported, the Democratic Caucus has not yet acted on either.

We believe these twin recommendations, if adopted, may ultimately be considered

the most significant legacies of this Select Committee. In view of their importance and of the overwhelming support both objectives received from Members of both parties who responded to the Select Committee's surveys, we hope the Democratic Caucus will act expeditiously to approve and implement the recommendations.

Multiple Referral Reform

The Select Committee unanimously approved a comprehensive revision of the multiple referral system, including these major features:

On all joint referrals of legislation, one committee would be designated the primary committee.

Secondary committees in the referral would be required to report within a time certain after the primary Committee reported.

All sequential referrals would be subject to definite time limits.

Sequential referrals would be permitted when the reporting committee included amendments which invaded other committees' jurisdictions.

This proposal would reduce the substantial delays that characterize multiple referred bills and also assure committees the opportunity to consider legislation within their jurisdictions.

* * * * *

UNCOMPLETED WORK

Despite the high priority which attached to the five major proposals reported by the Select Committee, and in spite of the limited time that was available in which to complete our work, it is a cause of considerable disappointment to minority members that the Select Committee failed to consider additional issues of significance to the institution. At a minimum, we believe the committee should have devoted serious attention to the following subjects: equitable party ratios on committees and subcommittees, a ceiling or cap on committee staffs, improved oversight, legislation in appropriations bills, proxy voting, additional realignment of jurisdictions, minority staffing, and improved coordination of services provided committees by the legislative support agencies. Each of these subjects was accorded high priority by Members in the process of selecting issues for consideration, and considerable staff work was done on several of the topics, especially by minority staff.

Following is a synopsis of our views on each of these issues:

Ceiling On Committee Staffs

Professional staff positions for congressional committees were first established in the Legislative Reorganization Act of 1946. For nearly three decades thereafter, the growth in the size of committee staffs was relatively slow and manageable. However, during the past few years, the House—as well as the Senate—has witnessed an exponential increase in committee employment of unanticipated proportions. From 1973 to 1979, House committee staffs more than doubled in size. In 1973, House committees employed 918 committee personnel; by 1979, this figure reached 1,939. Similarly, the spending for committee staff evidenced an equally remarkable spurt—from $14 million in 1973 to over $40 million in 1979.

Several factors explain this committee staff explosion. First, the House desired to broaden its issue expertise to achieve a greater measure of independence from the executive bureaucracy. Second, the sheer complexity of contemporary issues demanded the acquisition of specialized and technical staff knowledge. Third, the proliferation of subcommittees necessitated the hiring of additional staff support.

When properly utilized, the growth of staff has assisted the House in asserting an effective leadership role in policy decisions. Nevertheless, the advantages of staff assistance has rapidly diminished with the recognition that the increase has been too fast, too large, and too inefficiently distributed. Committees now display their own staff bureaucracies which are often unwieldly, inbred, and self-perpetuating. Members, lacking the time to adequately supervise and control staff, often cede to staff the right to determine priorities and to set the legislative agenda.

Granted, the increase in committee staff represents only one aspect of a wider phenomenon. The size of Members' personal staffs and of congressional support agencies have evidences similar trends. However, the growth in committee staff appears, to date, uniquely uncontrollable. Although restrictions exist as to hiring of so-called "statutory" staff, "investigative" staff—which comprises the bulk of committee employees—is subject to few restraints.

We recommend that the House establish an overall limit on the size of committee staffs. Two years ago, the Congrees approved the Civil Service Reform Act which include a House-passed amendment establishing a limit on federal employment levels. If such a ceiling were deemed necessary for the executive branch, it appears that a limit for House committee staff would likewise be appropriate.

The House has benefited greatly from the dedication and knowledge of its committee staff. Yet this institution must recognize that continued, unchecked expansion will impede, rather than facilitate, the legislative process—and undermine, rather than heighten, the quality of staff assistance now available. The imposition of a staff ceiling would be a useful tool to counter the growing committee bureaucratization, to impose fiscal discipline, and to ensure the responsive nature of the House to constituency needs.

Minority Staffing

The issue of providing the minority party with adequate committee staff support has been a persistent topic on the congressional reform agenda. Twice in the last decade—during the debate on the Legislative Reorganization Act of 1970 and the Committee Reform Amendments of 1974—the House has adopted amendments stipulating that the minority be earmarked a one-third share of committee funding resolutions allocated for staff hire. Subsequently—in 1971 and 1975—the Democratic Caucus nullified the one-third minority staffing provisions.

The lack of sufficient committtee staff impedes the minority in the promotion of policy initiatives and the articulation of legislative alternatives. Presently, as stipulated in the House Rules, the minority is entitled to one-third of the statutory staff. Nonetheless, the vast majority of staff personnel is hired pursuant to committee funding resolutions where no such guidelines apply. The Bolling-Martin Select Committee revealed that in May 1973 only 16.7 percent of committee staff were assigned to the minority. A February 1979 study conducted by the Office of the Minority Leader revealed little improvement—only 18.7 percent of committee staff were assigned to the minority.

According to the Select Committee's first questionnaire, the House would be favorably inclined to incorporate a one-third-staffing provision in the Rules of the House. A majority of Democrats who responded endorsed such a proposal; among Republicans, there was near unanimity of support.

Understandably House Members, in the wake of the staff explosion during the last few years and its accompanying financial costs, are reluctant to approve any provision which might fuel a further staff expansion. Yet, the issue of staff growth and the issue of establishing standards for minority/majority staff allocations are uniquely separable items. Equitable minority staffing does not presume any escalation in staff growth. Rather, it would be a benefical complement not only to the capabilities of the minority party, but more importantly to the institution as a whole. It is a reform worthy of the House's attention.

Proxy Voting

Proxy voting is recognized not only as counterproductive to the day-to-day functioning of legislative business, but it is also a practice distinctively ill-suited to representative government.

When last confronted with a direct vote on this issue (during the floor debate on the Committee Reform Amendments of 1974), the House adopted an amendment banning proxy voting. Regrettably, this proscription was shortlived as the Democratic Caucus reinstituted the practice a few months later.

The defects of proxy voting are readily apparent. This procedure reinforces the haphazard, often chaotic, scheduling of committee and subcommittee meetings. The persistence of meeting conflicts tends to be tolerated as long as Members can conveniently rely on proxies; consequently, the allowance of proxies subverts meaningful attempts to institute an orderly framework of committee scheduling. Proxy voting also encourages absenteeism by dispelling any urgency for Members to appear personally in order to be recorded on committee votes.

Proxy voting—by permitting committee participation to be accorded a diminished priority—incurs a serious cost for the democratic process. By resorting to proxies, a Member forfeits the opportunity to engage directly in the dynamics of debate—one neither contributes to nor is influenced by, the arguments which may determine the final disposition of the amendments or measure under consideration. Policy decisions are therefore often formulated by a limited number of Members to whom, through proxies, other Representatives have ceded their rights of decision. Further, the occasional misvoting or misuse of proxies serves only to perpetuate the prevailing attitude of public cynicism towards legislative conduct.

Proxy voting is not permitted in votes on the House floor. It appears equally inappropriate in the initial stages of policy-making at the committee level. The incorporation, within the Rules of the House, of an outright prohibition of proxy voting would be a welcome reform.

* * * * *

Improved Oversight

There is ample evidence that marked dissatisfaction exists among House Members concerning the quality of the oversight produced by the House committees.

In its survey of Members' views, the Select Committee included a section on "strengthening oversight" and asked Members to categorize the degree of importance they assigned this task; high, medium, and low. Of

the Members who responded to this question 74 percent felt strongly about increasing oversight, while 4.9 percent gave it low priority. The canvass also revealed that 77 percent of the Members believed that committees were not doing an adequate job of oversight while only 15 percent felt that they were.

The great majority of responding Members also concurred that the following factors were chiefly responsible for poor oversight:

	Yes	No
Lack of committee determination	88	12
Inadequate committee planning	85	15
Failure to follow through on findings	86	14

House Rules currently require that all Standing Committees, except Appropriations and Budget, conduct oversight in their jurisdictions. Clause 2(c) of Rule X specifies that at the beginning of each Congress, the Government Operations Committee will "assist in coordinating all of the oversight activites of the House", and that within 60 days after the new Congress convenes the committee will submit a report to the House containing the results of its meetings with standing committees and its recommendations "to assure the most effective coordination of such (oversight) activities".

Most Members—and the Government Operations Committee (GOC) agrees—believe the committee's oversight coordination function is too limited and undefined to be effective.

In the last Congress, the GOC, reporting on its responsibilities under Rule X, noted that "intent has never been spelled out in any legislative history or in any directive" to the committee. It added that its function was only one of coordination and that the rule did not give it "any power to supervise other committees". It stressed that "if" the committees would examine the proposed oversight of sister committees, the rule's objectives could be met. (H. Rpt. No. 95-1815)

At the beginning of the 96th Congress, the GOC felt constrained to point out—after some committees had noted that it was impossible to delineate their oversight plans and others had submitted theirs "so late that there was no opportunity for GOC . . . to review them"—that it was "still not convinced" that, as presently structured, the oversight report function was a practical or effective solution to the problem. It added that "many of the other committees" also shared this conclusion.

A second problem which can be deducted from GOC's published oversight reports is that the standing committees themselves do not wish to have their oversight activities monitored.

A staff review of the oversight conducted by a number of subcommittees indicated that self-policing by committees of their own oversight role has led to serious abuse in the House during the 95th Congress as the following examples indicate.

One committee had three subcommittees which collectively held only 20 meetings of all types—including oversight—which consumed 1,572 minutes. Together, they expended 186 minutes or about 3 hours in oversight during the two-year span, 1977-78. Of these 3 subcommittees, one spent 47 minutes in oversight, and another, zero minutes. These subcommittees ranked 121st, 127th, and 128th, out of 130 subcommittees, in mimutes spent at meetings of all types.

Another committee had two subcommittees with workloads which clearly were not excessive. One subcommittee spent 20 hours or 1,200 minutes in meetings of all types during the 95th Congress, of which 152 minutes or about 2½ hours were expended on oversight. And even when its 85 minutes in "investigative" activities was added to its oversight ledger this would only increase its total to 4 hours or about half a day in two years for this task. At the end of the 95th Congress, it stated that it had "conducted 'review' on 23 matters", but its published data appeared to fall short of this figure by 11 "matters".

A second subcommittee of the standing committee, which was an investigative subcommittee, spent 965 minutes or 16 hours at all types of meetings, which ranked it 117th among 130 subcommittees in "minutes spent in sesssions". The oversight portion of meetings was 14.8 hours, or about one day per year for that Congress. Unaccounted for, was oversight or investigative performance on two, possibly three, topics slated for "review", as promised at the beginning of that Congress.

Another standing committee had 2 subcommittees which ranked 118th and 120th. One subcommittee spent 888 minutes in all meetings, or about one day in meeting time, including oversight, per year. Of the 888 minutes, only 282 minutes were spent in oversight; 2.2 hours in 1977, and 2.5 hours in 1978.

The second subcommittee spent 914 minutes at meetings for the 95th Congress, of which 269 were spent in oversight; 177 in 1977, and 92 in 1978. This subcommittee has oversight jurisdiction over a Federal program which spent over $25 billion during the 95th Congress. Yet, only about one-half day during a two-year span was spent overseeing this vast project.

The examples cited above are based on an examination of committee documents and the Select Committee data base which identify formal sessions only. Since informal oversight and investigative activities are not generally classified in Committee calendars these were not taken into account except insofar as they were listed by the Committees in Government Operations Committee's reports, or in their funding resolution reports to the House Administration Committee.

Overall, House oversight activities, for a disturbingly large number of Subcommittees, have fared poorly in relation to other activities, especially legislative. A mere tightening of committee reporting procedures, long overdue, or a clearer classification in House documents, of meetings in terms of their purposes, will not resolve the issue of committee accountability for oversight.

Since full committees, generally, cannot or will not impose upon their subcommittees enforceable standards for the performance of oversight, we believe it is incumbent upon the House to establish more effective procedures for assuring that oversight of Federal programs and activities is conducted in a more orderly, systematic, and coordinated manner. Specifically, we recommend that action on so-called "sunset" legislation, now pending before the Committee on Rules, be completed without undue delay and brought before the House for decision.

In addition—unless specific provisions of sunset legislation should make the following steps unnecessary—we believe improved oversight could be enhanced by:

Clarifying in the House rules the authority of the Committee on Government Operations to establish standards by which committees report their oversight plans and to coordinate more effectively the implementation of those plans; or, in the alternative, providing for a more appropriate means of improving such planning and coordination.

Developing specific procedures by which the Subcommittee on Accounts of the Committee on House Administration, in connection with its responsibility for committee funding resolutions, can hold committees accountable for the accomplishment of oversight activities for which they request funds—an objective in which the subcommittee has already demonstrated an active interest.

Equitable Committee Ratios

During most of the twentieth century, committee ratios have been determined by informal agreements negotiated between the majority and minority leaderships. Traditionally, the ratio of majority and minority representation has usually paralleled the party division in the full House.

Recent Congresses, however, have witnessed a growing disparity between the division of party strength in the full House and the ratios prescribed for House committees. By vote of the Democratic Caucus, ratio formulas were imposed in the 94th and 95th Congresses which significantly undercounted the minority in the allocation of committee seats.

In the 96th Congress, as of January 1980, the minority party was underrepresented by one or more seats on nine standing committees—and on approximately one-third of the over 150 standing subcommittees. Alternatively, on no standing committee (except for the evenly divided Committee on Standards of Official Conduct) and on only three subcommittees were House Republicans overrepresented.

These assignment practices substantially limit the effective participation of the minority at the primary level of legislative decision-making—committees and subcommittees. The ability of the minority to advance viewpoints, promote amendments, and implement reforms is impaired by the adoption of such inequitable ratios.

We believe that serious attention should be focused on this question. One alternative which has been offered—and which merits scrutiny—would be to incorporate in the Rules of the House the requirement that any allotment of committee seats reflect, to the closest degree possible, the proportional ratio of the parties in the House as a whole. Such a proposal might offer a neutral corrective to ensure that any minority party would be accorded fair treatment in committee allocations. Indeed, a similar recommendation was outlined by Minority Leader Gerald Ford in testimony before the Bolling-Martin Select Committee on Committees in 1973.

We submit that the question of committee ratios should not be read in partisan terms. Rather, equitable committee allocations are an assurance that committees fairly reflect and represent the substantive views of both parties in the process of policy deliberation.●

TOWARD BETTER DEFENSE BY CUTTING PENTAGON WASTE

HON. JOHN LeBOUTILLIER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. LeBOUTILLIER. Mr. Speaker, those of us in the Congress and in the public who support the President's efforts to eliminate wasteful Federal spending in domestic programs are often accused of failing to use the same scrutiny toward the Defense Department. I believe that the waste and fraud that does exist in the Pentagon budget should not be immune from the administration's efforts to promote fiscal responsibility and efficient, honest use of resources.

I wish to emphasize that Department of Defense cutbacks should not endanger the development of vital military hardware and personnel capabilities. By cutting waste from the Pentagon budget, we will allow the Defense Department to go forward with better utilization of resources so that the vital technological and manpower deficiencies can be corrected. To be free, we must be strong. To deter despotism, we must have the means to prevent its ugly occurrence.

The goal of the Reagan fiscal policy and those of us in Congress who support it is to get the massively expanding Federal budget into leaner shape. We are seeking to take sedentary and often wasteful Federal dollars and put them back into the marketplace so that they will be used to promote growth, employment, and income. To make those cuts that attack waste, all waste in all areas should be attacked. The Defense Department is not immune from this excision in the public interest.

Last February 18, President Reagan spoke to us here in Congress, as well as to a tensely watchful Nation about the "grim picture" which we face. With the clear-thinking intelligence and optimism that has marked his career, President Reagan stated that "it is within our power to change this picture." This is also true for getting our military posture back into shape. The best way to rebuild a strong military is to cut the areas of waste that are hindering this accomplishment.

The National Conservative Foundation (NCF) has compiled a $173 billion list of proposed areas for Federal slashing, including $25 billion from the Defense budget. Of course, not everyone will agree with the entire content of the NCF's plan, and I am not expressing my support for it either. However, I commend this group for its work upon proposals to reduce waste in the budget. The important thing, NCF believes, is to gain support for the idea that the budget can be cut. Their proposal has been designed to put as many of these suggestions as possible onto the agenda for consideration, in order to produce the greatest amount of savings for the American taxpayer.

While I support the President's budget submissions, I would like to point out that we who are critics of waste and fraud in the domestic budget are also cognizant of similar problems in the Defense budget. I would like to offer the NCF's Defense Department budget proposals for examination by my colleagues. I commend the NCF for a thorough investigatory project. Their guidance will help us to study ways to best fight wasteful Government spending while improving our defense capabilities. I present the NCF's proposed Defense Department reductions for the benefit of my colleagues.

DEPARTMENT OF DEFENSE

[In thousands of dollars]

MILITARY PERSONNEL	
Military compensation.—Savings achieved as follows: Rollback of last decades' overgrading ($1 billion); change to a salary system ($1.6 billion); elimination of unearned social security tax credit ($90 million). Should probably not view this as a net savings, but as major offsets against cost of selectively upgrading pay and benefits. (7)	2,690,000
Proposed military pay and benefit increases.—Target hikes to achieve proper personnel mix; savings compare with unfocused, universal increases in salaries and benefits. (7)	3,000,000
Army.—Eliminate personnel slots retained after support functions have been transferred, as recommended by GAO. (4)	25,000
Air Force.—Reduce active duty personnel requirements for strategic airlift crews, as recommended by GAO. (4)	105,000
National Guard—Army.—Eliminate undeserved payments to reserve guardists for drills not attended. (4)	744
Program-wide.—Incorporate various cost-reducing measures, new clothing allowance methodology, overseas housing allowance, civilian substitutes, assigned to recreation and welfare activities, accelerated discharges for adverse reasons, and other GAO recommended reductions. (4)	259,300
Program-wide.—Dual pay for Reservists who are Federal employees.—End practice of paying both civilian and military wages. Most private sector reservists are allowed only to receive the greater of the two. (7)	375,000
Retired military personnel—Double dipping.—Retired military collect two government checks by staying on federal payroles as civilians. Double dipping should be phased out and 20-year military retirement should be ended. (6)	1,000,000
OPERATIONS AND MAINTENANCE	
Cuts may be made in the following areas:	
Military commissaries and exchanges.—The taxpayers should not have to subsidize this unnecessary fringe benefit. Commissaries and exchanges should cover their own operational costs. (6)	710,000
Military recreational facilities.—The Defense Department maintains golf courses, boating marinas, stables, etc. for the morale and recreation of military personnel. The DOD needs to examine the availability of local recreational facilities or methods of raising money through fees to offset the cost of these expensive facilites. (6)	301,000
Pentagon's "Top Brass" Dining Rooms.—It is unnecessary and frivolous to subsidize food prices for top military personnel. Ending this practice would demonstate the Defense Department's commitment to ending wasteful spending. (6)	2,000
Military servants.—The practice of using enlisted men as servants for military officers is an outrageous waste of military manpower and tax dollars. If officers really need maids and gardeners, they should hire them. (6)	4,500
Army.—Improve efficiency in general, utilize excess available parts in lieu of repairing broken ones, consolidate finance and accounting centers of Military Traffic Management command, eliminate fraud and mismanagement in the Military District of Washington Finance and Accounting Office, improve property controls, and other measures advocated by GAO. (4)	589,081
Marine Corps.—Reduce the overlap between Marine logistics functions and reliance on other defense integrated logistics managers. (4)	7,500
Air Force.—Improve efficiency and cut waste, eliminate second (supplementary) computer system at bases used for administrative purposes only, improve inventory management at logistics centers, centralize aircraft component repair service—all GAO recommendations. (4)	1,094,000
Defense agencies.—Eliminate erroneous CHAMPUS claims. (4)	12,000
Air Force Reserve.—Improve logistics management, according to GAO recommendations. (4)	278,700
National Board for the Promotion of Rifle Practice.—Eliminates this inappropriate Government activity of marksmanship training and contests. The Defense Department itself selected the Board for termination when it conducted its own zero-based budget review. (4,6)	500

Current configuration of military bases.—Unneeded military bases should be closed and other facilities consolidated in order to achieve desirable economies of scale provided that they do not significantly reduce strategic capabilities. (7) 1,000,000

Program-wide.—Cuts costs by standardizing aircraft ground service equipment and DOD software computer systems. (4) ... 312,870

PROCUREMENT

Shipbuilding and conversion.—Improve management of shipbuilding contracts and reduce costs of hydrofoil missile ships, according to GAO. (4) 774,961

Defense agencies.—Improve inventory management in Defense Logistics Agency medical supply system, according to GAO recommendations. (4) 10,000

Other procurement.—Eliminate delays in definitizing Army and Navy letter contracts, consolidate Defense Contract Administration service management areas (Cincinnati and Dayton, Ohio), and minimize questionable split award and survivor awards—all GAO recommendations. (4) 8,410

Department-wide.—A reserve carryover amount is listed each year as unobligated balance, which is available to be expended the succeeding year. Many program costs can be funded from this account but there has been a trend toward building this reserve amount instead of expending it, with the result that the unobligated balance grows larger each year (with few exceptions); eliminate the excess (end of fiscal year 1981 less end of fiscal year 1980) of unobligated balance available at the end of fiscal year 1981. This will not affect obligated but unexpended funds. (4) 2,405,099

Weapons systems acquisition procedures.—Encourage competition and cost control in weapon systems acquisition. (7) 5,000,000

Premature commitment to unproven weapon systems.—Greater use of test results should be encouraged. (7) 131,000

Cost-sharing arrangements with military partners.—Existing military cost-sharing arrangements are unrealistic and place an unreasonably heavy burden on U.S. resources. (7) ..... 5,000,000 ●

GOVERNMENT: NOT A KLUTZ

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. LaFALCE. Mr. Speaker, I have become increasingly concerned by a growing tendency to conclude that the Federal Government is a rogue elephant which is out of control and unable to accomplish anything in a positive manner.

There is universal agreement that spending should be more tightly controlled, but as we approach that important goal, we must remember that the Federal Government can be an effective force for achieving national goals. Without Federal assistance, much of the Sun Belt would still be a desert, lacking adequate water supplies. Without Federal assistance, malnutrition would still be a serious nationwide phenomenon. Without Federal assistance, American agriculture would not be the most productive in the world.

Big government is not necessarily bad, if it is efficient; and that is the important question. Federal programs that promote economic growth, protect the national security, and enhance living standards should be preserved. Federal programs which are inefficient, wasteful, or overly expensive should be pared; but government per se is not the enemy. Fortunately, George F. Will has made this important point in an article in the March 26 edition of the Washington Post. The article is entitled "Government: Not a Klutz," and I hope that all of my colleagues will remember its central message from a conservative commentator.

The article follows:

GOVERNMENT: NOT A KLUTZ

(By George F. Will)

Beneath the flesh of political rhetoric there usually is a skeleton of principle. Today there is a dangerous principle—dangerous to conservative objectives, among other things—within some conservative rhetoric. This point was brought to mind by a recent episode in the Senate Budget Committee.

The committee, like the Senate itself, only even more so, contains a lot of people whose principal experience with the federal government consisted, until recently, of deploring it from afar. Fifty-four of today's 100 senators have served less than five years, and half of the 12 Republicans on the budget committee came to the Senate less than four months ago.

On March 19, the committee was sweeping like a scythe through the budget. Suddenly, Mark Andrews of North Dakota, a Republican rookie zealous about pruning government, reached the limit of his zeal. He did not like a Reagan administration idea—a "snake" he called it—for diminishing federal support for rural electrification.

Of the 12 budget committee Republicans, the closest thing to an easterner is Dan Quayle of Indiana. The rest are from North Dakota, New Mexico, Colorado, Wisconsin, Minnesota, Kansas, Washington, Utah, Texas, Iowa and Idaho. Not surprisingly, urban programs have been criticized with special severity. So when Andrews, joined by others, waxed affectionate about a rural program, Daniel Patrick Moynihan (D-N.Y.) would have been forgiven if he had delivered a lecture about sauce for the goose being sauce for the gander. Instead, Moynihan lectured (some sort of lecture was inevitable, and called for) on the good that government does.

He said that if the committee was going to have a consensus (and eventually it was unanimous in endorsing cuts larger than Reagan sought), it must refrain from rhetoric about all government being "somehow bad." Then he said, in effect: Huzzah for the Rural Electrification Administration, which helped better the lives of millions, especially in the Great Plains and Deep South. It was proposed, he noted, by a president from New York (Franklin Roosevelt).

Warming to his theme (Moynihan warms to all his themes), he said, in effect: Behold the Imperial Valley of California. Let us now praise government's role in the most striking transformation of the valley since (Moynihan takes the long view) "the receding of the Ice Age." Only God can make an artichoke, but it took government to make the valley into such a splendiferous garden. Specifically, it took the Bureau of Reclamation, proposed by a president from—ahem—New York (Teddy Roosevelt).

"We can agree about the budget," Moynihan said. "But we would ask not to be required, in reducing this budget, to repudiate a tradition of intelligent involvement by American government in the problems of American society."

A reasonable request, that.

Although the vast majority of the proposed budget cuts are sensible, and all are arguable, there has crept into some advocacy of them a tone that is unworthy of, and dangerous for, the Reagan administration. It is a tone of dogmatic disparagement of government. It suggests that all cuts are morally easy because government cannot do anything right anyway.

If this conservative administration is to do its most important duty, then eventually—perhaps soon—it must enlist the public's support for strenous, complex exertions regarding the larger world. This will involve not only procuring complex, expensive military assets, such as the MX missile, but also attempting to change the policies, and perhaps the governments, of nations like Cuba and Libya. At that point, this conservative administration may learn the cost of supporters who labor at infecting the public with indiscriminate skepticism about the competence, even the motives, of government.

This administration may reasonably decide to summon the nation for (figuratively speaking) a charge up some San Juan Hill. But its bugle call may be met by the stony skepticism of a nation that has taken to heart what some conservatives say about government being incorrigibly incompetent. Such skepticism cannot be sealed into one compartment of the public mind; it tends to seep. You cannot tell people over and over that government is a klutz that cannot help Cleveland, and then suddenly say: Oh by the way give the government $1.3 trillion for military assets, and support its attempt to do something about Cuba.

Earlier in this century, some conservatives achieved a kind of consistency. They advocated a domestic policy of minimal government, and a foreign policy of isolationism. Today that is not an acceptable consistency for conservatism.●

WHY WE SHOULD NOT BUILD THE MX

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 31, 1981

● Mr. BEDELL. Mr. Speaker, I wish to call my colleagues' attention to an article by Admiral Stansfield Turner in this past Sunday's New York Times Magazine. The article is entitled, "Why We Should Not Build the MX." It is cogently written, yet void of technical jargon that has made the MX debate difficult for the general public to understand.

As my colleagues are aware, in June 1979, President Carter announced full-scale development of the MX missile. Later that year, the Carter administration committed itself to the so-called multiple protective shelter (MPS) basin mode. Admiral Turner is now the first Cabinet-level officer from the Carter years to publicly proclaim opposition to the MX/MPS system.

Admiral Turner is particularly well-placed to judge the efficacy of the current MX deployment scheme. As former CIA Director, he is fully aware of the nature of the Soviet threat; as a career senior naval officer, he is familiar with the alternative weapon systems for meeting that threat.

In assessing the Soviet threat, Admiral Turner identifies three objectives: First, increasing our ability to destroy hardened targets; second, lessening the vulnerability of our ICBM's to surprise attack; and third, changing the perception of the balance in our favor. He then details how the present MX plan fails to meet these objectives without prohibitive liabilities such as: its destabilizing effect as an offensive weapon; the potential response of an overwhelming Soviet buildup; and the likelihood that, given the rapid pace of technology, the MX/MPS will be obsolete before its completion.

Admiral Turner does believe there are excellent alternatives * * * The best would be a diverse mix of systems, all of which would be more mobile than the MX and could be deployed in much larger numbers. The admiral warns, however, that there is little time left to reverse the momentum of the MX. A dramatic commitment * * * will be needed to accomplish such a reversal, and the key word is commitment. I call on my colleagues to make this commitment.

The text of the article follows:

[From the New York Times Magazine, Mar. 29, 1981]

WHY WE SHOULDN'T BUILD THE MX

(By Stansfield Turner)

The changing balance of strategic nuclear forces between the United States and the Soviet Union has in the last few years been a major focus of attention for the American intelligence community. Until the late 1960's, the United States was militarily stronger than the Soviet Union by virtue of its superior nuclear arsenal. We felt secure. The Soviets didn't, and they set out to correct the imbalance. The result has been that in the last several years all of the best studies have shown that the balance of strategic nuclear capabilities has been tipping in favor of the Soviet Union. It is not easy for the layman to gather enough information to make a judgment, but a careful study of the evidence shows that we do deserve to be worried. Even if the perception that there has been a change in the balance were, to some extent, overstated, that perception itself could damage the position, authority and role of the United States in world affairs. The perception as well as the fact must be redressed so that the Soviet Union sees no advantage in using its nuclear arsenal against us.

The Carter Administration recognized this imbalance and developed an ambitious plan to build a mammoth new intercontinental ballistic missile system known as the MX (for "missile experimental"). Congress has provided initial financing, and already major contractors from California to Massachusetts are plunging ahead—building test sites and hiring designers and workers. Some 10,000 workers are already involved.

I believe the MX project as presently conceived is a serious mistake.

The official estimates of the total cost of the MX run from the Air Force's $34 billion to the General Accounting Office's $56 billion. Each missile will weigh 95 tons, two and a half times more than our most current intercontinental ballistic missile (ICBM)—the Minuteman III—and will carry 10 separate warheads. To construct a base for it will require, according to some estimates, 40 percent of the country's total cement production for three years, and more dirt will have to be moved and more land sequestered than for the Panama Canal. It will require the building of perhaps 10,000 miles of roads (the entire Federal Interstate System of highways is only 42,500 miles long).

MX is also a new concept in ICBM's. Our present Minuteman ICBM's are loaded in fixed, underground silos of concrete, reinforced to help them withstand nuclear attack. MX, in contrast, will be semimobile. Twenty-three shelters, about a mile apart, are to be built for each MX. Each of the 200 missiles will ride on a 201-foot-long transporter-launcher, weighing more than a million pounds, over the special highways from one of its 23 shelters to another. The Russians would be forced into a kind of shell game if they considered an attack on our ICBM's; each MX would force them to worry about 23 targets rather than just one. The United States strategic strength—strategic strength, in this context, refers to the major powers' centrally controlled nuclear forces, which are targeted against each other—is built on three legs known as the TRIAD. Each leg represents a weapons system that is launched differently: one from land bases, the second from airplanes and the third from submarines. Each leg presents the Soviet Union with a different problem should it decide to attack. While it might be able to cripple one leg, the inability to knock out all three should deter the Soviet Union from attacking at all.

The MX specifically strengthens the land—that is, the ICBM—leg. This leg is important because the size of the warheads and the accuracy of the missiles make it the most powerful part of our strategic arsenal. It is quickly responsive to a decision to launch, because the missiles can be maintained in a constant state of readiness and we have reliable, instantaneous, secure communications to them. It provides minimum warning of attack to the Soviet military, because the time from launch in the United States to detonation over the Soviet Union would be only about 30 minutes.

The other legs of the TRIAD have different virtues. Submarine-launched ballistic missiles (SLBM's) provide greater assurance than either of the other weapons systems that they will survive a surprise attack. Submarines can be constantly moving and they are virtually impossible to find in broad ocean areas. Bombers can carry a large number of weapons, so they provide great destructive potential and, because the bombers themselves can be called back before they actually launch their missiles, this leg of the TRIAD is the most flexible.

Most authorities agree that today the land-launched ICBM's, our Minuteman missiles, are the most vulnerable of our strategic forces because their location is fixed, making them easy targets. But is the MX the best replacement? To answer, one must closely examine not only the magnitude and cost of the whole project but also whether the MX will be suitable in 1989 or 1990, when it is expected to be operational. President Reagan expressed some skepticism during the election campaign. And Secretary of Defense Caspar W. Weinberger, since assuming office, has indicated that he wants to look at the alternatives, though he recently appointed a 15-member panel—whose chairman is the Nobel Prize-winning physicist Dr. Charles Townes of the University of California at Berkeley—to study how and where the MX system will be based.

The undertaking is so central to our national security that it is important that doubts about it be resolved.

First, what do we mean when we say that the balance of strategic nuclear forces is tipping against us? How is that balance measured? One quantitative measure is the number of weapons the United States and the Soviet Union each has. Here, America is clearly ahead: We can attack more individual targets than the Russians can. Another measure is the ability to inflict damage. Here the Soviet Union is well ahead. With fewer but more powerful weapons, they outdistance the United States in both of the two usual measures of destructiveness: ability to destroy cities and ability to destroy missile silos.

Two facts should be noted, however. First, both the United States and the Soviet Union possess overkill. Without building another single weapon, both countries can destroy each other's cities several times over. Second, because the total urban area of America is more than twice the size of that in the Soviet Union, the Soviet Union needs twice the capacity to destroy cities that we need to cause the same relative damage. Considering these two factors, there is no need for us to generate more city-destroying potential just to match the Soviet Union.

On the other hand, the Soviets hold both an absolute lead in total number of ICBM's and a relative lead in the ability to destroy missiles that are housed in hardened silos. This advantage reflects first, the fact that there are 400 to 500 fewer ICBM targets in the United States than in the Soviet Union. Second, it reflects a basic trend in strategic warfare. Improvements in weapon accuracy are more than offsetting any efforts to

harden the silos. This is particularly the case for the Soviet Union, whose weapons have always had a very large destructive power and now are becoming more accurate. Direct hits can destroy even hardened silos. Accordingly, the United States land-based ICBM force in silos is very vulnerable, and that is the driving factor in our perception that the strategic balance is tipping against us.

We could do two things to right this imbalance. We could increase our ability to attack hardened targets in the Soviet Union and we could make our ICBM forces less vulnerable. But whatever we do, it must not only correct the actual imbalance of capability; it must also correct the perception of imbalance. It must be made clear in the minds of Soviet officials as well as other world leaders that the Soviet Union does not have an edge on the United States in strategic nuclear strength. A major step in doing that is to create the impression that the United States is seriously committed to improving our strategic forces, even if in reality some of the actions we take will contribute only to overkill. Changing the world's perception that we are falling behind the Soviet Union is as important as not falling behind in fact. Deterrence is the key goal of strategic nuclear forces, and what will or will not deter a nuclear attack is sometimes more psychological than quantifiable.

In summary, we should aim toward three objectives; (1) increasing our ability to destroy hardened targets; (2) lessening the vulnerability of our ICBM's to surprise attack, and (3) changing the perception of the balance in our favor.

The MX would, indeed, meet these objectives. It is designed to hit hard targets. It is less vulnerable than Minuteman because each missile can shuttle among the 23 alternative launching shelters rather than sit in one fixed silo. And, proceeding with the most expensive public-works program ever contemplated would certainly give an impression that America was serious about restoring the strategic balance.

But the MX has significant liabilities. One is the response it can be expected to draw from the Soviet Union. The current plan is to put 200 MX missiles in place and to build 4,600 shelters. If we presume that the Soviet Union will want to be able to knock out essentially all MX missiles with a surprise attack—as it could our present 1,000 Minuteman ICBM's—it would need 4,600 more warheads than are required now for Minuteman. Could the Soviet Union deploy another 4,600 warheads? Yes, easily, even under the limitations of the proposed strategic arms limitations treaty (SALT II). The United States would not, of course, stand still if the Soviet Union deployed more warheads. It would probably deploy more MX's and build more shelters. Then the Soviet Union would probably build still more warheads. Where would it all stop? The added warheads would pose no problem for the Soviet Union. Its very large SS-18 ICBM, for instance, carries 10 warheads. The missile is so designed that it could accommodate more than twice as many. Although each warhead would be smaller, it would still have more than enough explosive power to destroy an MX shelter. It would also cost less for Moscow to proliferate warheads on existing missiles than for us to keep deploying more and more MX's. The only constraining factor is the SALT II treaty, which sets a maximum of 10 warheads per ICBM. If the Russians believed they needed to add more than 4,600 warheads for insurance—and it is not unreasonable for them to suppose that some would miss the targets—either they would abandon the SALT II constraint or they would demand a high price for its continuation, perhaps restrictions on the size and shape of our MX deployment.

The United States could defend the MX with an antiballistic missile system (ABM). But this would sacrifice the 1972 ABM Treaty, one of the most successful efforts to control the nuclear arms race. It would also cost us more to build ABM's than it would cost the Soviet Union, in turn, to attack them. In short, it would be very difficult to use the MX to offset the existing Soviet advantage in hard-target kill capability, and probably our ICBM's would remain as vulnerable after MX as before. Hence, strategic instability would remain.

Stability is a function not only of the number, size and survivability of weapons, but of other characteristics as well. The more threatening a weapon is, the more nervous it makes a potential adversary and the more destabilizing it becomes. A high-accuracy ICBM is a destabilizing weapon because it can be launched on short notice, because it has a short flight time and therefore gives little warning and because it can destroy even hardened targets like ICBM silos. ICBM's like Minuteman and MX are at the most destabilizing end of the weapons spectrum because they combine all of these characteristics. Most other systems have some but not all. Thus building the MX, rather than stabilizing the strategic balance, would probably destabilize it further.

Weapons at the other end of the spectrum, such as shorter-range missiles carried by bombers—missiles which cannot be launched until their planes (relatively slow-moving and detectable by enemy radar) get close enough to their targets—give the enemy more time to reflect and react. Submarine-launched intercontinental missiles are also less threatening; though they have even shorter times of flight than land-based ICBM's, they do not possess the accuracy for direct hits needed to destroy hardened-concrete ICBM silos. Thus, neither bomber nor submarine missiles require hair-trigger response, and therefore they tend to stabilize the strategic balance. It is the ICBM's more than any other strategic-weapons system that make the other side feel that it must be prepared to launch its own ICBM's as soon as it realizes that an attack is coming. The greater the doubts a country has about the survivability of its ICBM's, the more it is driven to be ready to launch its weapons on the first indication that an attack is on the way. This feeling that hair-trigger responsiveness is necessary contributes dangerously to instability, therefore is perhaps the single most important quality to eliminate from the design of a weapons system.

The United States could avoid the risk that the Soviet Union's military response to the MX would both offset its effectiveness and lead to more dangerous instability by simply canceling the project. But just deciding not to build the MX would also be a serious mistake. It is essential that the United States make a commitment to some clearly defined program lest the nation permit the strategic imbalance to worsen, or allow the perception that it is indecisive to undermine what it finally decides to do. It should cancel the MX only under two conditions: that it does something else instead; and that whatever it does will meet its strategic objectives.

There are excellent alternatives to the MX. The best would be a diverse mix of systems, all of which would be more mobile than the MX and could be deployed in much larger numbers. Both the mobility and the large quantity of these systems would make them very difficult for the Soviets to attack with confidence.

Intercontinental cruise missiles on a variety of launching platforms would be one ingredient in the mix. A cruise missile is relatively small—some the size of a torpedo; it is self-guiding and flies in the atmosphere, whereas the much larger ICBM is shot out into space before it returns to its target. Modern technology will permit the United States to place cruise missiles in small packages and to give them even greater accuracy and penetrability than ICBM's. Other ingredients of the mix would be land-mobile ICBM's and the existing SLBM's on submarines. The United States ought to develop a small, road-mobile ICBM, just as the Soviet Union has already done (the SS-16). Ours could be deployed in the remote areas of Alaska, for example. It could even be disguised in large trucking vans and moved around the United States at random. This same ICBM could be placed on ships and carried in aircraft as well. The one essential is that we use the technology we now have to build our new ICBM small and light enough to be carried in these alternative vehicles. The MX is too large and heavy for any of them. At the very least, the MX should be scaled down so that we could deploy it in more ways than just in fixed shelters. It is, literally, a case of smaller is not only cheaper but also better.

This mix of more mobile systems also lessens vulnerability better than the MX. The less mobile the system, the more vulnerable. The fixed ICBM is the most vulnerable strategic system. It cannot move and it is difficult to hide from modern reconnaissance systems. Next to the fixed ICBM, the semi-fixed MX is the most vulnerable. It can move, but only between fixed shelters whose positions are well known to the Soviet Union.

Certainly, each of the more mobile systems I have mentioned may become more vulnerable over time, but there is no reason to believe that any will become more vulnerable than the MX. Submarines may become more easily detectable, but they still can move rapidly and continuously, and their location cannot be predicted in advance. Cruise missiles may become more vulnerable to improved air defenses, but they can hide with Stealth techniques—the means of making them less visible to radar—and can attack in numbers that would saturate defenses. On the other hand, the probability is very low that the MX can withstand the progess of technology, as ways to thwart ICBM's are devised, during the next several decades, either by destroying them before they are launched, intercepting them en route or diverting them. If we buy MX to lessen vulnerability, we are in reality taking the smallest of steps toward reduced vulnerability. We are doing so with a system so large, so cumbersome and so expensive that should technology make it obsolete before it is completed—a very likely possibility—we will still be committed to it for decades.

The MX may also fail to achieve the third objective—that is, correcting public perception, demonstrating a new momentum toward righting the strategic balance. In our democratic society, environmental and political activists may well delay the MX deployment, limit its size, or even prevent its

development entirely. If we proclaim publicly that the MX is to be our solution to the changing strategic balance and then cannot follow through with an adequate deployment, we will have demonstrated that we are incapable of doing so. How much greater will the corrective measures have to be then to overcome that negative perception?

The final issue is whether a mix of more mobile strategic forces would meet national objectives better than the MX. I believe it would.

One of the arguments for continued reliance on ICBM's is that we need to preserve the concept of a triad of strategic forces (ICBM's, bombers and submarines). I agree that we cannot rely entirely on one type of weapon lest some counter to it be developed. I agree, too, that we do not want to depend excessively on one form of basing lest it become especially vulnerable. But diversity in these areas should come from a careful mix of the least vulnerable systems that we can devise, not by retaining the existing mix no matter what common sense tells us. The proposed set of mobile systems would be a far healthier and more diversified mix. Diversity would come from the different forms of basing—land, sea and air; from the different kinds of attack—from atmospheric and from outer space; from the different techniques for concealment—submerged in water, mobile on land and sea and dispersed in large numbers over wide areas; and from widely separated approach corridors for attack so that defenses could not be concentrated easily.

One argument against greater reliance on mobile systems is that they, too, can be made vulnerable: Either the Russians could simply create a blast over sizable areas of the United States to destroy unhardened mobile systems; or American ships with mobile systems could be trailed. This is certainly true, as almost any weapons system can be made vulnerable at a cost. The point here, however, is relative vulnerability. The effort to counter a large number of mobile systems would be much more substantial, and hence less certain of success, than to offset the semifixed MX system.

Another argument for heavy reliance on ICBM's is that we need the capability to respond quickly to a Soviet nuclear-missile attack and to retain our readiness and ability to wage war. Nuclear-warfare theorists hypothesize that the Russians may attack a small number of our ICBM silos to test us and then suggest that we concede because trading blows further would only lead to mutual suicide. Is it reasonable that Moscow would take this incredible risk? Not very. It would be tempted to start down this very dangerous route only if it was convinced that the United States would cave in and not automatically launch a countering missile force at the first warning of the Soviet attack. However, the argument continues, if the Russians were this bold, the Americans would, in fact, have to be able to respond quickly with a carefully limited number of land-based ICBM's. This would enable the United States to prove that it has no intention of caving in, yet, at the same time, permit it to stop short of igniting nuclear holocaust. It is essentially this argument that has led to the extraordinary effort to perpetuate the land-based ICBM by creating a new model that is survivable—the MX.

But the premise is flawed. Timing is not so urgent that mobile ICBM's and even various cruise missiles would not do tolerably well for limited responses. SLBM's would do very well also. More important, no American President should take solace in his being able to respond to a limited attack by the Soviet Union with a limited counterattack of his own. If the Russians were bold enough to start this frightening game, would they let their bluff be called by a response in kind? The decision of an American President to respond to a limited attack with a limited counterattack would be infinitely easier to make then to respond with an all-out attack. And it would not demonstrate enough resolve to persuade Moscow that we could not eventually be bluffed into capitualation. Instead, the Soviet Union would be likely to turn the nuclear ratchet another notch with still another round of limited attacks. Where would it end?

A problem with these theoretical arguments is their unreality. They attempt to translate the principles of conventional warfare into strategic nuclear warfare. This cannot be done. We should not treat strategic nuclear forces as though they were just another military force with which nations may fight. There is great danger in the emerging belief that we can calculate our need for strategic weapons in similar terms to artillery for an army—that is, that the side with more can endure longer and therefore is stronger. Traditionally, nations that estimated they were weaker for these kinds of reasons have been capable of being pressured into making political concessions to avoid war. The premise is sometimes invalid in conventional warfare; it is always invalid when applied to strategic nuclear forces. And operating on the basis of that premise could be fatal.

Endurance may be a reasonable quality when it comes to artillery. After all, an artillery shell is lethal over only tens of yards. One can hardly imagine running out of targets. The lethality of nuclear weapons is measured in tens of miles. With the quantities of nuclear weapons both superpowers now possess, both sides could run out of meaningful targets rather quickly. There would be so much destruction that the result of war with such weapons cannot be measured. As long as we can destroy the other's civilization several times over, even after receiving a first strike, what meaning does further destruction have? Endurance is simply not a reasonable measure of strategic power. What need is there to attempt to gauge who will "win"? No one will win. In short, as long as we possess the excess quantities of assured retaliation capability that we do today, we need not concede one iota to the Soviet Union because of some theoretical calculation about which side would endure longer; nor need we bother with the calculation of how we would look after a total exchange.

A new strategic program that is a mix of cruise missiles, mobile ICBM's on land and sea, and Stealth aircraft is, of course, not without its own risks. The primary one is the proliferation of weapons and launchers that would be needed to insure invulnerability. The facts of life, however, are that uncontrolled proliferation of cruise missiles and mobile ICBM's probably lies ahead in any event. This is a conclusion that became evident in our close examination of the verifiability of the SALT II treaty. Controls on the deployment of cruise missiles were placed in the protocol to the treaty. That was deliberate because the protocol expires at the end of this year. At the expiration of the protocol, cruise-missile development and deployment would be almost unregulated by SALT II even if the proposed treaty were enacted by the Senate. That is the way the United States wants it. The cruise missile is simply too important to us. Once the genie is out of the bottle and cruise-missile systems are fully developed, it will be very difficult to monitor their number and location. Imagine attempting to monitor whether the torpedo tubes of a submarine hold cruise missiles or torpedoes! What this means, then, is that future strategic arms-control agreements will not be able to limit the total number of weapons and warheads. There will still be good reason to control such items as ICBM's and submarines, whose numbers can be verified. But any hope of limiting total destructiveness is slipping past us.

With the proliferation of weapons goes another risk—especially if we attempt to place them on lots of ships, aircraft, simulated moving vans, etc. Each such weapon is necessarily under less stringent control, and is more susceptible to usage by some mad official or to theft by terrorists. These are risks inherent in all nuclear weaponry to some extent, but there are sophisticated technologies for preventing unauthorized firing or even tampering. In addition, an accidental firing would be less likely to stimulate an instantaneous and sizable response, because its retaliatory capability would be widely dispersed, neither side feeling that the consequences of an accidental attack would be fatal.

As a world, we are going to continue to live in what has been labeled "a delicate balance of terror" for the indefinite future. Our task should be to make that balance as indelicate as possible. The MX would move us in the direction of greater instability. But we now have the opportunity to move, instead, to a mix of systems that would create incentives for both sides to ease away from an arms race in first-strike, quick-response weaponry; one that would lessen the threat to the Soviet Union and would lessen its capability to strike at us first, since there would be few targets that could be attacked. In time, the Russians would have to move in a direction similar to ours. They could not risk having to sit with most of their strategic force in fixed ICBM's because theirs, like ours, will become increasingly vulnerable with time.

To insure this, we may well decide to improve the accuracy of our submarine-launched missiles so that they would have the capability of destroying hard targets. This would, of course, run counter to the general thrust I am suggesting that we eventually move away from systems capable of a surprise first strike against ICBM's. It would, however, be a pressure on the Soviet Union to move away from its reliance on ICBM's and to more mobile systems. Because submarine systems are viewed as the least vulnerable force, and hence are reserved for the unexpected, and because communications to submarines are less reliable than to other systems, they are less threatening than ICBM's. In sum, mutual moves toward mobile systems would visibly return the strategic balance to a state of more stable parity even though the threat of a first strike against ICBM's would not be eliminated entirely.

There is little time left to reverse the momentum of the MX. A dramatic commitment by the new Administration will be needed to accomplish such a reversal, and the key word is "commitment." There are great vested and parochial interests in the military and in industry that are intent upon going ahead with the project. But the

United States cannot let such interests dictate the course of its security, and, indeed, the security of the world. A new program is needed to correct the strategic imbalance—to the extent that it does exist—but, especially, to correct the perception that the United States itself has generated that it is falling behind. Thus, a prompt but thorough review of where the MX may be taking us, as well as what alternatives there are to the MX, is crucial to America's long-term security.●

HOUSE OF REPRESENTATIVES—*Wednesday, April 1, 1981*

The House met at 3 p.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Gracious God, we are conscious that You have breathed into every person the breath of life at creation, help us so to live that we will cherish and protect the rights of every person, that we will so conduct ourselves that our good actions will contribute to the health of our Nation. Enable us so to grow in maturity that we will respect and value those traditions other than our own, and so learn to rejoice in all the varied and bountiful gifts of Your kingdom. May Your peace that passes all understanding be with us and all those in need this day and every day. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 182. Joint resolution to designate April 26, 1981, as "National Recognition Day for Veterans Day for Veterans of the Vietnam Era."

The message also announced that the Senate had passed a bill and a joint resolution of the following titles, in which the concurrence of the House is requested:

S. 840. An act to continue in effect any authority provided under the Department of Justice Appropriation Authorization Act, Fiscal Year 1980, for a certain period; and

S.J. Res. 20. Joint resolution to designate the month of April 1981 as "Gospel Music Month."

The message also announced that the Vice President, pursuant to section 9355(a) of title 10, United States Code, appointed Mr. STEVENS, Mr. GOLDWATER, Mr. JOHNSTON, and Mr. HART to be members, on the part of the Senate, of the Board of Visitors to the U.S. Air Force Academy.

The message also announced that the President pro tempore, pursuant to Public Law 94-118, appointed Mr. ROTH to be a member, on the part of the Senate, of the Japan-United States Friendship Commission.

The message also announced that the Vice President, pursuant to section 4355(a) of title 10, United States Code, appointed Mr. WEICKER, Mr. D'AMATO, Mr. INOUYE, and Mr. NUNN to be members, on the part of the Senate, of the Board of Visitors to the U.S. Military Academy.

The message also announced that the Vice President, pursuant to section 6968(a) of title 10, United States Code, appointed Mr. MCCLURE, Mr. JEPSEN, Mr. HOLLINGS, and Mr. SARBANES to be members, on the part of the Senate, of the Board of Visitors to the U.S. Naval Academy.

REPORT ON RESOLUTION TO AUTHORIZE REPRINTING OF REPORT ENTITLED "INTERNATIONAL INFORMATION FLOW: FORGING A NEW FRAMEWORK"

Mr. GAYDOS, from the Committee on House Administration, submitted a privileged report (Rept. No. 97-18) on the resolution (H. Res. 97) to authorize the reprinting of the report entitled "International Information Flow: Forging a New Framework," which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION APPROVING PRINTING OF ADDITIONAL COPIES OF REPORT ACCOMPANYING THE FIRST CONCURRENT RESOLUTION ON THE BUDGET FOR FISCAL YEAR 1982

Mr. GAYDOS, from the Committee on House Administration, submitted a privileged report (Rept. No. 97-19) on the resolution (H. Res. 105) approving the printing of additional copies of the report accompanying the first concurrent resolution on the budget for fiscal year 1982, which was referred to the House Calendar and ordered to be printed.

A PLEA FOR GUN CONTROL

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, the shooting of President Reagan on Monday leaves us all groping for words. I share the shock and anger which all Americans felt upon learning of still another senseless, violent act. On my own behalf and that of my constituents, I want to extend to the President and the others wounded my deepest wish for a full and speedy recovery.

Mr. Speaker, violence has forced itself on our attention far too often in recent years, Dallas, Memphis, Los Angeles, New York City, Washington, Sacramento, San Francisco, Atlanta, and now Washington again have been the scenes of assassinations, attempts, and gruesome murders of ordinary citizens.

We must band together and stop it in the most effective possible way: With gun control and with strong penalties for the illegal possession and use of firearms. Perhaps that way something positive can be gained from this most recent tragedy.

FINANCIAL AID FOR STUDENTS

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PEYSER. Mr. Speaker, yesterday was the first day since March 4, that I have not discussed the problems and the crisis in financial aid for students. Yesterday I discussed briefly the introduction of a new handgun control bill following the terrible events of Monday when the attempted assassination took place.

Today, however, Mr. Speaker, I am entering into the RECORD a letter from the University of Pittsburgh, from Congressman COYNE's district, the University of Wisconsin, from Congressman KASTENMEIER's district, and the University of Santa Clara, from Congressman MCCLORY's district.

Once again, Mr. Speaker, they point out the real tragedy that will take place if financial aid programs are cut for students, as the administration is now recommending. There is no safety net for them. It means that we are going to have one-half million to 1 million students leaving school and coming onto the employment market, where there just are not any jobs.

The letters are as follows:

UNIVERSITY OF PITTSBURGH,
Pittsburgh, Pa., March 17, 1981.

DEAR CONGRESSMAN PEYSER: Enclosed for your information is a financial aid study prepared by the University's Office of Admissions which analyzes the impact of federal support on student aid at the University. The proposed reductions in these student aid programs advanced by the Reagan Administration would, in our opinion, cause a negative affect to the legislative intent of Title IV of the Higher Education Act and adversely affect access to our students at the undergraduate and graduate levels.

It has also come to our attention that the Administration, in advancing these changes, has initiated for discussion a number of compromises which, if implemented, could adversely affect postsecondary public institutions such as ours. On such proposal is a family income cap on the BEOG program of some $25 to $30,000. The purpose, in this instance, would be to restrict students from families whose incomes go beyond this ceiling from BEOG support. Supposedly this cap would be sufficient to insure access for students attending public institutions. On the other hand, the Administration is proposing a "needs analysis" for the Guaranteed Student Loan program which would favor students in private, postsecondary institutions where tuitions are higher, hence a greater need.

I am hopeful that in your deliberations of the changes in the appropriations and authorizations for these programs that you will keep in mind our special interest. If after reviewing the data you have any further questions, please feel free to contact me.

Sincerely,

LOUIS A. TRONZO,
Assistant Vice Chancellor.

UNIVERSITY OF WISCONSIN
CENTER SYSTEM,
Madison, Wis., March 19, 1981.

CONGRESSMAN PETER A. PEYSER,
Cannon House Office Building,
Washington, D.C.

DEAR CONGRESSMAN PEYSER: I was delighted to receive your letter wherein you indicated the fact that the new Administration in Washington has identified the area of student loans as one of its prime targets to attack in order to help balance the budget. Cuts are sought in the loan program for middle income families, as well as Basic Opportunity Grants.

You may rest assured of the fact that I shall do everything possible, working closely with our campus Deans, students, staff, and constituencies to play an active role in seeking to assist you in those strategies aimed at thwarting the new Administration's assault on this segment of the higher education budget. I appreciate your giving me this opportunity to let you know how I feel about this situation and how, if actually carried out by the Administration, some of the proposed cuts and/or changes would very adversely affect the University of Wisconsin Center System students as well as this institution itself.

The University of Wisconsin Center System comprises 14 two-year liberal arts campuses which provide transfer credits toward a four-year degree. Naturally, we place a very high value on access, as our campuses have been situated so as to provide for an opportunity for students to begin their educational careers with the advantage that local access provides. This accessibility would be severely hampered by some of the proposals made by the Administration.

At present, based upon an analysis undertaken in our Financial Aids Office, 52% of our aid recipients are above the traditional college entry age group of 18-20 year olds. For the most part, these constituencies have been working or are working while attending school, and therefore do not qualify well for the Basic Grant and other federal and state grant and work-study programs. To make the Guaranteed Student Loan Program need-based would severely reduce the ability of these students to receive any aid for college. These older students are not very likely to be able to live within budgets established for purposes of determining eligibility for the need-based programs. Putting the G.S.L. Program on a need basis would likely cut these students off from their program of last resort.

We are also very concerned about the attempt to knock out the in-school interest subsidy of the G.S.L. Program. Wisconsin residents tend to take their loan obligations very seriously as evidenced by the fact that our default rate in the G.S.L. Program is more than 5% less than the national average of 16%. There is already a strong resistance to taking out loans among our students and they really do tend to look at the G.S.L. Program as a last resort. Cutting the in-school interest subsidy would make drastic differences in not only the amount of money to be paid back—up to $2,700 more on a $10,000 loan—but also on the way our students perceive the loans, especially in the more rural areas. These constituents have a healthy fear of indebtedness, and I am afraid that the increase in interest charged to students as proposed by the Administration will most certainly have an oppressive effect on the educational ambitions of those of our students who have the least amount of access to educational opportunities.

We are also deeply concerned that the Administration's proposals to control expenditures in the Basic Grant Program could seriously hamper the attainment of the goals of that program. By reducing the amount of grant assistance available to the poorest students, we would be forcing these students to rely even more heavily on the G.S.L. Program. Many students who already have only a very tenuous grip on their aspirations will not be well served if they are asked to increase their burdens.

The retention of non-traditional, minority, and poor students will inevitably become more and more difficult under the Administration's proposals. A complete reversal of the intentions of the 1980 Education Amendments in such a few short months would appear impossible anywhere but in the light of today's economic and political climate. I don't think we can afford to lose sight of the long-term goals we have worked to further, in the field of educational opportunities, in the face of these very recent and vigorous attempts at budget cutting. These proposed project cuts are all the more fearsome for their precipitate nature. No one has been able to adequately evaluate the possible damage that could accrue from these proposals.

This brings up my last point. We in education must, of necessity, plan any changes well in advance, and we are already well past the point at which we should have available all pertinent information regarding next fall's programs. The processing of Basic Grant applications has been indefinitely postponed as have Guaranteed Student Loans in the State of Wisconsin pending the outcome of these legislative battles. The apprehension of many students and potential students is already quite evident; damage has already been done and a speedy resolution of these issues, at least for fiscal 1982, is necessary if it is to be kept to a minimum.

I am well aware of the critical nature of deliberations which are currently being undertaken by the Federal Congress. I am also aware of the fact that Dr. Ernest Boyer, President of the Carnegie Foundation for the Advancement of Teaching, was quoted last week in the March 9th edition of the Higher Education Daily as having said the following . . . "Higher education now faces the greatest challenge [to its commitment to equity and diversity in higher education] it has faced in 20 years. . . . The future of higher education in this country is controlled on Capitol Hill . . . The Reagan Administration proposals for tailoring Guaranteed Student Loans and Pell Grants to the extremely needy could cause tremendous numbers of students to drop out of college . . . Or there could be a 'major realignment to the tune of 15% to 20% of current enrollment' from more expensive schools to less costly colleges. . . . Literally hundreds of colleges and universities could be put out of business overnight if student aid cuts are approved."

I am also aware of the fact that higher education is in trouble on other fronts too with regard to financial aids. For example, it's my understanding that college students may not even get their Pell Grants on time next year if the Administration and Congress can't agree soon on who is eligible for grants and how much money they should get. This reminds one of the nightmare which occurred in 1978 when, according to Dallas Martin, Executive Director of the National Association of Student Financial Aids Administrators, processing was not completed until September and students jammed the phone lines of the then-Office of Education. He also stressed the fact that nationwide 250,000 students or ten times as many as usual simply never resubmitted aid applications. We just simply cannot endure that kind of fiasco—in the midst of everything else that's swirling around us as far as economic deprivation is concerned.

It is critical that the Administration's efforts associated with the cuts in the financial aids programs cited above be prevented. I appreciate your commitment to this task and will support you in your efforts as associated with same.

I thank you for this opportunity to let you know of my opinions on these matters. I appreciate your past and continued support on these very crucial issues.

Sincerely,

EDWARD FORT,
Chancellor.

THE UNIVERSITY OF SANTA CLARA,
California, March 19, 1981.

Hon. PETER A. PEYSER,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN PEYSER: I am writing to express my appreciation for your recent letter and for your opposition to the sweeping cuts in student financial aid that have been proposed by the Reagan administration. These reductions, as well as changes in eligibility criteria, would make it impossible for many middle-income families to participate in federal student aid programs.

Our Director of Student Financial Services has carefully studied the potential impact of proposed changes in the Guaranteed Student Loan, National Direct Student Loan, Pell Grant, and Social Security programs. He estimates that close to 25 percent of all our students at Santa Clara could be directly affected, and that they could lose as much as $1.8 million in federal financial aid in 1981-82.

On the basis of current information, we believe the cuts would affect Santa Clara in the following ways next year:

Program	Students affected	Dollar reductions
Guaranteed loans	502	$1,574,527
Direct loans	61	84,402
Pell grants	101	69,695
Social security	189	73,757
Total	853	1,802,381

Cuts of this magnitude would clearly have an adverse effect on the ability of private institutions like the University of Santa Clara to compete with state-supported institutions. Such cuts would also impose an unfair burden on students who are independent of parental support and on parents of dependent college-age children.

While I applaud the Reagan administration's efforts to tighten the federal belt, I do not believe that major cuts in student financial aid are conducive to the health of private education or to the training of America's future leaders.

I appreciate your support of adequate federal funding for student financial aid and would be happy to provide further information or assistance to you on this critical issue.

Sincerely,

WILLIAM J. REWAK, S.J.,
President.

RIGHT TO LIFE

(Mr. WILLIAM J. COYNE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILLIAM J. COYNE. Mr. Speaker, the recent act of violence on the streets of the Nation's Capital directed at the Chief Executive is appalling.

The Congress is confronted, once again, with acts of violence which are directed against the life of another human being.

Individuals who take to the well to advocate the right to bear arms, a questionable right indeed, would be well advised to reexamine their priorities. I think that a human life is far more important and that life is far more sacred than the right of a citizen to carry a handgun. And, granting for the sake of discussion that there is a right to bear arms, that right is bestowed by society and this body when confronted by two conflicting rights, can only choose the higher—the right to life—and move to protect that right by enacting legislation that would stem the flow of handguns.

It seems to me that we must control the instruments of violence that are so readily accessible to those among us who have no respect for life.

I think that now is the time to confront the issue of violence, and to control the handguns which are too easily available.

CLEAN AIR ACT DEADLINE EXTENSION

(Mr. O'BRIEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. O'BRIEN. Mr. Speaker, last week the Subcommittee on Health and Environment of the Committee on Energy and Commerce held hearings on legislation—H.R. 1817, a bill that would give the steel industry a 3-year extension of the Clean Air Act deadlines if modernization of facilities is undertaken.

The proposal enjoys the support of House Energy Chairman DINGELL and would allow steel companies to obtain case-by-case extensions of the act's 1982 compliance deadline. The legislation is supported by labor, management, and the environmentalists, and the administration has endorsed the concept. While no firm plans for the House to mark up this legislation have been made to date, in the Senate committee, Chairman STAFFORD has scheduled a markup on the identical companion proposal, S. 63, for April 2, 1981, at 10 a.m.

I hope that the House will act quickly on this legislation before its effectiveness is lost and the backbone industry of the United States becomes paralyzed.

STRONGER DEFENSE FOR AMERICA

(Mr. COLLINS of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COLLINS of Texas. Mr. Speaker, peace necessitates a balance of power between the United States and the Soviet Union. Yet, throughout two decades of neglect, the United States has watched the Soviet Union tip the balance of power strongly in their favor. We must regain a strong defense posture to insure peace in the world.

Awesome defense buildups by the Soviet Union during the 1960's put the statistics in Russia's favor. Additionally, during the 1970's, the United States decreased defense spending, while the Kremlin surged further ahead. Statistics for 1980 show the Soviets spending $175 billion for defense, compared to $115 billion by the United States. The trend is expected to continue with Russian military expenditures rising 4 to 5 percent per year.

The Soviet Union has more to spend on weapons because manpower receives lower salaries. A breakdown of our defense dollar shows 50 percent in the United States going toward wages, compared to 20 percent for salaries by the U.S.S.R. The remainder of our defense dollar shows 15 cents spent for non-manpower-related operations and maintenance, with the remaining third split between procurement, research and development, and military construction. The Soviet Union's Armed Forces are nearly double American military forces—4.1 million Soviet conscripts compared to 2 million U.S. volunteers.

Conditions in our Armed Forces paint a grim picture. When it comes to readiness, the United States is suffering. Look at the following statistics:

Only 4 of our 10 U.S.-based Army divisions are battle ready.

Seven of the thirteen U.S. giant aircraft carriers are unable to pass inspection.

U.S. Reserves are lacking 600,000 volunteers.

The Air Force could only put aloft 24 wings of tactical aircraft, when 26 is the minimum essential for reasonable assurance of success in wartime.

The Army has approximately 45,000 officers less than it needs.

For the 3-year period from 1977 to 1980, the Soviet Union outbuilt the United States by a yearly margin of 2,000 to 650 in tanks, 500 to 275 in warplanes, 350 to 150 in helicopters, 6 to 3 in attack submarines, and 5,000 to 1,000 in other combat vehicles. Equally disturbing are 1980 figures showing the disproportionate defense ratio between the superpowers. Look at the following chart:

1980 STATISTICAL SUMMARY

Category	United States	U.S.S.R.,
Tanks and carriers	28,242	88,660
Artillery	5,142	20,550
ICBM's (intercontinental ballistic missiles	1,052	1,247
SLBM's (submarine-launched ballistic missiles	576	969
Tactical and strategic aircraft:		
Strategic bombers	376	190
Theater bombers	252	960
Fighters	2,667	3,725
Reconnaissance and surveillance	293	615

The Soviet Union outstrips the United States in ICBM's and SLBM's. Presently, the power of the Soviet ICBM force exceeds that of the United States by at least 300 percent. The United States does have more strategic bombers—376 to 190, yet our bomber fleet consists of aging B-52's, many dating back to the 1950's.

The United States, long considered superior in naval capability, is losing status to the Russians rapidly, with statistics for 1980 showing them boosting naval spending by 25 percent. While Soviet sea power rose sharply during the last decade, the United States declined from 900 ships to a present level of 460. Yet, the U.S.S.R. still has 800 ships. The Soviets are also in the lead with 289 major surface ships to our 173, and 263 Russian attack submarines to America's 84.

Our military weakness has encouraged Russia's aggressiveness. To start moving in the right direction, the administration has requested a supplemental defense appropriation of $6.8 billion for fiscal year 1981 and $25.8 billion for fiscal year 1982. This represents an increase of 4 percent and 13 percent over the Carter budget. We still maintain a technological advantage over the Soviet Union, and in-

creased funding for defense should enable us to begin restoring the balance of power necessary for peace. Let us move swiftly then, to insure peace for all Americans and the world.

PRESIDENT CANNOT BE ISOLATED

(Mr. BAILEY of Missouri asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BAILEY of Missouri. Mr. Speaker, I was deeply shocked and saddened by the attack on President Reagan, Jim Brady, Agent McCarthy, and Officer Delahanty on Monday. That anyone should be the victim of a crime of violence in this Nation is a tragedy. That one of those victims is the President of the United States is a double tragedy. Not only is it a personal tragedy for the President, his family, and the American public, but it is also a national tragedy as the result can only be to further isolate the President from the people he represents.

Some of my colleagues said yesterday that had this, that, or their gun control bill been enacted, the tragic attack on March 30 would not have occurred. I know that emotions are running high, but calm and commonsense must prevail. Gun controls do not lessen crimes of violence nor would they reduce the vulnerability of our President and other public officials to acts of a deranged mentality. The only way to minimize such vulnerability is to surround the President with a bunker mentality and enclose him in an impenetrable protective bubble. No President will agree to such isolation. But the event of March 30 will result in greater Presidential security, more guards, and regrettably less access for the people of this Nation to their President. This is the lasting tragedy of Monday's attack and robs each of us of a bit of the specialness and uniqueness of our representative democracy.

We can be very thankful today that President Reagan, a remarkable man, is well on the road to a remarkable recovery. We are thankful that Jim Brady, whose insight, wit, and intelligence has become so much a part of this administration, is holding his own against great odds. And, we are thankful that Secret Service man Tim McCarthy and the District of Columbia policeman Thomas Delahanty, two brave and dedicated men, are today recovering from their grave wounds.

So today, let us set aside recriminations and emotional debates on what may have led to Monday's tragedy, and simply be thankful these fine men are alive. And finally, let us give thanksgiving that in this time of national crisis, our Government functioned and functioned well.

THE RIGHT TO BEAR ARMS

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Mr. Speaker, a few minutes ago I heard one of our colleagues take the floor and talk about the questionable right of American citizens to bear arms.

Mr. Speaker, I do not think that any right that appears in the Constitution of the United States is a questionable right at all. Mr. Speaker, I think perhaps if this Congress were to enact a Federal law implementing or reinstating the death penalty for murderers such as the assassination attempts on our President, I think that perhaps if we were to go ahead and televise some of those executions, I think we would have less tragedies like this appearing in the United States.

PROTECT THOSE WHO PROTECT US

(Mr. YOUNG of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. YOUNG of Florida. Mr. Speaker, Monday I watched with the rest of the Nation as Washington police officer Thomas Delahanty and Secret Service Agent Timothy McCarthy were gunned down as they attempted to protect our President and his press secretary Jim Brady.

Less than 2 weeks ago, my constituent, St. Petersburg police officer Terry Myers, had a similar brush with death while performing his duties. At the conclusion of my remarks, I will include a St. Petersburg Independent news story, written by reporter Bill Heltzel, describing that incident.

The shocking fact, Mr. Speaker, is that 165 law enforcement officers are assaulted every day; 17 of every 100 officers, a total of 60,000, including 445 of my constituents in Pinellas County, Fla., were assaulted in the line of duty last year. Firefighters are just as vulnerable to these acts of violence. An average of 150 are injured annually as a result of personal assault.

To deter individuals from assaulting the brave men and women who risk their lives to protect us, on February 24 I introduced H.R. 2069 to make it a Federal offense to assault, strike, wound, or discharge a firearm or explosive at any law enforcement officer or firefighter during the course of their official duties.

With this law, we can see to it that fewer of these brave men and women who protect us will be hurt this year. Expedient action on H.R. 2069 will be a powerful message to those who would assault officers responsible for our protection.

The newspaper article follows:

[From the St. Petersburg Evening Independent, Mar. 22, 1981]

MAN DIES IN SHOOTOUT—POLICE OFFICER SHOT AT, SAVED BY VEST-BADGE

(By Bill Heltzel)

A convicted murderer on parole shot at a St. Petersburg police officer six times, hitting him once in the chest, and was killed when the officer returned fire, after a high-speed chase this morning.

A high-caliber bullet pierced a nylon jacket but officer Terry Myers, 26, escaped serious injury when the bullet was stopped by his police badge and a bullet-proof vest. The bullet grazed the police emblem on the jacket, near the officer's heart, and dented the tin badge.

The gunman, Alex Smith Jr., 37, of 2240 Queen St. S, died an hour later at Bayfront Medical Center.

Here's how Sgt. John Long described the confrontation:

Shortly before 2 a.m., Myers followed a Cadillac driving north on 34th Street S near Fifth Avenue when he noticed the car swerving.

The car turned east on Fifth Avenue and ran a red light at Fifth Avenue and 31st Street, Myers turned on his red lights and radioed that he was pursuing the car.

The Cadillac accelerated, driving up to 70 miles an hour. It crossed the intersection of Fifth Avenue and 22nd Street, jumped a curb, hit an elevated manhole and came to rest under Interstate 275.

Myers pulled in behind the Cadillac and approached the car, with his 38-caliber police special drawn, ordering the driver and two passengers out.

One passenger got out and Myers ordered him to the ground. The driver, Alex Smith, slid over to get out on the passenger side, but as he did so, he drew a 357-magnum revolver and shot Myers in the chest from four feet away.

The impact of the bullet spun Myers against the Cadillac, but he was able to return fire once or twice. "He knew immediately that he was hit but he also knew he had a flak-jacket on," Long said.

Smith continued to point the gun at Myers, then ran southwest, firing his gun as he ran, emptying it of all six bullets. Myers again returned fire and emptied his six-shot revolver. He radioed for help and then chased Smith.

Backup officers swarmed to the area and officer Leonard Leedy tracked Smith with a K-9 dog. The dog found Smith lying on the ground, still conscious, behind New Covenant First Baptist Church, 1625 Sixth Ave. S. A 357-magnum was found a few feet away.

Smith was shot three times in the lower stomach. Long said he made no statement to officers. Paramedics worked on Smith and he was taken to Bayfront Medical Center, where he died at 3:15 a.m.

Myers was treated and released from Bayfront Medical Center. His neck was scratched, possibly by a bullet fragment, and Long said he was probably bruised on his chest.

The two passengers in the Cadillac got away.

Myers, a three-year veteran of the police department, was wearing a Second Chance bullet-resistant vest. If he had not been wearing the vest, the bullet would probably have pierced his badge and seriously injured him, Long said.

Smith was convicted in 1964 of assault with intent to commit manslaughter in the

shooting of Isiah Lawrence. He was sentenced to 10 years in prison. Also in 1964 he was found innocent of killing Richard Nero, the brother of Horace Nero, a St. Petersburg police sergeant. At the time of his arrest in 1964, he was wanted in Georgia on three counts of attempted first-degree murder in connection with 1963 shootings.

In October 1965 Smith escaped from the Belle Glade State Prison Farm. He was later caught. Police records indicate that he escaped from the Florida State Prison at Raiford in July 1966. He was paroled in March 1979.

□ 1515

CERTAIN JUSTICE DEPARTMENT AUTHORIZATIONS EXPIRE APRIL 5, 1981

(Mr. McCLORY asked and was given permission to address the House for 1 minute and revise and extend his remarks.)

Mr. McCLORY. Mr. Speaker, last year, the Committee on the Judiciary, on which I serve as the ranking minority member, favorably reported a bill to authorize appropriations for, and certain activities of, the Department of Justice during fiscal year 1981. Despite the fact that we requested and received a rule in timely fashion, the leadership never scheduled the bill for consideration by this body. As a result, just days before the beginning of that fiscal year, this body approved a bill continuing the authorization provided for in the fiscal year 1980 act until April 5, 1981.

Mr. Speaker, I urge the leadership to consult its calendar. April 5 is just around the corner. If there is no further action by this body, before we adjourn tomorrow, the authority for many crucial activities of the Justice Department will lapse. Yesterday, many of us participated in a special order on the Atlanta tragedy, during which Federal assistance to that beleaguered city was praised. Prior to the administration's recent announcement, some Members of this body even introduced legislation to provide financial assistance for this investigation. Regrettably, some of the activities currently being performed by the FBI there will be among the activities that will cease on April 5, unless we act responsibly and promptly, like the other body did last night.

The Committee on the Judiciary is currently hard at work on the Department of Justice authorization for fiscal year 1982. I realize that some may have reservations about certain individual items that have been requested and I am confident that we will be able to resolve these matters at the appropriate time. At this moment, however, Mr. Speaker, we should turn our attention to the immediate problem of lapsing authority for crucial activities conducted by the Justice Department.

APPOINTMENT AS MEMBERS OF NATIONAL COMMISSION ON STUDENT FINANCIAL ASSISTANCE

The SPEAKER. Pursuant to section 451(a) of Public Law 96-374, the Chair appoints as members of the National Commission on Student Financial Assistance the following Members on the part of the House: Mr. OBEY of Wisconsin; and Mr. BAILEY of Missouri;

And the following from private life: Mr. John Brademas, New York, N.Y.; and Mr. Kenneth Ryder, Boston, Mass.

GENERAL LEAVE

Mr. MOTTL. Mr. Speaker, I ask unanimous consent that all Members be permitted to extend their remarks and to include therein extraneous material on the subject of the special order speech today by the gentleman from Hawaii (Mr. HEFTEL).

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

POSTAGE-FREE ABSENTEE BALLOT

The SPEAKER. Under a previous order of the House, the gentleman from Iowa (Mr. TAUKE) is recognized for 5 minutes.

● Mr. TAUKE. Mr. Speaker, today I reintroduced legislation originally offered in the 96th Congress to make the mailing of absentee ballots postage free in all local, State, and Federal elections, thus ending the last vestige of the poll tax.

Article I, section 2, of the U.S. Constitution gives the American people the right to choose their Representatives. However, an examination of recent voter turnout evokes deep concern about our failures to live up to that constitutional mandate. As Representatives, we know it would be far more accurate to say that we are chosen by a relatively small group of voters.

In the congressional elections of 1974 and 1978, only about 36 percent of the voting age population went to the polls. These two off year elections set records—for the lowest midterm turnout marks since the wartime campaign of 1942. The most recent Presidential election figures are not much better. Only 54 percent of the voting age population participated in the 1980 election—higher than the 1976 election, but, nevertheless, a disappointing figure. Generally speaking, the U.S. voter participation record is worse than that of any other Western democracy.

The reasons for our poor voting record are complex. They range from legal and administrative obstacles to downright apathy. There is little we can do about apathy, but we can eliminate some of the remaining administrative obstacles.

It should be noted that the Federal Government has responded in a similar way to voting problems experienced by selected groups of American citizens. Congress has already passed legislation enabling military and merchant marine personnel and other citizens residing outside the country to use postage free absentee ballot materials during election times. The remaining American voters, however, have not experienced similar treatment under the law. Present postage requirements discourage voting by a great number of citizens including the poor, the sick, the elderly, or those traveling on business, who are often unable to make it to the polls. Making the mailing of absentee ballots postage free would remove one small obstacle to voting by these members of the electorate.

The limited absentee ballot figures available show that absentee ballots account for about 5.75 percent of all votes cast—up from 2 percent in the 1920's. That means that well over 4 million people voted by absentee ballot in the 1980 Presidential election. It is evident that the mobile nature of our modern society is taking many more potential voters away from home on election day. By removing the postage requirement, we would give many of the eligible voters a greater voice in community, State, and National affairs.

The objective of my legislation is to encourage voter participation by those members of society who are unable to vote at the polls on election day.●

BILL TO ESTABLISH A NEW ENGLAND POWER AUTHORITY

The SPEAKER. Under a previous order of the House, the gentlewoman from Rhode Island (Mrs. SCHNEIDER) is recognized for 5 minutes.

Mrs. SCHNEIDER. Mr. Speaker, today I am introducing legislation to establish a New England Regional Power Planning and Distribution Authority. This bill will fulfill a long-standing need for energy coordination in our most energy-poor region.

As you know, New England is at the end of the energy supply pipeline. It has little developed resources of its own. Currently, its energy mix is 80 percent dependent on oil—and fully 87 percent of this imported. This is especially poignant when considering that the United States as a whole is only 15 percent dependent on imported oil.

Yet New England is one of the few regions of the country which does not have a regional power planning authority. Do we really need a planning authority? We do if we want to decrease our regional dependence on for-

eign oil. We do if we want to reduce our per capita energy costs—in New England, businesses and individuals pay almost one-fourth again what the Nation as a whole pays for power. But New England must address these serious problems by examining what is reasonably available to it: Indigenous resources such as solar, wind, conservation, low-head hydro, and others as well as reasonably reliable imported energy from outside New England, such as natural gas, coal, and hydropower. It is asbsolutely vital that New England develop an energy mix that will not leave it vulnerable should one or more sources be placed in jeopardy.

It is for this reason that I am introducing legislation to establish a power authority for the six-State region. The Authority would have three principal purposes.

First, to develop a long range energy plan for the New England region; second, to provide for maximum development of indigenous resources; and third, to provide coordination for any necessary importation of hydropower, natural gas, or other power into New England.

The bill provides for a 12-member Authority within the Department of Energy. The members would be appointed by the President after receiving two nominations from each Governor. The members would elect an executive director to manage the Authority.

The Authority would be required, as soon as practicable after enactment of the legislation, to formulate a regional energy plan for New England. The Authority must receive public imput and must hold public hearings within each of the six States before adoption of the plan. The plan must take into account various alternative resources and must examine the cost effectiveness of each. It must include an energy power forecast, and estimate of the amount of power necessary to meet projected demand, and a system for prioritizing available energy resources.

Additionally, the Authority will have the power to raise capital through the sale of revenue bonds in order to rebuild hydropower plants in Canada and to import hydropower and natural gas into the region as required.

It is important to clearly note that this Authority is meant to supplement, not supplant, the power of the New England States, the utilities, and the other interest which have contributed to solving New England's energy problems. It has no regulatory power and is specifically prohibited from preempting any State or local law or regulation respecting the sale of electric power. It would not own transmission lines, generating capacity, or other capital equipment or property. It is meant to bring coordination in planning for a reliable energy future by allowing for longer range forecasting rather than waiting for the next shortage or embargo.

But where are the teeth in this proposal? How will the Authority implement its plan? Mr. Speaker, any long-range, well-planned, cost-efficient energy arrangement will stand in stark contrast to the present situation. To take advantage of the Authority's resources, recipients of developed power need only follow the plan. Certainly, the energy future of New England is critical—and only a well coordinated approach can succeed. I sincerely urge my colleagues' support for this legislation.

THE BUFFALO LABOR SURPLUS AREA DEMONSTRATION OUTREACH PROGRAM

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 30 minutes.

● Mr. LAFALCE. Mr. Speaker, in recent years the citizens of this country have become increasingly concerned about the level of effectiveness of many Federal programs.

Everyone in this Chamber is well aware of any number of programs undertaken by the Government which have been most notable for their lack of success.

It is therefore a pleasure to come before this distinguished body today to discuss a Federal program that has already produced substantial results and may very well become a prototype for similar efforts throughout the country.

The program I wish to call your attention to is the labor surplus area demonstration outreach program—LSADOP—which I was able to secure for the city of Buffalo through a funding grant from the Small Business Administration in the spring of 1980. The program was conceived as a means by which capable and interested small and disadvantaged businesses could gain access to Federal procurement opportunities.

During the past year this outreach program to the Buffalo area small business community has developed both a training program in Federal procurement regulations and procedures and program credibility in the small business community and in the Federal procurement community.

The record is clear that this program has become a viable tool for economic development in the Buffalo area. Equally important, it has increased the level of competition on Federal procurement controls.

Now with the establishment of the 1-year-test program targeting defense contracts to labor surplus areas by the Defense Logistics Agency, the LSADOP will be able to provide the small business community in Buffalo with the expertise necessary to participate in this $3.4 billion preference program. This test procurement targeting program is designed to help promote private sector economic development in distressed communities. With the assistance of the LSADOP, the Buffalo area will be in an excellent position to participate in this program. The procurement conference on April 6 will help acquaint the Buffalo area small business community with the tremendous potential of this Defense Department targeting program.

As you all know the $3.4 billion targeting program is a compromise which resulted from our most recent efforts to remove the Maybank amendment from the defense appropriations bill this past fall.

As one who has been deeply involved in the development of the labor surplus area programs through the hearings I have conducted as subcommittee chairman in the Small Business Committee and in the construction of the legislative proposals on this issue, I must say that I am greatly pleased at the sight of the results that have begun to accrue both nationally and in the Buffalo area.

Bringing more Defense Department contracts to the Buffalo area is critical. Defense contracts mean more business and more jobs, just what western New York needs at this moment. We need them for the simple reason that the industrial heartland, which Buffalo is an integral part of, has been losing jobs and capital and people for a long time.

And even when the country's problems are resolved, the prospects are that this decline will still be underway. If the area's key industries—automobiles, steel, and metalworking—are ultimately restored to health, the chances are that a very sizable number of jobs will have disappeared, perhaps as many as one-fourth. This makes efforts like the Buffalo Procurement Conference even more important as we strive to create new business opportunities that bring new jobs, new capital and new life to the Buffalo area.

I do not want to belabor the point, but we must recognize the problem the Buffalo region faces and the extent of the effort needed to solve it. Repeal of the Maybank amendment is a part of that effort. Let me cite a few facts:

The Northeast-Midwest region lost over three-quarters of a million manufacturing jobs in the period 1970–80;

Throughout the Northeast-Midwest regions, unemployment is well above the national average;

Between 1975 and 1979, the 18 States of the Northeast and Midwest sent $165 billion more in taxes to Washington than they received in Federal spending; and

During the past 9 years, Defense Department employment in the region has been reduced by 30 percent.

The contrast between the Northeast-Midwest region and the rest of the country is truly startling. As one economic analyst has written:

One could make a case, taking only slight license, that the recessions of the 1970s were largely confined to the New England, Midwest, and Great Lakes states. Between September 1974, and June 1975, for example, when national total non-agricultural employment declined by 2.5 percent, employment in the Southwest and Rocky Mountain states actually grew, and in the Far West the decline was negligible. In the initial stage of the recovery, employment grew by 5.16 percent for the nation. However, employment continued to decline in the Midwest states and grew by less than 1 percent in New England. (Janet Rothenberg Pack, "Frostbelt and Sunbelt" in Intergovernment Perspective, Fall 1978. p.14)

In this connection it is noteworthy that:

More than 90 percent of the Nation's population growth between 1970 and 1980 occurred outside the Northeast-Midwest region;

The Census Bureau projects that the population of the South and West may grow at four times the rate of the Northeast and Midwest between 1980 and 2000;

Nearly 60 percent of the growth of the Nation's burgeoning service sector has occurred in the South and the West.

The varying degrees of poverty and wealth evident throughout the country are startling, to say the least. According to Felix Rohatyn, the financier in charge of the program to restore New York City to economic soundness:

Half the country is nearly bankrupt, many of its major cities are pools of unemployment and unrest, and the other half is swimming in oil, industry, and wealth.

As Rohatyn says, this is a dangerous situation:

Not even a country as large as ours can maintain its democratic institutions half rich and half poor, especially when economic trends will make it very apparent that for the "have-nots" things will get worse and not better.

Unfortunately, it appears to be true that this regional disparity has been fostered, if not actually caused, by trends in Federal spending including defense spending. A few years ago the Congressional Research Service produced a study entitled "Patterns of Regional Change," which analyzed these trends in some detail. Overall, the study observed a significant change in the pattern of military prime contract awards in the preceding quarter century. In 1951, the Northeastern and North Central States had received the highest aggregate dollar value of such awards. But by 1976, it was the Southern and Western States which has received the highest aggregate.

While the general trend of Federal spending over the last few decades has promoted, rather than decreased, regional disparities, programs have been designed to correct this imbalance. Prominent among these is the so-called defense manpower policy No. 4, a directive issued by the Office of Defense Mobilization in 1952. The directive resulted from offical concern that regional unemployment might lead to erosion of the mobilization base and adversely affect the Korean war effort. Accordingly, DMP-4 provided for the setting aside of Federal procurements in labor surplus areas—LSA.

While the criteria for determining LSA's have been revised a number times, essentially an LSA must have an unemployment rate at least 1.20 times the national average during the reference period; there are a floor and ceiling rate of 6 and 10 percent, respectively. Petitions may be submitted by the appropriate State employment security agency for a Federal determination that a particular area constitutes an LSA within the meaning of the regulation. A total of 109 areas have been determined to be eligible LSA's for the 12-month period ending May 31, 1981.

The criteria for determining whether a particular firm is eligible to receive an LSA set-aside are likewise somewhat complex. Firms are eligible to bid for set-aside contracts through one of three preferences. First preference firms are required to perform all or a substantial portion of a contract in specified LSA's and assure that at least 25 percent of a new replacement hires will be disadvantaged residents of the area. Second preference is given to any firm which agrees that at least 15 percent of its new and replacement hires will be disadvantaged workers. Third preference goes to firms that consent to perform a substantial part of a Federal contract in areas of persistent or substantial unemployment.

In the last year for which final figures are available—fiscal year 1979—a total of approximately $500 million in LSA set-aside contracts was awarded by civilian agencies of the Federal Government. The Department of Defense—DOD—contracts, for reasons which are about to be discussed, are in a somewhat different category.

Although DMP-4 was intended to help areas with high unemployment, that intention was almost immediately undercut by an amendment to the Defense Appropriations Act, commonly called the Maybank amendment, that was enacted in 1953. This amendment provides that:

There is a reasonable expectation that offers will be obtained from a sufficient number of eligible concerns so that awards will be made at reasonable prices.

Subsequently, the Comptroller General decided that Public Law 95-89 indicated a congressional intent to repeal the Maybank amendment insofar as it related to funds not already obligated. However, the DOD Appropriation Act for fiscal year 1978, like its predecessors, included a Maybank amendment, so that there was only a relatively brief period during which DOD procurement funds were available for total LSA set-asides.

I am continuing my efforts to achieve a complete repeal of the Maybank amendment. Repeal is particularly important now, as the Buffalo area faces continued decline. Interestingly enough, the cost of the LSA set-aside program to the taxpayer is minimal. One recent analysis, based on a study of 192 handtool procurement contracts provided by the Federal Supply Service, of which 46 were eligible for total set-asides, concluded that:

The cost differential for the granting of these 46 contracts under a total set-aside procedure was found to be an increase of 0.64 percent.

Since over two-thirds of the Federal Government's procurement is defense procurement, the effect of the Maybank amendment on LSA's is extremely far reaching.

In any event, my efforts in the 96th Congress to repeal this provision achieved substantial success. My Small Business Subcommittee conducted an extensive examination of the LSA set-aside program, and I concluded that its very substantial benefits ought to be extended to the defense area as well. The latest DOD Appropriation Act contains the basic Maybank prohibition against the payment of a price differential, but the prohibition is subject to a very important qualification. Exempt from the Maybank requirement are $3.4 billion of Defense Logistics Agency contracts. The Defense Logistic Agency—DLA—is the branch of DOD which is responsible for procuring goods and services used throughout the military—the so-called common items. Among these items are such things as food, clothing, medicines, hardware, office furniture, handtools, books, and so forth. This new legislation represents an important first step toward total repeal of the Maybank amendment. As one economist recently testified:

The entire Nation receives some benefits from efforts to increase the number of jobs in high-unemployment areas. If we take our commitment to full employment seriously, this policy will help produce conditions under which we can realize full employment—with less inflation.

Congress has opened the door; not all the way, but a significant amount. It is important that industry now take advantage of its opportunity.●

FLOOD RELIEF FOR WESTCHESTER COUNTY

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. OTTINGER) is recognized for 5 minutes.

● Mr. OTTINGER. Mr. Speaker, today I am introducing two critical pieces of legislation to address the serious flooding problems in my congressional district, Westchester County, N.Y. These two proposals were included in the Water Resources Development Act of 1979 which passed the House in October of last year but was never considered by the Senate.

The first measure authorizes construction of the Mamaroneck/Sheldrake and Byram Rivers flood control projects.

Citizens living along the Mamaroneck/Sheldrake and Byram Rivers basins have waited 25 years—a quarter of a century—for flood protection by the Army Corps of Engineers. The Mamaroneck/Sheldrake and Byram Rivers projects were first authorized for study by the House Public Works Committee on June 13, 1956. Since that time, numerous devastating floods have hit the area causing millions of dollars in damage. In June of 1972 and again in September of 1975, two violent storms hit the area causing $3.5 million and $19.7 million worth of damages along the Mamaroneck/Sheldrake; $483,000 worth of damages were causes by the storm of June 1972 in the Byram River Basin. In addition, during the 1975 storm—the flood of record—the village of Mamaroneck was under 9 feet of water, 1 person drowned, and more than 200 people were evacuated by the Red Cross. The village has been put on notice by its largest employer, Sealectro Corp., that if flood control is not forthcoming, the company will have to relocate at the cost of 1,100 jobs for the community.

In terms of economics, these flood control projects make good sense. The Mamaroneck/Sheldrake and Byram River flood control projects have benefit-to-cost ratios of 1.2 and 1.3 respectively. Further delay in the construction of these projects will not only cause the local governments, businesses, and private property owners to continue suffering tremendous monetary losses, but will also cost the Federal Government millions of dollars in terms of flood insurance and disaster relief payments. In the village and town of Mamaroneck alone, from 1978 to 1980, the Federal Government paid 537 claims totaling roughly $2 million under the Federal flood insurance program.

It has taken literally a generation—25 years—for the Mamaroneck/Sheldrake and Byram Rivers projects to move from the point the study was authorized to the construction authorization stage where we are today. To exacerbate matters further, it has been 5 years since Congress acted on an omnibus water resources bill, resulting in essentially no new starts in water projects during that time. In addition, once Congress authorizes the corps to construct the project, under the normal process, actual construction can take up to another decade.

I pledge to work with my colleagues to enact an omnibus water resources bill and to see that essential flood control projects like those in Westchester move forward so that relief is given to those who have suffered too much and waited too long for this type of protection.

The second piece of legislation which I am introducing today addresses a problem raised by a regulation issued by the Army Corps in May 1978. Although this regulation was subsequently revised in October of last year, many flood prone urban areas continue to be unprotected.

Engineering regulation 1165-2-21 set certain arbitrary standards which distinguished between flood damage reduction measures—in which the corps could be involved—and storm sewer systems in urban areas—in which the corps could not participate. The regulation, which redefines the Federal interest in flood control, was issued without public or congressional comment. As a result of the regulation, scores of studies across the country were abruptly terminated by the Corps of Engineers. The list of affected studies shows a heavy impact on urban areas: The upper Sheldrake, Hutchinson River, Brentwood Brook studies in Westchester County, the Rahway and Passaic River Basin studies in New Jersey, studies in Braintree and Quincy immediately south of Boston. The corps also applied the new requirements to portions of studies so that when one portion of a project is eligible for corps assistance, if another portion fits the 1978 criteria, the ineligible portion of the project may be withdrawn—and the community receives Federal assistance for only part of its need. For example, the upper Sheldrake flood control project was originally part of the larger Mamaroneck/Sheldrake flood control project on which we are awaiting construction authorization. Funds for the upper Sheldrake study were approved in 1956 with the other project component. The regulations issued in May 1978 withdrew the upper Sheldrake project from study. Local government and residents of the town of Mamaroneck had been promised relief and then were told that this part of the project could no longer be done, despite protests from the State of New York and others that flooding was in fact caused by the inadequate natural channel of the upper Sheldrake and in no way could be confused with the storm drainage facilities which the regulation was intended to exempt from corps work, and despite a benefit-to-cost ratio of 1.9 to 1.

The legislation which I am introducing today directs the Secretary of the Army acting through the Chief of Engineers to study and recommend to Congress those criteria to be used in providing protection against or reducing damage from flooding. The bill also suspends the May 1978 regulation until legislation is enacted which determines the Federal interest in providing flood control in urban areas. Quite simply, the action which I am proposing reaffirms congressional participation in the flood control process and addresses an administrative action taken without public or congressional input which punishes our Nation's cities by implementing arbitrary standards for what are questionable Federal gains and untold local costs.

The texts of the two flood control bills which I am introducing today are as follows:

H.R. 2966

A bill to authorize the project for flood control in the Mamaroneck and Sheldrake River Basins, New York, and on the Byram River, Connecticut

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the project for flood control, Mamaroneck and Sheldrake River Basins, New York, and Byram River, Connecticut, is authorized to be prosecuted by the Secretary of the Army, acting through the Chief of Engineers, substantially in accordance with the plans and subject to the conditions recommended in the report of the Chief of Engineers dated April 4, 1979, except that such project shall also include flood protection for the town of Mamaroneck as recommended in the report of the Division Engineer, North Atlantic Division, dated March 28, 1978, and except that cost sharing for such project shall be as provided in the report of the Board of Engineers for Rivers and Harbors dated July 12, 1978. The estimated cost of such project is $37,500,000.

H.R. 2967

A bill to provide for a study by the Secretary of the Army, acting through the Chief of Engineers, of criteria to be used in determining the Federal and non-Federal interests in flood control protection, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Secretary of the Army, acting through the Chief of Engineers, shall study and recommend to Congress those criteria (including, but not limited to, drainage area, amount of runoff, and frequency of flooding) to be used in determining the Federal and non-Federal interests in providing protection against, or reducing damage from, flooding.

(b) Until a statute enacted after the date of enactment of this Act otherwise provides, the Federal flood control interest shall be based on the criteria contained in Engineer Regulation 1165-2-21, entitled "Flood Control Works and Storm Sewer Systems in Urban Areas", dated August 7, 1972.

(c) The report and recommendations authorized by this Act shall be submitted to Congress not later than three years after the date of the first appropriation of funds under this Act.

(d) There is authorized to be appropriated not to exceed $500,000 for fiscal years beginning after September 30, 1981, to carry out this Act.●

JOHN BRADEMAS NAMED PRESIDENT OF NEW YORK UNIVERSITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ROSTENKOWSKI) is recognized for 10 minutes.

● Mr. ROSTENKOWSKI. Mr. Speaker, last month, our distinguished former colleague and good friend, Hon. John Brademas of Indiana, was named the 13th president of New York University.

For those of us who worked closely with John, this great honor—head of the largest private university in the Nation—comes as no surprise.

During 22 years of service in Congress and as former House majority whip, John Brademas earned a particular reputation for his leadership in education and the arts.

A senior member of the House Education and Labor Committee, he played a principal role in helping write most of the major legislation concerning elementary and secondary education, higher education, vocational education, services for the elderly and handicapped, and Federal support for libraries, museums and the arts and humanities. In 1975, John was voted one of the Nation's top four most influential leaders in education by Change magazine's poll of 4,000 college and university presidents, foundation executives, journalists and government officials.

Mr. Speaker, John Brademas' recent appointment as president of New York University is another step forward in a life committed to the advancement of higher education.

I know that John will bring to NYU not only the skills and abilities he demonstrated as an outstanding legislator and leader in the House of Representatives but a continuing dedication to educational opportunity and academic excellence at the colleges and universities of our country.

Mr. Speaker, at this time I would like to add my personal congratulations to those of John Brademas' many friends as he embarks upon an exciting and challenging new career.

I also insert at this point in the RECORD two recent editorials from newspapers in John Brademas' home State of Indiana, two articles from the New York Times, and editorials from both the New York Times and the Chicago Sun-Times concerning his selection as president of New York University.

The editorials and articles follow:

[From the South Bend Tribune, Feb. 27, 1981]

NYU's SELECTION

Dual congratulations are in order to John Brademas, former Indiana 3rd District congressman who is the newly-named president of New York University, and to the university for the wisdom of its selection.

We who respected Brademas as our congressman can hardly imagine a more appropriate post than the presidency of the country's largest private university, one prominent in many fields, especially in the realm of the arts, which has become one of Brademas' specialties.

Our former legislator leaves the Midwest for the heart of the nation's largest city. The university is located in Greenwich Village on Washington Square, directly in the middle of Manhattan.

We share Brademas' enthusiasm when he calls the university "part of the nation's intellectual and cultural capitol . . . in the heart of a city that is going through a renaissance." New York is an exciting city, and we can see Brademas in a role that could expand beyond academia.

His educational credentials are superb, a graduate of the former South Bend Central High School, a Rhodes scholar from Harvard, and holder of a doctorate from Oxford. He taught at St. Mary's College here before becoming a congressman, and he was intimate with the problems of the host of private colleges and universities in his district.

Brademas sees his major challenges as achieving and retaining financial stability and academic excellence for New York University. His fund raising abilities are well-honed, having had as a congressman to run for re-election every two years for the last quarter of a century.

He refers to "the decade ahead" in talking of his future with NYU, indicating full commitment to being the university president. It is an institution where presidential tenures, have been long. Brademas, when he takes office in July, will become the 13th president. NYU was founded in 1831.

But we can see it quite possible that New York Mayor Edward Koch might want to borrow some of Brademas' knowledge and legislative expertise on boards or commissions. This would be quite natural as NYU is such a core institution in the huge city.

NYU is attended primarily by commuters. Eighty percent of its students live in New York but not on campus. It has a wide range of undergraduate and graduate schools. It operated on a $418.8 million budget last year, has $270 million in endowments, and at its last commencement grant 7,431 degrees.

The stage seems set for a long and successful term for Brademas, particularly since his wife, a medical doctor, can continue her residency in New York City.

But he is only 53. And we feel we must comment on the fact that Eastern university presidents do provide something of a pool for various kinds of presidential appointments. Brademas' predecessor, John C. Sawhill, was tapped for chairmanship of the government's U.S. Synthetic Fuels Corp. Kingman Brewster, former president of Yale, became the ambassador to Great Britain.

We think Brademas has an exciting future, whatever happens. And we wish him well in his new post.

[From the La Porte Herald-Argus, Mar. 3, 1981]

PROUD TO BE A HOOSIER

It was typical of John Brademas, former Third District congressman, to say in response to the announcement that he had been appointed the 13th president of New York University that "the two principal objectives of a great university must be financial stability and academic excellence. They are intimately linked, and I am committed to the achievement of both."

Naturally, we are pleased that the search committee and trustees of New York University selected Brademas, a Hoosier through and through, to steer the course of a 150-year-old university with 60,000 full- and part-time students which is experiencing a renaissance of sorts in both higher education and urban life.

And it is almost predictable that Brademas, an uncommon man with a common touch, would choose to face this mighty challenge in human relations and learning at a crucial hour in the annals of this republic.

Somewhere along the line of his more than two decades in public service, Dr. John Brademas once said that his Greek immigrant father taught him the Socratic proverb, "things of great value come only after hard work." He added, "If that's the only Greek I ever learned, it's all I needed to know."

Thus out of the boiling pot of his Hellenic origin emerged this extremely devoted individual who is determined to serve humanity either in public life as an elected servant or as the captain of a large private university that requires a carefully charted course on the stormy sea of uncertain urban life.

Long ago, Congressman Brademas confessed to being a slow-footed South Bend Central High School quarterback who was lucky to be kept on the squad and to learn the self-discipline taught in prep football.

But from that beginning, he moved on to Phi Beta Kappa key and Magna Cum Laude Scholarship at Harvard and to a doctorate at Oxford in England that recognized the earned title of Dr. John Brademas, a stamp of scholarship that he never chose to emphasize in political life.

We most appreciate that his fascinating, deeply religious man has chosen to continue his service to humankind in the cause of promoting learning and understanding in a generation that sometimes threatens to fragment and lose sight of the mixtures of rights and freedoms and self-discipline that hold together a fragile democracy.

[From the New York Times, Feb. 26, 1981]

FROM POLITICAL SEAS TO HELM OF N.Y.U.

(By Edward B. Fiske)

To hear John Brademas describe it, the move from being one of the most powerful Democrats in Washington to president of the largest private university in the country is about as complicated as a stroll up Pennsylvania Avenue. On Tuesday the former 11-term member of the House of Representatives was named New York University's 13th president.

"I've been deeply involved in education all my adult life," he said, "either as a student, a teacher or as a legislator interested in the Federal effort to improve education. I've

often thought that it might be a natural thing for me to be a college president. I think of it as another way to do something for education."

Mr. Brademas, a Democrat of Indiana who lost his bid for re-election in the Reagan landslide last fall, succeeds John C. Sawhill, who assumed the post in 1974. Mr. Brademas will take over at the end of the current academic year.

SAWHILL LOSING U.S. POST

Mr. Sawhill resigned last fall to head the newly formed United States Synthetic Fuels Corporation, a post from which he was subsequently asked to resign by the Reagan Administration.

Mr. Brademas said he did not regard his new post as temporary.

"I expect to devote the next few years at least to doing the best job I can as president of New York University," he said.

The stocky, blond-haired legislator, who looks much younger than his 53 years, said he had no desire to return to the House.

"You don't keep your seniority," he said. "You start all over."

Mr. Brademas will take over a university that, while it has apparently brought its once-serious financial problems under control, faces continuing problems of balancing its budget and attracting high-quality students. The medical school is running substantial deficits, and there are continuing tensions between the eight professional schools and the liberal arts faculties.

Other than bringing the medical school budget under control and finding more on-campus housing, the new president declined to identify what he viewed as problem areas.

He said that the board had not given him specific mandates for change or improvement. He said he thought the university was in a good position to withstand a decline in students graduating from high schools.

"N.Y.U. is well-located," he observed. "There are a lot of people who want to come to New York City and the Village."

During his 22 years in Congress Mr. Brademas was instrumental in putting in place many Federal education programs, including tuition grants and loans for college students—programs that the Reagan Administration hopes to cut.

He said that while details of the proposed cuts were not yet available to allow analysis of the possible effects on N.Y.U. and other private institutions, he was prepared to fight to preserve the legislation he helped write.

"The danger there is that the Administration will seriously damage the prospects of lots of young people from getting a college education," he said, "and this includes not only poor students but those from middle-income families.

Some members of the board of trustees and others at N.Y.U. have said that the university, with the financial crisis of the early 1970's behind it, is at a turning point. It must decide, they said, whether to seek the funds and human resources to transform a good, but by no means outstanding, regional institution into a national one. One trustee described the university as sitting "on the edge of greatness."

The new president, when asked if he shared this assessment, said that "at this point it would be pretentious to say." But he commented.

"I played basketball for a very short period in high school for Johnny Wooten, who eventually went on to become famous at U.C.L.A., and I always remember one thing he said: A basketball team never stays the same; it either gets better or it gets worse."

[From the New York Times, Mar. 1, 1981]

N.Y.U.'s CATCH

On a scale of 10, New York University has scored an impressive 9.5 in luring John Brademas to become its 13th president. In every respect but one, he obviously has the credentials to lead the country's largest private university. He is a Rhodes scholar by way of Harvard, and he made a speciality of education and the arts during 11 terms in the House, where he represented Indiana's Third District until his defeat last November and served as Democratic whip for four years.

Mr. Brademas has no proven record as an administrator. But N.Y.U.'s once-alarming tilt into deficit was largely remedied by Presidents Hester and Sawhill, two proficient administrators. What this sprawling urban university needs now is bolder academic direction and greater visibility. Mr. Brademas' skills as an advocate and nourisher of coalitions can be put to admirable use.

A university on the upswing, N.Y.U. is beginning to crowd Columbia in the breadth and excellence of its offerings. Both city and country will gain from the imaginative leadership that is promised by Mr. Brademas' inaugural this spring.

[From the New York Times, Feb. 26, 1981]

MR. EDUCATION TAKES OVER AT N.Y.U.

(By Dorothy J. Gaiter)

When John Brademas was a boy, his father, a Greek immigrant, taught him that a good education was essential. "He said that he wouldn't be able to leave us a lot of money," Mr. Brademas recalled yesterday, "but that we would have a first-rate education."

Mr. Brademas, a former United States Representative from Indiana's Third District, who was named Tuesday as the 13th president of New York University, never lost sight of the importance of education or forgot his father's frequent quoting of Socrates' admonition, "Things of value come only after hard work."

Mr. Brademas said his father always added, "If that's all the Greek you ever learn, it's all you need to know."

TRANSFERS TO HARVARD

Mr. Brademas learned the lesson well. Following his graduation from Central High School in South Bend in 1945, he enrolled in the Navy's officers' training program at the University of Mississippi. After his freshman year in Mississippi, he transferred, as a Veterans National Scholar, to Harvard University, a head-spinning change, he said. After Harvard, where he was elected to Phi Beta Kappa, he attended Oxford University as a Rhodes Scholar and eventually earned a doctorate in social studies there in 1954.

Reading is overwhelmingly his favorite pasttime, and he is fond of quoting the classics, often the Greek philosophers.

To him, education was the ladder to upward mobility, much as it was for his constituents in the Third District, a blue collar, Republican stronghold that sent him, a Democrat, to Congress on his third bid, in 1958.

During his 22 years in the House, Mr. Brademas, who was known as "Mr. Education" and "Mr. Arts," guided through numerous education programs, many of them benefitting students whose parents were not likely to leave them a lot of money, either.

Among the programs he helped shape were Project Head Start and the Elementary and Secondary Education Act of 1965, which substantially increased the Federal Government's budget for education and increased student aid. He also fought for loans and grants for teachers who wanted to further their education, services for the elderly and handicapped and increased funds for libraries and vocational schools.

Mr. Brademas, who was the majority whip at the time of his defeat in last November's election, consistently fought for increased funds for the National Endowment on the Arts and the Humanities.

John Brademas was born on March 2, 1927, in Mishawaka, Ind. He was the eldest of four children of Stephen John Brademas and Beatrice Cenci Goble.

For 20 years in Washington, he was often described as the city's most eligible bachelor. On July 31, 1977, he married Mary Ellen Briggs, 40, who had four children by a previous marriage and who was in her third year at Georgetown University's medical school. She is now a resident in dermatology at Johns Hopkins Hospital in Baltimore and will try to transfer her residency to N.Y.U.'s medical center.

They will live in the university president's residence, a penthouse apartment overlooking Washington Square Park.

Mr. Brademas speaks Spanish fluently, having learned the language in one summer when he and a friend hitchhiked to Mexico. He returned another summer to live among Indians in Mexico in a pre-Peace Corps Government program.

He said that a young lady he used to know also helped him with his Spanish, adding with a laugh, "My wife doesn't want me to learn any more languages."

[From the New York Times, Feb. 25, 1981]

PANEL SELECTS EX-REP. BRADEMAS TO BE 13TH PRESIDENT OF N.Y.U.

(By Edward B. Fiske)

New York University yesterday chose former Representative John Brademas, Democrat of Indiana, to be the school's 13th president.

The 53-year old Mr. Brademas, who was majority whip in the House of Representatives until he was defeated in last fall's Republican landslide, will succeed John C. Sawhill, who resigned last summer after six years in the post. The new president is expected to take over at the country's largest private university at the end of the current academic year.

Mr. Brademas, a Harvard University graduate and Rhodes scholar, is a well-known figure in higher education. As an 11-term Congressman, he was active in helping pass Federal programs to provide tuition grants and loans to college students and was a primary supporter of the National Institute of Education, the educational research arm of the Federal Government.

The trustees acted during an hourlong meeting late yesterday afternoon at Bobst Library. Afterward, Mr. Brademas declined to comment on his selection, but said he would be available at a news conference scheduled for this morning.

Mr. Sawhill, the former Federal Energy Administrator, became head of the 46,000-student university in 1974 and was widely credited with turning around an institution that had serious financial, enrollment and administrative problems. In the summer of

1979 he took a leave of absence to become Deputy Secretary of Energy, and Ivan Bennett, former dean of the N.Y.U. Medical School, was named acting president.

Last fall Mr. Sawhill was named chairman and chief executive officer of the newly formed United States Synthetic Fuels Corporation, and he announced that he would not be returning to the N.Y.U. helm. Last month, at the request of the Reagan Administration, he submitted his resignation from the corporation post.

Mr. Brademas will come to N.Y.U. without experience in running a large institution. Supporters argued, however, that he will bring the university the fund-raising ability and the national visibility that it needs to become an important national rather than a regional university.

"If we want to get up there with Berkeley and all, we need another $200 or $300 million," said one high academic official. "Brademas seems to know everyone worth knowing in this country, and he is the kind of person who can make important statements about education."

BRADEMAS CHOSEN BY PANEL

The former lawmaker was selected by a seven-member committee of trustees headed by Laurence A. Tisch, the head of Loews Corporation and chairman of the board of trustees. The full board approved the nomination at a special meeting yesterday afternoon.

Mr. Brademas was born in Mishawaka, Ind., an industrial suburb on the outskirts of South Bend, in 1927 and was a star quarterback and valedictorian in high school. In 1945 he enrolled in a Navy officers' training program and then went on to Harvard, where

Mr. Brademas became an assistant professor of political science at St. Mary's College in South Bend and in 1958, on his third attempt, was elected to Congress as a Democrat. He was assigned to the House Committee on Education and Labor, and was viewed as a knowledgeable and effective legislator.

PUSHED EDUCATION LEGISLATION

He was a vigorous supporter of the Great Society programs of President Lyndon B. Johnson and played an important role in such legislation as the Elementary and Secondary Education Act of 1965, which greatly increased the role of the Federal Government as an advocate for disadvantaged students. He led the floor fights in behalf of Project Head Start, the National Teachers Corps and programs to help teachers pay for graduate studies.

During the war in Vietnam Mr. Brademas supported numerous antiwar resolutions and voted against appropriations for the antiballistic missile and the B-1 bomber.

Despite the fact that he came from a conservative district, Mr. Brademas continually won re-election with as much as 79 percent of the vote. Last fall, however, he was defeated in his bid for a 12th term by John Hiler, a 27-year-old businessman.

Following the defeat, he commented, "As the Bard said, 'If it were done, better 'twere done quickly.' I have not had a gloomy moment, in truth, because I ran a good campaign and did the best I could. I always had to swim uphill in my district, and this year the unemployment statistics were tough."

[From the Chicago Sun-Times, Feb. 27, 1981]

A WORD FROM THE WISE

Former U.S. Rep. John Brademas (D-Ind.), unfortunately defeated last fall, has landed on his feet, and in a post where he can make new contributions to the country. He has been named president of New York University.

And that has special importance.

Brademas, a former Rhodes Scholar, grew up in a family that stressed education. His father, a Greek immigrant, often quoted Socrates: "Things of value come only after hard work." Said his father, "If that's all the Greek you ever learn, it's all you need to know."

That advice guided Brademas. Now he can pass it on to another generation—to their benefit and also to the country's.●

DOING NOTHING—WE CANNOT AFFORD IT

The SPEAKER. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 15 minutes.

● Mr. GONZALEZ. Mr. Speaker, now that we have the Republican budget, we can see what their priorities are—even though implementing legislation has been slow to arrive; that is, the specifics have not come in to us.

In its essentials, the Republican program is to do nothing.

Nothing to provide housing for the 93 percent of our families who are priced out of the market today.

Nothing to provide employment for the people who will continue to lose jobs because of the tight-money squeeze.

Nothing to help urban areas arrest their great and growing problems.

Nothing for the ills that plague city and countryside alike, nothing for the burgeoning problems of the land.

Instead what we are given is nostrums—promises that after we all go through an economic purge, after we pass through penance for our sins, all will be well. We are not told how this will happen, only that it will. Yet no independent economic forecast will confirm the claims of the do-nothing program.

The do-nothing program claims that we cannot do what we already know how to do—build housing, provide jobs, clean up the environment, work to build opportunity for those who have been denied it. The people who are selling that claim are the same ones who told us that none of these programs would ever work in the first place. They are wrong, and they know it.

Housing is a good example of what I mean. They said we could not provide housing for all the people who needed it. But it could be done, and it was done. And it was done without ruinous effects. All that we need to do now is keep that work up, because there are still unmet needs, and those needs will grow unless we act. They say we cannot, or if we can, we should not. I say otherwise.

This country is the world's biggest and best producer of housing. We have accomplished miracles. I do not want to abandon that miracle. I do not think we have to.

There are very few people who realize that in the space of 40 years we have rehoused virtually this whole Nation. In 1940, no less than half the people in this country lived in houses that lacked complete plumbing. And in 1940, one family in five lived in housing that was overcrowded. In other words, just 40 years ago in the United States, this great and rich Nation, substandard housing was the norm, it was what you expected. Only the lucky had really decent housing.

If we are talking about rural areas, the story is even more dramatic. In 1950, no less than 59 percent of rural housing was substandard. Today we find only 1 house in 12 in the countryside or small towns of America that is substandard. That is a fantastic achievement.

The fact is that in town and country alike, what we did in the past 40 years was to virtually replace and rebuild the whole housing stock of the country. No one would have thought it possible when we started.

And yet, when we were doing that, we were also increasing our wealth immensely, so that today almost everybody has a decent place to live, a car to drive, and a TV to watch.

This was an economic miracle.

It was done against conditions that should have made the miracle impossible, in times when the Stockmans of the day said it could not be done, and if it could, should not.

It was done in the face of immense military spending and despite the intervention of three wars, not to mention the cold war.

It was done while the economy had full employment.

It was done while there were dramatic shifts in population, in the shape and nature of the economy, and in the shape and nature of the labor force.

In short, all of this was done at a time when the Stockmans of the day were saying that the country could not afford it. But ironically, it was done at a day and time when Ronald Reagan was saying it had to be done.

Now today we are being told that the country cannot afford social programs. We are being told that the only way that we can regain economic momentum is to go through what theologians might call purgatory. They say that we have to purge ourselves of the false notion that everybody ought to have a job. We have to purge ourselves of the silly idea that this country really can produce what the people need without incurring inflation. That is what they are telling us. But I do not believe that.

They are telling us that there is no choice but to put aside the goals this country has pursued for three genera-

tions, that for a few million, the American dream can wait.

They are telling us that the trickle down theory of economics is the only thing that works. But we have already seen that theory, back in the twenties. It did not work then and will not work today; for some of us, there has to be help to reach the first rung of the ladder.

They are assuming that the country can afford to ignore the needs of those who want only a decent chance at a decent job, a decent home, a decent future. They are telling us that the only thing we can do is to forget all that.

But David Stockman was a teenager when these programs he wants to kill came into being. He does not remember why they are in place.

Back in the thirties, long before there was a Stockman, there was Hoover, who told us that all the country needed was a balanced budget. Business confidence, he said. If we just had business confidence, all would be well. Meanwhile, the economy of the Nation collapsed, to the point where the banks, themselves, could no longer survive, to the point where revolution was very much a possibility, to the point where bitter despair was the common lot, and there was nothing to lend hope.

We could not afford to create jobs or build housing, they said. Conference comes first; the rest of you will have to wait. That was the Hoover doctrine. It is also the Stockman doctrine.

But it was not true. The Nation could not be made safe for business, because it was not safe for anybody.

After the disaster we rebuilt this country, in one long wave of progress—employment, opportunity, production, and consumption. All of this without inflation. It was impossible, they said then.

It is impossible, they tell us today. Republicans just never learn. Tragically, the disease of the Depression is still real to a great number of Americans. What we need to remember today is what that disease is like.

We are talking here about the people who have been left behind—the left out, the locked out, the unlucky, the forgotten.

Life to these people is a daily humiliation. There is not a job, not for them. If there is a job it is not enough to buy food and shelter, let alone clothing, or any of the luxuries we are all supposed to have as the reward for leading a decent and upright life, a life of hard work. We forget too easily that the only thing between us and that daily humiliation of no work, not enough work, being broke, being desperate, is luck. Pure and simple luck.

And what we forget is that eventually, humiliation turns to rage.

It is not so long since the streets burned, not three blocks from where we sit; it is not so long since the poor marched on Washington. And why? Because, they knew that it did not make any difference if you could overcome segregation, and still not have any hope for a decent life. What did it matter to be able to go into a hamburger joint if you did not have a dollar? What does it matter if interest rates are low when you do not have a dime?

The poor people of this country know that life is unfair; it is only the better off who pretend that it is fair. We know better, but we may not want to admit it. Stockman knows better, but he thinks we can afford to ignore it.

The social programs the present administration wants to eliminate are there to offer hope, to address real and bitter needs, and to say yes, in America at least, we care about each other, we know that poverty is not the just reward for sin; it is the plight of those who cannot help being poor.

We are being told that our housing programs are expensive and a failure. But if it took 40 years to house middle America, why should we not allow that same amount of time to house poor America? Mr. Stockman tells us that section 8 only reaches 10 percent of the eligible population, so we should forget it. But how long did it take FHA and VA to accomplish their miracles? It did not happen in 5 years, and that is all the time section 8 has had.

We are told that even so venerable a tool as FHA mortgage insurance is a waste of time and money. But what is there to replace it? What is there that can do an equal job? The truth is that there is a role, a valid role for FHA, probably now as much—maybe more—than ever.

We are told that Indian housing production is too slow, the pipeline is too long and too full, and so they move to kill the programs that provide the water and sewers—even for units that are being built today. They argue that the system does not work, but how long did it take to build up an FHA system that really worked? And how long has the Indian housing program been in operation?

We are told that we really do not need all that assisted housing in rural areas—but the truth is that we do. For we know that for some people who live outside the country's major cities, time and opportunity have gone backward, not forward.

I said a while ago that in 1950 no less than 59 percent of nonmetropolitan housing was substand ard and today there is only 8 percent substandard housing in those same places. But for blacks, the percentage living in substandard units is almost twice greater today than it was then.

The need is still there.

Among the people who get Farmers Home Administration loans, 80 percent have been renters before. If those FmHA borrowers had owned a home before getting that FmHA mortgage, the place was probably worth less than $5,000.

Real, essential, needed, and appreciated work is done through the FmHA, housing people who have great need and only need a little help. This is not a program that we cannot afford; it is a program that we cannot afford to be without.

A few years ago, I read a history of the fall of the Russian czars. What struck me most about that history was that Russia, under the czars, had no middle class. Nobody had a stake in the survival of the Government; property belonged to only a few, who had done nothing to earn it. All power resided in the czar, who answered to nobody. So that great and all-powerful ruler fell, not because there was no power in his hands, but because there was no power—political or economic—in the hands of the people. The thing collapsed because there was no one who cared or should have cared about keeping it.

What our country is all about is that ordinary people are supposed to have power. That is the secret of our dynamism. Everyone is supposed to have a chance.

What our housing and social programs are about is to assure that everybody in this country does have a decent chance to gain economic power—a home, a job, and some hope for the future—that is what power is. These programs are also about human dignity. No one wants to be reduced to nothing; no one wants to wait for the welfare check.

It may be true that we cannot solve every problem that everybody has. But neither can we afford to ignore the fact that we have millions of people who lack decent housing, lack decent hopes, and lack the help that they need, who do have problems that can be solved, with a little effort.

We cannot afford the sophistry that says we want workfare, even while employment programs are being cut left and right.

We cannot afford the meanness of spirit that says the poor are also the undeserving.

We cannot afford the blindness that does not see humiliation turn into rage.

The Republicans are asking millions of people to defer dreams for awhile—even the simple dream of a decent job, a little protection against the whims of economic disaster, a little hope for a secure future. All of this, on the frail and flimsy hope that some of the wealth will overflow the brim and land on those who huddle below. The cost of that is great, too great to afford in

human terms, in social terms, and even in economic terms.●

NO FAILURE OF NASHVILLE LAW ENFORCEMENT AGENCIES

The SPEAKER. Under a previous order of the House, the gentleman from Tennessee (Mr. BONER) is recognized for 5 minutes.

Mr. BONER of Tennessee. Mr. Speaker, in the aftermath of the tragic attempt on the President's life, many questions are beginning to emerge concerning the alleged assassin, the Secret Service, the FBI, and other aspects of the case.

One question which is of particular concern to me involves Mr. Hinckley's arrest on a weapons charge last October in my hometown of Nashville, Tenn.

Unfortunately, there has been some suggestion that local Nashville law enforcement agencies were somehow negligent in not reporting Mr. Hinckley's arrest to the Secret Service.

Mr. Speaker, nothing could be further from the truth. I have been in contact with Chief Joe Casey of the Nashville Metropolitan Police Department, Chief Reuben Utley of the Nashville Metropolitan Airport Authority Police, the Secret Service and the FBI. Everyone agrees that the Nashville law enforcement agencies acted properly and carried out their duties in their usual professional manner.

Chief Utley of the Airport Authority Police has informed me that his men made the initial apprehension and that they gave the FBI proper notification of Mr. Hinckley's arrest and the circumstances surrounding it. It was not the Nashville Metropolitan Police or the Nashville Metropolitan Airport Authority Police who failed to report the arrest to the Secret Service. It was the FBI who failed to do so, and officials at the Bureau have confirmed this to me this morning.

The key question, Mr. Speaker, is why did the FBI fail to pass on to the Secret Service information provided to them by the Nashville authorities?

The circumstances of Mr. Hinckley's arrest certainly seem to have been of such a nature as to warrant the attention and concern of the Secret Service.

Mr. Hinckley was apprehended attempting to board an aircraft carrying 3 pistols and 50 rounds of high velocity hollow point ammunition. All of this took place on the same day that President Carter was in town, and Air Force One was parked on the runway a few hundred yards away.

Mr. Speaker, it would not be an overstatement to say that the system broke down; that much is clear. The FBI was given significant information regarding a potential threat to a President and yet that information was not passed on to the Secret Service, the agency charged with protecting the President.

Mr. Speaker, as we all know, hindsight is better than foresight. I am not for a minute claiming that if this information had been shared with the Secret Service, the attempt on the President could have been prevented. We will never know. However, the fact that Mr. Hinckley's name was not known to the Secret Service does prove that the system failed.

It is important to note, however, Mr. Speaker, that there was no failure on the part of Nashville law enforcement agencies.

Chief Casey and Chief Utley have always cooperated with the FBI and the Secret Service on every Presidential visit to Nashville, and I am extremely proud to be able to say that the facts in this unhappy situation confirm that they did so once again on October 9, 1980, during President Carter's visit to Nashville, Tenn.

Mr. Speaker, it is absolutely essential that we have all the facts surrounding this situation; not to place blame, but to correct the failures.

Therefore, Mr. Speaker, I am today calling for a full and complete investigation by the appropriate committees of the House into all aspects of Presdiential protection. Specific attention should be focused on FBI-Secret Service cooperation and information sharing concerning potential threats to the President. Mr. Speaker, I hope that we can begin this investigation at the earliest possible date and that we would be able to make any recommendation for changes that are necessary as soon as possible in order to insure the most complete and effective protection of the President. The American people demand and expect no less.

□ 1530

Mr. EDGAR. Mr. Speaker, will the gentleman yield?

Mr. BONER of Tennessee. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Speaker, I would like to commend the gentleman from Tennessee (Mr. BONER) for his statement.

I served on the Select Committee on Assassinations, looking into the death of Dr. Martin Luther King and into the death of President John F. Kennedy, and I think the gentleman has made a good point about the need to review all aspects of the attempted assassination of the President. I would just like to commend the gentleman for his statement.

Mr. BONER of Tennessee. Mr. Speaker, I would like to thank the gentleman for doing so, and I would remind the gentleman that on two other occasions, when there was the assassination of President Kennedy and an attempted assassination on President Ford, there were subsequent investigations relating to the circumstances behind those incidents, and I think it would be very appropriate for the appropriate committees in the House to address themselves to this matter.

REDISCOVERING DR. KING'S LEGACY FOR THE 1980'S

The SPEAKER. Under a previous order of the House, the gentleman from Michigan (Mr. CONYERS) is recognized for 5 minutes.

● Mr. CONYERS. Mr. Speaker, Saturday, April 4, is the 13th anniversary of the assassination of Dr. Martin Luther King, Jr. On that day the Congressional Black Caucus and King Center for Nonviolent Social Change in Atlanta, along with 50 national labor, religious, and public-interest organizations, and 55 Members of Congress, will sponsor a series of seminars and teach-ins throughout the country on rediscovering Dr. King's legacy for the 1980's.

Seminars and teach-ins on Dr. King will take place in 35 cities across the country. In Washington, D.C., three seminars will take place on Saturday beginning at 10:30 a.m. Members of Congress, staff, and interested individuals are invited to participate. For this reason I am attaching materials that explain the purposes of the event, a list of endorsers, the participants in the three Washington seminars, and a statement of Coretta Scott King inviting persons to participate. The information on the King seminars follows:

REDISCOVERING MARTIN LUTHER KING, JR.'S IDEAS AND POLITICS IN THE 1980'S

"Our nettlesome task is to discover how to organize our strength into compelling power so that government cannot elude our demands. . . . We require programs to hold up to our followers which mirror their aspirations. In this fashion our goals are dramatized and our supporters are inspired to action and to deeper moral commitment. . . . We found a method in nonviolent protest that worked, and we employed it enthusiastically. . . . None of us can pretend that he knows all the answers. It is enormously difficult for any oppressed people even to arrive at an awareness of their latent strengths. . . . Only when they break out of the fog of self-denigration can they begin to discover the forms of action that influence events. . . . There will be agonizing setbacks along with creative advances. Our consolation is that no one can know the true taste of victory if he has never swallowed defeat."—(Martin Luther King, Jr., "Chaos or Community?" 1967).

On April 4, 1981—the anniversary of the assassination of Dr. Martin Luther King, Jr.—seminars, meetings, and teach-ins will take place across the nation and in Washington, D.C. to rediscover, recapture, and build upon the moral force of Dr. King's ideas and politics for this generation of Americans.

We come together in meeting halls, churches, universities and homes across the country. We represent Americans from all walks of life, in the churches, the labor movement, civil rights institutions, and in

communities throughout the United States. We issue this call to reclaim Rev. King's moral purpose and political courage for the new generation, to find the common ground and rebuild the great coalition he nurtured, and to fashion the new ideas and actions that can transform America. In this we must join and work together—black, white, brown, poor, rich, young and old, women and men.

For the issues and injustices Martin Luther King, Jr. spoke to in his day are the crossroads we are at as a society and a people today—the continuing struggle for full employment and economic justice; equality of opportunity for all individuals; safeguarding the rights of working women and men to a decent, productive, and secure life; peace in the world and a halt to violence at home; and for the elimination of racism throughout the world.

Reverend King's vision of the just society and a world at peace needs to be rediscovered today. He knew that government has a moral purpose to fulfill, which is founded on a convenant of justice and human rights for all citizens. He recognized that "injustice anywhere is a threat to justice everywhere." He preached the inseparability of peoples throughout the world, and the interconnectedness of the struggle for peace and justice in America and in the world. He taught that each if us has a moral responsibility and a leadership role in solving the common, mutual problems we all face.

We gather on April 4th not only to remember Martin Luther King, Jr., but to learn from his teaching and his example.

Today millions of Americans feel acute frustration, fear, and helplessness. Insidious tendencies toward polarization are afoot. Concerned citizens everwhere are experiencing isolation, indecision, and drift.

Twenty-six years ago in Montgomery, Alabama, Dr. King launched a new politics in America and forged the broadest and most positive political coalition in our modern history. Linking issues with new forms of political action, he helped create, in its totality, a new politics of hope and empowerment for millions of Americans and peoples throughout the world.

We need once again to discover the common ground and the new coalition to preserve and strengthen the moral code of the Federal government and of the human resource programs that a whole generation fought to create; to challenge the militarization of foreign policy and international affairs that can only lead to global catastrophe; and to confront the attacks on human rights at home and throughout the world.

In rediscovering Dr. King's ideals, ideas, and politics, we will necessarily be confronting what is wrong with the politics of the present, the current priorities of the Federal government, and American policies toward the world.

Further, we call for ongoing discussions beyond April 4th among citizens throughout the nation to develop further their understandings of what is wrong in America today, what inspiration they can draw from Martin Luther King's life, and what ideas and actions are needed to redeem the covenant of justice that he gave his life for. We are convinced that if we meet, share counsel, and act together, we can bring the nation back to the pursuit of justice, equality, peace and prosperity.

Let April 4th be a beginning, and let us step forward, knowing "we cannot walk alone. We cannot turn back. . . . No, no, we are not satisfied, and we will not be satisfied until justice rolls down like waters and righteousness like a mighty stream."—Remarks of Martin Luther King, Jr., Lincoln Memorial, Washington, D.C. August 28, 1963.

STATEMENT OF MRS. CORETTA SCOTT KING, PRESIDENT, MARTIN LUTHER KING, JR. CENTER FOR NONVIOLENT SOCIAL CHANGE

On behalf of the Martin Luther King, Jr. Center for Nonviolent Social Change, I want to commend John Conyers, Jr., the Congressional Black Caucus, and the other participating organizations for their leadership initiative in sponsoring this "Teach-in", and we are pleased to join in being a cosponsor of this program.

With all that is happening in this country, and very tragically in Atlanta, and other parts of this troubled world, the creative non-violent philosophies, strategies, and works of Martin are urgently needed in all our endeavors to resolve human conflict. We need not only to study those ideas and beliefs advocated by my husband, but we need to build upon what he started as we seek the goals of racial justice, equality, peace and brotherhood. The Martin Luther King, Jr. Center for Nonviolent Social Change, with a wide range of programs relevant to today's problems remains the living memorial to carrying out the unfinished work of Martin.

We encourage Americans of all ages and races to join in the April 4th "Teach-in" at a time when we need to free the consience of American from racial and religious hatred and remove all vestiges of discrimination based on race, religion, creed, and sex.

WASHINGTON KING SEMINARS, SATURDAY, APRIL 4, 1981

KING, FULL EMPLOYMENT, AND ECOMONIC JUSTICE

10:30 A.M., 1100 Longworth H.O.B., Capitol Hill.

Hon. Louis Stokes, Convenor.

Hon. Walter E. Fauntroy.

Hon. Augustus F. Hawkins.

Carl Holman, Chair, National Urban Coalition.

Hyman Bookbinder, Chair American Jewish Committee.

Dr. Howard Wachtel, Chairman, Economic Department, American University.

Dr. David J. Garrow, Political Science Department, Univ. of North Carolina, author, "Protest at Selma".

Charles Fager, author, "Selma: 1965, Uncertain Resurrection: The Poor People's Wasington Campaign".

Christine E. Davis, Vice-Chair, National Women's Political Caucus.

KING, CIVIL AND HUMAN RIGHTS

10:30 A.M., Moot Court Room, Howard University Law School, 2099 Van Ness St., N.W.

Hon. Mickey LeLand, Convenor.

Herbert Reed, Professor of Law, Howard University.

Arthur Kinoy, Civil Rights Lawyer, Rev. Leopold Bernhard, Pastor, Lutheran Church of the Reformation.

Dr. Benjamin Quarles, History Department, Morgan State University, author, "The Negro in the Making of America, Black Abolitionists," and "The Negro in the American Revolution".

Dr. Clay Carson, History Department, Stanford University, author, "In Struggle: SNCC and The Black Awakening of the 1960's".

Rev. Calvin Morris, Howard University, School of Religion.

Dorothy Height, Pres., National Council Negro Women.

KING, WORLD PEACE, AND FOREIGN AFFAIRS

10:33 A.M. Institute for Policy Studies, 1901 Q Street, N.W.

Hon. Ronald V. Dellums., Convenor.

Hon. Walter E. Fauntroy.

Marus Raskin, Co-Founder, Institute for Policy Studies.

Gay McDougall, Lawyer's Committee for Civil Right Under Law, Coordinator, South Africa Project.

Cynthia Aronson, Institute for Policy Studies, Latin America Coordinator.

Sister Carol Costen, NEWTWORK: A Catholic Social Justice Lobby.

●

INTRODUCTION OF H.R. 2949: THE SMALL BUSINESS TAX ACT OF 1981

The SPEAKER. Under a previous order of the House, the gentleman from Hawaii (Mr. HEFTEL) is recognized for 10 minutes.

● Mr. HEFTEL. Mr. Speaker, I am today introducing H.R. 2949, the Small Business Tax Act of 1981. I am honored and gratified to have, as original cosponsors, three of my distinguished colleagues; Mr. ARCHER, Mr. NOWAK, and Mr. DREIER.

As can be seen from this bipartisan coalition, the issue of small business is one which transcends geography and political party affiliation. The small business sector or our economy is extremely labor intensive, having accounted for the overwhelming majority of the jobs created in America in the past decade. But because small businesses are, in fact, small, they frequently lack the ability to prosper, or in some cases, survive during periods of high inflation and economic downturn. Just as in the case of individual taxpayers, small businesses are frequently propelled into higher tax brackets merely because of inflation. Moreover, in periods of tight money and high interest rates, it is first and foremost the small business person who finds it impossible to finance the expansion of his or her enterprise.

In large part, it is the Tax Code which plays a major role in the success of a small business. In my judgment, our tax laws should encourage the formation and expansion of small entrepreneurial enterprise rather than inhibit it. For this reason, I have introduced H.R. 2949, the Small Business Tax Act of 1981 which will address most of the tax inequities currently confronting our Nation's small business community.

In short, H.R. 2949 has five provisions which will:

Allow small firms with gross sales of less than $500,000 per year to use the cash method of accounting. Presently, these firms are forced to use the accrual method of accounting which allows the Government to tax them on the paper profits derived from the inflated values of their inventories;

Stretch out over 10 years the tax penalty that is imposed when a firm switches inventory accounting methods from FIFO—first in-first out—to LIFO—last in-first out;

Increase the amount of used equipment which qualifies for the investment tax credit from $100,000 to $200,000;

Allow a deferral of capital gains taxes on the sale of an asset when the proceeds of that sale are reinvested in a qualifying small business; and

Provide for an expanded corporate tax rate structure as follows:

Current law

Taxable income:	*Rate (percent)*
0 to $25,000	17
$25,000 to $50,000	20
$50,000 to $75,000	30
$75,000 to $100,000	40
Over $100,000	46

Heftel-Archer-Nowak-Dreier bill

Taxable income:	*Rate (percent)*
0 to $25,000	12
$25,000 to $50,000	15
$50,000 to $75,000	20
$75,000 to $100,000	30
$100,000 to $150,000	40
$150,000 to $200,000	43
$200,000 to $250,000	45
Over $250,000	46

Small businesses are frequently labor intensive and have recently been

forced to endure major increases in the social security tax. While a more rapid schedule of capital cost recovery will help some small business ventures, there is an even more compelling need to provide direct structural tax relief as well as incentives to attract capital away from tax shelters and other nonproductive investments and into that sector of our economy which has traditionally generated jobs and technological innovation benefiting all Americans: small business.

Mr. Speaker, I urge all of my colleagues who have small businesses in their districts and who are concerned for their well-being to join with me and my three distinguished colleagues in cosponsoring the Small Business Tax Act of 1981.

I also include the text of the bill printed in its entirety immediately following my remarks.

H.R. 2949

A bill to amend the Internal Revenue Code of 1954 to allow certain small businesses to use the cash method of accounting without regard to inventory accounting requirements, to increase to $200,000 the amount of used property eligible for the investment tax credit, to allow nonrecognition of gain on sales of property where any equity interest in certain small businesses is acquired, to provide an income tax rate reduction for corporations, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Small Business Tax Act of 1981".

SEC. 2. ELECTION TO USE CASH METHOD OF ACCOUNTING WITHOUT REGARD TO INVENTORIES.

(a) IN GENERAL.—Section 471 of the Internal Revenue Code of 1954 (relating to general rule for inventories) is amended by adding at the end thereof the following:

"(b) ELECTION BY CERTAIN SMALL BUSINESSES TO USE CASH RECEIPTS AND DISBURSEMENTS METHOD OF ACCOUNTING.—

"(1) IN GENERAL.—A taxpayer may elect for the taxable year the cash receipts and disbursements method of accounting for a trade or business or the taxpayer without regard to any requirement to use inventories if—

"(A) the average annual gross receipts of the taxpayer do not exceed $500,000 for the 3 taxable years ending with the taxable year, and

"(B) such taxpayer is a qualified small business for each of such 3 taxable years.

"(2) QUALIFIED SMALL BUSINESS DEFINED.—For purposes of this subsection, the term 'qualified small business' means any person engaged in a trade or business if, at all times during the taxable year, active participants in such trade or business own—

"(A) in the case of a trade or business other than a corporation, at least 70 percent of the capital and profits interests in such trade or business, and

"(B) in the case of a corporation—

"(i) stock possessing at least 70 precent of the total combined voting power of all classes of stock of the corporation entitled to vote, and

"(ii) at least 70 percent of the total value of shares of all other classes of stock of the corporation.

"(3) ACTIVE PARTICIPANT.—For purposes of this subsection, the term 'active participant' means an individual—

"(A) who is actively involved in the management of the trade or business, and

"(B) whose principal business activity is such trade or business.

"(4) SPECIAL RULES.—For purposes of this subsection—

"(A) CONTROLLED GROUPS.—

"(i) IN GENERAL.—In the case of a controlled group, all persons who are members of such group at any time during the calendar year shall be treated as 1 taxpayer for such year for purposes of determining the gross receipts of the taxpayer.

"(ii) CONTROLLED GROUP DEFINED.—For purposes of clause (i), persons shall be treated as members of a controlled group if such persons would be treated as a single employer under the regulations prescribed under section 52(b).

"(B) COORDINATION WITH SECTION 481.—In the case of a taxpayer who changes its method of accounting by reason of an election under this subsection, under regulations prescribed by the Secretary, the net amount of adjustment required by section 481(a)(2) to be taken into account by the taxpayer in computing taxable income shall be so taken into account in each of the 10 taxable years beginning with the year of change.

"(C) ELECTION.—

"(i) IN GENERAL.—The election under this subsection may be made without the consent of the Secretary and shall be made at such time and in such manner as the Secretary may by regulations prescribe.

"(ii) PERIOD TO WHICH ELECTION APPLIES.—The election under this subsection shall apply to—

"(I) the taxable year for which it is made, and

"(II) all subsequent taxable years for which the taxpayer is a qualified small business and meets the requirements of subparagraph (A) of paragraph (1).

unless the taxpayer secures the consent of the Secretary to the revocation of such election.".

(b) TECHNICAL AMENDMENT.—Section 471 of such Code is amended by striking out "Whenever in the opinion" and inserting in lieu thereof the following:

"(a) GENERAL RULE.—Except as provided in subsection (b), whenever in the opinion".

SEC. 3. 10-YEAR AVERAGING PERMITTED FOR INCREASES IN INVENTORY VALUE REQUIRED FOR ADOPTION OF LIFO METHOD.

Subsection (b) of section 472 of the Internal Revenue Code of 1954 (relating to last-in first-out inventories) is amended by adding at the end thereof the following new sentence: "For purposes of section 481, any increase in the valuation of inventory required by paragraph (2) shall be treated as an adjustment attributable to a change in a method of accounting not initiated by the taxpayer."

SEC. 4. USED PROPERTY ELIGIBLE FOR INVESTMENT TAX CREDIT INCREASED TO $200,000.

(a) IN GENERAL.—Paragraph (2) of section 4B(c) of the Internal Revenue Code of 1954 (relating to used section 38 property) is amended by striking out "$100,000" each place it appears and inserting in lieu thereof "$200,000".

(b) CONFORMING AMENDMENT.—Subparagraph (B) of section 48(c)(2) of such Code is amended by striking out "$50,000" and inserting in lieu thereof "$100,000".

SEC. 5. NONRECOGNITION OF GAIN ON ANY PROPERTY SOLD WHERE SMALL BUSINESS EQUITY INTEREST ACQUIRED.

(a) IN GENERAL.—Part III of subchapter O of chapter 1 of the Internal Revenue Code of 1954 (relating to nontaxable exchanges) is amended by adding at the end thereof the following new section:

"SEC. 1041. SALES OF PROPERTY WHERE EQUITY INTEREST IN QUALIFIED SMALL BUSINESS CORPORATION ACQUIRED.

"(a) NONRECOGNITION OF GAIN.—

"(1) IN GENERAL.—If any property is sold by the taxpayer and, within the 1-year period beginning on the date of such sale, any equity interest in any qualified small business corporation is purchased by the taxpayer, gain (if any) from such sale shall, at the election of the taxpayer, be recognized only to the extent that the amount realized on such sale exceeds the cost to the taxpayer of such equity interest.

"(2) ELECTION.—The election under paragraph (1) shall be made by filing, not later than the last day prescribed by law (including extensions thereof) for filing the return of tax imposed by this chapter for the taxable year in which the sale occurs, with the Secretary a statement (in such manner as the Secretary may be regulations prescribe) of such election.

"(b) DEFINITIONS.—For purposes of this section—

"(1) EQUITY INTEREST.—

"(A) IN GENERAL.—The term 'equity interest' means any common or preferred stock.

"(B) DEBT EXCLUDED.—The term 'equity interest' does not include any interest—

"(i) with respect to which the payment of money or other property is required solely by reason of the passage of time, or

"(ii) the repurchase of which may be required of the issuer solely by reason of the passage of time.

"(2) QUALIFIED SMALL BUSINESS CORPORATION.—

"(A) IN GENERAL.—The term 'qualified small buisness corporation' means a small business corporation (within the meaning of section 1244(c)(3)) which meets the passive investment income limitation of subparagraph (B).

"(B) PASSIVE INVESTMENT INCOME LIMITATION.—

"(i) IN GENERAL.—A corporation shall not be treated as a qualified small business corporation for any taxable year if, for the taxable year or any of the 3 taxable years after such taxable year, the passive investment income of such corporation is more than 15 percent of its gross receipts.

"(ii) DEFINITIONS.—For purposes of clause (i), passive investment income and gross receipts shall be determined as provided in subparagraph (C) of section 1372(e)95), as if the corporation were an electing small business corporation.

"(C) CONTROLLED GROUPS.—

"(i) IN GENERAL.—In the case of a controlled group, all persons which are members of such group at any time during the calendar year shall be treated as 1 taxpayer for such year.

"(ii) CONTROLLED GROUP DEFINED.—for purposes of clause (i), persons shall be treated as members of a controlled group if such persons would be treated as a single employer under the regulations prescribed under section 52(b).

"(c) SPECIAL RULES.—For purposes of this section—

"(1) EXCHANGE TREATED AS SALE.—An exchange by the taxpayer of property for other property shall be treated as a sale of the first property, and the acquisition of any equity interest on the exchange of property shall be treated as a purchase of such equity interest.

"(2) LIMITATION ON STOCK SALES.—In the case of any equity interest in a qualified small business corporation which is evidenced by stock (other than stock in a small business corporation as defined in section 1371), subsection (a) shall apply to the sale of such stock only if such sale would, if such stock had been purchased by the issuing corporation in such sale, be treated as a redemption within the meaning of paragraph (1), (2), or (3) of section 302(b), including the application of section 302(c).

"(d) REDUCTION OF BASIS.—Where the purchase of any equity interest results under subsection (a) in the nonrecognition of gain on the sale of any property, the basis of such equity interest shall be reduced by an amount equal to the amount of gain not so recognized on the sale of such property. Where the purchase of more than one equity interest is taken into account in the nonrecognition under subsection (a) of gain on the sale of a property, the preceding sentence shall be applied to each equity interest in the order in which each such equity interest is purchased.

"(e) STATUTE OF LIMITATIONS.—If the taxpayer during any taxable year sells any property at a gain, then—

"(1) the statutory period for the assessment of any deficiency attributable to any part of such gain shall not expire before the expiration of the 3-year period beginning on the date the Secretary is notified by the taxpayer (in such manner as the Secretary may be regulations prescribe) of—

"(A) the taxpayer's cost of purchasing any equity interest which the taxpayer claims results in nonrecognition of any part of such gain.

"(B) the taxpayer's intention not to purchase any equity interest within the 1-year period described in subsection (a), or

"(C) the failure by the taxpayer to purchase any equity interest within such period; and

"(2) such deficiency may be assessed before the expiration of such 3-year period notwithstanding the provisions of any other law or rule of law which would otherwise prevent such assessment."

(b) TECHNICAL AMENDMENT.—Subsection (a) of section 1016 of such Code (relating to adjustments to basis) is amended by striking out "and" at the end of paragraph (21), by striking out the period at the end of paragraph (22) and inserting in lieu thereof "; and", and by adding at the end thereof the following new paragraph:

"(23) in the case of any equity interest the acquisition of which resulted under section 1041 in the nonrecognition of gain on the sale or exchange of property, to the extent provided by section 1041(d)."

(c) CONFORMING AMENDMENT.—The table of sections of part III of subchapter O of chapter 1 of such Code is amended by adding at the end thereof the following new item:

"SEC. 1041. Sales of property where equity interest in qualified small business corporation acquired."

SEC. 6. CORPORATE INCOME TAX RATE REDUCTION.

Subsection (b) of section 11 of the Internal revenue Code of 1954 (relating to tax imposed on corporations) is amended to read as follows:

"(b) AMOUNT OF TAX.—The amount of the tax imposed by subsection (a) shall be the sum of—

"(1) 12 percent of so much of the taxable income as does not exceed $25,000,

"(2) 15 percent of so much of the taxable income as exceeds $25,000, but does not exceed $50,000,

"(3) 20 percent of so much of the taxable income as exceeds $50,000, but does not exceed $75,000,

"(4) 30 percent of so much of the taxable income as exceeds $75,000, but does not exceed $100,000,

"(5) 40 percent of so much of the taxable income as exceeds $100,000, but does not exceeds $150,000,

"(6) 43 percent of so much of the taxable income as exceeds $150,000, but does not exceed $200,000,

"(7) 45 percent of so much of the taxable income as exceeds $200,000, but does not exceed $250,000, plus

"(8) 46 percent of so much of the taxable income as exceeds $250,000."

SEC. 7. EFFECTIVE DATE.

(a) IN GENERAL.—Except as provided in subsection (b), the amendments made by this Act shall apply to taxable years beginning after December 31, 1980.

(b) SALES AND EXCHANGES.—The amendments made by section 5 shall apply only to sales and exchanges of property (the nonrecognition of gain on which is to be claimed under section 1041 of the Internal Revenue Code of 1954) in such taxable years.

● Mr. ARCHER. Mr. Speaker, I strongly feel that no segment of the American business community is more vital to the Nation's economic welfare than the small businessman and businesswoman. And yet, these hard-working men and women have long been beset by a tax code that endangers their livelihood and robs them of the incentive to expand to meet current and future markets. This is particularly damaging because small business provides the new, entry-level jobs our economy so sorely needs.

So, it is with great pride that I join today with Representatives HEFTEL, NOWAK, and DREIER in introducing the Small Business Tax Act of 1981, which provides tax relief and incentives needed by small business.

We fully expect the particular circumstances facing small business to be dealt with during this Congress and are confident the act's five provisions provide a sound framework from which this situation can be addressed.

The act's five provisions are:

A corporate income tax rate reduction which expands the 1978 Tax Reduction Act by increasing the surtax exemption to $250,000 and changing the rates and brackets. The top priority of delegates to the recent White House Conference on Small Business was a change in income tax schedules. They advocated further graduating the corporate tax rates, saying such a tax reduction is imperative if small businesses are to survive high inflation.

A provision to allow small firms with gross sales of less than $500,000 a year to use the cash method of accounting. Presently, these firms are forced to use the accrual method of accounting which allows the Government to tax them for paper profits derived from the inflated value of their inventories.

A provision to increase the current ceiling on the amount of investment tax credit that could be applied to used equipment to $200,000. The current $100,000 ceiling is discriminatory to smaller firms.

A small business rollover provision to allow a deferral of the capital gains taxes on the sale of an asset when the proceeds of the sale are invested in small business.

A provision to stretch out over 10 years the penalty imposed when a firm switches inventory accounting methods from FIFO to LIFO.

In closing, we feel the act is comprehensive and should have the support of the whole small business community.●

Mr. NOWAK. Mr. Speaker, today I am introducing H.R. 2949, the Small Business Tax Act of 1981. Joining me as original cosponsors are Representative HEFTEL, Representative ARCHER, members of the Ways and Means Committee, and Representative DREIER, a member of the Small Business Committee.

As chairman of the House Small Business Subcommittee on Tax, Access to Equity Capital and Business Opportunities, I view H.R. 2949 as an important, bipartisan first step toward assuring that our Nation's smaller firms receive significant and meaningful tax relief this year. To this end, the subcommittee is in the midst of an important series of hearings on the administration's tax reduction program, and is assessing how it will affect small business. At the close of these hearings on April 2, the Congress will have an important record, a road map, which, when followed, will lead us to our ultimate destination—tax equity for small business.

High interest rates and sluggish economic growth have led millions of smaller firms to the brink of disaster. They need tax relief now more than ever, to allow them to retain capital and attract new sources of equity investment. H.R. 2949 is designed to accomplish both goals. It will offer labor, as well as capital-intensive small business, a chance to boost internal cash generation and attract new equity investment.

The bill has five components. First, it increases the surtax exemption from $100,000 to $250,000. The rates and brackets are as follows:

Existing law

	Percent
$0 to $25,000	17
$25,000 to $50,000	20

$50,000 to $75,000	30
$75,000 to $100,000	40
Over $100,000	46

H.R. 2949

	Percent
$0 to $25,000	12
$25,000 to $50,000	15
$50,000 to $75,000	20
$100,000 to $150,000	30
$150,000 to $200,000	43
$200,000 to $250,000	45
Over $250,000	46

This component simply expands the action taken by the Ways and Means Committee in the Tax Reduction Act of 1978. It improves on present law by further reducing rates on the lower end, where most find themselves, and expanding the surtax exemption to offset inflation-induced bracket creep.

The second component is an expanded small business rollover provision. This would allow a deferral of capital gains taxes on the sale of an asset when the proceeds are invested in an equity position in a small business corporation within 12 months. This component is a variation of a bill I introduced last year, H.R. 5097, which allowed a rollover from one small business to another. My subcommittee's report on capital formation and retention recommended the enactment of such a rollover provision because it would encourage capital formation by retaining some of the capital now invested in the small business community.

The expanded rollover in H.R. 2949 goes one step further. It will literally funnel large amounts of capital into small business corporations as investors seeks to defer capital gains taxes. Money which is now locked up in sterile assets such as antiques, real estate, gold, and commodities will flow into the most productive sector of our Nation's economy—its small businesses.

The third and fourth components are cash accounting for small businesses and a LIFO conversion provision. I view both concepts as a part of a much broader concept I refer to as inventory reform. As was found in hearings held by my subcommittee, which were the first ever held on this subject, inventory reform is as important to the revitalization of our Nation's economy as is capital cost recovery. While both measures aid capital formation by increasing the internal cash flow of a business, they differ. Capital cost recovery aids capital-intensive businesses, while inventory reform helps labor-intensive businesses. The vast majority of smaller firms are primarily labor-intensive.

I recently introduced H.R. 2319, the Inventory Simplification Tax Act of 1981, which will help large, medium, and small businesses. The bill was based on recommendations of the capital formation task force on inventories, composed of 16 member associations representing a broad spectrum of the business community, and on recommendations of the subcommittee report on inventory accounting as a burden on the capital formation process.

The cash accounting component allows small firms with less than $500,000 of gross sales per year to use the cash, as opposed to accrual accounting. The LIFO conversion measure allows the penalty that is imposed when a firm switches accounting methods from first in, first out (FIFO) to be stretched out over 10 years. These two provisions, when added to some of the other components contained in H.R. 2319, will greatly aid smaller firms by eliminating needless regulations and providing an intelligent, tiered approach to our tax code.

The vast majority of smaller firms do not use LIFO and are denied the use of cash accounting. They will be able to do so, and as a result, enjoy an enhanced cash flow.

The fifth provision of H.R. 2949 increases the amount of investment tax credit eligible for the investment tax credit from $100,000 to $200,000, and is identical to a provision in H.R. 6171, which I introduced last session. An identical provision was contained in last year's Senate Finance Committee tax cut bill, H.R. 5829. The increase is justified on several grounds: First, as was pointed out in my subcommittee's report on capital formation and retention, smaller firms, to a great extent, rely on used machinery. They either cannot afford new machinery or cannot wait the 1 or 2 years it takes to receive delivery of new machinery. Second, the credit was last raised in 1975, from $50,000 to $100,000. Simple adjustment for inflation would raise the limit to $200,000. There is strong evidence to suggest that the amount should be raised to $300,000, or eliminated altogether.

H.R. 2949 is an important milestone on the road to tax equity for small business. The road is filled with turns and obstacles but the end is plainly in sight. The House, the Small Business Committee, and my fellow cosponsors, need to pull together in this effort. H.R. 2949 points the way, and when added with other small-business-oriented tax initiatives, will assure that this vibrant, job-producing, innovative, and competitive business sector continues to deliver the ideas, jobs, and products our Nation so desperately needs.●

● Mr. DREIER. Mr. Speaker, small business is undoubtedly the most talked about, but least acted upon sector of our economy. While almost everyone will readily agree that small business is the backbone of the Nation's economy, too often those same people do nothing to encourage the survival of this vital sector.

Small businesses account for 43 percent of the Nation's gross national product, provide virtually all new private sector employment, and are responsible for more than half of all major innovations. However, America's small businesses are failing at an alarmingly high rate.

It is essential that policies be implemented to create an environment in which individual initiative and ingenuity can prosper. Instead, a complex and inequitable tax code threatens the very existence of many of America's small enterprises.

To address this intolerable situation, I am joining with three of my distinguished colleagues to introduce the Small Business Tax Act of 1981, H.R. 2949. This vital legislation is a bipartisan effort to attack the most pressing problems of our Nation's small businesses. I am pleased to join Mr. HEFTEL and Mr. ARCHER, of the Committee on Ways and Means, and Mr. NOWAK, my colleague on the Committee on Small Business, in introducing this measure.

The five provisions of the Small Business Tax Act seek to:

First. Allow small businesses with gross receipts under $500,000 the option of electing the cash method of accounting. Currently, the accrual method of accounting must be used, which taxes businesses on the "paper profits" derived from the inflated value of their inventories.

Second. Establish a more graduated corporate tax rate structure as follows:

Current scheme

	Rate (percent)
$0 to $25,000	17
$25,000 to $50,000	20
$50,000 to $75,000	30
$75,000 to $100,000	40
Over $100,000	46

Heftel-Archer-Nowak-Dreier

	Rate (percent)
$0 to $25,000	12
$25,000 to $50,000	15
$50,000 to $75,000	20
$75,000 to $100,000	30
$100,000 to $150,000	40
$150,000 to $200,000	43
$200,000 to $250,000	45
Over $250,000	46

Third. Allow a capital gains tax deferral on the sale of an asset when the proceeds are invested in a qualifying small business.

Fourth. Increase the amount of used equipment eligible for the investment tax credit from the $100,000 under current law to $200,000.

Fifth. Ease the initial penalty imposed when a firm changes from the first in, first out (FIFO) to the last in, first out (LIFO) method of accounting, by allowing a 10-year averaging on required increased inventory values.

The provisions of this act are critically important to the revitalization of a healthy small business sector. These are concepts which hold the strong

support of the small business community.

I ask my colleagues to cosponsor the Small Business Tax Act which will provide relief for America's small business sector. We must all work to enact legislation which will nurture, not destroy, the foundation of the American free enterprise system.●

THE VIETNAM-ERA VETERANS HEALTH CARE AND BENEFITS ACT OF 1981

The SPEAKER. Under a previous order of the House, the gentleman from South Dakota (Mr. DASCHLE) is recognized for 5 minutes.

● Mr. DASCHLE. Mr. Speaker, I am today introducing omnibus legislation entitled the "Vietnam-Era Veterans Health Care and Benefits Act of 1981," which I feel will go far to address the current needs of America's Vietnam veterans.

The first part of this bill will address the most perplexing issue facing Vietnam veterans since their return from the war over 10 years ago, and that is the question of agent orange. I have already introduced legislation (H.R. 2493) to compensate Vietnam veterans who may be suffering from conditions due to exposure to that deadly herbicide. I will continue to push for passage of this legislation, but in the meantime I feel that there is an intermediate step that everyone agrees can and should be taken. This intermediate step would require that a veteran, who feels his condition is a result of exposure to herbicides, and who is examined by a VA physician and determined to be in need of medical assistance, will be provided with the necessary hospitalization or outpatient treatment. This will at least assist veterans and their families in defraying the expensive medical costs that are associated with chronic illnesses (cancer, et cetera). In the meantime, the VA, Air Force, and Center for Disease Control epidemiolgy studies will hopefully be able to provide us with more definitive evidence of likelihood that service in Vietnam, or exposure to herbicides, can cause chronic health effects. If an association is proven, compensation can and will then be paid.

Second, my bill will address the recommedations made by the White House Interagency Work Group on Phenoxy Herbicides to the VA regarding their proposed epidemiology study. These recommendations were to expand the scope of the study to include the possible effects of factors other than herbicides, namely medications (dapzone), chemicals (pentachlorophenol) or any other products that may have health implications on veterans who served in Southeast Asia.

Third, this legislation will reauthorize the Vietnam veteran outreach centers, which in their initial year of operation, counseled over 50,000 Vietnam veterans and members of their families. This program has been tremendously successful and I am encouraged that both the House and Senate Veterans' Affairs Committees, as well as the Senate Budget Committee, have included funds for the continuation of the program. The vet center in Sioux Falls, S. Dak., has counseled over 600 persons, many of whom I have spoken with. They have been virtually unanimous in their praise for the program and desire for its continuation.

Fully 48 percent of the Vietnam veterans visiting these centers have stated that a major impediment to their successful rehabilitation is their inability to find a job. As we are all aware, most previous Government efforts (CETA, Hire I and II, et cetera) aimed as assisting Vietnam veterans in getting a job have been a dismal failure. One of the few exceptions to this unfortunate pattern, has been the VA administered OJT program where 74.8 percent of those enrolled have completed the program and 95 percent have gone on to use their training for actual employment purposes. Thus, the final portion of my legislation will give Vietnam veterans, identified through the vet centers, or other VA offices, an opportunity to train under the OJT program, regardless of whether they have been delimited or not. I feel that this last effort should be made to reach out and assist those Vietnam veterans who desire to become gainfully employed. I have introduced this particular section of the omnibus bill earlier as H.R. 2391.

Finally, Mr. Speaker, I feel that passage of this omnibus legislation will be a substantive indication to Vietnam veterans that every effort is being made to assist them in completing their readjustment from the war, and that this Nation is behind those who have fought in the past, just as it is now behind a new, vigorous effort to revitalize its Armed Forces, and seek new recruits for possible future confrontations. I hope that my colleagues will see fit to support this legislation.

H.R. 2953

A bill to authorize the Administrator of Veterans' Affairs to provide medical care to certain veterans who served in the Republic of Vietnam during the Vietnam era, to extend by two years the period during which Vietnam-era veterans may initially request psychological readjustment counseling, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Vietnam-era Veterans' Health Care and Benefits Act of 1981".

SEC. 2. (a)(1) Section 610(a) of title 38, United States Code, is amended—

(A) by striking out "and" at the end of clause (3);

(B) by redesignating clause (4) as clause (5); and

(C) by inserting after clause (3) the following new clause (4):

"(4) any veteran who served in the Republic of Vietnam during the Vietnam era if a physician employed by the Veterans' Administration (or working under a contract or fee arrangement with the Veterans' Administration) determines that such hospital care is necessary for the treatment of a condition that may be associated with exposure while serving in the Republic of Vietnam to the herbicide defoliant commonly known as 'Agent Orange'; and".

(2) Section 612(g) of such title is amended—

(A) by inserting "(1)" after "(g)"; and

(B) by adding at the end the following new paragraph:

"(2) The Administrator, within the limits of Veterans' Administration facilities, may furnish medical services on an outpatient or ambulatory basis to any veteran eligible for hospital care under the authority of section 610(a)(4) of this title if a physician employed by the Veterans' Administration (or working under a contract or fee arrangement with the Veterans' Administration) determines that such medical services are necessary for the treatment of a condition that may be associated with exposure of such veteran while serving in the Republic of Vietnam to the herbicide defoliant commonly known as "Agent Orange'.".

(3) Section 612(i)(4) of such title is amended by inserting "(f)(3) or" after "subsection".

(4) The amendments made by this subsection shall take effect on October 1, 1981.

(b) Paragraph (1) of section 307(a) of the Veterans Health Programs Extension and Improvement Act of 1979 (Public Law 96-151; 93 Stat. 1097) is amended to read as follows:

"(1)(A) The Administrator of Veterans' Affairs shall design a protocol for and conduct an epidemiological study of the long-term adverse health effects in humans of service in the Armed Forces of the United States in the Republic of Vietnam during the period of the Vietnam conflict as such health effects may result from exposure to phenoxy herbicides (including the herbicide known as 'Agent Orange') and the class of chemicals known as 'the dioxins' produced during the manufacture of such herbicides. In conducting such study, the Administrators may include an evaluation of the adverse health effects in humans of such service as such health effects may result from other factors involved in such service, including exposure to other herbicides, chemicals, medications, or environmental hazards or conditions.

"(B) The Administrator shall also conduct a comprehensive review and scientific analysis of the literature covering other studies relating to whether there may be long-term adverse health effects in humans from exposure to phenoxy herbicides (including the herbicide known as 'Agent Orange') and the class of chemicals known as 'the dioxins' produced during the manufacture of such herbicides. In conducting such review and analysis, the Administrator may include a review and analysis of the literature covering other studies relating to whether there may be long-term adverse health effects in humans from other factors involved in service in the Armed Forces of the United States in the Republic of Vietnam during the Vietnam conflict or in other comparable situations involving one or more of the factors described in the second sentence of subparagraph (A).".

SEC. 3. Section 612A(a) of title 38, United States Code, is amended by striking out "or two years after the effective date of this section" and inserting in lieu thereof "or by September 30, 1983".

SEC. 4. (a)(1) Subchapter IV of chapter 34 of title 38, United States Code, is amended by adding at the end thereof the following new section:

§ 1687. Vocational training programs for veterans of the Vietnam era

"(a) Subject to subsection (b) of this section, any eligible veteran who served on active duty during the Vietnam era may be provided educational assistance under this chapter for the purpose of pursuing (1) a program of on job training (other than apprenticeship), or (2) a program of education with a vocational objective (other than flight training) without regard to the provisions of section 1662(a)(1) of this title. Upon completion of a program provided by virtue of this section, the Administrator shall provide the veteran with such employment counseling as may be necessary to assist the veteran in obtaining employment consistent with the veteran's abilities, aptitudes, and interests.

"(b) Educational assistance may be provided by virtue of this section only if the veteran has been determined by a counselor at a readjustment counseling center established under section 612A of this title, a State employment office, a veterans' assistance office, or a Veterans' Administration medical facility as being in need of a program or course described in subsection (a) of this section. Any such determination shall be made in accordance with regulations which the Administrator shall prescribe.

"(c) Assistance may not be provided by virtue of this section after the end of the two-year period beginning on the later of (1) October 1, 1981, or (2) the first day of the third calendar month following the date of the enactment of this section.".

(2) The table sections at the beginning of such chapter is amended by inserting after the item relating to section 1687 the following new item:

"1687. Vocational training programs for veterans of the Vietnam era."

(b) Section 1687 of title 38, United States Code, as added by subsection (a) shall take effect on October 1, 1981.

IMPACT OF PROPOSED BUDGET CUTS ON AKRON, OHIO

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and include extraneous matter.)

● Mr. SEIBERLING. Mr. Speaker, I would like to insert into the RECORD today a preliminary analysis I have prepared showing the probable effects of President Reagan's proposed budget revision on the Akron area, which I represent. This analysis is not intended as an expression of my own position on any of the President's proposals. Rather, I have compiled this information so that the people of my district can better evaluate the President's proposed budget and advise me and other Federal elected officials as to their preferences with regard to the proposed cuts. I believe other Members of the House may find this analysis helpful.

In the fiscal year 1982 budget recommendations the President recently submitted to Congress, he proposed that total Federal spending be held to $695.3 billion, with budget authority of $772.4 billion. He projects revenues of $650.3 billion and a deficit of $45 billion.

This compares with former President Carter's projected revenues of $711.8 billion and deficit of $27.5 billion. The reason President Reagan's projected deficit is so much higher is that he has also proposed significant tax cuts.

Although he has not yet presented all of the specific proposals to Congress, President Reagan states that his budget will reduce former President Carter's 1982 proposed spending level by $48.6 billion. In order to achieve this saving, President Reagan has recommended broad spending cuts in numerous Federal programs, projects, and services. The so-called safety-net programs—social security retirement, medicare, supplemental security income, some veteran's benefits, some school lunches, Operation Head Start, and summer youth jobs—will be spared significant cuts, and the Defense Establishment will actually see a sizable increase. but almost every other area of Federal spending is ticketed to be cut back or eliminated.

I certainly believe that we must end runaway Federal spending. Congress must review the mountain of Federal programs that has been created over the last 30 years and reestablish our priorities. We must separate the nonessentials from the essentials. But in so doing, we must carefully study each individual proposal and act always to protect the vital interests of the people in our communities, and the country as a whole. In other words, we must cut with a scalpel, not with a meat-ax.

With this objective in mind, I have analyzed many of the proposed cuts—the programs affected, the manner in which they will be cut, and the possible impact these cuts will have on Akron area residents. The complete details of the President's proposals are still not available. And even where they are available, it is not always possible to state precisley what the impact would be on the Akron area. It should also be pointed out that these proposals will not necessarily mean that all the programs at the local level will be cut back. Some of the proposed cuts may be offset by a reallocation of State and local budget priorities, by an increase in State or local taxes, or by reduction in administrative costs.

Mr. Speaker, the full text of the analysis follows these remarks:

IMPACT OF THE PROPOSED BUDGET CUTS ON THE AKRON AREA

FAMILY ASSISTANCE

Food stamps

This program subsidized the food purchases of lower-income individuals to help them obtain a minimal diet.

President Reagan proposes placing a cap on the gross income of participants at 130% of the poverty level, or about $11,000 a year for a family of four. Currently, eligibility is based on net income, which is arrived at by allowing certain deductions from gross income, such as work-related expenses, high utility and shelter costs, and medical expenses for the elderly. President Reagan proposes eliminating these deductions. He also proposes retrospective accounting of income, which means that eligibility will be determined by looking at income received over a period of months (as yet unspecified) rather than determining eligibility based on current income alone, as is now done under current law. He also proposes reducing food stamp benefits to households with school-aged children who receive subsidized lunches.

In 1980, the Federal government sent Summit County $20.7 million in food stamp assistance. Recent figures show that there are 49,269 food stamp recipients in Summit County and 11,883 in Portage County. It is estimated that about 5% of total households in the north-central area of the U.S. will lose their food stamp benefits under the Reagan proposal. This means that as many as 3,000 current food stamp participants in the Akron area could stop receiving these benefits. The retrospective accounting proposal means that anyone who suffers a sudden and severe loss of income, such as a laid-off worker, may not be able to receive immediate food stamp benefits. The likely effect of eliminating the "double-lunch" subsidy to poor school children will be to increase the reliance of poor families on the school lunch program at a time when schools, because of reduced subsidies to the school meal programs, may be forced to end meal service.

Child nutrition

This program finances a variety of meal programs, such as school lunches.

President Reagan proposes eliminating the subsidies for students from families above a certain income level. For instance, children from a family of four making more than $15,630 a year would no longer be eligible. Subsidies for children from a family of four with incomes between $11,640 and $15,630 a year would be maintained. Free lunches would be continued for children from a family of four earning less than $11,640.

All elementary and secondary schools in the Akron public school system participate in the child nutrition program. For the 1980–81 school year, 34.5% of the total enrollment is eligible for free school lunches. Eighty-six percent of those eligible, or 11,455 students, actually receive free lunches, and 2,782 students receive reduced price lunches. The amount of Federal child nutrition subsidy a school receives depends on the number of participating students. The Federal subsidies help keep the prices of the meals down for all students. A reduction of the amount of subsidies going to the schools will force other children to pay a higher cost. Some children may then have to drop out of the program which may make it very difficult for the schools to offer any

kind of nutrition program at all. Since Ohio state law requires that schools offer such a program the state will have to either change the law or increase its own subsidies to the schools.

Supplemental feeding for women, infants, and children (WIC)

This program provides Federal assistance to certified community health clinics to purchase food supplements for pregnant and nursing women, infants, and children up to 5 years of age who are determined to be at risk of undernourishment because of low income.

President Reagan proposes to fund WIC at $720 million for FY 1982, cutting the program by 20% of current spending.

In Summit County, the program serves 4,379 individuals who are referred it by the public health clinics and hospitals when symptoms of malnutrition or anemia are detected through physical examination. The Summit County program received $1.9 million for WIC in FY 1981, and recently experienced a 15% cut in state assistance.

Aid to families with dependent children (AFDC)

This program provides Federal funds to states on a matching basis to pay cash welfare benefits to needy families with dependent children. In Ohio, the Federal government contributes 55% of the benefits.

President Reagan proposes requiring that certain other non-cash benefits and sources of income that are currently excluded from consideration (such as income of a stepparent, food stamps and housing assistance) be considered in computing eligibility and benefit levels. He also proposes setting a maximum deduction of $135 for work and child care expenses in determining AFDC eligibility, and providing AFDC support only to families which earn less than 150% of a state's minimum needs standard. He also proposes excluding from the program strikers and children over 18 not in school.

Many single-parent families receive AFDC, as do families with an unemployed parent. In 1980, the total Summit County AFDC expenditure was $29 million and the total Portage County expenditure was approximately $6 million. Over 55% of each share came from the federal government.

Currently, in Summit County 29,656 people are receiving AFDC. In Portage County there are 5,606 AFDC recipients. Officials from the Department of Health and Human Services have testified that on a nationwide basis, the Reagan proposals would cut 10.6% of the current recipients out of the program and reduce the benefits of another 6.8%. If these cuts are applicable to the Akron area, 3,738 Akron area recipients would lose their AFDC benefits altogether and another 2,398 would experience benefit reductions. However, because most of the working poor live in higher cost urban areas and the Northeast-Midwest region of the country, it is likely that the cuts will be disproportionately higher in the Akron area.

Social service programs

Currently, the Federal government contributes to state and country-run social service programs known as Title XX which provide services for the mentally retarded, meals-on-wheels for the aged and disabled, child day care for children of low income working mothers, homemaker services, children's medical services and more. The Federal government also provides funds for other state social services such as foster care, rehabilitation, adoption assistance and the Community Services Administration.

President Reagan proposes consolidating these programs into one block grant to states. States could use the grants for a variety of activities including but not limited to the programs being replaced. States will have the ability to establish their own priorities and decide which programs and services will be funded. They would not have to match any of the funds with their own money. This consolidation will reduce overall funding by $1.2 billion, or 25%, in 1982.

Nationwide, in 1981 these programs will serve 900,000 aged, blind and disabled persons, 600,000 low income children in day care centers, one million abused or neglected children, 500,000 children in foster homes and 1.4 million handicapped persons, among others.

In fiscal year 1981, the state of Ohio received almost $143 million in Federal Title XX funds. The proposed 25% cut would reduce Ohio's funding by $35.7 million.

In Summit County, Title XX homemaker services received almost $1.3 million in Federal funds in 1980, and over $1.1 million in Federal money for day care services. The Title XX contract services in Summit County, which include mental health services, counseling and meals-on-wheels, received $11.9 million in Federal funds, which amounted to 84.4% of the total amount spent on these contract services in Summit County.

In October, 1980, the Summit County Welfare Department handled 12,674 Title XX cases, including 9,749 early periodic children's screening diagnosis and treatment cases, 1,131 children's medical services and 929 transportation service cases. Under the contract services, there were 1,388 day care participants.

Low-income energy assistance program (LEAP)

LEAP, known in Ohio as HEAP or Home Energy Assistance Program, provides $1.7 billion for payments from states to individuals who cannot meet the high costs of home heating fuel.

President Reagan proposes to combine LEAP with the Emergency Assistance program under title IV of the Social Security Act into a hardship block grant to be administered through the states. Under the block grant, states would have wide latitude to determine who would participate in the program, how much their benefits would be and how the funds would be used. The hardship fund would be funded at 25% less than the combined total of the two programs in fiscal year 1981.

A reduction in LEAP funds could increase the difficulties of low-income people in paying their winter heating bills, especially since the cost of home heating fuel keeps going up. Figures for the local area are not available. However, Ohio received $91 million to assist in home heating in 1981. Under the Emergency Payment program. Ohio used $11 million of the $53 million available nationwide, or 21% of all Federal funds in the program.

CITIES

Economic development administration

EDA provides a variety of grants, loans and technical assistance to generate community investment and create new permanent employment in the private sector in economically distressed areas.

President Reagan proposes to abolish EDA.

In Ohio in 1980, EDA invested over $35 million which led to the investment of $75 million in private sector funds and the creation or preservation of almost 10,000 jobs.

In Akron, EDA has participated in projects including the Goodyear Technical Development Center, the Sweitzer Avenue Industrial Development Project, and $65,000 in annual planning assistance to the NEFCO regional planning agency. Loss of EDA grants will affect the Downtown Development Plan for Akron as well as the Revolving Loan Fund application by the city for $3 million to assist small businesses in Akron to expand and create more jobs.

EDA planning funds have also gone into Barberton to support planning for the reuse of the former Seiberling Tire plant, closed last year.

Urban development action grants

The UDAG program provides grants to economically distressed localities in cases where the grants will bring about substantially larger investment by private businesses in major commercial and industrial developments and will create new jobs.

President Reagan proposes merging UDAG into the Community Development Block Grant program cutting the combined budget authority by $584 million, leaving it at about 15% of UDAG's fiscal year 1981 appropriation.

The city of Akron has received $18.5 million to date through the UDAG program, providing a basis of investments totalling over $100 million in the Goodyear Tech Center, Sweitzer Avenue Industrial Development area, and the Quaker Square Hilton. The budget cut will directly affect the Akron Downtown Development Plan which called for a $180 million investment including $75 million in Federal finds much of it UDAG funds, as well as the future chances of the cities of Kent, Lakemore, and Barberton, which are also eligible for UDAG, to receive funding for revitalization programs. A budget cut for this fiscal year would have an immediate effect on the Channelwood II UDAG. The project would provide 186 new low and moderate income housing units for Akron and $2.4 million to the City to support public improvements in the project area.

HUD planning assistance

The planning assistance programs for the Department of Housing and Urban Development was set up to develop regional land use and development planning capabilities at the state and local level.

President Reagan proposes cutting back funds this year and next, and phasing out the entire program in 1983.

The NEFCO regional planning agency receives approximately $150,000 annually in HUD planning funds to support a wide range of housing and community development planning work, such as the Area Wide Housing Opportunity Plan.

Waste treatment

This Environmental Protection Agency program finances construction of municipal waste water treatment plants and sewage systems.

President Reagan proposes providing enough funds to complete projects already underway, but in coming years he proposes financing only certain high priority projects.

Depending on how this policy is applied, it could halt the $42 million investment in the Springfield-91 Phase II sewer project in southern Summit County as well as projects in Akron, Norton, Twinsburg Township, and Hudson which are now in the planning stages.

Energy conservation

The Department of Energy administers conservation programs such as weaterization assistance and development of technology to produce energy from municipal wastes.

President Reagan proposes scaling back conservation grants by 10% in 1981 and by 40% in 1982.

Such cutbacks would have a direct effect on Akron and other cities in the Northeast and Midwest because of the cold winters, high energy costs, and the preponderance of older, energy-inefficient housing stock.

The weatherization program is scheduled to complete work on 750 homes in the Akron area next year, if the program is continued.

President Reagan also proposes eliminating all loan and loan guarantee authority authorized to support production of energy from municipal wastes. This would end the only means in sight for insuring the financial viability of the City of Akron's Recycle Energy System and the continued market for steam from this plant which requires a $12 million price support loan to guarantee financing for the plant.

HEALTH

Medicaid

This is a joint Federal-state program which pays doctor, hospital, nursing home and other health costs of the poor. Within broad Federal guidelines, states set rules for eligibility and payment rates. Eligible persons are entitled to have their bills paid, whatever the total cost. Under current law, the Federal government pays an average of 55% of a state's medicaid cost, while the state makes up the remainder.

President Reagan proposes capping the Federal contribution to medicaid, allowing it to increase only 5% in 1982 when medicaid costs are expected to increase more than 15%.

Currently, 35,246 Summit County residents are receiving medicaid, as are 4,245 Portage County residents.

In 1980, the total Summit County expenditure was $34.8 million. Portage County spent about $10 million. Over $24 million of the two counties' expenditures was contributed by the Federal government.

If medicaid costs rise as predicted, under the Reagan proposal the state would have to make up the portion of the Federal share being cut, or cut administrative costs, or change the eligibility requirements to allow fewer people to receive these benefits. Presently, states must serve the categorically needy (those on AFDC or Supplemental Security Income) and may choose to serve the medically needy (those who are not poor but who still cannot afford medical care). With the block grant, states could terminate service for the medically needy. In addition, they could decide to insist that medicaid beneficiaries receive care from only certain lower-cost institutions, reduce the amount of reimbursement for care providers, or require that beneficiaries contribute to their medical care.

Health service programs

The Federal government currently administers 26 categorical grants for general health services and prevention programs, such as alcoholism prevention and treatment programs, maternal and child health care, hypertension clinics and rat control programs.

President Reagan proposes combining all health service programs into a health service block grant and a preventive health service block grant to the states. He also proposes cutting the overall funding for these programs by 25%. The general health services block grant would get $1.1 billion in 1982, and the preventive health services block grant would get $260 million.

By changing the current competitive grant program to a block grant program, the mechanism could be eliminated which gives local public health departments Federal assistance based on the merits of their proposals and past performance. Akron has obtained assistance through the categorical program in lead paint poisoning prevention ($128,000; Akron is one of only three Ohio cities receiving such assistance); hypertension clinics ($47,400); rodent control ($64,421; Akron is one of only six Ohio cities receiving such assistance); veneral disease clinics ($47,663, reduced by the state to $35,750); risk hazard education, a school program which is relatively new in Akron ($94,482); and prenatal clinic ($22,304).

Reducing funding by 25% could affect each of these programs. Changing the mechanism by which they are funded could lead to their elimination.

Health care cost-containment regulations

Currently, there are two Federal programs which support state and local health planning agencies and professional standards review organizations (PSRO's), which aim to reduce health care costs by reviewing hospital stays under the Medicare/Medicaid programs, and by reviewing need for procurements and construction proposed by hospitals.

President Reagan proposed phasing out the health planning programs and terminating the PSRO's.

The Region 6 Health Service Agency, which serves Summit and Portage Counties, received for FY 1981 a grant of $447,460 (a reduction of $50,000 from the previous year). The Health Service Agency (serving the same area) received $347,000 in Federal assistance. Both programs would be terminated within two years under the Reagan proposal.

It is possible, of course, that local industry in Portage and Summit Counties will be interested in funding these programs as a means of controlling costs of employee health and hospitalization programs.

Health training subsidies

Currently, the Federal government targets subsidies for schools to train more doctors, dentists and other health professionals.

President Reagan proposes reducing the 1982 budget by $133 million, leaving it at less than half the 1981 appropriation. He proposes restricting the program to health professionals that are in short supply. Nursing is one such a profession.

There are 324 nursing students in the Akron area now receiving loans and scholarships under this program. Despite the intent to refocus funds toward nurse training, it is predicted that the nurse training programs at both Kent State University and the University of Akron may experience a reduction in money available to their enrolled students. Both schools would lose their capitation grants (aid to the institutions based on enrollment) since this program would be completely eliminated under the Reagan budget proposal. All FY 1981 money would be rescinded. In addition, since nursing students in these schools rely on the loan and scholarship program it is estimated that 50% of the students will have to reevaluate their financial position if funding is cut.

JOBS

Unemployment insurance—extended benefits

This program provides an additional 13 weeks of unemployment insurance to unemployed workers (in addition to the regular 26 weeks) when the national insured unemployment rate goes above 4.5%. But a state can start disbursing extended benefits earlier if the state's own insured unemployment rate is at least 4% and at least 20% higher than for the comparable period in the two prior years.

President Reagan proposes eliminating the national rate which automatically "triggers" these extended benefits, and he proposes requiring a higher level of unemployment in individual states before extended benefits are paid. State "trigger" rates would be increased to 5% insured unemployment (and 120% of the rate in the comparable period of the prior two years) or, at state option, to 6% (without regard to prior years).

As of February 28, 1981, 2,108 Summit County residents were receiving extended benefits, as were 1,023 Portage County residents. It has been estimated that these benefits for over 650 rubber workers have already run out.

Since Ohio's unemployment rate has been higher in recent years than the national unemployment rate, Ohio would not be affected by the proposal to eliminate the national "trigger." However, the change in the state "trigger" could affect Ohio. On February 2, 1980, Ohio triggered into the extended benefit program when the state insured unemployment rate reached 4.16%. If the state trigger rate had been 6%. If the state trigger rate had been 6% (as is now proposed) extended benefits would not have been available until July 5, 1980, at which time insured unemployment in Ohio hit 6.08%. Thus if the Reagan proposal had been in effect in 1980, there would have been a five month delay in extended benefits.

Currently, the insured unemployment rate in Ohio is 6.16% so Ohio would not be immediately affected if the Reagan proposal is enacted.

Trade adjustment assistance

This program provides benefits to workers who lose their jobs because of significant increases in imports to the U.S. It supplements unemployment insurance.

President Reagan proposes limiting the benefits so that they would be no higher than unemployment insurance payments. He also proposes delaying the payment of the benefits until unemployment benefits have run out.

From April 1975 through December 1980, over 107,000 Ohio workers received TAA. This number was second only to Michigan.

Locally, as a result of the recent closures of Seiberling Tire and other rubber and auto plants in the vicinity, 640 Akron area residents are currently eligible to receive these benefits. Certification for the benefits is still pending for almost 1,000 other applicants. And TAA benefits have already run out for hundreds of other tire and auto workers.

Public service jobs

In 1974, Congress provided money under the Comprehensivce Employment and Training Act (CETA) to local governments and nonprofit organizations to generate jobs for unemployed workers.

President Reagan proposes hiring no new CETA workers and eliminating all the positions in FY 1982.

The program provides job experience for long-term unemployed workers who cannot find jobs elsewhere in the local economy. As of February, 1981 the Akron area Employment and Training Consortium employed 443 workers, and Portage County CETA employed 125 workers, all of whom would lose their jobs. Statewide, 14,700 CETA workers were employed in 1980.

Cuts in the CETA budget would also eliminate $50 million for a nationwide worker retraining project to be demonstrated at 10 sites. This will probably rule out chances for the success of the Summit County Council of Governments' proposal to retain laid-off workers and assist them in job placement.

Because the elimination of CETA public service jobs will increase the number of people on unemployment and welfare, the Congressional Budget Office has estimated that 15% to 25% of the projected savings from the Reagan proposal would show up as spending increase in the income transfer portion of the budget.

Young Adult Conservation Corps

This youth training program hires young people to work on public lands.

President Reagan proposes phasing out this program by the end of 1982.

In the Cuyahoga Valley National Recreation Area, 45 young people are employed in the YACC project. In addition to providing job training for the youths, the program has insured that many development projects such as trail maintenance have been completed, and at a lower cost than if the Park Service had to fund the projects itself.

Retired Federal workers

Currently, the pensions of retired civil servants are automatically adjusted twice a year to make up for the impact of inflation.

President Reagan proposes limiting these adjustments to one a year on the basis that virtually every other group receiving Federal benefits now gets only one such cost of living adjustment a year.

The National Association of Retired Federal Employees states that there are 2,500 retired Federal employees in the 14th Congressional District.

EDUCATION

Elementary and secondary education

Currently, there are more than 50 Federal categorical grant programs which aid various state and local education programs such as education for the handicapped, tutoring, career education, school improvement, library services, basic skills improvement, magnet schools, and Indian and refugee education, to name a few.

President Reagan proposes combining most of these separate programs into two block grants (one for the school districts and the other for the states) and cutting back this year's funding for the programs by 25%. Five percent annual increases would be allowed 1982-1986.

Programs that could be merged into the block grant program include:

In Akron this year, 34 elementary buildings and 8 parochial received $2.7 million in Title I Federal funds targeted to low-income neighborhood schools. This program, which includes kindergarten improvement, remedial reading and math, high intensity reading centers and parent advisory training, serves 3,202 public, 185 parochial and 108 children from institutions who are the most educationally disadvantaged in the Akron Public Schools. A 20-25% cutback could drop as many as 14 schools from service, cut reading in half, eliminate the math program, or reduce the supporting staff.

In fiscal year 1981, Akron Public Schools received $557,000 in Federal funds for special education. 90% of the funds are spent on personnel who are specialists serving in programs such as-hearing and vision impair ment, language disability, severe muscular handicaps and tutoring, among others. A 25% cut could result in the elimination of at least 20 of the specialists.

In 1981, $158,000 was received from the Federal government for purchase of library materials, books and audio visual equipment. A deep cut in this program could prevent the Akron District from meeting the existing state standards for elementary school libraries.

Federal funds of $362,343 were received for the Follow Through program, which helps Head Start participants preserve the gains made in the pre-school program. A cut could eliminate necessary staff and classroom units. The Akron Follow Through program was selected, as a model program and thus received a $158,000 Federal grant for use in training others around the country in implementing Follow Through. A cut here would limit staff and training sessions.

Another $40,000 Federal grant has been used to offer technical assistance in 15 cities as an incentive to adopt the Akron District's Career Education Program. The In-School program which employs 330 youths during the school year received nearly $800,000 in Federal funds and the Summer Employment Program, which employed over 1,000 young people, received $846,000.

The Indian Affairs program received almost $70,000 in Federal funds to conduct remedial activities for American Indians in the Akron schools, and the Indochinese refugee program received $8,500 for the purpose of teaching 47 refugee children to speak English and participate in regular classrooms.

The Reagan Administration has said that it expects administrative savings to achieve the proposed 25% reduction. However, the Congressional Budget Office estimates that administrative costs consume only 2% of the entire Education Department budget. Some have estimated that the Reagan proposals could result in one million fewer students being served by education programs and the loss of 75,000 jobs nationwide.

Vocational education

The Federal vocational education programs provide funds under formulas to states to supplement local support for vocational training.

President Reagan proposes reducing the Federal program by 25% in 1981, and by 20% in 1982.

In 1980, there were 54,614 people involved in vocational training in Summit County. The total amount of funds for vocational education in Summit County was $15.5 million. The Federal Government's share of that equalled $1.4 million, while $7.5 million came from the state and $6.8 million was contributed locally. To cite two specific 1980 programs—for programs for the handicapped, the Federal funds equalled $32,359 and the local funds equalled $5,674, and for programs for the disadvantaged, the Federal share was $535,000, the state share was $1.5 million and the local share was $1.2 million. A significant loss of funds for the Summit County program could have an impact of the provision of any number of programs, on equipment purchase, on staff levels or on curriculum development.

Social security—student benefits

Students between the ages of 18 and 21 whose parents are dead, retired or disabled are entitled to social security benefits, regardless of need.

President Reagan proposes to terminate the program for new students and to reduce the benefits of students already in school by 25%.

Akron area students who now receive this benefit will be affected, as will institutions like Akron University and Kent State University where students with marginal finances may leave or fail to enroll.

In December, 1979 (the most recent data available), 1,901 students with Summit County mailing addresses received the monthly student benefits. The total of these benefits for that month was $415,905 so the average benefit was $218.78.

Also in December, 1979, students with Portage County mailing addresses received student benefits, totalling $86,768, for an average benefit of $216.40. It has been estimated that about one-tenth of KSU's enrollment, or around 2,000 students, is receiving these benefits.

Student loans and grants

Guaranteed Student Loans (GSL) allow graduate and undergraduate students and their parents to borrow from private lenders at lower interest rates regardless of family income level. Basic Education Opportunity Grants (Pell Grants) are grants based on a student's financial need.

President Reagan proposes limiting GSL to students in lower-income families who can demonstrate real need. Under this proposal the government would no longer subsidize the interest on loans to parents or pay interest while the student is in school. President Reagan also proposes requiring families of Pell Grant recipients to pay a greater share of college costs before becoming eligible for the grant, and requiring an annual $750 contribution from the student, except for those in extreme need. The maximum award would also be decreased to $1,750 from the $2,100 level authorized for 1982.

Out of a total enrollment of 24,000, the University of Akron has 3,000 students receiving GSL and 4,000 receiving Pell Grants. Out of a total enrollment of 23,000, Kent State University has 3,576 students receiving GSL and 5,000 receiving Pell Grants. The value of these grants and loans is more than $22 million.

On a nationwide basis, the American Council on Education estimates that 500,000 to 1 million students will be forced to drop out of school, change their plans or transfer to lower-priced institutions in the academic years 1981-82 and 1982-83 if the Reagan proposals are enacted unchanged. This is 5% to 9% of the country's student population. If this percentage is applicable to the Akron area, Akron University and KSU could both lose thousands of students. Akron university officials predict that if adequate funding is not provided for the Pell Grant, the University of Akron could lose as much as $1 million in financial support.

SOCIAL SECURITY

Minimum benefits

Regardless of the amount of social security benefits a retiree is eligible for, based on his or here earnings history, there is a minimum payment of $122 a month for everyone receiving social security.

President Reagan proposes abolishing the minimum benefit.

Information is not available as to the number of people in the Akron area who are receiving the minimum benefit. However, the Reagan administration states that of the 2.9 million recipients of minimum benefits, 74% receive additional retirement income. This means that 750,000 beneficiaries rely solely upon the minimum benefit for retirement income.

Disability insurance

These social security benefits replace lost earnings for disabled workers and their families.

President Reagan proposes capping these benefits so that they do not exceed a worker's previous after-tax income.

According to the most recent figures available for each county, in Summit County, there were 6,447 individuals who received disability benefits in June, 1980, and in Portage County, there were 1,115 disability benefits recipients in December, 1979. The total Summit County payment for June, 1980 was $2,582,390, making the average payment for that month $401 per recipient.

HOUSING

Subsidized housing

The Department of Housing and Urban Development provides housing aid for low-income families and senior citizens through (1) the public housing program (run by local housing authorities) and (2) the Section 8 rental assistance program under which HUD makes up the difference between the cost of adequate rental housing and 25% of a renter's income.

President Reagan proposes cutting the number of additional subsidized housing units planned for 1982 by 13% and increasing the Section 8 tenant rent contributions gradually to 30% of the tenant's income.

The Akron Metropolitan Housing Authority estimates it has a backlog of 4,000 elderly and 9,000 family housing assistance applications. These could be more difficult to fill if the funds are cut back and thus the number of new assisted units is decreased.

Public housing modernization

This program assists local housing authorities to update older housing, making it more energy efficient and less costly to operate.

President Reagan proposes delaying $300 million in funds earmarked for 1981 until 1982, and then reducing funds for 1982 and future years by 40%.

Arron Metropolitan Housing Authority has received $3 million in these funds in the last two years, but has only addressed problems at two projects. AMHA estimates an outstanding need for funds of about $18 million that cannot be met by rental payments alone.

Rehabilitation loans

The Department of Housing and Urban Development Section 312 program provides low interest loans for the rehabilitation of multiunit rental housing.

President Reagan proposes abolishing the program immediately.

Akron receives over $1 million annually under the Section 312 program. This amount of rehabilitation is in addition to large amounts of rehabilitation aid to homeowners by the City under its Community Development Block Grant targeted code enforcement program.

ENVIRONMENT

Parks and outdoor recreation

The Department of Interior currently provides funds for National Park Service land acquisition, operations and development; matching grants for state and local park acquisition and development, urban parks rehabilitation, and state and local historic preservation programs.

President Reagan proposes holding off on any further Federal park land acquisition and simply terminating all assistance to state and local governments.

It is estimated that the acquisition of land for the Cuyahoga Valley National Recreation Area is about 65% complete. The Reagan proposal would halt the current effort to buy the remaining land and easements. While this will not destroy the national park system it will leave new national parks like Cuyahoga incomplete and unable to fulfill the purposes of which they were created, with no assurance that they will ever be completed.

Akron and other communities in the area have relied on Federal matching funds for acquisition and development of local parks. Akron received $300,000 in 1981 to help acquire land for the Cascade Valley Park. Tallmadge, Cuyahoga Falls, and Kent have all received similar grants in the past. The city of Akron has received about $200,000 in both 1980 and 1981 in Urban Park funds to rehabilitate inner city recreation sites. Akron is the only city in the area eligible for Urban Park funds.

TRANSPORTATION

Mass transit

The Department of Transportation provides capital grants for the construction of mass transit facilities and the purchase of equipment as well as operating assistance to help hold down local fares.

President Reagan proposes reducing funds by $31 million this year and by $270 million in 1982.

Akron Metropolitan Regional Transit Authority receives $5.5 million annually from the Federal government for capital improvements and operations. Akron Metro has already hiked fares from 35¢ to 50¢ over the past two years and has made service cut backs to make up for other budget cuts. About 35% of Metro's operations are Federally financed. In addition, the City of Akron and Metro received $1 million this year to initiate the downtown transit mall and skyway project which calls for an additional $10 million Federal investment. If the Reagan cuts are approved, the prospect of receiving the $10 million will be dim.

Highways

Funds administered by the U.S. Department of Transportation go to projects oriented toward state and local highway needs through the Federal Aid Urban and Federal Aid Secondary programs. Major roads, including the interstate highways, are funded through the Federal Aid Primary program.

President Reagan proposes reducing the Federal Aid Urban and Secondary programs in 1982 and 1983, and eliminating them in 1984. The primary Road program would be continued at about the present level and the Bridge Replacement and Rehabilitation program would be increased.

Because the City of Akron drew a large amount of Bridge Replacement funds for the Y-Bridge Project, the state has not allowed the city to apply for any more Bridge funds at this time. The city estimates that about 80 bridges within the city need rehabilitation work and it intended to meet these needs with Federal Aid-Urban funds. The proposed shut-down of the Federal Aid-Urban program combined with the reluctance of the state to allow Akron access to the Bridge funds may produce serious problems. County officials feel the shutdown of the Federal Aid Secondary program may have a negative effect on highway projects in the County.

Airports

The Federal Aviation Administration administers airport construction grants to individual airports across the country.

President Reagan proposes cutting the annual construction grants program by a third in the next five years for an estimated total savings of $1.8 billion. He also proposes to increase the aviation fuel tax by 12¢ a gallon and the passenger ticket tax from the current 5% to 6.5%.

In September, 1980, the Akron-Canton Regional Airport received $3.5 million for the Stage 1 construction of a runway extension, but there are three more stages of work which remain to be funded from additional grants under the Airport Development Program.

The fuel tax, paid by non-commercial aviation, would affect a majority of those who use Akron-Canton Airport's facilities. The ticket tax increase would increase the cost of an airline ticket to consumers.

MILITARY SPENDING

The Department of Defense is the only department to receive an increase in its budget under the Reagan economic plan.

President Reagan has asked Congress for an additional $5.8 billion in FY 1981 for the nation's military forces. Under his proposal, 1981 defense budget authority is estimated at $180.7 billion and 1982 budget authority at $226.3 billion, representing a one-year increase of 25%. The projected combined increase in the budget authority for the next five years (1981-1985) is more than $238 billion—which is $58 billion more than the entire defense budget authority for 1981.

Although large increases in the Defense Department budget will not represent an absolute loss to states in the Northeast-Midwest region, recent historical data indicates strongly that a much higher proportion of DOD budget increases will go to economies in the South and West than the economies of the Northeast and Midwest. At present 80% of all defense Department employees in the U.S. are located in the South and West, as are 75% of all DOD principal installations. Studies done by the Employment Research Associates in Lansing, Michigan concluded that 26 states with a total of 60% of the population suffer a net job loss when government resources are shifted to defense spending. The biggest losers are Illinois, Michigan, Ohio, and Pennsylvania.

The Akron area in particular receives a disproportionately low number of prime defense contracts. In 1979, in the 14th Congressional District, Federal tax revenues equalled $258.6 million, but prime defense contracts amounted to only $112 million, and much of the actual work under such contracts was performed in other parts of the country.

TAXES

The President's tax cut proposal has two parts. The first is a proposal to cut business' taxes by increasing the amount they can deduct from taxable income to help pay for new machinery, vehicles and buildings. The second is a proposal to cut personal income tax rates by ten percent each year for three years.

The business tax cut will help almost all businesses to some degree by simplifying the procedures for claiming accelerated de-

preciation. Right now only those businesses which are large enough to afford the staff to compute accelerated depreciation can claim it. The president's proposal will give all businesses equal and easy access to this tax-saving measure. The Reagan proposal may also prove helpful to economically distressed cities and areas because it eliminates the depreciation rule that treats used assets less favorably than new ones. It also permits a rapid depreciation of assets purchased for research and development.

However, the President's proposal offers across-the-board accelerated depreciation for all firms, wherever located, and does not target these tax cuts to firms in distressed areas. To get the most benefits from the President's proposals, a business has to make large investments in machinery and be profitable. Our region's hard-hit auto and steel industries meet the first qualification, but at present they don't have much taxable income from which to deduct the additional benefits of accelerated depreciation. Because many of the industries in the northeast and midwest economies are not very profitable right now, many will not be able to take full advantage, if any, of the proposed new accelerated depreciation. The overall impact of this proposal could be to increase the profit disparity between the nation's ailing industrial heartland and the sunbelt. The proposal could also encourage industries to close older plants in the frost belt and build new ones in the sunbelt.

For individuals, the President proposes a significant reduction in Federal tax rates over the next three years. shown on the next page is a chart of the proposed reductions for selected income categories in 1981, when the cuts would begin to take effect, and in 1984, when the cuts would be fully phased in.

According to these figures, a family of four with an income of $25,000 in 1981 and deductions of 23% of that amount would have a tax liability of $2,901 under current law and only $2,748 under the President's proposal, a cut of 5.3% or $153. By 1984, a family of four would pay only $2,092 on a $25,000 income, a total cut from current law of $809, or 27.9%. It should be noted that this does not take into account the possibility of cost of living increases pushing the taxpayer into a higher tax bracket by 1984, resulting in lower tax reduction or possibly even a tax increase on an income with the same purchasing power.

The biggest winners under the Reagan plan are the ones with large amount of investment ("unearned") income, because the plan lowers the top tax rate on investment income from 70% to 50%. The current maximum 50% rate on earned income wouldn't change. But the proposed new tax schedule would increase the income level at which the 50% rate takes effect from $60,000 for couples and $41,500 for individuals to $215,400 and $108,300 in 1984.

	Earned income					
	Single person			Family of 4		
	$10,000	$25,000	$100,000	$10,000	$25,000	$100,000
1981						
Current tax (assuming 23 percent deductions)	1,177	4,364	31,792	374	2,901	27,873
Reagan proposals (assuming 23 percent deductions)	1,110	4,126	31,135	348	2,748	26,958
Annual tax cut	67	238	657	26	153	920
1984						
Current tax (assuming 23 percent deductions)	1,177	4,364	31,792	374	2,901	27,873
Reagan proposals (assuming 23 percent deductions)	312	3,136	25,818	265	2,092	21,009
Annual tax cut	365	1,228	5,974	109	809	6,869

MISCELLANEOUS

Legal Services Corporation (LSC)

This agency makes grants to 323 local programs to provide free legal assistance to poor people in civil matters throughout the country.

President Reagan recommends abolishing LSC for a savings of $312 million in 1982.

The Summit County Legal Aid Society receives 80% of its funding from LSC. It employs twelve attorneys in Akron; two in Portage County and one in Medina County. The great bulk of their work consists of cases concerning divorce and custody, evictions and public benefits. Legal Aid lawyers represent only individuals with incomes up to just above the poverty line. For example, no one from a family of four with an annual income of more than $9,313 (or $179 per week) can receive assistance from Legal Aid. In 1980, the Summit County office handled about 4,000 cases.

Veterans

The Federal government provides numerous benefits and services to the country's veterans, including medical care, readjustment services for Vietnam-era vets, and low-interest loans.

President Reagan proposes reducing the staff of the Veterans Administration's Department of Medicine and Surgery by 5,000 and curbing bonus pay for VA physicians and dentists. He proposes cancelling or delaying some VA hospital construction. He also proposes eliminating certain readjustment benefits for needy and educationally disadvantaged Vietnam-era veterans, and raising the interest rate (now 5%) on loans to veterans secured with their life insurance policies.

President Reagan also proposes to discontinue 91 readjustment outreach centers for Vietnam-era veterans. The Akron Veterans' Outreach Center, which employs four full-time staff and four work-study staff, saw an estimated 900 veterans between April 1980 and March 1981, averaging 65 veterans a month. The Center handles such matters as VA claims and jobs counseling. However, the main focus of the Center's program is dealing with post traumatic stress (also known as delayed stress syndrome), exhibited by many veterans of the Vietnam era. The Center received $98,000 in Federal funds in 1980 and $131,000 in 1981.

Postal Service

The U.S. Postal Service is an independent agency overseen by a Board of Governors appointed by the President and assisted by a Federal payment, which declines 10% a year.

President Reagan proposes speeding up the decline in Federal support payments, which means a cut of $632 million in 1982. One subsidy which is to be reduced makes up for income lost through discounts to large second- and third-class mail users like newspapers and magazines.

The proposed cutback could trigger either a rise in Postal rates or a reduction is service. The Postmaster General has said that despite the cut, Saturday mail delivery will be maintained. If Saturday mail service is lost, a national Postal Workers Union official says that could mean up to 25,000 fewer jobs.

In Akron, it has been estimated that the cuts could result in the loss of 70 to 100 postal jobs and the reduction of hours for career part-time help.

National Endowments for the Arts and Humanities

The Endowments provide grants to encourage the development of programs in music, theater, dance and art, and for literature and other areas of the humanities.

President Reagan proposes cutting the budget of the Endowments by about 50%, but it has not yet been determined how those cuts will be distributed.

The Ohio ballet received $63,900 from NEA in fiscal year 1980 to help support six weeks of touring and to use for special projects. In fiscal year 1981 the company received $75,500 from NEA in direct and touring grants. The company has been told it may receive NEA funds for five weeks of touring during the 1981-82 season and cutback could affect that grant.

The Akron Art Institute received $30,000 from NEA in 1980 to aid in exhibition series. A cutback could reduce the number of exhibitions per year. Other Federal grants helped build the museum's new quarters.

The Akron Symphony received $16,000 from NEA in 1980 to help augment the string section and to provide for additional rehearsal time.

The E. J. Thomas Performing Arts Hall received $5,000 from NEA in 1980 to help pay for the appearance of the Atlanta Ballet. A cutback might affect the number of traveling programs that appear there.

"Dialogue", the Ohio Arts Journal published in Akron received $5,000 from NEA in 1980-81 to help pay for freelance writing, editing and some printing costs.

A request for approximately $280,000 in Federal funds for the purpose of assisting in the renovation of the Akron Civic Theater is now under consideration.

Public radio and television

The Corporation for Public Broadcasting provides assistance to 378 noncommercial radio and television stations around the country.

President Reagan proposes cutting the corporation's budget by 25% in 1982 and making deeper cuts in subsequent years.

WKSU-radio and television channels 25 (Cleveland), 45 and 49 now receive partial funds from CPD and could be affected by these cuts.

For 1981, local television channels 45 and 49 received $348,598 from CPB. This

amounted to 34% of the stations' total income. Three-fourths of the CPB funding goes toward programming, such as the acquisition of certain national programs or the production of local programs. However, it is not known how these proposed Federal cuts mights be achieved. It is possible that the stations will continue receiving funds and that the cuts will be absorbed at the national level. However, that could mean that the stations would lose some national programming to which they now subscribe.

Channel 49 also recently received a $600,000 grant from the National Telecommunications and Information Administration's facilities program, which the President also proposes to cut. This grant money will be spent to replace channel 49's twenty-nine year old tower and transmitter in Akron. The NTIA cut will not affect this grant. However, the television stations have applied for similar grants to replace old tape machines and those applications could be affected by the cut.

For 1981, WKSU-radio received $83,646 from CPB. Most of that money also goes into programming, thus a cut in funds could mean the loss of National Public Radio programs and part of the full-time professional staff.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. HANSEN of Utah) to revise and extend their remarks and include extraneous material:)

Mr. TAUKE, for 5 minutes, today.

Mrs. SCHNEIDER, for 5 minutes, today.

(The following Members (at the request of Mr. MOTTL) to revise and extend their remarks and include extraneous material:)

Mr. LAFALCE, for 30 minutes, today.

Mr. OTTINGER, for 5 minutes, today.

Mr. ROSTENKOWSKI, for 10 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. BONER of Tennessee, for 5 minutes, today.

Mr. HEFTEL, for 10 minutes, today.

Mr. DASCHLE, for 5 minutes, today.

Mr. BAILEY of Pennsylvania, for 60 minutes, on April 27.

EXTENSIONS OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. SIEBERLING, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $3,000.

(The following Members (at the request of Mr. HANSEN of Utah) and to include extraneous matter:)

Mr. DANNEMEYER.

Mrs. HECKLER.

Mr. LEBOUTILLIER in two instances.

Mr. LUJAN.

Mr. BEREUTER in two instances.

Mr. MARTIN OF NEW YORK.

Mr. ARCHER.

Mr. MCCLORY in two instances.

Mr. PHILIP M. CRANE.

Mr. FINDLEY in two instances.

Mr. PARRIS.

Mr. RITTER.

Mr. DREIER.

Mr. FISH.

Mr. SOLOMON.

Mr. HYDE.

Mr. MICHEL.

(The following Members (at the request of Mr. MOTTL) and to include extraneous matter.)

Mr. DE LA GARZA in 10 instances.

Mr. GAYDOS.

Mr. MATTOX in 10 instances.

Mr. SCHEUER.

Mr. PEPPER.

Mr. STUDDS.

Mr. GEJDENSON.

Mr. FOGLIETTA.

Mr. LOWRY of Washington.

Mr. HARKIN.

Mr. GARCIA in two instances.

Mr. ECKART.

Mr. MOFFETT.

Mr. LELAND.

Mr. OBERSTAR.

Mr. RANGEL.

Mr. MAVROULES.

Ms. MIKULSKI.

Mr. CONYERS.

Mr. SOLARZ.

Mr. MINISH in three instances.

Mr. BARNES.

Mr. BOLAND.

Mr. VENTO.

Mr. HAMILTON in 10 instances.

Mr. OTTINGER.

Mr. OBEY in two instances.

Mr. ROSENTHAL in 10 instances.

Mrs. BOUQUARD in five instances.

Mr. SWIFT.

Mr. RAHALL.

Mr. HEFTEL.

Mr. NOWAK.

Mr. DASCHLE in 10 instances.

Mr. FASCELL.

Mr. PEYSER.

Mr. WEISS in two instances.

Mr. APPLEGATE.

Mr. EDGAR.

Mr. FRANK.

SENATE BILL AND JOINT RESOLUTION REFERRED

A bill and a joint resolution of the Senate of the following titles were taken from the Speaker's table and under the rule, referred as follows:

S. 840. An act to continue in effect any authority provided under the Department of Justice Appropriations Authorization Act, fiscal year 1980, for a certain period; to the Committee on the Judiciary; and

S.J. Res. 20. Joint resolution to designate the month of April 1981 as "Gospel Music Month"; to the Committee on Post Office and Civil Service.

ENROLLED JOINT RESOLUTION SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 182. Joint resolution to designate April 26, 1981, as "National Recognition Day for Veterans of the Vietnam Era."

ADJOURNMENT

Mr. EDGAR. Mr. Speaker, I move that House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 32 minutes p.m.), the House adjourned until tomorrow, Thursday, April 2, 1981, at 11 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

987. A letter from the Secretary, Interstate Commerce Commission, transmitting notice that the Commission is unable to render a final decision in Docket No. 37522, *Florida East Coast Railway, Application of Joint Rates*, within the initially specified 7-month period, pursuant to 49 U.S.C. 10707(b)(1); to the Committee on Energy and Commerce.

988. A letter from the Secretary of State, transmitting a report reviewing various aspects of the U.S. role in maintaining the security of the Republic of Korea, pursuant to section 668 of the Foreign Assistance Act of 1961, as amended; to the Committee on Foreign Affairs.

989. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Korea (Transmittal No. 81-28), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

990. A letter from the Acting Inspector General, Department of Health and Human Services, transmitting the annual report of his office for calendar year 1980, pursuant to section 204(a) of Public Law 94-505; to the Committee on Government Operations.

991. A letter from the Acting Inspector General, Department of Energy, transmitting the annual report of his office for calendar year 1980, pursuant to section 208(c) of Public Law 95-91; to the Committee on Government Operations.

992. A letter from the Solicitor, U.S. Commission on Civil Rights, transmitting a report on the Commission's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

993. A letter from the Director, Office of Personnel Management, transmitting a report on the Office's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

994. A letter from the President and Chief Executive Officer, Federal Home Loan Mortgage Corporation, transmitting a reort on the Corporation's activities under the Government in the Sunshine Act during calendar year 1980, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

995. A letter from the President, Inter-American Foundation, transmitting a report on the Foundation's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

996. A letter from the Acting Assistant Attorney General, Criminal Division, transmitting the annual report on activities and operations of the Public Integrity Section of the Department of Justice covering calendar year 1980, pursuant to 28 U.S.C. 529; to the Committee on the Judiciary.

997. A letter from the Director, National Science Foundation, transmitting a draft of proposed legislation to authorize appropriations for the National Science Foundation for fiscal years 1982 and 1983; to the Committee on Science and Technology.

998. A letter from the Acting Under Secretary of Agriculture for International Affairs and Commodity Programs, transmitting the third quarterly commodity and country allocation table showing the planned programing of food assistance under titles I and III of the Agricultural Trade Development and Assistance Act for fiscal year 1981, pursuant to section 408(b) of the act; jointly, to the Committees on Agriculture and Foreign Affairs.

999. A letter from the Fiscal Assistant Secretary of the Treasury, transmitting the third annual report on the financial condition and results of the operations of the Black Lung Disability Trust Fund, pursuant to section 3(c) of Public Law 95-227; jointly, to the Committees on Education and Labor and Ways and Means.

1000. A letter from the Acting Comptroller General of the United States, transmitting a report on individual skill training for Army enlisted personnel (FPCD-81-29, Mar. 31, 1981); jointly, to the Committees on Government Operations and Armed Services.

1001. A letter from the Acting Comptroller General of the United States, transmitting a summary of GAO reports and ongoing reviews of the Clean Air Act (CED-81-84, Apr. 1, 1981); jointly, to the Committees on Government Operations and Energy and Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. GAYDOS: Committee on House Administration. House Resolution 97. Resolution to authorize the reprinting of the report entitled "International Information Flow: Forging a New Framework" (Rept. No. 97-18). Referred to the House Calendar.

Mr. GAYDOS: Committee on House Administration. House Resolution 105. Resolution approving the printing of additional copies of the report accompanying the first concurrent resolution on the budget for fiscal year 1982 (Rept. No. 97-19). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER:

H.R. 2945. A bill to establish certain price support loan levels and to provide other means of restitution to American farmers in the event of the suspension or restriction of commercial export sales of agricultural commodities; to the Committee on Agriculture.

H.R. 2946. A bill to amend the Internal Revenue Code of 1954 to broaden the tax incentives for cogeneration equipment; to the Committee on Ways and Means.

By Mr. BENJAMIN:

H.R. 2947. A bill to authorize the Secretary of Transportation to release restrictions on the use of certain property conveyed to the city of Gary, Ind., for airport purposes; to the Committee on Public Works and Transportation.

By Mr. BREAUX (for himself and Mr. FORSYTHE):

H.R. 2948. A bill to authorize appropriations to carry out the Marine Mammal Protection Act of 1972 during fiscal year 1982; to the Committee on Merchant Marine and Fisheries.

By Mr. HEFTEL (for himself, Mr. ARCHER, Mr. NOWAK, and Mr. DREIER):

H.R. 2949. A bill to amend the Internal Revenue Code of 1954 to allow certain small businesses to use the cash method of accounting without regard to inventory accounting requirements, to increase to $200,000 the amount of used property eligible for the investment tax credit, to allow nonrecognition of gain on sales of property where any equity interest in certain small businesses is acquired, to provide an income tax rate reduction for corporations, and for other purposes; to the Committee on Ways and Means.

By Mr. RANGEL:

H.R. 2950. A bill to amend the Internal Revenue Code of 1954 to encourage investments and employment in economically depressed areas by providing tax credits for investments and employment in such areas and for other purposes; to the Committee on Ways and Means.

By Mr. PHILIP M. CRANE:

H.R. 2951. A bill to provide for the conveyance of certain public lands under the jurisdiction of the Bureau of Land Management to citizens of the United States who establish a residence on such lands; to the Committee on Interior and Insular Affairs.

H.R. 2952. A bill to amend title 39, United States Code, to eliminate certain provisions relating to private carriage of letters, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. DASCHLE:

H.R. 2953. A bill to authorize the Administrator of Veterans' Affairs to provide medical care to certain veterans who served in the Republic of Vietnam during the Vietnam era, to extend by 2 years the period during which Vietnam-era veterans may initially request psychological readjustment counseling, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. de la GARZA:

H.R. 2954. A bill to provide general assistance and special impact aid to local educational agencies for the provision of educational services to alien children to whom State or local educational agencies provide educational services; to the Committee on Education and Labor.

By Mr. GLICKMAN:

H.R. 2955. A bill to repeal certain special reduced postal rates authorized for political committees; to the Committee on Post Office and Civil Service.

By Mr. GONZALEZ:

H.R. 2956. A bill to amend title 10, United States Code, to provide for an exclusive remedy against the United States in suits based upon medical malpractice on the part of the medical personnel of the U.S. Soldiers' and Airmen's Homes; to the Committee on Armed Services.

By Mr. HOWARD (for himself, Mr. CLAUSEN, Mr. ROE, and Mr. HAMMERSCHMIDT):

H.R. 2957. A bill to amend the Federal Water Pollution Control Act to delete the limitation on the use of public treatment works grants for treating, storing, or conveying the flow of industrial users into treatment works; to the Committee on Public Works and Transportation.

By Mr. HOWARD (for himself and Mr. CLAUSEN):

H.R. 2958. A bill to amend the Disaster Relief Act of 1974, as amended, to authorize the appropriation of additional sums to carry out the act, and for other purposes; to the Committee on Public Works and Transportation.

H.R. 2959. A bill to require recovery of certain expenditures of the U.S. Army Corps of Engineers for operation, maintenance, and construction of deep draft channels and ocean and Great Lakes ports of the United States and to authorize such construction in specified circumstances; to the Committee on Public Works and Transportation.

H.R. 2960. A bill to amend the Hazardous Materials Transportation Act to authorize appropriations for fiscal years 1982 and 1983, and for other purposes; jointly, to the Committees on Energy and Commerce and Public Works and Transportation.

H.R. 2961. A bill to amend the National Gas Pipeline Safety Act of 1968, as amended, and the Hazardous Liquid Pipeline Safety Act of 1979 to authorize appropriations for fiscal years 1982 and 1983; jointly, to the Committees on Energy and Commerce and Public Works and Transportation.

H.R. 2962. A bill to provide for the recovery of capital and operation and maintenance costs assignable to commercial waterway transportation for certain U.S. Army Corps of Engineers inland waterway projects; jointly, to the Committees on Public Works and Transportation and Ways and Means.

By Mr. MAVROULES:

H.R. 2963. A bill to provide additional assistance to small business concerns in acquiring procurement information and contracts from the United States; to the Committee on Small Business.

By Mr. MOTTL:

H.R. 2964. A bill to amend the Communications Act of 1934 to require the Federal Communications Commission to collect certain financial information from commercial broadcast station licensees and to make such information available for public inspection; to the Committee on Energy and Commerce.

By Mr. NOWAK:

H.R. 2965. A bill to amend the Public Works and Economic Development Act of 1965 to target the assistance provided to special economic development and adjust-

ment assistance, to amend the Small Business Investment Act of 1958 to authorize small business investment companies to provide additional credit for certain businesses located in distressed areas, to amend the Internal Revenue Code of 1954 to provide tax incentives for such businesses, and for other purposes; jointly, to the Committees on Public Works and Transportation, Banking, Finance and Urban Affairs, Education and Labor, Small Business, and Ways and Means.

By Mr. OTTINGER:

H.R. 2966. A bill to authorize the project for flood control in the Mamaroneck and Sheldrake River Basins, N.Y., and on the Byram River, Conn.; to the Committee on Public Works and Transportation.

H.R. 2967. A bill to provide for a study by the Secretary of the Army, acting through the Chief of Engineers, of criteria to be used in determining the Federal and non-Federal interests in flood protection, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. PETRI:

H.R. 2968. A bill to amend the Internal Revenue Code of 1954 to encourage savings by allowing individuals to elect a credit against income tax for interest and dividends received, by increasing the maximum deduction for contributions to individual retirement plans, and by allowing the employees to deduct voluntary contributions to employer retirement plans, and to provide for the payment of bonus interest with respect to investments in individual retirement plans which have been held for more than 7 years; to the Committee on Ways and Means.

Mr. PRICE (for himself and Mr. DICKINSON):

H.R. 2969. A bill to authorize appropriations for the Department of Energy for national secruity programs for fiscal year 1982, and for other purposes; to the Committee on Armed Services.

H.R. 2970. A bill to authorize appropriations for fiscal year 1982 for the Armed Forces for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, for research, development, test, and evaluation, and for operation and maintenance, to prescribe the authorized personnel strength for each active duty component and the Selected Reserve of each Reserve component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, and for other purposes; to the Committee on Armed Services.

Mrs. SCHNEIDER:

H.R. 2971. A bill to establish a New England Regional Power Planning and Distribution Authority, and for other purposes; jointly, to the Committees on Energy and Commerce and Interior and Insular Affairs.

By Mr. SOLARZ:

H.R. 2972. A bill to restructure the State and local assistance programs designed to improve the quality of criminal justice, and for other purposes; to the Committee on the Judiciary.

H.R. 2973. A bill to amend the Internal Revenue Code of 1954 to provide that the medical expenses of handicapped individuals and individuals who have attained age 65 shall be deductible without regard to the requirement that only medical expenses in excess of certain percentages of adjusted gross income are deductible; to the Committee on Ways and Means.

By Mr. TAUKE:

H.R. 2974. A bill to amend title 39, United States Code, to provide that absentee ballots and certain other voting materials pertaining to absentee ballots may be mailed free of postage; to the Committee on Post Office and Civil Service.

By Mr. FINDLEY:

H.J. Res. 222. Joint resolution to amend the Constitution of the United States to provide for balanced budgets; to the Committee on the Judiciary.

By Mr. GAYDOS (for himself, Mr. ATKINSON, Mr. BAILEY of Pennsylvania, Mr. CLINGER, Mr. COUGHLIN, Mr. JAMES K. COYNE, Mr. WILLIAM J. COYNE, Mr. DOUGHERTY, Mr. EDGAR, Mr. ERTEL, Mr. FOGLIETTA, Mr. GOODLING, Mr. GRAY, Mr. LEDERER, Mr. MARKS, Mr. MCDADE, Mr. MURPHY, Mr. MURTHA, Mr. NELLIGAN, Mr. RITTER, Mr. SCHULZE, Mr. SHUSTER, Mr. WALGREN, Mr. WALKER, and Mr. YATRON):

H.J. Res. 223. Joint resolution to provide for the awarding of a special gold medal to Fred Waring; to the Committee on Banking, Finance and Urban Affairs.

By Mr. RITTER:

H. Con. Res. 103. Concurrent resolution expressing the sense of the Congress that the Congress would regard Soviet military action against Poland as a serious breach of international peace, and that if the Union of Soviet Socialist Republics takes military action against Poland, the President of the United States should, in conjunction with the leaders of Japan, Australia, and our North Atlantic Treaty Organization allies, immediately discontinue all credit lines and severely curtail trade and economic relations with the Union of Soviet Socialist Republics; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII,

31. The SPEAKER presented a memorial of the Legislature of the State of South Carolina, relative to continued funding of the Economic Development Administration; to the Committee on Public Works and Transportation.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. ERTEL introduced a bill (H.R. 2975) for the relief of Yuk Lee Li, which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 1: Mr. JOHNSTON, Mr. WATKINS, Mr. MINETA, and Mr. PATTERSON.

H.R. 27: Mr. DAUB, Mr. HEFTEL, Mr. LANTOS, MR. RITTER, and Mr. WEBER of Minnesota.

H.R. 608: Mr. RUDD.

H.R. 645: Mr. EDWARDS OF OKLAHOMA.

H.R. 646: Mr. LEE.

H.R. 894: Mr. ROBERT W. DANIEL, JR.

H.R. 907: Mr. BEDELL, Mr. BINGHAM, Mr. MINETA, Mr. KASTENMEIER, Mr. FRANK, and Mr. FAZIO.

H.R. 1642: Mr. LEE AND Mr. WOLF.

H.R. 1657: Mr. KEMP.

H.R. 1765: Mr. BOWEN.

H.R. 1778: Mr. EDWARDS of Oklahoma and Mr. SMITH of Alabama.

H.R. 1817: Mr. ROBERTS of South Dakota and Mr. HYDE.

H.R. 2226: Mr. GORE, Mr. SCHEUER, Mrs. CHISHOLM, Mr. STOKES, Mr. FAUNTROY, Mr. MITCHELL of Maryland, Mr. CORRADA, Mr. MOTTEL, Mr. HERTEL, Mr. BIAGGI, and Mr. SIMON.

H.R. 2234: Mr. KOGOVSEK and Mr. DAUB.

H.R. 2235: Mr. KOGOVSEK and Mr. DAUB.

H.R. 2252: Mr. HEFTEL and Mr. BONER of Tennessee.

H.R. 2348: Mr. GARCIA.

H.R. 2543: Mr. RUDD, Mr. GOLDWATER, Mr. WHITEHURST, Mr. BUTLER, Mr. BEDELL, Mr. EDGAR, Mr. MOFFETT, Mr. ERLENBORN, Mr. AKAKA, Mr. FRANK, Mr. EVANS of Iowa, Mr. BROWN of Ohio, Mr. SOLOMON, Mr. LOTT, Mr. NEAL, Mr. COLLINS of Texas, Mr. HAMILTON, Mr. TAUKE, Mr. BAFALIS, Mr. SENSENBRENNER, Mr. BETHUNE, Mr. FORSYTHE, Mr. BEARD, Mr. PASHAYAN, Mr. KOGOVSEK, Mr. FISH, Mr. DAUB, and Mr. GRAY.

H.R. 2580: Mr. PHILLIP BURTON, Mr. COLLINS of Texas, Mr. EMERSON, Mr. FISH, Mr. FORSYTHE, Mr. GLICKMAN, Mr. HEFTEL, Mr. MADIGAN, Ms. MIKULSKI, Mr. PATTERSON, Mr. PEASE, Mr. PORTER, Mr. WEISS, Mr. WINN, and Mr. BEDELL.

H.R. 2593: Mr. FINDLEY, Mr. SENSENBRENNER, Mr. BEDELL, Mr. HUCKABY, and Mr. FISH.

H.R. 2794: Mr. KOGOVSEK and Mr. DAUB.

H.J. Res. 202: Mr. HIGHTOWER, Mrs. HOLT, and Mr. MOLINARI.

H. Con. Res. 76: Mr. DONNELLY, Mr. DINGELL, Mr. BEILENSON, Mr. LAGOMARSINO, Mr. JOHNSTON, Mr. RUSSO, Mr. DUNCAN, Mr. BARNES, Mr. WEISS, Mr. LAFALCE, Mr. WHITEHURST, Mr. BROWN of Ohio, Mr. WINN, Mr. RAHALL, Mr. ROE, Mr. ANNUNZIO, Mr. SMITH of New Jersey, Mr. YOUNG of Alaska, Mrs. FENWICK, Mr. NEAL, Mr. LUNGREN, Mr. CONTE, Mr. STRATTON, Mr. LANTOS, Mr. GORE, Mrs. HOLT, Mr. GINN, Mr. SOLOMON, Mr. BADHAM, Mr. GUYER, Mr. ADDABBO, Mr. WILSON, Mr. FRENZEL, Mr. CORRADA, Mr. FORSYTHE, Mr. MADIGAN, Mr. OBERSTAR, Mr. GRAMM, Mr. BIAGGI, Mr. VENTO, Mr. DANIEL B. CRANE, Mr. LOWERY of California, Mr. SUNIA, Mr. WIRTH, Mr. TAUKE, Mr. FAZIO, AND Mr. MCDADE.

H. Res. 38: Mr. DOUGHERTY.

H. Res. 93: Mr. KOGOVSEK and Mr. DAUB.

PETITIONS, ETC.

Under clause 1 of rule XXII,

45. The SPEAKER presented a petition of the Council, Luther Place Memorial Church, Washington, D.C., relative to budget cuts, which was referred jointly, to the Committees on Education and Labor, Foreign Affairs and Veterans' Affairs.

SENATE—*Wednesday, April 1, 1981*

(Legislative day of Monday, February 16, 1981)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., offered the following prayer:

"O God, our help in ages past,
Our hope for years to come,
Our shelter from the stormy blast,
And our eternal home!

"Before the hills in order stood,
Or earth received her frame,
From everlasting Thou art God,
To endless years the same."

—ISAAC WATTS.

Eternal Father, bound as we are by the temporal, we come to Thee in gratitude for Thy help through these past 2 days. We thank Thee for the excellent condition of the President. May his restoration be speedy and thorough. We are grateful for Mr. Brady's recovery and for the health of Mr. McCarthy and Mr. Delahanty.

As parents we identify with the pain Mr. and Mrs. Hinckley are suffering and we commend them to Thy loving and tender care. We pray for their son in his rebellion and confusion.

We thank Thee for the smooth, quiet, and efficient way Government has been managed in this crisis. In Thy sovereign grace guide the leadership of our Nation that Thy will may be done on Earth as it is in Heaven. We ask this in Thy name and for Thy glory. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. Under the previous order, the majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

REPORT ON THE PRESIDENT'S CONDITION

Mr. BAKER. Mr. President, I am happy to report that when I checked with the White House this morning on the state of the President's health, the report was good. I was advised that the President this morning sat up, took breakfast, then walked around his room. He apparently continues to have most extraordinarily good recovery and is showing remarkable strength and vitality.

I know every Member of the Senate joins with me in our delight at the President's prompt recovery.

CONDITION OF MR. BRADY, MR. DELAHANTY, AND MR. McCARTHY

Mr. BAKER. Mr. President, I have not yet had an opportunity to check on the condition of Agent McCarthy or Officer Delahanty or Mr. Brady, the press secretary, but I shall report later in the day to the Senate on the condition of those three men as well.

THE BUDGET RESOLUTION SCHEDULE

Mr. BAKER. Mr. President, today is the day on which I hope we can dispose of all the remaining amendments to Senate Concurrent Resolution 9. It seems to me that we should be able to finish this measure today. I see the distinguished minority leader on the floor and I recall that, last evening before we went out, he and I compared notes on the number of amendments remaining. While there are quite a number—I believe 12 as I counted them on the minority side, and at least 1 on this side—that, together with the vote on passage, would be 14 votes.

Mr. President, may we have order in the Senate?

The PRESIDING OFFICER (Mr. PRESSLER). The Senate will be in order.

Mr. BAKER. Mr. President, I apologize for that request, but I was about to propound a request to the distinguished minority leader. I invite the attention of all Members in that respect.

While the amendments that we know of or knew of last night, together with passage, would be 14 votes, I hope that we can work quickly and efficiently and dispose of all of those measures today, even if it requires us to stay in beyond the normal recess hour of 6 or 6:30 this evening. My inquiry to the minority leader is whether he can give us any further view of those prospects or the prospects of such result from the standpoint of amendments to be offered on his side of the aisle.

Mr. ROBERT C. BYRD. Mr. President, last evening, I indicated to the distinguished majority leader certain amendments about which I was informed on this side of the aisle. There may be others, but I did not know. If there are, and I think there may be, I doubt that there will be many or I would know about them. I should think that it might be well to continue to hope that the Senate will finish action on the measure today, but I imagine that if all those amendments are called up, depending upon how much time is taken on each of them, together with the rollcall votes, it would put us pretty far into the evening to finish today.

I said on the day before yesterday that I felt pretty sure we would finish today, but I hesitate to say now that we will finish today, knowing of the number of amendments that yet remain, but I think that is a possibility.

Certainly, if the goal is not achievable that the distinguished majority leader seeks insofar as today is concerned, I should certainly feel, with great assurance, that action would be completed at a reasonably early hour tomorrow.

Mr. BAKER. Mr. President, I thank the minority leader. I offer two suggestions, if I may, to the distinguished managers of the bill on this side and perhaps even a request to the managers on the other side. That is the observation that it is not constitutionally necessary that we have a rollcall vote on each and every amendment. Some of these amendments can be disposed of by a voice vote.

Mr. President, in view of the guarded optimism the minority leader expressed about our finishing today, I think it best to get a little into the day before we decide whether we shall stay late to finish or go tomorrow. It is my hope that we can finish today. Later in the day or shortly after lunch, I shall try to confer with the minority leader and perhaps have another announcement.

Mr. ROBERT C. BYRD. Mr. President. I should think we should have a better idea by then about just what to contemplate.

Mr. BAKER. I thank the minority leader.

Mr. President, I have no further need for my time under the standing order and no requests for time. I am prepared to yield it back or yield it to the minority leader if he desires time.

Mr. ROBERT C. BYRD. Mr. President, I would appreciate it if the majority leader would yield it to Senators on this side. I see the minority whip is here and has some use for some time.

Mr. BAKER. Mr. President, I yield the time remaining to me under the standing order to the distinguished minority leader so he may yield it to others on his side if he wishes.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

Mr. ROBERT C. BYRD. Mr. President,

I thank the distinguished majority leader.

THE ADMINISTRATION CALLS FOR AUSTERITY IN THE DOMESTIC BUDGET, YET ASKS FOR $350 MILLION FOREIGN AID SLUSH FUND

Mr. ROBERT C. BYRD. Mr. President, since last Thursday, the Senate has been considering legislation to reconcile the Federal budget for fiscal years 1981, 1982, and 1983. During the course of the debate, the Democrats have attempted to restore modest amounts to deep cuts in programs, which most Americans strongly support—programs providing lunches for schoolchildren, social security for the old folks, and health care for veterans.

However, while the administration has called upon the American people to accept sacrifice as a means of balancing the Federal budget, it has asked the Congress to approve a $350 million contingency fund—a "slush fund"—to meet so-called emergency requirements for military assistance to countries friendly to the United States. We are told that the fund is necessary because the congressional authorization and appropriation process is so slow that it is difficult to meet legitimate security needs of friendly countries should an emergency occur.

The Congress is being asked to give the executive branch a $350 million blank check. Of this amount, $100 million would be in the form of grant military assistance and $250 million in foreign military sales credits—or loans. However, I must point out that Congress will not have any control over how these moneys will be spent. Congress will simply be notified when funds are expended for emergency purposes.

Yet, Congress has already given the executive branch sufficient authority to meet legitimate emergency requirements. This authority totals $300 million in assistance which can be made available when unforeseen circumstances arise.

Under section 506 of the Foreign Assistance Act, $50 million in authority is granted the President to draw down on defense articles from the Department of Defense, to provide defense services from the Department of Defense, or to provide military education and training. I repeat, under section 506 of the Foreign Assistance Act, the President can provide up to $50 million a year in weapons and services to friendly governments on an emergency basis.

Under section 614 of the Foreign Assistance Act, the President has available to him up to $250 million in transfer authority from the foreign military sales program to provide credits, make sales, or issue guarantees for military equipment provided a friendly government. No more than $50 million of the funds available under this provision can be allocated to any one country in any fiscal year, unless the country is the victim of active Communist or Communist-supported aggression.

Thus, at present, the President has discretionary authority to provide up to $300 million a year in weapons and services to friendly countries threatened by emergencies. Some $250 million is transfer authority from foreign military sales programs already approved by the Congress, and the amount available for transfer would depend upon the time of year in which such emergencies occur. However, I believe the Congress, in an effort to maintain proper control over these programs, has given the executive branch the necessary flexibility to meet unforeseen needs.

Therefore, I do not see any reason why the Congress should approve an additional $350 million for the executive branch to use as it sees fit. I, for one, am opposed to what would amount to a slush fund, with no congressional control and no strings attached.

I yield my remaining time to the Senator from California and he may yield time to other Senators if he wishes.

Mr. CRANSTON. I thank the distinguished minority leader very much.

THE LEGAL SERVICES CORPORATION

Mr. CRANSTON. Mr. President, I wish to share with my colleagues a statement I made this morning to the American Bar Association.

STATEMENT BY SENATOR CRANSTON

I am delighted to see you all here this morning and to know that the ABA is committing itself to fight for the continuation of the legal services program. It is of critical importance that the members of the ABA become actively involved in defending this program because members of the organized bars of this country, perhaps more than any other segment of society, understand its critical nature.

Our system of justice is based upon the peaceful, orderly resolution of disputes and conflicts. The assistance of counsel is essential to this system. The right to be heard is of little avail—even to an educated layman—without counsel.

The legal services program is based upon the very simple, fundamental premise that the poor—no less than the wealthy—are entitled to legal representation to redress grievances and defend their interests.

I use the term "entitled" purposefully. The notion has been advanced recently that citizens do not have any basic rights or entitlements to any government services, including legal services.

I disagree with that premise, particularly as it relates to legal services.

Budget Director David Stockman is absolutely wrong when he says there isn't "any basic right" to legal services and proposes their abolition.

In plain English he means a person doesn't have a right to a lawyer and he's wrong.

Every teenager who has gotten through his 11th grade history class knows that the right to representation by a lawyer is an essential part of American justice and the American sense of fair play.

Our society—our social compact—is based upon the concept that all citizens, no matter what their financial circumstances, are entitled to be protected by the law. This right to equal protection of law and access to the judicial system is a basic right arising from our system of justice. A fair and just government cannot countenance denying people the protection of the law because of poverty. The legal services corporation is an example of what a fair and just government can and must do to bring equal justice to its people.

This is not a radical program. The notion of encouraging ways of obtaining justice through our institutions of government—through our judicial system—is a concept believers in conservative government warmly embrace. Our entire society benefits when conflicts are resolved through the courts. The legal services program is essential to promoting that result.

The vigorous participation of the ABA in efforts to retain this program is essential. I look forward to working with each and every one of you on this important task ahead.

LAND AND WATER CONSERVATION FUND

Mr. CRANSTON. Mr. President, regarding the land and water conservation fund and the reconciliation resolution pending on the floor, I want to state very emphatically that I am very concerned about the reduction in the level of funding in this reconciliation resolution insofar as it affects the future of the land and water conservation fund and the country's park and recreation programs.

The Reagan administration has proposed and the Senate Budget Committee has endorsed phasing out the land and water conservation fund parkland acquisitions.

The land and water conservation fund was established in 1964 to increase outdoor recreation opportunities for the American people. The program provides for the acquisition of national parklands and for matching grants for State recreation efforts.

The LWCF has been a well-managed program—and an extremely popular program. In fact, Interior Secretary James Watt in his Senate confirmation hearings called the land and water conservation fund "one of the most effective preservation and conservation programs in America."

He was correct. Yet now, Secretary Watt proposes to abolish this "most effective preservation and conservation program." Mr. President, I would hate to believe that Mr. Watt was deliberately misleading Senators during his confirmation hearing, but it is difficult to believe that he might have changed his mind. Perhaps there is no contradiction here: Mr. Watt believes it is "one of the most effective preservation and conservation programs," and, therefore, Mr. Watt is against it.

Over the last 5 years, Congress has approved appropriations from the LWCF at a level of between $400 million and $800 million. This legislation however, assumes a rescission of the $250 million still unspent of the fiscal year 1981 appropriation and an appropriation of only $45 million in fiscal year 1982 merely to cover court awards and meet emergency land acquisition needs.

This is a very small amount of money, compared to the sums we are considering in the pending measure. After closing out court awards, there will be little—if any—funds available to take care of emergency situations.

There are authorized parks and recreation areas around the country—Santa Monica Mountains National Recreation Area in California, Chattahoochee River National Recreation Area in Georgia, Jean Lafitte National Historic Park in Louisiana, Monocacy in Virginia, Cuya-

hoga Valley National Recreation Area in Ohio, Valley Forge National Historic Park in Pennsylvania, Manassas National Battlefield in Virginia, Olympic National Park in Washington, New River Gorge National River in West Virginia, and the Appalachian National Scenic Trail from Maine to Georgia—which are under extreme pressure by private developers, subdividers, and others.

For some of these parks, it is now or never. The lands simply will not be available for park use next year. They will be subdivided and clearcut.

There are, of course, other approaches for preservation of these parklands as open space, but each alternative has its limitations. Zoning is not permanent. Purchase of easements is almost as costly as outright acquisition. And land exchanges are difficult to put together because it is hard to find suitable property which the private landowners desire. These alternatives cannot provide the degree and permanency of protection that Congress felt these parklands deserved when the Federal areas were established—let alone provide the immediate relief that is going to be needed in some cases this year.

As many Members of this body are aware, the authorization level for the land and water conservation fund is now $900 million annually. The fund is made up of Outer Continental Shelf mineral receipts, motorboat fuel taxes, and revenues from the sale of Federal surplus real property. There is currently $1.17 billion unappropriated from the LWCF account. Although the LWCF is not a trust fund and the moneys can be "borrowed" for the purpose of budget balancing, the moneys must always be available upon request for the park acquisition program and the moneys from the LWCF can only be appropriated for the Federal and State park acquisition program.

No one has a mandate to reverse our national park program. President Reagan has no such mandate. Secretary Watt certainly has no such mandate.

The people of our Nation may have voted last November to cut back Federal spending in order to eliminate fraud and waste, to curb the Federal bureaucracy, or to try to put a cap on inflation. But parkland acquisition falls in none of these categories. It is not inflationary. Our parks have not been guilty of fraud and waste. And the park ranger hardly fits the public stereotype of a bungling bureaucrat.

In proposing to halt park acquisition, the administration is marching to a far different drumbeat than the staccato of budget discipline.

This proposal to halt park growth comes not from the mainstream of diverse American political views, but from an anti-Government bias so primitive that I still have difficulty believing Secretary Watt is serious about it. Even the developers of our national resources—the oil, timber, and mining interests—are selective in their opposition to park development.

But Secretary Watt's proposed garroting of park growth lacks even the sophistication of the exploiters. It is more than capricious and irresponsible; it is environmental anarchy.

Our national park system is a treasure more precious than all the gold in our vaults—nothing may be more important to future generations than our trusteeship of these lands. I am not aware of any political consensus in our country that we should quit acquiring parkland. Our parks become less adequate each year as our population outraces park acquisition. And parks are in great demand; visiting a national park is a lifetime experience for millions of Americans.

I believe that with respect to the land and water conservation fund, this budget is shortsighted. By providing a modest amount of money we have the opportunity to save for future generations some of the most beautiful open spaces remaining in America. However, if we do not act now, there is no question that irreversible environmental damage will occur on some of these lands and we will lose forever the chance to preserve magnificent wildlands which Congress has already identified as being nationally significant.

ORDER OF PROCEDURE

Mr. PROXMIRE. Mr. President, will the Senator from California yield me time?

Mr. CRANSTON. I yield.

DR. O'LEARY'S REPORT ON THE PRESIDENT'S CONDITION

Mr. PROXMIRE. Mr. President, the night before last, Dr. Dennis O'Leary, head of clinical surgery at George Washington University, explained to the Nation on all three networks, simultaneously, between 7:30 and 8 o'clock, the problem that the President of the United States suffered because of the assassination attempt.

He explained the physiological problems and explained the state of the President's health. Frankly, I thought he did a really magnificent job.

It made me very proud to have been associated in any way with George Washington University Hospital. My association is very limited. My son was born there. Of course, I know many people who are at George Washington University Hospital. It was a great tribute to the hospital, and it was a remarkable tribute to the American medical profession that Dr. O'Leary could answer a whole series of questions from the press, very complicated questions, answer them simply and clearly so that any layman could understand them, and reassure the Nation that the President's health was sound and solid and that he was recovering.

Dr. O'Leary said that all times during the operation, the President's vital signs were solid as a rock. It was this kind of excellent, clear, responsible, and expert opinion which I believe reassured the country greatly and which would normally pass without notation, but I believe it deserves credit.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. BAKER. Mr. President, I could not agree more with what the Senator has said.

I have never seen a better, more professional performance than that of Dr. O'Leary in Monday evening's live press conference. I commend the doctor for his clarity, as the Senator from Wisconsin has just done.

It is truly remarkable to find anyone who can speak with such poise, such directness, and such obvious accuracy and at the same time, by his tone, can reassure the country about the state of health of the President.

I do not know what Dr. O'Leary's plans are for the future, but there is probably going to be a race to find out if he is a Republican or a Democrat.

Mr. PROXMIRE. I thank the distinguished Senator from Tennessee.

My father was a doctor, my son-in-law is a doctor, my daughter is a physician's assistant, and I greatly admire the medical profession.

One of the problems of the medical profession is that, like the legal profession, they have difficulty making themselves understandable and clear. Dr. O'Leary did a great job.

Mr. BAKER. He did, indeed.

NIGHT AND FOG: VISIONS OF THE HOLOCAUST

Mr. PROXMIRE. Mr. President, later this month the U.S. Holocaust Memorial Council will sponsor Days of Remembrance of the Victims of the Holocaust. As part of this national observance, the American Film Institute here in Washington will present two films about this darkest period of civilized history. Alain Resnais' short film, "Night and Fog" is considered by many to be one of the greatest, as well as one of the few genuine, antiwar films ever made.

It looks at Nazi Germany's attempt to commit genocide against the Jewish people of Europe using such methods of extermination as outrageous medical experiments in which Jews were the subjects; the gas chamber where innocent victims were gassed to death; and the crematorium where the victims' bodies were burnt en masse.

Specifically, "Night and Fog" looks at one of the worst of the Nazi concentration camps, Auschwitz. According to the American Film Institute's Preview magazine, its technique is deceptively simple and brilliantly, disturbingly effective. It contrasts actual footage—in black and white—of the Nazi extermination camps in wartime with quiet, unblinking traveling shots—in color—of Auschwitz as it stands today, grassy and deserted.

"Night and Fog" effectively points out that no matter how physically deserted and serene Auschwitz may look today, the memories of the mental, emotional, and physical torment that took place within the confines of its barbed-wired perimeter remain. But whereas many atrocity documentaries lose their audience by showing too much, this brilliant movie is able to bring its terrible

message home in a manner that shows just enough and grips just right.

Mr. President, the sacredness of human life transcends national, ethnic, racial, and religious differences. The right to live is universal and any attempt to abridge this right should be dealt with accordingly. It is imperative that those of us who enjoy the blessings of living in freedom work together to insure that this right reigns worldwide.

The Genocide Convention, pending in this body for 30 years, condemns those groups who take the lives of entire peoples. By ratifying the Genocide Convention, as every President, including President Reagan, has asked us to do, the United States will clearly demonstrate that it will not tolerate a recurrence of an event such as the holocaust.

Mr. President, I yield the floor.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business to extend not beyond the hour of 10 a.m. and that Senators may be permitted to speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President I, suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTRODUCTORY REMARKS OF SENATOR JENNINGS RANDOLPH AT FIRST ANNUAL SENATOR ROBERT C. BYRD SCHOLARSHIP TESTIMONIAL DINNER

Mr. ROBERT C. BYRD. Mr. President, on March 28, I was honored at the First Annual Senator Robert C. Byrd Scholarship Testimonial Dinner, given by the March of Dimes Birth Defects Foundation, and the Greater West Virginia Chapter of the March of Dimes in Charleston, W. Va.

On that evening, my good friend and colleague, Senator JENNINGS RANDOLPH, honored me further with a beautiful introduction.

I ask unanimous consent that the introductory remarks given by Senator RANDOLPH on that occasion be inserted in the RECORD at this point.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS BY SENATOR JENNINGS RANDOLPH, MARCH 28, 1981

It is a joy to join with all of you in honoring Senator Robert C. Byrd.

As one of the members of your "West Virginia Team" in the United States Senate, I share great comfort in the fact that Bob Byrd is the other team member.

While I labor to develop programs for the handicapped, I always have the support of Senator Byrd in assuring funding for the programs.

The results of this teamwork are evident in the many programs in our State which have benefitted the handicapped. A large portion of our success in Congress is made possible by all the assistance we receive from the March of Dimes and other volunteer organizations. Without the valued counsel and dedicated efforts of organizations such as yours, our efforts in the Senate would not be so measurable.

Certainly the implementation of the programs that are enacted would not be as effective were it not for concerned and caring people such as you. By keeping us informed on the needs of our handicapped West Virginians, you are helping the handicapped throughout the nation.

Our leader in the Senate has been described as having "a supreme sense of orderliness and a Victorian concept of duty." I can think of no higher accolade—and one more deserved—for any public servant.

He has brought new respect for the traditions of the United States Senate, while at the same time working forcefully to achieve a more efficient and productive operation. As majority leader, he set a tone and a pattern that continues.

Senator Byrd's career reflects his respect for order and orderly progression. He is a taskmaster and a tactician, a personification of the disciplined, self-made man. But, as you know, off the Senate floor he has been known to "fiddle around."

His Cinderella story in public service began humbly as an orphaned child in North Carolina, in a time of economic and social upheaval. But Bob Byrd had a big advantage—he was smart and willing to work—and he didn't realize he was disadvantaged.

Reared by a foster father in West Virginia's southern coal fields, Bob surprised the political establishment in 1946, when he upstaged a dozen other candidates to land a seat in the West Virginia Legislature.

His first venture into politics followed a succession of Depression-era jobs. He was a service station operator, a grocery store clerk, a butcher and a shipyard builder.

He retained his House of Delegates seat in 1948 and, two years later, was elected a State senator. In 1952, he staked his six-year record of public service in a political dogfight for a Congressional post from West Virginia's old Sixth District. During those six years, Bob drove thousands of miles over mountain roads to attend part-time classes in four colleges.

He was elected to the U.S. Senate in 1958, and continued his part-time educational goal. He took night courses at George Washington and American universities to earn a law degree. He was personally applauded for his efforts on graduation by the commencement speaker—the late President John F. Kennedy.

Bob Byrd's thirst for knowledge and his respect for education are constant. It is this quality of knowing before action, of reflection and preparation, that has gained him the reputation of never having lost an election in 35 years of public life.

These words of an old poem, whose author is unknown, perhaps best describe the character and persistance of the man we honor tonight:

"The world has room for the manly man,
With the spirit of manly cheer;
The world delights in the man who smiles,
When his eyes keep back the tear.
It loves the man who, when things are wrong,
Can take his place and stand;
With his face to the fight, and his eyes to the light,
And toil with a willing hand."

These qualities are reflected in abundance here tonight. Each of you, in his or her own field, plays an influence role in your state and community. But beyond your peer ranking and your material successes you carry in your hearts the care and compassion to help those in greatest need. You each have, in the poet's words, a desire to face the fight with your eyes to the light and—to insure a sound society based on goodness and humanity—"toil with a willing hand."

Ladies and gentlemen, it is both an honor and a privilege to present your distinguished honoree—and our friend—Senator Robert C. Byrd of West Virginia.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The time for morning business has expired.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTIONS

The PRESIDING OFFICER (Mr. MATTINGLY). The Senate will now resume consideration of the pending business, Senate Concurrent Resolution 9, which the clerk will report.

The assistant legislative clerk read as follows:

Concurrent resolution (S. Con. Res. 9) revising the congressional budget for the United States Government for the fiscal years 1981, 1982, and 1983.

The Senate resumed consideration of the concurrent resolution.

AMENDMENT NO. 20

The PRESIDING OFFICER. The pending business is on amendment No. 20, the amendment of the Senator from Connecticut (Mr. WEICKER).

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Mr. President, I rise to support Senator WEICKER's amendment to Senate Concurrent Resolution 9 to change the instructions to the Small Business Committee. This amendment would reduce the amount the Small Business Committee has been instructed to save by $150 million.

During my 2 years service on the Small Business Committee, I have become convinced that small business will and must play a key role in the revitalization of our economy. Members of the committee have heard what small business needs to become more successful and what the Federal Government can do to aid in that process, as well as what programs work and what programs need to be modified. When talking about small business, we are talking of the most efficient, innovative, growth oriented sector of our economy. Small businesses generate the majority of new jobs as well as accounting for 55 percent of all existing jobs in the private sector. All of this was pointed up during the White House Conference

on Small Business held last year and supported by many of the Members of this body.

The reconciliation resolution assumes the elimination of all SBA direct lending. This not only includes the direct business loan program, but direct lending programs for the handicapped, local development companies, and for firms involved in the energy field.

SBA is often the only source of capital for these entities because traditional lenders do not want to accept the risk involved in lending capital to a new or innovative company. Without SBA assistance, we may lose the chance to develop new energy technologies. Firms which employ the handicapped may fail.

The resolution also assumes a major increase in the interest rates charged to homeowners and businesses which have suffered a physical disaster.

The SBA administers a disaster loan program which provides financial assistance to homeowners and businesses in disaster areas. Since 1950, SBA has been the principal agency of the Federal Government that furnishes monetary aid when disaster strikes. Natural disasters are often of such magnitude that local financial institutions are unable to marshal the resources necessary for recovery. When a disaster strikes, we all should help—in other words, a Government role is appropriate.

The disaster program is one which no person wants to qualify for. It is not a giveaway program nor is it assistance for a special interest, a specific income group or a region of the country. Every single homeowner in the United States may find him or herself in a situation where a flood, hurricane, volcano, tornado, fire, or other calamity destroys part or all of his or her property and possessions. I would be happy if we never used the program but that is beyond our control. We must have such a program and it must be a good one.

Disasters occur throughout the United States. Over the last several years disaster declarations have been made in all of the 50 States. SBA's statistics show that through fiscal year 1979, 766,980 disaster loans have been made to homeowners and businesses in the United States. Many, many Americans utilize this program. Most of the loans are to homeowners with inadequate or no insurance. Between 1976 and 1980, 700 disaster declarations were made by either the President or the Administrator of the Small Business Administration. All Members of the Senate are familiar with the major disasters which occurred in the United States as well as those which happened in their own States.

When the disasters occur, the Federal Government is there with low-interest loans to help individuals and communities rebuild. If we do not accept this amendment that low-interest loan will presumably no longer be available and homeowners will find themselves burdened with huge monthly payments to the Federal Government to pay off their loans at 13 percent interest instead of the present 3 percent. There is no choice for homeowners who have suffered through a hurricane or flood or fire. They have to rebuild and we should make it as reasonable as possible. All our people are willing to help. Our people want to help. We hear about these disasters for a week or two in the media but the residents of the areas struck have to live with the devastations for months; the scars often remain for years. Let me give you an example of some of the disasters which have qualified for SBA disaster assistance.

SBA DISASTER ASSISTANCE

California, 1980, floods, 14,000 loans; Texas, 1980, floods, 25,000 loans; Louisiana, 1980, floods, 8,500 loans (2 separate disasters); Texas, 1979, tornado, 2,500 loans; California, 1978, floods, 18,000 loans; Mass., 1978 floods, 10,000 loans; Maine, 1978, floods, 1,500 loans; Illinois, 1978 storm, 1,662 loans; Minnesota, 1978, tornado, 1,500 loans; Alabama, 1979, hurricane, 6,000 loans; Nebraska, 1980, tornado, 600 loans; N. Dakota, 1979, floods, 582 loans; Washington, 1970, volcano, 1,100 loans and still counting.

I urge the Members of the Senate to accept Senator WEICKER's amendment. It will give the Small Business Committee the flexibility it needs to make good policy decisions on programs of importance to small businesses. Furthermore, it will enable the committee to consider the implications of major changes in the disaster loan program, changes which I believe should not take place.

Homeowners have relied on this low-interest assistance program in order to help get them back on their feet again. I believe Senator WEICKER's amendment will help do what the American people want us to do, which is to retain a critical form of assistance to those who are, perhaps, the most neediest of all people, those who have been wiped out in a disaster and find themselves with either no insurance or inadequate insurance.

Mr. WEICKER. Mr. President, the Senator from Michigan raises an important subject, one which has been addressed by the Small Business Committee and the Congress on numerous occasions. As I mentioned in my opening statement last night, it was just last July, after 2 years of negotiations, that the rates and terms for disaster loans were finally agreed to.

Both the President and the Budget Committee have proposed sweeping changes in the disaster loans but also would change the eligibility criteria and the amount of loss which could be covered by Government loans. Taking such sweeping action without the benefit of time to examine the effect on disaster victims is of concern to me.

If the Senator desires, I would be more than willing to schedule hearings in the Small Business Committee to examine the effect of these sweeping changes on homeowners and businesses.

Mr. LEVIN. Mr. President, I appreciate Senator WEICKER's concern about the disaster loan program. It is evident that he is well informed about the proposed changes in the program and I trust the issues we have raised today will be addressed in the Small Business Committee with all the options explored.

Mr. WEICKER. Mr. President, just for the next few minutes—and then I intend to allow the vote to proceed—I would just like to summarize the effects of this resolution. What is being done here is not much different, I suppose, from that which the Budget Committee seeks to accomplish through the budget process; that is, taking away the policy-making or the discretionary powers of the various authorizing committees.

The Small Business Committee gave a great deal of thought to the budget report that it presented to the Budget Committee on March 16. And, indeed, in the budget that was presented, there was a slight rise over that which was suggested by the President in certain areas which we deemed to be important and worthy of an increase. Instead, the Budget Committee has handed us a budget that is considerably below that of President Reagan.

Now, if these economically difficult times have impacted with harshness upon business as a whole, it has been especially harsh insofar as small business is concerned. One has only to read the newspapers to see business after business, small business after small business going belly up. And the reason for that, very simply, is either the inability to get capital or the cost of that capital.

The large business either has adequate capital or can pay the 20-, 21-, 22-percent interest. It certainly does not do much for the bottom profit line as far as those businesses are concerned, but they can get the money and can pay it. Not so with small business. It is a matter of life or death. And, in too many cases, death is coming rather swiftly and in rather large numbers these days when we are talking about small business.

What doubly concerns me is that it is the small businesses of this Nation that have for the past decade supplied about 90 percent of the new employment. About 90 percent of the innovation comes from small business. It is small business that is going to provide the competition which keeps prices down and quality high. And without that competition you are going to get a concentration of economic power in the hands of a few corporations in this country.

I have stood on this floor and very much opposed restricting competition by legislative fiat as has been suggested by some of my colleagues. But whereas I oppose legislative fiat, I want to do everything to encourage competition. And the economic policies of the previous administration and, indeed, in a different way, the economic policies of this administration, are further narrowing and restricting that competition.

A business cannot start up without capital. A business cannot expand or grow without capital. And so what you have is a series of forced mergers. It is one thing for a small business to sell out for estate reasons or as a matter of choice, insofar as the owners of that business are concerned, but to be forced, either in the sense of going out of business or being forced into a merger with a larger corporation because there is no capital or one cannot afford to pay for the capital, that is a different story.

And right here, what the Budget Committee has done is to take away that source of capital from those who need it the most. Not only are they small businesses but they are the greatest risks within the small business community. Forty-seven percent of the direct loans in 1980 went to minorities and to women. It is not easy for either of those categories to obtain capital, neither can they afford the cost of capital. Many other of these are direct loans to the handicapped and for urban economic development.

I do not disagree with the direction that the Budget Committee suggests in shifting over from direct to guaranteed loans. I have no problem with that. But to bring it about in one fell swoop creates enormous hardship. Now we are no longer talking about macro or microeconomics; we are talking about an individual going bankrupt. So what to us is a matter of policy becomes a personal tragedly to somebody else.

I might add, again in terms of the philosophy of this administration, we are not talking about public works jobs; we are talking about the creation of jobs through the private sector.

So for all these reasons I would hope that my colleagues in the Senate would stand with the President, which really is the middle ground between the figures suggested by the Small Business Committee, which are on the up side, and the figures suggested by the Budget Committee, which are on the down side. I would hope the Senate would stand with the Small Business Committee and the President and pass this amendment.

I am prepared to go ahead with the vote. Whenever Senator HOLLINGS or Senator DOMENICI are prepared to yield back the remainder of their time, I am prepared to do so. Let us get on with a vote on this matter, unless someone else is prepared to speak.

The PRESIDING OFFICER. Who yields time?

Mr. HOLLINGS. Mr. President, I will be glad to check on this side during a quorum call to see if anyone on this side wants to further debate this matter.

Mr. President, I suggest the absence of a quorum, with the time to be equally charged to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. Mr. President, I yield back the remainder of my time.

Mr. WEICKER. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment of the Senator from Connecticut. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CRANSTON. I announce that the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Rhode Island (Mr. PELL), the Senator from West Virginia (Mr. RANDOLPH), and the Senator from New Jersey (Mr. WILLIAMS), are necessarily absent.

I further announce that, if present and voting, the Senator from West Virginia (Mr. RANDOLPH), would vote "yea."

The PRESIDING OFFICER (Mrs. HAWKINS). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 28, nays 68, as follows:

[Rollcall Vote No. 58 Leg.]

YEAS—28

Baucus	Hatch	Moynihan
Bradley	Hayakawa	Nunn
Byrd, Robert C.	Heinz	Packwood
Cannon	Inouye	Riegle
Cohen	Kennedy	Sarbanes
Cranston	Leahy	Specter
Dodd	Levin	Tsongas
Ford	Mathias	Weicker
Glenn	Metzenbaum	
Hart	Mitchell	

NAYS—68

Abdnor	Eagleton	McClure
Andrews	East	Melcher
Armstrong	Exon	Murkowski
Baker	Garn	Nickles
Bentsen	Goldwater	Percy
Biden	Gorton	Pressler
Boren	Grassley	Proxmire
Boschwitz	Hatfield	Pryor
Bumpers	Hawkins	Quayle
Burdick	Heflin	Roth
Byrd, Harry F., Jr.	Helms	Rudman
	Hollings	Sasser
Chafee	Huddleston	Schmitt
Chiles	Humphrey	Simpson
Cochran	Jackson	Stafford
D'Amato	Jepsen	Stennis
Danforth	Johnston	Stevens
DeConcini	Kassebaum	Symms
Denton	Kasten	Thurmond
Dixon	Lavalt	Tower
Dole	Long	Wallop
Domenici	Lugar	Warner
Durenberger	Mattingly	Zorinsky

NOT VOTING—4

Matsunaga	Randolph	Williams
Pell		

So Mr. WEICKER's amendment (No. 20) was rejected.

UP AMENDMENT NO. 36

(Purpose: To provide for an across-the-board reduction in energy activities)

Mr. HART. Madam President, I send to the desk an amendment, on behalf of myself, the Senator from Montana (Mr. MELCHER), the Senator from Massachusetts (Mr. TSONGAS), the Senator from Ohio (Mr. GLENN), and others, and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Colorado (Mr. HART), for himself and others, proposes an unprinted amendment numbered 36.

Mr. HART. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with "$14,667,000,000" in line 14, strike out through "$47,694,000,000" in line 20 and insert in lieu thereof the following: "$12,445,000,000 and outlays by $2,387,000,000 in fiscal year 1981; to reduce budget authority by $52,825,000,000, and outlays by $36,958,000,000, in fiscal year 1982; and to reduce budget authority by $59,228,000,000, and outlays by $47,544,000,000".

On page 2, beginning with "$13,300,000,000" in line 24, strike out through "$1,800,000,000" in line 1 on page 3 and insert in lieu thereof the following: "$11,078,000,000 in budget authority and $1,534,000,000 in outlays for fiscal year 1981; by $3,213,000,000 in outlays for fiscal year 1982; and $1,650,000,000."

On page 4, beginning with "$645,000,000" in line 5, strike out through "$3,961,000,000" in line 10 and insert in lieu thereof the following: "$140,000,000 in budget authority and $2,997,000 in outlays for fiscal year 1981; "$3,243,000,000 in budget authority and $3,197,000,000 in outlays for fiscal year 1982; and $4,011,000,000 in budget authority and $3,958,000,000".

On page 6, beginning with "$2,071,000,000" in line 9 strike out through "$3,628,000,000" in line 13 and insert in lieu thereof the following: "$331,000,000 in budget authority and $89,000,000 in outlays for fiscal year 1981; $3,714,000,000 in budget authority and $3,358,000,000 in outlays for fiscal year 1982; and $3,660,000,000 in budget authority and $3,522,000,000."

The cosponsors of Mr. HART's amendment (UP No. 36) are: Mr. CRANSTON, Mr. MELCHER, Mr. BUMPERS, Mr. DECONCINI, Mr. KENNEDY, Mr. MATSUNAGA, Mr. BAUCUS, Mr. LEAHY, Mr. MITCHELL, Mr. WILLIAMS, Mr. BIDEN, Mr. GLENN, Mr. TSONGAS, Mr. FORD, Mr. MOYNIHAN, and Mr. HUDDLESTON.

Mr. HART. Madam President, with a wide variety of colleagues, I am offering this amendment, which addresses an issue crucial to the future of our Nation: reaching energy independence as soon as reasonably possible.

In setting its committee marks, the reconciliation resolution assumes enactment of the administration's proposed energy budget. This budget, in the opinion of many, could seriously jeopardize our economic and national security because it does very little to reduce our near-term vulnerability to disruptions in the supply of imported oil.

The energy budget adopted by the Senate Budget Committee would reduce the total amount of funds available for energy independence in the shortest period of time, and increases funds for programs with only a speculative chance of contributing to our energy security.

By contrast, our amendment proposes distributing the overall 15 percent equitably among each functional area within the energy budget—energy supply, research and development, energy conservation, and fossil energy programs. In addition, it restores fiscal year 1980 budget authority to sustain both the Solar Energy and Energy Conservation Bank and the alcohol fuels loan program at a subsistence level, so that those programs can continue to exist into the early 1980's.

I ask unanimous consent that a table indicating my assumed funding levels for each of these programs be included in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

COMPARISON OF FUNDING ASSUMPTIONS UNDER PROPOSED AMENDMENT

	Current policy—Fiscal year 1981	
	BA	O
Energy supply R. & D.	2,807	2,803
Fossil energy	1,135	930
Energy conservation	800	705
Alcohol fuel		40
Solar/conservation bank		10

Mr. HART. Mr. President, this amendment differs from other amendments offered during this debate in that it would retain the overall level of fiscal year 1981 spending on energy programs proposed in the administration's budget, but would change the marks of three committees: Energy, Agriculture, and Appropriations. At the same time, however, it would reverse the assumptions underlying the reconciliation instructions, putting the Senate on record in favor of a balanced and diverse energy program that includes a wide range of energy technologies.

Finally, by more equitably distributing the proposed funding reduction, the amendment would give the relevant committees of jurisdiction added flexibility in the determination of the appropriate level of funding for specific energy programs.

This amendment is more concerned with a principle than with a specific set of numbers. This is the principle, as I have indicated, of a balanced energy program. Over the past decade and under three administrations, Congress has fashioned a balanced energy program, based on a range of energy technologies, to help cure us of our debilitating addiction to foreign oil. But, unfortunately, the Budget Committee's proposal could undermine that balanced program by reducing funding for certain programs—such as solar energy, conservation, fossil energy, and alcohol fuels—while increasing funding for other programs, particularly nuclear energy.

It is the premise of this amendment that we should not use the budget process to fundamentally alter this country's energy policy. Proposals to change radically the levels of Federal support for specific energy programs should receive a full and fair hearing in the proper forum—the appropriations and authorization committees. Our energy policy is of such serious consequence to this country that major changes in it must not be implemented through the back door as part of this reconciliation resolution and instruction.

Our amendment insures continued support of all energy programs, even if at reduced levels, until such time as Congress, after full debate, decides that we should fundamentally alter our energy course. Moreover, it establishes a precedent to guide the Budget Committee and the Senate when we consider the first budget resolution for fiscal year 1982.

The assumptions we have made under this amendment for redistributing the administration's proposed funding cuts to specific energy programs do not bind the committees of jurisdiction. Nevertheless, some possible methods for redistributing the cuts emerge from a quick review of the proposed energy budget. For example, the administration's budget would cut funds for solar energy programs by 16 percent in fiscal year 1981 and 60 percent in fiscal year 1982. It would cut funds for fossil energy programs by 27 percent in fiscal year 1981 and 73 percent in fiscal year 1982. Finally, it would eliminate entirely both the Solar Energy and Energy Conservation Bank and the alcohol fuels loan program.

These are all programs that have contributed significantly to reduced consumption of oil. For example, a Department of Energy study has found that our energy conservation and solar energy programs will reduce oil consumption by 103 million barrels a year—the equivalent of 20 days of oil imports.

By comparison, the administration's proposed energy budget for 1981, 1982, and 1983 would increase funding for a program that will reduce oil consumption by only 4 million barrels a year—the equivalent of less than 1 day of oil imports. The nuclear energy program is increased by 2.5 percent in fiscal year 1981 and by 13.2 percent in fiscal year 1982. The administration's proposal would provide $170 million in fiscal year 1981 and $220 million in fiscal year 1982 to complete the Clinch River breeder reactor—a project that will contribute little, if at all, to the advancement of breeder technology or to our energy security.

I, for one, would like to see funds transferred from the expanding budget for nuclear energy and applied instead to programs that will guarantee more near-term reductions in dependence on foreign oil, such as technologies to promote energy efficiency in residences, commercial buildings, and industry. And I would also remove the safety net from the nuclear industry and place it under the people who will suffer the most from increases in energy prices. The nuclear industry has enjoyed over $12 billion in Federal subsidies since the commercial nuclear power program began 20 years ago.

Such a mature industry should not still need a Federal umbilical cord. Rather than subsidizing the construction of the Clinch River breeder reactor—a welfare project for the nuclear industry—the Federal Government should continue its low-income weatherization program to help truly needy people cope with and adjust to rapidly increasing energy prices.

Although this amendment does not, and cannot, direct the committees of jurisdiction to fund specific energy programs, it does embrace a general theory—that achieving energy security is too important for the future of this country to leave exclusively to the operation of the free market.

The free market does not account for the "cost" of continuing U.S. vulnerability to disruptions in the supply of imported oil. It does not account for revolutions in oil-producing regions, terrorist activities that destroy oil production facilities, or wars between oil producing countries. Finally, the free market does not offer some miraculous divining rod that will discover sufficient energy resources to free us from our dependence on foreign oil.

This amendment seeks, within the administration's proposed reduction in the overall energy budget, to provide a balanced energy program based on a diversity of energy technologies. Failure to maintain such a broad-based program, could well promote energy insecurity rather than energy security.

Madam President, I yield to my colleague from Massachusetts, Senator TSONGAS.

Mr. TSONGAS. This is the first time I have had the occasion to refer to Madam President. I must say it is a pleasure.

Madam President, yesterday I was giving a speech in Geneva to an energy conference convened on the issue of photovoltaics. There was a broad representation of scientists and bankers from around Europe and the United States concerned about the development of solar cells, and they were pressing me about our energy policy in this country and were dumbfounded by our current commitment in terms of this budget.

The question that came up over and over again was this: Why is the United States not reacting to all the scientific data accumulated in the last 2 or 3 years which point to conservation and renewables as very real energy alternatives?

The first report was the Harvard Business School report called "Energy Future." There was a report done by a group called Resources for the Future, one done by the National Academy of Sciences, one done by the Solar Energy Research Institute, one done by the Carnegie-Mellon Institute, one done by the Ford Foundation, and one done by the Office of Technology Assessment. They all said the same thing. So here we are seven studies later acting as if they were never produced.

Who is denigrating conservation and renewables? Not the Europeans, not the Japanese, not the scientific community, not the studies that have been done, not the private sector, but the political structure, and I challenge anyone to come up with a report that has been done in the near term that refutes the

other seven reports to which I have just spoken.

The question is if we are not going to abide or listen to or take stock in such studies, why do we not just stop them? If we are going to react ideologically, then why have the studies in the first place?

Is there any role for scientists to interface with Government? I think there is. I think it is about time we got on to it.

We are going to spend a lot of money in this Congress to provide for national security, and as to 3 to 5 percent real growth in military spending, I agree with that. But the fact is that our vulnerability in national security is the Persian Gulf, and this budget is not going to do anything seriously, short- or mid-term, to deal with this.

It is about time that we in Congress took conservation and renewables seriously. In the best of all possible worlds, we would increase the energy budget dramatically. That is not going to happen, not under this budget anyway.

So then those of us who have advocated what we must have, have done so with the idea that increases will not be dramatic. What we never anticipated was that the decreases there would be dramatic—65 percent in the case of solar, and 74 percent in the case of conservation.

That is why I am pleased to join with Senator HART, Senator GLENN, and 11 others in sponsoring this amendment. It would reduce Federal energy spending as much overall as would the administration's proposed budget.

I would say to the Senator from New Mexico—who is not on the floor—that he and I have teamed up in the past on both conservation and solar energy projects. Inasmuch as this does not have a net spending impact, I hope he will take a very good look at it and be consistent with the very progressive positions he has taken in the past.

This amendment represents fiscal responsibility while maintaining an adequate broad-based energy research and development effort. It represents a serious commitment to cut U.S. dependence on foreign oil as fast as possible, and given the fact that SPRO was defeated in recent votes on the floor, it would seem to me important that there would be some effort toward the mid- and short-term energy dependence situation.

We are seeking to distribute the proposed spending cuts equally among the three functional areas, and I think Senator HART has gone into that in some detail.

Let me speak about some of the details of the studies that have been completed in the past few months. They have shown repeatedly that energy conservation is the fastest and cheapest way to reduce our dependence on foreign oil, and there is not one study that would contradict that fact.

Conservation can and will play a major role in substituting for oil. A study yet to be officially released by the Solar Energy Research Institute shows that national energy consumption could be reduced from today's levels by more than 20 percent by the year 2000, while we maintain a growing, vital economy.

Further, by the year 2000 renewables could provide 20 to 30 percent of the remaining energy demand. Because this scenario does not fit in with the administration's plans, this study has been suppressed.

Madam President, I ask unanimous consent that the executive summary of this study be printed at the end of my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. TSONGAS. What we need and what the administration's proposal does not provide is a cost-effective and balanced energy program, one that recognizes the need for both long-term, high-risk R. & D. activities and short-term initiatives to reduce the imports of foreign oil;

The need to remove institutional, market, and informational barriers that prevent the rapid penetration of new, cost-effective energy technologies;

The essential role of State and local governments in the formulation and implementation of a national energy policy;

The glaring need for effective emergency planning, including a strong strategic petroleum reserve; and

The need for financial assistance to low- and moderate-income groups that cannot, or are unlikely to, take advantage of energy tax credits.

Further, Federal programs which can and should be supported by the private sector ought to be phased out in an orderly manner rather than abruptly terminated. The administration's proposal to eliminate funding immediately will seriously damage many programs which, given time to adjust, would otherwise be continued by the private sector or by State and local governments.

There are a number of examples where the administration's energy proposals are inadequate:

First, the rescission of the solar and conservation bank moneys at a time when low- and middle-income citizens cannot and are not taking advantage of the residential energy tax credits;

Second, the drastic reduction in R.D. & D. support for the buildings sector even though it is too fragmented to support such work on its own;

Third, the elimination of cost shared R.D. & D. with industry to develop new energy conservation technologies at a time when industry has little capital to support such work alone;

Fourth, the drastic reductions in energy information programs for consumers despite their cost effectiveness;

Fifth, the rescission of alcohol fuels loan guarantees, even though our oil import bill exceeded $90 billion last year; and

Sixth, the elimination of magneto-hydrodynamic R.D. & D. despite its high-risk high-payoff potential—in contradiction of the administration's statements in favor of such activities.

There are many such examples. Rather than list all of them, it would be more informative to look at the details of some of those listed above.

SOLAR ENERGY AND ENERGY CONSERVATION BANK

The solar energy and energy conservation bank provides loan and grants for insulation, weatherization, and energy-saving equipment. Incentives vary in value according to income. Legislation for the bank was written for those who would not be expected to take advantage of the 15-percent tax credit for residential conservation or 10-percent credit for businesses. The mix of loans and grants can be varied in the program plan.

The administration has stated that existing energy tax credits and the rising price of energy under decontrol are sufficient to stimulate conservation measures and the use of renewables. That tax credits and rising prices are not sufficient and that the bank is in fact necessary can be seen by the following:

First, many low- and middle-income Americans are unable to invest in conservation or renewables to reduce their home heating and cooling bills because they lack access to capital. Analysis of the 1978 and 1979 tax returns indicates that the tax credits (and thus investments in residential energy conservation and renewable energies) are going primarily to the wealthy. Preliminary analyses of 1979 tax returns show that of those with incomes between $30–$50,000, over 14 percent took advantage of the residential energy credits. Nearly 13 percent of those with incomes of $25–$30,000 took the tax credit. Of those with incomes of $16–$18,000, 7 percent took the tax credit. Just 4 percent of those with incomes of $12–$14,000 took the tax credit. Only 2 percent of those with incomes of $8–$10,000 used the tax credit. Thus, an individual or family with an income of $30–$50,000 was seven times more likely to take advantage of the tax credit than one with earnings of $8–$10,000. Madam President, I ask unanimous consent that a Congressional Research Service memorandum detailing the use of residential energy tax credits be printed in the RECORD at the end of my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. TSONGAS. Second, the administration projections of energy conservation tax credit claims are twice recent values. In 1978 conservation tax credits were $558 million (covering 20 months), and the estimate for 1979 is $481 million. Yet the administration claims $739 million for 1981 and $799 million for 1982.

Third, energy conservation expenditures are now much less than optimum. The 1978 tax returns indicate an average expenditure of $700. Studies show, however, that the optimum is $2,000 or more with attendant energy savings of 50 percent.

Fourth, even with the administration's optimistic estimate of the number who will invest in residential energy conservation, it will be many years before they are all insulated to the optimum. There are roughly 50 million single-family homes and 25 million residential units in apartments in the United States. In-

vesting $2,000 in each for 50-percent energy savings and receiving $300 credit, with $800 million per year used—the administration predicts that the use will decline after fiscal year 1982—it will take 30 years or more to improve all of them. A 50-percent reduction in heating requirements would have nearly 40 percent of our oil imports—2 mmbbloe/day.

Clearly, the existing rate of investment in residential energy conservation and renewables is too slow, the amounts invested are too low, and lack of access to capital is a significant barrier to all but the wealthy.

The solar energy and energy conservation bank was designed with these problems in mind.

The target of the bank's loans are the low- and middle-income groups. Loans for energy conservation would be available to those with incomes of 120 percent of the U.S. median income or less. Those whose incomes are 80 percent or less of the median would be eligible for direct grants. Further, loan subsidies for passive solar applications which are not covered by tax credits would be available, unrestricted by income.

Loan subsidies of up to $1,250 for a single unit would be available. Although larger investments would be cost effective, this at least provides more capital than is currently being invested.

The tax credit does not reach three groups included in the bank's coverage: Those in rental property, small businesses, and houses built since April 1977. Even if the credit were somehow broadened in coverage, we would still be faced with the fundamental problem with a tax credit: Most consumers do not have the capital to make the initial purchase and wait for a refund.

The bank's legislation is flexible and can be carefully tailored to administration policy. The secretary has broad authority to run this program in an uncomplicated, nonbureaucratic manner that minimizes redtape and maximizes energy savings.

The bank will have a Federal staff of fewer than 25 employees and minimal administrative costs.

The bank is one of the few instruments available to help small businesses achieve energy efficiency. While much is made of the need for productivity incentives in the steel, aluminum, petrochemical or chemical industries, the 7 million small businesses have been largely ignored.

It will assure President Reagan's supporters that he intends to carry out the promises of the 1980 Republican Platform, which reads:

> We believe that the role of government is best performed by structuring the creative cost-effective incentives to achieve energy sufficiency and conservation. . . .
>
> Finally, in conjunction with this all-out production initiative we must strike to maximize conservation and the efficient use of energy.

THE BUILDING SECTOR

The building sector programs include the R.D. & D. on the thermal performance of new building construction techniques, on the thermal performance of various retrofit strategies, and on the use of renewables—particularly solar techniques—to heat and cool buildings. Existing Federal programs spend roughly $1 per year per building in the United States for R.D. & D. to improve their thermal performance and implement renewables, yet these buildings consume, on the average, $1,500 worth of energy per year. Since 50 percent and more of this energy could be saved, there is a clear need for R.D. & D. into the best strategies to save it; which either the Government or private industry must find. A quick look at the industry indicates why the private sector cannot do it alone.

First, the building industry is too fragmented to support R. & D. easily and this fragmentation inhibits information transfer and innovation. The American Institute of Architects (AIA) estimates that the design and construction sector encompasses 1.2 million individual businesses with a total of 10.7 million employees. Of the AIA's member design firms, 77 percent have fewer than nine employees. Further, information derived from buildings R. & D. must be worked up into appropriate design tools for these small firms in order to be useable.

Second, ideas developed by a firm may not benefit the originator as many building design ideas are not patentable. This reduces the incentive to do R. & D. An example might be a slightly different window layout that improves winter solar gain and reduces it in the summer.

Third, the building industry is undercapitalized and faces high interest rates. It cannot take a chance on constructing a building that will not sell or does not perform the way it was intended to.

Finally, the Government has traditionally developed codes and standards for buildings and building components that can be adopted for use voluntarily by the States. This reduces the market dislocation of widely varying standards from State to State, and helps protect consumers against fraud.

Clearly, there is a legitimate role for the Federal Government here and one that has far too much potential for savings to both consumers and the Nation as a whole to shirk.

INDUSTRIAL CONSERVATION PROGRAMS

Industrial conservation programs have the potential of yielding enormous savings. Manufacturing now uses roughly 38 percent of the energy consumed in the United States—30 quads—much of which would be saved. The Solar Energy Research Institute study, which is summarized following this statement, indicates that improved efficiency alone is likely to result in the oil equivalent of 5 million barrels per day savings by the year 2000, or nearly 11 quads per year. These programs are especially worthwhile because of the industrial tax deduction for energy expenses. Every dollar's worth of energy savings saves the Federal Treasury roughly 46 cents—the corporate tax rate. The Government thus should have a strong interest, given existing tax laws, in helping industry to reduce energy consumption.

Under the Federal industrial conservation program, projects are cost shared between the Government and industry to insure continued industrial interest and rapid deployment of new technologies. Many projects include buy-back provisions under which industries return much of the Federal investment when savings begin on successful technologies.

The intent of the program is to foster research and development that is too risky for industry alone, demonstrate the reliability of promising technologies, and provide information as to what is available and what is cost effective in industrial conservation.

This program has proven particularly cost-effective for the Government. Among its many successes are the following:

Successful pilot demonstrations have been completed for the conversion of waste polypropylene to fuel oil. It is now being commercialized with no further Federal assistance. This will save an estimated 2 million barrels annually by the year 2000 on a Federal investment of $552,000.

Using fumes as fuel in paint curing has been demonstrated successfully and is now being commercialized. Total savings to date are more than 4.5 trillion Btu's. The Federal expenditure was a net of $194,000.

Under current economic conditions, however, industries will not by themselves adequately invest in energy conservation despite their recent dramatic energy savings. There are many reasons why.

First, savings to date have been due to housekeeping measures such as adjusting boilers and steam traps, and reducing lighting, and have required little capital or technical input. The next step requires medium range capital investments and new technologies.

Second, capital is limited and energy efficiency improvements must compete with higher labor costs, higher material costs, and overcome the barrier of high interest rates. Capital is more often used to improve the market share. Corporate debt has increased from 20 percent of investment funds in 1975 to 47 percent in 1980. Retained earnings—the chief source of corporate investment funding—has decreased because the depreciation system—the source of half of retained earnings—is based on the original cost of equipment. As inflation drives up the replacement cost of plant and equipment, the value of depreciation allowances does not change and the funding to buy new equipment becomes inadequate. More rapid depreciation (for example, 10-5-3 plan) will provide only half the estimated $20 billion needed for energy conservation improvements and at a cost to the Treasury of $18.8 billion. Further, the 10-5-3 plan will favor capital investment and so decrease funding for research and development. Finally, in recent years 40 percent of all capital investment has been for utility powerplants. If the administration increases the rate of investment as planned, there will not be sufficient capital to renovate and modernize our industry.

Third, energy is often only a small part of the product's cost—even in some energy intensive industries—reducing the incentive to conserve and increasing

the likelihood of passing energy costs directly on to consumers.

Fourth, industry pays less than the marginal cost of energy. Currently the replacement cost for electricity is roughly 60 mils/kWh; industry pays an average of 30 mils/kWh. Further, the Federal Government allows a deduction for energy expenditures that is roughly equivalent to a direct subsidy at the corporate income tax rate of 46 percent.

Fifth, improvements in energy efficiency are made by the dominant industries and are not spread industrywide. Further, without adequate attention to improving the energy efficiency of our industrial equipment and processes we are likely to lose important international markets.

As a percentage of Government research budgets devoted to energy, the United States ranked 13th in 1979 among the 17 members of the International Energy Agency. Sweden spent nine times more than we did; Great Britain three times, and Japan two and a half times.

In 1977, Germany established an energy conservation R. & D. budget, planning to spend approximately $80 million per year. Reviewing price and supply in 1979, they increased spending to nearly $1 billion in 1980.

France—with an industrial sector just 10 percent that of the United States—now spends about $300 million for loans and $150 million for direct subsidies of energy efficiency R. & D.

Sweden—with 8 million people—had provided $112.5 million in grants for energy improvements in industrial processes and commercial buildings by the end of 1979.

Failure to invest in energy-efficient equipment will result in the same kind of market failure by American products as has happened with the automobile. In 1980, for example, there was a 17.5-percent increase in imports of industrial heating equipment.

ENERGY INFORMATION PROGRAMS

Energy information programs inform the public what is possible in energy conservation and the use of new energy technologies. For the free market to function, it is essential that information be available to the consumers. Further, this is a very high leverage way to use Federal dollars. Congressman TOBY MOFFETT, in testimony before the House Subcommittee on Energy Development and Applications on February 26, 1981, pointed out that for the year 1979 the low cost/no cost program cost $2.6 million but the improvements resulting from that program saved $69 million in 1980 and will save $345 million over the next 5 years.

Similarly, energy information programs targeting small manufacturing firms have proven highly effective and have directly saved the Federal Treasury far more than they have cost. Small firms often do not have sufficient resources to develop energy strategies. Helping them save energy directly saves the Treasury money because industry fuel expenses are tax deductible. Every dollar's worth of fuel saved by industry shows up as a 46 cents saving to the Treasury. One of these programs, the energy analysis and diagnostic center shows an annual return on the Government's investment of 121 percent.

ENERGY AND SECURITY

Madam President, we cannot guarantee America's economic and military security under current conditions of energy insecurity. We are depending on the undependable supply of foreign oil. Even absent a cutoff, which OPEC or the Soviet Union could cause, we are paying too high a price for our addiction every day.

I support the President's intention to meet America's energy needs in a fiscally responsible manner. This means respect for market forces, and close attention to cost effectiveness. This means strong support for programs that can cut our energy dependency in the fastest, most cost-effective way. It also means a strong, balanced Federal role in research, development, and demonstration for a variety of technologies that will be the foundation of our energy future. Mr. President, this amendment will allow Government, private industry, community organizations, and private citizens to achieve solutions to the energy crisis as fast as possible, which is as fast as our national security requires.

Mr. TSONGAS. Madam President, I make only one further point. The conference I was at on Monday and Tuesday in Geneva indicated that the United States right now is in the forefront of R. & D. and production for photovoltaic cells. They are looking at a future photovoltaics industry of between $100 billion and $300 billion.

There is beginning to be a great deal of activity in this area, particularly by the Europeans and Japanese, who see the potential and want to take that potential away from the United States.

It seems to me that for a lot of reasons, for our own self-interest and for the overall energy future, this amendment should pass. Let us at least not lose pace with the progress we have made in the past few years.

I commend the Senator from Colorado for his initiative.

EXHIBIT 1

EXECUTIVE SUMMARY OF THE SOLAR/CONSERVATION STUDY BY THE SOLAR ENERGY RESEARCH INSTITUTE

A NEW PROSPERITY: BUILDING A SUSTAINABLE ENERGY FUTURE

I. Introduction

The prosperity of the United States and its industrial allies has been based to a large extent on reliable and inexpensive supplies of oil and gas for the previous half century. Events of the past few years have abruptly called the basis of this wealth into doubt. It is the object of this study to define a more stable foundation for growth in the American economy by examining opportunities for increasing the productivity of energy consumption and for making greater use of renewable energy resources. The results indicate that it is possible to construct a plausible, practical and economically attractive sequence of events that would allow the productivity of the average American worker to increase as fast as it has during the past 20 years, the achievement of a "full employment" economy—and consequently a rapid increase in national income—while reducing national consumption of energy by nearly 25%. Energy from renewable resources could supply 20–30% of the remaining energy demand. It must be emphasized that these are goals and not forecasts. The national benefits of achieving these goals are so enormous, however, that they must be taken seriously and examined with care.

Far from being incompatible with vigorous economic growth, there is reason to believe that the strategy proposed here is essential to maintain such growth. New supplies of oil, gas and coal will, almost without exception, be more expensive than the energy that now fuels the American economy. Increased use of these sources will inevitably raise prices, accelerate inflation, and constrain growth. If proper attention is paid to efficiency, however, the cost of supplying basic energy services can increase much more slowy. For example, efficient cars will mean that American driving habits can be sustained even in the face of increasing gasoline prices; efficient industrial processes will allow continued growth in a way that is relatively independent of unpredictable increases in energy prices; development of low-energy buildings will mean energy prices need not be a barrier to continued growth in the construction of affordable commercial and residential buildings. Given that the nation is likely to spend more than seven trillion dollars for energy during the next twenty years, it is important to ensure that the market can fairly compare investments in energy supplies with investments in increased efficiency and select the most productive use of available capital. The nation cannot afford federal programs which artificially prejudice the choice and risk encouraging relatively inefficient investment.

The energy strategy suggested in this report has an enormous advantage in that it does not rely on any unforeseen technological development or any draconian interference with the market process. It can proceed incrementally in a way that permits constant reevaluation and redefinition, and in a way that permits flexibility to accommodate research triumphs if they should occur. Perhaps the strategy's greatest advantage, however, is that it provides protection against the surprise and uncertainty that will almost certainly dominate the nation's energy future during the next few decades.

Setting Goals and Getting There

The analysis here indicates that by the year 2000 national energy consumption could decrease in all sectors except industry, which shows a slight increase. The consumption of fuels can be reduced to a point where oil imports are eliminated by the end of the century; the consumption of electricity is reduced to a point where, on a national basis, demands through the end of the century can be met with generating equipment now operating or currently in advanced stages of construction.

Renewable resources can play a major role. Hydroelectric facilities and energy derived from wood and other plant material, which contribute approximately 6% of the nation's energy today, are expected to continue to supply the bulk of the nation's solar energy by the end of the century. The potential contribution of direct solar thermal systems attached to buildings and industry is considerable but the total contribution of such systems will be limited by the fact that increases in efficiency will reduce the total national demand for thermal energy.

The role of the federal government in achieving these goals need not be costly or oppressive. Its role can be largely limited to: ensuring that investors have adequate information to make decisions about energy investments: revising existing programs that have the effect of discouraging capital investments in efficiency while subsidizing and

providing regulatory protection for energy supply investments; ensuring that investors have adequate access to capital required for demand-reducing improvements; ensuring the maintenance of a vigorous national research and development program in areas related to energy; and, ensuring that national energy investments are consistent with national interests in environment, equity, and security. The government cannot escape responsibility for national energy policy. Its influence on the economic environment of energy investments will be enormous, whether by design or inadvertence.

Given careful management and planning, the programs outlined in the following sections of this report could allow the federal energy budget to be lower, and federal intervention in the national economy less onerous than in other energy strategies.

Buildings

One would not commonly think of an investment in building insulation as an alternative to an investment in an oil well, but the two kinds of investments can have precisely the same outcome. For example, the equivalent of about 5.4 million barrels of oil per day (MBD) can be "produced" from existing residential buildings and the residential new buildings that are likely to be built during the next two decades at an average cost that is about half of the cost of providing electricity, oil, and or gas to these buildings from new conventional sources.

New residential buildings can be built to use about a quarter of the energy required for heating and cooling by the typical new home built in the U.S. today. New commercial buildings can be built to use about a quarter of the energy per square foot for heating and cooling as the average existing commercial building. This efficiency can be achieved with better insulation, tight construction, storm windows, daylighting, and efficient furnaces and air conditioning equipment. Achieving these savings in standard practice will require well-designed programs of applied research in new buildings and an effective technique for communicating the results of these programs to the nation's building industry and building owners.

Given an aggressive retrofit program it should be possible to reduce the demand for energy used by existing buildings, still standing in the year 2000, by the equivalent of 4.5 MBD. Programs for ensuring that this potential is captured must be entered on the objective of creating profitable businesses capable of delivering technically sound building retrofits. Aiding these emerging businesses will require a national program for applied research in building retrofits which includes examining solar and energy efficiency techniques, supplemented with a program providing information, and training materials.

The energy used to provide hot water, lighting, refrigeration, and other amenities for all residential buildings standing in the year 2000 could be over 1.5 MBD lower than anticipated in conventional forecasts, given an effective program of research and labeling for appliances and comprehensive national standards. (This does not count counting the savings of 1.5 MBD resulting from efficiency improvements in heating and cooling equipment that were included in the savings in heating and cooling.) Costs would once again be much less than the costs of providing the additional energy from new sources of conventional energy.

Even with significantly reduced demand in buildings, renewable technologies could provide them with the equivalent of 2 to 2.5 MBD. Wood stoves, small wind generators, active and passive space heating, solar hot water, daylighting and photovoltaics could provide up to 30 percent of the energy requirements of all buildings by the year 2000.

Industry is already moving rapidly to improve efficiency, but there is much room for improvement in light of the relative inattention given to fuel efficiency before 1973. For example, the performance of industrial mechanical drives can be increased by 23%, the efficiency of delivering heat to industrial processes can be increased by 35% by using improved boilers and controls, and the efficiency of aluminum electrolysis can be improved by 33%.

The estimates above are all relatively conservative because they are based solely on technologies already available. It is likely that much greater savings will be achieved by developing completely new industrial processes, like such as the recently introduced float-glass process, which make more efficient use of capital, labor, and materials as well as energy. It is difficult to forecast such innovations, but they have always emerged and will certainly continue to occur now that more of the national engineering genius is being directed to problems of efficiency.

Programs designed to improve industrial efficiency should concentrate on ensuring that industries have adequate access to the capital needed to improve efficiency and that the market-place receives right price signals by ensuring that industries pay the full cost of the energy they use. This will require an adjustment in the federal tax code to encourage industrial investment. It is particularly important that funds be found to replace the obsolescent plants which now use a large fraction of the nation's industrial energy; a special "scrap and build" program to accelerate the rebuilding of American industrial plants could be funded from any "windfall profits" receipts available from energy decontrols or other sources. In addition, special attention also must be given to encouraging industrial research and to develop new approaches to efficiency. Research facilities are often the first victims of financial hard times, but industrial research is a vital national resource. Tax incentives and other programs are needed to promote industrial investments in new research and subsequent ventures based on such research.

Improved efficiency is likely to result in the equivalent of 5 MBD in industry by the year 2000: about half of these savings would result from the new programs suggested. It would also be possible to provide the equivalent of 5 MBD from national biomass resources (although only half of these resources are likely to be used directly in industry) and as much as 0.5 MBD from direct solar heat.

Transportation

Most of the energy needed for transportation in the U.S. is used in cars and trucks. The fuel economy of the average car on the road in 1978 was is about 14.3 miles per gallon. It should be possible to increase this to 60 mpg or more without major sacrifices in comfort, safety or performance. If the average car on the road in the year 2000 obtains 55 mpg, the nation would consume nearly 3 MBD less gasoline than it does today, even with significant increases in both the population and the miles driven by each person. The average cost of saving this fuel could be less than a dollar a gallon. Improved fuel efficiency can be achieved through increased emphasis on small, efficient engines and with policies for increased performance standards or taxes—for example a "gas guzzler tax" (keyed to high efficiency) and a fuel or petroleum tax. Methanol, and other alcohol fuels derived from biomass could deliver 25–45 percent of the fuel needed to operate the national transportation system by 2000. Use of these fuels can be encouraged with research on methanol production and engines that use methanol, conversion of federal fleets to use methanol, and fuel taxes. Methanol is an attractive synthetic fuel since it can also be produced from coal and natural gas.

The efficiency of national freight services has been declining recently because of a continuing shift from rail to truck freight. This decline in freight service efficiency must be stopped and reversed. Road fees which tax trucks for their full share of road construction and maintenance and a relaxation of the regulations that prevent the rail industry from raising needed revenues are an essential beginning. It should also be possible to increase the efficiency of both aircraft and trucks at least 30 percent with adequate research. Programs to improve freight service efficiency could save 1 MBD by the year 2000.

Utilities

Uncertainties about future energy demands have already greatly complicated the investment strategies of the nation's gas and electric utilities. The problem is particularly difficult for electric utilities since a decision to build a plant which will be under construction for a decade or more requires an accurate forecast of future demand. Many companies have found themselves with expensive overcapacity—the result of overestimating demands. In fact, the nation could support an increase in electric demand of 0.1–0.7 percent per year for the next 20 years even if no plants were brought on line after 1985, 80 percent of all oil and gas burning generating plants are retired and all fossil plants built before 1961 are retired. A growth rate of 0.9–1.5 percent per year could be supported if optimum use is made of the potential for cogeneration in the six major steam consuming industries. The analysis presented in this report, however, suggests that ambiguity about future electric demands is likely to increase rather than diminish. Net national demand for electricity could well grow more slowly than 1.5 percent per year even given a rapid growth in demands for electric vehicles and electrolysis-produced aluminum.

The planning dilemma presented by these circumstances has no easy resolution. The central question is whether utilities should adjust construction programs on the assumption assume that cost-effective demand-reducing investments will succeed in thereby risking possible under-investment in new capacity, or whether they should assume that such investments will not play an important role and run the risk of over-investment. The thesis explored in this study is that the best response to such a complex problem may be to confess that public regulation is unlikely to be able to anticipate an optimum solution and that some move in the direction of deregulation deserves careful attention. Three approaches are examined: (1) establishing rates that send the market proper signals about the real 'marginal cost' of supplying electricity, (2) allowing utilities to expand their investment portfolios to include some investments in energy-saving equipment on their customers' premises (with proper safeguards to prevent unfair exploitation of monopoly power), and; (3) allowing nonregulated companies greater access to markets heretofore reserved to utility monopolies. (The Public Utilities Regulatory Policy Act has already acted to deregulate many promising categories of small electric generating technologies.) Most of these activities must occur at the state level which controls utility regulation. The federal role can be limited to assistance in developing sophisticated planning tools and imaginative management of the federally regulated Federal Power Marketing Administrations.

The role of solar electric generating devices becomes very difficult to anticipate given the uncertainties just described. Solar technologies are examined in this study to determine whether they can be an economically preferred technique for displacing existing oil and gas burning capacity. The analysis indi-

cates that there will be circumstances where solar equipment will be preferred to a coal-burning plant designed for a similar function. As expected, the largest contributions from solar electric equipment are likely to come from additions to the nation's hydroelectric capacity and from wind machines. Photovoltaic equipment, some of which will be located on buildings, will also be a preferred generating source in some circumstances.

Economic Assumptions

In estimating the economic advantages of the technologies selected for inclusion in the goals, conservative estimates were made about potential increases in the price of conventional fuels. It was assumed, for example, that the price of crude oil reaches 40 dollars a barrel in the year 2000 (all costs are stated in 1978 dollars), natural gas prices reach 5 dollars per million BTU (approximately 60% higher than the present cost of Canadian and Mexican gas), and that the price of electricity follows predictions developed using techniques suggested by the Electric Power Research Institute (residential electric prices would increase from 4–5¢/kWh to 7–8¢/kWh by the end of the century).

For illustrative purposes results are also often presented in this report for the alternative assumption that the price of oil reaches 60 dollars a barrel (or under the assumption that the "social cost" of using oil is 60 dollars a barrel even if the actual market price does not reach this level.) Savings would be greater than those projected if oil prices increased in this way.

Goals for National Growth

In assessing the results of the energy strategy contained in this report, it is essential that a distinction be made between growth in artificial measures of progress, such as national consumption of materials and energy resources, and growth in the things that matter—the services such resources provide. This analysis has assumed that the fundamental objective of national policy will be to assure increases in disposable income, employment, the amenities of life, personal freedom, national security, social equity, and the quality of the natural environment. The approach suggested here is fully consistent with sustained growth in these areas; indeed, it is possible that such growth is impossible without the increased productivity that would result from the strategy proposed here.

Meeting the goals that guide the energy strategy suggested here would mean that by the year 2000 per capita income would increase by 45%; the average American would travel 30–70% more miles by car and 60–90% more miles by air; commercial floor space per citizen would increase by 35%; and freight carried by truck and rail for each person would increase by 45%. Achieving the targets for growth in GNP would require reducing unemployment to 4% by 1985 and keeping it at 4% for the remainder of the century. It would also require that the average productivity per worker increase as fast as it has for the past 25 years in spite of the fact that productivity has been growing much more slowly than the 25-year average for the past ten years. (The productivity of an industrial worker in the U.S. increased by 2.69% per year between 1953 and 1968 but only 1.25% per year from 1968 to 1978. This analysis assumes the 1953–1978 average 2.07% per year applies from 1978 through 2000.) Specific goals established for growth are listed in Table 1. It is important to notice that the rates of growth estimated in Table 1 assume that some national demands begin to slacken and are replaced with qualitatively different demands. For example, the gross weight of cement, steel, and other primary materials used in the economy is, like energy, expected to increase more slowly than other measures of economic growth; it appears that more of any increase in the nation's income will be spent on finishing materials and providing services than on the production of the raw materials themselves. This observation is based on a careful examination of national demand for materials during the past decade. (Surely no one would argue that replacing a 30 pound mechanical calculator with a 5 ounce solid-state calculator is not progress.)

Taken together the goals outlined in this study suggest possibilities for an enormous growth in national income over the next two decades. Plainly national energy consumption could be even lower than the levels discussed here if some of the goals for growth are not achieved. It is important, however, that goals set for national energy consumption not be inconsistent with an optimistic set of goals for an increase in the nation's economy. More modest goals could become self-fulfilling prophecies.

TABLE 1.—*Growth rates used in setting goals, a representative sample*

	Ratio of value in 2000 to value in 1977
1. Population	1.17
2. Gross National Product	1.80
3. Floor area of average new housing unit	1.16
4. Floor space in commercial buildings	1.59
5. Fraction of homes with central air-conditioning	1.33
6. Fraction of homes with dishwashers	1.56
7. Fraction of homes with freezers	1.39
8. Fraction of homes with swimming pools	1.59
9. Miles traveled by car (per person)	1.3–1.7
10. Miles traveled by air (per person)	1.6–1.9
11. Freight carried by truck and rail (ton miles)	1.80
12. Freight carried by air (ton miles)	4.0
13. Industrial value added	1.48
14. Tons of primary materials (cement, steel, aluminum, etc.)	1.32

It is also important to understand that the quality of personal life can be increased with the strategies proposed in this analysis in ways that cannot easily be shown in summaries like the one exhibited in Table 1. For example, many Americans now routinely set their thermostats at 60 F throughout the day and are forced to close off parts of their homes during the winter. The analysis conducted for this study assumes that all thermostats are set at 70 F and that no sacrifice is necessary to save energy in homes. In fact, homes will almost always be made more comfortable when they are made more efficient. The quality of the natural environment can be improved in direct proportion to a decrease in the consumption of fossil fuels. Mobility can be increased if efficient cars make it possible for people to keep driving instead of relying heavily on mass transit. Equity can be served by the fact that the growth in services shown in Table 1 can be used to increase the amenities available to low-income families more rapidly than to high income families. A strategy that maximizes energy use efficiently, therefore, has the effect of improving the quality of life rather than decreasing it. Far from requiring sacrifice, it provides more alternatives and more freedom.

The Potential for New Business

Encouraging the nation's industries and buildings to increase their energy productivity will create an enormous array of profitable new businesses. Most of this growth will be straightforward extensions of existing businesses. Although there will be a greater need for the manufacture of a variety of new parts and materials (glass, plastics, insulation, heat exchangers, computer controls, photovoltaic cells, and many others). There will be a greater need for skilled architects, engineers and designers familiar with the subtleties of energy efficiency. Businesses will grow around the need to install, finance, insure, maintain, and operate new energy systems as well as around opportunities to audit existing facilities and undertake retrofits.

The level of incremental investment required during the next twenty years amounts to an impressive sum. Table 2 indicates that the total volume of business in energy efficiency and solar equipment could be in the range of 750–850 billion dollars. This is clearly an enormous number, but to put it in perspective, the total national energy bill in 1980 was about $390 billion. The total investment must also be compared with the investment that would be required in the absence of the programs proposed here. One can take the case of commercial buildings for an example. Later analysis will show that the investment of $110 billion in solar and efficiency equipment in commercial buildings results in a net national savings of at least 7.5 quads of energy per year by the year 2000. If 7.5 quads of energy were generated by new power plants, the capital costs of the plants would be $114 billion (assuming $1000 per installed kilowatt). This does not count the capital needed to maintain the fuel cycle, and it does not include the costs involved in operating the facility over a number of years. The investments in efficiency, of course, have very low operating costs and of course no fuel costs. It is interesting to observe however, that the efficiency investments may actually have a lower initial cost as well.

TABLE 2.—*Incremental investments for efficiency and renewable resources**

[*Billions of dollars*]

1. Buildings:	
a. Residential	
Retrofits	180
New construction	100
Appliances	100
b. Commercial:	
Retrofits	75
New construction	45
2. Industry:	
a. Rebuilding	200+
b. Direct solar heat	5–10
3. Transportation;	
a. rebuilding the automobile industry	10–30+
b. rebuilding the railroads	50+
4. Total	755–790

*Not including investments in biomass or solar electric systems.

Whether or not the nation invests heavily in efficiency for meeting its energy needs, enormous burdens will be placed on national capital resources. In 1977 energy-related investments represented 40% of all funds invested in plant and equipment. Developing programs that will be needed to encourage rates of saving high enough to provide funds for energy investments is one of the major challenges of public policy. Programs designed to encourage savings in efficiency and onsite renewable energy systems, however, will have to respond to another interesting challenge. A successful program will result in shifting the flow of energy related monies from familiar channels (e.g., from Wall Street to a utility company) into less traditional ones (i.e., supplying funds for a retrofit company through a local savings and loan). The full implications of this pluralistic investment scheme have not been fully evaluated.

The Policy Framework

An array of specific policy recommendations will be outlined in later sections of this report. They will, however, all be designed around the following principles:

Whenever possible, the policies will be designed to remove distortions that prevent the market from making rational decisions about the value of different energy investments. At present, the energy markets are enormously distorted with large federal subsidies to energy supplies (see Table 3). It must be recognized, of course, that the subsidies listed in this table only reflect the costs which can be easily quantified. The federal government has artificially controlled energy prices in many ways not shown: for example, price regulation, federally sponsored insurance, and federal support of research in conventional energy supplies. In the absence of regulatory distortion or energy-saving investments would appear attractive without federal participation (other than information programs), if prices were allowed to follow market forces, since all of the energy savings anticipated in this analysis are justified on the basis of comparison with the cost of new supplies of energy from conventional sources; some intervention would be needed to ensure that externalities were properly accounted. One major advantage of using market forces to guide energy policy is that direct federal expenditures need not be significant—the market could be expected to find financing or justifiable expenditures. Complete deregulation of energy prices is the only sensible long-term objective. Sudden deregulation could, however, be counter-productive. Without adequate information or an adequate industrial base for retrofitting the existing economy with energy-saving equipment, a rapid increase in fuel prices could lead to inefficient investments and unnecessary panic and confusion. Well managed national programs, however, can accelerate investments which will allow a fast but graceful transition to rational energy pricing.

TABLE 3.—*Estimated Federal Government subsidies in support of the routine provision of energy supplies in 1977*

[Million 1977 dollars]

Federal activities:	
Low interest appropriations plus tax exemptions for hydroelectric and transmission facilities [1]	290
Enrichment services [2 3]	180
NRC regulatory costs [2]	146
Privately owned utilities:	
Liberalized depreciation (approximately) [1 2]	2,000
Publicly owned utilities:	
Exemption from Federal income taxes [1]	
Tennessee Valley Authority	130
State power authorities and municipal utilities	80
Rural Electrification Administration (REA)	294
Tax exempt bond subsidies [1]	260
Loans and loan guarantees provided by REA	260
Oil and gas industries:	
Percentage depletion allowance [4]	
Oil	550
Gas	1,150
Expensing of intangible exploration and development costs	
Oil	740
Gas	460
Total	6,540

[1] B. W. Cone *et al.* (An Analysis of Federal Incentives Used to Stimulate Energy Production), second revised report prepared by Dattelle Pacific Northwest laboratory, PNL–2410 Rev. II, February 1980.

[2] General Acounting Office, "Nuclear Power Costs and Subsidies," June 13, 1979.

[3] The subsidy for enrichment services is the estimated difference between what the private sector would have charged and what the government actually charged.

[4] The liberalized depreciation allowance for utilities translates into an outright tax savings (instead of just a deferral) for a utility growing sufficiently rapidly or for a utility that is not growing, as long as there is significant general inflation.

Source: Robert H. Williams, Princeton University. Testimony before the Energy Conservation and Power Subcommittee, U.S. House of Representatives, February 24, 1981.

No distinction should be made in policy between investments that reduce energy consumption at the site of energy use and investments that increase energy supplies. Supply and consumption equipment should be designed as parts of an integrated system for meeting specific end-use energy needs (i.e., transportation); it makes no engineering sense, artificially to stimulate one and ignore the other. Federal programs should be organized to provide symmetry on this issue given that environmental, safety, and other nonmarket factors are adequately taken into account. At present, this symmetry does not exist since federal subsidies to conventional energy supplies far outweigh federal support for the approaches to increase efficiency recommended in this analysis.

While market forces are quite clearly the best mechanism for allocating resources efficiently, they are plainly unable to properly measure the value of such things as environmental quality, national security, the long-term effects and risks of continued dependence on foreign imports, and equity for the poor. The federal government, therefore, has a unique responsibility in ensuring that the market takes these factors properly into account. The technique proposed most often is taxing undesirable activity so that market economics can adjust accordingly; in some instances, however, it has been necessary to suggest regulations which forces changes. A regulatory approach, of course, forces actions which impose costs on some parts of the economy, often in ways that are difficult to measure. (If taxes or regulations are to be imposed, there should be a clear case that the nation is purchasing something of genuine value.)

Programs should be designed to gather information about the success of existing programs and installations, so that mechanisms can be constructed for providing corrective actions on a systematic and regular basis. The value of information about the real performance of energy-consuming and producing equipment is too often underemphasized, for information about the performance of programs has real value in allowing the design of optimized programs, by reducing waste and enhancing effectiveness. A process of constant policy reevaluation and redefinition is necessary for progress.

Programs should be designed to encourage greater competition for energy services. If equipment located in a house or industry can save energy or generate energy from solar equipment more cheaply than a utility can supply energy for equivalent purposes, the basis for utility monopolies can be called into question; in fact existing monopoly regulation may discourage efficient investments. Moreover as much as 10–15 quads/year of natural gas can be saved using the strategies proposed, thereby putting natural gas utilities in a position to compete with electric utilities for many years. The competition will become more intense if efficient cogeneration equipment can be designed for a variety of applications in buildings and industry. The policies examined in this study would allow utilities greater entry into markets for energy equipment on a customer's premises (taking care to ensure that they do not abuse their existing monopoly position) while allowing nonregulated firms greater access to markets to which they had previously been barred by regulation.

In examining the range of projects discussed here, it is important to notice that many, possibly most, of the programs have more to do with people than with things. While continued support of federal and industrial research is plainly important, most of the goals in this study can be accomplished with a direct extrapolation of the characteristics of technologies already in the market. The strategy contained here centers on making information about these technologies available to the people and institutions that could benefit from them and ensuring that they have access to capital supplies adequate to make the proper investments. Despite uncertainties about crucial aspects of the future, the analysis in this report produces significant data on which policy can be dictated. There will always be disagreements about specifics, but a careful review shows that the basis of the goals developed here is very resilient to changes in details.

The new prosperity

Frederick Jackson Turner remarked that the disappearance of the "American Frontier" at the end of the nineteenth century had a profound effect on the national economy as well as on the nation's spirit; there seemed to be nowhere to expand, nowhere to grow. In retrospect, however, it is apparent that reaching the boundary of a geographic frontier launched the American industrial enterprise and an unprecedented century of growth. As the end of this century approaches, the nation appears to have reached the edge of another frontier and the limit of another resource. This time the limit is in materials, particularly domestic sources of oil and gas. The pivotal objective of this work is to show that the limits imposed by these new constraints need not be a barrier to growth in the things which are of real value; rather they can provide a unique opportunity to rebuild the nation's economy on a more productive and sustainable base. Fortunately, there is adequate warning—the change must be rapid but it can be deliberate.

The remainder of this study will argue that imaginative use of technologies available for improving the productivity of materials in short supply, and increasing national use of renewable resources is the cheapest, fastest, and safest strategy for ensuring a sustainable basis for national prosperity through the next century. Part of the process, however, requires overcoming preconceptions about the nature of growth. It makes no more sense to equate an increase in national wealth with a growth in energy consumption at the end of the twentieth century than it did to equate prosperity with continued increase in agricultural lands at the end of the nineteenth century.

POTENTIAL RENEWABLES CONTRIBUTION BY SECTOR

[Primary equivalent in quads]

Sector	Solar thermal	Biomass [1]	Wind	Photovoltaics	Hydro	Total
Buildings	1.9–2.3	1.0	0.8–1.1	0.4–0.7		4.1– 5.1
Residential	(1.6–1.9)	(1.0)	(.8–1.1)	(.3–.45)		(3.7– 4.45)
Commercial	(.3–.4)			(.1–.25)		(.4– .65)

EXHIBIT 2

CONGRESSIONAL RESEARCH SERVICE,
THE LIBRARY OF CONGRESS,
Washington, D.C., March 12, 1981.

To: Honorable PAUL TSONGAS.
From: Salvatore Lazzari, Analyst in Taxation and Fiscal Policy, Economics Division.
Subject: Residential Energy Tax Credits.
Attention: Sam Baldwin.

This memorandum is provided in response to your request for information on the distribution of various statistics relating to the residential energy tax credit, by income class of U.S. taxpayers. Specifically, your office is interested in the distribution pattern of the number of returns, total expenditures and the amount of tax credit, for returns claiming a residential energy credit under the Energy Tax Act of 1978 (P.L. 96–618) as amended by the Crude Oil Windfall Profits Tax (P.L. 96–223). These data are illustrated in Tables I–VI.[1]

The purpose of this research is to explain the extent to which lower income people are benefiting, relative to middle and upper income groups, by the broad system of energy tax credits for residential energy conservation.

DISTRIBUTION OF THE NUMBER OF RETURNS

Tables I and II present data, for 1978 and 1979 respectively, on the number of returns which reported residential energy expenditures, i.e., expenditures on certain types of energy property which qualified for the tax credit. Column (2) illustrates the number of returns distributed by adjusted gross income.[2] Column (3) shows the number of returns in a particular income class as a percent of the total number of returns which reported residential energy expenditures. Column (4) presents the percentage figures of column (3) cumulatively as income increases.

Three interesting observations may be noted concerning the data in columns (2)–(4) of Tables I and II. The first is in regard to the general pattern of the relationship between income and number of returns claiming a residential energy tax credit. The second observation pertains to the concentration of the number of returns. Finally, the third observation concerns the changing distribution from 1978 to 1979.

The general pattern exhibited by the data in these two columns is that the number of taxpayers reporting residential energy expenditures, (hence, the number claiming a residential energy tax credit) increases in direct relationship to income; as the level of a taxpayer's income increases, the more predisposed was that taxpayer to buy energy property qualifying for energy tax credits. For taxpayers with incomes up to $25,000, there is in Table I virtually a continuous increase in the number of taxpayers claiming a tax credit. For 1978, this pattern peaks at income levels between $20,000–$25,000; it stabilizes up to incomes of $50,000; then it rapidly declines for taxpayers with income above $100,000. In 1979, (Table II) there is an uninterrupted increase up to $50,000 of adjusted gross income.

The second salient feature of these data is the concentration of taxpayers in the "above average" income brackets. Of the 5.9 million taxpayers claiming a residential energy tax credit in 1978, roughly 1.3 million or 22 percent had incomes between $20,000 and $25,000. Further, approximately 3.4 million taxpayers had incomes between $20,000 and $50,000. This group filed 57 percent of all tax returns in which a residential energy credit is claimed. In 1979, the concentration of returns was still in the upper income brackets. Of the 4.9 million returns, roughly 1.2 million or 25 percent were concentrated in the $30,000–$50,000 income class. Taxpayers whose incomes were between $20,000 and $50,000 represented 59 percent of all the tax returns reporting residential energy conservation expenditures in 1979.

A third characteristic evolves from an intertemporal comparison of the distributions in Tables I and II. Between 1978 and 1979 the distribution of returns appears to have changed; relatively more returns are concentrated in the lowest three and upper seven income groups and less in the income classes in between. Figure I shows this comparison. Note the increase from 20.5 percent to 25.3 percent, corresponding to the $30,000–$50,000 income class. Also note the increase from 57 percent to 59 percent for the group between $20,000 and $50,000. This intertemporal change in the distribution of returns in which a residential energy expenditure is reported suggests that of those who claimed energy credits, the propensity of "richer" persons to participate in the energy tax credit program had increased over the two year period.[3]

Perhaps a better understanding of the general pattern and concentration of the number of residential energy tax returns may be obtained if these data were compared with the distribution of all individual income tax returns. After all, if the distribution of returns claiming energy tax credit is patterned as it is reflected in columns (2)–(4) only because the distribu-

[1] The data used in this research are preliminary in that they are based upon a fraction of the sample returns included in final IRS Statistics of Income.

[2] Adjusted gross income is an income concept used by the Internal Revenue Service in reporting data from individual tax returns. It is defined as gross income from all sources subject to tax less certain adjustments. Adjustments to gross income generally encompass costs incurred in earning that income but also include some deductions which have not been permitted to be itemized. (In 1978, there were about 15 such adjustments)

[3] A number of factors may explain both the nature of the distribution in any one year and the changes over time. These are not explored.

tion of all taxpayers is so patterned, then there would be nothing anomolous about it. For 1978 and 1979, the distribution of the total number of returns appears in column (5) of Tables I and II respectively. Columns (6) and (7) show the percent and cumulative percent distribution respectively.

It is immediately clear from inspecting columns (5)–(7) that total taxpayer returns are concentrated at the lower section of the income spectrum. This is in sharp contrast to the pattern of the distribution of taxpayers reporting a residential energy tax expenditure. In fact, a close scrutiny reveals considerable differences. One out of every 10 taxpayers had income below $2,000; while 1 out of every 500 taxpayers who claimed an energy tax credit, had less than $2,000 in income. Of the nearly 90 million individual income tax returns filed in 1978, 60 percent reported income below $14,000, while only 16 percent of the taxpayers claiming a tax credit had income below $16,000.

Perhaps the best way to compare distribution patterns is to calculate the proportion of taxpayers in each income bracket which claimed a residential energy tax credit relative to all taxpayers in that bracket. These data are shown in column (8). The results in column (8) of Tables I and II clearly illustrate that, in general, the percentage of taxpayers claiming a tax credit increased in direct relationship with income. This percentage declines beyond the $50,000 income bracket in 1978 and beyond the $100,000 bracket in 1979 but it is still considerably higher than for the lowest income groups. Specifically, in the very lowest income groups only 13 in 10,000 taxpayers reported a credit in 1978. In the $14,000–$20,000 income brackets 1 in 10 taxpayers claimed an energy tax credit; while in the $30,000–$50,000 range virtually 2 out of 10 taxpayers claimed a credit. Finally, 78 out of 1,000 "millionaires" claimed a residential energy tax credit compared to only 1 in 1,000 for taxpayers below 2,000 in income.

A comparison of column (8) of tables I and II illustrates the changes in the proportion of all taxpayers reporting residential energy expenditures. One change appears noteworthy. A small fraction of taxpayers in almost every income class participated in the energy tax credit program in 1979. For example, in 1978 18.6 percent of all the taxpayers with incomes between $30,000 and $50,000 reported expenditures compared to only 14.3 in 1979. This reflects the fact that fewer returns reported energy expenditures in 1979 than in 1978. (1978 returns reflected participation by taxpayers making expenditures after April 1, in 1977.)

DISTRIBUTION OF TOTAL EXPENDITURES ON QUALIFYING RESIDENTIAL ENERGY CONSERVATION PROPERTY

Tables III and IV present the distribution by income class of the aggregate amount of expenditures for property (equipment and devices) which is permitted a residential tax credit.[4] Additionally, column (5) illustrates the distribution of the average expenditure, i.e., expenditure per return. Table III presents the 1978 data; Table IV presents 1979 data.

As expected, the distribution of total energy saving expenditures for residences follows the pattern of the distribution of the number of returns. Since there are a relatively larger number of returns in the upper income groups, there tends to be a commensurately larger number of expenditures in this group. However, there is another factor which tends to increase the concentration of expenditures in the upper income groups; the typical higher income taxpayer tends to spend more for energy savings devices than other taxpayers. This is true for both years and is shown in column (5) of Tables III and IV.

DISTRIBUTION OF THE AMOUNT OF TAX CREDIT

The final two tables, Tables V and VI illustrate the amount of tax credit claimed (column (2)), and the amount actually received (column (5)), for various income categories. These tables illustrate quite clearly that most of the residential energy tax credits are being claimed and received by higher income groups. Moreover, in 1979 the distribution appears to be more concentrated in these groups. For example, in 1978 taxpayers with income below $20,000 received 33 percent of the credits (column (7)) compared to 30 percent in 1979. A dramatic change in the distribution has occurred in the $20,000–$50,000 income classes. In 1978 22 percent of the credits were received by taxpayers in the $20,000–$25,000 income class, compared with only 16 percent in 1979. This decrease was offset by an increase from 23 percent to 28 percent in the tax benefit to taxpayers with incomes between $30,000–$50,000. The patterns in these data are the direct consequence of the results in Tables I–IV which show that a relative larger number of higher income taxpayers tend to: 1) report residential energy expenditure; and 2) to spend more on average. It follows quite directly that the amount of tax credits claimed would also be concentrated in the upper income groups.

Tables V and VI also illustrate that the amount of tax benefit actually received is even more concentrated in higher income groups.[5] This may be seen by comparing columns (2)–(4) with columns (5)–(7) in each table. Columns (2)–(4) show the extent to which lower income groups claimed credits. For example, taxpayers with incomes below $6,000 claimed $9.8 million in credits in 1978 and $13.3 million in 1979. This represented 1.7 percent and 2.7 percent of all credits in 1978 and 1979 respectively. However, this group received only $5.2 million or 53 percent of the credits they claimed in 1978. Both the amount and proportion declined dramatically in 1979 to $3.8 million or 29 percent of tax credits actually claimed.

[4] Under current law, there are several types of property or products which qualify for a tax credit. These include such items as insulation, storm windows and doors, caulking, a furnace replacement burner, a device for modifying flue openings, an electrical or mechanical ignition system which replaces a gas pilot light, an automatic energy saving thermostat, a meter which displays the cost of energy usage on items which have been qualified by the Secretary of Treasury through regulations to meet certain efficiency standards.

[5] The amount claimed and the amount received may differ as a consequence of a clause which makes the residential energy tax credit non-refundable, i.e., it can only be used to the extent of a taxpayer's tax liability.

TABLE I.—DISTRIBUTION OF TAX RETURNS REPORTING RESIDENTIAL ENERGY EXPENDITURES: PRELIMINARY 1978 DATA

Mr. HART addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. HART. I yield to the Senator from Ohio.

Mr. GLENN. I thank the distinguished Senator.

Madam President, I rise in support of this amendment to the second concurrent resolution on the budget for fiscal year 1981. As stated, the purpose of this amendment is to provide greater program balance and equity than the funding level established by the Budget Committee.

Let me first state, Madam President, that this amendment will not remedy what I see to be the greatest defect of the administration's revised budget for energy—namely, the large cuts in energy research and development. If I could have had my way on this matter, I would prefer that the funding be tilted more heavily toward energy research and development activities. However, I do recognize the need to achieve a balanced budget as quickly as possible, as well as provide for more equity and for a better balance between near-term and far-term energy efforts. It is, then, in the spirit of comity and compromise that I lend my support to this measure.

Madam President, I have been appalled by the wholesale cutting of our energy programs, and, in particular, our programs in energy research and development. This process begins with the fiscal year 1981 budget, and is exacerbated considerably in the fiscal year 1982 budget.

I ask unanimous consent to insert eight tables for the RECORD. These tables show the impact of the administration's revised budget request for fiscal years 1981 and 1982 on programs in the budget functional areas of energy supply research and development, energy conservation, and fossil energy. The figures quoted in the table are those provided by the administration on March 10, so there will not be a 1-to-1 correspondence between these numbers and those prepared by the Congressional Budget Office. However, I believe these tables will help to illustrate a number of points.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

ENERGY SUPPLY RESEARCH AND DEVELOPMENT, FISCAL YEAR 1981

[In millions of dollars]

	Jan. 15 submission	Revised request	Difference	Percent change
Program:				
Solar	576	507	−69	−12.0
Geothermal	156	142	−14	−9.0

Mr. GLENN. Mr. President, first, I would note that energy supply research and development programs are cut by about 0.1 percent in fiscal year 1981 and over 12 percent in fiscal year 1982, while energy conservation is reduced by nearly 32 percent in fiscal year 1981 and almost 79 percent in fiscal year 1982. Fossil energy is cut by 26 percent in fiscal year 1981 and 72 percent in fiscal year 1982. This compares with the overall cut for these three budget functional areas which amounted to over 12 percent in fiscal year 1981 and 43 percent in fiscal year 1982. This clearly demonstrates the lack of equity. Furthermore, the energy conservation functional area, which can provide us with the greatest amount of supply in the form of energy savings in the near term, is reduced by the largest percentage—nearly 32 percent in fiscal year 1981 and almost 79 percent in fiscal year 1982. This clearly illustrates the lack of balance in the cuts between the near-term and long-term efforts.

Madam President, what distresses me the most about the revised budgets for fiscal years 1981 and 1982 is that funding for energy research and development—and here I am excluding the conservation grant and fossil commercialization programs—is reduced by about $177 million, or nearly 10 percent in fiscal year 1981 and by $742 million, or more than 36 percent in fiscal year 1982 from the levels in the January 15 budget submission. I believe that, rather than taking this step backward, we should be moving forward to provide more support in this vital area.

Why, one might ask, should the Government provide for more energy R. & D. when the mood of the Nation would seem to dictate that we reduce the Federal presence? Why should energy R. & D., or R. & D. in general, be exempted? The simple answer is that private markets do not produce an adequate level of R. & D. One of the main reasons for this is the nonappropriability of benefits of basic scientific knowledge. Much energy R. & D. cannot be protected adequately by patents. Consequently, any one researcher is not able to gain exclusive use of beneficial knowledge he or she may develop and is not able to charge a price to those who wish to use this knowledge. In addition, energy R. & D. produces net benefits to the Nation as a whole, but private markets do not require free riders to adequately compensate those who perform the R. & D. for the benefits received. Therefore, without Government participation and support, too little R. & D. will take place.

One of the energy R. & D. areas I believe has been seriously underfunded is energy storage. Energy storage technologies act as bridges or buffers between energy supply systems and energy demand systems. Economic energy storage would have a nearly incalculable impact on our long-term energy supply picture by allowing us to substitute coal and nuclear energy for oil and natural gas. We could also take advantage of renewable and inexhaustible energy sources such as solar, wind, and tidal energy by spreading the supply of these intermittent sources over a 24-hour period.

Utilities could use their facilities much more efficiently and halt the current practice of building baseload electrical capacity to meet rising peak demand—an extravagant and inappropriate use of our scarce financial and technological resources, and a major contributor to the upward spiral of electricity rates. The administration has turned its back on this promising R. & D. area, however, by slashing the fiscal year 1981 budget for

energy storage by $20 million, or nearly 28 percent, and in fiscal year 1982 by $21 million, or 35 percent.

Unfortunately, this assault on energy storage R. & D. is not an isolated case. We see this process repeated in many other promising areas of energy R. & D. For example, solar R. & D. is being cut by 12 percent in fiscal year 1981 and by 67 percent in fiscal year 1982. Energy conservation R. & D. is being cut by nearly 30 percent in fiscal year 1981 and almost 74 percent in fiscal year 1982, and coal R. & D. by nearly 28 percent in fiscal year 1981 and over 72 percent in fiscal year 1982.

Madam President, one of the most eloquent passages on the benefits of R. & D. has been provided by George Gilder on page 224 of his best seller entitled "Wealth and Poverty":

WEALTH AND POVERTY

R. & D. benefits not only the company pursuing it but also competitive firms, and indeed the entire economy, since most discoveries can be initiated and lead to other inventions and applications. Roger Brinner of Data Resources reports that the total private and social rate of return on investment in R. & D. is, according to different assumptions, between 17 and 25 percent. Most productivity studies attribute at least half of all U.S. productivity growth to technological advance. Between 1950 and 1974 high-technology companies grew about twice as fast as the rest of the economy, while showing a rate of price increase only one-sixth as great. The correlation between rapid growth of earnings and low growth of prices is so high as to be a virtual law of economics.

The combination of research and enterprise is the supreme source of productivity and wealth. Without this catalyst, stable prices will mean poverty and decline. With it, rising prices will be a manageable problem. A prime measure in any serious effort to retard inflation must be a drive radically to expand our now declining levels of prime investment in this seminal area. Heavy investment credits and other subsidies for R. & D. merely compensate for the necessary market failure to measure broad social returns.

I might note as an aside, Madam President, that the Director of the Office of Management and Budget, David Stockman, has been quoted as saying that Mr. Gilder's work is "promethean in its intellectual power and insight." I hope that Mr. Stockman will reread page 224 before he agrees to further indiscriminate slashing of R. & D. funding.

Madam President, I would like to add that when we had Mr. Frank DeGeorge, acting Assistant Secretary for Conservation and Renewable Energy, before the Senate Appropriations Committee on March 11 of this year, he presented some budget figures as part of his testimony to the committee that I find absolutely startling.

In fiscal year 1982, for example, we originally were going to have a budget that put a total of about $777 million into solar and renewable energy research and development which will give us future independence from our current reliance on oil and gas. It was cut by the administration's proposal in the amount of about $484 million, or 62 percent, at a time when we are sending nearly $100 billion a year abroad to the OPEC nations, and yet we say we cannot afford to do more R. & D. in solar energy, geothermal energy, hydropower, electrical energy systems, and the most important one, to my way of thinking, energy storage R. & D. that is needed to help make this country energy independent in the future.

If I had one energy wish that I could have granted before noon today, it might surprise you what it would be. It would not be that I find an oil well in my back yard. It would be that we would have better electrical energy storage in this country. We cannot pick up a science magazine these days without reading about new energy sources such as windmills and photovoltaic cells, and so forth. Why are we not using these? Because the wind does not always blow and the Sun is not shining when I want to turn my TV set on at night.

Our problem is that we cannot store all that tremendous amount of electrical energy for later use. Massive electrical energy storage is what we need in this particular case.

We also need compact electrical energy storage, such as advanced batteries, that would let us have the world's first practical electrical automobile. We need concentrated electrical energy storage that would give us not only the 200-mile warm-weather range we probably need, but also the 100-mile cold-weather range that we need when the batteries are operating at only about half capacity.

Some private concerns are doing development in that area, but not nearly enough. I tried for 3 years to get the Carter administration to increase their budget in that particular area, and I managed to get it increased by a small amount. Now we find it decimated once again. In fiscal year 1982, energy storage is being reduced from a total of only $59 million to $39 million—a cut of $20 million.

We are going in the wrong direction. We are maintaining our dependency on oil and gas at a time when we should be doing the R. & D. to get away from that dependency.

Two Japanese firms I know of, from talking to staff people of the Japanese Minister of International Trade and Industry, are making it a top priority to develop electric automobiles.

I would say to this body that if we let the Japanese or Germans beat us to the world's first practical electric automobile—an electric automobile that could supply the market for that 92 percent of the noncommercial driving done within 20 miles of our homes—then we will not only be debating bailout funds for Chrysler or other domestic automakers in this body, we will be debating funding to make Detroit some great national park on a scenic river. That is what we could be coming to.

Yet we are cutting the very funds that are elemental and fundamental toward doing the research that would let us have better electrical energy storage.

Some progress has been made along these lines. I would say the NASA Lewis Lab at Cleveland has done a remarkable thing on a few hundred thousand dollars; not even $1 million. On a few hundred thousand dollars they have developed a system called "Redox" that has tremendous potential for storing large amounts of electrical energy. I might note that they did some of the work on Redox with students from Cleveland State University, since they were so strapped for funds.

The Redox system is basically a battery whose anode and cathode consist of fluids separated by a membrane. You can store electrical energy in these fluids and get 70 to 75 percent of the stored energy back out again. That is a very, very important development, and I want to see that go ahead.

So, Madam President, I think it is atrocious that we are cutting back on energy R. & D. This proposal by the distinguished Senator from Colorado that I support fully does not go far enough to my way of thinking. I would like to see more funding applied to energy R. & D., in particular.

I just hope that the Energy Committee can take this into consideration, because what we are spending on energy R. & D. is a pittance compared to what we need in this area.

If we ever hope in the future to get energy independence or at least lessened dependence on oil and gas, it is going to come not because we sat around wringing our hands into the future with our grandchildren, hoping for the best, but because we started right now doing the energy R. & D. that can give us that potential for the future. Unless we do that, we are going to still be having problems generations from now.

I would like to conclude my remarks by stating that I fully recognize the need for budgetary restraint in these inflationary times. But let us not be penny-wise and pound-foolish by trying to achieve fiscal frugality by mortgaging our future. There are indeed many areas where it is necessary and desirable to reduce Federal involvement and presence. But R. & D. in general, and energy R. & D. in particular, is one area where even greater Government involvement and support is clearly justified. In today's world, America's military and economic strength largely depend on the strength of our efforts in R. &. D. Failure to meet this challenge is the surest and fastest way to forfeit our claim to world leadership. It is just that simple.

I thank the distinguished Senator for yielding. I yield the floor.

Mr. HOLLINGS. Madam President, so I will not take the time from the amendment itself. I yield myself a few minutes on the resolution.

The amendment of the distinguished Senator from Colorado is a very important initiative. We are in a nebulous juxtaposition as the Budget Committee. We do not line itemize and there is no intent here to line itemize.

Furthermore, we do not have an authorizing bill from the Energy Committee and we have not had an authorizing bill in energy in the past couple of years.

And yet, to take the administration's

figures on their face value leaves a tremendous vacuum with respect to solar, conservation, fossil fuels, the matter of alcohol fuels, and the other products that we started into when we changed around with the windfall profit tax last year and enacted the Energy Security Act.

Some of these are arguable on payouts. I know that the majority of those supporting the Hart initiative would put less into nuclear. I could understand that from a certain standpoint.

The question is, of course, if you are going to put more in breeder reactors, then why put it into an archaic, antique, outdated system at Clinch River?

If we go forward and complete the Clinch River breeder, I am told on reliable and expert information that it would be some 20, if not 30, years behind the French and the Russian breeder program. At best, if we are going on that particular basis, we ought to, on the one hand, import a French Phoenix, or otherwise start now with the most advanced and competitive type breeder so that it would be ahead of even the French upon completion.

The administration's support of nuclear energy has been called by the distinguished Senator from Colorado as a CETA program for nuclear engineers. And he has not been much off target on that particular score.

I, of course, have an immediate concern with respect to reprocessing. While they are putting in more money for nuclear, the very basic need for reprocessing in order to support the breeder technology is not cared for in the administration's budget. We will have time to get into the merits of the reprocessing issue and how various administrations over the past 15 years not only prompted and encouraged reprocessing but induced it by almost giving the landsite and everything else. As for the reprocessing facility at Barnwell, S.C., now that we are ready to go and to complete it as a complement to the Clinch River breeder reactor, we have no funds requested by the President. They are saying in one breath that we ought to go breeder but not reprocessing. It is a rather nebulous position to be in.

In addition, there is no money whatsoever in the Reagan budget for disposal of nuclear waste. And this is the real fundamental or important problem associated with the development of nuclear energy.

So what the distinguished Senator from Colorado has done is put everyone on notice that we have not, on the one hand, line itemized, but we have not, as robots, come in and said "whoopie" for the administration's energy program.

On the contrary, that will be debated out in the first concurrent resolution and be debated out more specifically within the Energy, the Appropriations, and Agriculture Committees themselves.

So I would hope our colleagues would look seriously at this. While it changes only a minimal amount around, it opens a question for the Congress with respect to energy itself and whether or not we are really going to follow through with the fine initiatives on conservation, gasohol, solar, fossil, and more particular a balanced approach to nuclear energy, which I support.

Quite frankly Mr. President, I do support the breeder, but not Clinch River. If they add an amendment to reduce support for this project, I do not mind knocking it out, I can tell you that here and now. That is a very controversial, at best, subject. I take it that the Senator from Colorado has wisely left that out of the debate. I do not mean to inject it here and form divisiveness and lose votes for the Senator's proposal. But I cannot just sit here and act like that is a good proposition, on the one hand, and yet say that breeder technology is bad in and of itself, on the other.

I believe in reprocessing. I believe in the nuclear approach. Forty percent of the energy in my particular State comes from nuclear and that helps South Carolina be very competitive industrially. If we are going to go to reindustralization, if we are going to compete with the West Germans, the Japanese, we must support nuclear energy. Even the Saudis are going for nuclear and everything else despite their abundance of oil because they see the sense in this particular approach.

So I commend the Senator from Colorado in keeping this subject fluid so that we can use judicious judgment when it comes before us and the members in the Energy Committee when they debate this issue in an authorizing bill. I support very strongly this amendment.

Mr. HART addressed the Chair.

The PRESIDING OFFICER (Mr. SYMMS). The Senator from Colorado.

Mr. HART. Mr. President, I thank the Senator from South Carolina for his support and his eloquent statement.

We have 4 minutes remaining in support of the amendment. I wonder if the Senator would yield 5 minutes to the Senator from Massachusetts.

Mr. HOLLINGS. Mr. President, I yield 5 minutes to the Senator from Massachusetts off the resolution itself.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, as we confront the budget today we should never forget that concealed among the cold numbers are political statements that say as much about our views as any speech.

Smaller energy budgets are forcing Washington to face the bigger questions. The most important of these is—what is the purpose of Federal energy spending?

Over the past 10 years, a broad national consensus has emerged that we must increase energy security by reducing the amount of oil the United States imports from abroad. This agreement on policy was forged through three administrations—two Republican and one Democratic—and has been the cornerstone of our national energy policy.

The Reagan administration has explicitly rejected reduction of oil imports as a goal of Federal energy spending. Instead, the Reagan administration argues that Federal energy spending should focus on "long-term research and development activities * * *"

This chart behind me indicates the difference between the Carter administration recommendations and the Reagan administration recommendations.

Let me direct my colleagues' attention to the chart I have behind me because it illustrates graphically what I believe is wrong with the priorities in the President's energy budget:

Cuts in spending for fiscal year 1981–fiscal year 1982.

Solar and conservation—cut 75 percent.

Nuclear—increased 30 percent.

Programs that can cut oil imports in the near future—cut 75 percent.

Programs that will have no impact on oil imports—increased by 30 percent.

This chart indicates that in 1985, if we did not have that 74-percent cut in conservation and solar programs the best projection, according to the Department of Energy is that 103 million barrels would have been saved. With nuclear funding increased by 30 percent in 1985, the best estimate is that 4 million barrels will be saved. If it is assumed that the Clinch River breeder reactor is built and displaces imported oil.

This is precisely what is wrong with the President's budget. It completely eliminates oil import reduction as a goal of Federal spending.

I would like to point out to my colleagues that the approach this administration is following directly contradicts the conclusions of the research and development panel of DOE's prestigious energy research advisory board, which concluded that conservation funding should be increased "several fold." Yet the administration is cutting it by 75 percent.

This expert group recommended reducing spending for breeder reactors, but the administration increased breeder reactor funding by 44 percent and nuclear funding by 30 percent.

This energy budget is ignoring the energy security needs of our Nation and the advice of the top energy experts in the Nation.

The administration's energy spending programs are not only misdirected, they are anachronistic.

The fusion and the breeder reactor programs are hand-me-downs from the 1960's that have acquired independent bureaucratic and industrial constituencies. When they were first conceived, the United States could pump all the oil we needed and utility companies were planning massive electrical construction programs. Today, the energy situation is exactly the opposite—we are importing $30-per-barrel oil and electricity demand is hardly growing.

It is ironic—and telling—that the Reagan administration is seeking to dismantle the social programs of the 1960's while at the same time spending unprecedented amounts on the energy programs of the 1960's. The irony is that the social problems that spawned the social programs are still with us. But the energy conditions that spawned their favored energy programs—low oil prices and a growing demand for electricity—are long gone.

Today these expensive nuclear electric projects have become classic white elephants:

The payoff, if any, is far off and unpredictable:

These projects call for massive Federal spending to find alternatives to coal.

It is hard to understand why the Federal Government, in an era of drastically tightened budgets, should be spending billions of dollars over the next decade to try to create a substitute for coal—our most abundant domestic energy resource.

When he was a Congressman, OMB Director Stockman urged his colleagues to turn away from Federal subsidies for nuclear power. These payments from the Treasury to private industry, Stockman said, were the antithesis of the free market. He described one key nuclear project—the Clinch River breeder reactor—as a "test" of Republican principles. The new Reagan budget is committed to spending $1.6 billion on this project over the next 5 years.

An energy policy that slashes funds for the programs that save the most energy while lavishing billions on nuclear white elephants squanders Federal energy resources. It also raises questions about the fairness of these Reagan budget cuts. Should job training programs for the poor be abolished while CETA programs for nuclear engineers are expanded?

Energy security today is the essence of national security. And energy security is a matter of using our resources to the best advantage to reduce imports. It makes no sense to spend billions to subsidize redundant nuclear power research while we spend billions more to import OPEC oil.

It seems to me that this amendment would not move us in the complete direction that I would favor, but it is a very substantial redirection of the Federal spending in the energy area and puts the resources in the area where we can back off the most imported oil, I also think it puts the resources in the areas of research which holds the greatest promise for our country in the short, medium, and long term. I would hope the Senate will accept the amendment.

The PRESIDING OFFICER. The Senator from South Carolina.

Who yields time?

Mr. HOLLINGS. I yield time on the resolution to the Senator from Washington.

Mr. DOMENICI. I also yield time to the Senator in opposition.

Mr. JACKSON. Mr. President, I understand the intention of this amendment would be to change the instructions to the Senate Energy Committee regarding the required reductions in budget obligations and budget authority. Although the changes would be in the total amounts for the committee and would, therefore, not specifically increase or reduce any particular program amount, I also understand that the sponsors of the amendment do relate these new totals to a particular breakdown among energy subfunctions.

When the Energy Committee in its report to the Budget Committee endorsed the administration's total request for the energy function, the Energy Committee observed that it did not endorse the administration's detailed program breakdown and that it would address the matter in subsequent legislative action. The Energy Committee will arrive at program amounts in its action on the reconciliation bill and on the Department of Energy authorization bill for fiscal year 1982.

Similarly, the Energy Committee is not bound by the breakdown assumed by the Budget Committee in developing the instructions set forth in the resolution now before the Senate.

Mr. President, I believe that the apportionment of available funds among programs should be reserved to the committees of jurisdiction and arrived at in an orderly manner and with adequate consideration.

Therefore, I cannot support this amendment. I do not believe that the changes in the resolution's total which are being proposed are significant or meaningful in any policy sense, and I certainly cannot agree that the Senate, by adopting the amendment to the totals, would either formally or informally preempt the Energy Committee in its future consideration.

Mr. HART. Mr. President, I yield myself 2 minutes from the resolution to respond to the Senator from Washington.

I am afraid the Senator from Washington may be confused about the effect of this amendment because its practical effect is, in fact, to do just the opposite of what the Senator says.

This amendment would provide the Energy Committee greater flexibility rather than less flexibility in the administration of outlays and expenditures for energy programs. The entire purpose of this amendment and its wide range of sponsors is to expand the authority and recognize the jurisdiction of the Committee on Energy to keep alive a wide variety of energy options which Congress, in a bipartisan fashion, under three administrations, has adopted over the past number of years.

Based upon what the Senator from Washington says in his capacity as ranking member of the Committee on Energy, I am afraid he may be misinformed as to the practical outcome of this amendment and its effect. It would be just the opposite of what the Senator from Washington fears in his statement.

Mr. JACKSON. Will the Senator yield?

Mr. HART. Yes, I yield.

Mr. JACKSON. Mr. President, there is no need for this amendment if we want to leave to the committee the current authority that it has as this matter is now being presented to the Senate. We went through this in the committee when the recommendations were made on the budget. There is no need for this amendment. There are no restrictions in terms of what we can do in the committee, but, as I interpret the amendment, we would be restricted. It is a matter of judgment.

Mr. HART. Mr. President, I yield myself 1 more minute on the resolution.

The budget proposals of the administration, as adopted by the Budget Committee, severely restrict or terminate a wide range of energy conservation, fossil fuel, alternative energy supply programs that, as I have indicated, have been adopted by Congress in the past. The fact of the matter is that if the Budget Committee's proposal is adopted and this amendment is rejected, those programs will be severely restricted or terminated and the energy options of this country will be severely restricted.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. Mr. President, I regret having to oppose this amendment but, basically, the effort here is correctly stated by the distinguished Senator from Washington (Mr. JACKSON). This amendment is basically saying that they are putting back budget authority—in fact, my arithmetic would indicate $650 million in budget authority—for the years 1981, 1982, and 1983. It is obvious from the statement that the reason they are putting back the budget authority is that they intend the Energy Committee to retain two or three programs that the Energy Committee might not want to continue and that, as far as the administration's policy is concerned, they have indicated they are not going to retain.

Their sheet indicates they are going to retain $1 billion in budget authority for the solar energy and energy conservation bank; $1.2 billion in budget authority to provide loan guarantees under the various alcohol fuel programs. That budget authority is spread out between the Agriculture and the Energy Committees.

In essence, Mr. President, when you look at all that, you want to understand that, while budget authority does not have any immediate impact, if you put that much budget authority in, you are basically changing the whole policy. You are providing enormous budget authority in the outyears that is going to naturally flow from this decision. In fact, we have estimated that the outyear budget authority that is going to be required for this kind of policy is well over $1 billion—$1.2 billion.

Once you put that in there, there is no assurance what that is going to be used for. It is additional budget authority. But then, when you read the sense of the amendment, the proponents are saying—

If they are going to cut 15 percent, for instance, in renewables, the sense of this amendment is that they have to cut 15 percent in the other programs they have—be it nuclear, be it research in coal saying, "We don't trust the Energy Committee. If they are going to cut, we want them to cut the way we think they ought to cut."

In other words, for the first time, if this amendment passes, we shall really be saying to the Committee on Energy, "You have to cut programs on a percentage basis because we do not trust the way you are going to cut them and we are afraid that you are not going to leave in enough of the programs we like."

I think that is it in a nutshell, Mr. President. I really urge that we not do this, regardless of whether we support the programs or not. It seems to me that to say to an Energy Committee that has been highly responsive, that has distinguished Senators with tremendous experience and expertise, "We have found a way in this reconciliation approach to make sure that if you cut, you do not

cut the programs that we like, or if you do, you have to cut the other programs in equal amount."

I think that is basically the thrust of this amendment, whether it is 10 percent or 15 percent. My estimate is that we are really saying 15 percent. You are saying, "If you are going to cut 15 percent, you have to make sure that you only cut 15 out of the programs we like and take it out of programs that we do not like."

Mr. President, I urge that the Senators vote against this as a matter of budgetary policy with reference to an authorizing committee of the U.S. Senate; we ought not do this.

If we do not like the administration's program on the solar bank, the conservation bank, and those kinds of things, the authorizing committee ought to cut something else. But this amendment tries to tie their hands and say, "Do not cut mine any more than you cut any others," and asks the U.S. Senate, by switching some budget authority numbers around, to be part of that instruction or mandate to the committee.

I say, Mr. President, that they have latitude. Yes, that committee is being squeezed, in particular, because of the SPRO decision—there is no question about that. But I think we have trusted that committee implicitly before, and we should continue to do so.

This is not going to be the end of the world. They are going to have to do some adjusting. But I think we ought to let them do it. We ought not to do it through the back door this way. I really think that is the full intent of this amendment, regardless of what they say about budget authority. The proponents of this amendment suggest that the budget authority will not spend out and we have really just plugged it in because it is a loan guarantee program and there are not any outlays. The intent is rather obvious: To balance the numbers so that you tie their hands in terms of cutting the programs an equal amount to make room for the programs that the proponents of the amendment think are far more important than what they think the Energy Committee might prefer.

Mr. President, I yield as much time to the chairman of the committee as he desires.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. Mr. President, I rise in opposition to the amendment. The amendment, as I understand it, proposes to add budget authority of $2 billion in fiscal year 1981 mostly and over $700 million in outlays in fiscal year 1982 and outyears, in the energy function. It is argued to have the effect of shifting funds between subfunctions within the energy function in the form of a series of changes in assumptions.

Here is where I run into a great deal of difficulty, Mr. President, accepting the argument that, somehow, while the assumptions that the Budget Committee has made, which are not binding, are wrong, now we shall bind the committee by a series of assumptions based on the amendment. They cannot have it both ways.

The changes in assumptions appear to attempt a symbolic restoration of cuts in the solar, energy conservation, and fossil energy programs at the expense of other programs.

The Energy Committee, on March 19, voted 19 to 1 for the McClure motion for the committee's March 15 report to the Budget Committee. The motion adopted the Reagan aggregate budget numbers in the energy and natural resources functions. Importantly, the motion affirmatively reserved the prerogative of the committee to make future programmatic decisions on areas in its jurisdiction for both the energy function and the natural resource function. I would note for the record that several of the cosponsors of this amendment voted for my motion in committee.

Mr. President, the Senate, based on votes yesterday, thus far has rejected any restoration of funds for the $3 billion cut for SPRO, including my amendment. Consequently, the Energy Committee must face even more difficult and hard decisions on program options. I also note that several of the cosponsors of this amendment, indeed the majority of the cosponsors, opposed the SPRO amendments. So it is quite clear that the Energy Committee deserves the prerogative to consider options for the remaining funds for the energy and natural resources functions. That is also true for the Agriculture Committee and the Appropriations Committee.

I note that the ranking minority member of the committee, my good friend from Washington (Mr. JACKSON), joins me in this view, as he has already stated on the floor.

I note for the record that I also am chairman of the Interior Appropriations Subcommittee. That subcommittee has jurisdiction over SPRO and other Department of Energy programs in the fossil, energy conservation, and energy regulation areas within the energy function, as well as the Department of the Interior programs in the natural resource function. The Reagan budget, in fact, makes significant reductions in each of those energy and natural resource program areas. Just as for the Energy Committee, however, my Appropriation Subcommittee should have complete latitude under this reconciliation resolution to fashion the final program adjustments. At this early stage of the process, the Senate should not attempt to dictate that result.

We should be responsible enough here to allow the appropriations process within the reconciliation to proceed without the prejudgment proposed in the amendment. The amendment increases the totals for the Appropriations Committee, the Agriculture Committee, and Energy and Natural Resources Committee jurisdictions and that is all it does. The amendment is purported to assume that we will restore $1 billion for the yet-to-be established solar energy and energy conservation bank and almost $1 billion for the alcohol fuels subsidy program. The Senate, three times in the past 24 hours, has rejected any—any—restoration of funds for the strategic petroleum reserve, our highest priority energy program, even with full offsets. How can we adopt an amendment premised on these assumptions?

I want this body to know that this Senator was, in fact, a principal sponsor of the alcohol fuels program in the Energy Security Act—in committee, on the floor, and in the conference, I fought for that title of the act. This Senator also was a principal sponsor of the original amendment in the Appropriations Committee to fund the solar energy and energy conservation bank.

I also helped create and fund for the past 8 years the geothermal program supported by these amendments. And I fought to create and fund several of these conservation programs—including overriding the veto of a President from my own party. And I have fought for years, as well as the last 4 days here, for the strategic petroleum reserve. So, I know these programs and I have fought for these programs in the past. This is not and should not be the issue here today. The Senate today should refuse to effectively line item the energy function by prejudging the mix of options to be chosen in function 270.

The Senate Energy and Natural Resources Committee supported functional totals proposed by President Reagan. The committee fully intends to act within the President's functional limits when reporting authorizing legislation. I can also confirm that the Interior Appropriations Subcommittee will attempt to do the same thing. Consequently, I urge the Senate today to reject this amendment and preserve our full latitude and prerogative to fashion the appropriate and necessary programs to accomplish that objective.

I know it has been argued—and can well be argued—that if we reject the subfunctional assumptions, as I think we should, the amendment simply adds to the total and therefore gives the committee greater latitude. On that point, I would agree. The amendment would give us more latitude, more elbowroom, to do a greater variety of different alternative things at higher levels of funding.

That question must be decided not on the basis of what the Energy Committee shall do but on what the Energy Committee may do within the constrictions of a budgetary exercise which is designed to try to reduce the threat and burdens of inflation, economic recession, and unemployment that have been attendant to high levels of Federal expenditures in the past.

Mr. HART. Mr. President, I will yield to the Senator from Arkansas and the two Senators from Montana, but first I yield myself 2 minutes on the resolution.

First of all, I have just heard the Senator from Idaho argue both sides of

the case. On the one hand he says that this amendment would restrict the Energy Committee. Yet, he ends his argument by saying that this amendment, in fact, would increase the latitude of the Energy Committee. I am not quite sure which of those is his argument.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. HART. Second, Mr. President, to complete my thought, there is absolutely no basis in fact for the Senator to argue that this is going to increase outlays by $700 million. There is absolutely no basis for that argument.

The amendment, as it clearly states, and as the Senator well knows, is going to hold spending at the same level the President provides.

Mr. President, to counter the argument made by the Budget Committee chairman and the Senator from Idaho, I ask unanimous consent to have printed in the RECORD pages 18 and 19 of the committee's report and pages 82 and 83 of the committee's report, to illustrate the fact that the Budget Committee's resolution and the arguments made by the two Senators rest on assumptions that would lead to the termination of a variety of energy programs and restrict the authority of the Energy Committee to keep those programs alive.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

RECONCILIATION SUMMARY

[In millions of dollars]

Proposals considered by the committee	FY 1981 BA	FY 1981 O	FY 1982 BA	FY 1982 O	FY 1983 BA	FY 1983 O
President:						
1. Export-Import Bank	−752	−41	−118		−230	
2. National Science Foundation	−82	−35	−31		−11	
3. DOE alcohol fuels	−740	−12	−6		−1

COMMITTEE ON ENERGY AND NATURAL RESOURCES

The Committee recommends that the Committee on Energy and Natural Resources be instructed to change authorizations so as to require reductions in appropriations to achieve savings of $2,071 million in budget authority and $106 million in outlays in 1981; $3,714 million in budget authority and $3,404 million in outlays in FY 1982; and $3,660 million in budget authority and $3,628 million in outlays in FY 1983.

In arriving at this recommendation, the Committee's working assumptions were the levels recommended by the President except for the reduction of payments in lieu of taxes, and except that the Committee assumed that additional savings beyond those proposed by the President could be achieved by implementation of an alternative financing mechanism for the strategic petroleum reserve.

The following is a listing of the proposals the Committee considered in arriving at its recommendation:

REDUCTIONS IN DIRECT SPENDING

[In millions of dollars]

Proposals considered by the committee	FY 1981 BA	FY 1981 O	FY 1982 BA	FY 1982 O	FY 1983 BA	FY 1983 O
President:						
None

Total, reductions in authorizations	−2,071	−106	−6,666	−4,391	−4,651	−5,069

Mr. HART. Mr. President, I yield no more than 10 minutes on the resolution to the Senator from Arkansas.

Mr. BUMPERS. Mr. President, I am on the Energy Committee, and this amendment does not restrict the Energy Committee in any way. It simply says that the Senate feels that the priorities should be slightly different from those recommended by the President.

I point out, first, that Mr. Stockman, who is Director of OMB, stated that overall budget reductions are necessary to restore the economy and that the specific cuts recommended by the President are not particularly significant, and the amendment is consistent with that position.

The Secretary of Energy testified before our committee—that his budget is designed to remove the Department of Energy from commercialization activities in order to concentrate on "long-term, high-risk" technologies.

This statement is contradicted by the budget itself, because it still provides $250 million for the Clinch River breeder reactor project, which Mr. Stockman has described as a commercialization activity. The Secretary of Energy has acknowledged that the French have advanced well beyond this technology. Yet, we are going to start spending $250 million on what certainly will be a $2 billion expenditure. An accomplished technology is neither long term nor high risk. It is simple foolishness, prompted by blind nationalistic bravado, to spend an additional $2 billion in the next decade to develop a technology which has already been developed.

It is also inconsistent to declare that the Government should not be involved in commercialization activities when it is involved in identifying appropriate methods to dispose of commercial wastes. The Government clearly has a duty to protect present and future generations of Americans from the ill effects of commercial wastes. Still, their safe storage and disposal must be regarded as the primary duty of the enterprises which profited from their use. It is plainly a cost of doing business, and they should bear it.

This inconsistency is cruel, because these programs are to be funded when other deserving program are not. For example, the low-income weatherization program is to be transferred to the community development block grant program, but no weatherization money is transferred, and the overall CDBG program is to be cut by 25 percent, to reflect alleged efficiencies in administration.

Whatever money which might be made available for weatherization would not reach the rural areas in States like mine where it is most necessary, because the CDBG program is oriented to urban areas and has no way of reaching rural areas. In Arkansas, for example, only 35 of the 75 counties now have a mechanism for delivering CDBG funds. What will the other counties do? They will do without. There is no money and no mechanism.

Since there are many States which are more rural than Arkansas, it is obvious that an orphaned weatherization program would not be able to weatherize the rural homes which need it most.

Similarly, the low-income fuel assistance will be merged with a block grant program without additional funding to compensate for rising fuel prices caused by decontrol of domestic oil prices. Thus, this administration has raised fuel bills by decontrolling oil prices and now it proposes to emasculate the programs which are necessary to alleviate the suffering caused by that action.

This proposed energy budget further compounds this punishment by proposing to eliminate the solar bank. Mr. Stockman and the Secretary of Energy both have attempted to justify that proposal by saying that people will rely on the solar and conservation tax credits, so the bank is supposedly unnecessary. Nothing could better illustrate the hypocrisy of these energy budget changes, because our experience clearly shows that people of median and below median incomes are simply unable to avail themselves of the tax credits. For example, in 1979, taxpayers with an adjusted gross income of less than $12,000 filed only 11 percent of all the tax returns on which residential energy expenditures were reported, even though they filed over 50 percent of all returns filed.

Also these people claimed an average expenditure for energy weatherization of $657, but people with adjusted gross incomes of over $50,000 claimed an average expenditure of $1,010, which is 54 percent greater.

Of the people with adjusted gross incomes of less than $4,000 who claimed residential energy expenditures in 1979, none of them could actually use them, because their tax liability was so low, so none of them could even qualify for a tax credit. In sum, only a small proportion of low-income taxpayers were able to use the energy tax credits and even those few credits which were claimed were substantially less than those claimed by high-income taxpayers. The solar bank would cure this deficiency by providing median and low-income taxpayers the same benefits already enjoyed by high-income taxpayers. Therefore, failing to fund the bank will discriminate against people with below median incomes, in the cruelest way possible. With one hand, the administration has increased fuel bills, and, with the other, it has reduced or eliminated the programs necessary to soften the impact of the increase upon the poor. At the same time, it has preserved the tax credits which disproportionately subsidize the wealthy. We have been told that the budget cuts are equitable, and I will accept equitable cuts, but where is the equity in this? Where is the justice?

Mr. President, we have embarked upon a new effort, driven by the people's will to reduce overall Government spending. We must be governed by that will, but we are also charged to work carefully and responsibly toward a fair and equitable result. Clearly, the proposed energy budget is neither fair nor equitable. It is part of an unjust and inequitable proposal that will victimize the young, who will not have food, the students, who will not have learning, the aged, who will not have rest, and the poor, who will not have food, shelter, or dignity.

We are all familiar with the children's story about two charlatans who flattered an emperor into buying a nonexistent suit of clothes. The court followers did not dare reveal the fraud, so the emperor paraded about in his insubstantial finery until a young boy spoke up.

This budget would give the same suit of clothes to the poor, the aged, and the young. The weatherization function, without any funding, will disappear into a block grant program which has no mechanism to deliver the nonexistent money to rural areas. The fuel assistance program will disappear into a block grant program with reduced funding, even though it is patently obvious that decontrolled oil prices will require increased funding. The solar bank, which was designed to help people at or below the median income level, will disappear into tax credits designed to help those who are well above the median income level and need it the least.

The emperor had no clothes, and this budget has no justification.

The Budget Committee has stated that it has taken an "unprecedented action," yet, by my count, it held only two hearings after receiving the President's budget submission. The other committees have held relatively few hearings, and this body is already preparing to act, a bare 3 weeks after getting the budget.

Our actions are not wrought by deliberation, but hammered out in blind frenzy. We are lopping off hopes and dreams faster than heads rolled from the guillotine during the French Revolution.

I hope that this amendment will not be voted on as some of the other amendments with the rather callous disregard for what we are doing.

The Senator from Idaho is the chairman of the Energy Committee, and I must say he is a very fair and fine chairman. He knows that his committee will debate these items. During the debate, I may find myself agreeing with the President on some matters, for example, on some of the research projects. Certainly I agree with him that we should not be spending money on commercialization activities, and yet we are doing it.

I am inclined to agree with the President on the synthetic fuels program, and I think the oil industry is the one that should be developing it. That will be debated later. I am not even saying, for example, that we should necessarily reduce every research and development project by 18 percent, but I think we should look at them fairly. We should take a look at this chart in the back of this room so everyone can understand where we are headed.

Photovoltaic electricity, which was costing about $25 a watt for capital cost construction when I came to the Senate 6 years ago, is now costing about $2.60 a watt, comparable to almost $1 a watt cost to build a coal-fired generator plant.

We talk about solar contributing 10 or 20 percent of the total energy supplies by the year 2000 and deliver panaceas.

These cuts are not a stroke of brilliance, but a short-sighted shell game.

In the short time we have allotted ourselves, the only solution to this shell game is to cut all energy programs by the same 18 percent. Thus, we will avoid the inequity of cutting solar programs by 70 percent, cutting conservation programs by 70 percent, cutting fossil programs by 70 percent, and increasing nuclear programs by 53 percent. That allows the Energy Committee greater leeway to readjust energy priorities carefully, rather than resort to draconian measures. In this way we can avoid giving the American people the emperor's clothes.

The PRESIDING OFFICER. The 10 minutes yielded to the Senator from Arkansas have now expired.

Mr. HART. Mr. President, I thank the Senator from Arkansas for his statement.

I yield 5 minutes to the distinguished senior Senator from Montana who has done so much to move this country in the direction of energy independence.

Mr. MELCHER. Mr. President, I thank my friend from Colorado for yielding to me and thank him for his fine comments. This amendment is meritorious and should be adopted.

Mr. President, we have a lot of work to do in the energy policy for this country. I believe that all of us here on this side of the aisle in the Senate and the House of Representatives also, everyone in the country, regardless of political party, wants to help President Reagan and help this administration to be successful. I say that with all sincerity and with a certain note of desperateness because it is a little bit desperate how we are going to help this economy.

We cannot possibly control inflation unless we have a better energy policy for this country. After all, of all the inflationary factors there are that one can devise or conceive, I think the most significant one in the United States and perhaps throughout the world, the most significant pressure or single factor causing our devastating rate of inflation is the rapidly rising cost in energy.

So if we are going to have a good economy, if we are going to get on top of inflation, if the President's economic policies are going to be successful, we are going to have to have a much better energy policy for this country, and it must be now. It cannot be later. The improved energy policy has to be near term.

We can all have differing opinions about whether it is wise, whether it is the best wisdom to decontrol oil prices as rapidly as President Reagan has suggested and is doing.

For my part, it is OK with me. I think we might get some more oil out of old oilfields, from secondary and tertiary recovery, because we have a more rapid increase in price of crude from oil decontrol. So that part is all right with me. And it is all right with me, also, that the President says he is going to try to cut redtape so we can drill more oil wells both on land and offshore. I want to see that done as long as we can do it in a wise and environmentally sensible way, and I believe we can. So that part of the President's energy policy is OK with me also.

But we cannot get an oilfield, we cannot develop a major field short of 4, 6, or 10 years. That is not real near term.

What else has the President's program in store for us?

The program and administration budget goes to nuclear. If we go to heavy emphasis on nuclear, and I do not know when we get a breeder reactor but it is certainly not near term. There is not any new nuclear plants that can be constructed that we can call near term unless we call 10 or 12 years near term.

So I very much wish to help the President to formulate a better energy policy than what we have in this country now.

I think some of the steps the President is taking in his recommendation so far does not lead us to that better energy policy that is near term. The administration energy program is not adequate at all in the near term and the budget cuts eliminate that part from U.S. policy. I am talking about whether or not we want loan guarantees for alcohol so we can make gasohol. I am talking about whether we should have loan guarantees for geothermal. I am anxious to use more water and solar power. We should proceed with dedication and direction and affirmative action on low-head hydro and modifying some of the high-head hydrofacilities (dams) that we have that have additional generating capacity waiting just to be installed.

I am talking about those things as being near-term energy resources. I am talking about some of the coal programs such as the magnetohydrodynamics (MHD) technology which is more near term than some of the nuclear programs.

Yet these programs are being cut and eliminated. This amendment could correct these deficiencies. Whether or not this amendment carries, we must devise a policy in this country that develops more near-term energy resources than what has been recommended in the President's budget and part of that responsibility is up to the Energy Committee and of course it is the responsibility of every Senator here.

Let us all admit that this is an area where the President and his advisers need our help and need our experience. Let us be positive about it. If this amendment carries—it would solve some of my concerns, but if it does not carry—let us not allow this matter to drop. I know the chairman of the Senate Energy Committee is as desirous and as dedicated as I am—I know the chairman of the Budget Committee, who serves on the Senate Energy Committee, is as desirous and as dedicated as I am—to try to move quickly into a good near-term energy policy for this country.

This, above all, is where the President needs our help, needs our advice, needs our recommendation, and needs some of the experience we can contribute.

I thank the distinguished Senator from Colorado for yielding to me at this point.

Mr. HART. I thank the Senator from Montana.

I yield 5 minutes on the resolution to the distinguished Senator from Montana (Mr. BAUCUS).

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. I thank the Chair. I also thank the Senator from Colorado.

Mr. President, I strongly support this amendment. Indeed I am one of the Senators who initially proposed this idea to both the Democratic Caucus and now to the full Senate.

This amendment seeks to bring the Reagan administration's energy budget into line with President Reagan's budget rhetoric.

It is necessary because the President's rhetoric about the need for even sacrifices throughout the budget, shared by all, has been totally at odds with what is actually contained within the budget he has sent to Congress.

President Reagan has called repeatedly for evenhanded, across-the-board budget cuts. I strongly support President Reagan on this idea, and I am confident the American people support him on this idea as well.

But every Member of the Senate knows that the budget President Reagan has sent to Congress is neither evenhanded nor across the board. It seems that the broad majority of the American people, a majority in Congress, in fact, most everyone, supports the President on the idea of major evenhanded budget cuts. The only person he seems not to have convinced is David Stockman, his Director of the Office of Management and Budget.

Let us look at how Presidential rhetoric concerning across-the-board cuts contrasts with the reality of the President's budget.

President Reagan has exempted three-fourths of the budget from scrutiny; he has called for dramatic increases in spending in many areas; he has refused to look at tax expenditures; and he has created a definite "enemies list" of programs he wants to destroy.

This is not what he is presenting to the American people, but it is what his budget contains.

Let me highlight the Reagan "enemies list" in the energy budget.

FOSSIL RESEARCH, SOLAR, CONSERVATION, HYDROPOWER, ALCOHOL FUELS TARGETED BY REAGAN BUDGET

President Reagan proposes we cut current fossil fuel research and development funding by 27 percent this year and by 61 percent next year.

President Reagan proposes we cut solar funding by 16 percent this year and 66 percent next year.

President Reagan proposes we cut conservation funding by 36 percent this year and by 77 percent next year.

President Reagan proposes that we cut small hydropower spending by 100 percent this year, by 100 percent next year and that we cut another $2.7 million committed in previous years' budgets.

President Reagan proposes we cut alcohol fuels funding by 100 percent this year, by 96 percent next year and that we cut $886 million in funding committed during previous years.

NUCLEAR INCREASED WHILE MHD AND ALTERNATIVES TERMINATED

Lest you think this is somehow even-handed cutting—where everybody shares the burden of budget austerity fully—let me point out that President Reagan proposes no major decrease in nuclear funding, no minor decrease in nuclear funding: He proposes a 4-percent increase in nuclear funding this year and a 21-percent increase next year.

Within these functional totals, President Reagan has proposed totally scrapping a number of our most important conservation and alternative energy efforts, including home weatherization, the solar and conservation banks, alcohol fuels loan guarantees and consumer product conservation efforts to name just a few.

President Reagan has proposed to totally scrap the highly successful magnetohydrodynamics (MHD) coal research project, and by doing so he is willing to throw away $418 million we have already invested in a program that the General Accounting Office has described as a promising technology. We from the West who are being asked to burn our coal for energy must question the cutting of programs so near success that give us the hope of producing electricity from coal much more efficiently and much more cleanly.

Meanwhile, President Reagan has proposed a $254 million increase in the Clinch River nuclear breeder reactor effort, a budget cutting exercise.

Secretary Edwards recently told the Senate Energy Committee that the Reagan administration is not in an energy policy exercise, that it is in a budget cutting exercise. Rubbish.

I do not call a $254 million increase in the Clinch River nuclear breeder reactor program, or a $339 million increase proposed for next year's overall nuclear effort, a budget cutting exercise.

Quite simply, under the guise of budget austerity, the Reagan administration is attempting to quietly divert huge resources from coal research, solar, conservation, and gasohol into nuclear development.

President Reagan's Energy Secretary says that this must happen in order that the United States may regain its world leadership role in nuclear development.

I ask why the United States cannot lead the world in the much more cost-effective area of energy conservation? Why can we not lead the world in solar development, in gasohol development, in coal utilization technology? Indeed, why can we not attempt to catch up to the Soviets who have given a steady commitment to MHD and other coal research?

This amendment ought to be entitled the "Reagan Public Energy Budget Amendment to the Reagan Congressional Budget." It simply would ask for equal sacrifices in our energy programs, the kind of equal sacrifices requested by the President in speech after speech.

I might add that by exempting tax expenditures from review, President Reagan has targeted what remaining Federal support there is for some areas, such as conservation, in the least effective way possible. For example, tax credits for insulating homes go to those who itemize tax deductions. These higher income people already live in more energy secure houses than do the low-income people whose home weatherization moneys would be cut from the energy budget.

When President Reagan proposes to terminate spending for low-income weatherization within the energy budget, he is, in fact, targeting any remaining conservation spending through tax expenditures to those who need the help the least and where the energy savings would be lowest.

Today, I call on all Senators, regardless of party affiliation, to support President Reagan and oppose OMB Director Stockman on this amendment—to vote for equal sacrifices in all energy programs as opposed to drastic targeted sacrifices aimed at some of our most important programs. I will remind my colleagues that a vote against this amendment is a vote against conservation, against gasohol, against solar energy, and against better use of fossil fuels; further, a vote against our amendment is not a vote against higher energy spending. The totals are roughly the same. We ask simply for even cuts in all the programs instead of the drastic targeted cuts proposed in the Reagan energy enemies list.

ALCOHOL FUELS

Mr. President, I had originally intended to conclude my remarks on this amendment here, but I would like to call special attention to one especially damaging area of energy cuts—one that I and a number of my colleagues feel deeply about—alcohol fuels. The Reagan administration and the budget we now seek to amend would terminate the alcohol fuels loan guarantee programs administered by the Departments of Agriculture and Energy.

I share the disappointment expressed by many of my colleagues over the past few days that the Federal Government's commitment to alternative energy is being drastically scaled back. I believe that we have finally reached the point where alcohol fuel can have a substantial impact on our domestic energy supply problem. However, with the elimination of the loan guarantee program we are setting back alcohol fuels development by several years.

With the passage of the Energy Security Act, Congress gave a clear signal to farmers and consumers that we would support the development of an alcohol fuels industry. The Federal Government now adds confusion and apprehension to alcohol fuel proponents' plans for development. Many people from my home State of Montana—and across the country—have spent time, energy and substantial personal sums of money on plans for gasohol production. These efforts were based on the understanding that Federal support—through loan guarantees—would be available to facilitate negotiations with private lenders. I simply do not feel that such an irratic approach is sound energy or business policy.

Mr. President, I am committed to cutting the Federal budget and reducing taxes to get our economy moving again. I believe, however, that the cuts should be spread more equitably among Federal programs—not accomplished through eliminating important programs entirely. An investment in alcohol fuels would give a major boost to the revitalization of our economy by providing jobs and through expanding our tax base.

I would point out that just as in many other areas of the Reagan administration's budget, the termination of alcohol fuels programs is a cut targeted at rural areas. Alcohol fuel plants offer a market-efficient way for farmers to provide fuel for farm equipment and rural communities.

The Reagan administration has proposed terminating alcohol fuels loan guarantees, devastating the Rural Electric Administration programs, and seriously diverting major farm and rural-intensive efforts into other less cost-beneficial programs. If we are going to be evenhanded in our cuts. I ask that the small communities, the small business, the rural areas and rural industries not be asked to sacrifice totally while other areas, giant businesses and giant multinational oil and nuclear industries are given huge benefits and tax breaks.

I ask that a summary of alcohol fuel budget imports, prepared by the Montana Department of Agriculture, be entered into the RECORD at this point in my remarks. The summary describes the effects a termination of the Federal alcohol fuels loan guarantee program would have on the State of Montana and the many proposed alcohol fuels projects in the State.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

MONTANA DEPARTMENT OF AGRICULTURE FOOD & FUELS PROGRAM

Re Termination of Federal alcohol fuels biomass loan program.

The Federal Alcohol Fuels Biomass Loan Programs have been very frustrating to work with. The U.S. Congress appropriated $1.25 billion to the Departments of Energy and Agriculture (through Farmers Home Administration) to develop fuel alcohol from biomass to lessen the United States dependence on imported (OPEC) oil.

This was a section of the Energy Security Act of 1980, which required several months of drafting of rules and regulations before being implemented.

Many Montana citizens applied for funding under this program as well as the regular "business and industry" loan program of FmHA, but as of today not even one loan has been completed for a Montana project, and with President Reagan's proposed retroactive, current and future budget cuts none will be.

Montana's Department of Agriculture and the DNRC have committed $618,000.00 to establish an alcohol industry in Montana. But with federal bureaucratic inaction and now the withdrawal of all federal loan programs it will be almost impossible to establish a major commercial alcohol industry in Montana. Some small commercial and farm plants will be built, but it will take years for these to have an impact on our over-all energy supply.

Enclosed is a list of proposals which the Montana Departments of Agriculture, and Natural Resources and Conservation considered (including some which received partial funding) and other proposals of which we are aware. All possibly would be built if federal funding is available, and some prob-

ably already would have been, if FmHA bureaucrats had acted more expeditiously.

The total cost of these plants would be $66,545,020.00. Federal loan guarantees requested were $49,676,000.00. Local and other non-federal sources would finance $15,920,422.00 of the cost of these plants. The plants would produce 32,094,000 gallons of ethanol utilizing 16,891,578 bushels of Montana barley.

New business venture capital is extremely limited in Montana. Without federally supported guarantees and direct loans, outside capital will not come into the state. The only remaining means of developing the necessary capital will be to sell stock to the public, where financial resources are also limited and where extensive periods of time would be involved. Montana people might purchase such stock, but their own available funds for investment are limited. The plants, therefore, will have to start small and probably underfinanced and it will be exceedingly expensive and time-consuming to achieve levels of alternate fuel production sufficient to have an impact on the total energy supply which is needed immediately.

The Reagan administration proposals to eliminate the financial incentives for the fuel alcohol production in the Crude Oil Windfall Profit Tax of 1980 and the Energy Security Act of 1980 will effectively kill what might have been an industry uniquely suited to Montana's resources and abilities.

Additionally, many Montanans who have invested thousands of dollars of their own on a "good faith" basis because of the federal government's legal promise of such incentives will lose their entire investments. And, the State of Montana, also will lose several hundreds of thousands of dollars already spent in an effort to encourage those Montanans to create such an industry in the state.

The Montana Department of Agriculture, Food and Fuels Program is a grant/loan program. Within the contract with the grantee is a provision providing for repayment of the grant if the business becomes a viable entity. Because of President Reagan's withdrawal of federal loan guarantees $178,000.00 of $186,000.00 of our grants will be written off as a complete loss.

NEED FOR A BALANCED ENERGY POLICY

Mr. BAUCUS. I wish to conclude, Mr. President, by saying that I am not on the Energy Committee nor am I on the Budget Committee.

But I am an American citizen; I am a Member of this body, and I do spend some time trying to figure out where our country should be going, what our energy posture should be, and what role we should play in the world.

The inescapable fact is that we have an energy crisis. We all talk about it and I think we all agree that we do face very, very difficult problems. We are still buying about 5 million barrels of oil a day from overseas. Unless we move more quickly than we have in the last few years to try to cut off that outflow of money, that hemorrhage, we will soon face even more perilous potential problems than we do today.

I am sponsoring this amendment with the Senator from Colorado because, in my view, the present administration is making a mistake by relying too much on one or two panaceas for solving our energy crisis. Neither its hopes for new energy from decontrol of oil and natural gas, nor its determination to spend disproportionate amounts on big Government efforts to develop the nuclear industry will cure all our energy problems.

We have to have a lot more balance. We have decontrolled the price of crude oil in order to enable prices to rise and make other forms of energy more price-competitive. We have helped and will continue to help the nuclear industry to some degree because it, too, offers the potential for significant energy benefits.

But I also think we have to spend as much effort as we possibly can on almost every other potential form of energy development until we find out which ones work and which ones do not work. I include solar energy; I include conservation; I include hydro; I include all the wide variety, wide panoply, of potential energy sources, which we have in the past begun to develop but which this administration would very, very severely cut back.

Earlier I mentioned the MHD program because MHD offers such a potential for utilizing the vast reserves of coal in my State more efficiently and more cleanly.

I mentioned the alcohol fuels program because it offers such a potential for liquid fuel throughout the country and in rural areas in particular. The General Accounting Office says alcohol fuels could provide at least 10 percent of our Nation's auto fuel supply by the year 2000.

Conservation may be the most cost-effective energy source we have.

If, as Senator GLENN stated earlier, we pursue and find good ways to store electricity—and I agree with his assessment of the importance of this research—whole areas of power generation will become even more cost effective than they are today. Wind power, utilizing existing technology, may soon be an important contributor in Montana. With better electrical storage it could do even more.

So I appeal to the Senate to restore some balance to our efforts in solving our energy crisis.

I believe if we continue down the road of helping the major oil companies and the nuclear industry at the expense of everyone else, we are going to regret the day when we lost an opportunity to restore some balance and commonsense to our energy efforts.

So, Mr. President, I strongly urge the Members of the Senate to vote for this amendment, to vote for a balance that I think is necessary and proper.

Mr. HART. Mr. President, I thank the Senator from Montana for his remarks.

I yield myself the remaining time on the amendment. How much time is that?

The PRESIDING OFFICER. There are 4 minutes remaining.

Mr. HART. Mr. President, the Senator from South Carolina hit the nail on the head in his remarks when he said the budget process should not be a process by which we make policy in this country or by which we establish specific line item concepts or decisions.

It is, in fact, the proposal of the administration, as articulated by a majority of those on the Budget Committee, and propounded here by the Senator from Idaho and the Senator from New Mexico today, that represents a dramatic change in energy policy.

Under the last three or four administrations and in several Congresses, it

has been the policy of this country to pursue a wide variety of energy alternatives. It has been the policy of this Government, of both political parties in several Congresses, to involve this country in what could be called supply-side investment, investment in a wide range of energy alternatives to stimulate use of the technology of those alternatives in order to decrease dramatically our dependence on foreign oil and to increase our economic and national security.

The amendment before the Senate today does not appreciably increase Federal spending or outlays. It does keep the options open for the authorizing and appropriation committees to maintain those wide varieties of programs supported on both sides of the aisle and both political parties.

It leaves the choices with the appropriate committees. It takes those choices and that dramatic change of policy out of the hands of the budget process, and it increases this country's economic and national security. It does increase our investment on the supply side of energy, and it will lead to a stronger nation. I hope the majority of Senators on both sides of the aisle will support this amendment, which reflects the policy this Government and this country has pursued for the last 7 or 8 years.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. I yield 2 minutes to the Senator from Idaho.

Mr. McCLURE. I thank the Senator for yielding.

I understand what a number of people have been saying about the desirability of a broader mix of programs, and that is precisely the responsibility of our committee to try to determine how we will allocate the money available to us in the budget resolution.

Certainly the adoption of the pending amendment, increasing the amount of money that would be available to the committee, would be helpful. And I want to note on the record that I made an error in my original statement on the arithmetical calculation of the effect of the amendment when I stated that it had a $700 million effect on outlays. The correct figure is $100 million in outlays. I thank the Senator for pointing it out. There is an increase in the $2 billion in budget authority, however. That figure remains correct.

Certainly, to the extent that I have the responsibility as chairman of the Committee on Energy and Natural Resources, any addition of money that is available to us makes it easier for us to make the programmatic decisions. We do not have the same difficulty if the figure is enlarged.

It is not my intention to debate at this time the central issues about the relative merits of various programs because the time to do that will occur later as we go through the process of authorizing specific programs and appropriating money for specific programs, and I am sure we will join in that debate.

For instance, I agree with my friend, the ranking minority member on the Budget Committee, the distinguished Senator from South Carolina, in saying that we do need reprocessing. I think we need a breeder reactor program. I am firmly in support of a strong nuclear program. We must increase the efficiency as well as the focus of the Nuclear Regulatory Commission because we will by the end of this summer have 11,000 megawatts of generating capacity in conventional nuclear ready to go online in this country, but which is being held up because of licensing problems. We must find a way of getting that done as 11,000 megawatts of nuclear power translates into roughly 5 percent of the oil imports into this country.

So we do have a variety of different things that need to be done. But this amendment is not the right way, at this time, in my judgment, to get it done.

Mr. FORD. Mr. President, I support the amendment offered by the distinguished Senator from Colorado (Mr. HART) and others. As we all know, the February 18 economic recovery message managed to escape using the word "energy." It quite correctly emphasized the need for a "safety net" for the poor, the ill, the handicapped, but omitted the greatest single threat to any "safety net," our energy problems.

Mr. President, this Nation stands in dire need of a "national energy safety net" and I for one do not find it either in the administration program or in the budget resolution before us. The proposed amendment would be a step in that direction.

The amendment would permit the Congress to allocate resources to programs that work toward establishing an "energy safety net," immediate in some instances, more long range in others. The amendment would permit us to have a balance in our Nation's energy program.

Mr. President, to attack the inflation problem, we must first of all attack the energy problem; to attack the balance-of-payments problem, we must first of all attack the energy problem; to attack the national defense problem, we must first of all attack the energy problem.

Fossil fuel energy imports have been a greater factor in inflation than Federal budget deficits. Over the last 8 years, the rise in the dollar cost of fossil imports has been at least seven times as great as the rise in Federal deficits.

The cost of energy imports has been $225 billion over the last 4 years—nearly $100 billion in 1980 alone. Sixty percent of last month's rise in inflation was due to increases in the direct costs of energy. This has a great effect throughout the economy.

Energy costs are the essence of our balance-of-payments problem. In recent years, only in 1972, have the nonenergy export-import balances been negative.

Mr. President, this energy situation must be redressed and we cannot do it by faith alone. We need a broad alternative of energy programs—ranging from conservation to synthetics, including nuclear and the direct use of coal. But you cannot run a tank or fly a plane on nuclear or a lump of coal.

The amendment would permit a range of alternative energy programs, would permit a minimum "energy safety net."

● Mr. LEVIN. Mr. President, I would like to join with my colleagues in supporting Senator HART's amendment. His proposal would serve to balance our energy budget. Since the oil embargo, the Congress has passed many pieces of legislation aimed at decreasing our dependence on foreign oil. This has been a bipartisan goal and I hope that it can continue to be so. In the past, we tried to create a balanced energy program, committing ourselves to both long-range research and shorter term programs to protect our Nation from potential shortfalls in oil supplies.

Now there may well have been inconsistencies in or less valuable programs included in the legislation of the past 7 years. I had hoped, however, that the new administration would provide us with evidence showing why they proposed to change the energy program. I have tried to ascertain why the administration has requested certain changes to be made in the energy budget, but I cannot find a satisfactory answer.

They propose to cut the energy budget by 16 percent. I cannot ascertain why 16 percent rather than 4 percent or 30 percent or any other arbitrary number. For example, the administration proposes to abolish the Solar Energy and Conservation Bank because they say that higher prices will assure investments in solar energy and conservation. On what evidence? One could easily argue that, on the contrary, higher energy prices have reduced the capital assets of those very individuals and small businesses who would benefit from the Solar Energy and Energy Conservation Bank. The administration may be correct in asserting that higher prices would persuade more citizens that they would like to invest in solar energy and energy conservation. Unfortunately, by increasing fuel bills, it may well eliminate private funds that could have been used for energy savings.

The administration would also like to abolish the alcohol fuels budget. They state that the marketplace will finance gasohol projects because of the increase in oil prices. Yet gasohol producers can provide evidence that they cannot obtain financing without Federal loan guarantees.

All of us are in favor of saving money and cutting wasteful spending. No one from Michigan can ignore the fact that our economy is in trouble and that help is desperately needed. Yet I cannot understand how dismantling our energy program without a comprehensive alternative can help our Nation's economic woes. The administration wants to cut money for solar energy, for energy conservation, for alcohol fuels research and loan guarantees, for fossil fuel, and other synthetic fuel programs. Yet we have not been told why such cuts should be made. Why is the Solar Energy Bank totally abolished while nuclear research would not be touched? We are told that the rise in oil prices will cause the market to meet the need for solar energy; yet why cannot the market also be depended upon to fund nuclear spending?

If this administration is truly committed to national defense, it must reevaluate its energy proposals. By cutting conservation—which is the cheapest way to cut our energy imports—by cutting programs for renewable resources, by cutting funds for the strategic petroleum reserve, the administration is destroying the programs the Congress devised to minimize our dependence on foreign oil. They are simply increasing our vulnerability to oil cutoffs. This is a foolish and dangerous policy.

Although we cannot bind committees to funding specific programs, I believe we have an obligation to indicate the sense of the Senate that we establish a more balanced energy program, funding short- and medium-range programs to decrease our imports of oil. And until we receive more conclusive evidence about the effects of the proposed modifications of our energy program, we should assure a more equal sharing of the budget cuts.●

● Mr. WEICKER. Mr. President, I am pleased to support Senator HART's amendment for the energy function within the budget.

I am happy to support this amendment for several reasons: First, a general across-the-board cut for the Department of Energy reduces overall outlays for fiscal year 1981 by some $34 million, reduces outlays for fiscal year 1982 by an additional $10 million, and permits us the time to develop additional cuts for fiscal year 1983. More importantly, the Hart amendment, if passed, will enable both Secretary Edwards and the Senate Energy Committee to properly review all energy programs and create an intelligent report policy for this country.

On several occasions, Secretary Edwards has testified before the Senate Energy Committee that he does not have an energy policy, that he looks forward to creating an energy policy with Congress. Fine, I support that approach. The problem is that the budget itself creates policy—with or without oversight or authorization hearings. Of course, the Department of Energy has its full share of wasteful, overlapping programs. But, I doubt very much that Secretary Edwards or even David Stockman has been able to identify all the waste and inefficiency at the Energy Department in the few months that they have been in office. Yet, they seem prepared to completely halt energy initiatives in several areas, while heavily tilting the energy budget toward some nuclear programs—an area which might, in fact, be ready for commercialization rather than continued Federal subsidies. Make no mistake, I have been a strong supporter of nuclear energy. I will likely continue to be a nuclear power supporter, but I believe that both Congress and the executive branch should have the opportunity to review existing programs and policies before launching into a narrow-gauge elimination of energy programs already on the books.

So, Senator HART's amendment gives us the time to review all energy programs and, at the same time, achieve the administration's goal of substantially reducing Federal spending.●

● Mr. DECONCINI. Mr. President, I simply cannot believe the people of this country want to dismantle the solar energy programs that we have built together over the last 4 to 5 years. I do not believe the American people realize this budget resolution would terminate; completely eliminate, the solar energy and energy conservation bank that was created by Congress only last year. But that is exactly what the administration intends in the submission of its budget and what the Budget Committee has passed on in this resolution. This budget will completely eliminate a loan program, not a giveaway program, that has been considered by the solar energy industry to be essential to the near-term commercialization of solar energy.

Before we simply vote party line on this amendment I think we should stop and consider for just a few moments just what the American people want in an energy policy.

First of all they do want an energy policy. They know we cannot separate energy policy from national security policy. They understand all too well that the production and supply of energy is the cornerstone of international relationships. They understand all too well the production, supply, and use of energy is the foundation of this Nation's economy.

They understand all too well that the production, supply, and intelligent use of energy is, in fact, the future of our society as we know it.

What the American people want is balance. When the American people finally realize the goal of the Republican energy policy is to dismantle the solar and conservation programs they will be stunned.

When the American people fully realize the sole purpose of this administration's energy policy is to prop up the nuclear industry by throwing hundreds of millions of taxpayers' dollars into Three Mile Island and nuclear demonstration plants they will be outraged.

Mr. President, I have supported a necessary and practical Federal role in the development of nuclear energy and I will continue to do so. But to put all of our Federal eggs in one nuclear basket is not in the best interests of this country.

And what does this outrageous amendment that I have cosponsored do exactly? Well, it allows the Energy Committee, the Agriculture Committee, and Appropriations Committee a couple of weeks to consider the long-range impacts and implications of the unprecedented energy policy decisions being finalized in this budget resolution. It allows the authorizing committees the flexibility to do the job they are supposed to do. I remind my friends across the aisle that they have the same majority margin in the committees that they do here on the floor.

Mr. President, I wish the American people could have a chance to vote on this amendment. I would like to place the future of the solar and conservation programs in every voting booth in America. I wish the voters had a chance, at least, to give Congress a few more days to consider these policy decisions before we begin to nail down the coffin of the conservation and renewable energy programs—the programs that offer the most hope in reducing our energy dependence on Middle East oil over the next 20 years.

This amendment, Mr. President, would actually reduce budget outlays this year and next and would allow us the opportunity to continue with a reduced but balanced energy policy.●

● Mr. LEAHY. Mr. President, I rise today as a cosponsor of the amendment offered by the distinguished Senator from Colorado (Mr. HART).

The initial energy policies proposed by the Reagan administration ignore the realities of today's energy market, underestimate the benefits of conservation and renewable sources of energy, and threaten to leave us with no contingency planning for energy supply disruptions. The administration policies purport to return energy decisionmaking and development to the free market system, and yet they would leave in place large subsidies for synthetic fuels and nuclear power.

If we are to end our excessive dependence on foreign oil, it is imperative that we employ a balanced mix of domestic energy sources. This balanced mix must include fossil fuels, solar, hydro, and other renewable energy sources, nuclear power, and a strong conservation effort. Each of these fuels must be allowed to make an equal contribution.

The Reagan energy proposals do not envision such a balanced energy mix. We cannot produce our way out of the energy crisis. Even the oil companies realize this. What are they spending their windfall profit on? Mineral companies, office equipment, and retail outlets. These actions emphatically point out the need to undertake an aggressive and rigorous effort to conserve energy and develop alternative sources of fuel. Passage of this amendment is consistent with this goal.

Mr. President, I strongly urge my colleagues to join in support of this worthwhile effort and put this country back on the balanced road to energy independence.●

Mr. JACKSON. Mr. President, the budget proposals announced by the Reagan administration provide for sweeping change in Federal policy.

In most instances, the changes mean withdrawal of the Federal Government from the national leadership role it has played in such areas as fighting poverty, encouraging economic development, energy production and conservation, and on down the line.

President Reagan was elected last November in large measure. I believe, because of his promises to reduce the scope of the Federal Government and I support the thrust of his effort in this area.

At the same time, fundamental questions are being raised that deserve the attention of the administration and Congress.

Many of the programs earmarked for rescissions, cuts, or elimination developed over the years out of need or because a special problem existed. Programs were designed to meet specific goals and objec-

tives—such as providing adequate health care for the needy.

Without question, some programs evolved that have insufficient justification or are today no longer needed. In an effort to reduce overall spending, such programs should be eliminated at this time.

In considering budget cuts, I believe we should consider two essential things:

First, the cuts should have a positive impact on the economy and security of the United States. Second, budget cuts must be applied fairly. In our eagerness to reduce the total amount of Federal spending, we must not forget the basic needs of the working poor, senior citizens on fixed incomes, the mentally and physically handicapped, and others.

Before deep cuts are made in social programs designed to provide opportunities, decent housing, food, and health care, we must ask whether the administration has abandoned the goals upon which the programs were founded or whether other steps are planned to meet them.

As one who has been especially involved in energy policy over the years, I must ask whether the administration intends to abandon the goal of reducing our dependence on imported oil and planning for the shortages and supply interruptions that will undoubtedly occur in the future. If the administration has not abandoned these goals, we must ask what programs will be offered to replace the ones proposed for elimination.

For example, during the past 10 years, Congress has developed a strong program, and may I say by an overwhelming bipartisan support in the Senate, to encourage and assist in the commercialization of synthetic fuels production from domestic energy resources, especially coal and oil shale.

Our efforts in this area have received broad bipartisan support in Congress and were undertaken during the administrations of both Democrats and Republicans.

The program now in place, as enacted during the last Congress, contemplates three principal steps in the development of new technologies. I think it is important that Members of this body understand what they are, and I will therefore review them.

First, there is a strong program of basic and applied research, heavily—sometimes exclusively—funded by the Federal Government.

Second, there are the large pilot demonstration plants at something less than full size intended to prove the processes. These demonstrations can be costly—involving investments of hundreds of millions of dollars and are rarely of a size adequate to repay their investment costs out of the quantities of products produced. The experimental nature of the plants work against the likelihood of commercial financing. Thus the Department of Energy provides assistance for demonstration projects by means of Federal cost-sharing grants.

The third step in commercializing new synfuel technology is the construction and operation of a full-size, prototype project. While revenues of the plant would be adequate to amortize the costs of construction and operation, there would remain significant risks associated with any first-of-a-kind operation. The costs, perhaps $2 or $3 billion for a single plant, are well beyond the reach of all but a few of the very largest corporations.

The Federal role, at this stage, need only be one of insurance against the unusually large risks involved. Under the Synthetic Fuels Corporation, insurance would be provided in the form of loan guarantees, price guarantees, and purchase agreements.

I have no objection to private commercialization of synthetic fuels. But to date the private sector has shown little inclination to proceed without substantial governmental financial assistance. Instead, for more than a decade, we have been told that industry was on the brink of synfuels investment and that the most "recent" oil price increase would insure development.

We must be honest with the American people. Exxon recently released projections of U.S. energy demand indicating that in the year 2000 domestic oil production, assuming substantial new discoveries, will supply half our petroleum demand. The other half—about 8 million barrels per day—must come from imports or synthetics.

Exxon believes that as much as 34 percent of this total demand—well over half the 8-million-barrel-per-day shortfall—could come from synthetics The existing policy of Congress was intended to achieve such a goal, but frankly time is running out. The leadtime required for these plants is as much as 10 years.

We spoke in the Energy Security Act of production goals of 500,000 barrels per day by 1987 and 2 million barrels per day by 1992.

Those were ambitious targets and already the 1987 goal is unlikely of achievement. But now the administration wants to reduce Federal involvement in synfuels. It wants to eliminate cost-shared demonstrations which are well underway and trust to high oil prices and private initiative to get the technologies on line.

In establishing the current Federal synthetic fuels efforts the Congress recognized several realities:

Domestic petroleum production is projected by the most optimistic of forecasters to fall short of future needs even with aggressive conservation and maximum substitution of other conventional energy sources.

The most difficult energy need to serve is that of liquid fuels for transportation—currently 25 percent of all our energy demand and 56 percent of our petroleum consumption.

The only substitutes of a large measure of imported petroleum are liquids from domestic coal, oil shale, and other resources—all of this synthetic fuels.

My point here is that whether the Federal Government is involved or not, this Nation must come to grips with the energy problems facing us.

The inflation increase announced last week—a rise of 1 full percentage point during February—was attributed in large part to energy price increases.

Economists have come to realize the impact energy is having on our economy. Dismantling our energy program without replacing it with substantive initiatives, either public or private, will be a signal to OPEC and the rest of the world that we are not serious about fighting inflation.

The Reagan administration also seeks to cut back or eliminate efforts in the areas of conservation, solar, alcohol fuels, geothermal, and other areas providing great promise.

My purpose today is not so much to argue about which of these programs should be saved and which should be eliminated. Rather, I am asking whether the administration has decided that the reduction of U.S. dependence on imported oil is no longer a worthy goal and, if we dismantle the energy policy established over the past 10 years, what will be proposed to take its place? What commitments does the administration have from the private sector to invest in synthetic fuels? What is the Reagan administration program to meet these essential goals?

Cutting the budget for the sake of balancing the budget or reducing Federal spending is not necessarily a justification for every proposed revision of public policy. I believe the proposed budget cuts should be considered carefully and in relation to national goals.

There is, indeed, a consensus in this country for limiting Federal spending and, as I noted earlier, I support this basic effort. Nevertheless, we have to look again at the goals of each program and consider whether the goals are still valid and whether the needs are still real.

If so, what is the administration offering as a substitute for the necessary programs being cut? Which programs does the administration assume the private sector will take over?

Honest debate should consider all the economic and national security consequences of budget actions, not just the monetary scorecard achievements of the current fiscal year.

Mr. DOMENICI. Mr. President, I have no additional requests on this side. I wonder if the distinguished Senator from Colorado is ready to vote.

Mr. HART. Yes.

Mr. DOMENICI. Mr. President, have the yeas and nays been ordered?

Mr. HART. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOMENICI. Mr. President, I yield back the remainder of my time.

Mr. HART. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Colorado (Mr. HART). The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the

Senator from Rhode Island (Mr. PELL), the Senator from West Virginia (Mr. RANDOLPH), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I further announce that, if present and voting, the Senator from West Virginia (Mr. RANDOLPH), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Rhode Island (Mr. PELL) would each vote "yea."

The PRESIDING OFFICER (Mr. ARMSTRONG). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 32, nays 65, as follows:

[Rollcall Vote No. 59 Leg.]

YEAS—32

Baucus	Exon	Melcher
Biden	Ford	Metzenbaum
Bradley	Glenn	Mitchell
Bumpers	Hart	Moynihan
Byrd, Robert C.	Hollings	Pryor
Chiles	Huddleston	Riegle
Cranston	Inouye	Sarbanes
DeConcini	Kennedy	Tsongas
Dixon	Leahy	Weicker
Dodd	Levin	Zorinsky
Eagleton	Matsunaga	

NAYS—65

Abdnor	Goldwater	Murkowski
Andrews	Gorton	Nickles
Armstrong	Grassley	Nunn
Baker	Hatch	Packwood
Bentsen	Hatfield	Percy
Boren	Hawkins	Pressler
Boschwitz	Hayakawa	Proxmire
Burdick	Heflin	Quayle
Byrd, Harry F., Jr.	Heinz	Roth
	Helms	Rudman
Cannon	Humphrey	Sasser
Chafee	Jackson	Schmitt
Cochran	Jepsen	Simpson
Cohen	Johnston	Specter
D'Amato	Kassebaum	Stafford
Danforth	Kasten	Stennis
Denton	Laxalt	Stevens
Dole	Long	Symms
Domenici	Lugar	Thurmond
Durenberger	Mathias	Tower
East	Mattingly	Wallop
Garn	McClure	Warner

NOT VOTING—3

Pell	Randolph	Williams

So Mr. HART's amendment (UP No. 36) was rejected.

THE BUDGET RESOLUTION SCHEDULE

Mr. BAKER. Mr. President, I announced earlier that after consulting with the minority leader and taking an inventory of the amendments we know of yet to be disposed of, I would have a further announcement about the schedule of the Senate.

It appears to me that there still are more than 20 amendments to be dealt with and that while we are making good progress on the consideration of those amendments, we still have much work to be done.

I have just advised the distinguished minority leader that, under these circumstances, I do think it will be necessary for the Senate to be in late tonight. I would expect us to continue until 10 o'clock or thereabouts and to come in about 9:30 in the morning. I will ask consent for such an order later in the day.

Senators should be on notice that while it may or may not be possible to finish this resolution tonight, it seems the better part of management to continue until a reasonably late hour tonight. We can convene in the morning to dispose of this resolution, if necessary, and dispatch the other business of the Senate if we have completed this measure.

TIME LIMITATION AGREEMENT ON CERTAIN AMENDMENTS

Mr. President, I inquire of the minority leader if there would be a possibility of reducing the statutory time on some of these amendments that are listed to be called up.

I understand that it is possible, for example, that one or more of the Proxmire amendments might be reduced in time.

Mr. ROBERT C. BYRD. Yes.

Mr. President, there are a few amendments on which the time could be reduced, and it may be well, if the majority leader wishes to do so, to proceed now with locking those in, and it might help to develop some momentum.

On two of the three Proxmire amendments, I believe there could be an agreement, and on two amendments by Mr. EAGLETON as well as one by Mr. INOUYE and one by Mr. DECONCINI, I do think the time could be reduced, as shown in the memorandum I have now given to the majority leader.

Mr. BAKER. I thank the minority leader.

I especially thank the minority leader for pursuing this effort to reduce time where it is possible to do so.

We discussed that earlier today, and the distinguished minority leader volunteered to explore that possibility, and he has now handed me a list with certain suggestions in that respect.

Mr. President, I now ask unanimous consent that on an amendment by the distinguished Senator from Wisconsin (Mr. PROXMIRE), dealing with the Eximbank, there be a time limitation of 20 minutes, to be equally divided; that on another amendment by Mr. PROXMIRE, dealing with rescissions, there be a 30-minute time limitation, to be equally divided; that on an amendment by the distinguished Senator from Missouri (Mr. EAGLETON), dealing with the National Science Foundation, there be a limitation of 40 minutes, to be equally divided; that on a second amendment to be offered by Mr. EAGLETON, dealing with trade adjustment assistance, there be a time limitation of 40 minutes, to be equally divided; that on an amendment by the distinguished Senator from Arizona (Mr. DECONCINI), dealing with debt collection, consultants, and travel, there be a time limitation of 30 minutes, to be equally divided; that on an amendment to be offered by the distinguished Senator from Hawaii (Mr. INOUYE), dealing with Indians, there be a limitation of 20 minutes, to be equally divided.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. Mr. President, I thank the minority leader for his help and cooperation.

Mr. ROBERT C. BYRD. Mr. President, the distinguished majority leader is welcome.

THE REASON FOR THE ABSENCE OF SENATOR RANDOLPH FROM THE SENATE TODAY

Mr. ROBERT C. BYRD. Mr. President, I wish to state for the RECORD the reason for the absence today of my distinguished senior colleague, Mr. RANDOLPH.

I am sure that Mr. RANDOLPH would want to have voted on the amendments that have already been debated and acted upon today. Senator RANDOLPH has an excellent attendance record, as we all know, and it is only when the exigencies are such that it is impossible for him to be here in the Senate that he will miss a vote.

Today he is in Salem, W. Va., with members of his family for the interment of the remains of his beloved wife, Mary Katherine.

Mr. BAKER. Mr. President, will the minority leader yield to me?

Mr. ROBERT C. BYRD. I yield.

Mr. BAKER. Mr. President, I join with the minority leader in expressing regret that it is not possible for the distinguished senior Senator from West Virginia to be here.

I have such a high regard for him as my chairman for so many years and as a friend for so many years that it was difficult for me yesterday to advise him that I felt it was essential for the Senate to continue the consideraton of this measure, notwithstanding his absence.

I know he regrets the necessity for his absence. I know every Member of the Senate understands the reason for it, and I wish to express my sympathy to him on this sad occasion and to join the minority leader in this explanation.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader, and I am sure that Senator RANDOLPH will deeply appreciate the remarks of the majority leader.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTIONS

The Senate continued with the consideration of the concurrent resolution.

Mr. DOMENICI. Mr. President, before the distinguished minority leader leaves the Chamber, might I ask as to the list that he has presented to the majority leader, is that the sequence that the amendments will come up?

Mr. ROBERT C. BYRD. No, that is not necessarily the sequence in which the amendments will be called up. That is merely a listing of the amendments that was made in an effort to inquire as to whether or not it would be possible to get time reduced on any of them.

Mr. DOMENICI. Mr. President, I thank the Senator.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. DOMENICI. Mr. President, I yield myself 2 minutes off the resolution.

Mr. President, I thank our majority leader and the distinguished minority leader for their effort here today to move this matter along. We do have a number of amendments that have to be

considered and I think his leadership has provided everyone with an opportunity to debate most of the time much in excess of the hour equally divided that is provided in the Budget Act. That has worked quite well.

However, I say from my standpoint I wish to thank those Senators who have agreed to even a lesser time than that.

I also hope that we could, to the maximum extent possible, stay with the 1-hour rule which is provided for in the act. If there is some real extenuating circumstance, obviously I would yield, and I am sure that Senator HOLLINGS would yield.

I hope everyone knows that we have to move this along. If we do not we could be here until Friday or Saturday and all the committees have work to do, and we have a very difficult job with the first resolution if we are not able to complete this at the latest tomorrow. Otherwise, we will not be able to get our work done.

I thank the Senator for helping us with that.

Mr. BAKER. Mr. President, I thank the Senator for his remarks.

UP AMENDMENT NO. 37

(Purpose: To restore funds for primary health care and prevention)

Mr. KENNEDY. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) for himself, Mr. RANDOLPH, Mr. RIEGLE, Mr. METZENBAUM, Mr. MOYNIHAN, Mr. WILLIAMS, Mr. PELL, Mr. EAGLETON, Mr. LEVIN, Mr. LEAHY, and Mr. ROBERT C. BYRD proposes an unprinted amendment numbered 37.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with "$52,144,000,000" in line 17, strike out through "$47,694,000,000" in line 20 and insert in lieu thereof the following:" $52,675,000,000, and outlays by $36,820,000,000, in fiscal year 1982; and to reduce budget authority by $59,078,000,000, and outlays by $47,569,000,000".

On page 10 beginning with "$10,303,000,000" in line 6, strike out through "$10,913,000,000" in line 9 and insert in lieu thereof the following: "$10,153,000,000 in budget authority and $7,803,000,000 in outlays for fiscal year 1982; and $12,213,000,000 in budget authority and $10,788,000,000".

Mr. KENNEDY. Mr. President, I offer this amendment on behalf of myself, Mr. RANDOLPH, Mr. RIEGLE, Mr. METZENBAUM, Mr. MOYNIHAN, Mr. LEVIN, Mr. ROBERT C. BYRD, and Mr. LEAHY.

PREVENTIVE HEALTH SERVICES

Mr. President, my amendment would also restore $50 million to the Committee on Labor and Human Resources mark for the purpose of funding preventive health activities.

Mr. President, as a member of the Committee on Labor and Human Resources for more than 18 years, I have heard hundreds of hours of testimony and I have spoken personally with thousands of physicians, scientists, and citizens across the United States.

But nothing I have seen and nothing I have heard has impressed me more than our ability to enhance the quality of our lives through preventive health interventions. We have within reach the capacity to prevent many of man's most dreaded afflictions. Never before have we possessed this kind of power over our own health and destiny.

We have already witnessed the power of prevention to alter the quality of life. Just over a century ago, well before we knew of bacteria or viruses, pioneers in public health began the conquest of infectious diseases. They used simple methods—sanitation, improved hygiene, improved nutrition—but the results were almost incredible. Major inroads were made against tuberculosis, typhus, diphtheria, scarlet fever, cholera, smallpox, tetanus, and other communicable conditions that were then the greatest scourges of humanity. As a result of their work, together with the later discoveries of immunization and antibiotics, we have come a long way toward conquering the killer infectious diseases in the Western World.

From 1900 to 1978 deaths from communicable diseases in this country fell by 93 percent. Once among the most burdensome illnesses, these conditions now account for only 2 percent of deaths in the United States. In 1979, less than 1 percent of people who died before age 75 in the United States died from infectious diseases. Between 1900 and 1950, life expectancy increased from 47.3 years to 68.2 years. That was an achievement unparalleled in history. It was made possible by a health strategy that emphasized the maintenance of good health and the prevention of disease.

With the conquest of infectious disease, we face new health problems and new challenges. Now the chronic diseases—including heart disease, stroke, and cancer—are our most burdensome illnesses, accounting for 71 percent of all deaths in our country.

Until very recently, we sought to deal with these new challenges with new weapons drawn from the arsenal of curative medicine. Impressed, and rightly so, with the power of biomedical science to develop new disease treatments, we wrongly concluded that tending the ill was sufficient to improve the health of our people. Even today we spend only 2 percent of each health dollar on disease prevention, and the Department of Health, Education, and Welfare estimates that only 4 percent of each Federal dollar goes for disease prevention.

That strategy failed. From 1950 to 1970, life expectancy in this country improved only 4 percent, and infant mortality remained virtually unchanged. During that same period, however, health care expenditures did not stagnate in the same fashion; far from it. From 1930 to 1978 alone, health care spending increased by over 700 percent.

Now the evidence is growing that once again disease prevention and health promotion can open the door to an historic new era of progress in health and medicine. The first indications were the early studies in the 1950's which linked cigarette smoking with lung cancer. Next came the Framingham study, which demonstrated in my own State of Massachusetts that cholesterol levels, blood pressure, and smoking were closely linked to the development of heart disease, stroke, and other diseases of the cardiovascular system. A cascade of new investigations followed. In the late 1960's, Dr. Lester Breslow and his colleagues demonstrated that a few simple modifications in lifestyle—no smoking, regular exercise and sleep, maintaining normal weight—could extend life expectancy by anywhere from 7 to 11 years.

More recently, the Stanford heart disease project, which I have seen firsthand, has demonstrated that an organized prevention campaign can reduce the risk of heart disease by 20 percent in a single community. A recent Finnish study has shown that a community-based prevention effort could cut heart attack rates by 15 percent and stroke rates by 40 percent.

These are real achievements. They dispel once and for all the false cliche that prevention is a nice idea, but does not work. Prevention can work. Research paid for with our constituents' tax dollars has demonstrated that fact beyond reasonable doubt. And now it is the responsibility of our Government to make the benefits of this new knowledge available to the American people.

Prevention in America today means immunizing our children against disease. Prevention means screening for high blood pressure. Prevention means ridding our cities of rats. Prevention means identifying and cleaning up toxic waste dumps. Prevention means controlling tuberculosis. Prevention means reducing each individual's risk of heart disease, cancer, and stroke. Prevention means reducing the incidence of mental retardation. Prevention means better health for all of us—at a much reduced cost. Let us look at what prevention means to children.

The national childhood immunization initiative was begun in 1977 when surveys revealed that over one-third of school-aged children were inadequately immunized against the major vaccine-preventable diseases. A goal was established to raise the immunization levels to over 90 percent by the fall of 1979, and program activities were tailored to meet that goal. Today of the 24 million children in kindergarten through eighth grade, 91 percent have been immunized against measles, 93 percent against rubella, 87 percent against mumps, 93 percent against diphtheria, pertussis, and tetanus.

The health impact of this level of protection is enormous when one considers the morbidity and mortality associated with these common childhood diseases. For example, encephalitis occurs in 1 of every 1,000 measle cases, often producing permanent brain damage; death occurs in 1 of every 10,000 cases. No one needs to be reminded of the terrible, permanent effects of paralytic polio.

The savings in human life, misery,

and economic resources which result from these prevention programs are huge. It cost $108 million to immunize our children against measles. It would have cost more than $1 billion to treat them for measles. Let us look at what prevention means for the millions among us with high blood pressure.

Hypertension, often called the silent killer because it has few physical manifestations, is an insidious disease contributing significantly to death and disability among the estimated 60 million hypertensive Americans. Each year 200,000 Americans die of the disease. An important contributor to stroke, heart disease, and kidney disease, high blood pressure is estimated to cost the Nation more than $8 billion each year in medical care costs, lost productivity and lost wages. And yet high blood pressure can readily be controlled at a modest cost once an individual is aware of the condition. Largely as a result of the federally sponsored screening and education program, the number of identified and adequately treated hypertensives has more than doubled since 1972. The program has resulted in a significant decline in mortality from all causes and demonstrated the benefits of treatment for all affected individuals. Participants with mild high blood pressure experienced death rates 17 percent below nonparticipants. Mortality rates for black program participants declined 22.4 percent relative to nonparticipants.

While by all definitions our preventive health strategy has been a ringing success, it is a strategy that is successful only so long as we continue to maintain and strengthen it.

Unfortunately, health prevention activities are easy to overlook once a crisis is over. The childhood immunization initiative began as a result of the complacency of the early and midseventies when the first massive childhood immunization program had concluded and immunization rates began to drop rapidly while cases of vaccine-preventable diseases rose just as dramatically. Controlling hypertension requires adherence to a regular regimen of medication and diet, a difficult proposition when the disease does not initially manifest itself in physical disabilities. In the past, we have implemented cyclical efforts to control venereal diseases. For the second time in 25 years, we are experiencing an increase in the incidence of tuberculosis, a communicable disease we once thought we had under control and on the way to eradication. The lesson is clear. The diseases we have the power to prevent have the power to recur when we cut back on prevention.

Prevention has payoffs in other areas as well. The President's Committee on Mental Retardation recently reported that more than 50 percent of the biomedical causes of mental retardation are preventable. Their report tallied more than 200 known causes of retardation including birth injuries, toxic conditions, inherited genetic factors, measles, diabetes, X-rays, household poisonings, metabolic disorders, maternal malnutrition, alcohol and drug abuse, and Rh blood disease. The annual cost of caring for the Nation's 6 million retarded citizens is estimated at $11 billion in Federal, State, and local funds. Appropriate counseling, screening, and information programs could go a long way toward reducing these dollar costs as well as the human costs of this tragic and all too often unnecessary condition.

The Budget Committee's allocation for the programs within the jurisdiction of the Labor and Human Resources Committee assumes a 25-percent reduction in health prevention spending. So does the President's budget request. Such a reduction would be unconscionable. Proponents say that savings in administrative costs will make up the difference. But even Secretary Schweiker has admited, in testimony before the Finance Committee, that we can only expect to save, at most, 10 percent in administrative costs. Alternatively, we have been told that every program must absorb cuts if we are to achieve economic recovery. While budget reductions in many areas may be the price we have to pay, reducing support for health prevention is much too high a price. For every dollar we cut from prevention, we will spend many more in treating preventable diseases and conditions. For every dollar we cut from prevention, we will create additional burdens in pain and anguish that know no price tags.

So, I offer an amendment that would restore $50 million to the committee's allocation for preventive health services, an amount less than two-tenths of 1 percent of total health care expenditures and an infinitesimally small share of the Federal budget. Effective health prevention could use considerably more; we cannot afford to do less.

I urge my colleagues' support of my amendment.

HEALTH SERVICES

Mr. President, community health programs—community health centers, migrant health centers and black lung clinics—provide essential services to the poor and medically underserved in our Nation's cities and rural areas. For most of the users of these centers, there are simply no alternative health care services available.

In a nation that is producing enough physicians to meet its needs, it is unconscionable that every citizen does not have reasonable access to quality health care. Yet more than 20 million Americans reside in medically underserved areas where the poverty level is so high that physicians cannot make a living or where physicians have been unwilling to locate because they could make a comfortable living in wealthy, medically overserved suburbs. While there is some evidence that physicians are beginning to locate in smaller communities that up to now had not had physicians in residence, there is no evidence that physicians are now willing to locate in poor urban areas or in poor rural areas.

In fact, the evidence is to the contrary. While the national patient care physician-to-population ratio rose from 120 per 100,00 in 1968 to 150 per 100,000 in 1978, the ratio in rural counties actually decreased. In poor urban areas, the data are even worse It is now virtually impossible to find a physician in private practice in the south Bronx, in Roxbury, in east Los Angeles, in east St. Louis, in south Philadelphia.

According to the Department of Health and Human Services, the poor are twice as likely to suffer from chronic and debilitating conditions than the population as a whole. Where do these Americans find health care services? Two hundred and ninety-nine federally funded community health centers provide services to more than 2½ million urban Americans who otherwise would be forced to seek primary health care services in the emergency rooms of already financially distressed hospitals at double or triple the cost of a visit to a community health center. Five hundred and seventy-three centers provide services to more than 2½ million rural Americans who otherwise would be forced to travel long distances to obtain needed services. And what of the more than 2 million migrant farmworkers whose health and social needs were once a national disgrace—who were written off by the States and local communities as Federal responsibilities? Absent more than 1,000 the federally sponsored centers and clinics, too many poor Americans—urban and rural—would postpone seeking care until they became seriously ill and required intensive—and expensive—hospitalization.

Who are the users of these community-based health centers? Eighty percent of health center users are members of minority groups; 71 percent are below the poverty level. Only 43 percent of users are on medicaid. A majority lack any third-party health insurance coverage.

And community health centers are cost-effective providers. Studies show dramatic reductions in hospitalization rates among users ranging from 25 to 67 percent. The resultant savings are greater than the annual appropriation for the health center programs. Equally as dramatic are the reductions in infant mortality rates in communities served by health centers. Several studies have found reductions as great as 40 percent compared with adjacent areas without center services.

The President has proposed a 25-percent reduction in funding for these vital health care delivery programs. The Budget Committee's mark for the Labor and Human Resources Committee assumes adoption of a 25-percent reduction in current spending. Reducing spending means reducing the availability of needed services. How will the decision be made as to who continues to receive services and who loses services? Where will the residents of east Los Angeles, Roxbury, south Bronx go for services? How will we explain the loss of their health centers to the people who live in and around Frostproof, Fla., Woodburn, Oreg., and Dry Run, Pa.? Where will the thousands of victims of black lung disease find the specialized care they need? The answer in all too many cases—"sorry, services are no longer available."

Community and migrant health centers, and black lung clinics are too valuable a resource, provide too valuable a service to warrant a significant reduction

in the Federal commitment. A healthy economy depends on a healthy work force. And sick people cannot work.

I urge my colleagues to acknowledge the essential contribution these programs make to the health of our less fortunate fellow citizens and support continued funding at the fiscal year 1981 appropriation level.

Mr. GORTON. Mr. President, I think it is vital for the Members of this body and for the people of the United States to know that, in connection with the programs which are the subject of this amendment, that the proposal of the administration is, first, not to terminate Federal presence and Federal support for preventive health programs.

Second, it is to provide for far greater flexibility in the administration of those programs by taking some 26 or 27 of them into a block grant program for preventive health, the net results of which will almost certainly be a more sensitive situation administered by the States and by local communities than we have had with a series of often not interconnected categorical aid programs.

This proposal of the President is for a relatively modest cut of some 11 percent in outlays for fiscal year 1982 under the Carter budget; a number of dollars which is almost equal to the number of dollars appropriated in fiscal year 1981 for the collection of these most important and most vital programs.

There is not the slightest question in my mind but that almost every State in this Nation can, if it is freed from the tremendous number of regulations involved with each one of these independent programs at the present time, provide better preventive health authority than the Federal Government is doing through its various departments right now.

No one can argue with the Senator from Massachusetts as to the value of preventive health care. No one in the administration in fact is doing so.

It is highly clear, on the other hand, that the present categorical grant system has fostered not only an unwieldy but a totally fragmented system for the delivery of public health services across the board, very specifically including those falling within this preventive health care grant.

For example, in 1975, the General Accounting Office report on family planning programs, which fall within this area, determined that States were not providing reports adequate to determine whether or not they were complying with the Federal guidelines. The then HEW audit activities were inadequate; the targeting of programs for low-income people was inadequate. Four years later, in 1979, the General Accounting Office made, for all practical purposes, identical findings.

In 1978, the GAO report on neighborhood health centers found that HEW was not adequately enforcing compliance with efficient staff productivity criteria, that HEW control of overhead charged to grants was inadequate, and that health center promotion of preventive health services was inadequate. A year later GAO found that these problems had not adequately been met or, in some cases, had not been met at all.

Simply, what we have before us here in this amendment is an attempt to reduce or to eliminate the necessity and the desirability for changing from a categorical grant system which has not worked to a block grant system which has a far greater potential, a far greater possibility of working; one which is more likely to meet the specific needs of citizens in individual communities and individual States throughout the United States of America.

Those needs, even in the field of preventive health, are not identical. Each community and each State is far better able to decide its own priorities than are we here in the Congress of the United States or than is the Department of Health and Human Services.

This is an experiment which is made necessary by the desperate fiscal condition of the United States of America. It is at the same time an experiment which should have taken place in any event, even if the Government of the United States were running a surplus. And the only effective way to see to it that these categorical grant programs are consolidated into block grants and are in fact managed by the States is to see to it that there is at least a modest cut in the straightline increase in every one of these programs which has been a feature of it the last many years, ever since each one of them was created.

The fact that these programs have been affected much less adversely than many others indicates the sensitivity of the administration toward their content, toward their desired goals. Beyond question, this cut can be absorbed by the States with a better quality of services without the overseeing of the Federal Government upon the defeat of this amendment, the passage of this resolution, and the consequent action of the authorizing committees of the Congress of the United States to make the changes which are assumed in this resolution itself.

In other words, we will do better in providing preventive health care services by moving in this direction than we would by continuing all of the errors of the past.

Before I sit down, however, I believe that it should be mentioned in this connection, as in connection with every other amendment with which this body has dealt since Senate Concurrent Resolution 9 was first debated on this floor, that there is one overriding goal of this process and only one. That goal is the economic recovery of the United States. We have, for decades, consistently operated a system under which the percentage of the production of the people of the United States which goes to the Government of the United States for its determination as to priority has increased.

In the last 2 or 3 years, the results of that constant increase have been dramatic. They have been a rate of inflation consistenty and persistently in double digits. They have been a consistent decrease in the growth of productivity in the United States. These have been the inevitable consequences of not only increased Federal spending, but Federal spending increasing at a rate much too fast for the economy to absorb it and to remain healthy; of a taxation system which constantly takes a greater percentage of what the American people earn and produce each and every year without any action on the part of Congress whatsoever; a constant increase in the supply of money not represented by our growth in goods and services; and overregulation of our economy.

We are working on only one of two of the elements of the necessary reforms here in this resolution, but they will lead us very quickly into the other two or three elements as well.

What we are doing here is providing an attempt—the last best attempt—to get some kind of control over growth in Federal spending and at the same time by moving from categorical aid programs to block grants, reducing the amount of regulation which affects people and the economy of the United States.

There is no question but that this process is a painful one. People who have been active in the administration of particular Federal programs may have to find other careers. People who have depended on and have been insulated from the political process by narrow categorical aid grant programs directed at their own special interests may have to compete with others with equally important or equally vital interests within the nature of a free political system.

This is a challenge to which we should look forward for its own sake in increasing the responsiveness of the Government of the United States and of the various States to the needs of the people and at the same time and, even more importantly, beginning the economic recovery of this country—an economy on which all social services depend.

As we have defeated other attempts to break down the economic recovery program of the President, to add back in the $100 million here, $300 million there, $1 billion there, to the point at which we would have no change in policies whatsoever, we should also defeat this amendment; first, because it is necessary in order to see to it that we move quickly toward economic recovery and, second, because a better delivery system of preventive health services will be the inevitable result.

Mr. KENNEDY addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. How much time remains?

The PRESIDING OFFICER. The Senator from Massachusetts has 14 minutes and 54 seconds remaining.

Mr. KENNEDY. I yield myself such time as I may use.

I listened with great interest to the response of my colleague from the State of Washington. But he fails to respond to one critical question. There is not one health care expert—that is, either a scholar or professor who is involved in health care programs—that believes that this kind of budgetary reduction is going to make any sense at all in the context of preventive health.

The administration has not made a

good case for these budget cuts before the Congress of the United States or the American people. It has been unable to find any experts in preventive health who would support the kinds of reductions that we have seen proposed here today.

The fact remains, Mr. President, that these preventive health programs have been a good example of an effective partnership between the State and Federal Governments. And that partnership, I think, has been a clear success.

Who would dispute that the childhood immunization program has been successful, or that the efforts in the area of hypertension have been successful, or that the federally funded Framingham study, which talks about the dangers of high degrees of cholesterol, has been successful?

When you block grant these programs, and impose draconian reductions of 25 percent the States are going to struggle for resources.

In many instances the programs that are being lumped together, Mr. President, reach out to individuals who have not historically had the political muscle to get State governments to respond. That happens to be the fact. That happens to be the history. That happens to be the reality that we have seen over too many long years. When that does happen, the people suffer, suffer seriously, and then the cost of providing health care to them increases immeasurably.

The Congressional Budget Office does not support the position which has been taken by the Senator from Washington. He claims that the 25-percent reduction could be absorbed by better administration of the program. But the studies show that better administration can only result in savings of anywhere from 3 to 5 percent, but really not more. So we should not delude ourselves. We are going to be cutting into the substance of the program, we will be chopping the meat, not the waste.

Mr. President, I think we have to realize that with these budget reductions in the areas of preventive health we are going to be pound foolish in order to be pennywise. We should continue the longstanding commitment of this country in this area.

I am mindful, Mr. President, that we as a country expect quick solutions to many of the longstanding health problems that we face. We have seen the virtual elimination, for example, of smallpox in the world community. When you reduce the commitment to health care in areas like immunization programs those diseases come back, and come back with an alarming ferocity.

That is one of the principle reasons that we made dramatic efforts in 1977 to increase the whole immunization program. That effort was basically a partnership between the Federal Government and State governments and it worked.

It seems to me that that kind of cooperation, that kind of shared responsibility, is one that we should not easily discard. It has been tried, it has been tested, and there are millions of children and others in this country who have benefited from that partnership.

It is my belief that with this kind of significant budget reduction, we are putting at risk the health of additional millions of Americans.

Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, I ask unanimous consent that Senator BUMPERS be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

RURAL HEALTH AND BLACK LUNG CLINICS

Mr. ROBERT C. BYRD. Mr. President, I rise in support of this amendment. The reconciliation instruction to the Labor and Human Resources Committee, as it currently stands in Senate Concurrent Resolution No. 9, could cause a grave injustice to a number of people most in need of basic medical care.

I am speaking of people in rural areas, people who work as migrant laborers, and miners who have contracted black lung disease. These people do not have money to go to the best hospitals. Far from it. Sometimes, any kind of hospital might be available to them only in case of an emergency. What many of us may consider to be routine health care may be difficult or impossible for many of these people to obtain.

The rural areas of America, including the Appalachian region, receive less than their fair share of medical services. Community health centers—small clinics—in rural areas attempt to provide fundamental health care for people in those areas.

Thousands of victims of black lung disease have had their suffering reduced in some part through the efforts of specially trained people in other small clinics in nine States.

Medical personnel in Alabama, Colorado, Illinois, Indiana, Kentucky, Ohio, Pennsylvania, Tennessee, and my own State of West Virginia help black lung victims to live, however uncomfortably, with that dreaded lung disease. These medical personnel are trained to instruct black lung victims in the use of simple oxygen equipment in their homes. Many black lung sufferers require such equipment, including oxygen tents and facemasks. The health care information provided to these miners is invaluable.

The administration's proposal to consolidate these kinds of small health programs—for rural areas and black lung victims—is intended to save money. Over the long run, that may be the case. But in the short term, administrative costs for these programs may increase, as States struggle to fill the void left by the Federal Government. And in the long term, it should be noted that the proposed reduction in these health programs is four or five times greater than the administrative costs of the programs. An inhumane cut in the black lung and community health clinics program would result.

For these reasons, I support the amendment, and I urge its adoption.

● Mr. LEAHY. Mr. President, I enthusiastically support Senator KENNEDY's amendment to restore funds for three programs which provide essential health services to poor Americans residing in the rural and urban medically underserved areas of the Nation. The community health center program, the migrant health center program, and the black lung clinics together provide health care to 6 million Americans. The vast majority of these people live below the level of poverty and have little or no health insurance.

The President has requested a 25-percent reduction in funds for these programs. If that proposal is approved, more than 2 million Americans will no longer have access to primary health care. Senator KENNEDY's amendment would merely allow these programs to receive in fiscal year 1982, the same amount they received in fiscal 1981. No increase in funds for these programs has been requested.

I support this amendment and urge my colleagues to support it for a number of reasons.

First, the continuation of these programs is essential to the national goal of containing soaring health care costs. Numerous studies, Federal and private, have demonstrated that people who use community health centers have far lower rates of hospitalization than those who do not use health centers.

Health centers reduce hospitalization between 25 and 60 percent. The savings to the health care system, through reduced rates of hospitalization and emergency room use, amount to over $400 million. Thus, these programs have saved more than they cost.

Second, the continuation of these programs at the current year's level is essential to the national goal of encouraging the most cost-effective and efficient use of Federal tax dollars. Over the last 6 years, the inflation rate equaled 55 percent. Appropriations for these programs grew by only 47 percent. Yet during this time, community health centers were able to reduce their costs for administration by 20 percent. In addition, the number of people served by the community health centers grew by 200 percent.

Third, the continuation of these programs is crucial to the national goal of protecting the most truly needy in our society. Only 6 million of the 26 million Americans who are medically underserved are currently assisted by these three programs. These programs serve the most needy Americans. Seventy-one percent of those aided have incomes below $7,000 and 60 percent have incomes below the poverty level. Almost 50 percent have no health insurance and are not entitled to medicaid because they are migrants or members of intact families.

These programs have been extremely effective. In some communities, they have reduced infant mortality rates by 50 percent and reduced the incidence of preventable diseases, such as rheumatic fever, by 60 percent. Their emphasis on preventive health care, screenings and immunizations have prevented or contained outbreaks of typhoid fever, tuberculosis, and parasitic infections.

Mr. President, this is a reasonable amendment which will serve to further our national goals of reducing health care costs, promoting the effective use

of Federal tax dollars, and alleviating health personnel shortages in rural and urban areas. I strongly urge its adoption.●

BLACK LUNG CLINICS

● Mr. RANDOLPH. Madam President, the amendment offered by the senior Senator from Massachusetts, Mr. KENNEDY, in which I join, will yield a substantial dollar savings for the American people—not only for the fiscal years this amendment addresses—but into the future.

All Senate Members are familiar with the continuing rise in health care costs which has adversely afflicted men, women, and children. Despite substantial efforts by some segments of the health care industry, the rate of increase of health care costs continues to exceed the rate of inflation.

If we are able, however, to reduce the need for costly hospitalization, surgery, and therapeutic programs through preventive health care, all citizens will benefit in reduced health care costs—not only those who do not need the intensive services associated with inpatient care, but all Americans through an overall reduction of costs.

Included in the package, Madam President, is the restoration of funding for the coal miners' respiratory clinics program. The program provides outpatient treatment for active and inactive coal miners suffering from respiratory diseases related to their employment.

The services provided include education, training, and counseling of the patient and family members, so as to help the patient learn to live as comfortably as possible with the impairment and to slow down the progress of the disease. Specialized services are delivered through an organized health care system based on primary care, utilizing existing health centers.

Currently, 50,000 miners are helped through 105 clinics in 9 States—Alabama, Colorado, Illinois, Indiana, Kentucky, Ohio, Pennsylvania, Tennessee, and West Virginia.

This limited program permits miners and ex-miners to live with their respiratory disease without hospitalization.

The program has met with substantial success to date in assisting 50,000 miners suffering varying degrees of disability. Over 200,000 additional individuals—I emphasize 200,000 individuals—have yet to be reached through the program. It would, Madam President, be a mistake to restrict this program now, and force many miners to seek costly hospital treatment for their affliction.

The other elements of this amendment Madam President, address similar preventive health care programs. These programs should not be curtailed. I urge my collcagues to support this necessary amendment.●

Mr. KENNEDY. Mr. President, I yield back the remainder of my time.

Mr. GORTON. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Massachusetts. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from West Virginia (Mr. RANDOLPH) and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I further announce that, if present and voting, the Senator from West Virginia (Mr. RANDOLPH) would vote "yea."

The PRESIDING OFFICER (Mrs. KASSEBAUM). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 36, nays 62, as follows:

[Rollcall Vote No. 60 Leg.]

YEAS—36

Baucus	Ford	Matsunaga
Biden	Glenn	Melcher
Bradley	Hart	Metzenbaum
Bumpers	Hollings	Mitchell
Burdick	Huddleston	Moynihan
Byrd, Robert C.	Inouye	Pell
Cannon	Jackson	Pryor
Cranston	Kennedy	Riegle
DeConcini	Leahy	Sarbanes
Dixon	Levin	Sasser
Dodd	Long	Tsongas
Eagleton	Mathias	Weicker

NAYS—62

Abdnor	Garn	Nickles
Andrews	Goldwater	Nunn
Armstrong	Gorton	Packwood
Baker	Grassley	Percy
Bentsen	Hatch	Pressler
Boren	Hatfield	Proxmire
Boschwitz	Hawkins	Quayle
Byrd, Harry F., Jr.	Havakawa	Roth
	Heflin	Rudman
Chafee	Heinz	Schmitt
Chiles	Helms	Simpson
Cochran	Humphrey	Specter
Cohen	Jepsen	Stafford
D'Amato	Johnston	Stennis

Denton	Kasten	Symms
Dole	Laxalt	Thurmond
Domenici	Lugar	Tower
Durenberger	Mattingly	Wallop
East	McClure	Warner
Exon	Murkowski	Zorinsky

NOT VOTING—2

Randolph	Williams

So Mr. KENNEDY's amendment (UP No. 37) was rejected.

Mr. HOLLINGS. Madam President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HOLLINGS. Madam President, the next amendment is by the distinguished Senator from Ohio, on youth services.

UP AMENDMENT NO. 38

(Purpose: To restore funds for youth training programs)

Mr. METZENBAUM. Madam President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM) for himself, Mr. RANDOLPH, Mr. WILLIAMS, Mr. EAGLETON, Mr. RIEGLE, Mr. KENNEDY, Mr. LEVIN, Mr. MOYNIHAN, Mr. SARBANES, and Mr. CRANSTON, proposes an unprinted amendment numbered 38.

Mr. METZENBAUM. Madam President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with "authority" in line 16, strike out through "1983" in line 20 and insert in lieu thereof the following: "authority by $52,425,000,000, and outlays by $35,645,000,000, in fiscal year 1982; and to reduce budget authority by $58,728,000,000, and outlays by $47,294,000,000, in fiscal year 1983."

On page 10, beginning with "$10,303,000,000" in line 6, strike out through "$10,913,000,000" in line 9 and insert in lieu thereof the following:

"$9,903,000,000 in budget authority and $7,628,000,000 in outlays for fiscal year 1982; and $11,863,000,000 in budget authority and $10,513,000,000".

Mr. METZENBAUM. Madam President, this amendment that I propose is cosponsored by Senators RANDOLPH, WILLIAMS, EAGLETON, RIEGLE, KENNEDY, LEVIN, MOYNIHAN, SARBANES, and CRANSTON.

Madam President, this country faces a situation in which approximately 19 percent of our young people are literally walking the streets in search of opportunities. We have a situation today in which 40 to 50 percent of the minority youth in our cities cannot find employment.

Nineteen percent of youth generally cannot find a job. Millions of young Americans are moving into adulthood without having had the opportunity to mount the first steps in the career ladder.

We have heard a lot of rhetoric about people who do not want to work. We have heard they are lazy; we have heard they are bums; we have heard they are cheating the system.

Madam President, I believe the young people of this country want to work if they are given an opportunity to do so.

We hear very little about the vast majority of our unemployed youth who actually want nothing more than a chance to learn a marketable skill.

I hardly ever go back to Ohio but that some young person does not come up to me on the streets of Ohio and say, "What are you going to do about helping me find a job, man?" All he wants is a job; all he wants is a chance to participate in the economy. He does not want relief, he does not want any special kind of program to take care of him. He just wants a chance to work.

I refuse to accept the idea of abandoning millions of these young Americans to marginal lives, and I believe it is shortsighted in the extreme to cut the very program that offers a chance, a way out of a self-perpetuating cycle of poverty and unemployment.

As a matter of fact, the administration originally proposed to eliminate youth employment programs entirely by consolidating them with the adult programs, and in one of the few breaks with the President, the Budget Committee could not, would not, and did not go that far. The committee restored a third of the original funding level for youth employment, and for that the committee is to be congratulated.

My amendment, cosponsored by the others whom I have mentioned, would add $300 million to bring that level to two-thirds of today's level. That amendment is supported by:

National Association of Counties.
Campfire Inc.
National Youthwork Alliance.
American Red Cross.
Big Brothers and Big Sister.
Future Homemakers.
Girls' Clubs.
Girl Scouts of U.S.A.
National Board of YMCA's.

United Auto Workers.

I read that litany of organizations supporting this amendment because I thought the Members of this body ought to understand the broad-based support and concern for the young people of America.

According to the Vice President's Task Force on Youth Employment, which released its report on January 15, 1981, after 2 years of research and hearings, the need for youth employment programs is overwhelming. Let me quote a few of their findings:

1. Youth employment problems and opportunities are unevenly distributed between regions and ethnic groups. Without a bold new initiative, the 80's are likely to exacerbate these inequities.

2. Many of our young people don't have the basic reading, writing and arithmetical skills necessary to get and hold a decent job.

3. Employers sort out applicants based on work experience and reliability. Without opportunities, young people face the catch-22 dilemma. You can't get experience without work and you can't get work without experience.

4. A partnership is needed to serve our young people—business, schools, labor unions, community-based organizations, and government. No single institution created the dilemma we face today; no single institution can cure it.

The task force further states that minorities face some of the most serious problems in transition from school to work. Twenty-five years ago the unemployment rate for white youth was about 13 percent. It remains about the same today.

Twenty-five years ago the unemployment rate for black youth was 16 percent, but it is interesting to note that that figure, the 16 percent, has grown to 30 percent or about 2½ times the white youth unemployment figure. If we are going to unravel the paradox of youth unemployment, we must answer the question why has this occurred? Minority youngsters experience more unemployment than young whites as they enter the transition period. They continue to be shortchanged throughout the school-to-work transition, and fall even further behind.

If we just take three measures of equity, whether you are employed, how much you earn, and what kind of work you do, we find the minorities fall far behind in all three.

Hispanics are substantially more likely than whites to be unemployed. Blacks are 2½ times more likely to be unemployed than whites.

By age 25 to 26, black men who have not attended college earn $2.19 per hour less than noncollege white men. Wages for all women are low. But black women earn even less than white women.

By age 21 to 22, only 10 percent of whites work in less desirable unskilled jobs; almost 40 percent of blacks do.

I am willing to admit that some of the youth training programs in the past have been ineffective. I am willing to concede that there have been some transgressions, and there probably have been some waste and abuse. But numerous steps taken in recent years have improved those programs.

Today, over 75 percent of the participants in youth employment training programs either return to school or they move into private sector jobs. The 17- to 18-year-olds in the program, who received on-the-job training in the private sector, were able to earn $776 more per year than young people who did not participate in the program.

Madam President, the Labor and Human Resources Committee which has jurisdiction over these programs does not support the action of the Budget Committee. In fact, the authorizing committee specifically recommended to the Budget Committee that youth programs be held at their current levels. This is the committee which has the most knowledge about this program, and the committee which has examined these programs in depth.

Madam President, if we allow the Budget Committee's recommendation to stand we are cutting deeper into youth opportunities. There may be some in the Senate who respond to this Senator from Ohio who might say, "Well, yes, but that is a black problem about which you are speaking and that is not a special problem of our area."

I can only say to you that the 50 States of this Union stand together or fall together. The problem of unemployment of young people in this country, black and white alike, is a problem that all of us share.

I remember as a business person coming to this very city many years ago when the cities of America were being burned down, and with the leading business persons of this Nation gathered together to talk about the problem of what we were going to do in order to keep our cities from being totally destroyed.

Who among us would suggest that if you destroy Detroit or Cleveland or Pittsburgh or Philadelphia or any other city in this Nation that the rest of the Nation does not suffer and that this Nation does not suffer internationally as well?

What we are talking about today are programs that would be penny wise and pound foolish. By cutting back on the dollars for youth employment programs what we are saying is, "We will save a few bucks now but, in the long run, this Nation will pay the price," and that price is too high a price to pay.

There are none amongst us on the floor of the Senate who do not want to balance the budget. That is a flag that we all fly under. But the fact is that we are taking it out of the hides of young kids who want to work, who need some training in order to be able to work, who believe that this country is a country of opportunity and who are being denied that opportunity. That young lady, who sat in my office yesterday and said she was training to be a social worker on a Government program but the program will stop within weeks, said, "I do not know where I will turn and what kind of job I will get." And she is just symbolic of literally hundreds of thousands like her.

This program does not make good sense for America. This does not alone affect the youth of our country, this program has to do with the strength of our Nation. And I hope that this U.S. Senate will put aside the political considerations, will recognize that we can find that $300 million and that we will not go that much further than the President did in cutting the budget as the Budget Committee did. We went beyond that figure. Let us put this $300 million back and give the children of America a chance, but at the same time give America's future a chance.

Madam President, I yield to the Senator from Maryland.

Mr. SARBANES. Madam President, I thank the Senator for yielding.

Madam President. I am pleased to join the Senator from Ohio, my distinguished colleague, in sponsoring this amendment.

Madam President, I cannot imagine any issue of greater importance than the question of youth training and of jobs for our young people. The current employment outlook for our Nation's youth is a bleak one. The current and projected unemployment rates are distressing. It is a problem upon which our society must focus.

In the end, the failure to be trained for and to hold a job undermines the self-respect of the person involved and it denies them an opportunity to become productive members of society.

We should strive for people to become productive members of our society, to

have the training, to develop their skills, and to have the opportunities to go to work and become an integral part of the work force. The benefits of that are obvious, not only for the individual, not only for his family, but also for the society.

The proper approach in addressing this serious problem is certainly not to reduce funds for youth training. Training is often the key to one's ability to attain and to hold employment. A recent article in the Baltimore Sun on the jobless rate in West Germany discussed at length the training programs for the young people in that society in an article entitled, "Training Held Key to Minimal Unemployment." The article states that one of the clearest reasons West Germany has achieved such success in dealing with unemployment is because of their emphasis on training programs for their youth.

Recently, a study by the Johns Hopkins University concerning CETA participants showed that 5 years later over 80 percent of them were in private sector permanent jobs. So the carryover of this training and of the skills developed is greater than we have been led to suppose. Most of the surveys which have been done on the issue of subsequent private sector employment have been done a few months subsequent to the training program when many of the people have not yet been able to move into permanent, private sector jobs.

But this study, which lengthened out the period for making the survey, found that at the end of a 5-year period over 80 percent of those who had been through the training programs were in permanent, private sector employment.

Now the consequence of that placement is the individual gains self-respect and dignity which comes with having a job. He is able to support a family. And the society of course gains the contribution of the people who are working instead of being idle.

It is an enormously important objective and I commend the Senator from Ohio for his amendment and very much hope that the Senate will adopt it.

I thank the Senator for yielding.

The PRESIDING OFFICER. Who yields time?

Mr. METZENBAUM. Madam President, I yield 2 minutes to the Senator from Rhode Island.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. Madam President, I am very glad to support the amendment of the Senator from Ohio giving $300 million for job training under the Comprehensive Employment and Training Administration.

I have long been a supporter of this program. I think it has done an excellent job in most cases. There have been some instances of abuse, but in general it has done a good job and it needs and deserves to be contained.

As with so many of my colleagues, I believe a main resource in our Nation are our young people. Indeed, they may be characterized as the strength of our Nation for we will depend upon the character, their education, and their health in the future.

So far we have given them pretty short shrift in this Chamber. I am depressed at the 2-to-1 votes which are all we gave to our young people yesterday for the cause of education. Maybe we could do a little bit better this time and try to help them along with these job training amendments.

After having been chairman of the Subcommittee on Education for the past 12 years, I realize that programs of this sort take quite a lot of time to take hold. And I think that we should give them this time and should extend their life.

In addition, I hope the amendment will be passed so that we can maintain these youth programs at the local level and continue to draw upon the technical resources available in community-based organizations and local education authorities.

We all know that today, April 1, 1981, youth unemployment is at a very, very high level. In fact it is at an intolerable level. There are no jobs in our cities for family breadwinners let alone teenagers. And without these programs high school dropouts—young people with particular personal problems and the very poor—will find it ever more difficult to break into the job market and receive a "fair chance" in our society.

I am concerned that if we do away with youth programs and consolidate all the CETA training programs under one State block grant, as the administration has proposed, it would end up pitting teenagers against heads of families for available jobs.

It would be virtually impossible to design special programs necessary to target inner cities with high unemployment in order to ultimately solve this pressing problem.

I only hope the Senate will agree today to move on this program and support the Senator from Ohio in his excellent amendment.

Mr. METZENBAUM. Madam President, I yield 2 minutes to the Senator from Michigan.

Mr. RIEGLE. Madam President, I thank the Senator for yielding.

Madam President, I rise as a cosponsor of Senator METZENBAUM's amendment to restore $300 million for youth employment and training programs.

The jobless rate among the Nation's young people today stands at a published rate of 19.3 percent. I actually think it is higher than that. Unemployment levels for minority young people have reached a staggering and tragic figure of 36.7 percent. Again, I think that the real number is probably far worse even than those alarming statistics would suggest.

Despite this, the resolution before us makes deep reductions in youth training and employment programs, which will cut jobs for youth by more than 50 percent. In addition, this resolution assumes the elimination of both CETA public service jobs, programs, and 25 percent of those jobs also go to young people.

I believe that our youth employment and training programs have served us well. They have served those whose need for help is the greatest. Over 80 percent of those enrolled are economically disadvantaged. Roughly a quarter come from families on welfare. Nearly half are minorities and a substantial number are high school dropouts who otherwise would not be able to get the kind of job training they need in order to gain full-time employment. These programs are highly successful; 75 percent of their graduates go into unsubsidized jobs or back to school to complete their education.

These are not the kinds of programs which we should be cutting at this point.

Even if Senator METZENBAUM's amendment is agreed to, we will still be making significant reductions in youth employment and training programs. So while this amendment does not go as far as I would like, it is a very important step in the right direction and I urge my colleagues to join in supporting this amendment. I congratulate the Senator from Ohio for his leadership on this vital issue.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. Madam President, might I inquire of the distinguished Senator from Ohio how much more time he needs on this amendment?

Mr. METZENBAUM. I believe I have about 10 minutes remaining. Is that correct?

The PRESIDING OFFICER. Eight minutes and fifty-one seconds.

Mr. METZENBAUM. Another Senator is coming to the floor to speak and I would guess we would use pretty much the full amount of time. I am happy to yield to the distinguished Senator from New Mexico at this point.

Mr. DOMENICI. I thank the Senator. I gather, then, that the Senator hopes he can finish in the remaining time?

Mr. METZENBAUM. Yes; I do not intend to ask for additional time beyond the time originally allotted.

Mr. DOMENICI. I want to say to the Senator that unless something unusual happens, the opposition plans to use a total of 5 minutes so we will be through very shortly and then yield back to the Senator from Ohio.

Madam President, if you listen to the distinguished sponsor of this amendment and those who are in support of it, you would think that the President of the United States and the Budget Committee had ended youth employment and youth training programs in this country.

That just is not true. That just is not true.

The truth of the matter is that after we added in committee, pursuant to the Hatch amendment, $300 million in budget authority and $234 million in outlays for 1982 and $300 million in budget authority and $300 million in outlays for 1983 for youth employment training specifically. When you add the specific youth employment section of CETA with the training section of CETA, here is what you find: You find that the sum total of those programs before this recommendation for 1982 was $5.2 billion in outlays and, under the resolution, they will be $4.8 billion; $5.2 billion versus $4.8 billion. It is a $400 million difference in outlays in 1982 for training and youth employment combined, all of which is within the pre-

rogative of authorizing committee to use for precisely those purposes. And if they do, the only thing they will not do that has heretofore been done under CETA is that they will not fund public service jobs. Even the assumption of the distinguished Senator from Ohio does not purport to put money back for public service jobs under CETA.

In a nutshell, all the cruelty, all the lack of understanding for the problems of our young people, is summed up in that this program will be 92 percent of what it was before. That is it in a nutshell.

I remind Senators that this program was only invented about 7 years ago. I happen to know that, Madam President, because it was invented in my city. We did it because we could not understand how you could have six different job training programs. With the cooperation of the Dallas office, we invented CETA. We merged the job training programs under a joint agreement and we experimented with it. It worked and we sent it up here. But the CETA program we knew then is a far cry from what it is today. The problems are such that even those who invented it, the very city that invented it, have now looked at it and said, "It does not work. Strings, rules, regulations, abuses, all kinds of problems are there."

But even with all that, in the hope that the authorizing committees will restructure, will cause the good prime sponsors in this country to continue, and those who did not understand and did it poorly will have to do it better, we still left 92 percent of the training and youth employment money in 1982 and 1983, if Congress sees fit to keep it, as compared with 1981 levels.

I do not want to continue to use these cruel words, that we do not understand, that we want to throw young people out into the street. I do not want to continue to have to rebut those words. But it just is not true.

I would say, and this is not necessarily directed at the Senator from Ohio, to those who have caused America to have an economy which is floundering, inflation which is rampant, an economy which cannot produce, deficits in the past 4 years of over $200 billion, who have seen fit, because every program is wonderful, to cause America's budget to grow 16 percent a year for the last 4 years—I would submit that for all Americans, young, old, parents, schoolteachers, all of those whose cases they are supposedly advocating, what they have done to the American economy is the most cruel of all punishments. Yes, we can come down here on each program and argue how wonderful it is, and how great are the goals of each program. But the truth of the matter is that it is time to change the way we are doing business, and that is precisely what this will do.

I will say for myself and Senators like JIM MCCLURE, and others on this side, that we do not take a back seat on youth employment and youth training to anyone. We introduced one of the major acts on it 4 years ago.

I will be delighted if the authorizing committee used all of this money—you would think that there would be no funding at all after you see the tears here on the floor—$4.8 billion in outlays available to CETA, title I and the youth sections for 1982 and $4.4 billion available in 1983—for youth employment and youth training. But that is not our prerogative here on the floor. We are merely saying, "You have to cut down the authorizations to reach these levels of possible appropriation and no more."

That is all it means.

I hope that the Senators really will not believe what the distinguished Senator from Ohio is telling them here because it just is not true.

The PRESIDING OFFICER. Who yields time?

Mr. QUAYLE. Will the Senator from New Mexico yield?

Mr. DOMENICI. I am pleased to yield. How much time does the Senator desire?

Mr. QUAYLE. Five minutes.

Mr. DOMENICI. I yield.

Mr. QUAYLE. I thank my distinguished chairman for yielding me time. As usual, he is very eloquent and persuasive in his testimony about CETA or about any other particular aspect of the budget.

I did not get to hear the remarks of the Senator from Ohio, but I would like to put this amendment in perspective, Madam President.

The committee in its deliberation, and you will recall, Madam President, being a member of that committee, restored about $1 billion proposed by Senator HATCH. Of that, $300 million was earmarked for youth employment and training in this country.

I and a couple of other people joined a majority to accept that amendment. So we do have money in the reconciliation resolution targeted for youth training and employment.

Madam President, I am happy to report that the Subcommittee on Employment Productivity, which I happen to chair, has reported out an extension of the youth training employment programs in this country for 1 year so that, next year, when we have the opportunity to deal with the CETA legislation, the youth aspect will also be included. I am hopeful that the full committee will be able to take that up shortly and I hope that the House of Representatives will go along with us and we shall be able to pass that legislation. That will at least authorize the youth program so that there will not be any merit to statements that this administration or Senators on this side of the aisle are turning their backs on the young people in this country.

As the Senator from New Mexico, the distinguished chairman, pointed out, there are still $4.8 billion left in CETA; we are dealing with functional categories and not line items; and it will be up to the Committee on Labor and Human Resources to make the determination on how those moneys are going to be used. I, as somebody who is concerned about youth, will be making a continued pitch and a continued argument for the retention of youth training and employment for those young people that are truly deserving.

Madam President, I point out that the $4.8 billion that we are retaining in CETA is about 2.5 times what the original appropriation for CETA was in 1973, $2 billion. So we are not really cutting back in a period of less than 10 years. We have doubled the program as far as money, as far as the Federal Government becoming involved.

I point out another statistic, that, since the youth programs that we have now have been on the books, since 1977, the employment rate for young people has actually declined; that it is worse today than it was in 1977. There has not been any improvement; there has actually been a decline. That would suggest that perhaps there really is a need to analyze thoroughly all these programs that we have. We shall be doing that in the course of the budget process this year. We shall be doing that in the course of the authorization project this year and, more precisely, Madam President, next year, when the CETA authorization expires.

That is why, Madam President, it is my hope and my intention that we shall be able to include the young people of this country in the rewriting of that legislation next year. The arguments will come on how much money we are going to spend on youth and how much we are going to spend on adults and some will make the argument that we are going to take from one place and put it in another. But I shall say as one Senator, and I feel that I speak for a majority, that we are concerned and have a great deal of compassion and sensitivity for those young people, particularly those young people who do not have an opportunity to have training, to have employment. That is the least amount of compassion and understanding that anybody who is in public service can have.

Mr. METZENBAUM. Will the Senator from Indiana yield?

Mr. QUAYLE. I am glad to yield to the ranking minority member, the Senator from Ohio.

Mr. METZENBAUM. Will the Senator from Indiana be good enough to advise the Senate as to whether or not the original amount that had been contemplated to be renewed for youth employment was $900 million; if it is not the fact that, based upon the amendment of the Senator from Indiana, $300 million of that amount was put back in and if the amendment of the Senator from Ohio were put back in, it would be $600 million of that $900 million that was originally contemplated for youth employment?

Mr. QUAYLE. I am glad to answer the Senator from Ohio that we in the Budget Committee put back $300 million and the 1981 figure, I believe, was approximately $900 million, as the Senator from Ohio says. But I tell my colleague, my friend on the committee, that we have not made that final determination on how much money we are going to put in the youth program. There is quite an increase in the Job Corps. They may be able to take a little bit from there.

We can talk about $4.8 billion that we have in CETA, how much we are going to put in youth. This is a discussion that is going to take place in the Labor and Human Resources Committee once the budget reconciliation is passed. We have not made that line item determination yet.

Believe me, I shall be trying and I hope the Senator will be joining me in trying to get as much as possible out of those figures for youth training and employment, which I feel is very important and I believe the Senator from Ohio also believes is very important.

Mr. METZENBAUM. I do, Madam President. I appreciate the response of the Senator from Indiana that the $300 million he puts back in represents one-third of the original amount. Now I appreciate his response that there can be more forthcoming from the CETA program.

Is it not the fact that the current policy for CETA overall was $9.5 billion and the Budget Committee's recommendations for that is $4.8 billion, or approximately a cut of 50 percent, and that will make it more difficult to find money for the youth programs in the CETA programs, in view of the fact that a $4 billion whack has been taken out of that as well as a 66⅔-percent whack out of the youth programs?

Mr. QUAYLE. Madam President, I respond by saying on those numbers, the Senator is right, we have cut the CETA program, basically in the public service program. There is a difference of opinion on the committee as to whether there should be that or not. It is going to be tough to maintain all the programs, but that is what we are trying to do now, determine which one of these programs is good, which one of them is worthwhile. There is a consensus of opinion, I think, that is even developing in the U.S. Senate and the Congress that, just perhaps, some of the problems with unemployment, inflation, and high interest rates come from an overexpansive Federal Government.

I remind my colleague from Ohio that the CETA appropriation, with all these draconian cuts that we hear about, comes to $4.8 billion, which is two and a half times the appropriation we had in 1973. That is hardly emasculating a program. It is saying that we ought to be examining some of the programs, some of the efficiency, and some of the thrust that we have had in this past decade.

That is what the reconciliation motion, Madam President, is all about. That is what the election last November happened to be all about. That is why we are now charged with the very difficult responsibility of saying we are going to have less Federal money to spend. It would be nice to spend money on all these programs. I do not dispute the intent. I do not dispute the social aspect or the goals of these programs. We have simply overextended.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. QUAYLE. Madam President, I think I have concluded and I shall yield.

Mr. METZENBAUM. Madam President, I yield 3 minutes to the Senator from Massachusetts.

Mr. KENNEDY. Madam President, may I get 2 minutes off the resolution?

Mr. HOLLINGS. Yes, Madam President.

Mr. KENNEDY. Madam President, I strongly support the Metzenbaum amendment. I welcome the opportunity to cosponsor it.

I have been listening to the debate, and want to refer to an article that was recently written in the Boston Globe by David Nyhan. I shall have it printed in the RECORD.

It talks about an interview with a philosopher-scientist, Rene Dubos. Dubos is known because he has developed a tuberculosis vaccine, and is not only a very thoughtful scientist and philosopher, but also a commentator on life.

He was asked recently in an interview about his concerns and anxieties about society. He responded that his greatest anxiety, after 80 years of a marvelous life in which he developed a tuberculosis vaccine and became a leading global environmentalist, is the lack of jobs for the young.

Then Mr. Nyhan pointed out:

> We are driving them to their lairs, the Combat Zone, the variety store corners, the bowling alleys and pizza shops, the parking lots and playgrounds where they drink beer, smoke dope, and vandalize out of the sheer brute boredom of going nowhere but home to watch dumb game shows, or to arcades where they pump quarters into mindless electronic games that beep-beep and zoom-zoom them into some kind of subhuman teenaged Nirvana where their fantasies of Charlie's Angels and Loveboat seem, cruelly, to be realizable.

At the end of the article, Mr. Nyhan points out:

> We delight in putting our collective foot on the neck of the fellow lower down on the ladder. They are fat and lazy and don't work hard; they won't save or invest and use their food stamps to buy Twinkies that they gobble while watching game shows on TV, while we're out scrambling for our hard-earned bread, etc. But we are kidding ourselves if we don't conclude that in addition to doing our own job, we have to put them in jobs too. What good do our short-term advantages do us if we are robbed, assaulted or violated in some other way by young people herded by societal indifference into wolfpacks?

The PRESIDING OFFICER. The Senator's 3 minutes have expired. The Senator has 3 minutes on the resolution

Mr. KENNEDY. Madam President, with all due respect to the Senator from Indiana, the youth training programs have been meaningful and important. They have not achieved everything which we who have supported them over a long period of time had hoped for, but they have had certain successes.

We all know that high youth unemployment has continued, and is a national disgrace. But the only response we have heard so far from the administration is the subminimum pay for youth.

It is surprising to listen to those who now want to cut the heart out of the youth training program. I recall that the Republican Policy Committee, just a year ago, strongly endorsed a superb youth training program in the House of Representatives. It passed with only 50 dissenting votes. There was almost unanimity among the Human Resources Committee just a year ago. This program has generated a dedicated bipartisan effort over the entire period of time I have been in the U.S. Senate.

Now we are seeing the administration's recommendation for massive budget cuts in job training programs. The administration proposed an 80-percent reduction, and the Budget Committee a 50-percent reduction. These reductions are going to affect tens of thousands of youth who are currently in training programs.

We should recognize that there are no easy answers to youth unemployment. That was recognized by the Republican Policy Committee in the House a year ago. It has been recognized by the Human Resources Committee for years.

It is going to take the resources and the imagination not only of those of us in the House and in the Senate but also those in the private sector, in the local communities, in the schools, and in the churches in these various communities. Then, at best, we are only going to have a modest record of success.

If we think there is some magic solution, we are deluding ourselves. If we think the subminimal wage is going to be the answer to youth unemployment, we delude ourselves and the American people.

I believe that the amendment of the Senator from Ohio is important and will mean employment opportunities. If we fail to accept this amendment and to have a vigorous youth training program, I believe all society is going to pay a burden which it does not anticipate.

Mr. President, I ask unanimous consent to have printed in the RECORD an article from the Boston Sunday Globe of March 1, 1981.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE PRICE OF YOUTH JOBLESSNESS

(By David Nyhan)

The single best move to improve the quality of life in Massachusetts would be to create jobs for the youthful unemployed of the underclass.

It would not only help the poor, it would ease the tension between the poor and the rest of us. It would lower taxes, improve the economy, and slow the seepage of wealth in terms of welfare, police, court and prison costs.

It makes so much sense, it's too obvious. Why hasn't it been done? Partly because young people won't take many of the lesser jobs that are around. Many have unrealistic ideas about how much they are worth; they turn their noses up at jobs paying the minimum wage of $3.35 an hour, when the average hourly wage for all workers in the state is about $6.13. But it's also because the system has built-in advantages for some sectors, giving financial institutions, employers, unions, and other special interest groups advantages they wish to perpetuate. What's changing that system, in a way that shuffles the existing deck?

Plenty. President Reagan's budget cutbacks eliminate or trim back some CETA job programs, welfare benefits, food stamps and

other schemes. Proposition 2½ means still further cutbacks here.

Massachusetts' low unemployment rate (5.2 percent in January vs. 7.4 percent nationwide) means there are comparatively fewer adults looking for jobs. But the biggest emotional shift may come from our crime epidemic that has turned our society into a fear-ridden, gun-toting, violence-prone state that may just be ready for drastic and innovative change.

Philosopher-scientist Rene Dubos said on public television last Sunday: "Human beings never stand still in front of a situation which threatens them—if they understand the consequences." Fear of crime has become so threatening that an aroused public could force our political leaders to shift the gears needed to create more jobs for young people. By and large, politicians don't lead, they follow public pressure.

Dubos said his greatest anxiety, after 80 years of a marvelous life in which he developed a tuberculosis vaccine and became a leading global environmentalist, is the lack of jobs for the young. Welfare states fall short, he said, because it is not enough to feed and entertain young humans; they need the finishing touches of socialization from work to turn them into worthwhile and contributing adults.

The same day Bill Moyers broadcast Dubos, the Sunday Globe carried 63 full pages of help-wanted advertising, something like 2600 employers offering literally thousands of jobs. Many were in the bustling computer industry, for which this state is the mother lode. There were ads from employers in 26 other states and the District of Columbia, many of them trying to entice computer-skilled people to migrate.

We are sitting atop our own Gold Rush here. The High Technology Council predicts 61,000 more jobs in the field over the next three years. But half of them will require college degrees in science. And the school systems are not educating many young people to take even entry-level jobs. Dr. An Wang of Wang Laboratories starts his own computer school to educate help for his burgeoning business. Insurance companies like John Hancock and Continental start their own schooling programs to train workers.

Public education crumbles under Proposition 2½, union problems, shoddy management. Boston, charging taxpayers $3900 per year per pupil, threatens to shut down a quarter of its elementary schools to stay afloat. The kids who need the public schools most are the ones who are marginal, who may not make it into becoming productive members of society. They read the headlines (if they can or do read headlines) saying Boston schools will shut down in March. Is that any incentive to do homework, or pass up the chance to play hooky?

We are driving them to their lairs, the Combat Zone, the variety store corners, the bowling alleys and pizza shops, the parking lots and playgrounds where they drink beer, smoke dope, and vandalize out of the sheer brute boredom of going nowhere but home to watch dumb game shows, or to arcades where they pump quarters into mindless electronic games that beep-beep and zoom-zoom them into some kind of subhuman teenaged Nirvana where their fantasies of Charlie's Angels and Loveboat seem, cruelly, to be realizable.

We may find more jobs created for young people by Reagan's plan for urban enterprise zones, with tax incentives for the private sector to create more jobs in declining cities. For 1979, about 15 percent of Massachusetts teens between 16 and 19 who were looking for work did not find it.

Providing jobs for the underclass, or persuading some of them to take existing jobs, is the best thing we can do. It is not just the right thing to do for them. It is right for the 2.7 million of us already working in Massachusetts. We will save money in terms of police, courts, jail. We will reduce the sense of real threat or vague foreboding that is so pervasive. Welfare costs will fall, unemployment compensation would drop, and drug abuse, alcoholism, depression, violence against wives and children, will decline.

A Johns Hopkins scholar studied the 1.4 percent rise in the national unemployment rate in 1970 and tracked the social cost it added on over the next five years: 26,000 stress-related deaths from heart, kidney disease and strokes; at least 1500 suicides and over 1700 homicides. You have to guess for yourself how many muggings, drunken brawls, child molesting cases, battered wives, assaulted policemen and stolen cars might be thrown in.

We delight in putting our collective foot on the neck of the fellow lower down on the ladder. They are fat and lazy and don't work hard; they won't save or invest and use their food stamps to buy Twinkies that they gobble while watching game shows on TV, while we're out scrambling for our hard-earned bread, etc. But we are kidding ourselves if we don't conclude that in addition to doing our own job, we have to put them in jobs too. What good do our short-term advantages do us if we are robbed, assaulted or violated in some other way by young people herded by societal indifference into wolfpacks?

When we are sufficiently threatened, Rene Dubos instructs, we will act. Does anybody honestly believe we are not sufficiently threatened?

Mr. METZENBAUM. I thank the Senator from Massachusetts.

Madam President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. METZENBAUM. Madam President, I yield 3 minutes to the distinguished Senator from New York.

Mr. MOYNIHAN. I thank the Senator from Ohio.

Madam President, I speak in the context of comments that have been made several times on this floor about what we are doing in this budget resolution.

It happens that I was Assistant Secretary of Labor in 1962 when the U.S. Government, under President Kennedy, adopted the original Employment Development Training Act of 1962.

In that year, the first manpower report from the President was sent to Congress, as provided by the Manpower Act; and there was a formal undertaking by our Government that we would maintain a sustained concern for insuring satisfactory levels of training and employment, especially among youth.

What the Senator from Massachusetts has said is entirely reflective of that commitment in 1962. It was the first time in the long postwar prosperity that we realized that we had learned to make the American economy grow at great rates, but we had not solved the problem of unemployment; that we had levels of unemployment higher than in any of the other industrial nations, much higher that we thought acceptable. At that time, there was sharp disagreement in the Council of Economic Advisers about the acceptability of setting an interim goal of 4 percent for unemployment rates. We are now at a point where we cannot meet national goals of 6 percent or 7 percent, and nowhere is this failing more extraordinary than among youth.

We have not found jobs for the young people of this country. We have not found them in periods of growth. We have not found them in periods of relative recession.

The one thing we have been learning, painfully, but with some considerable success, is to make our training programs work and to bring about that connection between childhood and adulthood which is joining the labor market.

To back away from that commitment now would be a deep mistake. It moves against the very purpose of the administration, which none of us would fail to support, of economic growth, of investments, and productivity. We cannot strengthen our economy without investing in our single most important resource, our labor force.

I congratulate the Senator from Ohio. I appreciate his yielding time to me.

(Mr. ANDREWS assumed the chair.)

Mr. METZENBAUM. Mr. President, I yield myself the remainder of my time.

I appreciate the frankness and the candor with which the distinguished chairman of the subcommittee, the Senator from Indiana, responded, because I believe it puts to rest the point that was suggested by my friend from New Mexico, who seems to indicate that 92 percent of the money for youth employment was now going to be available. That just is not so. It will be one-third under the original Quayle amendment, which will be one-third of the amount that the Labor and Human Resources Committee recommended; and with my amendment adopted, it would amount to two-thirds.

I believe that the Senator from New Mexico is reflecting his own sensitivity on this entire subject, and well he might, because he talked about whether or not it was cruel to do this to young people who would not now be able to participate in the youth employment program.

I find that particularly interesting, because the Senator from Ohio had not seen fit to use that term today. But if the adjective fits, I am willing to accept it, if he feels it is appropriate, and I am not prepared to challenge him on that point.

As to the question of this whole program, I believe that the issue is this: What is good for the young people of America, and what is good for America generally?

Senator KENNEDY quoted an article in the Boston Globe on the impact that youth unemployment will have on the Nation. I will read a portion of that article, which he did not have an opportunity to read in its entirety because of the limitation of time.

> Providing jobs for the underclass, or persuading some of them to take existing jobs, is the best thing we can do. It is not just the right thing to do for them. It is right for the 2.7 million of us already working in Massachusetts. We will save money in terms of police, courts, jail.

Mr. President, on behalf of the Senator from Massachusetts I ask unanimous consent that the entire article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Boston Globe, Mar. 1, 1981]

THE PRICE OF YOUTH JOBLESSNESS

(By David Nyhan)

The single best move to improve the quality of life in Massachusetts would be to create jobs for the youthful unemployed of the underclass.

It would not only help the poor, it would ease the tension between the poor and the rest of us. It would lower taxes, improve the economy, and slow the seepage of wealth in terms of welfare, police, court and prison costs.

It makes so much sense, it's too obvious. Why hasn't it been done? Partly because young people won't take many of the lesser jobs that are around. Many have unrealistic ideas about how much they are worth; they turn their noses up at jobs paying the minimum wage of $3.35 an hour, when the average hourly wage for all workers in the state is about $6.13. But it's also because the system has built-in advantages for some sectors, giving financial institutions, employers, unions, and other special interest groups advantages they wish to perpetuate. What's changing that system, in a way that shuffles the existing deck?

Plenty. President Reagan's budget cutbacks eliminate or trim back some CETA job programs, welfare benefits, food stamps and other schemes. Proposition 2½ means still further cutbacks here.

Massachusetts' low unemployment rate (5.2 percent in January vs. 7.4 percent nationwide) means there are comparatively fewer adults looking for jobs. But the biggest emotional shift may come from our crime epidemic that has turned our society into a fear-ridden, gun-toting, violence-prone state that may just be ready for drastic and innovative change.

Philosopher-scientist Rene Dubos said on public television last Sunday: "Human beings never stand still in front of a situation which threatens them—if they understand the consequences." Fear of crime has become so threatening that an aroused public could force our political leaders to shift the gears needed to create more jobs for young people. By and large, politicians don't lead, they follow public pressure.

Dubos said his greatest anxiety, after 80 years of a marvelous life in which he developed a tuberculosis vaccine and became a leading global environmentalist, is the lack of jobs for the young. Welfare states fall short, he said, because it is not enough to feed and entertain young humans; they need the finishing touches of socialization from work to turn them into worthwhile and contributing adults.

The same day Bill Moyers broadcast Dubos, the Sunday Globe carried 63 full pages of help-wanted advertising, something like 2600 employers offering literally thousands of jobs. Many were in the bustling computer industry, for which this state is the mother lode. There were ads from employers in 26 other states and the District of Columbia, many of them trying to entice computer-skilled people to migrate.

We are sitting atop our own Gold Rush here. The High Technology Council predicts 61,000 more jobs in the field over the next three years. But half of them will require college degrees in science. And the school systems are not educating many young people to take even entry-level jobs. Dr. An Wang of Wang Laboratories starts his own computer school to educate help for his burgeoning business. Insurance companies like John Hancock and Continental start their own schooling programs to train workers.

Public education crumbles under Proposition 2½, union problems, shoddy management. Boston, charging taxpayers $3900 per year per pupil, threatens to shut down a quarter of its elementary schools to stay afloat. The kids who need the public schools most are the ones who are marginal, who may not make it into becoming productive members of society. They read the headlines (if they can or do read headlines) saying Boston schools will shut down in March. Is that any incentive to do homework, or pass up the chance to play hooky?

We are driving them to their lairs, the Combat Zone, the variety store corners, the bowling alleys and pizza shops, the parking lots and playgrounds where they drink beer, smoke dope, and vandalize out of the sheer brute boredom of going nowhere but home to watch dumb game shows, or to arcades where they pump quarters into mindless electronic games that beep-beep and zoom-zoom them into some kind of sub-human teenaged Nirvana where their fantasies of Charlie's Angels and Loveboat seem, cruelly, to be realizable.

We may find more jobs created for young people by Reagan's plan for urban enterprise zones, with tax incentives for the private sector to create more jobs in declining cities. For 1979, about 15 percent of Massachusetts teens between 16 and 19 who were looking for work did not find it.

Providing jobs for the underclass, or persuading some of them to take existing jobs, is the best thing we can do. It is not just the right thing to do for them. It is right for the 2.7 million of us already working in Massachusetts. We will save money in terms of police, courts, jail. We will reduce the sense of real threat or vague foreboding that is so pervasive. Welfare costs will fall, unemployment compensation would drop, and drug abuse, alcoholism, depression, violence against wives and children, will decline.

A Johns Hopkins scholar studied the 1.4 percent rise in the national unemployment rate in 1970 and tracked the social cost it added on over the next five years: 26,000 stress-related deaths from heart, kidney disease and stroke; at least 1500 suicides and over 1700 homicides. You have to guess for yourself how many muggings, drunken brawls, child molesting cases, battered wives, assaulted policemen and stolen cars might be thrown in.

We delight in putting our collective foot on the neck of the fellow lower down on the ladder. They are fat and lazy and don't work hard; they won't save or invest and use their food stamps to buy Twinkies that they gobble while watching game shows on TV, while we're out scrambling for our hard-earned bread, etc. But we are kidding ourselves if we don't conclude that in addition to doing our own job, we have to put them in jobs too. What good do our short-term advantages do us if we are robbed, assaulted or violated in some other way by young people herded by societal indifference into wolfpacks?

When we are sufficiently threatened. Rene Dubos instructs, we will act. Does anybody honestly believe we are not sufficiently threatened?

INVESTING IN A PRODUCTIVE WORK FORCE

Mr. ROBERT C. BYRD. Mr. President, I believe there is a shortsighted view implicit in many of the budget cuts in education, unemployment, training, and economic development programs proposed in this reconciliation bill.

Senators may disagree as to the effectiveness of many of these programs. However, we should recognize that, while many of the programs may be justifiably reduced or eliminated, the real economic problems they were designed to address will not disappear.

Reducing current Department of Labor commitments to training from $9.5 to $4.6 billion, as contemplated in the reconciliation resolution, will not reduce the growing population of publicly dependent youth and adults.

Programs may disappear but our economic problems will not. According to the Congressional Budget Office, every 1-percent increase in the rate of unemployment can add anywhere from $20 to $30 billion to the Federal deficit in the form of lost revenues and uncontrollable income maintenance costs.

According to a recent Department of Labor study, the general skill level of the American labor force has fallen dramatically while the skill levels of competitor nations have been rising. The Conference Board reports that 35 percent of private sector companies now must provide remedial instruction in reading, writing, and arithmetic. Moreover, while it is true that the American economy is providing a remarkable number of new jobs every year, it is also evident from analysis of those jobs that they are concentrated in low-skill, low-wage occupations.

The gap between available skill jobs and skilled workers is increasingly evident. We see more and more statistics that demonstrate severe skill shortages among American workers. In a statement to the press, on March 16, the President noted that he had found 33½ pages of want ads in the Sunday, March 15 Washington Post. The President seemed to imply that people prefer unemployment to those listed jobs. According to the American Vocational Association, closer analysis reveals that at least 1,900 of the advertised jobs required some specialized institutional training. Approximately 85 percent required institutional training of 1 year or more.

There is little need to reiterate the litany of all-too-familiar statistics on the depressed state of American productivity. I would proffer one observation, however: Many claim that American economic preeminence in the 1940's and 1950's occurred without supporting policies and programs. They argue that policies to encourage productivity are therefore not necessary now. First, I would respond that changes in both our national economy and the success of our competitors argue against that view. Second, and more importantly, I would point out that even if we succeed in recreating the so-called golden age of American productivity growth, that would be insufficient, over the long run, to keep up with our international competitors.

In the golden age of American productivity our rate of productivity increase averaged 3.2 percent. Our competitors have consistently more than doubled that rate. The past is not good enough: We need policies and programs that promote a productive and mobile labor force if we are to maintain our economic preeminence.

In addition to cuts in education and training programs, the proposed reconciliation bill eliminates over 20 percent of economic development spending. I would caution my colleagues that geographic imbalances in growth and decline are accelerating at alarming rates.

Finally, we may all agree that the current trade adjustment program provides too much income maintenance and too little retraining and relocation. Retraining and relocation policies remain necessary, however, if we are to avoid rampant protectionism. Moreover, such cuts seem doubly unwise at a time when massive new budgetary commitments in defense and energy spending will create shortages of skilled labor in some regions while experienced workers remain underutilized in declining areas. Some kind of training and retraining policies would seem to make sense in an economy that is simultaneously experiencing manpower shortages and a general geographic mismatch between work opportunities and available workers.

It should be clear that I do not necessarily support continued funding for every education, employment, training and economic development program scheduled for cuts or elimination in this reconciliation bill. I do support the continuing commitment of Federal resources to remedy our current economic malaise.

I do not take issue with critics who point out that, as presently written, some of these programs provide more make work than meaningful work. But we cannot create programs that will work without budgetary commitment. We do need new policies that encourage productivity and economic growth. But these policies cannot be implemented without available budgetary resources.

I caution my colleagues that short-term economies in our investment in a productive work force are illusory. The alternative to employment and training policies targeted on the employability of the disadvantaged is greater public dependency and ever higher income maintenance costs. The alternative to policies that retrain and relocate experienced workers is a wasting away of our experienced work force. The alternative to effective education policies is a continued decline in the skill level and productivity of the American work force. The alternative to effective economic development policies is an acceleration of the current imbalances in area development.

I support this amendment as one that allows us to carry forward our commitment to the resolution of our economic problems.

● Mr. LEVIN. Mr. President, I rise in support of Senator METZENBAUM's amendment to restore funds for youth employment and training programs. This would result in a CETA youth and training program for fiscal year 1982 that is still only two-thirds the size of the program in the current fiscal year. Given the high unemployment rate in that age group, it is clear to me that we are moving in the wrong direction by reducing the program at all. However, this amendment is an effort to restore part of a valuable program.

The youth community conservation and improvement projects (YCCIP) and the youth employment and training programs (YETP) are the CETA youth programs which will benefit if this amendment is accepted. These are successful programs. They do what they are supposed to accomplish. Young adults with few skills are brought into these programs, given skills and provided with an opportunity to be self-sufficient and contributing citizens. That is what youth employment and training programs are all about—a chance for a young person from a disadvantaged background to maximize his or her potential. The program is not aimed at providing permanent employment but rather getting young people ready for the private sector. Employers have told me that what we need are programs to prepare people for the marketplace. Productivity, which many of us are rightly concerned about, is affected by the skills and work habits young people develop. The YCCIP and YETP programs excell in helping youth prepare for the adult job world. We cannot turn our backs on the productivity issue and how it is linked with these programs.

Finally, as we all know, unemployment among young persons is a serious problem in our society. It has been with us for a number of years and it has to be addressed. In the United States for 1980, the rate for 16- to 19-year-olds was 19.3 percent. In my home State of Michigan in 1980, the statewide average for 16- to 19-year-olds was 20 percent; in the fourth quarter of 1980 it was 22 percent. In Detroit, youth unemployment can only be called a catastrophe. The average rate in 1980 was 39 percent.

We need more dollars of the CETA youth programs. This amendment will be a step in the right direction.●

Mr. METZENBAUM. Mr. President, let me conclude my remarks in connection with this amendment.

The cut is wrong. It is harmful to young people. It is wrong for the future of America. I hope that this Senate sees fit to add back the additional $300 million which would still leave the youth employment programs in this country $300 million short.

I am prepared to vote.

Mr. EAGLETON. Vote.

The PRESIDING OFFICER. Is all time yielded back?

Mr. DOMENICI. Mr. President, I merely wish to apologize to the Senator if he did not use "cruel" today. If he did not it is the first time he did not in addressing these cuts, but I do apologize if he did not use it today.

Mr. QUAYLE. Mr. President, will the Senator yield 1 minute?

Mr. DOMENICI. I yield.

Mr. QUAYLE. Mr. President, I wish to set something correct or at least make a statement we can argue about.

On the youth training aspect, the Senator from Ohio is right. If we accept these numbers there is going to be more of a cutback. But if we talk about adding summer youth employment and Job Corps to that the total reduction for youth is about one-seventh. So we are talking about a very narrow category.

I wish to support precisely what my chairman said, and I add he is pretty close when he said we really did not cut that as far as the total youth employment is concerned because the Job Corps was increased and the summer youth employment was kept at the current level.

I thank my chairman for yielding.

The PRESIDING OFFICER. All time is yielded back.

The question is on agreeing to the amendment of the Senator from Ohio.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from West Virginia (Mr. RANDOLPH) and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I further announce that, if present and voting, the Senator from West Virginia (Mr. RANDOLPH) would vote "yea."

The PRESIDING OFFICER. Are there Senators in the Chamber who have not voted?

The result was announced—yeas 24, nays 74, as follows:

[Rollcall Vote No. 61 Leg.]

YEAS—24

Biden	Eagleton	Levin
Bradley	Ford	Matsunaga
Bumpers	Glenn	Metzenbaum
Burdick	Hart	Moynihan
Byrd, Robert C.	Huddleston	Pell
Chiles	Inouye	Riegle
Cranston	Kennedy	Sarbanes
Dodd	Leahy	Tsongas

NAYS—74

Abdnor	Goldwater	Murkowski
Andrews	Gorton	Nickles
Armstrong	Grassley	Nunn
Baker	Hatch	Packwood
Baucus	Hatfield	Percy
Bentsen	Hawkins	Pressler
Boren	Hayakawa	Proxmire
Boschwitz	Heflin	Pryor
Byrd, Harry F., Jr.	Heinz	Quayle
Cannon	Helms	Roth
Chafee	Hollings	Rudman
Cochran	Humphrey	Sasser
Cohen	Jackson	Schmitt
D'Amato	Jepsen	Simpson
Danforth	Johnston	Specter
DeConcini	Kassebaum	Stafford
Denton	Kasten	Stennis
Dixon	Laxalt	Stevens
Dole	Long	Symms
Domenici	Lugar	Thurmond
Durenberger	Mathias	Tower
East	Mattingly	Wallop
Exon	McClure	Warner
Garn	Melcher	Weicker
	Mitchell	Zorinsky

NOT VOTING—2

Randolph	Williams

So Mr. METZENBAUM's amendment (UP No. 38) was rejected.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 39

(Purpose: To restore funds for the National Science Foundation, trade adjustment assistance, Conrail, and mass transit)

Mr. BRADLEY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from New Jersey (Mr. BRADLEY) for himself, Mr. BIDEN, Mr. MOYNIHAN, Mr. GLENN, and Mr. KENNEDY, proposes an unprinted amendment numbered 39.

Mr. BRADLEY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with "$14,667,000,000" in line 14, strike out through "$47,694,000,000" in line 20 and insert in lieu thereof the following: "$14,585,000,000, and outlays by $2,318,000,000, in fiscal year 1981, to reduce budget authority by $52,022,000,000, and outlays by $36,681,000,000, in fiscal year 1982; and to reduce budget authority by $58,263,000,000, and outlays by $46,970,000,000".

On page 2, beginning with "$13,300,000,000" in line 24, strike out through "$1,800,000,000 on page 3, line 1 and insert in lieu thereof the following: "$13,218,000,000 in budget authority and $1,465,000,000 in outlays for fiscal year 1981; by $3,169,000,000 in outlays for fiscal year 1982; and $1,789,000,000".

On page 5, beginning with "$15,460,000,000" in line 4, strike out through "$2,274,000,000" in line 7 and insert in lieu thereof the following: "$14,910,000,000 in budget authority and $908,000,000 in outlays for fiscal year 1982; and $17,812,000,000 in budget authority and $10,854,000,000.".

On page 5, beginning with $1,558,000,000" in line 23, strike out through "$1,328,000,000" on page 6, line 2, and insert in lieu thereof the following: "$1,458,000,000 in budget authority and $784,000,000 in outlays for fiscal year 1982; and $1,398,000,000 in budget authority and $1,128,000,000".

On page 7, beginning with "$96,000,000" in line 24, strike out through "$132,000,000" on page 8, line 2, and insert in lieu thereof the following: "$21,000,000 in budget authority and $37,000,000 in outlays for fiscal year 1982; and $39,000,000 in budget authority and $57,000,000".

On page 10, beginning with "$2,388,000,000 in line 5, strike out through "$10,913,000,000" in line 9 and insert in lieu thereof the following: "$2,306,000,000 in budget authority and $379,000,000 in outlays for fiscal year 1981; $10,225,000,000 in budget authority and $7,889,000,000 in outlays for fiscal year 1982; and $12,273,000,000 in budget authority and $10,854,000,000.".

Mr. BRADLEY. Mr. President, the amendment before the Senate at this time addresses four areas: Conrail, mass transit, the National Science Foundation, and the experienced-worker-training program.

Mr. President, I would like to pause before getting to the specifics of the amendment and address the more general question of the budget that has been proposed by the Reagan administration and the economic assumptions that lie behind that budget.

Mr. President, the administration's budget predicts that growth will go from a 1.5-percent level in 1981 to a 4.5-percent level in 1982; that inflation will drop to 7.2 percent in the fourth quarter of 1982; that unemployment will drop to 7.2 percent in 1982; and that the cost of money that the Government will pay to finance the deficit will be 8.9 percent in 1982.

Mr. President, there have been a number of economists throughout the country who have questioned the assumptions of this budget and have posed the possibility that, instead of generating vast economic growth, this country instead might be saddled with a rather viral case of demand inflation.

Mr. President, after looking carefully at the econometric models that have been offered by Wharton, Data Resources and Chase Econometrics, I inquired further and discovered that all of those econometric models have assumed that the administration does not get its full program. They have assumed either that Kemp-Roth is not fully endorsed and enacted, or that all the budget cuts are not passed, or that the money supply levels will not be what the President's budget assumes.

So, Mr. President, in a letter to the Joint Economic Committee, I requested that they run on their model a simulation which would assume the full Kemp-Roth, the full budget cuts both this year and in outyears, and the money supply figures that are included in the President's budget.

Mr. President, I will have to say that the results were even astounding to this Senator who began as somewhat doubtful. We received those results 2 days ago and released them today publicly.

For the Senate's information, the administration program—tax cuts, budget cuts, and money supply figures—if enacted according to the Joint Economic Committee's model, which uses the Data Resources model of the economy, would produce in 1984 not a balanced budget, Mr. President, but a deficit of $111 billion—$111 billion. Growth, while increasing slightly in 1982, would return to a stagnant level in 1984. Inflation would still be in the area of 8 percent and unemployment would still hover in the mid-7-percent range.

So, Mr. President, this budget that we are dealing with, if enacted, is only part of the problem, because the remaining problem has to do with the money supply. There is no way that, given the level of increase in money supply that the administration has assumed, the economy will be able to grow at a 4.5-percent rate in 1982 and beyond. No way, Mr. President.

The result of this request to the Joint Economic Committee clearly conveys that we are heading down a path fraught with danger unless something gives, Mr. President, unless the money supply figures are not as stringent as the administration assumes. If that is so, we will have much higher inflation; the money supply figures have to be low because interest rates will be high. If that does not go, Mr. President, then you have to look at the budget area.

Mr. President, it is unlikely that we are going to cut the budget less than the President would like to cut the budget. So the only area that remains for consideration in connection with these budgetary assumptions and their probable result is the tax area, Mr. President. In the tax area, the administration has committed itself to a policy which even economists of the vein of Arthur Burns think is a disastrous policy, but one which, combined with the budget and money supply figures, will produce not a balanced budget in 1984, but a budget deficit of $111 billion. Nor does that figure include any shocks to the economy that would increase inflation and, therefore, the budget deficit further. That figure does not include what a deficit of that amount might mean for inflationary expectations, a word that we have heard so often in the past several weeks.

But it should be food for thought for those individuals who were proceeding pellmell toward a full enactment of the Kemp-Roth tax cut.

So, Mr. President, I begin this discussion with that word of caution based upon a report from the Joint Economic Committee today.

I now turn to the fact that a budget is not a 1-year document, and the reconciliation bill we are dealing with today clearly establishes that. It sets a direction for future policy. It sets a direction in many areas, Mr. President.

The debate on the Senate floor, I think, is a debate about how we get this economy back on the path of economic growth. On one side of the aisle you have the proposition that we simply cut the budget and cut taxes and there will be an enormous outpouring of savings, harder work, investment in the economy. From that, like a coiled spring, the economy will unloosen and grow at unprecedented rates.

Mr. President, I think that this is an analysis that is locked into the status quo, that is not future oriented, and that, instead, is simply a managerial budget with goodies on the side to try to bring people along to support a stringent budget policy, the goodies being the tax cut.

Mr. President, I would like to see if we can reach a consensus among Republicans and Democrats that if we are going to get the country back on the path of economic growth, we will need more than simply to stimulate investment in plant and equipment, investment in the private sector. This Senator will not argue with that. This Senator supported the bill out of the Finance Committee last year that had very significant incentives for private investment and the rebuilding of America. I think that is important.

But, Mr. President, I do not think that is sufficient. Necessary, but not sufficient. There are other kinds of investment.

Another kind of investment is the investment in the economic infrastructure in this country.

If you look at the next decade and you say, "We have to increase our exports," the greatest potential for export is coal. But today you cannot get the coal from the coalfields to the ports for export because there are no railroads and there are no ships that would take large quantities of coal to make the export of coal to our advantage.

Mr. President, investment also includes human capital. Investment includes making sure that the work force of the 1990's is skilled, has a stake in the economy, understands the competitive forces that swirl around the world, and is willing to work and make the commitment to make America the most competitive country and the most successful country in the world economy and world trade.

In this budget investment means simply investment in plant and equipment, but I believe it should mean investment in plant and equipment, in railroads, in infrastructure, and in human capital.

Underlying that kind of commitment to investment should be a basic commitment to research and development. If you look at the next 10 years and you assume we are going to be competitive, you have to maintain your comparative

advantage. The only way you maintain your comparative advantage is by making sure that you are on the cutting edge of change with research and development.

Mr. President, with that general framework, I am offering today an amendment which embodies three of the areas I have just discussed. One area is infrastructure. I am proposing in this amendment to place back into the budget $100 million for Conrail and $50 million for mass transit in fiscal year 1982.

Mr. President, if we are going to bring that coal to the ports for export, if we are going to do that in the next 5 years, we cannot be involved in an endless dispute over private takeover from the Conrail system; we cannot be engaged in a dispute that will only lead to interruptions in commuter service and in freight service that will only lead to higher State taxes or exorbitantly higher fees for freight service or both.

Mr. President, the Conrail portion of this amendment is consistent wtih the idea that the role of the Government budget is to encourage and provide for investment in the economic infrastructure of this country that will promote exports.

Mr. President, turning to mass transit, it makes no sense to drive people out of mass transit facilities and into automobiles using more expensive foreign oil and making us more and more dependent on that foreign oil. Let me assure you, that is what will happen if the mass transit systems of this country come to a screeching halt. Where they do not come to a screeching halt, the increase in price will nevertheless create a grid-lock situation in many urban areas of this country where the roads are so jammed with cars that you have traffic coming to an enormous and very rapid stop.

The third part of this amendment deals with training experienced workers.

Mr. President, a few sobering facts for the Senate's consideration as we embark upon the decade of the 1980's where comparative advantage will be so paramount to restoring our competitive health and our economic growth:

The U.S. share of skilled labor in the world dropped from 29 percent in the 1960's to 26 percent in 1975. The United States fell from second in skilled labor endowment to seventh worldwide.

U.S. imports of skill-intensive manufactured goods have increased. U.S. exports of such goods since the 1960's have been on a dramatic decrease.

Mr. President, if we are going to restore our productivity in this country, if we are going to be competitive internationally, if we are going to have economic growth, we have to have skilled workers.

There are two approaches to trying to assure that our workers are skilled. One is to make sure that the young people of this country will be ready to do their job in the 1990's when we have a labor shortfall. Another way is to make sure that those workers who lose their jobs because of the loss of competitiveness to foreign enterprise have the opportunity to be retrained and have the opportunity to work in enterprises where, in the 1990's, there will be a U.S. comparative advantage.

The fourth part of this amendment, Mr. President, deals with the National Science Foundation.

Mr. President, this amendment would restore only $39 million in outlays for the National Science Foundation. Mr. President, if you agree that research and development underlies our competitive advantage and, therefore, our growth potential in the 1990's, then it makes no sense to cut funding for the instrumentation grants from all the laboratories in universities across this country that will give an opportunity for our future scientists to be trained on the latest scientific equipment. It makes no sense to cut out fellowships for those in the physical sciences who are the keenest students of today and will make the breakthroughs of the future.

Mr. President, the amendment that is now before the Senate is really a framework amendment. It is an amendment that addresses the question of research and development; it is an amendment that addresses the question of making sure that we make an investment in human capital; and it is an amendment that addresses our need for a sound infrastructure. Why, Mr. President? So that this country can get back on the path of economic growth and our confidence in the future can again soar. We do this by beginning from a sound foundation with a steady upward ascent and not by buying a lot of untested assumptions in a budget which, when put to the test in an econometric model, will produce a deficit of over $100 billion in 1984.

I am pleased to yield to my colleague from Delaware.

Mr. BIDEN. Mr. President, as a cosponsor of this amendment, I should like to speak briefly to it and preface my remarks by pointing out that I acknowledge: First, that there is not sufficient time to debate adequately all aspects of this amendment because I recognize the time constraints; and second, that the budget process may not be—in fact is not—the best forum within which to raise this debate.

Mr. MOYNIHAN. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator from New York is correct. The Senate will be in order.

Mr. BIDEN. But, as it is not popular to suggest, it is the only game in town right now.

Mr. President, let me say, at the expense of possibly offending some of my colleagues on both sides of the aisle. I think our debate on economic policy this past year—past several years—is similar to our debate on foreign policy in that the two primary schools of thought involved in the debate are equally wrong.

I acknowledge, in the area of domestic economy, that our Republican colleagues have come up with something while not new is different from what has been offered heretofore. It seems to me that, when you strip everything away, Ronald Reagan is being very, very honest, direct, and blunt with the American people. He is saying that the way—to use a phrase that was used last year—to reindustrialize America, increase productivity, make us more competitive, and increase the living standard of the American people which in turn will reduce inflation and unemployment—is to shed the policy that has been, in my opinion, part and parcel of at least a large portion of my party. That policy was to try more and more to plan the economy: The Government would play a larger role in planning the economy to accomplish those ends.

He says that does not work. But he goes a step farther and says the real answer here is to get government out of the business of being involved with the economy. He found a young disciple or apostle, about my age, who is now the Director of the OMB, who articulates his position, I think, extremely well. It says not only get government off our back in the areas that we do not want it, but get government out of the business of trying to help put the economy back on its feet.

It goes a few steps farther than that. It suggests that the real answer to all our problems, our energy problem, for example, is to leave the business of energy to the energy companies, period. He says with regard to our problems that relate to unemployment, "We have an answer: just leave the business of unemployment to the employers other than government." And he goes on in various other areas.

My Democratic colleagues—I think many—have somewhat missed the boat here. We, up to now, have been arguing about whether or not we are going to increase or decrease a program which is designed to give people a sustenance that allows them to continue a living standard that we think is worthwhile in this country, or minimal. Most of the alternatives offered by the Democrats have not been ones that go to the heart of the problem. Unemployment insurance does not do much about productivity; it does not do much about structural unemployment. The WIC program, although essential, does not do a great deal about productivity or employment. And we go on and make the arguments based upon the old social programs, whether we are for them or against them.

I think the way in which the Bradley amendment departs from this debate is that it says that there is a role that government can, should, and must play, along with private enterprise and along with labor, in order to see to it that we deal with the basic structural problems of productivity, unemployment, inflation, and all the major problems that face the economy today.

There are some very legitimate criticisms of existing programs that the Reagan administration has made. There are some very legitimate criticisms that the chairman of the Committee on the Budget has made and shepherded through this budget process thus far. As a matter of fact, out of something in excess of $40 billion worth of cuts the President is offering, I can support close to $40 billion of those cuts. But it seems to me that we are making a

drastic mistake when we deny Government a role in helping us and helping the free-enterprise system lead us out of our dilemma.

It seems to me to make no sense at this moment for the U.S. Congress to be going on record cutting research and development. We hear, time and again, the arguments about how new technology will save us. We hear, time and again, arguments that we must be more competitive with the Japanese, with the Germans, and on and on.

Well, Mr. President, where is this going to come from? Does not Government have a little bit of a role to play? Does it not make sense for us to fund the National Science Foundation, at least minimally? Does it not make sense for us to encourage those minds on university campuses and in businesses with the help of Government, to find some of the answers? Does it not make sense for us, before we dismantle a rail system that is the second largest in the Nation and the rail system which an area of the country where 40 percent of the manufacturing capacity of this country is located, to figure out what is going to happen to the economy before we do that?

This administration seems not to share that view. Does it not make sense, as this administration acknowledges, as there are major shifts in population trend, major movements in this country with regard to the location of industries, to take the best of the skilled workers in America who have lost their jobs because we have lost our competitive edge, and retrain those best technical minds to do other jobs?

Does it not make sense to give an auto worker a chance to be a roughneck in an oil rig? What are we going to do with these people?

What Senator BRADLEY and I are suggesting—is in order to achieve our economic recovery and the new markets, new skills, and the solid infrastructure which are so important requires a little bit of help, not from Mother Nature, but from Government. Government should be a partner in this process.

It seems to me that what we have done is cast this debate in terms of safety nets and holes in safety nets rather than building new floors, new walls, and new ceilings to house a new economy that makes us competitive into and through the 21st century.

That is why I am joining with Senator BRADLEY to offer this amendment which will restore small amounts of funding for certain Federal activities that are important to achieving economic productivity and growth. Let me tick off these activities and a brief comment about each of them.

Federal funding for the National Science Foundation has been reduced by 25 percent below that proposed in January. This would delete increased money for engineering research which is very important to industrial productivity. It would decrease support for basic science research in mathematical and physical sciences. It will eliminate a program to upgrade scientific equipment in our universities. This is the kind of spending that relates directly to productivity and further growth. It should not be cut.

A favorite word these days is "infrastructure." In talking about our economy, this means the backbone of the economy. Transportation is one vital part of our economic infrastructure. The present budget reduction proposals could have a most detrimental effect upon our transportation system. The President proposes to reduce funding for mass transit in our cities, and particularly assistance for operating existing mass transit systems. He also proposes to halt funding for Conrail, jeopardizing freight rail service in the whole Northeast and Midwest. Our economy cannot function without these important transportation services and I hope we can restore some money for them. I shall return to the issue of Conrail's continued funding shortly.

One of the key elements in our productivity growth in this country in years past was the American worker and the superb education and training that he or she received. In today's international markets, we have a phenomenon where some of our best workers are losing their jobs because of international trade competition. This is a pool of skilled and experienced workers, who if they were retrained, could apply their experience in new industries. It makes no sense to fail to utilize this reservoir of skills, just for the lack of a small retraining effort. Therefore, I support the effort to provide funds to retrain these workers and help them find jobs in new industries.

There are, no doubt, other equally beneficial activities being cut in our actions here on the Senate floor. We have sought to isolate a few of these activities and make small restorations. This is the kind of Government spending that will reap benefits for our economy and for all of us in the years ahead through increased productivity. I hope that the Senate will join us in restoring funds for these activities.

Now Mr. President, I wish to speak for a few minutes on this amendment's funding for Conrail. Ironically, today's debate is occurring on Conrail's fifth anniversary of service.

Conrail, the Nation's second largest rail freight system and its largest commuter carrier, is at a crossroads. Its future, and along with it the future of freight rail service throughout its 17-State region, will soon be decided. This is not a new issue. President Carter had addressed it, as has President Reagan. Last year, so did the Congress as we are doing again.

No one disputes the necessity of reexamining Conrail's future. Just 6 months ago, the Senate passed, on a vote of 61 to 8, the conference report on the Staggers Deregulation Act. Section 703 of this legislation required Conrail, the U.S. Railway Association, the Department of Transportation, and the Interstate Commerce Commission to prepare their recommendations on Conrail's future, specifically addressing three possible alternatives:

First, continued Federal funding of Conrail as it is presently structured;

Second, future Federal funding only to the extent necessary to preserve a self-supporting rail service; and

Third, no further Federal funding beyond the amount authorized in the act.

But there is a right way to reassess Federal support for Conrail and a wrong way. I believe the approach taken by the Budget Committee is the wrong way. Here we are deciding on whether or not to substantially reduce Federal assistance to Conrail in fiscal year 1982 and to terminate it completely beginning in fiscal year 1983, on the day when the first three comprehensive reports on Conrail's future are being submitted to Congress. These three are to be followed on May 1 by two additional reports.

It seems to me that Congress should be making its decision on Conrail's future based on these reports—reports which the Congress ordered prepared just 6 months ago. Yet the President and the Budget Committee chose not to wait. So the real issue today is whether or not the Senate believes Conrail should be terminated without the benefit of these comprehensive studies; without the benefit of hearings on whether a restructured Conrail should continue or whether Conrail should be dismantled; and without knowing what the impact of such decisions will mean to the economies not only of the 17 States dependent upon Conrail but upon the economy of the entire country.

To make such a decision, in my opinion, is not only premature but shortsighted and irresponsible. Conrail is just too important—to all of us—not just the residents of the Northeast and Midwest.

This amendment, if adopted, provides the time for Congress, the administration, the States, local governments, the railway industry, the unions, the shippers, and all others affected to work together to carefully develop the best possible solution to the problems facing Conrail and rail service in the 17 States it services. Perhaps Conrail should be dismantled. Perhaps it should continue. This amendment insures an opportunity to make that decision in an orderly fashion.

Specifically, it would restore $100 million in fiscal year 1982 and $200 million in fiscal year 1983. It should be noted, however, that even with the adoption of this amendment, Federal support for Conrail will be substantially below current policy.

In fiscal year 1982, the $100 million I seek to restore, when combined with the administration's proposed carryover of $150 million from fiscal year 1981 funding is a 55-percent cut from current policy. In fiscal year 1983, this amendment's $200 million represents 60 percent less than current policy. Certainly, this is a major reduction in Federal spending. Now let me explain why I hope a majority of my colleagues can support this amendment.

As I have previously stated, no one is suggesting the continuation of Conrail as it is presently structured. Clearly changes—perhaps drastic changes—must be made.

Some will argue that, since we have already authorized $3.3 billion in Federal

funds for Conrail and it has not been able to turn a profit with that amount, we, therefore, should not commit any additional funds.

Perhaps they are right, but that is not the issue we are deciding today. The question we are debating is whether or not we should use the Budget reconciliation order to terminate Conrail absent any of the recommendations which an overwhelming majority of this body ordered prepared just 6 months ago.

Today marks the end of Conrail's fifth year of service. No one disputes the fact that Conrail has not achieved its projected level of self-sufficiency as outlined in the final system plan, prepared in 1975 by the U.S. Railway Association. That is why Congress ordered Conrail, the U.S. Railway Association, the Department of Transportation, and the Interstate Commerce Commission to prepare these comprehensive reports which are being delivered to Congress today—in fact, I just received two of these in the past hour.

We are all familiar with the ways in which Conrail has failed to live up to what I believe were somewhat unrealistic assumptions embodied in the final system plan. However, in our haste to examine Conrail's disappointments, let us not lose sight of its many important and unique achievements.

Over the past 5 years, there has been notable progress made in rebuilding the Northeast's and Midwest's rail infrastructure which had been allowed to substantially deteriorate by its previous owners during years of declining profits.

It should be remembered that, prior to Conrail's takeover, Penn Central and the other seven bankrupted lines in the region were losing $1 million a day. In assessing the improvements which Conrail has made, various measures can be used, including the condition of Conrail's physical assets, the quality of service, its success at marketing and market retention, and reductions in its operating costs. I should like to take a brief look at some of these.

First, the condition of the tracks, facilities, locomotives, freight cars, and other equipment inherited by Conrail were in far worse shape than had been assumed in the USRA's final system plan. As a result, Conrail, until relatively recently, was consistently short of operable equipment. In the last 5 years, Conrail has virtually rebuilt its most heavily used lines and most of its rolling stock. Specifically, Conrail has laid over 4,000 miles of new track; resurfaced over 43,000 miles of track; inserted close to 18 million crossties; overhauled, rebuilt or converted 3,453 locomotives or 82 percent of its current fleet; purchased 675 new locomotives; rehabilitated 85,905 freight cars or 68 percent of its current fleet; and purchased 9,413 new freight cars.

The effect of all these expenditures has been the equivalent of rehabilitating 90 percent of Conrail's mainline track system, 85 percent of its locomotive fleet and 75 percent of its freight cars. These necessary capital improvements have not come cheaply, since its takeover 5 years ago today. Conrail has spent a total of $3.7 billion for capital investment. The following table taken from Conrail's January 15, 1981 report to the United States Railway Association shows how this investment has been allocated:

USES OF FEDERAL INVESTMENT IN CONRAIL, 1976–80

[In millions of current dollars]

Subject	1976	1977	1978	1979	Projected 1980	Total since conveyance
Track rehabilitation	$234	$292	$331	$358	$230	$1,445
Additions and improvements	43	90	125	144	105	506
Revenue fleet and other	16	77	234	180	119	627
Locomotive fleet	5	94	120	154	12	385
Equipment overhauls and heavy repairs	83	160	197	136	118	694
Total, physical asset improvement	381	713	1,007	972	584	3,657
Private sector financing	6	165	302	288	114	875
Net Federal investment in plant improvement	375	548	705	684	470	2,782
Cash loss from operations and other (net)	109	120	69	45	20	363
Total Federal investment	484	668	774	729	490	3,145
Net Federal investment as percent of total	77	83	91	94	96	88

This infusion of capital investment has resulted in a substantial improvement in Conrail's quality of service. Five years ago, 43 percent of Conrail's main and secondary lines were subject to "slow orders." During 1977, an average of 18.9 percent of all locomotives and 13.2 percent of all freight cars were unavailable for service at any given time. These facts, in turn, resulted in either the denial of service or unreliable service to many of the region's shippers.

Today this situation has changed. Slow orders are down to 4,003 miles compared to 7,791 miles back in 1976. Unserviceable locomotives and freight cars are down to 14.6 percent and 10.1 percent of their respective fleets—both well within the industry's norms.

As a result, the percentage of Conrail's carloads delivered within 24 hours of schedule increased to an average of 83 percent during 1980. This is a 19-percent improvement over 1979's average of 70 percent. In addition, freight cars now require an average of only 20 hours to be processed through a Conrail classification yard, which represents a 29-percent improvement over 1979.

These impressive but abstract statistics are even more meaningful when one looks at individual line improvements. For example, it no longer takes 7 days for a freight car to travel from Pocomoke City, Md.—Conrail's southern terminus on the Delmarva Peninsula—to Enola, Pa., just outside Harrisburg. Today, it takes only 25 hours. That to my mind is a real improvement, the sort of improvement which is threatened by this hastily and ill-conceived cut in Conrail service which this budget reconciliation resolution mandates.

Mr. President, I can go on citing such statistics. But I shall not, although I do ask unanimous consent that the following tables showing Conrail's investments and improvements in each State be printed in the RECORD at this point.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

CONRAIL TRACK IMPROVEMENTS (1976–80)

State	Miles of rail laid	Miles of rail resurfaced	Crossties replaced
Connecticut	0	371	217,241
Delaware	9	337	354,713
District of Columbia	0	1	0
Illinois	151	1,604	591,692
Indiana	565	4,988	1,793,907
Kentucky	0	0	0
Maryland	41	361	120,722
Massachusetts	122	1,095	621,752
Michigan	199	2,160	931,929
New Jersey	172	2,366	997,967
New York	601	7,797	3,178,130
Ohio	1,137	10,445	3,927,310
Pennsylvania	1,051	11,999	4,637,657
Rhode Island	0	14	13,654
Virginia	0	16	1,538
West Virginia	46	338	195,875
Total	4,094	43,892	17,484,087

CONRAIL CAPITAL EXPENDITURES (1976–80)

State	Track rehabilitation (millions)	Nontrack expenditures (millions)	Total capital expenditures (millions)
Connecticut	$10.60	$1.32	$11.92
Delaware	12.40	1.77	14.17
District of Columbia	.21	.03	.24
Illinois	58.80	7.94	66.74
Indiana	190.10	42.70	232.80
Kentucky	.10	.07	.17
Maryland	9.00	3.98	12.98
Massachusetts	45.20	5.86	51.06
Michigan	80.20	13.47	93.67
New Jersey	65.10	25.94	91.04
New York	249.70	59.95	309.65
Ohio	403.40	79.34	482.74
Pennsylvania	568.40	125.97	694.37
Rhode Island	.80	.07	.87
Virginia	.10	0	.10
West Virginia	15.30	1.30	16.60
Total	1,709.41	369.71	2,079.12

Mr. BIDEN. Mr. President, I hope that my colleagues realize that the money we have spent on Conrail has not been wasted. Tangible accomplishments have been achieved and more are on the way. Conrail has rebuilt much of the deteriorated line it inherited from Penn Central and the other bankrupted rail lines. This is the investment which we are threatening today by adopting the Budget Committee's instructions on Conrail.

Finally, I would like to take just a few minutes more to explain the Budget Committee's recommended funding level, this amendment's funding level, and what both mean to Conrail.

CONRAIL'S BUDGET

In the Stagger's Act, Congress last year authorized $329 million for fiscal year 1981 funding of Conrail. In addition, $200 million was authorized for the establishment of a work force reduction program. The Reagan administration is requesting a supplemental appropriation of $350 million, of which $150 million is to be deferred until fiscal year 1982. Of this $150 million, $50 million is for the voluntary annuity program, thus leaving only $100 million for Conrail's capital and operating budget needs.

The Senate Budget Committee adopted the President's recommendations which also include the termination of all Federal support for Conrail after fiscal year 1982's $100 million. So what we are talking about now is whether $100 million is sufficient for Conrail to maintain operations during fiscal year 1982. Clearly it is not.

It is not if we intend to keep Conrail operational while the Congress debates its future. It certainly is not if we decide to restructure Conrail in order to give it a chance to become self-sufficient. It is not even sufficient if we decide to dismantle Conrail by selling off its profitable lines to existing railroads. In any case, none of these alternatives can be implemented overnight.

So what does the funding provided for in this resolution mean? Let me read from the testimony of L. Stanley Crane, Conrail's chairman, to the Senate Commerce Committee last week:

If I were told today that I had to keep it (Conrail) going through the end of 1981 with the funds requested in the President's budget, I would say we can do it. If, on the other hand, I was told today that the funds in the Administration's budget had to sustain operations through 1982, I must tell you it would be difficult to do. Even if all capital programs were stopped completely and we did absolutely no track work, repaired no freight cars and locomotives and furloughed thousands of workers, it would appear by the end of 1982 the railroad would be unable to meet its payroll. The results of these actions would be more than just unpleasant. The railroad would deteriorate, both physically and from a service point of view.

Mr. Crane addressed this same question—the effect of the President's budget recommendations—in a March 13 letter to Congressman JAMES FLORIO, the chairman of the House Subcommittee on Commerce, Transportation, and Tourism. In it he explained:

If directed, I could eliminate the proposed capital expenditure program (which I have already had reexamined and reduced from earlier plans) to stretch out available funding. However, this is not a solution and follows the path of the bankrupt predecessors deferment practices. That could undermine the government's present investment in rehabilitation and prejudice either Conrail's future or the potential for controlled transfer of the properties.

I hope it is clear to all in this body that Conrail simply cannot operate beyond early 1982 given the funding level assumed by the Budget Committee in this resolution. It simply is not realistic.

THE BRADLEY-BIDEN AMENDMENT

This amendment would restore $100 million in fiscal year 1982 and $200 million for fiscal year 1983 to the cuts recommended by the Budget Committee. Even with this higher funding level, Conrail would be receiving less than 50 percent of what it would under current policy.

Mr. President, I think it is important for all to understand that this amendment does not address what Conrail's future structure should be. It does not mandate its continued existence. Nor does it presume its dismantling as proposed by the administration. What it does provide for is sufficient funding to allow Congress and all concerned the time to make informed decisions. The funding contained in this resolution is simply not adequate to insure Conrail's continued operation while its future and that of freight and commuter service in its 17-State area is being debated.

The Bradley-Biden amendment simply provides Conrail with the minimum funding needed to avoid a shutdown or major deterioration while a viable rail system for the Northeast and the Midwest is being shaped—whatever its configuration. I urge my colleagues to support adoption of this amendment.

Mr. President, in light of the fact that I have exceeded my time generously allotted to me by the primary sponsor of this amendment, I shall yield the floor to hear from New York and other States. I thank my colleague from New Jersey for yielding to me.

Mr. BRADLEY. Mr. President, before the Senator yields the floor, let me say that I think that, as he does so often, he has captured the nub of my intent here. That is that the debate we have heard so far has been framed in the words of safety nets or holes in safety nets.

What we want to do with this amendment is to say: Let us look to the future with some confidence, with some sense of adventure, with the belief that we can make a better world and bet on people and technology. Government has a role in that process, and that is what this amendment affirms.

I am pleased to yield to my colleague from across the river, the Senator from New York (Mr. MOYNIHAN).

Mr. MOYNIHAN. I thank the Senator from New Jersey.

Mr. President, I should like to pick up exactly where the Senator from Delaware eloquently left off, to take what I hope is not an unfair advantage of the distinguished Senator from North Dakota, who is presiding at this point and is not immediately free to respond to what I am about to say. If he wishes to respond, that can readily be arranged.

I simply want to tell the Senate of the last substantive exchange which took place in the Budget Committee before the resolution before the Senate was reported by the committee.

The distinguished Senator from North Dakota, very properly, in my view, asked the chairman, our honored friend from across the aisle, who is in the Chamber, whether he could be certain—the Senator from North Dakota, that is—that nothing in this resolution would reduce the funding for the Rural Electrification Administration. He wanted to make certain of that, and he was right to do it.

I simply took the opportunity to say to him that I certainly shared his concern, and that the Rural Electrification Administration, an enterprise begun by a New York President in the midst of the depression of the 1930's, had done remarkable things for the people of this country.

It had taken the women of the Great Plains out of the mud. It took the agriculture of the South out of the 19th century. It made the Great Plains the grainery of the modern world and, in so doing, benefited not just those who lived there but also millions of persons in this world who would not have been fed in this century, not in the past decade, had it not been for the Rural Electrification Administration.

Here is an example of Government investing in our country, improving it and strengthening it.

The PRESIDING OFFICER. The time of the proponents of the amendment has expired.

Mr. MOYNIHAN. Mr. President, in the absence of the Senator from South Carolina, a member of the Budget Committee, may I ask for another 20 minutes on the resolution?

Mr. BRADLEY. Mr. President, as the manager of this amendment, and in the absence of the Senator from South Carolina, I am prepared to yield the Senator 5 minutes on the resolution.

Mr. MOYNIHAN. May I have 7?

Mr. BRADLEY. I yield 7 minutes.

The PRESIDING OFFICER. The Senator is recognized for 7 minutes.

Mr. MOYNIHAN. Mr. President, this is also to say that there has not been any disposition on this side of the aisle to deny the reality of the problems that the Senator from New Mexico eloquently speaks of

In 1975, I was a member of the commission that Vice President Rockefeller had set up earlier, in 1974, called the Commission on Critical Choices for Americans for the Coming Century.

I prefaced a long paper I wrote at that time by saying that there are two critical choices the American people face: The first is, How much Government do we want? The second is, How much growth do we want?

Persistently, for a generation, we have opted for more Government and less growth.

We have been too much enthralled by an economic doctrine that arose in Britain in the 1930's, which holds that ad-

vanced industrial economies have an inherent tendency to surplus, that there is an inherent tendency to oversaving.

This could be true in the very special time and circumstances of the British Isles in 1935. However, there is no inherent tendency to surplus in the world, but to shortage; and no inherent tendency to oversaving, but not to save enough. We had to reject that construction, and we have done so.

What we would question today, and have been doing from the time of the budget hearings, are the economic assumptions that the administration has presented to us. Quite simply, they present a facile view of the future. They describe a future in which the cumulative economic dislocations of three decades will have been resolved in 3 or 4 years. It is not going to happen. Were it going to happen, we could abandon the role of Government in the economy and assume that things will take care of themselves. They will not.

On March 5, I was asked to address the Economic Club of New York, one of the more distinguished such bodies in the Nation. In an address that was entirely supportive of the President's enterprises and purposes, I said:

> Do not suppose the deficit for the year 1982 will be $45 billion. It will be at least $60 billion.

We now see that the Joint Economic Committee, using the Data Resources model, projects a $58.5 billion deficit for that year, rising to $110 billion 2 years later.

We cannot come out of this last decade and assume a GNP growth of 4 percent to 5 percent a year.

I asked Mr. Stockman about this at the hearings. I said:

> You can't do this and expect us to take these revenue estimates as real.

He insisted they were. I see that the Joint Economic Committee wholly disputes any such likelihood. Similarly, the change in the inherent core rate of inflation.

We believe in investments, in capital gains tax cuts rather than consumption tax cuts, and similarly we believe in investment in the public sector.

You cannot allow Conrail, which serves the quadrant of the Nation that generates 40 percent of the gross national product, to disappear, and expect the GNP to rise.

You cannot cut back the National Science Foundation, which nourishes the brain tissue of the Nation, and expect innovation and productivity to increase.

You cannot cut support for the most efficient forms of transportation, ones that lessen the dependence on imported oil, accept the inevitably consequent transfer from mass transit to automobiles, and look for a decrease in dependence on foreign oil.

These things will not happen.

The Senator from Delaware and I, following the lead of the Senator from New Jersey, are asking that Senators consider that there are aspects of investment in the future which are being cut out in a misguided and misinformed adherence to revenue and production estimates that are not supported by the evidence anyone now has available.

I thank my friend for giving me this time to speak in support of his amendment.

Mr. BRADLEY. Mr. President, I thank my colleagues from New York and Delaware for their support of this amendment and for joining me to point out to the Senate the terribly erroneous assumptions of this budget; to call attention to the danger of proceeding on those assumptions; and, yes, to bring a warning of sorts about what might lie in the future if we do not at least apply the same level of skepticism to these assumptions that we do, and as we have done in this budget, to various Federal programs.

I am prepared to hear from the opponents of this amendment. I hope they will address the assumption question—what might be the fate of this country if those assumptions are wrong and yet we proceed in that direction clearly and confidently. I hope they will speak to their commitment to investment in human capital and infrastructure as well as plants and equipment, and their commitment to the underlying need to develop our research and development capabilities in this country.

Mr. President, I believe that this budget is a managerial budget. It is not a budget that looks to the future. It is not a budget that says we can actually set a course and follow it steadily to that better future. Rather, it is a budget that says we are going to manage the status quo; we are going to manage existing programs better; we are not going to go out to space; we are not going to take the tough decisions that will bring economic growth.

For these reasons, I offer this amendment, to call attention to some of the areas that are lacking. I ask my colleagues to focus a little on the future and not only on the present and our present crises.

Mr. DOMENICI. Mr. President, I yield myself 5 minutes.

I regret to say to my good friend from New Jersey that I am not going to go into economic assumption details here today. We will do that, however. I just submit the real issue is, who has any economic assumptions that do not justify at least cutting $36 billion out of the 1982 Federal budget? That is the issue. That is the only issue here today.

If the Senator has some economic assumptions from any economic school that he wishes to really ask the Senate to believe which says we should not cut $36.8 billion out of this budget, then that is an issue. Whether or not the President's program with these cuts, his tax-cut proposals and his regulatory reform, is going to accomplish what his assumptions say over the next 4 years is fair game, but not here today, unless the Senator is prepared to tell the Senate, "You should not cut these items, you should not cut this much because we have a set of economic assumptions that say that is dangerous for America." I ask the Senator to get up here and tell the Senate, tell the American people after what they have seen about the budgeteering in the United States that it is dangerous. I am sure the American people, if the Senator tells them this, will wake up tomorrow morning scared to death, if the Senator tells them, "Cut $36 billion out of this budget and we have some economic indicators that say you are in trouble, America," because it is not so.

That is the only issue here.

If the Senator wants to talk about mass transit cuts being shortsighted, we have voted on every one of those already. The Senator lost, other than on Conrail, and perhaps the Senator would wish to make that a little more specific than he has. But we have already tried to add money back into the committee for mass transit. It has been defeated rather handily. The arguments have all been made. I will not make them today.

On economic productivity, as sensitized by spending money on NSF or education, we are talking about $39 million in 1982 so we put in perspective the arguments here today about the shortsightedness of not putting enough Federal money inside scientific research through NSF, and I just looked at it and the sum total of the President's cuts which are assumed here, I say to my good friend from New York, are $39 million, and, by the way, I supported in the committee putting them back, but I am not going to take the floor and make a 20-minute argument that the failure to fund $39 million of NSF money is an indication we are not going to have any innovativeness left in the country.

As a matter of fact, and I say this specifically to my good friend from New York because we collaborated putting more money in NSF in the past, I checked carefully what they intend to cut from NSF. It is interesting that they do not cut any of NSF activities that have to do with basic research and development, that have to do with scientific research. The committees can do that if they like. The President's assumptions are that basically NSF activities that have been in the sociological kind of studies and the like are the ones that should be cut back. Maybe the committee will cut otherwise.

But suffice it to say that, in conclusion, on economic modeling I am delighted to know, I say to Senator BRADLEY, that last year the Joint Economic Committee, under the chairmanship of Senator BENTSEN, chose to use Chase Econometric modeling and it came out supply side. We have a new chairman of that committee, as the Senator knows, and he chose to use Data Resources, and they do not agree, these two.

So now we are telling the Senate that the President is wrong, Chase is not right either, but Data is right, and we are all doomed if we accept the President's program because we are going to have how much of a deficit in 1984, I ask Senator BRADLEY?

Mr. BRADLEY. Mr. President, according to the Joint Economic Committee, Data Resources is the only econometric study that actually carries through the President's assumptions on the money supply. Chase did tax cuts and budget cuts but not money supply.

Mr. DOMENICI. How much is the deficit?

Mr. MOYNIHAN. $110 billion.

Mr. BRADLEY. Mr. President, if it is carried through, the deficit will be $111 billion according to the Data Resources model of the Joint Economic Committee.

It is interesting that we all say that we want research and development. We are here in the Chamber disputing some budget cuts, but we are skirting the issue of the tax side of this question because we are saying we are only dealing with budget cuts here today. But if the assumption of this budget was not that we were going to have $52 billion in tax cuts in fiscal year 1982, there would not have been the need for as deep a budget cut.

So, we talk about research and development. The Senator is for it and I am for it.

There are two bills before the Senate, one by Senator DANFORTH and one by me, which would provide tax credits for research and development. Are we going to have tax credits for research and development if we have $52 billion tax cut? Or will that be in the second tax measure this year? If so, then maybe we should adjust those figures to $111 billion upward because the model of the Joint Economic Committee did not cover the second tax bill that we might be moving to this year.

So what I guess I am saying to the distinguished chairman of the Budget Committee is that on budget matters, as the Senator knows, everything is relative. We just want to try to be consistent with the intention of the administration, not just on the taxes and budget but on taxes, budgets, and money supply.

I ask the Senator to check to see if the administration's projections did include what they have stated for money supply or only included budget and tax cuts. I think he will be surprised at what he finds.

The PRESIDING OFFICER (Mr. HAYAKAWA). Who yields time?

Mr. DOMENICI. Mr. President, I yield myself whatever time I need.

Mr. President, I say to my good friends, the Senators who are debating here with me, that I will have to leave the floor in a couple of minutes myself, but I yield a minute to the Senator from New York.

Mr. MOYNIHAN. Mr. President, I thank the distinguished chairman and friend.

I simply point, as we will recall, thanks to his initiative, which is always generous and openminded in these matters, it happens that of the economists we met with to consult with the economic assumption several weeks ago, one was Mr. Eckstein, responsible for the Data Resources model, and Mr. Schimering responsible for the Chase model, and both agreed that assumptions set in the budget were at the very best a possible case and not in fact a probable case, but they are as fallible as the Senators and I, but they certainly are willing to try.

Mr. DOMENICI. Mr. President, there is a new era of hope and optimism abounds.

Let me close by saying to Senator MOYNIHAN that I do think he made a point. I think he said that is a rather simple program, big cuts in the budget, large tax cuts and regulatory reform. He said that rather than to yield to utopia that is being promoted he just did not think things could be done that easy.

That is my way of saying what he said. Am I kind of paraphrasing the Senator?

Mr. MOYNIHAN. The Senator is.

Mr. DOMENICI. Let me suggest that no one is suggesting that at its best the President's economic program is going to return America to what it was 12, 15, or 18 years ago.

We are still expecting at its best unemployment at a very high level. We are expecting inflation at a very high level, I mean compared with what it was 26 years ago, the last time my party was in control of the Senate. Inflation is going to be five times higher than that, I say to the Senator. The Treasury bill rates the last time we were here were nine-tenths of 1 percent.

Mr. MOYNIHAN. And the GNP will be three times as great.

Mr. DOMENICI. And the GNP will be three times as great, and we will be home free.

● Mr. KENNEDY. Mr. President, I support the amendment of the distinguished Senator from New Jersey, Mr. BRADLEY, to restore funding crucial to the economic infrastructure of this Nation and to strengthen the human resources of this Nation.

The amendment would add $100 million for fiscal year 1982 and $200 million in fiscal year 1983. It is a bare-bones amendment whose purpose is to prevent a forced, imprudent, and hasty abandonment of a $3.3 billion Federal investment in this rail system.

The failure to approve these funds will jeopardize not only any opportunity for Conrail to restructure its operations and plan to become self-sustaining in the future, but will destroy even the opportunity for its acquisition by private railroads, as the administration seemingly desires.

Conrail is not an isolated Federal program that can be discarded lightly. It is a 17,000-mile rail freight system in 17 States which serves 40 percent of the Nation's manufacturers and the bulk of our export-import commerce.

It also is the Nation's largest commuter railroad, operating rail passenger service for 450,000 passengers daily in five States.

It is less than cost effective to even contemplate the unplanned and clearly undesirable consequences of suddenly jettisoning Federal support for Conrail at a moment when its future has yet to be decided by the Federal Government.

Beginning today, we will be receiving four comprehensive reports from USRA, Conrail itself, the Federal Railway Administration and the Interstate Commerce Commission. Surely, we do not want to eliminate our capacity to respond to those recommendations.

It should be emphasized that in 2 days of hearings only this past week there was no one other than FRA who testified that the administration's proposal to transfer Conrail properties at this time to other private railroads was either possible or desirable.

Both USRA and the new president of Conrail, a respected railroad executive—L. Stanley Crane—spoke in terms of future Conrail operations without need of Federal financing only if a series of changes took place. However, neither viewed the abandonment of Conrail by the Federal Government as an acceptable solution.

Speaking for my own State of Massachusetts, I am convinced that it would be an economic disaster to permit the sudden decline and deterioration of Conrail.

Some 80 industries have located or expanded their facilities on Conrail in Massachusetts over the past 5 years with an investment of some $50 million and the creation of 6,200 new jobs. They and the existing industries and communities depend on Conrail for service and I would venture to say, Mr. President, that many of those industries serve communities in every State in the Nation.

Perhaps the most important point to make is that Conrail is not a Northeast and Midwest railroad. It is a railroad that interconnects with other railroads to help move freight all across this land. Some 70 percent of Conrail's traffic is interchanged with other railroads and its sudden demise would create a serious crisis for our railroad network and for our national economy.

I also would echo the words of Mr. Crane that the Conrail system today is a vastly improved and more modern rail system than we saw in 1975, a time when the demise of Penn Central presented this country with a crisis of national proportions.

Some 70 percent of all the funding for Conrail has gone directly to improve the railbeds, tracks, and rolling stock of the system and the value of that system has increased accordingly.

In Massachusetts alone, some 122 miles of rail have been laid, 1,000 miles surfaced, 621,000 new ties installed and an additional $6 million expended in capital improvements.

The problems facing Conrail are complex and difficult. Their resolution will take the combined effort and sacrifice if the railroad, local communities, shippers, and labor. But it will never be possible—either to produce a self-sustaining railroad or to achieve any planned transition to private lines—if we abandon Conrail at this time.

In mass transit, the restoration of some $50 million in fiscal year 1982—one quarter of the budget reduction—and $390 million in fiscal year 1983—one-half of the budget cut—at least reduces the devastating reduction intially proposed.

Our cities continue to be a driving force within our society and the mass transit systems of Boston and other communities has accepted higher fares, delayed modernization and sought other ways to cope with the inflationary rise in the cost construction, renovation, and operation.

The adoption of this amendment will ease the cutback now proposed in the budget resolution only slightly. But here again, it is a proper, appropriate and necessary step in the right direction.

We must recognize first that mass transit is part of our economic infrastructure. It is the way people get from home to work.

Funds are not for existing transit systems alone but to support additional purchase of buses in cities across the country.

In Massachusetts—one-half million people use MBTA every day—how many Americans depend on rail and bus transit to get to work each day? What happens if we allow these systems to deteriorate?

It makes it more difficult for urban areas to succeed and for our economy to prosper.

Federal funding in my State has been essential to permit major renovations to the Red Line which serves the South Shore, the Green Line which serves the western suburbs of Boston, and the Blue Line which represents access to the North Shore. Improvements in rolling stock—cars—road beds, and stations have helped to increase ridership, improve efficiency and upgrade the quality of the city's mass transit system.

With gas prices already approaching $1.50 a gallon, and the forecast of $2 a gallon by next year, it is essential that we have a viable system of mass transit in Massachusetts. Mass transit is a proven energy saver in Massachusetts and all across the Nation.

This amendment also restores funding to the research and science education activities of NSF.

For 30 years NSF has been the primary impetus for our scientific and technological advancements. Restoration of funding for research is necessary if we are to achieve our national economic, social, and political goals and reverse the trend of our rapidly diminishing international prominence in science and technology. Restoration of NSF funding is necessary to upgrade deteriorating scientific equipment and instruments in over 200 universities and 14 national research centers. Upgrading this equipment is critical to improve the productivity of our research efforts and increase the probability of making new scientific breakthroughs.

Restoration of NSF funding is necessary to maintain support for over 2,000 graduate training fellowships and to provide opportunities for continuing education for close to 3,000 science teachers who will have an impact on hundreds of thousands of students. These efforts are essential to maintain a high level of expertise among our Nation's scientists and to insure a basic level of scientific literacy among our Nation's general populace.

Restoration of NSF funding is necessary to implement the women and minorities in science programs which, if funded at restored levels, is projected to expose over 12,000 women and other minority students to science career opportunities. This is essential to cultivate new scientific talent, ultimately determining the innovativeness, quality, and scope of our scientific endeavors.

Finally, this amendment will restore funds for worker retraining.

I would emphasize to my colleagues that it is good supply-side economics to support programs that improve human capital.

Edward Denison and other leading economists remind the United States that a well trained work force is critical to improving productivity.

This is not a case of more money for a failed Federal program. Under the present trade adjustment program, little has been done to assist workers in declining industries to acquire new skills or find new jobs. In fiscal year 1980 training funds ran out in May. Fiscal year 1981 funds are already gone.

At a time when this body proposes to cut TRA benefits and unemployment compensation—at a time when hundreds of thousands of long-term workers in basic industries such as auto and steel will not be reemployed in their old jobs.

At a time when technological advances threaten to eliminate jobs in other industries retraining workers for new jobs in more competitive industries where most of the job growth is likely to be is absolutely essential.

I urge the adoption of this amendment.●

● Mr. LEVIN. Mr. President, I support the amendment offered by the Senator from New Jersey. I note the fourth part of the amendment, a restoration of 75 million for job training of experienced workers.

Mr. President, this budget seriously lacks sufficient means for the training of the amendment, a restoration of $75 component of the productivity issue. We have seen drastic reductions in funds for education, investments in youth, and the future prosperity of this country.

This amendment restores but $75 million to functions for job training for experienced workers. The trade readjustment assistance program includes a program for the retraining of individuals thrown out of work due to the influx of imports. Adding $75 million to this program will assist displaced workers to adjust to the situation of their skills no longer being needed. It will prevent even further dislocation from occurring in the lives of these workers and their families. We recognize that in certain industries the number of workers employed have taken a sharp drop. This has happened rather suddenly, often due to the sharp increase in number of imported products and to economic conditions far beyond the control of these employees. It is a good idea to retrain such persons. They are productive individuals and at a time when we are very concerned about our slow growth in productivity, we should develop the kinds of programs to build on this productivity.

The alternative to not investing in a worker retraining program is giving the worker little choice but welfare. It is bad enough that a person finds his or her skill no longer needed; but to find the only alternative available some form of public assistance is a further humiliation. It is to the benefit of our Nation that these individuals be given the retraining that is needed.●

● Mr. CANNON. Mr. President, I am very pleased that the amendment offered by my distinguished colleague from New Jersey recognizes that additional funding is needed for Conrail. Just today we have received an informative report from the U.S. Railway Association indicating that, with limited additional funding of the type proposed in this amendment, Conrail can become viable. The funding must be combined with other actions, such as use of new rate flexibility, tight management of costs, and management and labor efficiencies. We are not talking about maintaining the status quo. Operational and structural changes must be made; these will be considered as the Commerce Committee develops legislation.

The point that needs to be made is that, if Conrail can become viable as reported by USRA, then this is a goal which can be achieved at the lowest cost and with the greatest benefits of any of the alternatives available to the Congress.

Considering budgetary deadlines, we cannot afford to wait. The time to resolve the Conrail dilemma is now. And I am convinced that the additional funding proposed in the amendment offered by Senator BRADLEY is cost effective and should be supported from the standpoint of sound transportation policy.

While I favor the proposed Conrail funding, the amendment also includes other increases in budget authority, totaling more than $800 million in fiscal year 1982. In view of the present need for fiscal restraint, I regret that I am unable to support the amendment in its present form.●

● Mr. RIEGLE. Mr. President, I wish to associate myself with the statement that Senator CANNON made last week concerning Conrail.

The administration recommends no additional funding for Conrail beyond a fiscal year 1981 supplemental appropriation. The proposal was adopted by the Budget Committee before the Commerce Committee held Conrail reauthorization hearings.

The hearings held by the Commerce Committee on Tuesday, March 24 and Wednesday, March 25, 1981, brought to light a number of complex problems in giving new direction to the Conrail system. Congress must be free to consider the alternatives involved here. We must not allow the budget to unduly constrain the Commerce Committee from making an informed logical decision about Conrail.

Conrail provides freight rail service to about 40 percent of the Nation's industrial base. Industries and the jobs they support depend on access to rail service that now exists. The impact of a hasty decision as to the future of this rail service could be disastrous.

Conrail operates in the Northeast and Midwest and as we all know many of the States served are now experiencing severe economic and fiscal problems. The interruption of rail service in these areas could force their economies into a nosedive.

I believe that all of the members of the Commerce Committee recognize that the Conrail situation must be reconsidered and additional economies must be sought. We are considering alternatives.

The administration's funding for Con-

rail, as reflected in the reconciliation, is not realistic. In this regard, I would point out that no funds are included for labor protection. Yet, there is a consensus that any alternative which may be adopted will involve employee protection costs. During recent Commerce Committee hearings on the future of Conrail, the witness for the administration—FRA's Administrator, Robert Blanchette—recognized the need for resolution of the labor protection issue and indicated that the necessary financing would be recommended.

Each of the alternatives involve costs and each of the alternatives involves previous commitments that Congress has made to railway workers. In shaping solutions, Congress must consider the future of rail service to industry and communities in the Northeast and Midwest. But the benefits of Conrail service extend beyond the system's boundaries. Over 70 percent of Conrail's freight traffic is interchanged with other railroads. A cessation of service could threaten the financial health of the rail industry.

Mr. President, the Senate will receive some important studies on Conrail early in April. They will analyze the present condition and the future of this strategically important rail system. The Senate must not make hasty decisions in the budget that would preclude a responsible long-term solution. Congress must consider all the facts before reaching a decision.

I, therefore, urge my fellow Senators to join me in support of Senator BIDEN's amendment to include $100 million additional funding in the budget for Conrail and allow room for us to make a rational and informed decision about the future of the Conrail system. According to Conrail's own estimates, these additional funds would simply allow them to cover their labor costs, operating deficit, and capital costs through fiscal year 1982. Without this help, Conrail will go bankrupt by the end of the first quarter of calendar year 1982 and serious interruptions in service could occur.●

Mr. DOMENICI. I yield back the remainder of my time on the amendment.

Have we asked for the yeas and nays? Did the Senator wish to ask for the yeas and nays?

Mr. BRADLEY. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from New Jersey.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from West Virginia (Mr. RANDOLPH) and the Senator from New Jersey (Mr. WILLIAMS), are necessarily absent.

I further announce that, if present and voting, the Senator from West Virginia (Mr. RANDOLPH) would vote "yea."

The PRESIDING OFFICER. Is there any Senator in the Chamber wishing to vote who has not done so?

The result was announced—yeas 22, nays 76, as follows:

[Rollcall Vote No. 62 Leg.]

YEAS—22

Biden	Glenn	Pell
Bradley	Hart	Riegle
Burdick	Inouye	Roth
Cranston	Kennedy	Sarbanes
Dixon	Levin	Tsongas
Dodd	Mathias	Weicker
Eagleton	Matsunaga	
Ford	Moynihan	

NAYS—76

Abdnor	Garn	Metzenbaum
Andrews	Goldwater	Mitchell
Armstrong	Gorton	Murkowski
Baker	Grassley	Nickles
Baucus	Hatch	Nunn
Bentsen	Hatfield	Packwood
Boren	Hawkins	Percy
Boschwitz	Hayakawa	Pressler
Bumpers	Heflin	Proxmire
Byrd, Harry F., Jr.	Heinz	Pryor
	Helms	Quayle
Byrd, Robert C.	Hollings	Rudman
Cannon	Huddleston	Sasser
Chafee	Humphrey	Schmitt
Chiles	Jackson	Simpson
Cochran	Jepsen	Specter
Cohen	Johnston	Stafford
D'Amato	Kassebaum	Stennis
Danforth	Kasten	Stevens
DeConcini	Laxalt	Symms
Denton	Leahy	Thurmond
Dole	Long	Tower
Domenici	Lugar	Wallop
Durenberger	Mattingly	Warner
East	McClure	Zorinsky
Exon	Melcher	

NOT VOTING—2

Randolph	Williams

So Mr. BRADLEY's amendment (UP No. 39) was rejected.

Mr. QUAYLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. HOLLINGS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HOLLINGS. Mr. President, I yield to the Senator from Michigan.

SOCIAL SECURITY STUDENT BENEFIT PROGRAM

Mr. LEVIN. Mr. President, the social security benefit for college students of deceased, disabled, or retired workers is phased out under the Budget Committee's instructions. The administration recommends and the Budget Committee assumes that benefits to new postsecondary student recipients would be eliminated and existing recipient benefits would be reduced by 25 percent annually over 4 years.

It might be argued by some of my colleagues that elimination of this program is justified. It might be argued by some that for budgetary reasons, a modification of the program is absolutely necessary. It might be argued by others that the social security student benefit program should be left intact—that we should not tamper with the contract we made with retired, disabled, and deceased workers.

I believe, that if this Government finds that one of the ways to insure the integrity and solvency of social security is to renege on its promise to those who have worked and contributed to the system—upon which they planned the educational future of their children—then it must be done in the least painful and most honorable way.

I am concerned about the fact that the proposed change in the student benefit program would happen very suddenly. We are talking about aid to students now in high school. Seniors planning to attend college in the fall, and trying now to make final plans based on how much student aid they may receive. If social security aid is suddenly eliminated, and other programs cut, there will be great uncertainty about the educational future of great numbers of young men and women.

The current timetable does not allow for planning. There is no leadtime to investigate and find alternative resources. There is not sufficient time for State governments to consider what actions they might take to help meet the situation in the fall. The proposed change if made at all, should be phased in over time, in order that appropriate alternatives can be explored and adjustments made.

That senior in high school ought not be denied the opportunity to attend college as planned, only months away.

I am also greatly concerned about the denial of this benefit to survivors of workers who are now deceased. The social security student benefit program has been an important means of educational and economic mobility for this generally disadvantaged group of beneficiaries.

The student benefit was intended to provide income security—insuring against the loss of earnings caused by the death of the working parent.

The elimination of the student benefit would cancel the commitment to workers that their children, if orphaned would be entitled to college student benefits a commitment these workers had a right to rely on. It would destroy the insurance protection that these children relied on after the death of the working parent.

Eliminating the student benefit would critically slash incomes of these vulnerable families. Many are in near poverty situations, many are marginal income families and struggling middle-income families. Their deficits in meeting educational costs would soar and for many students the only alternative is delayed, interrupted or terminated education.

Sixty percent of the approximately 800,000 college student beneficiaries this year are survivors of deceased workers. Seventy-one percent come from families with incomes under $15,000, and 53 percent are from families with incomes under $8,000. A number of the students are from families where both parents are deceased.

So, what we see here is that most of these students come from families not only in need but faced with substantial personal problems in raising and educating children. In many cases the mother is the head of the household, and as we know, such households have considerably lower incomes, on the average, than those households headed by men.

If we are not going to honor our commitment to the retired and disabled workers with children hoping to go to

college, in other words, to these workers who are living, let us at least honor our commitment to the dead.

In a few days I will be filing legislation which will reflect my concerns in this regard. I would hope that the Finance Committee will consider the impact of the proposed changes on seniors currently in high school, planning to attend college in the fall. I would also hope that it will preserve the commitment we have made to those workers who are no longer alive, who are therefore no longer able to try to find alternative means for continued financial assistance to their children in reaching their desired educational goals.

Mr. DOLE. Mr. President, as the chairman of the Finance Committee, I would like to briefly respond to the statement of the distinguished Senator from Michigan. I do not necessarily agree with every statement that the Senator has made about student benefits in the Social Security Act. I note that on August 30, 1979, the GAO issued a report that concluded that this program should be eliminated. That report stated that student benefits divert tax money from the basic purpose of social security, it gives many students more money than their school costs warrant while inequitably barring others, it deprives nonstudents of all such benefits, and contributes to other Federal aid programs paying unneeded benefits.

At the same time this Senator is sensitive to the needs of the children of deceased and permanently and totally disabled individuals who have contributed to the social security system. I would like to assure the Senator that when the Finance Committee takes up the proposal to phase out the student benefit, we will carefully consider the impact it will have on current seniors in high school as well as on those who for other reasons cannot make alternative arrangements to provide for their education in the short term. We will also consider whether some groups of recipients should have these benefits for a longer period into the future than others.

Mr. BOREN. Mr. President, I concur with the remarks of my esteemed colleague from Michigan, Senator LEVIN. I, too, am deeply concerned about the plight of high school students who have made college plans under the assumption that the social security student benefit would be available to them. Like Senator LEVIN, I think that we should allow these students time to explore other alternatives before denying them these benefits.

Similarly, I agree that student benefits should continue to be paid to surviving dependents of deceased social security recipients. I received a letter not long ago from one Oklahoma State University student who relies to a great extent upon the student benefit for support. The father of this student was killed while in service in Vietnam. I think it would be wrong for the Federal Government to fail to carry out its commitment to these individuals.

It is my hope that while retaining the student benefit for dependents of deceased social security beneficiaries, the Congress will also gradually reduce the duration of student benefits to 8 months out of each year. In this way students will not be drawing social security benefits during the summer months when they are not in school and are earning money on their own. I understand that the Senator from Michigan intends to include such a provision in his bill and I applaud him for it. The Levin proposal would enable us to meet these obligations while still essentially achieving the first year budget cut and savings requested by the President. It would also result in significant savings in future years.

I commend the Senator from Michigan for his sensitivity and farsightedness in this matter.

UP AMENDMENT NO. 40

(Purpose: To reduce funds for provisions relating to Federal cost of living adjustments (COLA))

Mr. HOLLINGS. Mr. President, I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from South Carolina (Mr. HOLLINGS) proposes an unprinted amendment numbered 40.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with line 12, strike out through line 20 and insert the following:

SEC. 9. (a) Congress hereby determines and declares that it is necessary to make changes in enacted laws in order to reduce budget authority by $14,677,000,000, and outlays by $2,942,000,000, in fiscal year 1981; to reduce budget authority by $52,969,000,000, and outlays by $39,563,000,000, in fiscal year 1982; and to reduce budget authority by $59,472,000,000, and outlays by $50,724,000,000, in fiscal year 1983.

On page 4, beginning with line 11, strike out through line 20, and insert the following:

(2) The Senate Committee on Armed Services shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 421(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $233,000,000 and outlays by $233,000,000 in fiscal year 1981; to reduce budget authority by $1,066,000,000 and outlays by $1,066,000,000 in fiscal year 1982; and to reduce budget authority by $1,098,000,000 and outlays by $1,098,000,000 in fiscal year 1983.

On page 7, beginning with line 9, strike out through line 18, and insert the following:

(7)(A) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $212,000,000 and outlays by $859,000,000 in fiscal year 1981; to reduce budget authority by $4,354,000,000 and outlays by $11,738,000,000 in fiscal year 1982; and to reduce budget authority by $4,494,000,000 and outlays by $13,526,000,000 in fiscal year 1983; and

On page 8, beginning with line 12, strike out through line 18, and insert the following:

(9)(A) The Senate Committee on Governmental Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $540,000,000 in fiscal year 1982 and to reduce outlays by $470,000,000 in fiscal year 1983; and

On page 9, beginning with line 13, strike out through line 23, and insert the following:

(11)(A) The Senate Committee on Labor and Human Resources shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $39,000,000 and outlays by $65,000,000 in fiscal year 1981; to reduce budget authority by $658,000,000 and outlays by $688,000,000 in fiscal year 1982; and to reduce budget authority by $1,601,000,000 and outlays by $1,569,000,000 in fiscal year 1983; and

On page 10, beginning with line 22, strike out through line 6 on page 11, and insert the following:

(13)(A) The Senate Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $24,000,000 and outlays by $23,000,000 in fiscal year 1981; to reduce budget authority by $76,000,000 and outlays by $73,000,000 in fiscal year 1982; and to reduce budget authority by $73,000,000 and outlays by $73,000,000 in fiscal year 1983; and

Mr. HOLLINGS. Mr. President, may we have order in the Chamber? I will try to make this just as brief as possible.

The PRESIDING OFFICER. The Senate will be in order.

Mr. HOLLINGS. After this particular amendment, I think we have an amendment to be offered by the Senator from Ohio (Mr. METZENBAUM), and then three amendments by the Senator from Wisconsin (Mr. PROXMIRE).

This amendment involves the problem of indexing, and how the Consumer Price Index overstates the real impact of inflation due to its treatment of homeownership.

Mr. President, I think we really should have the attention of our colleagues.

The PRESIDING OFFICER. The Senate is not in order.

The Senator from South Carolina may proceed.

Mr. HOLLINGS. I thank the distinguished Presiding Officer.

I think at this particular point, the Senator from New Mexico, the chairman of our committee, who has done such an able job, would like to say something about discipline. I know they want to conclude action on this particular resolution either this evening or in the morning. And in the course of my comments, I want to refer to the discipline the chairman maintained in getting the spending cut package of the President through the Senate. He is to be commended.

I am very pleased with it. As you know, last year we fought and struggled very hard to balance the budget. At that time, as chairman of the Budget Committee, I wanted to save several billions of dollars. We proposed a balanced budget at that time but it evaded us because of higher unemployment and the lame duck session.

Now with that experience behind us, Mr. President, maybe we have a chance to really get on top of the budget. A chance to really develop credibility in the budget process, to really effectuate a dis-

cipline and a credibility within the Budget Committee that will make it meaningful.

I am convinced the distinguished Senator from New Mexico agrees with me. When he comes to the floor, we will get into it more thoroughly because there are certain strong statements that our distinguished chairman has made on this particular point.

More than anything else, a sense of history is good at a time like this because it is important to review the various events that have developed politically over the last decade.

But let me say that I am not talking in a partisan fashion. In fact, I rather agree with deTocqueville who said there were many men of integrity in both parties in America, but in America there is no party of integrity. That has not changed much in 100 years.

So to begin 30 years ago, what we had in essence was Harry Truman balancing budgets. For 4 of his years he had a balanced budget. Furthermore, between 1950 and 1960, the cumulative deficit for the entire 10-year period was only $17.7 billion.

Between the period of 1960 and 1970, with the New Frontier, the Great Society, and the war in Vietnam, the entire 10-year cumulative deficit was only $57 billion. But by the year 1976, under President Ford, we hit the high mark of a $66 billion deficit in 1 year alone.

How did it happen? How did it really occur, beginning in the 1970's, that the budget went out of control?

Well, for one thing, we did exercise restraint when we had to in the 1960's. I happen to have served on the Appropriations Committee. We did not have a Budget Committee at that time. We conferred with the House side and George Mahon, who was then chairman of the conference committee, and in December of 1968 we cut back $5 billion in spending, sort of a minor reconciliation.

We just agreed among ourselves that somehow, some way, we had to get on top of the pending inflation. At that particular time, in conscience and in fact we cut some $5 billion in spending on December 5, and came back with fiscal year 1968–69, having a surplus of $3.2 billion.

Then what happened? Well, there were a lot of things that came about. And that is why I say a sense of history is so important. Because the next spending argument we faced was about taking programs at the Federal level—the grants, the guarantees, the assistance—and sending them back down to the local level where they can be better administered. We used a characterization then that said sending money to Washington and having the program administered there but the dollar being sent back home was like getting a blood transfusion from your right arm to your left arm with a leaky valve. It cost $3 for every $1 in the particular program.

But we had that movement going on by President Nixon until in 1971, he picked out a poll that I will never forget. It showed that the distinguished Senator from Maine, Senator Muskie, was leading, and there was panic. So at that particular time President Nixon said:

> I am not going to argue with that Democratic Congress any more. Let them pass their programs as long as we get our programs through. What I will do is I will impound, I will rescind, I will defer their programs, and I will take as many as I can possibly get through the national Congress and send them on down to the local level. We will have revenue sharing.

And therein a spending spiral started in 1971–72.

And as we all know next the lawsuits came about.

President Nixon did defer, he did rescind, he did impound. But all the cases and decisions were against him and we got both the programs he wanted and the ones he did not. A double dose of Government. We ended up with a $45 billion deficit in fiscal year 1975. We never heard of such a thing in the entire 10 previous years with the Great Society, the New Frontier, and the war in Vietnam.

I will never forget the Chairman of the Council of Economic Advisers next proposing what they called a full employment budget. That says, "Act as if you inherited a million dollars from your uncle, go ahead and spend it."

Of course, you have never inherited it but you spent it anyway. That is what promoted profligacy and waste.

What that policy said was that if we had full employment we would have so many billions in revenues. And based on that assumption we will appropriate. And if it did not happen, we have a miscalculation. So we had the full employment budget, without full employment revenues, and created a veritable financial cancer.

It did not take the Democrats long to move beyond that particular challenge, particularly Wilbur Mills on the House side.

Let me read what was just stated by Dr. Martin Feldstein, the president of the National Bureau of Economic Research, in the Wall Street Journal in February 2, 1981.

> Between 1971 and 1980, the average real social security benefits paid to retired workers rose more than 30 percent. The average real wage in private employment, however, fell by 10 percent before tax and even more after tax . . . That increase, which caused benefits to depart from the long established relation to earnings, was not the carefully considered choice of Congress but an election year gambit of Ways and Means chairman Wilbur Mills, who momentarily saw himself as a Presidential aspirant.

Of course, that is exactly what occurred. There was no Budget Committee to watch and let me say that even with all the watchers we have today, you do well to watch the Ways and Means and Finance Committees. I have not found out yet how to have a close enough watch on them, even with a Budget Committee. They are very, very elusive and difficult to catch.

In any event, that is what happened. They started immediately in 1972 with a 20-percent increase in social security benefits and added automatic cost-of-living increases on top of that. And you know what they did next? They put off the effect of the COLA for 3 years. They wanted to get past the election and get into the next term. They were all looking at it presidentially and delayed its start until 1975—a most insidious of financial practices.

We are constantly getting approved in Congress, approved right here on the Senate floor similar gimmicks. We let future costs slide around the corner, let them slip and slide, saying watch the right hand, see the left hand, hoping you really cannot see either. It is a magician's act, whereby we recently increased, for example, the social security taxes but did not put the increase into effect until after our reelection. We waited until January 1981 to implement the tax, not November of 1980 when we were all trying to get reelected.

So we have not been candid, Mr. President, we have not been honest with the taxpayers. These are the kinds of things that led to a Budget Committee and the budget process.

Now, Mr. President, that is a brief history of how a lot of those practices came about and how we ended up with these budget deficits. Yet I know of no greater financial cancer on the body politic of the United States and its fiscal system than excessive cost-of-living adjustments, which have overstated by billions and billions of dollars the real impact of inflation. For example, outlays for explicitly indexed programs, only amounted to 3 percent of the budget in 1970. But within the 10-year period since then, they have reached 30 percent, or almost a third of the budget. And further, in the last 3 years, they have overcompensated retirees relative to workers, the very people paying the bill.

I want to hear that crowd on the floor that has been talking about middle America talk about this issue. They all talk about the programs we have for the hungry poor. And the idle rich can look out for themselves with their tax straddles. You cannot get them. They will be in here in planes and they will take care of themselves. do not worry about that. But it is middle America who is so frustrated. And it was compounded when they thought they had the solution in 1976 with Jimmy Carter.

He talked about zero-based budgeting, that he was going to balance the budget. He talked of deregulation. He talked of sending Government back to the local level. But we had more bureaucracy, more regulation, and more unbalanced budgets in that 4-year period of active fiscal rhetoric, and the distinguished gentleman is back down in Plains as a result.

Yet I still need to ask how we can conscientiously, as members of this Committee on the Budget, congratulate ourselves about this budget package that still leaves us with a $45 billion deficit? Please be here tonight when we break or tomorrow morning when we complete action on the resolution, because you are going to hear me thank the distinguished chairman and the distinguished chairman is going to thank the ranking member, about our good work. And we are all going to run up into the TV gal-

lery—I hope they invite me—and we are going to get on TV and say, "We have made history. We have cut $2 billion more than President Reagan; send it over to him in the hospital as a present, we are doing even better, the country has turned around, we are saving so much money."

Bunk. We are still spending faster than we are saving and will continue to do so. Why? Because of these excessive cost-of-living adjustments. And that is why I have offered my amendment—not to eliminate COLA's but to simply eliminate the overcompensation in them. This does not eliminate the cost-of-living adjustment, but the overcompensation feature of it. And with this amendment we would save $2.6 billion in fiscal year 1982, and over a 6-year period nearly $17 billion.

COLA's themselves cost us $22 billion in the 1982 budget. Yet we spend our time arguing about $3 billion for SPRO, or a little $100 million over here for the minority youth to be trained, or another $150 million trying to get comprehensive health care centers for the Senator from Massachusetts. We all get out here and moan, cry, weep, and wail, trying our dead level best with $100 million amounts when we have a multibillion-dollar hemorrhage in the budget.

Specifically, Mr. President, it is clear that Congress must review the cost of automatically indexed programs if it is ever going to balance the budget. As I have stated, the fiscal year 1982 increases alone will exceed $22 billion and over the period 1981 to 1986, COLA costs will exceed $272 billion.

Since I see the distinguished chairman of our Committee on Armed Services, I should also take this opportunity to mention that we have in the Budget Committee another related problem. That is the semiannual COLA paid to military and civil service retirees. I happened to have been there in 1976, when we made the political decision to do away with a 1-percent kicker. We had to face up to it. But opponents raised the point of the Constitution, germaneness, and several other arguments. Over the leadership then of our distinguished majority leader, Mike Mansfield, we finally got the bill to the floor, got 82 votes, and won. But it was regularly almost a fist fight on this floor to accomplish that.

And sadly, when we got it, we had to give in at the last minute and say, "We will give them a twice-a-year cost-of-living adjustment."

Fortunately, we did away with that in this resolution. I hope the authorizing committees will follow through.

I say that because last year in June, when we voted the same measure, the Governmental Affairs maneuvered around and tried to take the savings out of the postal operations function.

Mr. TOWER. Will the distinguished Senator yield?

Mr. HOLLINGS. I yield.

Mr. TOWER. I might note that I did support the committee's action on the COLA.

Mr. HOLLINGS. Mr. President, I appreciate the distinguished Senator's support and the fact that they have done away with it on retirees over in the armed services already.

I had to go before all the retirement groups last fall in the campaign and the only way I could even get their attention was to ask all who had retired before 1976 to please raise their hand. That was, generally speaking, the majority of those in the room. Ninety-five percent would always raise their hands.

I said, "You never heard in your time of retirement about increases twice a year. You never paid for it. I know you are not welfare recipients, you do not want welfare and I know you want to understand that your retirement system is $130 billion underfunded right now, $130 billion."

So, then, they sort of stopped and that is how I got their attention. I did not get their votes, though, I can say that.

In any event, sound fiscal management requires control of entitlement programs in general and control of those that are automatically indexed in particular. Without such restraint, the allocation of a large percentage of scarce resources will continue to take place automatically without explicit consideration of conflicting policy goals and priorities by Congress and the President.

And we are going into a first budget resolution markup next week. The hearings are going on at this very minute. And as we move into that, we shall be setting priorities. And the Senate, in and of itself, can change policies around by how they set those priorities.

But unless we get rid of this financial cancer, we will continue to unnecessarily spend billions upon billions of dollars and continue to watch our retirement trust funds go into red ink.

Let me state further, Mr. President, that a comparison with private retirement systems should also be made. The Federal cost-of-living adjustment provisions are the most generous in the Nation. Yet we are not trying to eliminate these at all. Forty percent of private pension plans have no cost-of-living provision. Almost half have no COLA provision at all. Only 4 to 8 percent of the private plans are adjusted automatically for inflation and generally not for the full amount. No private pension plan is automatically adjusted twice a year.

So we have not been inconsiderate. We believe in social security and other Federal pensions. We strongly support the programs and the retirees. But we should look at the systems with sound financial views. If there are increases in benefits, let us have increases in taxes. Let us keep the trust funds solvent. But do not let us have the unnecessary, overcompensated increases. Because then what do we do? Bust the social security fund or let the civil service trust fund go under?

We have three major retirement funds involved. The social security fund will run out of money next year, 1982. The railroad pension fund will run out of money in 1984. The civil service retirement has already run out of money. We have $166 billion unfunded liability now and it goes up in the next 5 years to $244 billion.

So, as budgeteers let us look conscientiously at the problems of indexing. And specifically let us look at what President Reagan's own supporters, his staff, his studies, and even the main man on this particular measure, David Stockman, have said.

On March 12, just last month, before the Senate Budget Committee, Mr. Stockman said this:

> My contention in the past, and I think it is demonstrable both empirically and theoretically, is, yes, the CPI has been overindexing for about 2 or 3 budget years now, due to the fact that inflation has been getting worse, that interest rates have been rising, and that housing prices have been increasing at a differentially more rapid rate than the general price level.

In fairness to the distinguished gentleman, he went on to say, "Have faith; don't worry." He said:

> With our economic plan, we will bring inflation down, and then we won't have that inordinate, overweighted home mortgage factor in the Consumer Price Index.

And what happened with President-elect Reagan's own social security task force, as reported in the National Journal last fall? This is President Reagan's social security task force:

> The task force further recommends that benefits for current recipients, which increase automatically along with the consumer price index, be boosted by the increase in prices or wages, whichever is lower.

In other words, they have recommended exactly the amendment submitted by the Senator from South Carolina.

With respect to the Hoover Institution and a social security adviser to President Reagan, Rita Ricardo-Campbell, she is quoted in the Wall Street Journal on March 5:

> The monthly cash social security benefits should be indexed to the lower of the changes in the consumer price index or the already existing wage index. . . . It is unfair that social security beneficiaries are better protected against price increases than workers.

So we have that particular endorsement not only from the study panel but also from a social security adviser to President Reagan, Rita Ricardo-Campbell. And this is in addition to President Reagan's own Director of the Office of Management and Budget talking about the problems of overcompensation in indexing.

Mr. President, we also have various economists who are close to the picture. I have seen Dr. Arthur Burns several times counseling with the President. I have the greatest respect for him. I follow his counsel in large measure. I quote from his remarks before the Senate Budget Committee on January 21, the day after the inauguration. The distinguished Senator from New Mexico already had us working. He was not going to let us go. We could not get to an inaugural party or anything else. He was beginning to pick our pockets—but not these privileged classes. Listen to this:

> I would definitely advocate a change in the social security law under which adjustments for inflation would no longer be as reckless

as they are under current law. . . . Social security recipients during the past 5 years have received a larger percentage increase in their benefits than have people working for wages and salaries. . . . Therefore, I think we need to adjust social security legislation one way or another so that social security recipients are no longer what they have become—a privileged class, being treated better than our working people.

That is a statement by Dr. Arthur Burns, former head of the Federal Reserve and one of the principal economic and financial minds in this country.

Elmer Staats, the distinguished Comptroller General, who held that post for the past 15 years, had many recommendations about economy in Government. I quote what he had to say about this subject before the Committee on Appropriations on January 29, 1981:

It is widely agreed that without restraint in the growth of Federal expenditures it will not be possible to end inflation. . . . There is little prospect for achieving this restraint without some check on the programs which are indexed. . . . Under current inflationary conditions, it is necessary for all groups in society to share the burden of bringing inflation under control. . . . Does the Congress really intend that the people receiving these benefits are to be fully protected from the rising price of oil when this protection cannot be provided to most Americans.

Mr. President, when the distinguished, retired Comptroller said "some check," this amendment is a minimal check.

We had another amendment in the Budget Committee to have COLA's conform to the fiscal year—instead of a July 1 payment, have an October 1 payment. That change itself would save us over $4 billion in the next fiscal year, 1982, and it would go up to nearly $20 billion over the next 6 years. But we did not get much support for that. So I wanted to approach this problem in a minimal fashion and not let anyone miss any payment for the 3-month period. But some check is necessary—namely, the overcompensation, the unjust enrichment feature of COLA's.

Mr. President, this has been a sort of bipartisan approach. The Democratic chairman of the Council of Economic Advisers, Charles Schultz, just retired, testified before the House Budget Committee on March 10. I quote:

A direct attack should be made on the problems of indexing in Federal programs. . . . It seems to me only proper that most beneficiaries of indexed programs should have to share—along with wage earners—when the Nation suffers a loss of national income. . . . I see no reason why either workers or general taxpayers should pay additional taxes in order to support a windfall for program beneficiaries, and to insulate them from sharing a national income loss.

So it is called a windfall, a reckless procedure—actually, a privileged class—by Democrats and Republicans, liberal and conservative economists alike.

Dr. Lawrence Chimerine, chairman and chief economist at Chase Econometrics, told the House Budget Committee on March 17 of this year:

In my view, unless indexing is directly attacked within the scope of budget reductions, there is a potential for continued explosive growth in Federal expenditures in the years ahead. . . . Several of the indexed programs which are part of the so-called "safety net" provide substantial benefits to those who are not poor. . . . Thus, I would target more of the cuts to the indexed programs, by changing the formulas for indexing, and less in some of the programs which have thus far been designated for budget cuts.

In other words, a proper order of procedure would be that before we cut any particular program's budget, we should go first to the unjust enrichment, we should go first to the windfall, we should go first to the inequity, we should go first to the privileged class, before we cut strategic petroleum reserves, education, veterans, or whatever it may be.

Incidentally, the administration saw no problem in capping the veterans' doctors pay bonus. That was part of the several hundred million dollar cut from the veterans program that we tried to restore.

The veterans' doctors got capped. They cut them back, but they could not cap the real programs that have such an impact upon the Federal budget.

Mr. President, Robert J. Myers, of the National Commission on Social Security, and I quote him, said before the Budget Committee for his Commission on Social Security:

The indexation of pensions in force should not, over a long period of time, put retirees in a better position than active workers. . . . If the indexing factor results in benefits rising more rapidly than net take home pay of active workers over a period of several years, this is an inequitable situation. . . . Remedial action should be taken, such as capping the indexing factors or having them be the lower of price increases or wage increases.

That is exactly the amendment before the Senate today recommended by this august member of the National Commission on Social Security.

Mr. President, I could go on. I have several other quotes that I wish to bring to the attention and maybe if my distinguished chairman of the Budget Committee is in the cloakroom——

Mr. DOMENICI. I am right here.

Mr. HOLLINGS. There he is.

This really moves me. I wish to quote this. This is from the Senate Budget Committee, February 27, 1980. I quote the distinguished chairman of the Budget Committee, the distinguished Senator from New Mexico, who agreed and joined in this statement with Senator Bellmon, the only economist who came out on target last year. We are all fussing around now about the CBO figures wrecking President Reagan's programs, that President Reagan's program is entirely too optimistic or inflationary. But Senator Bellmon came out on target last year relative to unemployment figures. So now let us see if I do not believe he is on target again with this particular problem of indexing, along with our now distinguished chairman from New Mexico:

Finally, Mr. Chairman, I would like to record my personal judgment that re-examining past indexing of Federal programs remains one of the two or three most critical budget issues facing Congress. Indexing, especially indexing of entitlement programs, perpetuates the inflationary bias of Federal spending and makes our efforts to control inflation that much more difficult.

Mr. President, I am willing to ask unanimous consent that the distinguished chairman have 5 hours to explain that. I do not want him to run out of time. I think he and the distinguished majority leader have brought discipline, but I do not want him to go up and get on TV either late tonight or tomorrow now saying what a good job we have done and then go down to the Washington Hospital Center and say: "Mr. President, you have been wounded but you have been cured. Look what we have done. We have gotten your program through."

Because rather than all that saving, we are still spending money faster than it is coming in.

Mr. President, I ask unanimous consent to have printed in the RECORD a series of arguments for reforming COLA's, a set of observations by a number of distinguished economists and others, and an editorial from the April 6 Businessweek.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ARGUMENTS FOR REFORMING FEDERAL COLA PRACTICES

I. THE LOSS OF BUDGET CONTROL

Failure of Congress to bring automatically indexed programs under control is an admission that it cannot put its own house in order. Congress will destroy both the credibility of the budget process and its own ability to control Federal spending.

In little more than 10 years, Congress has lost control of nearly ⅓ of Federal budget outlays through indexing. In 1970, outlays for explicitly indexed programs accounted for only 3 percent of the budget. By 1975, this amount had grown to 25 percent, and today it is over 30 percent. This figure will continue to increase over the next several years even if no other programs are indexed.

Congress must review the cost of automatically indexed programs if it is ever going to balance the budget. FY 1982 COLA increases alone will exceed $22 billion. Over the period FY 82–86, COLA costs will exceed $272 billion. Control of these programs is essential to budget control and reducing inflation.

Sound fiscal management requires control of entitlement programs in general and control of those that are automatically indexed in particular. Without such restraint, the allocation of a large percentage of scarce resources will continue to take place automatically, without explicit consideration of conflicting policy goals and priorities by the Congress or the President.

Large automatic increases in indexed outlays pose significant problems for economic stabilization policy. These increases are greatest in times of rapid inflation, adding to spending at a time when fiscal restraint is normally called for to slow growth in aggregate demand and combat inflationary expectations. Control and restraint must be exercized to prevent this.

II. INADEQUACY OF THE CPI AS A METHOD OF INDEXING

Using the CPI fully protects retirees from the impact of inflation while workers, who are supporting the federal retirement programs, are doing worse. Over the last three years, retirees were overcompensated relative to workers by 8.6 percent at a cost to the treasury of $15 billion.

The CPI overstates the costs of homeownership by ignoring the investment value of a home and by overstating the impact of high mortgage rates. Over the past four years, the CPI overstated inflation due to this hous-

ing component by 5.2 percent at a cost to the treasury of $10 billion.

The upward bias in the CPI due to homeownership results in volatile movements in the index that distort Federal expenditures and add to inflationary pressures. For example, during the first half of 1980 the CPI showed an increase in homeownership costs of 25 percent. The precipitous decline in interests in June of that year then resulted in an increase of only 2 percent over the next four months.

The CPI uses a fixed and out of date "market basket" for its base. CPI is calculated on a "market basket" of goods constructed eight years ago. In addition, a fixed "market basket" can significantly overstate the true cost of living. This happens because consumers, by purchasing less of those goods that have become expensive and more of those that have become cheaper, can and do achieve satisfaction equal to that of the original "market basket."

A policy of fiscal restraint necessary to reduce the rate of inflation should not be weakened by an unnecessarily liberal indexation procedure which could cause budget outlays to expand faster than taxable income.

Beneficiaries of Federal programs should help to absorb part of the decline in the standard of living—when prices rise faster than wages, only those working now experience a decline in the standard of living since beneficiaries of Federal programs are fully compensated.

III. ARGUMENTS FOR LIMITING COLA INCREASES TO THE LESSER OF THE CPI OR WAGE INDEX

Limiting COLA increases to the lesser of the CPI or the wage index would save $2.6 billion in FY 82 and $17.0 billion over the period FY 81–86.

Limiting COLA increases to the lesser of the CPI or wage index would restore equity to the working man. Currently, those who work, pay taxes, and support the retirement system are losing against inflation while the retiree is fully protected.

Limiting COLA increases will do much to restore the solvency of the Social Security, Civil Service, and Railroad Retirement trust funds. It is estimated that Social Security will run out of cash to pay benefits in 1982. The Civil Service trust fund currently has an unfunded liability of $166 billion and by 1986 it will exceed $244 billion. The railroad industry pension fund will be insolvent by 1984 or 1985.

Federal COLA provisions are the most generous in the nation. No private pension plans are automatically adjusted twice a year. Only 4 to 8 percent of private plans are adjusted automatically for inflation and generally not for the full amount. Nearly 40 percent of private pension plans have no COLA provision at all.

Beneficiaries of Federal programs should help to absorb part of the decline in the standard of living—when prices rise faster than wages only those working now experience a decline in the standard of living since beneficiaries of Federal programs are fully compensated.

There has been a tendency to regulate in recent years to achieve social objectives such as clean air, worker safety, etc. These costs are paid in higher prices for which beneficiaries of Federal programs are fully compensated while persons who are working are not.

STATEMENTS ON THE NECESSITY OF REVISING FEDERAL COLA PRACTICES

"I would definitely advocate a change in the social security law under which adjustments for inflation would no longer be as reckless as they are under current law. . . . Social security recipients during the past 5 years have received a larger percentage increase in their benefits than have people working for wages and salaries. . . . Therefore, I think we need to adjust social security legislation one way or another so that social security recipients are no longer what they have become—a privileged class, being treated better than our working people."—Dr. Arthur Burns, Senate Budget Committee, January 21, 1981.

"It is widely agreed that without restraint in the growth of Federal expenditures it will not be possible to end inflation. . . . There is little prospect for achieving this restraint without some check on the programs which are indexed. . . . Under current inflationary conditions, it is necessary for all groups in society to share the burden of bringing inflation under control. . . . Does the Congress really intend that the people receiving these benefits are to be fully protected from the rising price of oil when this protection cannot be provided to most Americans."—Elmer Staats, Committee on Appropriations, January 29, 1981.

"The task force further recommends that benefits for current recipients, which increase automatically along with the consumer price index, be boosted by the increase in prices or wages, whichever is lower."—President Reagan's Social Security Task Force, as reported in the National Journal, November 29, 1980.

"A direct attack should be made on the problems of indexing in Federal programs. . . . It seems to me only proper that most beneficiaries of indexed programs should have to share—along with wage earners—when the Nation suffers a loss of national income. . . . I see no reason why either workers or general taxpayers should pay additional taxes in order to support a windfall for program beneficiaries, and to insulate them from sharing a national income loss."—Charles Schultze, House Budget Committee, March 10, 1981.

"In my view, unless indexing is directly attacked within the scope of budget reductions, there is a potential for continued explosive growth in Federal expenditures in the years ahead . . . several of the indexed programs which are part of the so-called "safety net" provide substantial benefits to those who are not poor. . . . Thus, I would target more of the cuts to the indexed programs, by changing the formulas for indexing, and less in some of the programs which have thus far been designated for budget cuts."—Dr. Lawrence Chimerine, Chairman and Chief Economist, Chase Econometrics, House Budget Committee, March 17, 1981.

"Between 1971, and 1980, the average real social security benefits paid to retired workers rose more than 30 percent. The average real wage in private employment, however, fell by 10 percent before tax and even more after tax. . . . That increase, which caused benefits to depart from the long established relation to earnings, was not the carefully considered choice of Congress but an election year gambit of Ways and Means Chairman Wilbur Mills, who momentarily saw himself as a presidential aspirant."—Dr. Martin Feldstein, President, National Bureau of Economic Research, Wall Street Journal, February 2, 1981.

"The monthly cash social security benefits should be indexed to the lower of the changes in the consumer price index or the already existing wage index. . . . It is unfair that social security beneficiaries are better protected against price increases than workers."—Rita Ricardo-Campbell, Hoover Institution and Social Security Advisor to President Reagan, Wall Street Journal, March 5, 1981.

"The indexation of pensions in force should not, over a long period of time, put retirees in a better position than active workers. . . . If the indexing factor results in benefits rising more rapidly than net take home pay of active workers over a period of several years, this is an inequitable situation. . . . Remedial action should be taken, such as capping indexing factors or having them be the lower of price increases or wage increases."—Robert J. Myers, National Commission on Social Security, Senate Budget Committee, February 27, 1980.

"Finally, Mr. Chairman, I would like to record my personal judgment that re-examining past indexing of Federal programs remains one of the two or three most critical budget issues facing Congress. Indexing, especially indexing of entitlement programs, perpetuates the inflationary bias of Federal spending and makes our efforts to control inflation that much more difficult."—Senators Domenici and Bellmon, Opening Statement, Senate Budget Committee, February 27, 1980.

[From Business Week, Apr. 6, 1981]

STOPPING ESCALATION

President Reagan and his advisers apparently do not yet understand just how important it is to check the continuing escalation of Social Security benefits before the whole system comes to pieces. Early in March the Senate Budget Committee was prepared to change the present system of adjusting benefits in step with the consumer price index, which tends to overstate inflation. The President personally quashed the move—on the grounds that he had promised during the campaign not to change the indexation of benefits. In doing so, he made a serious mistake.

The President will get another chance, however, when the budget reconciliation bill comes up for vote in the Senate. Senator Ernest F. Hollings (D–S.C.) will propose an amendment limiting the cost-of-living adjustment in benefits to the increase in the CPI or the rise in average wages, whichever is less. The same limit would apply to federal retirement pay, which now increases in step with the CPI.

There is strong support for the Hollings proposal on both sides of the aisle in Congress. And there should be. Social Security benefits are, in effect, a transfer from workers to their elders. There can be no excuse for letting the income of retirees rise faster than the incomes of the workers who support them.

As a matter of simple equity, the Hollings approach should be adopted. As a matter of practical management, it has to be put into effect fast. The trust fund that backs up payments under the Old Age & Survivors Insurance system is close to the vanishing point. Unless the load on it is reduced, massive infusions of new money will have to be made, and much that is good about the present system—the link between benefits and contributions for instance—will be destroyed.

Mr. HOLLINGS. Mr. President, I yield to my distinguished chairman.

The PRESIDING OFFICER (Mr. DURENBERGER). The Senator from New Mexico.

Mr. DOMENICI. Mr. President, obviously the Senator has done a marvelous job. Perhaps it would best be said that I am his secret, silent, unrecorded cosponsor. Is that adequate?

Mr. HOLLINGS. Except for a wounded President, the Senator would be a cosponsor. I say that in all candor. He and I both know that.

Mr. DOMENICI. Mr. President, I think the Senate should know that the President of the United States did not ask us in his first significant series of cuts to include adjustments in the cost of living for pensions that the Federal Government has control over. I think the Senate should know that subsequent

thereto and before we completed mark-up on this reconciliation we met with him to discuss the issue once again. The President indicated to us that he was fully aware of the arguments on the issue of the Consumer Price Index and whether or not it was overcompensating in terms of real inflation, but he asked us not to consider it at this time, and I stress "at this time."

I know that the distinguished minority manager of this bill, who I greatly respect, was active as chairman before me in trying to bring fiscal restraint and he will respond that there is not a better time than now. But the President has asked us to get this first package through, see if it does not begin to have a real reaction in the American economy affecting both interest rates and inflation.

It is obvious that if we have a real positive effect in bringing interest rates down and inflation rates down and if that can be done rather quickly, then I think the good Senator would agree to the extent that that occurs that disparity that he is attempting to correct gets less, and if we can do this quickly the disparity will not cost in the outyears the many billions of dollars that have been projected.

So I am here today to ask the Senate to understand that budgeting is an evolving thing. We will have a first resolution very soon. It will be debated on the Senate floor and hopefully my good friend from South Carolina and I can take this reconciliation number and put it right in in each function. Assume it is done. We will not have the big job of squeezing each of those functions because we will have done that here in the last 5 days. I think some Senators feel that we should bring this cost of living up when we set the target there. That may be the case, but for now I think we should move along as we have, get the President's package completed, get the Senate committees to work on the law, get our first resolution and get into conference as soon as possible with the House of Representatives, and see if within a year or so we have not brought inflation and interest rates down substantially. If that is the case, the outyear savings attributable to the disparity in the CPI will be maintained and we will have an opportunity to look at it again in due course.

I say to Senator HOLLINGS that I have not changed my views. I want him to know that he has made a superb argument. The cost of living index and the entitlements, all of them together, are one of the most serious budgetary problems this Congress has, but let us not forget, and I do not address this to the Senator, but we are taking a pretty big bite here in the Chamber when we pass this resolution. We will cut 38 or so billion dollars. That is almost half the increase in the budget proposed for 1982. That is significant. That is historic when we consider we have been growing at the rate of 16 full percent a year for the last 4 years.

So I urge that the Senate reject the amendment. Hopefully inflation will be reduced and its necessity will be reduced also in terms of the sense of urgency, but if not, we certainly will have a chance shortly again to consider it.

I compliment the Senator not only for his presentation today but in committee. He did a marvelous job of explaining this and setting it right where it should be objectively and with all the expertise he could muster in quoting from those distinguished Americans who are as worried as he is about inflation and overbudgeting in this country.

Mr. HOLLINGS. Mr. President, I shall not press my distinguished chairman. I understand. There is a tide, though, in the affairs of men that leads on to fortune.

I believe that President Reagan has not only done the right thing and courageous thing in putting the attention of this country on the economic and fiscal problems that we have but I think he has a stronger mandate and stronger support than any of us ever expected which I welcome.

I think that necessarily, as the art of government is the art of the possible, we cannot bite off too much and I think initially perhaps he felt that way.

But we are seeing progress being made, although on the House side when we started they talked about October. I even heard Senators on the other side of the aisle talking about we ought to be good to get the Reagan program through by October, and over on the other side of the Capitol they spoke about $20 to $25 billion and now they are up to $40 billion, and they have come from October up to June. We are making good progress and we do not want to ruin that in any fashion, but we do not want to miss this particular opportunity.

I take it we will not be passing another reconciliation resolution in the next several years. That would be an inordinate kind of procedure. It is a rare tool and it should be used rarely, and I hope we will not come back.

So the only time we can get it in one locked fashion where it will encompass all the programs with limited debate but adequate debate over on the Senate side is right now.

It is the most insidious, treacherous provision we have in all of budgeteering. Here we come through, and under the leadership of the distinguished Senator from New Mexico, he really has established not only a discipline but a credibility for the Budget Committee and the budget process in a national Congress, and I do not want it to be like an example I will give.

There was a slogan once with an insurance company that was in difficulty down there. Then they reorganized and brought out the new company, and they wanted a new slogan for Capital Life. One of the suggestions was that Capital Life will surely pay if the small print on the back does not take it away.

What we are saying is this reconciliation bill will take care of all the programs if the small print does not take it away.

We are judicious. Members urge how much for veterans, how much for job training, how much for health care, and how much for women's, infants', and children's feeding, and how much all the programs are and how much we need for national defense.

This goes right in under civil service and everything else, an inordinate COLA adjustment right there, the military retirees also. The distinguished Senator from Texas, our chairman of the Committee on Armed Services, Mr. TOWER, is supportive of the twice-a-year COLA adjustment. It goes into all particular programs and it mushrooms them up beyond recognition and beyond management.

We say it is controlled, and then we are granted the golden opportunity, which I believe to be right now, and we fail to control, and I hate to see this opportunity slip.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. QUAYLE. I yield to the distinguished Senator from Washington 2 minutes.

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. Mr. President, I would like to congratulate the Senator from South Carolina on his wisdom, on his courage, and on his eloquence at being willing to take on a very difficult task but one which I am convinced is absolutely necessary if we are ultimately to gain control over the Federal budget.

We have not yet significantly approached the challenge of numerous entitlement programs which have led the way to a constantly increasing share of the Federal Government, being a constantly increasing share of the income of the United States being used by the Federal Government.

I do not believe this proposal is likely to pass or to be accepted by this body here this afternoon, but I do think the Senator from South Carolina points his way toward the future in stating that this is a fair proposal in that it does not treat people who are beneficiaries of social security in a way less favorable than it does those who are working for a living. He emphasizes the fact that those who are its beneficiaries will also be the beneficiaries of the cure of the ill of inflation from which we have been suffering so long.

I am convinced when it is explained to them appropriately they, like other Americans, will be willing to accept their share of the problems which we face in the future.

I believe the Senator has begun to lead us on a right course, and that sooner or later, and I hope for the good of the United States sooner, this proposal will be accepted.

The PRESIDING OFFICER. Who yields time?

Mr. QUAYLE. I yield 2 minutes to the distinguished Senator from Idaho.

Mr. SYMMS. I thank the Senator from Indiana for yielding.

I share the point of view that was just expressed by my colleague from the State of Washington. I congratulate the Senator from South Carolina for offering this amendment to this body today.

As we live our time through this life and we face these moments of opportunity, I think this is one opportunity we have to seize the initiative and to see that the risks of inflation are shared equally by all groups in the country.

The Senator from South Carolina probably does not go far enough. It is only a modest $17 billion over a 6-year period, I believe, which is correct, and it probably should go even further. But at least it starts us in the position of recognizing that we are constantly ratcheting everything upward and constantly trying to say there is one group or a special group that will not have to bear any of the burden of inflation.

A great part of the President's economic program is based on the fact of the anticipation of declining expectations in the future of inflation, and this amendment that the Senator from South Carolina proposes would be a signal to all people in the country, to all the financial institutions, to the young and old alike, that the Congress of the United States—the Senate in particular—is very serious about stopping the continuation of the fiat currency standard we have been on.

I think that is why it is so essential. It may not pass today, but I hope it does pass, because it will be a signal that the election in 1980 was not something to be taken lightly; that the American people definitely want a systematic change in what we are going to expect from the Federal Government.

We are not talking about taking anything away from any senior citizen. We are talking about holding down the level of the increase. As I say, it may not be enough, but it is a start in the right direction.

I intend to support the Senator's amendment, and I hope all Senators will support his amendment, because I think in the long range this amendment will be proven to be in the best interests of the senior citizenry retired community in the United States because it will help lessen the anticipation of inflation, bring down interest rates, bring more stability to our financial markets, bring more stability to the future of what people can expect, and make it so that we can actually live on the dollars we save today so we can live on them tomorrow.

I thank the Senator and I yield back the remainder of my time.

Mr. HOLLINGS. Mr. President, I thank the distinguished Senator from Idaho. He has made an outstanding statement, a very cogent statement about the amendment itself. It is a slight step in the right direction.

I also thank my distinguished colleague from Washington (Mr. GORTON)

I also ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. QUAYLE. I yield as much time as the Senator from Kansas would like.

Mr. DOLE. I am not going to vote for the amendment, but I want to commend the distinguished Senator from South Carolina. I would just say, as chairman of the Committee on Finance, it may be an option we may have to consider. But I am reminded of a breakfast meeting we had one morning which the President attended and where he indicated he would oppose this because of certain statements made during the campaign.

But defeating this amendment will not preclude the Committee on Finance from considering this or other matters. This Senator, for one, thinks we are going to have to face up to some of the difficult decisions, and while I applaud the Senator from South Carolina for raising it, I will vote against it. But I hope when push comes to shove, which is not going to be very long, that we keep this amendment in mind.

The PRESIDING OFFICER. Who yields time?

Mr. QUAYLE. I yield myself 2 minutes, Mr. President.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. QUAYLE. I, too, rise in support of the Senator from South Carolina's amendment. I supported him in the Budget Committee and I intend to do so on the floor.

I thought his statement was eloquent and to the point. I enjoyed listening to the historical analysis of why we got into this particular situation in which we are right now.

He went back and started with Truman, went through Eisenhower, and the Great Frontier and the Great Society, and Nixon and revenue sharing and Carter and Ford, and now President Reagan, and during those years I am sure the Senator from South Carolina will recall Republicans talking a lot about a thing called the "silent majority."

Well, I would just tell the Senator from South Carolina that I am fairly certain that there is a silent majority of Senators that support his amendment before us but are not really quite ready to come forward and vote for it; that there is, indeed, a silent majority. People say, "Yes, Senator HOLLINGS is on the right track. We have got to do something, but now is not the right time."

Well, if it is not the right time now, when will it be? Probably never, if we do not get on with the program of dealing with the indexing problem.

I was heartened to see the House of Representatives, in a subcommittee of the Ways and Means Committee, do something about indexing. They talked about deferring it until October 3. At least it is on the right road. It shows a little bit of progress; a little bit of sensitivity.

But, as far as an observation, Mr. President, we heard the argument that we cannot do it because of campaign promises; that this is an exercise in futility; and that everybody knows this is going to fail.

I am sort of surprised that not more Senators are here and participating in probably the most important amendment that has come to this floor on this budget reconciliation package. As far as I am concerned, it is the most important amendment. It is the most substantive amendment. It deals with an entitlement program that everybody talks about dealing with—to get in and do something about the entitlement program. But when push comes to shove, and when we get around to doing something about it, there is only talk, not votes.

But I want to tell the Senator that he has a silent majority. We had a silent majority in the early seventies. We finally got a majority in the 1980's—a real majority. So I hope, in due time, that the silent majority that supports the Senator from South Carolina in his proposal will still emerge as a real majority.

Mr. SYMMS. Will the Senator yield?

Mr. QUAYLE. I am happy to yield to the distinguished Senator from Idaho.

Mr. SYMMS. Mr. President, I would like to make the point that in the committee the distinguished Senator from Indiana made the point of where we find the safety net to see that Ronald Reagan's economic package will work.

I think the Senator from South Carolina is offering the President an opportunity to guarantee the success of his economic proposals to put this country back on the road to economic recovery, because this amendment would signal, I say again, that this Congress means business; that we are willing to bite the bullet.

It will not be detrimental to any group of people in the country. It will not deny any access or opportunity to their retirement. If anything, it will guarantee them a guarantee of a retirement pension that will pay for something, that will buy something in the future, because it signals that we have gone far enough, we have reached the breaking point and we are not going to just automatically try to exclude one group from our society from the ravages of inflation that have been caused right here in this Capitol by spending money that we did not have and printing money and inflating the currency which brings about the rise in prices that so badly hurts all of us in this country.

I think the Senator from Indiana made the point very well in committee one day. Where do we find the safety net? Where do you look? The Defense Department? Do you look in the appropriated fund?

There is only one place to look—the entitlement programs, and the sooner the better that we get on with it.

Again, I hope that this amendment will pass and we get a pleasant surprise.

Mr. QUAYLE. Mr. President, I do not think we are going to be surprised. Not many Senators are here to even partake in really the most important amendment that has been offered so far. You talk about history and historical movement, as the Senator from Idaho pointed out how important this is. This is the amendment.

I am glad to support the Senator from South Carolina. I hope he has a great deal of support, more than I think. Maybe a little bit of that silent majority that I am talking about out here might actually vote for this amendment. I sort of doubt it.

I imagine we might get in the teens somewhere, a double figure.

Indiana University played basketball the other day. A lot of teams tried to keep them down below the double figures. North Carolina came within 13 points—although I know the Senator is from South Carolina. We will probably get about that many votes on this amendment.

Mr. GRASSLEY. Will the Senator from Indiana yield?

Mr. QUAYLE. I am glad to yield.

Mr. GRASSLEY. Mr. President, I rise, admittedly, in opposition to the amendment, but also to raise a point concerning the timing of this proposal.

I know that it is easy to point out, even in fun, that everybody wants to put off to the future a critical issue, rather than face it in the present.

But, legitimacy for putting off this issue is due to the inordinate impact that the interest rate has on the cost-of-living increases.

In the last 18 to 24 months, we have had a rapid increase in the interest rates and, hence, that inordinate impact. So now we make a decision that we are going to cut down on the cost of living because of high interest rates.

The first question to be resolved is whether we have faith that the Reagan program is going to work. If the President's economic program works, then we will have a lower interest rate and less of an impact.

Second, let us assume that the Hollings amendment will be adopted. Then we will have a lower cost-of-living increase to compensate for high interest rates. Then, let us suppose that the Reagan program works. A year or so from now we will find out that, because interest rates are lower, senior citizens would not receive any cost-of-living adjustment in benefits. Then, we will have to, at some future date, face the prospect of raising the adjustment mechanism. We ought to not overreact to a 1- or 2-year increase in interest rates.

We ought to find out if the Reagan program is going to work. If it is, then that overcompensation taking place now is going to be compensated for down the road.

Most importantly, if we do not adjust the COLA mechanism now and, over the long term, it balances out, then we will have fewer questions in the minds of senior citizens as to whether their benefits are secured. For the last 7 or 8 years they have known what to expect. They can expect what the formula allows them to get each July 1. It seems to me that we are adding a measure of unnecessary uncertainty to senior citizens with respect to what financial resources they will have available.

Inflation impacts more severely on senior citizens than any other group in this country. We are going to add to that burden if we act precipitously. So let us wait and see.

Let me add a final point that I made in the committee. This entire subject ought to be considered as we deal with the question of what to do to restore the integrity and viability of the social security trust funds. Cost-of-living adjustments are a major cost to that fund. We ought to consider, at the time of our discussion, what to do with COLA. These moneys are supposed to come directly from the social security trust funds, not from general revenues. That is why I ask that we vote this amendment down.

Mr. HOLLINGS addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, the principal impact of inflation in this country is not upon the senior citizens. The principal impact of inflation in this country is on the people who are paying the bills—the taxpayers.

Mr. President, I want to thank the distinguished Senator from Indiana and the Senator from Idaho for their analysis of the problem and for the eloquent statement by the Senator from Indiana about the silent majority.

We should go one step further—and I know the fourth estate will take it in good stead. They have possession of the ball, and I never try to play one-upmanship with the newspapers or the media. But why are they silent?

They are silent because of the age of symbolism in which we live.

I remember during the last session when we had the food stamp amendment concerning college students. The Senator from Oklahoma, Senator Bellmon, and I put it through. But in the meantime we had Jesse Jackson and others fill my entire office until I explained it did not impact on them but on college students. But the symbol said that "Hollings is against food stamps, against feeding the hungry."

I had a chance, thank Heaven, to explain it and, once explained, we were able to eliminate the unneedy students. But the symbolism, the headlines, the media allocation of getting stories into 30-second shorts, mandates that they all stay silent.

What will the headlines say when we have this? Let us have truth in reporting. Truth in reporting would say that the taxpayers' savings have been cut. When we lose this, that is what happens. Their savings have been cut. Not the social security benefits. They are going to get a cost of living. We have not cut the benefits.

Or would the headlines say "Workers' earnings have been cut"?

The workers are the ones who are paying for this. We have outlined that, but that is not the way you write a newsstory. The newsstory and the headline will say on the one hand "Social security benefits are cut" if we succeed, or "Move to cut social security benefits defeated."

People just read the headlines. And then, why would a fellow who has enough sense to get to the United States Senate argue with that headline? We have enough problems up here. You only have 30 seconds, so how do you explain cost-of-living adjustments with its overcompensated home mortgage in the 30-second short? If you can do it, you are a genius. Or if you are running for public office and your opponent gets up and gives a page number and runs an ad, then try to explain it in half a minute.

That is why the majority is silent and that is why they do not vote. And they will not until it permeates the public's attention—an understanding of what is really going on on the part of social security and other retirement programs.

They do not want to be treated like welfare recipients. They pay into the fund. They are workers. They have earned their social security benefits. In fact, they characterize it as a trust fund and they do not want politicians monkeying with it. They want to be able to rely on it.

What destroys the credibility of that fund is we moved in, in 1972, with the 20-percent increase and made it political, and then put in the cost-of-living adjustments, which has only been in, as I indicated, for the past 6 years. So we began treating it politically by giving them benefits, and who is going to complain about that? Not the recipient. So he comes to expect them.

But if he understands that his benefits and his participation are going to be measured in an equitable fashion with the rest of America, workers, taxpayers, and the like, I think they will appreciate it. They would like to have the stability. They would like to get it aside from election politics and promises and excessive compensation.

But the Senator is right, that there is a silent majority. I hope we can, by this alone, at least educate enough to come around to the justice of the system and therein build credibility in us.

There are really no benefits in being on the Budget Committee. You cannot win any votes. You learn a lot about your Government and financing. And at least you ought to have the inner satisfaction and the clearness of conscience to realize that you have done an honest job.

We cannot maintain our credibility as long as we keep talking about uncontrollables and do not control that which can be controlled; namely, the COLA index in this budget process. The time is now and I am convinced we can get the support on the other side if we had the movement at this particular time by the administration. However, I understand those requirements.

I do appreciate the support that Senators on the other side of the aisle have given this particular amendment and I hope we can have it spread over the years.

I thank my colleagues for their attention. I am willing to yield back the remainder of my time.

Mr. HART. Mr. President, I opposed the Hollings amendment to change the way social security and other benefits are indexed, but I believe we must continue to study ways to make indexation

of such benefits more fair and economically realistic.

At some point soon, Congress must address the rapidly increasing cost to the Federal budget of entitlement programs as they are presently indexed. But first the administration has a responsibility to inform Congress of its own proposals on this issue. The Hollings proposal was not a part of the President's economic package, and the effect such a proposal would have on the average beneficiary is unclear. Congress must consider reforms of present indexing measures in the near future if we are to achieve the goal of a balanced budget. But we should first have the benefits of knowing the administration's position.

Mr. HOLLINGS. I yield back the remainder of my time.

The PRESIDING OFFICER. Does the Senator from Indiana yield back the remainder of his time?

Mr. QUAYLE. I do, Mr. President.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment of the Senator from South Carolina. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CRANSTON. I announce that the Senator from West Virginia (Mr. RANDOLPH) and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I further announce that, if present and voting, the Senator from West Virginia (Mr. RANDOLPH) would vote "nay."

The PRESIDING OFFICER (Mr. KASTEN). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 12, nays 86, as follows:

[Rollcall Vote No. 63 Leg.]

YEAS—12

Gorton	Humphrey	Nunn
Helms	Kasten	Quayle
Hollings	McClure	Rudman
Huddleston	Nickles	Symms

NAYS—86

Abdnor	Durenberger	Mattingly
Andrews	Eagleton	Melcher
Armstrong	East	Metzenbaum
Baker	Exon	Mitchell
Baucus	Ford	Moynihan
Bentsen	Garn	Murkowski
Biden	Glenn	Packwood
Boren	Goldwater	Pell
Boschwitz	Grassley	Percy
Bradley	Hart	Pressler
Bumpers	Hatch	Proxmire
Burdick	Hatfield	Pryor
Byrd, Harry F., Jr.	Hawkins	Riegle
	Hayakawa	Roth
Byrd, Robert C.	Heflin	Sarbanes
Cannon	Heinz	Sasser
Chafee	Inouye	Schmitt
Chiles	Jackson	Simpson
Cochran	Jepsen	Specter
Cohen	Johnston	Stafford
Cranston	Kassebaum	Stennis
D'Amato	Kennedy	Stevens
Danforth	Laxalt	Thurmond
DeConcini	Leahy	Tower
Denton	Levin	Tsongas
Dixon	Long	Wallop
Dodd	Lugar	Warner
Dole	Mathias	Weicker
Domenici	Matsunaga	Zorinsky

NOT VOTING—2

Randolph	Williams

So Mr. HOLLINGS' amendment (UP No. 40) was rejected.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. QUAYLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senator is correct. The Senate is not in order.

PROGRESS REPORT

Mr. ROBERT C. BYRD. Mr. President, I take the floor at this time to inquire of the distinguished majority leader what the program is for the remainder of the day and the remainder of the week, if he can tell us.

Mr. BAKER. I thank the minority leader for his inquiry.

Mr. President, as I indicated earlier, I believe that now we are making good progress and it would be worthwhile for this Senate to remain in session tonight, to a reasonably late hour—I would estimate 10 o'clock or something shortly after that.

I still have the somewhat timid hope that we can finish tonight; and if we can, I think it would be worth our investment of a little more time. But if we cannot finish tonight at 10 o'clock or a little after 10, I would expect to go over in recess until tomorrow at 9:30 and continue in session tomorrow until we finish, or perhaps tomorrow night. I hope not.

If we can finish this resolution tonight or tomorrow, it would be my hope and expectation that we could recess over then until Monday and not be in session on Friday.

However, for the time being, I think the better part of discretion is to continue with the consideration of amendments to this resolution until late evening, until 10 o'clock or a little after that.

Mr. ROBERT C. BYRD. I thank the majority leader.

BUDGET RESOLUTION OF RECONCILIATION AND INSTRUCTIONS

The Senate continued with the consideration of Senate Concurrent Resolution 9.

UP AMENDMENT NO. 41

(Purpose: To increase the level of savings to be reported by the Senate Committee on Governmental Affairs)

Mr. DECONCINI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arizona (Mr. DECONCINI), for himself, Mr. BOREN, Mr. PRYOR, Mr. DIXON, and Mr. RIEGLE proposes an unprinted amendment numbered 41.

Mr. DECONCINI. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 22, strike out lines 4 through 13, and insert the following:

"SEC. 11. The Senate Committee on Governmental Affairs shall report changes in laws to modify programs within the jurisdiction of that Committee which would reduce the costs to the Government resulting from waste, fraud, and abuse; administrative, non-defense related travel and transportation; consultant services; public affairs, public relations, public information, and Government advertising; audiovisual and film-making activities; and uncollected Federal debts. Savings in appropriations and expenditures from trust funds from such statutory changes shall be $3,900,000,000 in budget authority and $1,700,000,000 in outlays in fiscal year 1982 and $1,000,000,000 in budget authority and $2,000,000,000 in outlays in fiscal year 1983."

The PRESIDING OFFICER. The Senate is not in order. The Senate will be in order.

Mr. METZENBAUM. Mr. President, under the circumstances, I am prepared to go ahead, but I understood that the Senator from Arizona had asked if he could have a half hour. I said that I would not stand in his way, but I would not want to lose my standing on my order. If that means I would be losing my standing, then I would want to proceed prior to the Senator from Arizona.

Mr. HOLLINGS. Mr. President, I understand that the Senator from Arizona wants to go ahead. We have been trying to do it in an orderly fashion.

The distinguished Senator from Ohio was to have the next amendment, and then we were to have the three Proxmire amendments, with a time agreement. The Senator from Arizona now wants to have his time. I would be glad to have him proceed next, after the Senator from Wisconsin.

Mr. DECONCINI. Mr. President, we all have been waiting. I have been waiting a few days, too. I appreciate the Senator's effort to try to get this on the track.

How long is the Senator from Wisconsin going to take?

Mr. PROXMIRE. There are time agreements on two of my amendments.

Mr. DECONCINI. What is the time agreement?

Mr. PROXMIRE. Fifteen minutes on a side on one amendment; 10 minutes on a side on another amendment; the other would be a half hour.

Mr. DECONCINI. I inquire of the Senator from Ohio what the time agreement is on his amendment.

Mr. METZENBAUM. The Senator from Ohio is not under a time agreement, except the usual time agreement which is applicable—a 1-hour limitation, a half hour on each side. But I point out to the Senator from Arizona that under certain possibilities with respect to parliamentary procedure, it is entirely possible that that period could be extended to 2 hours.

Mr. CHILES. On the amendment of the Senator from Ohio?

Mr. METZENBAUM. That would be possible. I do not anticipate doing that. I think 1 hour would be totally adequate.

Mr. DECONCINI. How can the Senator from Ohio get more than 1 hour on an amendment?

Mr. HOLLINGS. He might have a motion under the Budget Act. I am guessing.

Mr. METZENBAUM. The Senator from South Carolina is, as usual, his discerning self.

Mr. DOMENICI addressed the Chair.

Mr. DECONCINI. Mr. President, do I have the floor?

The PRESIDING OFFICER. The Senator from Arizona does have the floor.

Mr. DECONCINI. I do not want to obstruct and force my way in here. I just want to explain that I have an amendment that I have been attempting to get up here for some days. I ask unanimous consent that my amendment be the order of business after the Senator from Ohio, if no one objects to that.

Mr. PROXMIRE. Mr. President, I have to object to that.

Mr. DECONCINI. Then, Mr. President, I will go one step further after the amendment of the Senator from Wisconsin.

Mr. DOMENICI. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. I have not called up any Republican amendments as we moved through this but I understand that Senator HELMS has an amendment. I think under the accommodation he would follow Senator METZENBAUM if he so desires after which it would be Senator METZENBAUM and then I would have no objection if the Senator from Arizona follows.

Mr. DECONCINI. Is there a time agreement on that amendment?

Mr. DOMENICI. Does Senator HELMS have some time in mind on his, or will he just take what is allowed under the act?

Mr. HELMS. Let us not enter a time agreement now. I think the Senator and I can work that out.

Mr. DOMENICI. He would prefer to leave that open under the act at this point.

We still agree that the Senator from Arizona is after that if it is all right.

The PRESIDING OFFICER. The amendment of the Senator from Arizona is the pending question at the moment.

Mr. DOMENICI. I did not hear the Chair. Will the Chair repeat that?

The PRESIDING OFFICER. The amendment of the Senator from Arizona is the pending question at the moment.

Mr. DOMENICI. How did the amendment get pending when the amendment of Senator METZENBAUM was agreed upon to be next?

Mr. CHILES. He got the floor.

The PRESIDING OFFICER. The Senator from Arizona was recognized, and the Senator from Arizona submitted the amendment and the amendment was read at the desk.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the next order of business be the Senator from Ohio and following that the Senator from Wisconsin and his amendment, then the Senator from Arizona, and then the Senator from North Carolina.

The PRESIDING OFFICER. Is there objection?

Mr. DOMENICI. That is all right.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. I thank the Chair.

Mr. METZENBAUM. Mr. President, I thank the Senator from Arizona.

The PRESIDING OFFICER. Without objection, the amendment of the Senator from Arizona is set aside and it will reoccur in the order that was just specified.

UP AMENDMENT NO. 42

(Purpose: To require reductions in tax expenditures)

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated. The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM) proposes an unprinted amendment numbered 42.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 7, line 18, strike out "and ."

On page 8, line 2, strike out the period and insert a semicolon and "and".

On page 8, between lines 2 and 3, insert the following:

(C) The Senate Committee on Finance shall report changes in laws providing tax expenditures (as defined by section 3(a)(3) of the Congressional Budget and Impoundment Control Act of 1974), sufficient to reduce such tax expenditures by $100,000,000 in fiscal year 1981, $1,300,000,000 in fiscal year 1982, and $800,000,000 in fiscal year 1983.

Mr. METZENBAUM. Mr. President, the amendment that I have sent to the desk may very properly be called the tax expenditure amendment, the tax abuse amendment, the tax loophole amendment, the tax shelter amendment, or whatever name someone might find appropriate to call it. But it deals with that area.

Mr. President, may I have order in the Senate?

The PRESIDING OFFICER. The Senator is correct. The Senate is not in order.

The Senator may continue.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the time taken not be charged against me.

The PRESIDING OFFICER. Without objection, time will not be charged.

Mr. METZENBAUM. Mr. President, let me take just a few seconds to review what has happened so far during consideration of this resolution.

Last Friday we accepted an amendment to restore $200 million to the school lunch program by taking that money from the foreign aid programs. And we proudly patted ourselves on the back for restoring some funds to the school lunch program. But let us be honest about it. The amount we added back is a drop in the bucket. It was a pittance compared to the amount we cut. We cut the total amount of the school lunch program by $1.6 billion and we restored $200 million—great big deal.

The Senate refused on several votes to add funds back to the veterans' programs for medical services, even though veterans have been told to expect those services.

The Senate voted against an amendment offered by the Senator from Arkansas (Mr. PRYOR) to reduce outlays by $2 billion in fiscal year 1982 by eliminating many wasteful consultant contracts. Numerous hearings have documented the waste and abuse in this area of spending. Yet that motion was defeated.

The Senate voted against an amendment offered by the Senator from Michigan (Mr. RIEGLE), which I cosponsored to restore $800 million to the social security program and those funds would help the most needy and oldest social security recipients, those who only receive the minimum $122 social security benefit. President Reagan told Americans that basic social security benefits would not be eliminated. Surely this is a gaping hole in his so-called safety net.

In other motions we have allowed deep cuts in education, in mass transit, in the urban redevelopment program. Altogether we have cut deeply into social programs that help the poor, the working family, the middle class, the elderly.

But at the same time we have totally ignored one major issue and that is what is the full tax expenditures. We have cut human service programs but we have left intact billions of dollars in wasteful tax subsidies to the largest corporations of America and to those who are the most affluent Americans. I believe this is unfair. I believe it is inequitable. I believe it is wrong. I believe it is bad Government policy. The amendment I am offering this evening is designed to force a vote on the issue of tax expenditures. This is not the only tax expenditure that should be eliminated but it is a symbol. This particular one has to do with the commodity straddle, and commodity straddles serve absolutely no useful purpose in the economy. They do not add a single iota to the productivity of this country.

All they do is make it possible for people to play with the thing called puts and calls, and if a person has very intelligent and the best investment counselors and the best investment banking firms, they will teach him how not to pay his taxes and to kick them over into the next year. The fact is that this is but one of many special tax expenditures, special loopholes that exist in the law. We can name them.

I believe that we must eliminate these wasteful tax loopholes, special deductions, credits and exemptions. They are costing the Government billions of dollars each year.

My amendment would particularly direct the Finance Committee to eliminate an especially wasteful tax expenditure.

Now by adopting this amendment we would be able to restore funding to certain social programs, while at the same time we would not increase the deficit established by the reconciliation instructions.

By adopting this amendment, we will be saving $1.3 billion.

Mr. President, may I have order in the Senate, please?

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Ohio.

Mr. METZENBAUM. When the Secretary of the Treasury was before our committee today he gave us a story about the fact that we did not have to worry about some of the tax expenditures because as he put it if we can get this tax cut through there will be much less need for tax shelters, less need for the butterfly straddle.

Mr. President, I was in business before I came here, and every Member of Congress or the Senate knows that no one likes to pay taxes.

I do not care whether the rate is 70 percent, I do not care whether the rate is 50 percent, I do not care whether the rate is 30 percent, nobody likes to pay taxes. So I challenge the premise of the Secretary of the Treasury who suggests that somehow by bringing down some taxes for the more affluent people of this country that they are not going to be willing to play the same games with commodity tax straddles.

There are so many different areas of tax expenditures that could be closed by the Committee on Finance to fund needed social programs, and yet the fact is that this administration has refused to bring up any of them, to bring any of them to our committee or to the Congress for consideration.

According to the Joint Committee on Taxation, tax expenditures result in a loss of revenues to the Treasury of $266 billion a year as of 1982, and in the next 10 years it will cost the Federal Treasury $3 trillion.

I want to make it clear that many of these tax expenditures serve legitimate national policy goals such as the mortgage interest deduction which encourages homeownership and housing construction, tax deductions for charitable contributions, and other tax expenditures.

But other tax expenditures, such as the commodity straddle, which I offer to the Senate as a symbol of the entire issue, as the precursor of a number of other amendments that I will offer should I be able to get it through, have simply outlived their original purpose, and I believe they should be eliminated.

These tax expenditures are subsidies to special interests such as the timber industry, such as the oil and gas companies, and large commercial and retail chains.

But I want to also make it clear that there is nothing in this amendment that has to do with items I just mentioned. The only thing this amendment affects has to do with the commodity straddle. There is no sound policy reason why certain wealthy interests should receive tax breaks and let the rest of the taxpayers of this country have to bear the burden, especially at a time when we are attempting to balance the budget.

As a matter of fact, even Mr. David Stockman, the head of the Office of Management and Budget, recognizes the problem. On March 12, appearing before the Budget Committee, this is what he had to say about tax expenditures:

> I think that there are some tax expenditures that are obsolete, inefficient or unjustifiable. They ought to be eliminated as a matter of good tax policy and as a matter of political equity in some general sense.

Let me list several particularly worthless tax expenditures that I believe should be eliminated. I have already mentioned the commodity straddle. That is the only one that is before the Senate this afternoon. But in the area of industrial revenue bonds, known as IRB's, a group of bonds issued by local municipalities and counties that pay interest that is exempt from Federal taxes, as a result of this special provision the IRB's are especially attractive on the bond market, and I believe they can serve as a legitimate tool for local development. But in recent years, this expensive Federal subsidy has been used indiscriminately.

According to the Congressional Budget Office, more than $7 billion in bonds were issued in 1979 compared to only $1.2 billion issued in 1975. This resulted in a direct loss to the Treasury of $300 million in 1982 alone. That is a conservative estimate because that amount escalates to a Treasury loss of $5 billion over the next 5 years.

The real shame is that a large portion of these tax subsidies are being used to build McDonald hamburger stands, Stouffer's Restaurants and Hotels, racketball clubs, tennis clubs, golf courses, and I am even informed that they have been used to build go-go parlors.

This is a serious abuse of the original purpose of the IRB's. By restricting the use of IRB's to areas of the country that are economically distressed, and by limiting them to useful bona fide industrial development, we can better target our resources, while saving the Treasury $5 billion over the next 5 years.

Regrettably, the Senate Budget Committee rejected my motion to do just that. I am gratified to learn from Treasury Secretary Regan that the administration is considering tightening up the use of IRB's. Mr. Regan today said before the Budget Committee:

> There have been some abuses, in our opinion. We will probably be making suggestions to modify IRB's.

Another area of abuse with respect to tax expenditures has to do with special capital gains treatment for the timber industry. Although this particular amendment has nothing to do with that subject, it is an indication of the kinds of tax expenditures and tax loopholes that should be closed.

Timber ownership, because of unique tax rules, offers opportunities for some taxpayers to shelter profits associated with such ownership.

Originally, the special treatment was developed to encourage development of timberland. However, in practice, 16 firms, including the Nation's largest timber and paper companies, received two-thirds of the tax payments.

I want to point out to those Members of the U.S. Senate whose constituency includes farmers of every kind, whether they are wheat farmers, whether they are corn farmers, whether they farm soybeans or cotton or peanuts or tobacco, that all other groups, all other farming in this country, pay taxes at a normal rate. The more you make the more you pay. But we have special treatment for the timber industry. We say to the timber industry:

> You need only pay taxes on 40 percent of your profits. We will treat it, the sale of timber, as a capital gain.

That little dilly saves the timber industry $665 million a year which the rest of the people in this country have to bear as a part of their tax burden.

Then you look over at the oil industry. The oil industry has a special gimmick called writing off intangible costs for oil and gas drilling. Again I want to point out that the timber item is not in this amendment and the intangible costs for oil and gas drilling are not in this amendment. But these are the kinds of things we talk about when we talk about tax expenditures.

Even though the Reagan administration has already decontrolled domestic oil prices and has announced its intention to decontrol natural gas prices, the oil and gas companies continue to receive tremendous subsidies from the Federal Government in the form of special tax breaks.

The writeoff of intangible costs for drilling, such as exploration, labor, materials, supplies, and repairs, costs the Treasury over $2 billion a year. With decontrol there is absolutely no justification to continue this special writeoff. Yet the Senate Budget Committee has refused to eliminate this exemption.

It is an interesting fact of life that I was just talking about the fact that farmers are discriminated against in favor of the timber industry. When it comes to the writeoff of intangibles, all other industries in this country are discriminated against in favor of the oil companies.

Other companies do not get this special kind of special tax writeoffs.

Then there is another item that favors the banks of this country. No other business can do this. But the banks are permitted to have an excess bad debt deduction, purely on the basis of a figure. The tax laws allow the deductions by businesses of bad debts as a cost of doing business. But banks receive special treatment under the law and are allowed, through fiscal year 1982, a special fixed rate percentage loan business deduction for bad debts, whether or not they actually have those bad debts.

The actual bad debt experience of these banks has been considerably less than their statutory exemption. If they were only allowed to deduct bad debts upon their actual experience with bad debts, they would owe more than $500 million more over the next 2 years. Again, nothing is being proposed by the administration to pick up those dollars so that we might not have to cut back on some of the programs that have to do with human concerns.

I believe that tax expenditure should be eliminated as a matter of fairness and equity. Of course, not across the board, but eliminate those that are the most gross and most unfair and most inequitable and most discriminatory against farmers and business people. Unless we eliminate these unfair tax expenditures, we leave ourselves open to the charge of favoritism toward special groups and very wealthy individuals.

Mr. President, several of my colleagues on the Budget Committee have argued that this proposal to eliminate tax expenditures is actually an effort to raise taxes. That is wrong. If we eliminate tax expenditures, we do not increase taxes for lower and middle income families, nor do we increase it for those who are in the higher brackets. We only increase taxes for those who are getting special privileges under the law today.

By eliminating the special loopholes, we save money for the Treasury. We make it possible for the Treasury to reduce the tax burden on the average taxpayer and the average business.

Mr. President, tax expenditures do, indeed, cost the Treasury substantial millions of dollars. I believe that a vote for this particular amendment indicating that we are opposed or that we are prepared to give consideration to some of the improper, some of the wrong, some of the abusive tax expenditures, and to use that money for some of the human service programs is the right kind of vote. I think it would mean that the administration and the members of the majority party are not only willing to balance the budget on the backs of the poor and middle class Americans, but are willing to cause those who have special privileges under our tax laws to pay their fair share of the burden.

Mr. President, I reserve the remainder of my time.

Mr. LONG. Mr. President, will the Senator yield?

Mr. DOMENICI. Mr. President, I yield to the Senator from Louisiana.

Mr. LONG. Mr. President, what the Senator is suggesting is that we make a tax bill out of this budget bill. Mr. President, we are going to have a major tax bill before the Senate and Senators will have the opportunity of offering any amendment the mind of man can conceive, either to raise taxes or to reduce taxes. We are going to have before us what may very well be the biggest tax cut bill in the history of the country.

Under those circumstances, Mr. President, it is completely premature for us to try to make a tax bill out of this budget bill. Accordingly, Mr. President, I make the point of order that this amendment is not germane to the bill.

Mr. METZENBAUM. Mr. President, I believe the Senator's point of order is premature.

The PRESIDING OFFICER. The Chair would inform the Senator from Louisiana that a point of order is not in order at this time.

Mr. LONG. Mr. President, the reorganization law says that an amendment that is not germane will not be received.

Mr. METZENBAUM. But it also says it is not in order until time for debate on the amendment has expired.

The PRESIDING OFFICER. The Senator from Louisiana has the floor.

The point of order would be in order after the time for debate on the amendment has expired.

Mr. LONG. Mr. President, might I just discuss it? We have before us an amendment which, under the law, is an amendment that is not to be received. Therefore, I make the point of order that this amendment is out of order. It should not have been received and there is nothing to debate.

The PRESIDING OFFICER. The Chair is of the opinion that the point of order may or may not be correct. It looks as if it might be correct. But the language "shall not be received" is standard language used by the Senate in unanimous-consent agreements which impose germaneness on amendments. Under the precedents of the Senate, it has been held uniformly that, under those circumstances, a point of order against an amendment on the ground that it is not germane may not be made until the time of the amendment has expired.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. Mr. President, I yield whatever time the Senator from Kansas desires.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. METZENBAUM. Mr. President, may I make a parliamentary inquiry?

The PRESIDING OFFICER. The Senator from Kansas has the floor.

Mr. METZENBAUM. Mr. President, will the Senator from Kansas yield?

Mr. DOLE. Yes.

Mr. METZENBAUM Mr. President, a parliamentary inquiry. On whose time was the Senator from Louisiana speaking?

The PRESIDING OFFICER. The Senator from Louisiana was speaking on the time of the Senator from New Mexico.

Mr. METZENBAUM. Mr. President, I thank the Senator from Kansas.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, no one can accuse the Senator from Ohio of not being persistent. In the Budget Committee markup of the reconciliation resolution he insisted that so-called tax expenditures could be eliminated as an appropriate alternative to some of the spending cuts we are considering. Today, although his suggestion was rejected in the Budget Committee by a vote of 12 to 7, Senator METZENBAUM is urging the full Senate to accept the same notion. With all respect to the Senator, it is not a good notion, nor is it germane to this resolution.

TAX EXPENDITURES

Mr. President, we could spend the next several months here debating the question of what constitutes a tax expenditure and the question of whether tax expenditures are the functional equivalent of spending programs. I believe they are not at all the same, but that really is not the issue. The issue is whether we have the will to bring both spending and taxes under control. Whenever a particular tax credit, deduction, or other special provision is eliminated, the result is an increase in the total tax burden. And as we all know, increasing the tax burden—or allowing it to increase automatically due to inflation—is a very popular way of avoiding the problem of Federal spending that is out of control. Some of us believe that the American people have sent a clear message: Reduce spending and reduce taxes, and interfere less in our daily affairs. Tax increases do not fit into that picture at all, and they are not appropriate to our economic circumstances.

There are, of course, many problems in the area of tax policy that need to be addressed. But those matters must be distinguished from the problems of budget policy and the growth of Federal spending which we are addressing today. Unless spending is firmly controlled, and each spending program reexamined to determine whether it continues to meet a vital need in an efficient manner, whatever changes we make in tax policy will be insufficient to deal with the deep-rooted problems of our economy.

TAX POLICY PROCESS

There is no question that at an appropriate time we should all review special incentives in the Internal Revenue Code to assess their relative merits. But that exercise should be undertaken, not for purposes of budgeting, but in order to weigh the policy behind each tax incentive against other forms of tax reduction. If we proceed to act hastily on a few tax provisions, we will shortcut the normal procedures of the taxwriting committees in determining an appropriate level of revenues and how to arrive at that level. We should not prejudge the matter by trying to trade off so-called tax expenditures in order to allow a higher level of spending. When we do look at areas of alleged tax abuse in the Finance Committee, I hope that we can consider changes—and I may agree with the Senator from Ohio on some of the changes that should be made—that will allow for further tax reductions, not for higher spending levels.

TWO SIDES OF THE LEDGER

Mr. President, it is simply unwise to confuse the two sides of the ledger: spending and revenues. I say that because an important principle is involved here. To equate so-called tax expenditures with spending programs implies that the revenues generated by the hard work of the American people inherently belong to the Government. If you accept that idea then you can feel comfortable with the notion that foregoing revenues in a particular area for a particular purpose constitutes an expenditure of those revenues. I am not at all comfortable with that idea. It contradicts the tradition of free enterprise and individual effort that has generated the wealth we do have to share. It also typifies the way this Congress has, too often in the past, underestimated the creativity and imagination of the American

people. These, too, are good reasons for rejecting the amendment proposed by the Senator from Ohio.

Mr. President, I do not think there is any reason to debate this amendment further. It was rejected in the Budget Committee, and it is not a good notion for the reasons pointed out by the Senator from Louisiana, nor is it germane to this resolution. I think the point of order will lie.

We could spend the next several months here debating tax policy and what is or is not a tax expenditure. We will have at least one tax bill this year and, according to some, maybe two. I doubt that. But there will be all kinds of opportunities for tax expenditure debate.

There are a number of areas. Some may want to tax social security benefits or unemployment compensation. They are excluded from taxation. There are a number of areas the Senator from Ohio is interested in. Maybe those are some. But I think that most Senators would like to get on with the germane amendments, so I will not take any more time.

Mr. DOMENICI. Mr. President, I yield myself 1 minute.

Mr. President, this amendment is not germane. The Senator from Ohio knows it is not germane. He offered it even though he knows it is not germane.

We will be here an hour because the Senator from Ohio wants to talk about tax expenditures that are not germane to the issue. The issue was brought before the Budget Committee. The Senator knows that. The Budget Committee decided there would be no discussion of taxes in this resolution. And we have been eminently careful. There are no discussions of taxes.

The Senator knows that in the first budget resolution we cannot escape discussing taxes. He can talk about his butterfly straddle and whatever else he wants to talk about.

All we can do is offer a cumulative figure to the Senate of the United States for tax receipts for the years 1982, 1983, and 1984. We cannot talk about items.

He can debate those as part of assumptions. But he full well knows that this is a resolution cutting outlays and budget authority direct, indirect, and entitlement, and contains nothing whatsoever about taxes.

Therefore, this Senator or some Senator will raise the point of order as soon as the Senator has used up his time so we can get on with the matters that are before the Senate.

I know the Senator will say that all matters are before the Senate; that you are hurting the poor and he would help the poor and if we would allow his kind amendment here we would be on the backs of the rich instead of the backs of the poor.

He knows full well that is part of the rhetoric that is part of whatever he is working up to over the next 7 or 8 months. Perhaps he is running. I do not know what it is. But it does not have anything to do with cutting outlays, direct expenditures, entitlements, and authorizations that yield to them.

Having said that, I do not intend to debate the substance of this amendment. It belongs in the Finance Committee. It does not belong in our committee. We have a superb working relationship with that committee and we are not going to get involved with dictating to them. We cannot tell them what to do anyway. All we can do is set a lump-sum tax figure. Having said that, I hope our side will not use a lot of time so that we will not waste more time of the Senate by answering what is obviously not germane. It is relevant to the overall economics but has nothing whatsoever to do with what is before the Senate.

I yield back the remainder of my time.

Mr. METZENBAUM. Mr. President, I yield 5 minutes to the Senator from New York.

Mr. MOYNIHAN. I thank my distinguished friend for giving me the opportunity to speak at this point.

The legislation about which the distinguished chairman was speaking is S. 626, Mr. President, a bill I introduced on the 5th of March, entitled the Commodity Straddles Tax Act of 1981.

The distinguished Senator from Ohio and I have talked about this matter more than once because, we know the Senator from New Mexico has a point about the exact pertinence to this measure of our present proposal, although he makes the point that it would not be an ordinary tax. When we came to consider the very large reduction in programs under this resolution Senator METZENBAUM and I offered the proposal to the Budget Committee that we include in our instructions to the Finance Committee the elimination of certain tax expenditures. This would make it possible to minimize the reductions in social and economic programs that we felt we needed and could afford if we were simply to get back some of the taxes owed the U.S. Government and not paid owing to the idiosyncracies and peculiarities of the Internal Revenue Code and the ever-increasing sophistication of some persons in some circles in finding ways to avoid paying taxes.

I would like to say on the floor of this Chamber that we are going to deal with this issue of tax straddles now or it is going to be an outrage in 5 years' time.

The commodities tax straddle is a very simple device for putting off paying taxes for an extended period of time or reducing income from the regular income tax rates to capital gains tax rates.

It has been carried out by people who are not in the commodities market for any economic purpose of any kind. They are there very solely for the purpose of avoiding taxes or minimizing taxes, and they are doing this with the help of elaborate arrangements that professionals in this field have developed.

It began, the best one can tell, about 15 years ago. It is spreading. It now takes a fairly expensive lawyer to work something like this out for you, but we are not far from the day when H & R Block will do it on streetcorners around the country. They are a perfectly capable firm. It will become a perfectly simple device. It will begin to cost the Federal revenues enormously.

I do not know what is more to be deplored, the loss in legitimate revenues to the Government or the loss of the energy and talents of brokers who arrange these things.

This bill would pick up $1.3 billion in fiscal 1982 from persons who can well afford it if they can afford the legal counsel that arranges these tax straddles. It is because their incomes are so large that they have such an incentive to avoid normal taxes.

The tax straddle serves no economic purpose. It has no redeeming social value. It is simply a device which will spread and its emphasis will grow and the revenues will shrink. We will face it sooner or later.

It was the judgment of the Senator from Ohio, myself, and a few others on the Budget Committee, that we ought to face it right now when we can.

The simple fact is that we are going to have to do this. If we do not, we shall be forgoing $1,3 billion, and let nobody mistake where that $1.3 billion will end up. It will end up precisely with those who least need it. I am not suggesting anything illegal has taken place, but the presumption is that these taxes are owed and should be paid.

I thank the Senator from Ohio for giving me this time.

The PRESIDING OFFICER. The time of the Senator from New York has expired.

Mr. METZENBAUM. How much time have I remaining, Mr. President?

The PRESIDING OFFICER. The Senator has 4 minutes and 39 seconds.

Mr. METZENBAUM. Mr. President, the argument is made that this issue belongs in the Finance Committee.

Well, actually somebody might be able to make that argument. But on the Senate is where it belongs. It belongs on the floor of the Senate because we are talking about cutting back on vital programs needed for America. We have a right, and it is only just, do we address ourselves to tax loopholes at the very same moment that we address ourselves to taking milk out of the mouths of kids, for cutting back on senior citizen social security programs.

Technically, is it subject to a point of order? Is it germane? Does it belong to the Finance Committee?

Sure, all those arguments can be made. But when the facts are all sifted, let us look at it. The majority party is not prepared to bite the bullet as far as eliminating some of these tax loopholes. Do it mañana, do it next week, do it 2 weeks from now. Take milk out of the mouths of kids but do not take special tax gimmicks away from those who can protect themselves and who have powerful lobbies around here.

Mr. President, this issue is exactly where it should be, on the floor of the Senate. The issue is really going to be whether or not the members of the majority party are willing to consider this as a symbol of other tax expenditures, of tax loopholes, of tax abuses, of tax shelters, and prepared to eliminate some of them at the same time they eliminate some very needy programs for the poor and middle-class America.

Mr. President, I yield back the remainder of my time and move under section 904 to waive section 305(b)2 of

the Budget Act requiring germaneness of amendments. I ask for the yeas and nays.

The PRESIDING OFFICER. The question is on agreeing to the motion.

Mr. METZENBAUM. Mr. President, I asked for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. I yield to the Senator from Louisiana.

Mr. LONG. Mr. President, the Senator moved to waive the Budget Act because the Budget Act requires that amendments be germane. This amendment is not germane to the bill.

Mr. President, if we are going to legislate on this type of amendment, this would mean that the Senate, instead of voting on a limitation of spending, would proceed now without the benefit of committee hearings, without the benefit of the advice of expert witnesses, and certainly without adequate debate to write a tax bill, perhaps a $50 billion tax cut as recommended by the administration, in the full Senate.

That should not be done, Mr. President. We shall have plenty of opportunity in the Senate to vote on every tax proposal, either to raise taxes as the Senator would like us to do, or reduce taxes as many of us would like to do.

I ask, Mr. President, is it in order to try to move that the motion be laid on the table?

The PRESIDING OFFICER (Mr. JEPSEN). The Chair advises the Senator from Louisiana that when the time has expired, and there is 1 hour equally divided, a motion to table is in order.

Mr. HOLLINGS. Mr. President, I yield just a few minutes to myself on this side. I want to be sure the distinguished chairman of our committee has the opportunity to raise a point of order that it is not germane.

It would not be sensible, it would be futile, if we just had an up or down vote on the waiving of the Budget Act without the point of order being made that the amendment is not germane.

Let me address myself to the matter of waiving the Budget Act. That never should occur—you can look at the historic record, section 305, on the enactment of the Budget Act itself—unless in the case of an emergency. We have to have certain procedures, we have to have a certain discipline. We cannot just come in and have a majority vote and, more or less, amend the Budget Act, waive the Budget Act, write a new Budget Act, in essence, just by a majority vote. That is not the intent of section 305. If that were the intent, we would have no Budget Act, we would have no discipline, we would have no procedures. It would just be willynilly, by a majority vote.

That is not senatorial. That is quite to the point of our rules and our procedure under section 305.

The distinguished Senator from Ohio had this opportunity within the Budget Committee, just as I had the opportunity to put in a tax cut measure. My tax cut measure was turned down and his tax expenditure measure was turned down.

Having been turned down, Mr. President, neither is germane and therefore not allowable to be presented at this time. There is a good reason for that germaneness provision. It lies in the fact that the reconciliation procedure is a restrictive measure. It is restrictive to the good judgment of the Committee on the Budget itself as to how they want to control and how they want to present at the time of a reconciliation measure. It is not just to put out a motion and y'all come and any and everybody be ready, at the particular time using a more or less rare proceeding that should not be used, or hopefully not in the next several years, to come in with any and every amendment, raise the subjects of tax cuts, tax expenditures, expenditure cuts in the entire measure.

If, in the judgment of the majority of that particular group, they want to restrict it—and they very, very definitely restricted me on a tax cut relative to that particular approach within the committee and they very definitely restricted the Senator from Ohio.

Mr. President, I think it should be pointed out that we are not cut off. We are going to be, within a week—we have hearings right now and, by this time next week, we shall be marking up what we call the first concurrent resolution. Within the first concurrent resolution, both my tax cut and the tax expenditure of the Senator from Ohio would be in order. It would be discussed and it would be debated at that time.

So, in essence, to try to go now with the unusual procedure of just waiving the Budget Act by a majority vote here on the floor in order to force a particular issue that no one on the House side is going to accept—we know that. Over there, Chairman ROSTENKOWSKI is not going to move at that time in reconciliation. He is moving very deliberately with his tax expenditure and tax cut package.

Similarly, over on this side, the Finance Committee is moving very deliberately. They are not going to move within the reconciliation package. The opportunity is not cut off. I certainly hope we shall not set the precedent that anyone who can corral momentarily a majority vote can just waive the Budget Act out of hand when we know we have those opportunities, breaking down the entire discipline and the entire procedure, just at a time when we have really developed a strong discipline here and a rather restricted, concentrated approach, just to spending cuts.

I was denied my right by the committee itself. So was the Senator from Ohio on his tax expenditure. I do not think we should just shove for that point and waive the Budget Act at this point.

Mr. SARBANES. Mr. President, will the Senator yield at that point?

Mr. HOLLINGS. I am delighted to yield.

Mr. SARBANES. If the committee had acted on the Senator's proposal favorably and included it on tax cuts or tax expenditures——

Mr. HOLLINGS. It would have been germane.

Mr. SARBANES (continuing). Or with instructions to other committees not encompassed within the reconciliation proposal, then amendments pertaining to that would have been germane on the floor, is that correct?

Mr. HOLLINGS. That is exactly correct.

Mr. SARBANES. The only way, as I understand it, that the full Senate can have an opportunity—it may not choose to do so, but the only way it can indicate its judgment as to whether an item of this sort, not included by the Committee on the Budget, should have been included by the Budget Committee in this package is to waive the Budget Act in order to make an amendment in order.

Is that correct?

Mr. HOLLINGS. That is not correct, as I see it. I understand the reasoning of the distinguished Senator from Maryland. The fact of the matter is that every authorizing committee brings out certain bills. We would approach, on a germaneness proposition, that the Senate itself is restricted, with good reason, by this particular committee. It has restricted other committees in germaneness questions on other bills.

Just to come up and say the only way the Senate can act is by a majority vote to disregard the germaneness thing when, in essence, the germaneness provision was put in here by the Senate in a more deliberate fashion, I think, violates the procedure and violates the rules.

So I am not coming in from the approach that is employed now and the rationale of the distinguished Senator from Maryland that that is the only way, like people are being denied. The only way—the Senate, ahead of time, passed the Budget Act 5 years ago, and the 5 years of precedence that we have is that we should have and we should adhere to that germaneness rule and not waive this Budget Act. We have not. Just because we say we did not have the opportunity—they do not want us to have the opportunity.

Mr. SARBANES. If the Senator will yield, the waiver provision is part of the Budget Act.

Mr. HOLLINGS. Oh, yes.

Mr. SARBANES. Therefore, it is part of the Budget Act, as I understand it. I appreciate the arguments the Senator is making and Members may choose to give great weight to the judgment of the Budget Committee and, in effect, defer to it. But the waiver provision is there to be invoked if sufficient Members of the Senate wish to do so.

The fact of the matter is that if the Budget Committee had made a different judgment, the matter would be germane. The only way the Senate can indicate if it disagrees with the judgment of the Budget Committee on the exclusion of a particular item from the package brought to us is to invoke the waiver provision which is contained in the budget legislation.

I understand the Senator's argument and he is, in effect, saying, Look, the Budget Committee made a judgment; we think the Senate committee ought to stick with the judgment of the Budget Committee. The only point I am trying

to make is that the Senator from Ohio is invoking a procedure contained in the Budget Act, obviously put there for this purpose, among others, and that using that procedure is the only way, in this context, that the Senate can indicate its disagreement with the judgment of the Budge Committee in failing to include in the package this proposition, or some other proposition, which is not contained here.

Mr. HOLLINGS. No; Mr. President, I differ with the distinguished Senator from Maryland. The provision of section 305 was not included in the Budget Act just momentarily and spuriously, willy-nilly, by a majority vote differing with the committee, to question the fundamental of germaneness.

The truth of the matter is that over a 5-year period—the Senate adopted this—it was a rarity. It was not to be used in a casual fashion in differing with the Budget Committee. It is a difference with the Senate itself. The Senate put that provision in there only for emergencies, and there is no emergency.

Tax expenditure definitely is a part and parcel to be considered. They are going to be considered by the Finance Committee, and they are going to be considered under the first concurrent resolution, which we start marking up, and we will be debating it, no doubt, next week, and it could go over until the following week.

I differ strongly with the rationale explained by the Senator from Maryland to section 305.

On the contrary, it was put in there for the emergency provisions, if the Senate found itself in a particularly emergency condition whereby we had not foreseen something.

We did not want and the Senate did not want, in the enactment of the Budget Committee, anyone to be able to come in every time and say, "I happen to differ with the majority vote in that particular committee, and therefore let's just waive the Budget Act."

As to germaneness rulings, one can appeal the ruling of the Chair but in this instance, they put in the definite provision with no appeal.

What the Senator is doing now is going through the emergency provision of section 305 of the Budget Act.

Mr. MOYNIHAN. Mr. President, will the Senator yield 2 minutes?

Mr. DOMENICI. The Senator from Ohio and I have agreed that we will each take 2 minutes.

Mr. METZENBAUM. I yield to the Senator from New York.

Mr. MOYNIHAN. I simply want to say, with the greatest respect, that I hold with the Senator from Maryland in this matter.

I am a member of the Budget Committee. The motion to increase the resources available to us in the budget through tax expenditures was rejected by 7 yeas and 14 nays. But it was an issue on which the Democratic Party should feel strongly.

If this is not an emergency, these labors on the floor the last 4 days, with respect to the condition of our party, I do not know what an emergency is.

Mr. DOMENICI. Mr. President, I ask for the yeas and nays on the Metzenbaum motion.

The PRESIDING OFFICER. The yeas and nays have been ordered.

Mr. LONG. Mr. President, will the Senator yield?

Mr. DOMENICI. I yield.

Mr. LONG. I ask this: Is it not true that if we are going to waive the germaneness rule and let somebody bring in an amendment whereby we are instructed to cut tax expenditures by whatever number he might suggest, make a speech to suggest all the tax expenditures he would like to cut, and to some degree at least commit the Senate and the committees to do what he thinks they should do, would that not be a precedent to suggest that every other Senator would have the right to stand here and suggest that we now waive the Budget Act?

Mr. DOMENICI. Absolutely.

Mr. LONG. I could suggest that I would like employees to own stock in the companies for which they work. Somebody else might like to do something about capital gains, and he would move to put the Senate on record for his proposal to cut the capital gains tax and then to cut the tax rates.

In effect, would that not mean that everything we have in mind to do in the way of revenues would be the center of debate before the tax bill gets here from the House? We would be charging uphill and downhill, taking perhaps all the time the law will permit, to debate things which, under the Constitution, cannot be acted upon until the House sends us a revenue bill.

Mr. DOMENICI. The Senator is correct.

I yield myself 2 minutes.

Mr. President, I hope the Senate understands that this is an extremely serious vote.

The Budget Committee has two characteristics that are tremendously important to the Senate, because by adoption of the Budget Act, we have changed our rules in two significant ways.

The matter before the Senate in this instance, a concurrent resolution, is not subject to the normal amendments and the amending process, because, by operation of the Budget Act, the subject matter of an amendment must be germane. That is a dramatic change we have put in the Budget Act, for a reason.

The second matter—listen to this, in terms of the significance of this motion—is that this reconciliation instruction cannot be filibustered. A tremendous senatorial right is given up. Fifty hours is all you can debate here. Do Senators understand the significance?

The reason it must be germane is that we do not want extraneous matter brought in, and the filibuster rule is waived when that is the rule in the Senate.

You cannot bring in the tax measures which the Senator from Louisiana discussed. You could come in with an amendment that said the Energy Committee of the U.S. Senate would not have jurisdiction any longer on energy matters. Do you imagine we would ever vote on that in a normal manner here?

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. DOMENICI. I will yield in a moment.

It would be subject to all kinds of things. Fifty hours is all there would be to debate it, and it could not be filibustered if this waiver were used for that kind of extraneous matter.

In answer to the question of the Senator from Maryland——

Mr. SARBANES. I have not asked the question.

Mr. DOMENICI. This is in answer to the question the Senator from Maryland asked of the Senator from South Carolina.

There is no question that an opportunity is presented, in the normal course of a budget resolution, for Senators to address revenue levels. For example, Senator LONG cannot come down here and object to that.

In the first concurrent resolution and the second concurrent resolution every year, we are ordered to bring a revenue level measure before the Senate. That is the time when it is germane, and that happens this year. You do not have to wait around for the tax bill, if you want to come down here and discuss assumptions on revenues of tax receipts. You cannot change the tax laws. I hope nobody thinks that can be done.

One can say that the Budget Committee's level of expectation for 1982 is wrong because they did not include any tax expenditures, and you can move to change it. You can move as many times as there are hours in 50 hours. You can change it by 1 penny and offer it again. Even the tabling does not preclude you from offering it again, with just a slight modification, over and over.

So no one will be denied a day in court on how the cumulative total of revenue expectations for the country is arrived at.

The only point I want to make is that we have never used this waiver for this kind of matter. It is an extraordinary activity, and it should not be taken lightly tonight, so that we can enter into a debate about a tax expenditure matter called a straddle, or whatever it is, when all we have here is cuts in the level of expenditures of the U.S. Government. It has nothing whatsoever to do with a tax.

Mr. SARBANES. Mr. President, will the Senator yield on the procedure of the Budget Committee?

Mr. DOMENICI. I yield.

Mr. SARBANES. As I understand it, the Senator has made an argument against the tax expenditure on the linkage to the limitation on hours. But if the committee had adopted the proposed amendment on tax expenditures in the course of its considerations—the committee turned it down—but had it adopted it, it would have been part of the committee's package, and it would have come to the floor; and the limitation on debate with respect to the Budget Committee's proposition on tax expenditures would then have operated according to the limits. Is that correct?

Mr. DOMENICI. If the reconciliation instruction before the Senate included tax items, an amendment changing the

level in taxation or the assumed taxation would be in order, if that is the question.

Mr. SARBANES. That is right, and therefore bound under the limited debate.

Mr. DOMENICI. That is correct.

Mr. SARBANES. So, if the Budget Committee adopts this tax expenditure measure, then it moves onto the floor within the confines of the limited debate provided for under the Budget Act.

I thank the chairman. I think it is an important procedural matter to get straightened out.

SEVERAL SENATORS. Vote!

Mr. METZENBAUM. Mr. President, we are dealing with this matter: Had the Budget Committee adopted one of these amendments, as was well pointed out by the distinguished Senator from Maryland, there would not be any question about this amendment.

As a matter of fact, the distinguished ranking minority member of the Finance Committee will argue that somehow the Finance Committee is the only one that may deal with revenue matters but that the Budget Committee has the right to give directions to every other authorizing committee, which it is doing in this budget resolution.

I believe that the Budget Committee is going to act in connection with cutting expenditures. It also will be acting with respect to bringing more dollars in or cutting back on tax expenditures. Because I do feel that way and because I feel that no particular useful purpose will be served, with the consent and approval of the manager of the bill, and if there is not approval I will not offer it, I ask unanimous consent that if and when all time is yielded back, I am prepared to do so provided that we immediately thereafter go to an up-and-down vote on the amendment.

Mr. DOMENICI. I did not understand. The Senator wants a vote now? I will yield back my time and he his.

Mr. LONG. Mr. President, a point of order.

The PRESIDING OFFICER. The Senator will state it.

Mr. LONG. If I understand what the Senator said we vote on the amendment. I ask the question. Does not the vote come on the Senator's motion to waive the Budget Act?

Mr. DOMENICI. Absolutely.

Mr. METZENBAUM. The Senator from Louisiana is correct. I had no intention of changing that. I perhaps used inappropriate language.

What I am saying is, if all time is yielded back unanimously, we unanimously then proceed to an up-and-down vote on my motion.

Mr. BAKER. Mr. President, reserving the right to object, on the motion is what the Senator is speaking of.

Mr. METZENBAUM. The Senator from Tennessee is correct.

I now yield the floor to the Senator from New Mexico in order that he may state the request if he cares to do so along the lines the Senator from Ohio just stated.

On that basis I am willing to yield my time back.

Mr. DOMENICI. Mr. President, I yield my time back.

Mr. METZENBAUM. Mr. President, I yield my time on that basis so there will be an up-and-down vote.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Ohio, under the provisions of section 904(B) of the Budget Act, to waive the provisions of section 305(b)(2) of the Budget Act relating to germaneness of amendments.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Texas (Mr. TOWER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. WILLIAMS) is necessarily absent.

The PRESIDING OFFICER (Mr. SCHMITT). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 15, nays 82, as follows:

[Rollcall Vote No. 64 Leg.]

YEAS—15

Boren	Kennedy	Pell
Bradley	Levin	Proxmire
DeConcini	Metzenbaum	Riegle
Eagleton	Mitchell	Sarbanes
Hart	Moynihan	Tsongas

NAYS—82

Abdnor	Exon	Mattingly
Andrews	Ford	McClure
Armstrong	Garn	Melcher
Baker	Glenn	Murkowski
Baucus	Gorton	Nickles
Bentsen	Grassley	Nunn
Biden	Hatch	Packwood
Boschwitz	Hatfield	Percy
Bumpers	Hawkins	Pressler
Burdick	Hayakawa	Pryor
Byrd, Harry F., Jr.	Heflin	Quayle
	Heinz	Randolph
Byrd, Robert C.	Helms	Roth
Cannon	Hollings	Rudman
Chafee	Huddleston	Sasser
Chiles	Humphrey	Schmitt
Cochran	Inouye	Simpson
Cohen	Jackson	Specter
Cranston	Jepsen	Stafford
D'Amato	Johnston	Stennis
Danforth	Kassebaum	Stevens
Denton	Kasten	Symms
Dixon	Laxalt	Thurmond
Dodd	Leahy	Wallop
Dole	Long	Warner
Domenici	Lugar	Weicker
Durenberger	Mathias	Zorinsky
East	Matsunaga	

NOT VOTING—3

Goldwater	Tower	Williams

So Mr. METZENBAUM's motion under the provisions of section 904(B) of the Budget Act to waive the provisions of section 305(b)(2) was rejected.

The PRESIDING OFFICER. The question is on the amendment.

Mr. DOMENICI. Mr. President, a parliamentary inquiry. What is the matter before the Senate?

The PRESIDING OFFICER. The Metzenbaum amendment is before the Senate.

Mr. DOMENICI. Mr. President, a parliamentary inquiry. Is it not the subject of a point of order? I make the point of order that the amendment is not germane.

The PRESIDING OFFICER. The amendment is subject to a point of order. It introduces a new subject matter, and, therefore, the point of order is well taken.

Mr. HOLLINGS. Mr. President, could we move to the amendments of the Senator from Wisconsin?

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin is recognized.

UP AMENDMENT NO. 43

Mr. PROXMIRE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE) proposes an unprinted amendment numbered 43:

On page 2, line 24, strike "$13,300,000,000" and insert in lieu thereof "$15,673,000,000".

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. PROXMIRE. I am happy to yield.

Mr. STEVENS. Mr. President, it is my understanding that this is the first of three amendments to be offered by Senator PROXMIRE. Is that correct?

Mr. PROXMIRE. That is correct.

The PRESIDING OFFICER. That is the understanding of the Chair.

Mr. STEVENS. Mr. President, we have had a request to seek approval to have the votes on the Proxmire amendment occur back to back at the end of the third amendment. I do not know how long that would be.

I know the distinguished Senator from West Virginia has a little bit of problem about that, but I thought if we discussed it on the floor perhaps some of those who had reservations might listen to their squawkboxes and understand what we are trying to do.

Will the Senator from Wisconsin give us some indication of how long he will take on all three of them?

ORDER OF PROCEDURE

Mr. PROXMIRE. Mr. President, the first amendment, I understand, has a time limitation on it that the majority leader made today of one-half hour, equally divided, 15 minutes to a side. The second amendment has 20 minutes, equally divided, 10 minutes to a side. The third amendment has no time limitation, except the usual limitation of an hour that we have on each amendment.

Mr. STEVENS. Would the Senator from Wisconsin have any problem if we stacked them all, so that the three votes take place after the time of the third amendment?

Mr. PROXMIRE. No, I have no objection.

Mr. STEVENS. May I ask my good friend if that is possible. I do not want to make a motion unless it is cleared on his side.

Mr. ROBERT C. BYRD. Mr. President, the minority is attempting to check this out at this point. There is one other Senator that we have to contact who had earlier today interposed an objection. Just now, we are working on the proposi-

tion that we stack the votes beginning at 15 minutes of 9.

Mr. STEVENS. That is agreeable. We sought to try to stack them for the end of the time of the Senator from Wisconsin's last amendment, which could run, as I understand it, past that time. He has an hour and 50 minutes total on his amendments.

Mr. ROBERT C. BYRD. This would not preclude further time being taken on amendments on which the yeas and nays had not been ordered and on which the time had not already run. What I am saying is that on those amendments on which the time had run and on which the yeas and nays had been ordered, the first rollcall vote would not begin prior to quarter of 9 p.m. tonight.

Mr. STEVENS. At the present time, the next rollcall will take place at approximately quarter of 8, unless we get such an agreement.

I will not make the motion until the distinguished Senator from West Virginia tells us that it is not objected to on his side. But we do hope we can arrange that. Then everyone could have time to get dinner, if they are not involved in the debate on the floor.

Mr. ROBERT C. BYRD. I thank my friend.

Mr. DOMENICI. Mr. President, will the distinguished majority whip yield for a further question?

Mr. STEVENS. Yes.

Mr. DOMENICI. What is the next amendment following the three of Senator PROXMIRE?

Mr. HOLLINGS. Senator DECONCINI'S amendment.

Mr. DOMENICI. Does that not have a time agreement on it?

Mr. HOLLINGS. The time agreement perpetuated by the majority leader was 30 minutes, 15 minutes to a side.

Mr. STEVENS. Mr. President, if the Senator will yield, I now ask unanimous consent that the votes on all three of the Proxmire amendments take place one right after another at the conclusion of the debate on the third Proxmire amendment.

Mr. LONG. Mr. President, reserving the right to object, I would like to have a time certain, like 8:45.

The PRESIDING OFFICER. Does the Senator from Louisiana reserve the right to object?

Mr. LONG. Mr. President, I reserve a right to object. I would rather have a time certain.

Mr. PROXMIRE. Mr. President, I have no objection to that. That is up to the leader. The leader may have a problem with that.

Mr. STEVENS. Mr. President, I ask unanimous consent that the vote on the first two Proxmire amendments, and the third one, if it is finished, commence at 8:45.

Mr. ROBERT C. BYRD. On the first two, if debate has finished on both of those.

Mr. STEVENS. That is right. And the third one, also, if it is finished at that time will be right after that. We could take up another amendment in between. This is an assurance that there will be no further votes until 8:45.

Mr. ROBERT C. BYRD. That is correct.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, this amendment would cut an additional $2.4 billion in budget authority by requiring the Appropriations Committee to rescind as much budget authority as President Reagan proposed for rescission in fiscal year 1981. This is a total of $15.673 billion.

In so doing, it would add $2.373 billion to the total budget authority the Appropriations Committee has been instructed to rescind in the current fiscal year by the current resolution.

To repeat, Mr. President, President Reagan has called for about $15.7 billion in rescissions or cuts in the budget obligational authority for fiscal year 1981. The Budget Committee in the resolution before us does not cut as deeply. It gives the President only about 85 percent of what he asks in rescissions. Yes, indeed, the committee cuts spending more deeply in 1982 and 1983—but that is in the future, where cuts have a way of vanishing in the mist as we approach the happy oasis. The President asks for the cuts now. We should give those cuts now. That is what my amendment does.

If I had my way, we would cut deeper than President Reagan and reduce the deficit even more. But the committee has cut less. The amendment now before the Senate cuts obligational authority by the full amount requested by the administration. It does not rubberstamp the President, because it says nothing about cutting or increasing particular areas. It differs sharply from the prior amendment offered by the distinguished Senator from Arkansas, which the Senate, in fact, voted on last week, because that amendment called for cuts in procurement. Some Senators interpreted that amendment as threatening to defense, because so much of our procurement is in defense. This amendment does not mention procurement. The amendment would simply instruct the appropriations committee to make an additional $2.4 billion in reductions or rescissions in spending, and would put the Senate on record as matching the Reagan requests. Anyone who would argue that this amendment is antidefense would have to argue that President Reagan is antidefense. But as a member of the Appropriations Committee for the last 20 years, I am convinced that given the will and the instructions from this body, the committee can and will find reductions in spending as deep as the President has requested.

Mr. President, all of us have had mail from our constituents supporting and opposing the reductions proposed by the President. My mail and, according to most reports, the mail of most Senators, runs overwhelmingly in support of those reductions in spending. The country on this issue has rallied overwhelmingly behind the President. The people of this country want this budget cut. They do not want us to go 95 percent of the way with the President or 90 percent, and certainly not 85 percent, as this resolution would have us do.

They want us to go 100 percent of the way. That does not mean the people of this country agree 100 percent with every cut the President recommends. They do not. And I think few of us do. It does mean the American people want us to move at least as far as the President has in holding down spending, and that is precisely what this amendment would do.

Mr. President, some Senators say we should not cut so deeply. They contend we should simply adopt a more responsible fiscal course by cutting taxes less than the President proposed. What is wrong with that? Plenty. First, the only way we can get this economy to move ahead with tough cutbacks in spending is to cut taxes and provide the incentive for business to expand, for our people to save and invest, and for the private sector to take up the slack.

Furthermore, we find even more support for tax reductions than for spending reductions. And, let us not kid ourselves, with the President of the United States asking for us to cut taxes, this body and the House will not hesitate to make the cuts. That means that this country will continue to run deficits which drive up interest rates and in the process paralyze homebuilding and the vital auto industry, unless we make these painful budget cuts.

This amendment would require us to bite the bullet now—as the administration requests—not 2 or 3 years down the pike but this year. When the moment of truth comes we have found how easy it is to promise a balanced budget 4 years from now and how very hard it is to obtain that. What this amendment does is to cut the mustard right now. Make that painful decision this year, we tell the Appropriations Committee. The amendment would demand that the committee cut as deeply as the President has requested with no "ifs, ands or buts." Oh sure, the Budget Committee tells us that in 1982 or 1983 we will do better. I propose we do better right now. So this is a bite-the-bullet-now amendment. All aboard who really believe in cutting now and not putting it off.

This amendment simply takes the President and his administration at their word, that they need a reduction of this size in the budget to provide the basis for an anti-inflation, anti-high-interest-rate policy that will work. Frankly I am convinced that if I submitted this amendment to a cross-section of the American people today it would win overwhelming approval, not just from Republicans or businessmen but from Democrats, from workers, from labor union members, and, yes, from Government workers.

Sure you would get a world of disagreement on what programs to cut, but on going along with the President and cutting as deeply as he has requested you would get solid support in every State of the Union. Every Senator knows this. Anyone with ears to hear our constituents knows they want Federal spend-

ing reduced. And that is our job—not the President's, not the Cabinet's, not Dave Stockman's, but ours.

If we choose not to make cuts as deep as he has requested we will not make them. We will have a deeper deficit. We will have the Government borrowing more money and driving interest rates up even higher. We will have no faith in the anti-inflation program. This amendment poses the basic issue. Do we truly believe we should hold down the rate of increase in Government spending or do we not?

Now I know, Senator DOMENICI and Senator HOLLINGS, and the entire Budget Committee, have worked hard on this resolution. They have discussed with each of the subcommittee chairmen of the Appropriations Committee and with its distinguished chairman (Mr. HATFIELD) how far the resolution could realistically go. They bring us their best judgment, and that judgment is that for 1981 they can go only 85 percent of the way with the President. President Reagan calls for $15.67 billion in rescissions. They give him only $13.3 billion. In other words they go 85 percent of the way with the President. They fall 15 percent short.

This amendment would make up for that 15-percent shortfall and put the resolution four square with the President's recommendation. It would provide 100 percent of the rescissions that President Reagan has requested. The committee could give him the same rescissions he has asked, or, as I have said, they could cut some spending more than the President has asked and some less, but, in total, they would have to go 100 percent of the way with the President's overall reductions.

The crux of our problem boils down to whether we can, in fact, realistically cut as low as President Reagan has asked. I say, of course we can. We are not talking about a tight, limited budget. We are talking about a budget that has exploded from $76 billion when I first came to the Senate in 1957 and had climbed to $97 billion by 1961. And now the President proposes to put a cap on it next year at $695 billion. Now that is a 2½-fold skyrocketing of spending in real terms allowing fully for inflation. In 20 years do we wonder why we have double-digit inflation, and with an early trillion dollar national debt with an average maturity of less than a year so the Federal Government has to borrow it all over again each year, do we wonder why we have sky-high interest rates.

Does anyone seriously believe that we can bring interest rates down without truly painful cuts in Federal spending? The President does not propose to reduce Federal spending with his rescissions, he proposes to increase it a little more slowly. We will still suffer a fat deficit.

But unless we at least go as far as the President has proposed, we have only ourselves to blame for continued record deficits, continued painful inflation, continued killing high interest rates, and the unemployment and economic stagnation a sloppy, out-of-control Federal Government has brought us.

Mr. President, I reserve the remainder of my time and I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I hope the Senate does not adopt the Proxmire amendment. I do not think there is anyone who has been here on the floor listening to the debate in the last few days who has any doubt about where I stand and where the Budget Committee stands. We support the President. We have been on the floor fighting for that program and winning almost every single vote.

Mr. President, the distinguished chairman of the Appropriations Committee has had his subcommittees look at what is left for the rest of this year, and it is absolutely impossible that we ask them to do more than we have.

Although the Appropriations Committee mark for budget authority is $2.4 billion less than the President's total, their outlay mark for 1981 is only $83 million less than proposed by the President.

It is entirely possible, Mr. President, that the Appropriations Committee may need to rescind more than $13.3 billion in budget authority to get the $1.5 billion in outlays that they agree they can save and that this reconciliation instruction requires they return in a package of rescissions.

I think it is best to assume that the Appropriations Committee will meet their 1981 outlay target, which is close to the President's level, but leave them some slight flexibility on the budget authority side. I am sure they will exceed their budget authority instruction if it is at all possible to do so.

Mr. President, we have to remember that while many of the committees are charged with changing laws to save money in 1982, what we are asking the Appropriations Committee here to do is to do all of this in the last quarter of the year. It is not like we are just starting out. These are all 1981 rescissions. The chairmen and the subcommittees just do not have a year to do this. They have very little time to get the work done and to save this amount of money in one-quarter of a year. I repeat, if they reach what they are instructed to do by way of a rescission package, and if the Senate supports that when it comes to the floor, their total outlays for the year will have a disparity of only $83 million from that of the President's.

I think that is a tremendous record, Mr. President. We have not been able to work this way in the past. I just think we ought to accept what the distinguished chairman and his subcommittees say they can do. It is an excellent start on the President's package. I hope the Senate does not accept the Proxmire amendment tonight.

Mr. PROXMIRE. Will the Senator yield on a point he made before he yields the floor?

Mr. DOMENICI. Certainly, I am pleased to yield.

Mr. PROXMIRE. Mr. President, it is my understanding that when a President submits a rescission at this point, he instructs the various departments not to spend the money which is rescinded. In view of the fact that he has already submitted those rescissions and we have almost half the year left, it is practical for the Senate to support the President and to provide for the full rescissions the President has requested.

Mr. DOMENICI. The Senator is correct with reference to the technical effect of a rescission that the President submits. However, the distinguished chairman of the Committee on Appropriations has taken that into consideration, also, as he worked diligently with the subcommittee chairmen and members of the committee to give us the mark, which is extremely close to the Presidents. As I indicated, in outlays, there will only be an $83 million difference. That is going to be a challenge when we consider the amount of time they had. The Senator is technically correct.

Mr. HATFIELD. Mr. President, will the Senator yield?

Mr. DOMENICI. I yield the remainder of my time in opposition to the amendment to the distinguished chairman of the Committee on Appropriations.

Mr. HATFIELD. Mr. President, I believe the distinguished ranking minority member of the Appropriations Committee, the Senator from Wisconsin (Mr. PROXMIRE), deserves credit today for focusing our attention on cost savings. I think the thrust of his amendment would be to increase the instruction to the Appropriations Committee from the $13.3 billion agreed upon by the Budget Committee to $15.7 billion, which is also the initial estimate of the President's proposal.

I shall not undertake a detailed analysis of his plan at this time. The figures are clear and there is no disagreement about what they mean. But a few general points are in order.

Mr. President, I think there are a number of dangers. The first is that we have a danger here of trying to focus the entire attention on savings that we must make, but in fiscal year 1981 and, more than that, in the last quarter, as the chairman of the Committee on the Budget has already indicated, making all these savings in the last quarter of fiscal 1981.

I think the President and the Budget Director, Mr. David Stockman, have both acknowledged that fiscal year 1981 is not the key to our economic recovery. After all, the savings, as I say, that we can achieve in 1981 have to be made in the last quarter.

Mr. President, I have asked, as the chairman of the Committee on Appropriations, each of the 13 subcommittees to make an estimate of what they felt would be realistic reductions that could be made in fiscal year 1981 after we got the information from the White House on the President's fiscal rescission program. I think it is very interesting to note that the subcommittee chairmen, who gave very careful consideration to this on a bipartisan basis, with the ranking minority member of each subcommittee fully participating, came up with a target figure of $11.8 billion. I might say that the Senator presiding now (Mr. SCHMITT), chairman of our Subcommittee on Labor-HHS, made an estimate

that his subcommittee could reduce by over $2 billion alone in budget authority, which I think is a very significant reduction for one subcommittee.

I am also aware that the Senator from Wisconsin, our colleague (Mr. PROXMIRE), disagrees with the report from the Labor-HHS Subcommittee, and so informed me by letter. I want to respond by saying that I shall continue to press the entire committee for as great reductions as we can make in fiscal year 1981. I know that each chairman and each ranking minority member on each subcommittee of the Appropriations Committee will do likewise.

I agree with the distinguished Senator from New Mexico (Mr. DOMENICI), chairman of the Committee on the Budget, that we should set our mark at a realistic figure of $13.3 billion. Let me also say that of the total net savings in 1981 recommended by the Budget Committee—that total is $14.7 billion—the Appropriations Committee share is $13.3 billion. Over 80 percent of the savings to be made in fiscal year 1981 has been instructed to be made through the actions of the Appropriations Committee. But by the same token, the Appropriations Committee has been given a very clear signal that none of those cuts can be considered as coming from the military budget. So, in a sense, what we are doing is reducing our base to a very, very narrow consideration of where we can make these cuts.

Mr. President, this is going to be a monumental task, a very difficult task. But let us put it against the record of the rescissions of the past.

Mr. President, ever since the passage of the Budget and Impoundment Control Act of 1974, we have had 6 fiscal years of experience with rescinding budget authority. Over that span, Congress has rescinded 48 percent of the amount proposed by the President.

I do not seek to condemn either the President or the Congress by noting that this is not a particularly high level of success. This approval rate reflects the simple fact that Congress is reluctant to overturn budget priorities that it approved in the regular appropriations and authorizations process only months ago.

Let me emphasize an important distinction here: Rescissions are not prospective savings which are are planning for 1982 and 1983. Instead, they constitute the reversal of appropriations choices Congress deliberated and established for 1981 and their impact will be felt immediately. This does not mean they are impossible to achieve but it does explain why Congress is reluctant to disrupt budget planning so late in the year.

As a consequence, out of the $11.9 billion proposed for rescission over the last 6 years, only $5.8 billion has been accepted here in Congress. In fact, that savings rate is somewhat overstated by the rescission of $2 billion for the strategic petroleum reserve last year.

I add that historic note for two reasons. First, the $13.3 billion instruction for the Appropriations Committee is higher than all rescissions requested in the past 6 years. In a single quarter, we are being instructed to rescind $13.3 billion. This is more than $1 billion more than Congress has accomplished over the life of the Impoundment Control Act.

Second, even though Congress has a history of approving less than 50 percent of all Presidential rescission requests, we are being instructed to report rescissions amounting to 85 percent of the President's fiscal year 1981 request. The pending amendment of the Senator from Wisconsin would amount, in effect, to a mandate to the Appropriations Committee to rescind 100 percent; in other words, make full compliance in that one act in the last quarter—a goal which careful review by subcommittees indicates is not possible. As I said earlier, even the $13.3 billion figure is a challenging task, but one which I believe the Appropriations Committee can handle. To accomplish our instruction, we will have to do better than the rescissions rates in past Congresses that are as follows:

[In percent]

1975	12
1976	4
1977	70
1978	9
1979	80

Despite these past approval rates, Mr. President, I believe we should be able to reach the $13.3 billion instruction. This is not a business-as-usual Congress and I know the Appropriations Committee will not adopt a business-as-usual attitude on rescissions.

Therefore, I recognize that we are in very difficult and very unusual times, but I do feel that we have to be reasonable, that we have to recognize just what we have as constrictions on this action that has been instructed by the Budget Committee. We shall seek to achieve that goal without this amendment.

Where we have witnessed a 48-percent rescission approval rate by Congress in the past, I am confident we can, at appropriations, achieve the much higher rate mandated by the instruction of $13.3 billion.

But placing a higher instruction on the committee, Mr. President, ignores the magnitude of the task before the Appropriations Committee and ignores the estimates submitted by each subcommittee. For these reasons, Mr. President, I urge the Senate to reject the amendment submitted by the ranking minority member of the Appropriations Committee.

Mr. President, I ask unanimous consent to have printed in the RECORD the schedule of rescissions by the last six Congresses.

There being no objection, the schedule was ordered to be printed in the RECORD, as follows:

RESCISSIONS, FISCAL YEARS 1975–80

[Dollar amounts in thousands]

Year	Number	Amount proposed	House (action)	Senate (action)	Amount approved	Percent of dollars rescinded
1975	91 (4)	$3,328,500	$408,381	$464,538	$391,295	12
1976	50 (1)	3,608,363	74,931	138,331	138,331	4
1977	21 (1)	1,835,602	807,640	1,271,040	1,271,040	70
1978	8 (0)	644,055	55,255	55,255	55,255	9
1979	10 (0)	908,692	705,869	723,609	723,609	80
1980	59	1,618,000	1,751,197	3,869,305	3,184,000	197
Total	239	11,943,212			5,763,530	48

Note.—1979 figures are inflated by the single action of the additional rescission of $2 billion in strategic petroleum reserve.

Source: Tabulated from House Appropriations Committee data.

Mr. HATFIELD. Mr. President, I reserve the remaining part of the time that has been yielded or I yield it back to the Senator from New Mexico.

Mr. PROXMIRE. Mr. President, I recognize, I think all of us do, the fine job that the chairman of the Committee on Appropriations has done. He is a fine chairman. I have great respect for him. As we all know, it is an extraordinarily difficult job that he has assumed and I think he has done very well.

He has pointed out how his committee is being called on to make rescissions that are far deeper than have been made before. That is true. But let us recognize how entirely different the situation is now. The Budget Act was adopted in 1975.

It was followed by the election of President Carter, who did not have a program for holding down the rate of increase on Government spending. At least, that was not front and center.

Since we appropriated these funds in 1980, we have had a historic election, with the clearest kind of mandate for the elected President. That mandate was overwhelmingly to hold down Federal spending. That is what he talked about over and over. That was the theme of his inaugural. There is a new President, a new party, a new election. I believe that message certainly should have come through to all of us. Anybody who has talked to his constituents has heard plenty of it.

Now we have a new election, a new President.

I call this to the attention of the distinguished Senators from Oregon and New Mexico: Let us not forget that we also have a new Senate. The Senate that appropriated this money was a Democratic Senate. Now it is a Republican Senate, and I believe that Republican Senate got the message, also.

We have 16 new Republican Senators. Why were they elected? In many cases, it was to hold down spending. They were not elected to come in and just sit in

office and conduct the same kind of policies we had in the past. We have a new message, and that message should be translated into action, and that is what my amendment does.

I should like to see us cut 150 percent—in other words, more deeply than President Reagan has recommended. Congresses have done that in the past.

I hope the Senate will give very serious attention to this amendment.

I must say that I have great respect for the distinguished chairman of the Appropriations Committee, who I believe is doing an excellent job in every respect. We just disagree a little on this rescission, this $2.4 billion worth.

Mr. President, I reserve the remainder of my time. If the Senators from New Mexico and Oregon want to yield back the remainder of their time, I will do so, and we will go to the next amendment.

Mr. DOMENICI. Whatever time the chairman of the Appropriations Committee desires, I should like 1 minute at the end.

Mr. HATFIELD. Mr. President, what is the time situation?

The PRESIDING OFFICER. The time remaining to the Senator from Oregon is 2 minutes and 30 seconds.

Mr. HATFIELD. And the Senator from Wisconsin?

The PRESIDING OFFICER. The Senator from Wisconsin has 4 minutes and 20 seconds.

Mr. HATFIELD. I yield 1 minute to the Senator from New Mexico.

Mr. DOMENICI. I will take it from the resolution, and the Senator from Oregon can use what time he needs.

Mr. HATFIELD. Mr. President, I believe there is no question that the Senator from Wisconsin and I are on the same frequency. I would make only one correction to his statement.

He spoke of the Appropriations Committee as being my committee. It is really our committee, the Senator from Wisconsin being the ranking minority member. I consider it as our responsibility of leadership on that committee.

I say to the Senator that because we are on the same frequency, we are setting our goals precisely in the same direction. But I believe there comes a point where we have to delineate what we would be involved in, in relation to reductions in programs and actually existing programs.

I believe we are reaching a point beyond the bone marrow, where it is going to be an amputation rather than merely an operation.

This program includes the elimination of EDA, UDAG, solar bank, HUD rehabilitation loans, cancellation of DOD alcohol fuels, USDA alcohol fuels. Also, we would have EPA waste water treatment grants, $1.7 billion; HUD subsidized housing, $5.1 billion. We have $1.3 billion now in elementary and secondary education programs, $240 million in vocational education. I could go on. Perhaps some of these programs need to be removed or reduced or excised.

I just wanted to be clear that we are exempting the military of $150 billion plus in this action, as if there were no waste in the military, as if there were no reason to give the same scrutinizing effort for cost analysis that we are giving to these other programs. Therefore, we have narrowed our base to these basic programs that I do not believe we want to abolish absolutely and amputate from the Government, but we want to reduce. I would say we have reached beyond the point of this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. I yield myself 1 minute on the resolution.

Mr. President, I repeat that we will not get the fiscal matters of our Government under control unless the Appropriations Committee, the Budget Committee, and the Finance Committee are working together. Obviously, we need to work together.

However, Senator HATFIELD's committee, with discretionary appropriation authority, and the Finance Committee, with principal jurisdiction over entitlements, must work together with the Budget Committee in order to get the job done that the people of this country earnestly wait for and desire on the part of the Senate.

It has been my privilege to take over the job of chairmanship of this committee and to begin anew with the chairmen of those very important committees, where we consult, where we talk, where we understand, where there are no surprises, where the staff attempts to exchange information, so that we all know what the other has in mind.

I have absolute confidence that the chairman of the Appropriations Committee is going to do the maximum that can be done in the short time that remains.

I hope the Senate will go along with us tonight. There is plenty of budget authority to cut. The chairman enumerated some of them. It is going to be an extremely difficult job to do that. In 1982 it will be tougher, but at least there is some transition time. There is some time to think together. There is some time to put together new laws that will provide transitions, not only what we have been doing and what we hope to do in 1982 and other years. There are no new authorizing bills that are going to come down to Senator HATFIELD and make his job easy. It is all going to be Appropriations Committee work.

I hope that tonight the Senate, once again, will go along with what has been a well-thought-out, well-considered exchange of ideas between the Committee on Appropriations and the Budget Committee, and defeat the amendment of the distinguished Senator from Wisconsin. This Senator appreciates the great support the Senator from Wisconsin has given on the floor for the budget process and the reconciliation mandates that will soon be thrust upon the committee. At this point, I hope he understands that we just cannot expect the chairmen and subcommittee chairmen to do more than the amount the Budget Committee found. I thank him for his support during the last 3 or 4 days.

Mr. PROXMIRE. I thank the chairman of the Budget Committee, and I congratulate him on the fine job he has done.

Mr. President, in the first place, this amendment would stand by the President. It would make the President's request not 85 percent, not 90 percent, but 100 percent.

It seems to me that under the circumstances, with a new President, the mandate he has, the mandate we have, we should do that.

In the second place, let us make clear that these rescissions change from the time the President requests them. He then puts the spending on hold. He has done that. The result is that they have not a quarter, not a couple of months, but they have 5 full months to hold down this spending.

In the third place, I point out that we do not have to abolish programs. We do not have to cut as deeply or as cruelly as has been implied. We can, for example, make a 2-percent cut in Federal employment instead of a 1-percent cut. That would save a very substantial amount. We can make a deeper cut in the Postal Service subsidies. There are any number of programs that can be reduced.

So I hope that the Senate will give serious consideration to this matter and recognize that these are unusual times. We do have a mandate from the people of this country, in spending, to cut at least as deeply as the President has proposed. I hope we will adopt this amendment and do that.

If the other side yields back their time, I will yield back my time.

The PRESIDING OFFICER. The other side has no further time.

Mr. PROXMIRE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, under the previous order, the Senator from Wisconsin is recognized.

AMENDMENT NO. 14

(Purpose: To restore the full amount of the President's proposed budget and outlay reductions for the Export-Import Bank)

Mr. PROXMIRE. Mr. President, I call up printed amendment No. 14 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE) proposes amendment numbered 14.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 5, line 2, strike out "$6,146,000,000" and insert in lieu thereof "$6,394,000,000".

On page 5, line 3, strike out "$133,000,000" and insert in lieu thereof "$147,000,000".

On page 5, line 4, strike out "$15,460,000,000" and insert in lieu thereof "$16,125,000,000".

On page 5, line 5, strike out "$958,000,000" and insert in lieu thereof "$1,068,000,000".

On page 5, line 6, strike out "$18,412,000,000" and insert in lieu thereof "$19,135,000,000".

On page 5, line 7, strike out "$2,274,000,000" and insert in lieu thereof "$2,631,000,000".

Mr. PROXMIRE. Mr. President, the amendment I propose is to restore the budget cuts concerning the Export-Import Bank that were proposed by President Reagan. When Senate Concurrent Resolution 9 was before the Budget Committee, that committee gave favorable treatment to amendments concerning Eximbank authorizations and outlays for the fiscal years 1981, 1982, and 1983 in total, respectively, of $1.636 billion and $481 million.

Mr. President, there is no excuse for according the Eximbank preferred treatment in budget matters. Inflation is our No. 1 economic problem.

I might say, Mr. President, incidentally, that I have talked to dozens of exporters who support President Reagan's program and who recognize that they will have to make something of a sacrifice if the Export-Import Bank is not given the kind of funding that the Budget Committee would give them, but they tell me they prefer to go along all the way with the President in spite of the fact that they would have to make a sacrifice.

I think that makes sense. They recognize if we are going to cut the many programs that help so many of the elderly and the poor they, the Eximbank, the exporters, should share in that cut.

In order to cut inflation we must make deep cuts in the budget. In order that we may have the public support to make the deep cuts we need to make we will have to be fair about the budget cuts. In order to be fair every group and sector of the economy will have to share in the cuts.

Why should Eximbank be an exception? There is no good reason.

Cuts will be made in health care, aid to the poor, student loans, and many, many other social programs that have a worthy purpose. Eximbank is not more important to the Nation than the people who will suffer cuts.

I think all of us recognize that while budget cuts will not do the whole job, they are crucial to stopping inflation.

One reason inflation is so bad is that interest rates are high because the demand on our capital markets fueled by Government borrowing exceeds the supply of capital. Government deficits, financed in the capital markets, crowd out private borrowing and result in high interest rates.

Eximbank financing, along with other Government agencies, is a part of the problem. Eximbank borrows in the market and makes loans at subsidized rates to borrowers. How in the world can we justify increased borrowing and lending authority for Eximbank to make subsidized loans to foreign purchasers?

Many times I have stood on the floor and have reported for the Banking Committee as chairman of the Banking Committee over the past 6 years, the announced loans that the Export-Import Bank is making to the foreign countries, and again and again I have been shocked at the fact that they will borrow at 8 and 9 percent at least when American businessmen have to borrow at double that rate.

We need only to look at the Eximbank financing of the purchase of airplanes by Ansett (Australia) to see how ridiculous the subsidy is. The Eximbank direct loan was almost $300 million at an 8- to 8.4-percent rate. Think of that, an 8-percent loan, subsidized by the U.S. Government. What are we to tell American businessmen who go to their bank and are quoted 17 to 20 percent for a loan? What are we to tell the new homeowner who must pay 14 to 16 percent for a home mortgage loan? The subsidy on the Ansett loan runs to over $25 million per year.

President Reagan recommended cuts in Eximbank authority. I want to quote his statement contained in his "Program for Economic Recovery" on Eximbank.

This is the President of the United States speaking. This is what President Reagan said, and I quote him:

To help control the expansion of Federal credit programs, particularly those with a subsidy element, the Administration will propose that the Export-Import Bank's authority to make new direct loans be set at $4.4 billion in 1982, down 12% from the Carter budget and 31% from the current base.

He goes on to say:

The Bank's lending operations grew by over 400 percent from 1977 to 1980.

So we are talking about cutting it not nearly to the level it was in 1977. We are cutting only moderately in connection with that earlier level.

To quote President Reagan further:

The Carter administration used the Bank as a vehicle for head-to-head competition with foreign export subsidy programs. Some argue that rapid further growth in the Export-Import Bank's direct loans is necessary to expand exports, reduce U.S. trade deficits, and halt the decline in the U.S. share of world trade. However, the international accounts of the United States are now strong compared to other major industrial countries. The U.S. current account balance has improved by nearly $20 billion since 1978 while those of Germany and Japan have declined by $26 billion and $30 billion respectively.

In other words, we are doing better than our competition in exports, better than Germany, better than Japan.

Further, the U.S. share of world trade has increased in recent years. This excellent U.S. export performance has resulted primarily from cyclical changes in the United States and foreign economies, and not from growth in the Bank's direct lending.

Because of the Bank's past lending policies, its credit facilities tend to be regarded as entitlement programs. Moreover, a large proportion of the Bank's annual lending supports exports by a handful of large firms. In 1980, seven firms accounted for two-thirds of direct loans. Further, the Bank's subsidy to foreign borrowers results in a low rate of return to the U.S. economy and a drain on capital that reduces or eliminates the benefits from trade.

The administration's proposal will enable the Bank to offer substantial levels of credit to U.S. exporters; but credit terms will be less generous and credit will be more carefully targeted. In addition to benefiting from the regular, long-term direct loans, smaller U.S. exporters will continue to be assisted by the Bank's medium-term discount loan program. This component of the Bank's direct lending will be maintained at $400 million annually rather than eliminated as proposed by President Carter.

By restraining the growth of these programs, Federal outlays and the Federal deficit can be reduced by more than $6 billion over the next 5 fiscal years. At the same time, the objective of promoting exports will be supported at historically high levels. The changes will have only a nominal impact on the level of U.S. exports because first, previous credit levels were high; second, the direct loan program finances only 2 to 3 percent of U.S. exports; and third, as inflation and interest rates subside, the demand for the Bank's credit will fall.

I am sorry to report that the Budget Committee did not take President Reagan's advice. My amendment adopts President Reagan's recommendations. The Budget Committee took President Reagan's proposed cuts in Eximbank outlays for fiscal 1981, 1982, and 1983, and put back respectively, $14 million, $110 million, and $357 million for a total of $481 million, in the Eximbank budget. My amendment restores the Reagan budget cuts on outlays.

The Budget Committee also took President Reagan's proposed cuts on Eximbank budget authority for fiscal 1981, 1982, and 1983, and put back respectively $248 million, $665 million, and $723 million, for a total of $1.636 billion in the Eximbank budget. My amendment restores the Reagan budget cuts on authorizations.

Mr. President, I hope the Senate will support my amendment. It is important that the Senate not back off on President Reagan's proposed budget cuts. There is a lot at stake. Inflation, tax cuts, and perhaps even more importantly, fundamental fairness.

I urge an affirmative vote on this amendment.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. GORTON. Mr. President, there are, it appears to me, two serious defects in the arguments of the Senator from Wisconsin who has, nevertheless, not only during this debate on the budget but over the years provided a conscience to the Senate in connection with the growth of Federal spending.

First and vitally important is that his amendment does not do what he proposes or what he claims for it. It does not restore this budget instruction to its original status when it was recommended by the President and by the Office of Management and Budget.

The Budget Committee did two things in connection with its work with the Banking Committee:

First, it did operate on an assumption of a smaller cut from the authority of the Export-Import Bank than did the President.

Second, however, the Budget Committee recommended or assumed cuts in

other programs subject to the jurisdiction of the Banking Committee which more than made up for its restoration of funds to the Export-Import Bank.

Should this amendment be adopted, the instructions to the Banking Committee will require it to cut far more deeply into the programs under its jurisdiction than the President asked Congress to do.

Unlike the first amendment proposed by the Senator from Wisconsin, which would at least in theory require of the Appropriations Committee exactly what the President wished it to do, this would treat the Banking Committee far more severely.

While it has been stated many times during the course of this debate, it requires reemphasis that no instructions as to particular programs are given to the standing committees of the Senate by this budget resolution. While both the Budget Committee and the action of the Senate on this floor may strongly influence the Banking Committee, the Finance Committee, the Appropriations Committee, and all of the other committees affected by this process, they are in no way bound, and can make such distribution of the requirements of the reconciliation resolution as they deem appropriate among programs subject to their jurisdiction. If this amendment is passed, cuts required of the Banking Committee will be perhaps greater than those required of any other committee in the Senate.

Second, the balance among programs proposed by the Budget Committee is appropriate and is, in my view, better than that proposed by OMB in the original form of this resolution.

The Export-Import Bank is properly used to meet or to help American corporations meet foreign competition based on subsidies which are far greater in most cases than are those provided by the Export-Import Bank itself.

Most of the beneficiaries of these loans are not sick corporations but corporations on the leading edge of our American technology, corporations which help immensely in at least keeping a reasonable balance of payments between exports and imports into the United States.

That technology is fueled to a great extent by sales to foreign companies. It is threatened seriously, very seriously, by foreign competition subsidized by the governments of the nations from which that competition comes, some by subsidies to private corporations in those nations, and some by corporations owned directly by foreign governments themselves.

Our alternative is a very simple one. If we clip the wings of the Export-Import Bank, we will very clearly lose sales of items which can compete fairly if we had a fair and equitable world economic order. We will lose employment of skilled people in advanced technology companies, and we will ultimately lose that technology. In almost every case it requires a large unit production before the type of activity which is financed by the Export-Import Bank becomes successful.

If we lose early sales we simply will not go on with the technology at all, and we will find ourselves foreclosed from major fields in which we now have national technological superiority.

Obviously, our long-range goals must be the termination of unfair competition on the part of our trading partners and our trading rivals throughout the world.

Query: Are we more likely to be able to end that form of unfair competition by bowing out of that competition entirely or by indicating that we are willing to meet fire with fire, to provide at least part of the subsidies which our trading rivals provide for their own companies?

Bluntly speaking, international trade is not under the sole and complete control of the United States. To a very significant degree we must meet that competition as it actually exists. There has been progress during the course of the last several years, particularly with the European Economic Community, toward moving to a world in which competition is fairer, freer, and less subsidized.

We can either continue to meet that competition and move toward those goals or withdraw from the field and find our economy far worse off than it is at the present time.

So both because of the importance of the Export-Import Bank to the economy of the United States and because this amendment does not restore the Banking Committee to the situation in which the President recommended it be after the passage of this resolution, the amendment should be rejected.

Mr. PROXMIRE. Mr. President, will the Senator from Washington yield?

Mr. GORTON. Yes.

Mr. PROXMIRE. Does the Senator deny that the Kassebaum amendment passed? Does the Senator deny that the Budget Committee did reduce President Reagan's rescission by $14 million in 1981 outlays and, therefore, restore those millions of dollars, and restore $110 million in 1982, and restore $357 million in 1983 from President Reagan's recommended levels.

Mr. GORTON. The Senator does not only deny it, it was the point of the Senator's presentation that it was an appropriate change.

Mr. PROXMIRE. May I say to the Senator——

Mr. GORTON. What I did say was that in other areas the cuts proposed of the Banking Committee increased——

Mr. PROXMIRE. It had nothing to do with the Import-Export Bank. They made cuts in rural housing, they made cuts in consumer cooperatives, they made cuts in mass transit. It had nothing to do with the Export-Import Bank. They made recommendations which you support and I support. But what I did say was they did restore the cuts the Reagan administration made in the Export-Import Bank. That is all I said. Is that right or wrong? Is that not right?

Mr. GORTON. First, the Budget Committee cannot make cuts in specific programs. It can only make assumptions as to what the authorizing committee will actually do.

Mr. PROXMIRE. Everybody knows the Kassebaum amendment carried, and the Kassebaum amendment told the Banking Committee, "We recommend that the Reagan cuts be restored to the tune of $481 million in outlays and $1.6 billion in authority for 1981, 1982, and 1983."

Mr. GORTON. That is precisely what they meant to do, but the Budget Committee, in a very real sense, paid for it by asking for even greater cuts in other areas.

Mr. PROXMIRE. That had nothing to do with the Export-Import Bank.

Mr. GORTON. Under this amendment, if it passes, the Banking Committee will have considerably less authorization for the programs under its jurisdiction than it would have if the President's proposals had passed unchanged.

Mr. PROXMIRE. Why, of course. But the fact is if this amendment passes, nevertheless all of the committees will have more authorization than the Reagan administration recommended because there are other committees in other areas that the Budget Committee failed to cut. That is why my amendment, the last amendment I offered, was an attempt to restore those rescissions.

Mr. GORTON. The Senator from Wisconsin is not correct. If the budget resolution passes in the form in which it is before the Senate right now, we will have had a total net of greater cuts than the President recommended.

Mr. PROXMIRE. Down the way, in 1982 and 1983. I am talking about 1981.

Mr. GORTON. We are working on a 3-year proposition. The outyears are both larger and more important than 1981.

Mr. PROXMIRE. Well, may I say to my good friend from Washington he will learn as time goes on that those outyears have a way of disappearing, and if you are going to make cuts, you make them now, you make them at the present time.

Mr. President, I do hope that the Senate will recognize the wisdom of the President's recommendation, that we do make the cuts he recommended in the Export-Import Bank in view of the fact that it has grown enormously over the last few years.

Mr. President, I understand that I have—my time has expired, is that right?

The PRESIDING OFFICER. The Senator has a minute and a half.

Mr. PROXMIRE. Has the time on the other side expired?

The PRESIDING OFFICER. The opposition has about 36 seconds.

Mr. GORTON. I will yeld back the remainder of my time.

Mr. PROXMIRE. I understand under the unanimous-consent agreement that I may call up my other amendment on revenue sharing; is that correct?

The PRESIDING OFFICER. When all time has expired, that is the agreement.

Mr. PROXMIRE. It is my understanding that the distinguished Senator from Washington yielded back his 36 seconds?

Mr. GORTON. I did.

The PRESIDING OFFICER. The Senator yielded back his 36 seconds.

Does the Senator yield back his time?

Mr. PROXMIRE. I understood my time was exhausted.

The PRESIDING OFFICER. No, the Senator has not.

Mr. PROXMIRE. I yield back my time.

The PRESIDING OFFICER. Under the previous order, the Chair recognizes the Senator from Wisconsin.

AMENDMENT NO. 15 (AS MODIFIED)

(Purpose: To reduce budget authority for revenue sharing)

Mr. PROXMIRE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE) proposes an amendment numbered 15, as modified.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment, as modified, is as follows:

On page 7, line 15, strike out "$4,354,000,000" and insert in lieu thereof "$8,928,000,000".

On page 7, line 16, strike out "$8,832,000,000" and insert in lieu thereof "$12,264,000,000".

On page 7, line 17, strike out "$4,494,000,000" and insert in lieu thereof "$9,068,000,000".

On page 7, line 18, strike out "$10,870,000,000" and insert in lieu thereof "$15,444,000,000".

WHY REVENUE-SHARING FUNDS SHOULD BE CUT

Mr. PROXMIRE. Mr. President, the amendment would cut revenue-sharing funds by $4.574 billion in fiscal years 1982 and 1983 by amending the figures on lines 15 through 18 of page 7 of the bill. This would cut out the local revenue-sharing funds for fiscal years 1982 and 1983 covered by this bill.

The effect of my amendment is to instruct the Finance Committee to report changes in the laws within the jurisdiction of that committee in order to increase their savings by $4.575 billion, which is the amount of revenue sharing for the States for fiscal years 1982 and 1983.

NO REVENUE TO SHARE

Mr. President, the entitlement period for revenue sharing began in January 1972. The first payments were made on October 20, 1972, or in fiscal year 1973.

In that period, from fiscal year 1973 through fiscal year 1981—that is over the past 9 fiscal years—the Federal Government has run deficits which total $380 billion. In fiscal year 1982 we can expect another deficit of at least $45 to $50 billion. This means that in the period since revenue sharing began, the Federal Government has paid out from $4 to $6 billion a year to the States and localities during a 10-year period of time when it had a total deficit of $425 to $430 billion or an average yearly deficit of $42 to $43 billion.

The Federal Government had no revenue to share when this program began.

It has no revenue to share now.

And it will have no revenue to share in fiscal years 1982, 1983, 1984, and most probably in 1985.

As a matter of fact, the Joint Economic Committee chairman, HENRY REUSS, and Senator BRADLEY issued a joint statement today in which they estimate that in 1984 the Reagan deficit, which will be the first peacetime deficit we have ever had, will exceed $100 billion. That may not be true. We all hope it will not be true. I hope it will not be true very fervently. But we face that grim prospect unless we make cuts that we simply have to make that are unpopular and different and yet we have to make them.

Yet we continue the folly of sending back to the States $4.5 billion a year at a time of financial crisis for the U.S. Government, as the report of the Budget Committee so eloquently points out.

IRONIC ORIGINAL ASSUMPTION

When Walter Heller and Joseph Pechman first proposed revenue sharing—and they did propose it, I recall it so well; I was on the Joint Economic Committee when Walter Heller appeared and made the proposition. He said it was done on the assumption that because of a growing economy and rising real incomes, the existing income tax system would produce a higher and higher proportion of revenues for the Federal Government each year as both individuals and corporations paid more taxes or were thrown into higher tax brackets. They assumed a huge Federal surplus and addressed the problem of what to do with that surplus. It is fascinating that they assumed a surplus and every year since then we have had deficits. And the deficits, of course, have been great, with one exception, 1969.

They proposed, and Congress accepted under President Nixon's urging, the concept of revenue sharing.

But, as we have seen, there has been no revenue to share. Since 1960 there has been only 1 year of a Federal surplus, and that was a measly $3.2 billion in 1969. We have had 22 years with only one Federal surplus. I ask unanimous consent that a table from the President's 1981 Economic Report indicating the Federal deficits year by year be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE B-71.—FEDERAL BUDGET RECEIPTS AND OUTLAYS, FISCAL YEARS 1929-82

[Millions of dollars]

Fiscal year	Receipts	Outlays	Surplus or deficit (—)
1929	3,862	3,127	734

1982 [1]	711,780	739,296	−27,516

[1] Estimates.

Note.—Under provisions of the Congressional Budget Act of 1974, the fiscal year for the Federal Government shifted beginning with fiscal year 1977. Through fiscal year 1976, the fiscal year was on a July 1–June 30 basis; beginning October 1976 (fiscal year 1977), the fiscal year is on an Oct. 1–Sept. 30 basis. The 3-mo period from July 1 through Sept. 30, 1976 is a separate fiscal period known as the transition quarter.

Data for 1929–39 are according to the administrative budget and those beginning 1940 according to the unified budget.

Refunds of receipts are excluded from receipts and outlays.

See "Budget of the United States Government, Fiscal Year 1982" for additional information.

STATE AND LOCAL GOVERNMENT SURPLUSES

Mr. PROXMIRE. During the entire period of time when revenue sharing has been in effect and when the Federal Government has run deficits every year to the tune of $425 billion, State and local governments have run surpluses. (The figure for the Federal deficit was $289 billion on national income and product accounts.)

In calendar years 1972 through 1980, the year for which latest figures are available, the total State and local government surpluses, on a national income and product basis were $167.2 billion, or an average of more than $18.5 billion in each of those 9 years.

The State and local governments run surpluses—surpluses—of over $167 billion. Think of that. And the Federal Government runs deficits and yet we provide them with revenue. Now, where

is the sense in that kind of distribution? If anything, it should be going the other way.

For the 7 fiscal years from 1972–73 to 1978–79, for which we have figures, State and local governments had net surpluses on a regular basis of $61 billion or almost $9 billion a year on regular account.

I ask unanimous consent that tables showing the Federal, State, and local surpluses or deficits on national income and product accounts and State and local deficits on a regular basis, be printed at this point in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE B-73.—GOVERNMENT RECEIPTS AND EXPENDITURES, NATIONAL INCOME AND PRODUCT ACCOUNTS, 1929–80

(Mr. GARN assumed the chair.)

Mr. PROXMIRE. In recent years the State and local surpluses became so high that State after State reduced their sales, income, or property taxes at the same time the Federal Government was going broke, and while the Federal Government was paying about $6 billion a year to the States and localities in general revenue-sharing funds.

In 1979, for example, in more than 40 States, State and local governments gave some form of tax reduction—by rate reductions, base reductions, or indexing the personal income tax; by rate or base reductions in the general sales taxes; or by reducing the rates or constraining assessments in the property tax.

In my own State of Wisconsin, for example, there was such a large surplus that the Governor campaigned, when he was running for election against the incumbent Democratic Governor, that the Democrats had been too conservative, had created too big a surplus; that it was embarrassing. He campaigned that he, as a Republican Governor, would return the surplus to the taxpayers of the State. He did that. He had equaled the State's share of Federal revenue sharing for a period of 19 years. That tax cut was equivalent to 19 years of revenue sharing.

Now, the States and localities say they may be in trouble and that they need their revenue-sharing funds. But if there is a need, it is due, in large part or only, because they have given vast surpluses back to their taxpayers at a time when the Federal Government has been hundreds of billions of dollars in the red.

I ask unanimous consent that a table showing selected tax reductions and restrictions for 1979 be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE 1.—SELECTED TAX REDUCTIONS AND RESTRICTIONS 1979

	State personal income tax			State general sales tax		Local property tax

Legend:
State personal income tax "base reduction":
1 = New or expanded exemptions or deductions.
2 = New or expanded credits (including renters' property tax credit).
3 = Rebates.
Local property tax "homeowner tax relief":
General[1] = New or expanded tax relief with no age or income restrictions.
General[2] = New or expanded tax relief with income restrictions.
Limited = New or expanded tax relief with age or disability qualifications.

(a) The 3 percent threshold in the personal tax inflation adjustment factor was eliminated.
(b) Pending voter approval of proposed constitutional amendment.
(c) The legislature approved several proposed constitutional amendments which, if approved by the voters, would provide tax relief in individual Georgia counties.
(d) The sales tax on residential fuel will be phased out over next 3 yr.
(e) Tightened restrictions on existing truth-in-taxation law.
(f) Sales tax on food to be phased out over next 2 yr.

NOT A TAX BUT AN OPEN-ENDED APPROPRIATION

Mr. PROXMIRE. Revenue sharing is misnamed. We are not sharing revenues with the States. We are providing an open-ended appropriation to them.

The Federal Government has not levied a set of taxes which raised revenues which we are returning to the States. When revenue sharing began no new taxes were imposed at all. It is not like the highway trust fund or the windfall profit tax on the oil companies or user fees charged to the barge lines or for drilling offshore oil. We did not add a new tax on the States or localities and then return it to them.

Instead, we appropriated the funds out of existing taxes. That is the economic and legislative effect, even though the program is called revenue sharing, has a hollow shell of a trust fund surrounding it, and is provided by the taxing committees.

It is not a tax which is returned. It is an appropriation from the general funds of the Treasury which is given to the States.

While I do not raise any jurisdictional dispute at this time, the program should have been legislated by the Government Operations or the Banking Committee to the cities and the funds provided annually by the Appropriations Committee.

But that is past history and behind us. But such procedures would more nearly square with reality.

THOSE WHO SPEND MONEY SHOULD RAISE IT

There is something else fundamentally wrong with revenue sharing. It violates one of the first principles of government finance; namely, that those who spend money, in order to remain accountable, should have to raise the money.

What we have now is the spectacle of Presidents and Congressmen providing the funds to the States to spend virtually as they please.

The mayors love it. We raise the money. We take the heat either for high taxes or excessive deficits. And they get to spend the money with virtually no strings attached.

One witness called this like underworld money. You put it on the stump and run. Of course, they think it is a wonderful program. And, for them, it is. That is why there is such a lobby down here of State and local officials demanding their revenue-sharing money. But the public does not support it. It is a program for officialdom.

PUT IT ON THE STUMP AND RUN

This leads to a lack of accountability in the program. It is like the old gambling money, "Put it on the stump and run." Study after study has shown that no one really knows where the money goes or what is done with most of it. The League of Women Voters made a 2-year study of this program and they found a very, very large proportion of State legislators, Governors, and the press that covered the State legislature could not say where the money went. No accountability. And that is the worst aspect of it. There is one good saving discipline about Government spending money, especially at the local level. That is the taxpayer can come in and challenge it and say, "This is my money. I want you to justify it." But you cannot do that with revenue sharing money because it has a way of just disappearing without accountability.

While in some States it is earmarked for specific purposes, like the schools, in local area after local area, no one knows what it goes for.

And time after time we have heard reports that localities would say, "We can't spend our own money for that fire station or swimming pool, or tennis court. Let's take it out of the revenue-sharing money."

CALL A HALT

Well, the time has come to call a halt. This Government faces a fiscal crisis. We have double-digit inflation.

Interest rates are at unprecedented heights.

The Federal Government has a massive deficit. The national debt will soon exceed $1 trillion.

President Carter campaigned on a balanced budget, and never got one.

President Reagan campaigned on a balanced budget, but now says it will not occur until his fourth year and he will have to be mighty lucky, as his Secretary of the Treasury admitted, if it happens then.

As I just pointed out, two distinguished Democrats, Senator BRADLEY and Congressman REUSS, argue that Reagan faces a $100 billion deficit in 1984.

The Senator from Nebraska (Mr. EXON) brought out at the Budget Committee markup, that if the overly optimistic inflation rate assumed by the administration for fiscal year 1985 does not happen, there will be at least in $8.5 billion deficit in that year.

Meanwhile the States and localities have run surpluses on an income and product account basis averaging $18.5 billion a year and have given massive tax cuts to their citizens.

We have no revenue to share.

The purposes for which the money is used are vague and often of very low priority.

As those who spend the money do not have to raise it, there is an absence of fiscal accountability that should be required of every public official and of every level of government.

The time to end so-called revenue sharing is now.

That is what my amendment would do.

I urge Members to back it and support it. Now.

Mr. President, having said all that, let me just say I did get through the second grade, I can count, and I realize that the votes are not there. While I feel very fervently that we should abolish this program, I recognize that it would be a

waste of time to have a rollcall on it so I will withdraw my amendment.

Mr. ROBERT C. BYRD. Mr. President, I hope the Senator will withhold that.

Mr. PROXMIRE. I am happy to accommodate the Senator.

Mr. ROBERT C. BYRD. Mr. President, I thank the Senator.

I have listened with interest to his statement. I certainly support the elimination of the State revenue-sharing program, but I oppose the elimination of the general revenue-sharing local share allocation. While I agree that we must eliminate those programs that have not fulfilled their expected function, and that are not as essential as others, the general revenue-sharing program's local share allocation does not fall into either of these categories.

Mr. President, I know that the distinguished Senator has stated that he intends to withdraw the amendment and that he can count, that he recognizes the arithmetic of the votes, whether it is by the new math or by the old. But he has made some statements in opposition to the local sharing allocation and I think that some of those of us who are opposed to this amendment, who support local revenue sharing, ought to say on the record what we have on our minds with respect to this program and ought to make a defense of it on the record right now. I do not think we should let the statements by the distinguished Senator from Wisconsin go unchallenged. It is for that reason that I take the floor at this time. I appreciate the fact that he is withholding the withdrawal of the amendment at this point. But even if he did so, there are some of us who would like to speak out on this subject and we intend to do so.

The general revenue-sharing program began in 1972 under the Nixon administration. It is based on the concept that the Federal Government is best equipped to collect taxes and redistribute them through a form of entitlement to local governments. Based on a fair and equitable formula, it takes into consideration population, local tax effort, and per capita income. The program was not designed to reward local governments derelict in their duty and it does not work that way. The formula assures that those local governments that try their best to provide adequate services will be assisted by the program.

Local revenue-sharing funds may be used for any legal purpose under State and local laws. In West Virginia, they are typically used for public facilities such as water and sewer systems, courthouse and municipal office building construction, nursing home construction, construction of low- to moderate-income family housing, and public service employment. Since the program's implementation, almost $42 billion has been allocated to local governments nationally, for such purposes and some $383 million has been awarded to local governments in West Virginia.

From the beginning, the concept was, and remains today, in accord with those aims expressed by the present administration, that more than 39,000 jurisdictions could best make a determination of how to spend their allocated funding. Through the process of local citizen-participation hearings, local governments learn the needs of the local communities and citizens have an opportunity to influence how those expenditures are to be made. This is a continuation of the concept of local autonomy.

Last December the Senate voted overwhelmingly—by a vote of 80 to 3—to extend the general revenue sharing program's local share allocation at the rate of $4.6 billion per year through 1983. The legislation was subsequently enacted into Public Law 96-604.

In reliance upon the continuation of this essential program—which received such broad support in the Senate and in the Congress last year—local governments across this Nation have included in their projected budgets for fiscal year 1982 the anticipated allocations from this program. Withdrawal of funding at this crucial time would place their budgets in havoc, and would result in deficits—which must translate to the loss of essential community programs and services—for which there is no available, alternative funding source.

Some have argued that the revenue sharing program was adopted as a method of sharing the Federal surplus with State and local governments. In fact, however, the Federal deficit in fiscal year 1973—which was the first year that revenue-sharing payments were made—was equal to more than 6 percent of total outlays. A deficit amounting to the same percentage of total outlays in fiscal year 1982 would be about $47 billion—roughly the amount projected in the administration's budget proposal.

This program has consistently enjoyed bipartisan support throughout its existence. It was proposed originally by a Republican President and enacted by a Democratic Congress. President Reagan has unequivocally supported the local share program. It is the only program that provides Federal assistance to virtually every local government in the Nation.

Mr. President, the revenue-sharing program is a cornerstone of the Federal grant-in-aid system. In particular the local share program has worked. It has worked well, and it deserves to be retained at the fully funded level.

Mr. President. I have yielded such time as I have used from time on the resolution.

Mr. GORTON. Mr. President, the distinguished minority leader is entirely correct. This amendment having been placed before the Senate, it is appropriate to give the arguments against it even though it is going to be withdrawn. I will do so very briefly and I will then yield time from the amendment to the Senator from Tennessee and the Senator from West Virginia if they wish me to do so.

I do not believe arguments against general revenue sharing were valid 2 or 3 years ago when the fiscal condition of the States and many local communities was better than many are today. Whatever their weakness at that time, the arguments against this program are infinitely weaker today. I do not believe that there are any significant number of major local governments in the United States which are awash in money.

The program has already abandoned the States and now applies only to local governments, which are a key to the federalism which this administration proposes to revive. A key element in the new idea of block grants is that both the States and the local governments be granted more authority to meet their own problems in their own way, but a key toward solving the budget crunch with which this Nation is faced is that there will be fewer dollars in these block grants than there are in current categorical aid grant programs.

That drop in dollars, ignoring the effects of inflation, will be greater than the entire amount proposed for revenue sharing with local communities in this budget. Those local communities need encouragement in order to meet the greater responsibilities which are going to be thrust upon them.

They need the money to meet Federal regulations in myriad programs which Congress has authorized but has not fully funded.

Mr. President, this program has already been cut substantially. It is vitally important for the survival of local government that it be retained. Whatever the situation may have been 2 or 3 years ago, these governments are now in desperate need of funds in order to meet the minimum requirements of their citizens.

The Senator from Wisconsin speaks of the fact that, always, the right to spend money should be connected with the duty to raise money. Yet almost no local government has ever found itself in that position. The precedent for States sharing their revenues with local governments is well established. It has been in existence as long as the Nation itself has been in existence. That the single area of our Government best able to raise money should recognize the problems which it has created for local governments and help in a small way to defray those costs through this most successful program is evident, I think, to the great majority of Members of this body.

Mr. President, I now yield 5 minutes to the Senator from Tennessee.

Mr. SASSER. Mr. President, I am opposed to the amendment of the Senator from Wisconsin (Mr. PROXMIRE) which would cut out $4.574 billion in local revenue sharing.

This money has been duly authorized for a 3-year period as a result of the renewal of the general revenue sharing program passed by Congress last year.

At that time, we had considerable debate over the value and merit of the revenue-sharing program and, ultimately, we made the decision to cut out $2.3 billion in that program in payments that go to State government. We made that decision, after considerable debate and with some opposition from this Senator, because we felt that many States had the ability to withstand the loss of State revenue sharing.

In my State of Tennessee, that meant we had to deny the State government some $42 million in revenue sharing—

money that it could have used to keep sales and gasoline taxes down while still keeping essential services intact. Many of us in Senate supported an amendment to the revenue-sharing program which would have allowed us to keep 40 percent of the State share of revenue sharing intact. That amendment passed the Senate but was not contained in the final version of the general revenue-sharing reauthorization.

Mr. President, this amendment would strike at the heart of local government finances throughout the Nation in the years ahead. These local governments now expect, because of the fact that revenue sharing is financed from a trust fund, stable allocations of revenue-sharing money in the next 3 years ahead. If we undo our work of last year, local governments will have, in an unexpected fashion, to raise local sales and property taxes in the very near future.

Mr. President, at a time when all levels of government are making an effort to keep spending down, the Proxmire amendment on local revenue sharing would result in a considerable increase of local taxes, especially in poorer urban and rural jurisdictions which use this money to finance essential services.

In my State, this would mean that, statewide, local property or sales taxes would have to be raised by more than $90 million for 1982 and several years thereafter. This is unacceptable to me and to the local taxpayers in my State.

Finally, I object to this amendment because we are cutting the Federal aid program that has done the most to foster a stable grant-in-aid system among Federal and local governments. Revenue sharing comes without the many strings of other categorical grants. It is used in accordance with local priorities. It can be used to finance essential services or keep local taxes down—both worthy goals for local government.

Mr. President, we are engaged here in cutting the Federal budget without, at the same time, creating fiscal chaos for local governments. Passage of the Proxmire amendment to cut local revenue sharing would create such fiscal chaos, and I hope that my colleagues join with me in defeating this amendment.

Mr. GORTON. Mr. President, I yield 7 minutes to the Senator from West Virginia.

Mr. PROXMIRE. Will the Senator from West Virginia yield until I get the yeas and nays on the other two amendments?

Mr. RANDOLPH. Yes, indeed.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that I may ask for the yeas and nays on the other two amendments I called up.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Is there a sufficient second on both amendments? There is a sufficient second.

The yeas and nays were ordered.

Mr. RANDOLPH. Mr. President, I do not want to be disrespectful on this subject of the amendment of the Senator from Wisconsin (Mr. PROXMIRE), but I wish he would, in a sense, stand and take his medicine, as we did on the EDA amendment of yesterday. We knew that we were not going to win on EDA. Yet we had a rollcall vote in the Senate of the United States on that subject and other programs in which we believe very strongly and have come to support. Yet we knew that we were not going to win. I am a little surprised that the Senator is dropping this matter without giving his colleagues the opportunity to express themselves, either in support of the amendment or against it.

Mr. PROXMIRE. If the Senator would yield, that would be against my religion. I know I am going to take a licking and I do not want to take it. So I am going to withdraw the amendment.

I appreciate the Senator's appeal.

Mr. RANDOLPH. Mr. President, that is a frank statement. Only in good humor do we mention a situation like this, although it has some substance to it.

Mr. President, the amendment of the Senator from Wisconsin, which is to be withdrawn, is an unwise attack on a program that has enabled local communities to make sound investments for the present and for the future of the men, women, and children who live in those communities. The Federal revenue-sharing program contains two elements which, in my judgment, constitute the type of Federal response we must look to as we plan for the future. It gives flexibility to local governments to determine their needs—not Washington determining those needs, but the local communities—and to generally allocate funds to meet these specific needs within the communities of West Virginia and throughout the other States.

Further, I believe that it is important to state that revenue-sharing programs require the opportunity for citizens to participate in the decisionmaking process. I think this is a highly important point and in line with the thinking generally of my colleague who is withdrawing the amendment. Revenue sharing is a sound concept which has been studied and debated and supported in Congress—not in the last few minutes, not in the last few days, but over a period of several years.

If the Members of Congress have been wrong in this action in both the House and the Senate, they certainly have been wrong by a very considerable majority. I think that it is important for the RECORD to reflect this support which the Congress has given to revenue sharing.

Mr. President, our communities in the hills of West Virginia and in the lake regions of Wisconsin have developed extensive public service programs and facilities through revenue sharing. Certainly, we all know the value of adequate water systems in communities in which we live and of sewage treatment systems, as they have been developed in our State of West Virginia and every State.

Are we interested in good health care facilities, better quality of housing, recreation, and including libraries, in the communities in which the people of America live? Certainly we are and revenue sharing has served many of these purposes.

Additionally, the ability of towns and cities to deliver vital services such as police and fire protection have been enhanced through revenue sharing.

Mr. President, I speak slowly now but very earnestly. After having drastically reduced the categorical assistance to local governments in the pending budget resolution, it would be tragic for this body, to now remove revenue-sharing funds from them.

The PRESIDING OFFICER. The Senator's 7 minutes have expired.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. GORTON. I yield.

Mr. DOLE. Mr. President, the Senator from Wisconsin proposes to increase the savings instruction to the Finance Committee to reflect a proposal to eliminate payments to local governments under Federal general revenue sharing. Senator PROXMIRE is concerned that we spend Federal revenues only in the areas of highest priority, and that we get maximum value for every Federal dollar spent. It is because I share that concern that I must oppose this amendment, and urge that it be rejected.

Mr. President, late last year we renewed general revenue sharing for 3 years. We did so because the program has proved to be cost effective and efficient to administer, particularly in comparison with the wide array of categorical grant programs that also channel funds to local and, in some cases, State governments. At the same time, we insured budget savings in the program by requiring that State governments, in order to qualify for revenue-sharing funds, agree to forgo an equivalent dollar amount in other Federal grant funds. This means that, in terms of total spending, $2.3 billion per year has already been saved out of the revenue-sharing program. That would suggest that we ought to proceed with caution when considering further cuts in revenue sharing.

The situation is further complicated when we consider the fiscal situation of local governments over the next few years. The Reagan administration is committed to restoring State and local control on matters of public policy wherever possible, because the Federal Government is often ill equipped to make decisions that take into account differing local conditions and circumstances.

As part of this process, President Reagan has proposed consolidating many existing grant programs into block grants, with reduced funding to reflect, in part, the reduced paperwork burden and administrative cost associated with the grant-making process. In addition, the budget savings proposed by President Reagan in a number of areas will affect local governments. While we are in the midst of this transition period, there seems little sense in cutting back on general purpose assistance to local governments.

Mr. President, President Reagan did not recommend elimination of revenue sharing for local governments, and I am convinced that he did not do so because revenue sharing is consistent with the principles of federalism that the President has stated so often. The most responsive level of government is that

which is closest to the day-to-day concerns of the people, and we ought to work toward giving governments the maximum flexibility in dealing with local problems. Over the next few years, we may succeed in working toward the point where all Federal aid to local governments is in the form of block grants directed to particular areas of concern, such as education, but with spending decisions made for the most part at the local level. But until we reach that point, there is no reason to eliminate a program of general purpose assistance that is working remarkably well.

I believe the Senator from Wisconsin shares my feelings that the power to tax and the power to spend ought, ideally, to be linked. But where there is a general national purpose at stake, it is appropriate for Federal revenues to be directed to the local level and spent by local authorities, provided that localities are allowed maximum flexibility in making their spending decisions. Such a system of shared responsibility is not only sensible, it virtually is mandated by our federal system of government. I hope that we will move over the next few years to reduce both Federal taxes and the Federal role in our economy, and that will help make State and local governments more responsible and more responsive. But this is not an appropriate time to eliminate a program that spends Federal dollars as efficiently as revenue sharing does.

Mr. President, I urge my colleagues to reject the amendment proposed by the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. GORTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order, the question recurs on the amendment of the Senator from Wisconsin.

Mr. BAKER. Mr. President, before the rollcall starts, I have a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAKER. Is the second vote of the two votes that are stacked a 10-minute vote?

The PRESIDING OFFICER. The Senate does not have an order to that effect.

Mr. BAKER. I ask unanimous consent that the second vote be a 10-minute vote.

The PRESIDING OFFICER. Without objection, it is so ordered.

VOTE ON UP AMENDMENT NO. 43

The question is on agreeing to the amendment of the Senator from Wisconsin, UP No. 43. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Maryland (Mr. MATHIAS), and the Senator from South Dakota (Mr. PRESSLER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. WILLIAMS) is necessarily absent.

The PRESIDING OFFICER. Are there any Senators in the Chamber wishing to vote?

The result was announced—yeas 15, nays 81, as follows:

[Rollcall Vote No. 65 Leg.]

YEAS—15

Boren	Heflin	Proxmire
Byrd, Harry F., Jr.	Hollings	Roth
DeConcini	Humphrey	Sasser
Dixon	Nickles	Zorinsky
Grassley	Nunn	
	Percy	

NAYS—81

Abdnor	Exon	McClure
Andrews	Ford	Melcher
Armstrong	Garn	Metzenbaum
Baker	Glenn	Mitchell
Baucus	Gorton	Moynihan
Bentsen	Hart	Murkowski
Biden	Hatch	Packwood
Boschwitz	Hatfield	Pell
Bradley	Hawkins	Pryor
Bumpers	Hayakawa	Quayle
Burdick	Heinz	Randolph
Byrd, Robert C.	Helms	Riegle
Cannon	Huddleston	Rudman
Chafee	Inouye	Sarbanes
Chiles	Jackson	Schmitt
Cochran	Jepsen	Simpson
Cohen	Johnston	Specter
Cranston	Kassebaum	Stafford
D'Amato	Kasten	Stennis
Danforth	Kennedy	Stevens
Denton	Laxalt	Symms
Dodd	Leahy	Thurmond
Dole	Levin	Tower
Domenici	Long	Tsongas
Durenberger	Lugar	Wallop
Eagleton	Matsunaga	Warner
East	Mattingly	Weicker

NOT VOTING—4

Goldwater	Pressler	Williams
Mathias		

So Mr. PROXMIRE's amendment (UP No. 43) was rejected.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VOTE ON AMENDMENT NO. 14

The PRESIDING OFFICER. The question is on agreeing to the amendment (No. 14) proposed by the Senator from Wisconsin concerning the Export-Import Bank. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Maryland (Mr. MATHIAS), and the Senator from South Dakota (Mr. PRESSLER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. WILLIAMS) is necessarily absent.

The PRESIDING OFFICER (Mr. HATFIELD). Are there any Senators in the Chamber desiring to vote who have not done so?

The result was announced—yeas 20, nays 76, as follows:

[Rollcall Vote No. 66 Leg.]

YEAS—20

Boren	Dodd	Mitchell
Burdick	Dole	Nickles
Byrd, Harry F., Jr.	Exon	Nunn
Cohen	Heflin	Proxmire
Cranston	Helms	Riegle
DeConcini	Huddleston	Stennis
	Humphrey	Zorinsky

NAYS—76

Abdnor	Gorton	Moynihan
Andrews	Grassley	Murkowski
Armstrong	Hart	Packwood
Baker	Hatch	Pell
Baucus	Hatfield	Percy
Bentsen	Hawkins	Pryor
Biden	Hayakawa	Quayle
Boschwitz	Heinz	Randolph
Bradley	Hollings	Roth
Bumpers	Inouye	Rudman
Byrd, Robert C.	Jackson	Sarbanes

Ford	McClure	Weicker
Garn	Melcher	
Glenn	Metzenbaum	

NOT VOTING—4

Goldwater	Pressler	Williams
Mathias		

So Mr. PROXMIRE's amendment (No. 14) was rejected.

Mr. HOLLINGS. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order of business, the Senator from Arizona is recognized.

UP AMENDMENT NO. 41

(Purpose: To increase the level of savings to be reported by the Senate Committee on Governmental Affairs)

Mr. DECONCINI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Arizona (Mr. DECONCINI), for himself, Mr. BOREN, Mr. PRYOR, Mr. DIXON, Mr. RIEGLE, and Mr. RANDOLPH proposes an unprinted amendment numbered 41.

Mr. DECONCINI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 22, strike out lines 4 through 13, and insert the following:

"SEC. 11. The Senate Committee on Governmental Affairs shall report changes in laws to modify programs within the jurisdiction of that Committee which would reduce the costs to the Government resulting from waste, fraud, and abuse; administrative, non-

defense related travel and transportation; consultant services; public affairs, public relations, public information, and Government advertising; audiovisual and film-making activities; and uncollected Federal debts. Savings in appropriations and expenditures from trust funds from such statutory changes shall be $3,900,000,000 in budget authority and $1,700,000,000 in outlays in fiscal year 1982 and $1,000,000,000 in budget authority and $2,000,000,000 in outlays in fiscal year 1983."

Mr. DECONCINI. Mr. President, I ask unanimous consent that the Senator from Tennessee (Mr. SASSER), and the Senator from Delaware (Mr. BIDEN), be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, over the past 2 weeks a number of amendments have been offered on the floor of the Senate that would offset recommended add-ons——

Mr. DOMENICI. Mr. President, could we have order?

The PRESIDING OFFICER. The Senate will be in order. The Senator will suspend until the Senate is in order.

TIME LIMITATION AGREEMENT

Mr. BAKER. Will the Senator from Arizona yield to me on my time and not his?

Mr. DECONCINI. I yield.

The PRESIDING OFFICER. The Senate will be in order. The Senator from Tennessee is recognized.

Mr. BAKER. Might I inquire of the distinguished minority leader if there is some possibility that we could, by unanimous consent, shorten the time allocated to the remaining amendments, or any of the amendments that remain to be disposed of?

Mr. ROBERT C. BYRD. Mr. President, I have tried to find out from Senators how many amendments remain on this side of the aisle. Do I understand there will be further amendments on the other side?

Mr. BAKER. Mr. President, as far as we know, there is one more amendment to be offered on this side, an amendment by the Senator from North Carolina (Mr. HELMS).

Mr. ROBERT C. BYRD. Mr. President, I have been able to get from my side of the aisle the following suggested time limitations, and I present them to the majority leader for his consideration.

On an amendment by Mr. METZENBAUM dealing with water projects, 30 minutes to be equally divided.

On an amendment by Mr. METZENBAUM dealing with tobacco subsidies, 30 minutes to be equally divided.

On an amendment by Mr. TSONGAS dealing with urban development assistance, 30 minutes equally divided.

On an amendment by Mr. RIEGLE dealing with unemployment insurance, 30 minutes equally divided.

On an amendment by Mr. MOYNIHAN—and this is referred to as the equal sacrifice amendment—30 minutes equally divided.

On an amendment by Mr. MOYNIHAN dealing with Puerto Rico, 30 minutes equally divided.

Mr. BIDEN. Mr. President, I have an amendment on low-income energy assistance. I would be willing to have 10 minutes equally divided.

Mr. BUMPERS. I have an amendment. I am reluctant to agree to a time on it but I feel certain we can dispose of it in 30 minutes.

Mr. ROBERT C. BYRD. Mr. President, what time does the distinguished majority leader plan to come in tomorrow?

Mr. BAKER. Mr. President, what I had hoped to do was to be able to sequence these amendments with a reduced time so we could come in a little later tomorrow. But judging by the number of amendments that appear here, and the fact that we have requests for two special orders in the morning, it will be my plan at this moment to come in at 9:30.

Mr. ROBERT C. BYRD. Would any of the Members on my side object to my suggestion that by coming in at 9:30 and beginning by 10, we would wrap up final passage by no later than 6 p.m. tomorrow, and hopefully do better than that?

Mr. BAKER. Mr. President, that would be eminently satisfactory on this side. If 6 o'clock is too late, I am willing to move back the convening hour a little bit in order to accommodate the needs of any Senator.

Mr. ROBERT C. BYRD. Would Senators be willing to say not later than 5 o'clock? That would give us a total of 7 hours.

Mr. BUMPERS. Will the leader yield for a question?

Mr. ROBERT C. BYRD. Yes.

Mr. BUMPERS. Would that accommodate all the amendments the leader just read off a moment ago, assuming 30 minutes on the ones which were read?

Mr. BAKER. Mr. President, if I may answer that, as I have counted, there would be 4 hours 10 minutes counting the full time that would be allocated to the Senator from Arkansas, plus the time for rollcall votes.

Mr. BUMPERS. Has the leader counted the time it takes to vote?

Mr. BAKER. There would be 4 hours 10 minutes of debate and 8 rollcalls at 15 minutes each would be 2 hours. So it would be 6 hours 10 minutes. Say 7 hours.

Mr. BUMPERS. The leader proposes to start the legislative session at 10 in the morning?

Mr. BAKER. Mr. President, if we can arrive at an agreement for final passage at 5 o'clock, it would be my intention to convene the Senate at 9:30 and dispose of two special orders with a little bit of routine business, though not very much, and be on this measure not later than 10 o'clock in the morning.

Mr. HOLLINGS. I have two other amendments by Senator EAGLETON which were not mentioned. He has agreed to times of 40 minutes on both, equally divided. Then there is another amendment, a Chiles amendment, on vocational education. Those are three more that were not mentioned so you might make it 6 o'clock.

Mr. BAKER. Rather than make it 6, might I inquire? If we stuck with the 5 o'clock time, I would be willing to convene the Senate at 8:30, and have the two special orders, and be on this measure beginning at 9 o'clock.

Mr. ROBERT C. BYRD. I will make a suggestion to the distinguished majority leader. I have had some other Senators talking to me. I suggest that he propound the request he wishes; that the Senate complete action on this resolution no later than 7, and we would strive to do better during the day.

Mr. BAKER. Mr. President, let me propound a unanimous-consent request.

Mr. President, I ask unanimous consent that on tomorrow there be a time limitation on the amendment of the distinguished Senator from Ohio (Mr. METZENBAUM) dealing with water projects not to exceed 30 minutes to be equally divided; another amendment by the distinguished Senator from Ohio (Mr. METZENBAUM) dealing with tobacco with a time limitation of not more than 30 minutes to be equally divided.

Mr. President, let me revise that request to 40 minutes equally divided instead of 30 minutes on the tobacco amendment.

On an amendment by the Senator from Massachusetts (Mr. TSONGAS) on UDAG, 30 minutes to be equally divided; on the amendment of the Senator from Michigan (Mr. RIEGLE) on unemployment compensation, 30 minutes to be equally divided; on the Moynihan amendment on equal tax—did he call it tax bite? Is that the name?

Mr. DOMENICI. Equal sacrifice.

Mr. BAKER. That is almost the same. That would be 30 minutes. And another amendment by the Senator from New York (Mr. MOYNIHAN) dealing with Puerto Rico, not to exceed 30 minutes equally divided; on an amendment by the Senator from Delaware (Mr. BIDEN) dealing with low-income fuel assistance, not more than 10 minutes to be equally divided; and that, Mr. President, final disposition of this measure occur not later than 7 p.m. on tomorrow.

The PRESIDING OFFICER. Is there objection?

Mr. STENNIS. Will the Chair indulge me for a minute?

The PRESIDING OFFICER. The Senator from Tennessee has the floor.

Mr. STENNIS. Will the Senator yield to me?

Mr. BAKER. I am happy to yield.

Mr. STENNIS. When the Senator from Ohio offers his amendment on water projects—is that the amendment of the Senator?

Mr. METZENBAUM. That is an amendment that the Senator from Ohio may or may not offer. The Senator from Tennessee is correct that I may offer that amendment.

Mr. STENNIS. Mr. President, not knowing whether it is going to be offered or not, being here right at the last with no one knowing what the attendance will be, or who might be here, will the majority leader permit us to confer with the Senator from Ohio?

Mr. METZENBAUM. What did the Senator say?

Mr. STENNIS. I was asking for a minute to confer with the Senator about it and see if we could talk about it some.

Mr. BAKER. Mr. President, in view of the request of the distinguished Senator from Mississippi, I leave my request pending. For the moment, I suggest the absence of a quorum to be charged against both sides.

Mr. BUMPERS. Mr. President, will the leader withhold?

Mr. BAKER. Yes.

Mr. BUMPERS. Will the distinguished majority leader add my amendment to the list? It has apparently been omitted.

Mr. BAKER. Mr. President, would the Senator agree to a time limitation of 30 minutes?

Mr. BUMPERS. I agree.

Mr. BAKER. I add to that request the amendment of the Senator from Arkansas. I wonder if he could give us the subject of that amendment?

Mr. BUMPERS. The subject is on everybody's desk, face up. It deals with the restoration of $7 million in the childhood immunization program.

Mr. BAKER. I thank the Senator.

Mr. President, a time limitation of not more than 30 minutes on the child immunization amendment to be offered by the Senator from Arkansas (Mr. BUMPERS) of 30 minutes equally divided.

Mr. President, I add to that list an amendment on vocational education to be offered by the Senator from Florida (Mr. CHILES), 30 minutes to be equally divided.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. BAKER. I yield to the distinguished minority leader.

Mr. ROBERT C. BYRD. Mr. President, the fact that certain time limitations are being offered on certain amendments does not rule out other amendments. Senators may be assured that they will have an opportunity to offer other amendments if they wish to do so, even though those amendments have not been specified this evening. There would be a final time of not later than 7 o'clock, however, if the majority leader presents that request.

Mr. METZENBAUM. Mr. President, reserving the right to object, if that is a unanimous-consent request, I would have to object if the final hour is 7 o'clock.

Mr. ROBERT C. BYRD. No later than.

Mr. METZENBAUM. I had understood that he was talking about not later than 5 o'clock If we cannot conclude by 5 o'clock, then I see no reason particularly to foreshorten my own time with respect to some amendments that I may bring up. If we can conclude by 5 o'clock, I have no difficulty at all. If it is 7 o'clock, we may as well stay until 8, 9, 10, or 11, as far as I am concerned.

Mr. ROBERT C. BYRD. Mr. President, I hope the Senator will not take that position. There are some Senators who want to be assured that they will have an opportunity to have a little time on their amendments. The 7 o'clock limit is the outside limit. The Senate might finish earlier, but that would give them assurance that they would not call up their amendments and not have time on them. The Senator has had an opportunity to debate his amendments today; he will have a further opportunity tomorrow. I do not think we should make the agreement in such a way that some Senators would end up tomorrow not having any time, perhaps, on their amendments.

I hope the Senator will allow us to agree on 7 o'clock.

Mr. BAKER. Mr. President, I have the floor. I shall be happy to yield to the Senator from Delaware.

Mr. BIDEN. Mr. President, I should like respectfully to request that the time limit on my amendment, which I suggested can be done in 10 minutes, be 20 minutes equally divided, because other Senators have indicated they may want to say something. I may not use it all, but I should like 20 minutes equally divided.

Mr. BAKER. Mr. President, I revise my request to accommodate the request of the Senator from Delaware.

Mr. LEVIN. Will the majority leader yield?

Mr. BAKER. Yes, I yield.

Mr. LEVIN. Mr. President, would the Senator add to his list an amendment relative to unemployment compensation? It will take no more than 20 minutes equally divided. It is a different one from Senator RIEGLE's.

Mr. BAKER. I add to the request, Mr. President, another amendment by the Senator from Michigan (Mr. LEVIN) on unemployment compensation, not to exceed 30 minutes equally divided.

Mr. DOMENICI. Reserving the right to object, Mr. President, with reference to Senator METZENBAUM's amendment on water projects that he might offer, I ask that there not be a time limitation, that it be the hour under the bill. I do not think the Senator would disagree with that.

Mr. METZENBAUM. The Senator from Ohio wants to make it very clear that he is not at all certain he will call up that amendment. I certainly cannot object to the fact of taking the full hour. The Senator from Ohio does want to make it clear that if we cannot bring the matter to a final vote by 5 o'clock, the Senator from Ohio will object.

Mr. ROBERT C. BYRD. Mr. President, I hope the majority leader will present his request and leave off the outside limit. I think he will have made a great deal of progress, in any event.

Mr. BAKER. Mr. President, I think that if we can get this list as we have described it, that is good progress. I will say that tomorrow, sometime, I am going to renew a request for a time certain to complete this. In any event, it is my full intention to remain in session tomorrow until we do, in fact, complete consideration of Senate Concurrent Resolution 9. I am sure every Member will understand that I am not trying to force the issue or proceed with undue haste, but tomorrow night is really the last practical time that we can devote a great deal of attention to this matter. It should be wrapped up. That will be 7 full days of consideration, I believe.

Mr. ROBERT C. BYRD. Mr. President, will the majority leader yield?

Mr. BAKER. Yes; I yield.

Mr. ROBERT C. BYRD. I join with him in the expression that there is no need to carry this beyond tomorrow. In the light of the amendments that have been enumerated, in the light of the known amendments that still exist, I should think that the Senate ought to finish tomorrow, regardless of what hour. It seems to me that with the time limits that have been established or, if they are established by the granting of the request, the Senate should be able to complete its work circa 7 p.m., give or take a little bit.

Mr. BAKER. Mr. President, I thank the minority leader.

Mr. President, I revise the request that I have made to include all of those amendments I have identified; to change the time limitation on the first Metzenbaum amendment dealing with water projects so that it is the full hour allowed by statute; and to remove the time of 7 o'clock for final disposition.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 9:30 TOMORROW

Mr. BAKER. Mr. President, may I say that even though it is 9:35 in the evening, we have spent some time on this. I have previously indicated to a number of Senators that we would still dispose or try to dispose of two amendments tonight, the amendment now pending by the Senator from Arizona (Mr. DECONCINI) and an amendment to be offered by the Senator from North Carolina (Mr. HELMS). I expect there may be rollcall votes on both of those and it may carry us as late as 10:30 or later.

I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 9:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, the Chair advises me that 8 minutes of my time has expired.

Mr. President, over the past 2 weeks, a number of amendments have been offered on the floor of the Senate that would offset recommended add-ons in a number of important program areas with reductions in travel, consultants, and other activities, normally categorized as constituting waste, fraud, and abuse. I recall vividly my distinguished colleague from Michigan, Senator RIEGLE, urging the Senate to "turn the junkyard dog loose" on these pockets of waste, fraud, and abuse.

Mr. President, as we near the end of the debate on Senate Concurrent Resolution 9, here is an amendment that gives the Senate a golden opportunity to vote up or down on whether or not we are really serious about cutting waste in a number of areas that have been well documented as major ingredients in the Government's multibillion-dollar waste, fraud, and abuse problem. My amendment offers no offsetting add-on for this program or that program. There is nothing fancy about it. It does not touch our essential National Defense Establishment nor does it affect the poor, the elderly, the handicapped, or the unemployed of this country. Pure and simple, it calls for cutting waste by $3.9 billion in 1982.

Mr. President, my amendment would expand the waste, fraud, and abuse savings suggested in section 11 of the concurrent resolution reported by the Senate Budget Committee, to include additional savings in the areas of travel; consultant services; public affairs, public relations, public information, and advertising; audiovisual and filmmaking activities; and uncollected Federal debts.

My amendment would boost total savings in section 11 of the resolution to $3,900,000,000 in budget authority and $1,700,000,000 in outlays in fiscal year 1982 while maintaining the committee-recommended estimates of $1,000,000,000 in budget authority and $2,000,000,000 in outlays in fiscal year 1983. The Senate Committee on Governmental Affairs would have the responsibility for effecting these savings through legislative modifications and program changes.

Mr. President, the Budget Committee is to be commended for bringing this package of budget-cutting instructions to the floor of the Senate in such a short period of time and with suggested budget savings across a broad spectrum of Government activities. However, let me explain briefly why I believe that these additional savings should be a part of the reconciliation instruction package that will call on all committees to report their respective savings plans to the committee in the weeks ahead.

First, Mr. President, if the called-for savings in the areas I have proposed in my amendment seem all too familiar, they should. On February 5, Senators PRYOR, SASSER, and I introduced S. 421—the General Government Expenditure Control and Efficiencies Act of 1981—which called for $3,900,000,000 in savings in travel (—$750,000,000); consultant services (—$1,000,000,000); public relations, public affairs, public information and advertising (—$150,000,000); audiovisual and filmmaking activities (—$250,000,000); and debt collection (—$1,750,000,000).

My amendment to Senate Concurrent Resolution 9 assumes savings of this magnitude in these general Government areas in fiscal year 1982. Furthermore, although the Budget Committee has been thorough in reviewing the President's proposed package of budget cuts and developing its own economy options, I have been unable to find any specific set of options, either in the resolution itself or the committee report, that indicates savings in these areas have been suggested to the appropriate legislative or appropriations committees.

It is true that on page 9 of the committee report, the committee does urge the President to implement his yet-to-be-announced administrative savings plan. But to my knowledge, no specific administrative savings have been incorporated into the committee's reconciliation totals. My amendment would set a realistic target of $3.9 billion for the Committee on Governmental Affairs to shoot for in developing its proposed legislative changes to effect savings in the areas of fraud, waste, and abuse.

I have also heard the arguments of some of my colleagues that the committee has already taken into account savings to be derived through more aggressive and efficient legislative methods of Federal debt collection. However, page 123 of the committee report makes it clear that the committee has not included specific savings in debt collection activities in its accounting of total reconciliation savings. My amendment assumes that $1.750 million in previously uncollectable bad debts can be recouped in fiscal year 1982.

Mr. President, while I commend the Budget Committee for uncovering budget reduction opportunities for the committees, I do not believe that they have gone far enough to incorporate the savings I am proposing today into their reconciliation savings totals.

Mr. President, a number of my skeptical colleagues may ask what justification there is for reductions of the magnitude assumed in my amendment to this resolution. Well, the justification for savings in the areas of travel, consultant services, Federal public relations, advertising and debt collection are sound and have been well-documented by the General Accounting Office, the Congressional Budget Office, the Office of Management and Budget—both under this administration and past administrations—by the various House and Senate authorizing committees, and by private foundations and organizations who have spent a number of years developing various strategies for reducing the size of the Federal budget. The numbers which are spelled out in detail in S. 421 and which are assumed in the total savings figure contained in my amendment to this resolution represent a consensus of savings possibilities that have been carefully reviewed and projected by these various groups.

They do not represent mere speculation or numbers "drawn out of the air" or out of a magic hat. I believe that they are realistic and achievable. Let us take a brief look at what the research of some of these organizations has uncovered in the areas of travel, consultant services advertising, public relations activities, and debt collection.

DEBT COLLECTION

The total savings figure proposed in my amendment assumes $1,750,000,000 in uncollectable Federal debts can be recouped in fiscal year 1982.

Going back to 1977, the General Accounting Office has issued no fewer than 30 reports covering, at least in part, the issue of debt collection and steps the Federal Government should be taking to go after bad debts occurring in student loan programs, VA loan programs and other Federal activities to repay Uncle Sam. Three or four GAO reports have been done exclusively on the Government-wide debt collection problem. According to the GAO, of the current $125.7 billion in Government-wide receivables due, an estimated $6.3 billion will be uncollectable—enough to fund the space program for an entire fiscal year.

The Congressional Budget Office has indicated in its report entitled "Reducing the Federal Budget: Strategies and Examples, Fiscal Years 1982–1986" that a net savings of $1.6 billion could be acheived in fiscal year 1982 through improved debt collection efforts by the executive branch, and that cumulative savings of $8.4 billion over the next 5 years may be conservative.

TRAVEL

In the area of travel, an Office of Management and Budget/General Services Administration report on Federal travel issued recently has corroborated my contention that the Federal travel budget is totally out of control. Their report which I received on February 10 shows, among other things, that over 26.8 percent of the reasons given by agencies to OMB for travel were "unknown." It was revealed that more than 25 percent of the Federal travel budget goes for information meetings, training attendance, speeches, or presentations, and conference attendance by Federal employees. So, more than 51 percent of the Federal travel budget—51 percent—goes for these low-priority activities or is required for reasons that are unknown to the agencies that spend billions and billions of tax dollars every year on travel.

As recently as December of last year, the GAO reported a number of proposals for improving the management of Federal travel and indicated that travel budgets are unreliable and that administration officials often do not know how travel money is being spent. Earlier in the year, OMB estimated that the Federal travel and transportation budget for fiscal year 1982, as reported by former President Carter, was $12.6 billion. The savings figure that I am proposing in my amendment assumes savings of $750 million in the Federal nondefense related travel and transportation budget.

ADVERTISING

In the area of advertising, the American Association of Advertising Agencies, Inc., has estimated that it spends approximately $144,300,000 a year on advertising, most of which is in the Department of Defense. The Congressional Budget Office in its report entitled "Reducing the Federal Budget: Strategies and Examples, Fiscal Years 1982–1986" indicated that $18 million in savings could be achieved by the military through the increased use of joint-service advertising.

CBO suggests that the Department of Defense has found that, for certain purposes, joint-service advertising would be most cost effective, pointing to tests that showed joint-service magazine advertising, for example, yields per dollar spent 1.5 times the number of applicant leads for recruiting as does single-service magazine advertising. The report goes on to say that joint-service advertising may also help to avoid undesirable inter-service competition for recruits. My amendment assumes savings of $30,000,000 in advertising activities next year.

How about audiovisual activities and filmmaking? According to the National Audiovisual Center within the General Services Administration, approximately $450,000,000 to $500,000,000 a year is spent on audiovisual activities, including over $53 million on motion picture, TV, and video tape, and audio production ac-

tivities. The Department of Defense alone spends well over $410,000,000 a year on audiovisual production, duplication, equipment, and supplies. The National Audiovisual Center reports that the Federal Government owned or leased 1,519 audiovisual facilities, totaling 8.9 million square feet of space in fiscal 1979. The Department of Agriculture alone owned or leased 62 such facilities; the VA, 11 facilities; and the Department of Defense, 1,074 audiovisual facilities.

Since 1978, OMB has been attempting to force agencies to consolidate or even eliminate audiovisual facilities that may be underutilized or nonessential to the Government's mission—without much success. Furthermore, the type of productions that the Federal Government has produced over the years makes it all the more clear that the Congress must recommend substantial cutbacks in this area of waste in the coming fiscal years. My amendment assumes a savings of $250,000,000 in audiovisual and filmmaking activities in fiscal 1982.

CONSULTANT SERVICES

Another area of waste and abuse that has been well-documented is the area of consultant services, contracts, and studies. Depending on whose definition you use, estimates of the amount Uncle Sam spends annually on consultant services ranges from as low as $400,000,000—an OMB estimate last year—to $2.4 billion, estimated by Senator Magnuson last year to multiples of this amount spent by the Department of Energy alone. In hearings before the Senate Governmental Affairs Subcommittee on Civil Service and General Services in the last few years, it was learned that over half of the Department of Energy's $11 billion budget was spent on outside consultants and contractors. The General Accounting Office, various congressional committees, and other outside groups have done their own evaluations of the Federal consultant "machine" and found a number of common abuses, such as failure to use competitive procurement practices in securing consultant services, excessive rates of compensation for consultants, outside consultants performing policymaking or other managerial functions that should be performed in-house by Federal employees and rampant duplication of studies which often are never used. The National Tax Limitation Committee has suggested savings of $2–3 billion in consulting services annually. My amendment to the reconciliation resolution assumes a savings of only $1 billion.

PUBLIC AFFAIRS

What about public affairs, public information, and public relations? Mr. President, as I have said many times, Government is big business and like big business the Federal Government is spending large amounts of its scarce resources on public relations, public affairs and public information programs which appear to be largely self-promotional. A 2-year comprehensive study of Federal spending programs by UPI investigative reporter Don Lambro revealed that both OMB and the Office of Personnel Management had privately estimated the cost of Government public relations, self-promotion and other public information activities of the Federal Government at over $1.5 billion a year. According to the White House Reorganization Project of 1978, more than 1,000 people from 29 different agencies are assigned to Congressional Relations at a cost of approximately $24 million.

In the Department of Agriculture alone nearly 1,000 people are employed as information media workers to handle public information and public relations duties, while the Department of Defense has a press and public affairs staff of more than 316 people in the Pentagon with another 1,200 scattered around the country to handle DOD's public relations and press activities. Add to this the 459 public affairs staff at the Department of Health and Human Services and their budget of $25.4 million and it is clear that public affairs is big, big business in the Federal Government. My amendment assumes that savings of $120 million could be realized in the area of public affairs.

Mr. President, the savings called for in my amendment to Senate Concurrent Resolution 9 are not new or creative. Many of my colleagues on this Senate floor have been out in front in the fight to bring these nonessential expenditures under control through their respective committees and through outside investigations by GAO and other groups. What this amendment will do is give the Senate Committee on Governmental Affairs, under the distinguished leadership of Chairman ROTH and Senator EAGLETON, the ranking minority member, a specific target to shoot for in developing their proposals to effect savings in the next 2 fiscal years. I believe that the areas of waste that I have outlined today are exactly the areas of spending that can and should be controlled if we are truly serious about cutting waste, fraud, and abuse in the future.

Mr. President, I urge the adoption of my amendment.

The PRESIDING OFFICER. The Senator has 8 minutes remaining.

Mr. DECONCINI. Mr. President, I yield 2 minutes to the Senator from Tennessee, without losing my right to the floor.

Mr. SASSER. I thank the Senator from Arizona for yielding.

Mr. President, there is an enormous amount of well-grounded evidence which indicates that this amendment is not only possible and reasonable in its goals, but that it is long overdue. As a matter of fact, I consider the reductions in Federal expenditures proposed in the amendment somewhat modest in their scope.

On what bases do I lay such a claim? The answer is "on some very sound bases."

Take the portion of this amendment which assumes that the Federal Government could reduce expenditures by $1.75 billion in fiscal year 1982 through improved debt collection practices by the Federal Government.

It has already been pointed out last year and this year in the Senate Governmental Affairs Committee—by me and by my colleague, Senator PERCY—that this is a conservative figure. We could easily save $2 billion a year through improved debt collection practices.

Both the Congressional Budget Office and the Office of Management and Budget, under Director David Stockman, will attest to this.

The OMB projection is grounded on the findings of a report filed earlier this year by OMB's debt collection project. This report was 17 months in the making. It was launched after the General Accounting Office, at my urging, began reporting as early as 3 years ago that there was a need for improved debt collection practices in Federal agencies.

The debt collection project conducted thorough reviews in 24 Federal departments and agencies.

The project's task force consisted of representatives and professionals from both the Government and the private sector.

What the debt collection project found—to put it bluntly—is an enormous mess. The calculation was that, at the end of fiscal year 1979, $175 billion was owed the Federal Government by individuals, organizations, and foreign governments.

That is over $230 for every household in the United States.

The report noted that, of this debt, $46.9 billion were current receivables, or money that is now due for repayment. Of this figure, $25.3 billion—or nearly 54 percent—were delinquent.

Assuming a 12-percent interest rate on governmental borrowing in fiscal year 1979, the interest cost paid by the Government in carrying $25 billion in delinquent debt amounted to $3 billion. That is $31 per family—just to carry the interest on delinquent debts owed the Federal Government.

So much more can be said, and will be said, about this issue. The Governmental Affairs Committee is committed to moving debt collection legislation as soon as possible. Senator PERCY, who I have joined in sponsoring S. 591, the Debt Collection Act of 1981, will conduct hearings next week on this subject.

This hearing will amplify and detail even further the case for debt collection legislation which was made at similar hearings which Senator PERCY and I conducted last November.

Not only that, I fully expect the administration to announce its own plans for debt collection legislation in a week or so—legislation which will encompass the debt collection bill Senator PERCY and I support, and provide for additional elements.

Clearly, the amendments before us reflects realistic proposals for reducing Federal expenditures.

For those who might question the broad, across-the-board approach implicit in this amendment, I want to commend you once again to the OMB report.

During its exhaustive reviews of the agencies in the process of compiling the report, the debt collection project noted that "many Governmentwide issues surfaced which affected many or all other agencies."

Will this approach work? I assure you it will. And in assuring you that it can and will work, I want to call your atten-

tion to my successful effort 2 years ago—an effort supported by many from both sides of the aisle here today—to direct the Federal Government to cut $500 million from its travel budget for fiscal year 1980.

Adjusted for inflation, this cut approaches the $750 million reduction in travel expenditures called for in this amendment. Such a cut was effected and can be effected again—without resulting in the elimination of a single mission or taxi ride deemed important or valuable to our national interest or security.

It is possible, also, to effect the other reductions called for in this amendment without the slightest inconvenience.

So, a vote against this amendment is a vote against the evidence that is already in.

A vote against this amendment will be a vote against a bipartisan effort on these matters that commenced several years ago and obtains today.

A vote against this amendment will be an assertion that the United States believes it is sound budgetary policy to endorse a situation which commits the Federal Government to pay $3 billion a year in interest costs alone to carry delinquent debts.

In effect, a vote against this amendment is a vote for continued participation of the Federal Government in an already overcrowded credit market—simply to keep delinquent debtors comfortable and on the books.

Finally, a vote against this amendment is a vote for inept, inexcusable, and irresponsible travel and consultant management practices on the part of the U.S. Government—practices that are costing us billions of dollars annually.

I urge my colleagues to cast aside the binds of partisan conviction and to support this amendment freely and fully.

Mr. DECONCINI. I thank the Senator from Tennessee, and I compliment him for taking the lead in the areas he has addressed this evening.

Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Is all time yielded back?

SEVERAL SENATORS. Vote! Vote!

Mr. DOMENICI. I yield myself 2 minutes.

Mr. President, the amendment that Senator DECONCINI, my good friend from Arizona, proposes is really not a reconciliation item in this instruction, and I hope everyone understands that.

Mr. President, if you will notice, it is not in the paragraphs that do mandate the committees to make changes. It is not even in the paragraph on the sense of the Senate that said committees should take certain action, but rather, this amendment would change paragraph 11, which was included at the request of the distinguished Senator from Florida, who had a letter from the chairman of the Governmental Affairs Committee, wherein he said that they hoped in that committee to pass some law changes and create some statutory revisions that would strengthen the Inspector General's offices, that would cause us to have a better chance of collecting some defaulted loans, and the like. They thought they could draw that kind of statute that might save us $2 billion.

So at the request of the Senator from Florida the committee put in some language which is not even mandatory, merely saying that the Governmental Affairs Committee should report changes to laws modifying programs within their jurisdiction which would reduce the cost of Government which result from waste, fraud, and abuse, and then the estimate that they gave was included in this language supporting the Governmental Affairs Committee.

We went along with that at the request of the distinguished senior Senator from Florida. We were very careful. It is not mandatory. It is recognizing, as the report indicates, that they hope to do that. It is not taken into consideration in the total savings. It is not part of the savings that appropriations is going to make. It is not part of the savings that the administration has committed to make through administrative kinds of changes.

It is just an additional comment requesting that they should get on with that because there is genuine concern.

Obviously, this is open for anyone to come down here and say, "If there are 2 billion, maybe there are 5." Perhaps by tomorrow we will have someone who will say, "If we can consider 3 additional billion in the Governmental Affairs"—now that is their committee that we are talking about—"maybe it should be 7." In fact we might go back to the distinguished Secretary of HEW, Mr. Califano, who said in all of his programs there was over $10 billion in waste.

I assume we could say why does not the Governmental Affairs Committee do that? I mean we should put $10 billion in there and say, "Government Affairs Committee, you should draw this," and then we can all go home when we pass that and say we passed the statute, we passed the reconciliation instruction, we saved $10 billion in waste.

The truth of it is that we did this because they told us this is approximately what they hoped to save if they could draw the appropriate changes in Inspector General laws, student loans, and hope we would not Christmas tree this item in some kind of spirit of antifraud exhilaration so that anyone who does not vote for that amendment is in favor of fraud and abuse.

I suggest that all the programs have to be rid of fraud, abuse, and waste and certainly the Governmental Affairs Committee does not have jurisdiction over the line items, the appropriations process, and everything else.

So I hope the Senate will deny Senator DECONCINI this amendment and turn it down.

Mr. HOLLINGS. Mr. President, let me yield such time on the resolution as is necessary.

Mr. President, I said during the Budget Committee consideration of this subject that it would be mischief. What it really says in section 11—I did not like it at the time—is that the Committee on Governmental Affairs should report changes in laws within its jurisdiction to reduce waste, fraud, and abuse.

We say we are not a line-itemizing committee. But it is wrong to gratuitously end a report and single out one committee and say that in the Budget Committee's opinion that subcommittee has allowed waste, fraud, and abuse to the tune of x billion dollars and that it should have been corrected. It is very interesting that the ones who recommend this are the distinguished members of the distinguished Presiding Officer's committee, namely Appropriations. We have every opportunity, if there is really that much waste, fraud, and abuse to correct it because we have the responsibility of oversight before we appropriate the money.

The best the Governmental Affairs Committee could do is hire some inspectors general. They would have to pass special laws to allow the IG's to swarm down like locusts from Washington looking in every nook and cranny for waste, fraud, and abuse. They would have to come up with some $4 billion worth in order to satisfy the amendment.

That gets to be ridiculous.

I talked a little while earlier about symbols and the reason I did not vote for one amendment because of a symbol. This is the exact opposite. The symbol here is waste, fraud, and abuse, and this will get a lot of votes if everyone identifying with the symbol said, "I know it is unrealistic, it is impractical, but I want to identify with that symbol so, therefore, I vote aye because I do not want someone back home to say that I am for waste, fraud, and abuse."

This breaks down the credibility of the entire procedure.

We never should have put this section in the resolution or the committee report in the beginning.

If we find any merit in this amendment and it passes, then I would suggest we move on to the distinguished Senator's Judiciary Committee. He serves on that committee, and he and I both serve together on the Subcommittee of Appropriations of the Judiciary. We should be able to save $1 billion there in waste, fraud, and abuse. And then we can move over to some other committees such as Commerce, or Armed Services.

They said that would be out of order because there was no authorizing legislation. But we should try to eliminate waste, fraud, and abuse, whenever it is. Rather than pick out one committee we should go after them all. However, that is unrealistic. It is also bad budget procedure. This section never should have been in the resolution in the first place. It certainly should not be increased.

The PRESIDING OFFICER (Mr. GRASSLEY). The Chair recognizes the Senator from Arizona.

Mr. DECONCINI. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Five minutes and 21 seconds.

Mr. DECONCINI. Mr. President, I compliment the ranking minority member of the Budget Committee and cer-

tainly the chairman for their efforts to do what they believe is proper.

I wish to point out a couple things.

No. 1, this amendment goes to section 11. As the Senator from South Carolina just said, maybe they should not have it in there, but it is in there.

My amendment says they shall find this type of reduction.

S. 421 is already before the Governmental Affairs Committee with itemizations of where this can be found, and it is substantiated by one report after another. I do not see how you can say it is grabbing out of the air to cut $750 million in travel out of a budget in excess of $8 billion and then when you take out the military travel you still have $4 billion plus to cut out $750 million. Just go out and do it. It does not say pull something out of the air and do it. It says here it is, folks. Cut it. Take the travel out when they are using 25 percent of it for conference and speeches and another 26 percent or so is unknown travel.

So I thank my distinguished colleagues for making the distinction that this amendment says you shall take it out and it is specific where you shall take it out.

Mr. DOMENICI. Mr. President, was the Senator going to yield back the remainder of his time?

Mr. DECONCINI. Mr. President, could I inquire of the Senator from New Mexico is he going to permit an up-or-down vote on this?

Mr. DOMENICI. Yes.

I was going to ask our majority leader if he would consider propounding a unanimous-consent request that we would defer the Senator's vote, argue the Helms amendment, and then vote one after the other, stack the Senator's amendment and then take Senator HELMS' argument. It is only 20 minutes. Then we will vote on them both and be through for the evening.

Mr. DECONCINI. Mr. President, if the Senator from New Mexico will yield, whoever is going to propound the unanimous-consent request it would be understood I would have an up-or-down vote.

Mr. DOMENICI. Yes, indeed.

Mr. HOLLINGS. The Senator has the yeas and nays ordered already.

Mr. DECONCINI. Yes, I have.

I have no objection to that.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. DOMENICI. I am pleased to yield.

Mr. BAKER. Mr. President, before I make that request, let me check with the minority leader and make sure that there are no other problems involved with that and if the Chair will indulge me just a moment I wish to make that determination.

Mr. DECONCINI. Mr. President, will the Senator yield on the amendment?

Mr. BAKER. I yield.

Mr. DECONCINI. Mr. President, I ask unanimous consent that certain newspaper articles before me be printed in the RECORD following my remarks.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Star, Mar. 5, 1981]

WAR ON WASTE IS URGED ON HILL

(By Mary Thornton)

The Reagan administration could save as much as $14 billion by implementing better management procedures that the General Accounting Office and others have been recommending for years, GAO's chief accountant testified today.

"The big problem has been in getting an administration to take real care and concern in management," Donald L. Scantlebury told the House Budget Committee. "Many agencies concentrate on carrying out programs, disbursing funds. But the other aspect—seeing that the government gets back every dollar it is entitled to—those things don't get the same concern."

Budget Committee Chairman James Jones, D-Okla., said at the hearing that this sort of government waste should be attacked before "valuable programs" are cut.

"There is waste, fraud and abuse, and this committee intends to eliminate that before valuable programs are destroyed," he said.

Scantlebury told the committee that one of the major waste problems in government is caused by poor debt collection practices—for such items as government loans and overpayments of various government benefits.

At the beginning of the 1980 fiscal year, he said, the government was owed $126 billion by U.S. citizens and organizations. Of that amount $24 billion was delinquent.

"Many agencies have not aggressively attempted to collect amounts owed the government," he said, adding that "present collection methods are expensive, slow and ineffective when compared with commercial practices."

Morris B. Silverstein, deputy inspector general for the Veterans Administraton, said his agency alone was owed $666 million in active debt as of last September, and about 25 percent of that amount was already delinquent by more than three years.

In addition, the VA had already written off more than $198 million in education benefits as uncollectable.

In another budget-related hearing today, Rep. Fernand St Germain, the House Banking Committee chairman, told budget director David Stockman he wants evidence the administration's economic plan will work before Congress starts trimming the budget.

St Germain's committee has jurisdiction over nearly half of the president's proposed budget cuts for fiscal 1982—more than $20 billion. He noted that many cuts "come out of housing and community development programs—a substantive shift of priorities and a major downgrading of our commitment to urban communities."

"If we are to change our commitment to the cities, if we are to change the lives of millions of hard-working Americans, I suggest we do it with the proper evidence in hand before the fact," he said.

At the White House today, a group of conservative Democrats breakfasted with Reagan and offered him their proposals for cutting an additional $11.2 billion in federal spending.

The Congressional Conservative Democratic Forum suggested budget reductions that included eliminating the Legal Services Corporation, cutting foreign aid, repealing the Davis-Bacon Act, and eliminating housing costs from the calculation of the government cost-of-living index.

Rep. G. V. Montgomery, D-Miss., said after the breakfast with Reagan that the president will propose a slowdown in construction of Veterans Administration hospitals and an increase in interest rates on loans taken out against VA life insurance policies.

He said Reagan told the group that there would be "some cutback in personnel in (VA) hospital care," but that doctors and nurses would not be cut.

In the Senate, Majority Leader Howard Baker of Tennessee reiterated his predictions of quick action on the president's economic proposals. He told reporters he hopes Congress can complete work on the package by the beginning of the July 4 recess.

"That may be a very optimistic estimation, but it's possible to do that and I hope we will do that," he said.

At the Budget Committee hearing, GAO accountant Scantlebury and four acting and deputy inspectors general from several agencies asked for stronger power to go after delinquent debts owed to the government.

Among their proposals are:

Reporting delinquent debt to private credit bureaus to affect the credit ratings of persons who do not pay their government debts.

Using private collection bureaus.

Charging higher interest rates on delinquent debt. Some government programs collect no interest at all and others are far below market rate.

Using the Internal Revenue Service to track down delinquent debtors.

Collecting debts out of income tax refunds. And in the case of federal employees who owe money to the government, they are asking for authority to withhold the money from the employee's paycheck.

Scantlebury predicted that as much as $6 billion a year might be saved through these methods, and much more might be saved if the government acted on existing GAO audits that have been ignored in recent years.

He said there are at least $24.9 billion in funds involved in audits that have not been acted upon, and that part of that money would go to the government and part to the general public.

[From the Washington Post, Mar. 27, 1981]

REAGAN FORMS COUNCIL TO BATTLE FRAUD, WASTE

(By Lee Lescaze)

The twin evils of government fraud and waste loomed large on President Reagan's campaign enemies list and yesterday the president formed a new organization with a squeaky-clear name, the President's Council on Integrity and Efficiency, to root the two from federal programs.

At the same time, the president appointed the first six inspectors general to fill the 16 vacancies he created, when he fired all of these agency watchdogs on his first full day in office Jan. 21. Five of the six Reagan chose yesterday were among the 16 he fired.

"We will not rest with today's announcement. We will not simply tuck this event away and go on with business as usual," the president said as he signed the executive order establishing the new council.

"We are going to follow every lead, root out every incompetent, and prosecute any crook we find who's cheating the people of this nation," Reagan added.

The anti-fraud and waste council will be chaired by Edwin Harper, deputy director of the Office of Management and Budget, and is designed to facilitate interdepartmental cooperation, the president said.

Harper said that while no additional staff will be given to the inspectors general, they will have greater resources because of closer cooperation with the FBI.

He said that the audit functions of the government are estimated to have saved $4 billion over the last two years. "That's a fairly hard figure," he said.

In introducing five of the six newly appointed inspectors general to reporters, Harper insisted that it had made sense to fire them all and then examine their qualifications. He described the inspectors' func-

tions as vital but denied that firing all of them had disrupted the work of their offices.

Not all was running smoothly even with the appointment process, however. Frank S. Sato, who before Jan. 21 was the inspector general at the Transportation Department and was appointed to the same position at the Environmental Protection Agency yesterday, was absent, apparently because he had no advance warning of his new appointment. One of the other inspectors said Sato didn't know of his new job as of yesterday morning.

Harper said the 10 other inspectors general will be named very soon and that two of them will be persons who held such jobs before the Reagan purge.

The purge has been criticized by various members of Congress, mostly Democrats, who have said that the supposedly nonpartisan inspectors were being politicized by the Reagan White House. In the latest such charge, six House Commerce and Energy subcommittee chairmen sent a protest to the White House charging that White House political director Lyn Nofziger and other White House aides were playing significant roles in choosing the new inspectors.

Harper denied the charge. He said Nofziger saw the final list of candidates, but "he did not veto any candidate."

In addition to Sato, the inspectors general named yesterday are: Robert L. Brown, a retired Foreign Service officer, for the State Department; Paul R. Boucher, reappointed to the Small Business Administration; James B. Thomas, reappointed to the Education Department; Thomas F. McBride, moved from the Agriculture Department to the Labor Department, and Charles L. Dempsey, reappointed to the Department of Housing and Urban Development.

[From the Washington Star, Mar. 22, 1981]

REAGAN TO ATTACK U.S. WASTE FRAUD ON BROAD SCALE

(By Jeremiah O'Leary)

President Reagan is preparing to open a broad attack on waste and fraud in the federal government on several fronts this week.

White House press secretary James S. Brady disclosed yesterday that as one of the first steps the administration will soon announce a number of criminal and civil actions charging individuals and federal agencies with misuse or waste of government funds.

Brady said the White House will concentrate heavily on Reagan's determination to wipe out misuse of government funds, which he described as the "fifth leg" of the president's economic recovery program. The other four, he said, are the budget reductions, tax cuts, control of the money supply and regulatory reform.

"This is going to be waste and fraud week here," Brady told reporters.

Brady said the President will launch the week's activities by meeting tomorrow with former Comptroller General Elmer B. Staats, who stepped down March 7 as head of the General Accounting Office, Congress' watchdog agency. Congressional leaders have submitted the names of eight possible nominees to succeed Staats and these are now being screened by the White House personnel staff.

GAO's auditors routinely investigate federal programs and agencies and report to Congress on millions and even billions of dollars they believe are being misspent.

Reagan also will sign an executive order creating a new Presidential Council on Integrity and Efficiency in Government to find waste and abuse in government spending. The council will be made up of employees of the Office of Management and Budget and representatives of Cabinet departments.

Brady said some of the 15 present inspectors general will be retained and others will be replaced. Reagan's choices, he said, will meet the requirement that they be "meaner than junkyard dogs."

Another presidential order this week will require that all government agencies cut back on publications and films. It is expected that Reagan will order that no new publications or films be prepared or issued without a departmental review and OMB approval.

"We are determined to put the brakes on publications of this kind," Brady said.

Citing former Attorney General Benjamin Civiletti's estimates that from 1 to 10 percent of the federal budget is consumed by waste and fraud, Brady said the administration believes that Reagan's measures will save at least $7 billion of the $765 billion federal budget.

Brady declined to give any hint as to which agencies or individuals might be implicated in either criminal or civil fraud.

"We don't want them to know who has been caught until we are ready to make some announcements in the next few days," Brady said. He also declined to say what kind of fraud is involved.

"There are a number of investigations that have been continuing under the inspectors general of the departments," Brady said. "We will be highlighting the role that the FBI and the departmental inspectors played."

Reagan made waste and fraud in government one of the key points of his presidential campaign, calling their elimination an integral part of his program for economic recovery.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I withdraw my request for recognition.

I understand there might not be an agreement to stack votes, and I will not make that request at this time.

The PRESIDING OFFICER. Who yields time? The Senator from New Mexico.

Mr. DOMENICI. I yield back our time.

Mr. DECONCINI. I yield back my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Arizona. The yeas and nays have been previously ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Nevada (Mr. LAXALT), and the Senator from South Dakota (Mr. PRESSLER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. WILLIAMS) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators wishing to vote?

The result was announced—yeas 43, nays 53, as follows:

[Rollcall Vote No. 67 Leg.]

YEAS—43

Baucus	Dodd	Melcher
Bentsen	Eagleton	Metzenbaum
Biden	Exon	Mitchell
Boren	Ford	Moynihan
Bradley	Glenn	Nunn
Bumpers	Hart	Pell
Burdick	Heflin	Pro"mire
Byrd, Harry F., Jr.	Huddleston	Pryor
	Inouye	Randolph
Byrd, Robert C.	Jackson	Riegle
Cannon	Johnston	Sarbanes
Chiles	Kennedy	Sasser
Cranston	Leahy	Tsongas
DeConcini	Levin	Zorinsky
Dixon	Matsunaga	

NAYS—53

Abdnor	Hatch	Packwood
Andrews	Hatfield	Percy
Armstrong	Hawkins	Quayle
Baker	Hayakawa	Roth
Boschwitz	Heinz	Rudman
Chafee	Helms	Schmitt
Cochran	Hollings	Simpson
Cohen	Humphrey	Specter
D'Amato	Jepsen	Stafford
Danforth	Kassebaum	Stennis
Denton	Kasten	Stevens
Dole	Long	Symms
Domenici	Lugar	Thurmond
Durenberger	Mathias	Tower
East	Mattingly	Wallop
Garn	McClure	Warner
Gorton	Murkowski	Weicker
Grassley	Nickles	

NOT VOTING—4

Goldwater	Pressler	Williams
Laxalt		

So Mr. DECONCINI's amendment (UP No. 41) was rejected.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, that will be the last rollcall vote tonight.

Do I understand, Mr. President, that the distinguished Senator from North Carolina is to be recognized to call up an amendment?

The PRESIDING OFFICER. The Senator is correct.

The Senator from North Carolina.

Mr. MOYNIHAN. Mr. President, may we have order?

The PRESIDING OFFICER. The point of the Senator from New York is well taken. The Senate is not in order. Will Senators who wish to converse retire to the cloakrooms?

The Chair recognizes the Senator from North Carolina.

UP AMENDMENT NO. 44

(Purpose: To require additional reductions in appropriations by the Senate Finance Committee)

Mr. HELMS. Mr. President, I have an amendment at the desk which I call up and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS), for himself and Mr. JEPSEN, proposes an unprinted amendment numbered 44.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 17, strike "$52,144,000,000" and insert in lieu thereof $52,925,000,000".

On page 2, line 18, strike "$36,945,000,000" and insert in lieu thereof "$37,045,000,000".

On page 2, line 19, strike "$59,023,000,000" and insert in lieu thereof "$59,328,000,000".

On page 2, line 20, strike "$47,694,000,000" and insert in lieu thereof "$47,794,000,000".

On page 7, line 15, strike "$4,354,000,000" and insert in lieu thereof "$4,454,000,000".

On page 7, line 16, strike "$9,354,000,000" and insert in lieu thereof "$9,454,000,000".

On page 7, line 17, strike "$4,494,000,000" and insert in lieu thereof "$4,594,000,000".

On page 7, line 18, strike "$10,870,000,000" and insert in lieu thereof "$10,970,000,000".

Mr. HELMS. Mr. President, this amendment would restore the President's proposed level of spending in the Finance Committee's direct spending account. In effect, this amendment would reduce the Budget Committee's recommendations by $100 million.

The $100 million was added to the Finance Committee's direct spending account. The report suggests that this is for social security title XX grants to States, and the Budget Committee staff has told me that it is for the purpose of making funds available for the provision of legal services to eligible clients.

The Committee on Labor and Human Resources, as the distinguished occupant of the Chair knows, had originally proposed in its report language to terminate the Legal Service Corporation and to authorize $100 million in the Corporation's account for the purpose of block grants to States.

But the Budget Committee zeroed the Labor and Human Resources proposal, which would have required normal authorization and appropriation, and added $100 million to the Finance Committee direct spending account—and let me emphasize this—which is an entitlement program bypassing the normal appropriations process.

The presence of an extra $100 million in the Reconciliation Act, intended—but nonbinding—for the provision of legal services, is an open invitation to future lobbying and pressure to maintain or restore the Legal Service Corporation.

Because the specific recommendations of the reconciliation are nonbinding, the $100 million extra need not be used as block grants as the Budget Committee intended. There could be—and, in this Senator's view, there would be—a push by the Legal Services Corporation and its allies to use that room in the budget process to rescue the Corporation down the road.

That must not be permitted. We must strike the $100 million now.

Mr. President. let me read into the RECORD a very brief letter from David Stockman.

MARCH 30, 1981.

DEAR JESSE: This is to advise you that the Administration strongly supports your efforts to restore the budgetary savings proposed by the President in his Social Services block grant proposal. Specifically, we support your amendment to add $100 million in savings to the Social Services block grant reconciliation instructions to eliminate funds earmarked for legal services.

We appreciate your leadership in this important matter and wish success for your efforts.

Sincerely,

DAVID A. STOCKMAN,
Director.

Mr. President, the Legal Services Corporation, as is clear to anyone who has monitored its past actions and ongoing activities, is terminally afflicted with a compulsion to violate the law which led to the creation of the Corporation.

The fact is. Mr. President, the Legal Services Corporation has festered into a gaggle of political activists run amok. In 1965, the Office of Legal Services was created, within the Office of Economic Opportunity, with a budget of $1.3 million. By 1975, its cost to the taxpayers had grown to $90 million, rising to $157.4 million in 1978, $261 million in 1979, and a proposed $321.3 million in the Senate bill for 1981. The 1981 figure is 3½ times the amount authorized just 6 years ago.

Let us talk about lobbying by this crowd, Mr. President. If you want any fresh proof of what is going on, all you had to do was go outside this Chamber all day long and you would see what I am talking about. This afternoon, this evening, and probably at this very minute, officers and representatives of the Legal Services Corporation have been outside in the lobby, lobbying Senators to vote against my amendment. Evidently, they hope it will in some way keep this outfit in business. Obviously, Mr. President, these lobbyists for the Legal Services Corporation understand that there is $100 million in this resolution which can be used to preserve their jobs and preserve this Corporation, which ought to be given the deep six treatment right now. Directly or indirectly they envisage the money coming back to them. Otherwise, they would not be engaged, as they have been engaged, all day long in lobbying Senators.

Mr. President, at this point I ask unanimous consent to have printed in the RECORD a story by Walter Pincus in the Washington Post of Monday, March 30, 1981, entitled "Legal Services Corp. Suits Itself, Waves Red Flag at Reagan."

Mr. President, I also ask unanimous consent that the regulations discussed in this article, proposed by the Legal Services Corporation as they appear in the Federal Register, be printed in the RECORD immediately following the news story.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

RED FLAG AT REAGAN

(By Walter Pincus)

"They have put a gun to their head and pulled the trigger."

That was the way one conservative caller last week described the comprehensive civil rights regulations proposed earlier this month by the Legal Services Corp. and published in the March 23 Federal Register (page 18055).

They include all the rules that drive Reagan conservatives crazy—nondiscrimination against homosexuals, requirements for bilingual employees, affirmative action plans to guarantee employment of women and minorities at levels that reflect "appropriate labor force characteristics," and inclusion of drug addiction and alcoholism as diseases that would qualify someone as being a "handicapped person" and thus protected from discrimination.

LSC, you must remember, is the nonprofit corporation that supports legal services for the poor by distributing $300 million in federal grants and contracts to local organizations, which use the money to pay for lawyers and other legal specialists in almost every county across the nation.

President Reagan has long had a distaste for the federally supported legal services program, and his administration, as part of the budget-cutting effort, has marked LSC for elimination next year.

An LSC official conceded that the agency's board was aware that the proposed regulations, developed before the White House termination plan was announced, would be a red flag for the Reaganites. But LSC decided to put the rules out for comment anyway because "this was our position."

The purpose of the proposed rules, according to the notice, "is to prevent discrimination by legal services programs supported in whole or in part by Legal Services Corp. funds in the delivery of services or in employment. . . ."

The proposed rules, which for the most part codify procedures in effect since LSC's establishment in 1974, add a prohibition against discrimination by reason of "sexual orientation." That phrase, an LSC official said, refers to homosexuals.

The agency, she added, decided to prohibit discrimination against homosexuals because similar policies have been adopted by the District of Columbia and other state and local entities.

The rules, however, also bar recipients of LSC funds from having "any contractual or other relationship" with other agencies or organizations including "labor unions, (or) organizations providing or administering fringe benefits to employees of the recipient . . ." if the agencies discriminate against specified groups, including homosexuals.

That provision, according to my outraged caller, "would eliminate the Catholic Church groups." Not so, according to the LSC official, and if it did, the rule would be altered. "That is why we have put it out for comment."

Another provision that's bound to draw criticism is one that says a recipient of LSC funds cannot "make a preemployment inquiry as to whether an applicant is a handicapped person or as to the nature of or severity of a handicap except where the examination or inquiry is related to an essential job function."

What about drug addiction and alcoholism, which LSC includes as characteristics of a certain kind of "handicapped person"? On first blush, the LSC official said a lawyer certainly could be questioned, but there was doubt about other job applicants.

Fund recipients under the rules would be required to provide bilingual employes, "not limited to clerical positions," in "any area where 5 percent of the eligible population are members of a minority language group." They also must provide informational literature in the appropriate languages and post signs in those languages. The percentage requirement was taken from the federal voting rights law, which requires ballots to be bilingual in areas where 5 percent of the population speaks a language other than English.

Grant recipients that have 50 or more employes must have an affirmative action plan approved by LSC's director of office of equal opportunity. Before producing such a plan, the recipient must "determine if underutilization on the basis of race, national origin or sex occurs in any job category or unit of its workforce" using a formula supplied by LSC.

Its plan must include "goals and timetables to correct underutilization of women and minorities." In those instances where a recipient is found to have an employe "workforce or segment of the workforce not on parity with the relevant labor market," approval of higher authorities would be needed before any vacancies were filled.

In the Carter years, LSC's rules would have raised a few eyebrows; today they may hasten the lowering of the boom.

Mr. HELMS. Mr. President, I ask unanimous consent that the regulations proposed by the Legal Services Corpora-

tion, as appeared in the Federal Register, be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[Legal Services Corporation, 45 CFR Part 1624]

COMPREHENSIVE CIVIL RIGHTS REGULATIONS

Agency: Legal Services Corporation.

Action: Proposed rules.

Summary: This regulation is intended to be a comprehensive statement of all grant and contract related civil rights obligations of Corporation recipients in both the delivery of services and in their employment practices. The present Part 1624 would be incorporated into the proposed civil rights regulation. This regulation would now include the Corporation's 504 regulations, present part 1624, as well as all of the other civil rights obligations of Corporation fund recipients.

Date: Comments due April 22, 1981.

Address: Legal Services Corporation, 733 Fifteenth Street NW., Washington, D.C. 20005.

For further information contact: Linda Hanten, 202-272-4010.

Supplementary information: While the proposed regulation seeks to guarantee the civil rights of a number of groups distinctions are made among the protected groups in the treatment required. For example, recipients are required to take affirmative action as to the employment of women and minorities and not as to the employment of members of other groups protected by the regulation. The regulation requires affirmative action to be taken only as to women and minorities because they are the groups traditionally given such protection. These groups have been afforded such protection because they, unlike the other groups protected by this part, historically have been unable to remedy discrimination against them through the political process.

An additional distinction made among the protected groups by the regulation is the provision of "special" services to persons with communication problems, e.g., language minorities, the hearing impaired and the blind. These services are provided because without them legal services would not be available to members of these groups. Additionally, Section 1006(b)(6) of the Act requires the Corporation to provide that the language of non-English speakers be used in the provision of services where they constitute a significant number of the client population.

As used in this part, minority language groups are defined as Asians, Native Americans, Alaskan Natives and persons of Spanish origin. This is the definition used in the Voting Rights Act, 42 U.S.C. 1973aa, which requires elections to be conducted in the appropriate minority language(s) as well as in English in political jurisdictions where members of a minority language group make up five or more percent of the population. This definition is used here, as it was in the Voting Rights Act, because these groups and their number can be determined from census data. There is presently no nation or region-wide data base which can be used to identify persons who do not speak English or persons from other linguistic groups not listed in this definition. The use of this definition is not intended to preclude programs from offering services in other minority languages when the program has the desire to do so or the ability to make a reasonable determination that more than five percent of the residents of its service area belong to another linguistic group.

The Civil Rights Regulation, in particular the provisions governing antidiscrimination, is not intended to prevent the adoption of priorities which by their nature would have the effect of foreclosing services to one or more of the protected classes. The statute, 42 U.S.C. 2996f, clearly requires that there be priority-setting at the local level. The Civil Rights Regulation merely defines what purpose (discrimination against one of the protected classes) may not serve as a basis for establishing priorities.

For example, if a program picks Supplemental Security Income but not Aid to Families with Dependent Children practice as a priority, the fact that a particular age group, young adults, is not represented in connection with AFDC claims or that the program services primarily seniors does not itself create a prima facie case of discrimination. It merely reflects that the program has established priorities which, when complied with, result in the program serving clients in a particular age group. However, a program may not use the priority-setting process as a justification for failing to serve a particular protected group. The Corporation will monitor those programs having the greatest disparity in the delivery of legal services on any prohibited basis.

It is proposed to revise Part 1624 to read as follows:

PART 1624—COMPREHENSIVE CIVIL RIGHTS REGULATIONS

Subpart A—General

Sec.
1624.1 Purpose.
1624.2 Applicability.
1624.3 Definitions.

Subpart B—Discrimination

1624.4 General.
1624.5 Discrimination prohibited—in the provision of legal services.
1624.6 Discrimination prohibited—employment practices.

Subpart C —Required recipient civil rights program

1624.7 Assurance.
1624.8 Data and information requirements.
1624.9 Required recipient civil rights program—delivery of services.
1624.10 Required recipient civil rights program—employment.

Subpart D—Conduct of investigation and review

1624.11 Monitoring.
1624.12 Complaint process.

Subpart E—Procedure for effecting compliance

1624.12 Remedies.

Authority: Secs. 1005(b)(2), 1006 (a), (b)(1)(A) and (b)(6) of the Legal Services Corporation Act, (42 U.S.C. 2996d(b)(2), 2996e(a), (b)(1)(A) and (b)(6)).

The proposed Regulation is as follows:

Subpart A—General

§ 1624.1 Purpose

The purpose of this part is to prevent discrimination by legal services programs supported in whole or in part by Legal Services Corporation funds in the delivery of services or in employment on the basis of race, religion, color, sex, age, marital status, national origin, handicap, political affiliation or sexual orientation. Further, it is the purpose of this part to assist such programs in establishing policies and procedures to ensure equal opportunity in the delivery of services and employment and affirmative action in employment to end the underutilization of certain protected groups in their work forces. This part is adopted in accordance with Secs. 1005(b)(2), 1006(a), 1006(b)(1)(A), 1006(b)(6) of the Legal Services Corporation Act; 42 U.S.C. 2996d(b)(2), 2996e(a), 2996e(b)(1)(A), 2996e(b)(6).

§ 1624.2 Applicability

This part applies to all recipients of Legal Services Corporation funds.

§ 1624.3 Definitions

As used in this part, the term:

(a) "Protected Groups" means those groups which have been historically subjected to discrimination on the basis of race, color, national origin, sex, religion, or sexual orientation;

(b) "Affirmative Action" means specific steps, in recruiting, hiring, promotion and other areas, which are taken for the specific purpose of eliminating the present effects of past discrimination;

(c) "Goals" means projected levels of achievement arrived at through analysis of employment utilization patterns and consideration of what may reasonably be done to remedy any apparent underutilization given labor force participation and unemployment rates of minorities and women in the labor market area and the expected rate of turnover and the projected number of new positions in the employer's work force;

(d) "Underutilization" means having fewer minorities and/or women in the particular job category than would reasonably be expected given their availability in the relevant labor market area, or employing persons in jobs that do not adequately use their skills, training or capabilities;

(e) "Relevant labor market area" means the area from which an employer can reasonably expect to recruit or draw applicants for positions in a given job category;

(f) "Delivery of services" means providing or making legal services available to eligible clients of a recipient's service area;

(g) "Facility" means all or any portion of buildings, structures, equipment, roads, walks, parking lots, or other real property or interest in such property;

(h)(1) "Handicapped person" means any person who (i) has a physical or mental impairment which substantially limits one or more major life activities, (ii) has a record of such an impairment, or (iii) is regarded as having such an impairment;

(2) As used in subparagraph (1) the phrase:

(i) "Physical or mental impairment" means (A) any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological; musculoskeletal; special sense organs; digestive; genitourinary, hemic and lymphatic; skin; and endocrine; or (B) any mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities. The phrase includes, but is not limited to, such diseases and conditions as orthopedic, visual, speech and hearing impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, mental retardation, emotional illness, and drug addiction and alcoholism;

(ii) "Major life activities" means functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning and working;

(iii) "Has record of such impairment" means has a history of, or has been misclassified as having a mental or physical impairment that substantially limits one or more major life activities;

(iv) "Is regarded as having an impairment" means (A) has a physical or mental impairment that does not substantially limit major life activities but is treated by a legal services program as constituting such a limitation; (B) has a physical or mental impairment that substantially limits major life activities only as a result of the attitudes of others toward such impairments; or (C) has none of the impairments defined in paragraph (c)(2)(i) of this section but is treated by a recipient as having such an impairment;

(i) "Qualified handicapped person" means: (1) With respect to employment, a handicapped person who, with reasonable accommodation, can perform the essential functions of the job in question; (2) with respect

to other services, a handicapped person who meets the eligibility requirements for the receipt of such services from the recipient;

(j) "Employment test or criteria" means any performance measure used as a basis for an employment decision including all formal, scored, quantified or standardized techniques used to assess the suitability of an applicant for a particular job;

(k) "Minority language group" means persons who are American Indian, Asian American, Alaskan Native or of Spanish heritage;

(l) "Labor force characteristics" means the demographic, racial, ethnic, sex and educational characteristics of the population of an employer's relevant labor market area or areas; and

(m) "Terms, conditions and privileges of employment" means all aspects of the employment relationship including compensation, fringe benefits, physical environment, work-related rules, work assignments, training and education and opportunities to serve on committees and decision making bodies.

Subpart B—Discrimination

§ 1624.1 General

No person shall be subjected by a recipient to discrimination in the provision of services, treatment, or employment practices on the basis of race, religion, color, sex, age, marital status, national origin, handicap, political affiliation or sexual orientation.

§ 1624.5 Discrimination prohibited—In the provision of legal services

(a) No recipient to which this part applies shall directly or through contractual or other arrangements discriminate against an individual in the provision of services on the grounds of race, religion, color, sex, age, marital status, national origin, handicap, political affiliation or sexual orientation.

(b) (1) A recipient, in determining the type of services, aid or benefits which will be provided, or the manner in which such services, aid or benefits shall be offered, may not directly or through contractual or other arrangements, utilize criteria or methods of administration with the purpose of subjecting individuals to discrimination on the basis of race, religion, color, sex, age, marital status, national origin, handicap, political affiliation or sexual orientation or which have the effect of substantially impairing accomplishment of the objectives of the program with respect to individuals on one of the bases outlined above.
